## DOMESTIC WORKFORCE UTILIZATION CERTIFICATION

To the extent permitted by the laws and treaties of the United States, each proposal will be scored for its commitment to use the domestic workforce in the fulfillment of the contract. Maximum consideration will be given to those offerors who will perform the contracted direct labor exclusively within the geographical boundaries of the United States or within the geographical boundaries of a country that is a party to the World Trade Organization Government Procurement Agreement. Those who propose to perform a portion of the direct labor outside of the United States and not within the geographical boundaries of a party to the World Trade Organization Government Procurement Agreement will receive a correspondingly smaller score for this criterion. In order to be eligible for any consideration for this criterion, offerors must complete and sign the following certification. This certification will be included as a contractual obligation when the contract is executed. Failure to complete and sign this certification will result in no consideration being given to the offeror for this criterion.

**RECIPROCAL LIMITATIONS ACT**
**REQUIREMENTS**

Please Complete Applicable Portion of Pages 3 & 4 and Return with Bid.

NOTE: These Requirements Do Not Apply To Bids Under $10,000.00

## I. REQUIREMENTS

**A**. The Reciprocal Limitations Act requires the Commonwealth to give preference to those bidders offering supplies produced, manufactured, mined or grown in Pennsylvania as against those bidders offering supplies produced, manufactured, mined or grown in any state that gives or requires a preference to supplies produced, manufactured, mined or grown in that state. The amount of the preference shall be equal to the amount of the preference applied by the other state for that particular supply.

The following is a list of states which have been found by the Department of General Services to have applied a preference for in-state supplies and the amount of the preference:

| | STATE | PREFERENCE | |
|---|---|---|---|
| **1.** | Alaska | 7% | (applies only to timber, lumber, and manufactured lumber products originating in the state) |
| **2.** | Arizona | 5% | (construction materials produced or manufactured in the state only) |
| **3.** | Hawaii | 10% | |
| **4.** | Illinois | 10% | for coal only |
| **5.** | Iowa | 5% | for coal only |
| **6.** | Louisiana | 4% | meat and meat products |
| | | 4% | catfish |
| | | 10% | milk & dairy products |
| | | 10% | steel rolled in Louisiana |
| | | 7% | all other products |
| **7.** | Montana | 5% | for residents * |
| | | 3% | for non-residents* |
| | | | *offering in-state goods, supplies, equipment and materials |
| **8.** | New Mexico | 5% | |
| **9.** | New York | 3% | for purchase of food only |
| **10.** | Oklahoma | 5% | |
| **11.** | Virginia | 4% | for coal only |
| **12.** | Washington | 5% | (fuels mined or produced in the state only) |
| **13.** | Wyoming | 5% | |

**B**. The Reciprocal Limitations Act requires the Commonwealth to give preference to those bidders offering printing performed in Pennsylvania as against those bidders offering printing performed in any state that gives or requires a preference to printing performed in that state. The amount of the preference shall be equal to the amount of the preference applied by the other state for that particular category of printing.

The following is a list of states which have been found by the Department of General Services to have applied a preference for in-state printing and the amount of the preference:

| | STATE | PREFERENCE |
|---|---|---|
| **1.** | Hawaii | 15% |
| **2.** | Idaho | 10% |
| **3.** | Louisiana | 3% |
| **4.** | Montana | 8% |
| **5.** | New Mexico | 5% |
| **6.** | Wyoming | 10% |

**C**. The Reciprocal Limitations Act, also requires the Commonwealth to give resident bidders a preference against a nonresident bidder from any state that gives or requires a preference to bidders from that state or exclude bidders from states that exclude nonresident bidders. The amount of the preference shall be equal to the amount of the preference applied by the state of the nonresident bidder. The following is a list of the states which have been found by the Department of General Services to have applied a preference for in-state bidders and the amount of the preference:

| | STATE | PREFERENCE | |
|---|---|---|---|
| **1.** | Alaska | 5% | (supplies only) |
| **2.** | Arizona | 5% | (construction materials from Arizona resident dealers only) |

| **7.** | South Carolina | 2% | (under $2,500,000.00) |
| | | 1% | (over $2,500,000.00) This preference does not apply to construction contracts nor where the price of a single unit exceeds $10,000. |
| **8.** | West Virginia | 2.5% | (for the construction, repair or improvement of any buildings |
| **9.** | Wyoming | 5% | |

| | STATE | PROHIBITION |
|---|---|---|
| **1.** | New Jersey | For supply procurements or construction projects restricted to Department of General Services Certified Small Businesses, New Jersey bidders shall be excluded from award even if they themselves are Department of General Services Certified Small Businesses. |

