GENERAL NOTES

GENERAL:

The "Naval Vessel Register", (published semi-annually on 1 January and 1 July with intermittent changes published 1 April and 1 October), supersedes the publications "Bureau of Ordnance Vessel Register", "List of U.S. Naval Vessels" (NAVSHIPS 250-005), and "U.S. Navy Symbols" (NAVSHIPS 1851, Report No. 58).

Questions regarding data contained in the "Naval Vessel Register" should be addressed to the Chief of the Bureau of Ships (Code 558), Navy Department, Washington 25, D.C., or by telephone to Navy extension 3811. It is requested that any mistakes or omissions be similarly reported.

Inquiries concerning distribution should be addressed to the Chief of the Bureau of Ships (Code 250), Navy Department, Washington 25, D.C., or by telephone to Navy extension 2051.

U.S. NAVY TYPES:

In accordance with Secretary of Navy directive the types of vessels are divided into two sections. "List of Naval Vessels" and "List of Service Craft." The types are arranged alphabetically in the above mentioned listings. (See "Nomenclature" pages 11-13 for types included in each list and pages 15-18 for the page number of each type in the Register). Data relating to Small Landing Craft is not included in the "Naval Vessel Register", however the designations are listed on page 14 for reference.

NAME:

The number of letters is limited to nineteen; abbreviations are used where the number exceeds this figure. Vessels returned from Foreign Governments, former type, and for Service Craft miscellaneous pertinent data is included in this column.

STRICKEN:

Vessels marked "S" in this column are those which have been stricken from the "List of U.S. Navy Vessels" or "List of Service Craft." These vessels are not included in the net count of vessels of each type on hand (Except AO and AOG vessels listed under U.S. Naval Tankers).

CLASS:

The classes of active, reserve and building vessels are shown by a one-letter code. A key to this code appear on pages 22-35.

HOME YARD:

Home yards are shown by a two-letter code having the following meanings:

BS - Boston	MI - Mare Island	PH - Pearl Harbor
CH - Charleston	NF - Norfolk	PS - Puget Sound
CV - Cavite	NY - New York	PT - Portsmouth
LB - Long Beach	PA - Philadelphia	SF - San Francisco

GENERAL NOTES (CONT.)

HOME PORT: Home ports are shown by a two-letter code having the following meanings:

AD - Adak Island, Alaska
AN - Annapolis, Md.
AR - Argentia, New Foundland
BA - Balboa, Canal Zone
BI - Bermuda Islands
BM - Bremerton, Wash.
CC - Corpus Christi, Texas
CS - Coco Solo, Canal Zone
DC - Washington, D.C.

PH - Pearl Harbor

(Additional Post War Stations included in Berthing Areas above.)

GENERAL NOTES (CONT.)

VESSEL STATUS AND STATUS CODE:

A key to the Vessel Status and Status Code and an explanation of same appears on page 36-39 . The information relative to the ultimate assignment status of the vessels (Active, Reserve, Naval Reserve Training, etc.) is based on the records of the Chief of Naval Operations corrected to date. It has been approved for planning purposes only, and is subject to considerable changes. A summary of the planned ultimate assignment by ship types appears on pages 19-21 . See Table of Contents for the listings of the vessels in the various status.

TOTALS:

After the last ship of each type there appears in the left-hand column a total of ships of that type "On Hand." This figure also includes vessels under construction and those accepted in a partially completed status or those on which work was suspended.

STATUS DATE:

For vessels scheduled to be included in the Active and Reserve Fleet the status date is the date of assignment to Active or Reserve; for vessels building "Status Date" is the date of CNO assignment of status shown; for vessels "To be Disposed of" the date of the directive for disposition or directive for decommissioning; for vessels assigned to Naval Reserve Training the date of the directive assigning the vessel; for vessels in the remaining status categories the date used is the actual date of the loss, lease, cancellation, return to owner, or other type of final disposition.

FLEET ASSIGNMENT:

A key to the fleet or frontier assignment code is listed on page 40 . **For service craft the code of the district or command assigned is listed on page 40.**

TYPE PROCUREMENT:

(1) New Construction - Vessels built under a Navy Contract or Project Order.

(2) Acquisitions - Vessels acquired by the Navy either with or without conversion.

GENERAL NOTES (CONT.)

COMPLETION DATE:

The date when the vessel reached end of construction or for a vessel under construction the date it is estimated to reach end of construction. For vessels acquired by the Navy the completion date is the date of completion of actual construction as a private vessel. The completion date of vessels under construction is taken from the latest Bureau of Ships Monthly Progress Report.

