| VTX M Series is JBL's latest in premium stage monitoring products designed for the most demanding, highest output stage monitoring applications, including high profile concerts, broadcast events or fixed installations. The line is comprised of the dual-10" VTX M20 and the dual-12" VTX M22 both featuring neodymium Differential Drive woofers making the two products some of the lightest monitors in their class. The high frequency section features a unique newly developed, diamond shaped waveguide that is based on JBL's Image Control technology - a technology originally developed for the M2 Master Reference studio monitor. The new waveguide coupled with a D2 Dual Diaphragm high frequency delivers a symmetrical 60H x 60V coverage pattern that is spatially consistent, allowing M-Series to reach excellent gain before feedback performance. Both the M20 and M22 can be configured to operate in Single Channel or Dual Channel (Bi-Amp) modes via the easily accessible mode selection switches. | *Price On Application (POA) Contact your Representative | | 0 | | | | | | |

| | VTX-M20 | VTX M Series is JBL’s latest in premium stage monitoring products designed for the most demanding, highest output stage monitoring applications, including high profile concerts, broadcast events or fixed installations. The line is comprised of the dual-10” VTX M20 and the dual-12” VTX M22 both featuring neodymium Differential Drive woofers making the two products some of the lightest monitors in their class. The high frequency section features a unique newly developed, diamond shaped waveguide that is based on JBL’s Image Control technology - a technology originally developed for the M2 Master Reference studio monitor. The new waveguide coupled with a D2 Dual Diaphragm high frequency delivers a symmetrical 60H x 60V coverage pattern that is spatially consistent, allowing M-Series to reach excellent gain before feedback performance. Both the M20 and M22 can be configured to operate in Single Channel or Dual Channel (Bi-Amp) modes via the easily accessible mode selection switches. | | “Price On Application (POA) Contact your Representative | | “Price On Application (POA) Contact your Representative |

# WARRANTY INFORMATION

## Monitor, Pro-Series Camera, & IPTV Products

Marshall Electronics, Inc. warranties to the first consumer that the Marshall product, under normal use, be free from defects in workmanship and materials, when received in its original container, for a period of one year from the purchase date. This warranty is extended to the first consumer only, and proof of purchase is necessary to honor the warranty. If there is no proof of purchase provided with a warranty claim, Marshall Electronics, Inc. reserves the right not to honor the warranty set forth above. Therefore, labor and parts may be charged to the consumer. This warranty does not apply to the product exterior or cosmetics. Misuse, abnormal handling, alterations or modifications in design or construction void this warranty. No sales personnel of the seller or any other person is authorized to make any warranties other than those described above, or to extend the duration of any warranties on behalf of Marshall Electronics Inc., beyond the time period described above.

## MXL Microphones

MXL microphones are guaranteed against defects in materials and workmanship for one year from the date of purchase (except tubes which is 90 days on tube microphones). If you encounter any problem with this unit, promptly contact the company from which you purchased it for assistance. The original dated sales receipt will be necessary for any warranty claim. Do not send any unit directly to us without prior authorization from our service department. Warranty coverage is limited to repair or replacement (at our option) of the microphone, and does not cover incidental damages due to use of this unit, nor damage caused by accidental misuse of this product.