**D**. The Reciprocal Limitations Act also requires the Commonwealth not to specify, use or purchase supplies which are produced, manufactured, mined or grown in any state that prohibits the specification for, use, or purchase of such items in or on its public buildings or other works, when such items are not produced, manufactured, mined or grown in such state. The following is a list of the states which have been found by the Department of General Services to have prohibited the use of out-of-state supplies:

| | STATE | PROHIBITION |
|---|---|---|
| **1.** | Alabama | Only for printing and binding involving "messages of the Governor to the Legislature", all bills, documents and reports ordered by and for the use of the Legislature or either house thereof while in session; all blanks, circulars, notices and forms used in the office of or ordered by the Governor, or by any state official, board, commission, bureau or department, or by the clerks of the supreme court . . ./and other appellate courts/; and all blanks and forms ordered by and for the use of the Senate and Clerk or the House of Representatives, and binding the original records and opinions of the Supreme Court . . . /and other appellate courts/ |
| **2.** | Georgia | Forest products only |
| **3.** | Indiana | Coal |
| **4.** | Michigan | Printing |
| **5.** | New Mexico | Construction |
| **6.** | Ohio | Only for House and Senate bills, general and local laws, and joint resolutions; the journals and bulletins of the Senate and house of Representatives and reports, communications, and other documents which form part of the journals; reports, communications, and other documents ordered by the General Assembly, or either House, or by the executive department or elective state officers; blanks, circulars, and other work for the use of the executive departments, and elective state officers; and opinions of the Attorney General. |
| **7.** | Rhode Island | Only for food for state institutions. |

*If the bid discloses that the bidder is offering to supply one of the above-listed products that is manufactured, mined, or grown in the listed state, it shall be rejected. Contractors are prohibited from supplying these items from these states.

## II. CALCULATION OF PREFERENCE

In calculating the preference, the amount of a bid submitted by a Pennsylvania bidder shall be reduced by the percentage preference which would be given to a nonresident bidder by its state of residency (as found by the Department of General Services in Paragraph C above). Similarly, the amount of a bid offering Pennsylvania goods, supplies, equipment or materials shall be reduced by the percentage preference which would be given to another bidder by the state where the goods, supplies, equipment or materials are produced, manufactured, mined or grown (as found by the Department of General Services in Paragraphs A and B above).

THIS FORM MUST BE COMPLETED AND RETURNED WITH THE BID

## III. STATE OF MANUFACTURE

All bidders must complete the following chart by listing the name of the manufacturer and the state (or foreign country) of manufacture for each item. If the item is domestically produced, the bidder must indicate the state in the United States where the item will be manufactured. **This chart must be completed and submitted with the bid or no later than two (2) business days after notification from the** Issuing Office **to furnish the information. Failure to complete this chart and provide the required information prior to the expiration of the second business day after notification shall result in the rejection of the bid.**

**Acknowledgment**

The undersigned party hereby agrees that it has read and completed this form, and has marked the material being submitted in accordance with the instructions above. The undersigned party acknowledges that the Commonwealth is not liable for the use or disclosure of trade secret, confidential or proprietary information, or information that if disclosed would be reasonably likely to jeopardize the safety or security of an individual, infrastructure or information technology system, where that data or information has not been clearly marked as such, and which was not accompanied by a specific explanation included with this form.

The undersigned agrees to defend any action seeking release of the materials it believes to be trade secret, confidential or proprietary, or would be reasonably likely to result in a safety or security risk if disclosed. The undersigned also agrees to indemnify and hold harmless the Commonwealth, its agents and employees, from any judgments awarded against the Commonwealth in favor of the party requesting the materials, and any and all costs connected with that defense. This indemnification survives so long as the Commonwealth has possession of the submitted material, and will apply to all costs unless and until the undersigned provides a written statement or similar notice to the Commonwealth stating that it no longer wishes to exempt the submitted material from public disclosure.