ELECTRIC:

Ship's service electric power at the switchboard is indicated by the following codes:

0 - 120/208-volt 3-phase 60-cycle A.C.
1 - 440-volt 3-phase 60-cycle A.C.
2 - 230-volt D.C. with supplementary 440-volt 3-phase 60-cycle A.C.
3 - 115-volt D.C. with supplementary 440-volt 3-phase 60-cycle A.C.
4 - 230-volt 3-phase 60-cycle A.C.
5 - 230-volt D.C.
6 - 115-volt D.C.
7 - 230-volt single-phase 60-cycle A.C.
8 - 32-volt D.C.
9 - 28 1/2-volt D.C.
X - Miscellaneous electric power not covered above

The supplementary A.C. referred to is supplied on many ships by motor-generators of very limited capacity and may not be available for mount power drives. No attempt is made to show any supplementary power except 440-volt A.C., although most ships have 115 volts for lighting, etc. The following ships have 230-volt D.C. lighting: AF19, 40; AGS4; AP6, 117; IX110, 156, 157. All voltages are approximate.

HULL MATERIAL:

Figures in this column have the following meanings:

1 - Steel hull and superstructure
2 - Wood hull and superstructure, steel frames
3 - All wood except engines and equipment
4 - Concrete hull, steel frames or reinforcing
5 - Wood hull, steel superstructure and bulkheads

HULL MATERIAL: (Continued)

6 - Steel hull, wood superstructure
7 - Wood hull and superstructure, steel bulkheads
8 - Iron hull
9 - Wood hull, steel superstructure

LENGTH OVERALL:

The length of the vessel measured from the foremost point of the stem to the aftermost point of the stern. In the case of aircraft carriers, the length overall includes overhanging of flight deck, if any. In case of net laying ships, the length overall includes net handling horns. Dimensions are listed in even feet. Inches under six are discarded and inches of six and over are called an even foot.

EXTREME BEAM:

The extreme width of the hull of the vessel over plating, fenders, or guard for surface vessels. Maximum width at or below main deck. For aircraft carriers CV, CVB, CVL, CVE, only, maximum width at or about flight deck including any projections such as gun sponson, at nearby deck levels. Dimensions are listed in even feet. Inches under six are discarded and inches of six and over are called an even foot.

DRAFT:

Where limiting drafts were available they have been included herein, otherwise full load drafts, maximum navigational drafts or the only available figures have been listed.

TRIAL SPEED:

The speeds included are obtained from the Standardization trials of certain vessels of the class at the designed shaft horsepower. In case where no trials have been run or where model tests were not made, speeds given are designed or maximum speeds. "NS" in the speed column signifies that the vessel is non self-propelled.

STANDARD OR LIGHT DISPLACEMENT: Standard displacements are given for Combatant types and light displacement for all other types. Those considered Combatant types are BB, CA, CB, CL, CLC, CV, CVB, CVE, CVL, DD, DDE, DDK, DE, SS, SSA, SSG, SSK, SSO, SSP, and SSR, also the following if they were reclassed from any of the foregoing, DM, DMS, AG, APD, AVD. Standard displacement of a surface vessel is the displacement of the vessel, complete, fully manned, engined and equipped for sea, including all armament and ammunition, equipment, outfit, provisions, and fresh water for crew, miscellaneous stores and implements of every description that are intended to be carried in war, but without fuel or reserve feed water on board. Standard displacement of a submarine is the surface displacement of the vessel complete (exclusive of the water in non-watertight structure), fully manned, engined and equipped ready for sea, including all armament and ammunition, equipment, outfit, provisions for crew, miscellaneous stores and implements of every description that are intended to be carried in war, but without fuel, lubricating oil, fresh water or ballast water of any kind on board. Light displacement is the displacement of the vessel complete, ready for service in every respect, but without ammunition, stores, fresh water, fuel or reserve feed water. No water in boilers or in machinery. Officers and men and their effects not on board. No water in trimming tanks or in double bottom. Permanent ballast added for stability reasons is included in the figures given herein.

VESSELS LOST: Vessels lost since 1 September 1939, are listed on pages 314-325.

VESSELS TO BE DISPOSED OF: All vessels surplus to Navy needs that have not been disposed of, vessels scheduled for return to owner, and to be transferred are included in the above listing on pages 307-313. (List is broken down into vessels "stricken" and "not stricken").

VESSELS ASSIGNED NAVAL RESERVE TRAINING: Vessels assigned to Naval Districts for the training of Naval Reserves. These vessels are listed on pages 302-305.

VESSELS DISPOSED OF; All vessels actually disposed of since 1 September 1939 (except losses), and vessels actually transferred or returned to owners are included in this group listed on pages 330-424.

VESSELS LOANED: Vessels loaned are listed on pages 326-329.

VESSELS LEASED: Vessels leased to Foreign Governments which have not been returned to the United States, are listed on pages 425-443. Vessels lost or stricken while leased are listed on pages 435-436. These vessels are indicated by an "S" and have "Lost" so indicated in the name column.

ALPHABETICAL LIST: Following universal Maritime practice vessels are listed alphabetically by first name or word.

FORMER NAMES: Former names of vessels acquired and Navy name assigned are included in this list. Navy names which have been changed are also included in this list. Last designation assigned vessels is shown. NAVY names are in capital letters.