The undersigned acknowledges that the Commonwealth is required to keep all records for at least as long as specified in its published records retention schedule.

The undersigned acknowledges that the Commonwealth reserves the right to reject the undersigned's claim that the information is trade secret, confidential, proprietary or is reasonably likely to result in a safety or security risk if disclosed, if the Commonwealth determines that the undersigned has not met the burden of establishing that the information constitutes a trade secret, confidential, or is otherwise exempt. The undersigned also acknowledges that if only a certain part of the submitted material is found to constitute a trade secret, is confidential or proprietary, or is otherwise exempt, the remainder of the submitted material will become public; only the protected information will be removed and remain nonpublic.

**SUBJECT: COSTARS-034-073 Theater (Auditorium) Furniture, Fixtures, Audio/Visual Equipment and Musical Instruments**

Dear Sir or Madam:

The Department of General Services (DGS) is pleased to inform you that the COSTARS-034-073 Theater (Auditorium) Furniture, Fixtures, Audio/Visual Equipment and Musical Instruments Contract is awarded effective 02/21/2018 through 02/21/2019. It is now acceptable for you to proceed with sales of your contract offerings to COSTARS Members. An executed copy of your Contract is attached for your reference.

DGS is posting to the DGS COSTARS website a "Book of Awards", including the Supplier data, the Bid Item Sheet(s) provided with each bid response, as well as any link to a Supplier website. Prospective COSTARS Purchasers may access the "Book of Awards" via the COSTARS Members Area.

In accordance with Section 9 of the COSTARS Contract Standard Terms and Conditions, DGS strongly encourages each Supplier to provide a dedicated website for COSTARS purchasers, including a complete listing with contract pricing for all items required under the contract, product and customer support information, and the capability for COSTARS purchasers to place online orders for contract items. If the Supplier provides a dedicated COSTARS website, the Supplier agrees to permit DGS to provide a link from the DGS COSTARS website to the dedicated Supplier COSTARS website to facilitate access by prospective COSTARS Purchasers.

The DGS COSTARS Program offers a Web-based Supplier Gateway designed specifically for your use. The COSTARS Supplier Gateway will allow you to:

- Review your Bid Item Workbook exactly as it appears to our members
- Review contract terms
- Electronically assemble and report your quarterly contract sales
- Pay annual administrative fees
- Edit profiles

You may access the site at www.costars.state.pa.us. Select *Businesses* > *Materials & Services Procurement* > *COSTARS Supplier Information* and follow the instructions provided on the screen to "Manage COSTARS Participation". DGS COSTARS Program recommends that you take a moment to review the online training presentation and task modules found in the *COSTARS Training Center* before proceeding to use the Supplier Gateway.

As a reminder, and in accordance with Section 15 of the COSTARS Contract Standard Terms and Conditions, a Quarterly Sales Report for the period Quarter 1 (Jan - Mar) - 2018 will be due to the DGS COSTARS Program Office no later than 04/15/2018. Please complete the report by logging into the Web-based PA Supplier Portal at https://pasupplierportal.state.pa.us/irj/portal/login to access the COSTARS Supplier Gateway through *Enterprise Applications* > *COSTARS*.

If have any questions, please contact me at 717-703-2946 or COSTARS Program staff at 1-866-768-7827. Thank you for your participation in the COSTARS Program.

Sincerely,

Emanuel Williams

For the purchase, installment purchase, and outright purchase plans, the cost of service and system support plan shall be firm (no increase in price) for a full five (5) year period after acceptance of the equipment. No escalators apply. Offeror will provide quarterly service/support reports for the term of the Contract.

***Offeror Response***

***See attached additional information section 1.1.2***

**C. Quality and Reliability.** The equipment is expected to perform in an efficient manner with a minimum of down time.

60-Day (Rolling) Repetitive Service: If equipment requires five (5) service calls for any service issues within a 60-day rolling time period, the Offeror will be required to notify the Commonwealth and make arrangements for brand new, replacement equipment, with the same or upgraded options. This new equipment will be at no additional cost to the Commonwealth. The Offeror will be required to report monthly on equipment with Repetitive Service calls totaling 3 or more in a rolling 30-day period.

If it is determined that a using agency's equipment must be replaced, the selected Offeror, after consultation with DGS and the agency, will replace the equipment without charge with

an identical model or equipment with comparable features and capabilities. If leased equipment is replaced, a new lease term will not commence but rather the Commonwealth will only be responsible for the remaining payments in the unexpired term. If the cause of excessive service calls is determined to be due to an operator error, misuse, or abuse by the Commonwealth, associated repair time will not be a factor in determining satisfactory equipment performance.

***Offeror Response***

**AVI-SPL will comply for products provided by AVI-SPL**

**D. Warranties.**

1. The selected Offeror shall honor all manufacturer's warranties on products.
2. The selected Offeror shall guarantee a warranty on all equipment and services for a period of one (1) year which shall commence after the successful, fully-functional installation into production.

   ***Offeror Response***

   ***AVI_SPL Will comply.***

**H. Service Level Agreements.** Offerors shall acknowledge and comply with the Service Level Agreements as stated in **Appendix G, Service Level Agreements**.
***Offeror Response***

***AVI_SPL Will comply. The referenced SLA's may not be applicable for all projects. AVI-SPL will offer these and alternate SLA's.***

**I. Emergency Preparedness.** To support continuity of operations during an emergency, including a pandemic, the Commonwealth needs a strategy for maintaining operations for an extended period of time. One part of this strategy is to ensure that essential contracts that provide critical business services to the Commonwealth have planned for such an emergency and put contingencies in place to provide needed goods and services.

1. Describe how you anticipate such a crisis will impact your operations.
2. Describe your emergency response continuity of operations plan. Please attach a copy of your plan, or at a minimum, summarize how your plan addresses the following aspects of pandemic preparedness:

a) Employee training (describe your organization's training plan, and how frequently your plan will be shared with employees)
b) Identified essential business functions and key employees (within your organization) necessary to carry them out
c) Contingency plans for:
    i. How your organization will handle staffing issues when a portion of key employees are incapacitated due to illness.
    ii. How employees in your organization will carry out the essential functions if contagion control measures prevent them from coming to the primary workplace.
d) How your organization will communicate with staff and suppliers when primary communications systems are overloaded or otherwise fail, including key contacts, chain of communications (including suppliers), etc.
e) How and when your emergency plan will be tested, and if the plan will be tested by a third-party.

***Offeror Response***

**VII. Tasks.** Describe in narrative form your technical plan for accomplishing the work using the task descriptions as your reference point. Modifications of the task descriptions are permitted; however, reasons for changes should be fully explained. Indicate the number of person hours allocated to each task. Include a Program Evaluation and Review Technique (PERT) or similar type display, time related, showing each event. If more than one approach is apparent, comment on why you chose this approach.
***Offeror Response***

***See Additional information section 1.1.2***

**A. Order and Delivery of Equipment.** Offeror shall describe their order and delivery services. The Offeror, within five (5) business days after receiving an order, must notify the Commonwealth of any potential delivery delays. Evidence of inability or intentional delays will be cause for the cancellation or suspension of a contract. The Offeror must ensure all incorrect shipments are corrected within ten (10) business days. The business days of the Commonwealth are as follows; 7:30 to 5:00pm, Monday through Friday, excluding state holidays. All orders for equipment must be delivered to the inside location specified by the Commonwealth within fifteen (15) business days or on the date agreed upon by both the Commonwealth and the Offeror. Calculation of delivery time does not include the day that the purchase order is issued but does include the day of delivery. When a specific delivery date is agreed upon for a full delivery or partial delivery, delivery must occur on the requested date. The Offeror retains ownership of all equipment until the delivery is accepted. The Offeror must store all equipment in its own facilities until the agreed upon delivery date.

**B.**

***Offeror Response AVI_SPL Will comply where appropiate. Some projects by their nature take longer. AVI-SPL will provide a delivery schedule for such projects***

## Corporate Overview

# Your Total Video Collaboration and AV Services Partner

From offices in North America, Europe and the Middle East, and through a worldwide network of engineering resources, we deliver the video collaboration and AV communication services that improve the way your organization works. We cover everything you want in a partner: consultation, design, engineering, testing, integration, and support that empower you to focus on your core operations as you work with best available technology.

AVI-SPL works diligently to be a single, reliable resource for improving your organization's ability to communicate and collaborate. Through partnerships with highly regarded collaboration companies, construction firms, architects, and consultants, we design, build, integrate, manage and support solutions, systems, and experiences that deliver state-of-the-art communications and collaboration. No other company can match our ability to handle every aspect of your integration project, from understanding your goals to providing ongoing support. When you partner with AVI-SPL, you are working with:

### A Partner Working in Your Interests

- Experienced and financially stable technology contractor with a **global operational delivery model**.
- Providing **innovative, award-winning solutions** that are effective and aligned with your needs. Our solutions reflect the trends and technologies shaping professional collaboration and the workplace.

### A Knowledgeable Collaborator

- Most **qualified team of engineers and technicians** in the industry.
- **In-house capabilities** to design, install and manage complex audio, video, collaboration and communication technologies.

- **Certified to implement collaboration solutions** from industry leaders like Microsoft, Polycom, Cisco, and Crestron.
- The only company that can self-certify its engineers to trade standards set by InfoComm International.

## An Experienced Services Provider

- Wide-ranging **technical integration capabilities**, construction experience, and engineering resources to support projects of any scale, and in environments as varied as stadiums, boardrooms, hospitals, and classrooms.
- **Expert engineering** with the highest per capita number of technical employees of any AV solutions provider.
- **Award-winning conferencing services** that provide customizable room and device monitoring, as well as cloud-based scheduling and management for video conferences.

We take your investment in collaborative solutions as seriously as you do. That's why we're with you every step of the way, making sure you have the support to keep your business running smoothly and that you get the return on investment you expect and deserve.

Our diverse portfolio features extensive solutions in the corporate, education, and government sectors, including Fortune 500/Global 1000 boardrooms, military base operation centers and education campuses. On most projects, we collaborate with architects, consultants, designers and end users like you.

AVI-SPL's expertise includes partnerships with the industry's top technology providers, highly skilled and certified technicians, and comprehensive support that is setting the standard in the collaboration industry.

The hallmark of AVI-SPL's success has been its ability to keep apace of the technology trends that drive the way businesses operate, and to innovate and improve upon them so that we can offer customers a standard of quality that no other company can match.

- **86% of Fortune 100** and **72% of Fortune 500** companies are AVI-SPL customers
- **50,000+ projects** completed in 101 countries
- **2,100+ employees** in more than 44 offices across North America, Europe and the Middle East
- Partnerships with all the **leading technology providers**, so we can craft the right solution for every client

There's no better testament to our value to the customer than the work we've accomplished helping organizations of all types reach their goal of smarter, more efficient operations.

# Leadership Team

## John Zettel

**Chief Executive Officer**

As chief executive officer, John Zettel shapes the direction of AVI-SPL, its competitive nature, and its ability to provide communication solutions and managed services to all kinds of organizations. He works with the executive leadership to develop goals, short- and long-range objectives, plans, and policies for AVI-SPL. John joined AVI as chief financial officer in 2000, managing the financial position of the company and supervising contract operations. John proved integral in the expansion of legacy AVI through insight and due diligence.

## Steve Palmer

**Chief Financial Officer**

Steve Palmer has the high level of character, respect, and integrity that AVI-SPL thrives on in its collaborative environment. He brings an invaluable combination of strong finance/accounting knowledge, significant involvement in M&A activity, and experience implementing new financial systems (e.g. ERP) to support our company infrastructure and global business model.

## John Murphy

**Chief Operating Officer**

John Murphy leads the company's operations, procurement and services functions. John focuses on investing in the company's technical resources to enhance training and staffing. His attention to quality control ensures AVI-SPL is exceeding customer expectations.

John Murphy has remarkable experience spearheading facilities and business services divisions in sales. He develops executing strategies that create advantages for global clients and their innovative workplaces. During his career, he has worked with different organizations to develop programs that drive sales and operational excellence.

## Steve Benjamin

**Executive Vice President**

Steve Benjamin joined legacy AVI in 1997. In his leadership role as executive vice president for AVI-SPL, Steve is responsible for contract management and negotiation, departmental financial oversight, production-related issues, real estate and insurance transactions, and corporate special projects.

# Certifications & Training

AVI-SPL is committed to providing our clients with the highest level of service. That's why we've established performance standards that reach beyond those of industry organizations. Before granting increased responsibilities to our technical staff, we enroll them in courses that ensure they have the skills to support your project.

AVI-SPL coursework includes InfoComm certifications such as CTS, CTS-I, and CTS-D, and technology-specific training from suppliers. Topics include digital signal processor (DSP) audio equipment, video conferencing equipment, control systems programming, data networking, and many others.

All project managers have earned certifications based on Project Management Institute (PMI) standards. Our design engineers must be certified with a minimum of a CTS-D, and most have a BSEE degree. Programmers must be trained and certified by AMX or Crestron or both to obtain the position of senior programmer.

Our standards conform to the following trade and regulatory bodies:

- OSHA-Occupational Safety and Health Administration
- NFPA-National Fire Protection Agency
- NEC-National Electrical Code
- UL-Underwriters Lab
- AIA-American Institute of Architects
- CSI-Construction Specifications Institute

# Associations

To remain an industry-leading provider, AVI-SPL is a member of multiple trade groups and associations:

# Solutions for Every Need

## Video Collaboration

Before designing your video collaboration solution, we assess your business processes in order to steer the development of a scalable plan. From the implementation plan to installing tailored solutions and providing ongoing support, our team of certified experts work with you to make sure your company has the tools to increase productivity, make new connections and create new ideas. We can connect multiple endpoints -- immersive telepresence, desktop, room-based systems and mobile devices -- over your dedicated infrastructure or through the cloud to create a solution that we support from your location or from our own Symphony management platform.

**Notable Qualifications**

- More than 50 percent of all our projects have a business video component
- We actively manage more than 5,500 endpoints and infrastructure devices
- Microsoft Gold Communications
- Polycom Platinum Partner
- Polycom Advanced Certified Telepresence VNOC Service Provider
- Polycom ATX Certification (first company to achieve)
- Cisco TelePresence Video Master Partner
- Cisco Premier Certified Partner (Specializations: Advanced Unified Communications, Authorized DMS Partner, Express Foundation)

## Meeting Spaces

Today's meeting rooms are more than areas where team members come together to plan and discuss. It's where they get work done, the space where those remote and onsite, customers and colleagues, can come together and make progress.

**Notable Qualifications**

- Technology advisors for Microsoft Skype for Business, Cisco, and Polycom solutions
- Crestron and AMX certifications
- Support for hosted infrastructure and gateway services
- Symphony platform for managing your room systems and devices

## Large Venues and Auditoriums

Our Special Projects Group designs, builds, and supports solutions that meet the requirements of large-scale or engineering-intensive AV integration projects across a wide range of environments. We have the experience and leadership needed to work with the different trades on a job site so that our engineers can complete their work quickly and correctly.

**Notable Qualifications**

- NSCA Advanced Sound Design
- Track record of delivering solutions in complex environments

## Classrooms and Training Centers

AVI-SPL supports your instructional initiatives with communication and collaboration systems that achieve learning outcomes. Our teams of certified technicians and engineers bring together interactive displays, lecture capture systems, and video and content collaboration in an environment that supports active learning.

**Notable Qualifications**

- Microsoft Gold Communications

## Digital Media

AVI-SPL's certified engineers design, implement, and support digital signage and video streaming projects. Solutions can be delivered as onsite services, where you host the hardware; in the cloud, where you access AVI-SPL's infrastructure; or as a hybrid model. With new, scalable video display networks, robust content platforms and multichannel delivery options, today's digital media solutions instantly carry your content anywhere. We partner with you to create a digital media strategy that allows you to command and captivate through HD video and content. We are vendor agnostic and thus choose the best solutions for your requirements.

**Notable Qualifications**

- AVI-SPL is the only company that offers a complete digital media solution, one that includes design, content creation, infrastructure, hosting, managed services and break/fix support
- Partnerships with hundreds of vendors so we can provide the best solution for you
- Crestron Certified Digital Media Engineers

## Command and Control

AVI-SPL integrates video technology into mission-critical facilities for industries like aerospace, military, telecommunications, financial institutions, oil and gas, various utilities, federal, state, and local governments and transportation. Our Control Room Group's whole-room approach takes into account sight lines, ergonomics, lighting, and types of information being monitored to create the right solution, within an environment that enables operators to make timely decisions based on accurate, clearly presented information.

**Notable Qualifications**

- Dedicated team of 50+ with certifications that include PMP, CTS, CTS-I, CTS-D and Top Security Clearance
- Manufacturer training in control system applications
- Actively service hundreds of control room installations across all vertical markets through 24/7/365 CRG help desk

## Advanced Visualization & Simulation

Our advanced visualization and simulation solutions combine high-resolution, stereoscopic projection and 3D computer graphics to create ultra high-definition systems that generate detailed renderings of concepts and engineering diagrams for virtual-reality testing environments, high-definition exploration, training simulation, data visualization, product development, and model manipulation.

**Notable Qualifications**

- Dedicated team that focuses on projects that require a high degree of immersion such as those for virtual reality or simulation applications
- 50+ highly trained, highly skilled people with credentials that include PMP, CTS, CTS-I, CTS-D and Top Security Clearance, in addition to specialty manufacturer training in visualization applications
- A wide range of products and expertise for multi-channel display and computer solutions to achieve high-fidelity imagery on virtually any screen shape

## AV Systems Control and Management

Our control programming accommodates all of your users, including those that like a high level of personalized control and those who prefer more automated systems. We standardize your room systems and space designs so that you can rely on a single management platform to oversee your assets, and additional spaces can scale easily.

**Notable Qualifications**

- Our Symphony management platform is an IT administration tool that lets you see, at a glance, the status of every room and device across your organization.

## Video Displays

We apply our expertise in large-format video display technology in all environments: meeting rooms, classrooms, airports, retail stores, restaurants, sporting arenas, cinemas, houses of worship, hospitals, and more. We partner with the leaders in display and projection technology, and control systems to build solutions that let you effectively share superbly rendered video content for large audiences.

**Notable Qualification**s

- Partnerships with companies known for their innovative displays – Samsung, Sharp, NEC
- Our portfolio includes installations in highly specialized environments

## Sound Systems

We empower arenas, performance centers, hospitals, and businesses to distribute networked to specific zones or everywhere at once. Our technicians are skilled at creating an architecture that ensures that the failure of one zone does not affect the entire system.

**Notable Qualifications**

- At the Pennsylvania Convention Center, we led the largest integration of Biamp AudiaFlex in the world
- Over 200 AVI-SPL employees have Biamp training and certifications

## Studio and Broadcast

As the move toward content generation continues and the access to video editing equipment increases, more and more groups are becoming broadcasters. Whether you are developing your first in-house studio or are a veteran of the broadcasting industry, we can create a state-of-the-art broadcast and studio facility.

**Notable Qualifications**

- Remote or onsite management of studio technology

- 4K live and post production
- Migration to IP, SDI/IP hybrid workflows

## Product Sales

AVI-SPL offers products from hundreds of world-renowned manufacturers. By working with us, you have the leading authorized audio and video product provider, one that keeps track of emerging technology and products. Our service technicians are factory-trained and certified to ensure the prompt repair of all the products we sell, as well as provide repair for products sold to our clients by other companies.

# Services from Start to Finish and Beyond

You need technology that works, is easy to connect, and provides users the ability to collaborate with anyone from anywhere. Our Service Solutions address those needs. From our **Professional Services** to **Managed Services** to **Support & Field Services**, we have the resources you need to ensure your technology is working the way you expect.

## Professional Services

AVI-SPL has provided comprehensive audio visual solutions for most of the world's largest companies and architectural firms, including [redacted]. We provide design, engineering, installation, and training, and have an impressive track record for supplying quality products in a timely and professional manner. We collaborate with architects, various creative specialists and your in-house teams to build systems. Once the new technology is installed, we provide you with comprehensive training and reference materials.

We take the time to understand the way your organization works and recommend a systems design or solutions set to benefit your teams. PMP- and industry-certified engineers lead your project with:

- Collaboration program design
- Systems engineering
- Implementation services
- Training and adoption

### Pro AV Design/Build/Engineering

We specialize in the design, installation, and service of professional communications solutions, (including networks and structured cabling) across industries: broadcast; entertainment; telecommunications; transportation; utility; financial; medical; education; and military and municipal government.

Our system design and engineering includes:

- Network readiness assessment
- Hardware and software recommendation/ specification
- System and network architecture design

### Managed Implementation

AVI-SPL assigns a Project Manager and Project Engineer to your project. These trained personnel:

- Confer with key customer contacts after orders are received
- Explain the implementation process and system requirements for each product to be integrated
- Work with the customer to create a timeline and assign task responsibilities to the project plan
- Meet with customer IT, networking and operational support contacts to prepare for the installation
- Schedule installers and supervise the installation, configuration and testing of equipment

### Technology Training

AVI-SPL offers custom and formal training opportunities for you to effectively operate, administer, and maintain video communication technologies. Such guidance includes AVI-SPL and manufacturer-supplied training courses and can be provided at your location.

## Managed Services

With our Managed Services, your assets work when you need them to work and as you expect them to work, while also enabling you to focus on your business, not system management.

AVI-SPL Managed Services feature:

- AV and video network monitoring, scheduling, and production
- Remote or onsite service ensuring device uptime and availability
- Concierge video conferencing services

From three locations in the U.S. (2) and the U.K. (1) we use our Unify ME™ Symphony Platform to monitor and manage your devices and room systems (AV and video conferences), and handle the scheduling and production of your video conference calls. Our expertise and scale is evident in:

- 8,000 service contracts
- 1,500 ticketed service cases we resolve every month
- 274,000 conferences produced each year
- 90% customer satisfaction rating

### Onsite Managed Services

Through recruitment, training development and staffing, AVI-SPL gives you qualified onsite support. Our Onsite Managed Services include, but are not limited to:

- AV support/concierge services
- Project management
- Bridging/scheduling services
- Customer internal help desk

## Collaboration as a Service

AVI-SPL's Collaboration as a Service combines our internal expertise with the technology solutions of partners Acano, Cisco, Microsoft, Pexip, and Polycom. For you, this means the ability to collaborate across your organization while minimizing your capex.

- Infrastructure as a Service
- Private cloud hosting
- Public cloud on-demand conferencing with Unify ME™ Virtual Meeting Room Services

## Unify ME™ Virtual Meeting Room Services

AVI-SPL's **Unify ME Virtual Meeting Room Collaboration Services** bridges your endpoints for meetings that everyone can attend. It consolidates real-time conferencing tools – voice, video, and web - into a **single solution**, allowing users to connect anytime, anywhere with any device. AVI-SPL provides a suite of **vendor-agnostic VMR solutions** designed to fit **each customer's** unique consumption and architectural desires. Customers can select the technology partner, deployment model and payment options that best fit their needs.

### The Value of VMR

- Single solution for video-web-audio collaboration
- Connect any standards-based and software-based clients and devices into one call
- No reservation needed – easy as making a phone call
- It's your personal conference room without walls – available 24/7/265
- Service-class quality and security
- Flexible usage and pricing consumption models

By partnering with the market's leading manufacturers, AVI-SPL delivers the features, deployment options and pricing models that best fit your operational, IT, and financial needs. Our vendor agnostic offering allows customers to choose the best solution on the market:

- Unify ME, powered by Pexip

### VMR Deployment Models

Select from one of four deployment models:

- **As-a-Service Cloud Model:** a multi-tenant conferencing environment hosted, managed, and supported directly by AVI-SPL. Customers buy access to these resources, designed to be used in a conferencing-as-a-service model. All resources - hardware, storage, and network - are owned by AVI-SPL and shared amongst multiple customers. The As-a-Service Cloud option is a true OPEX model allowing the customer to buy access to video on a subscription basis.

- **Hosted Private Cloud Model:** a private, single-tenant environment where the hardware, storage, and network are dedicated to a single client or company. The customer purchases and owns the hardware; AVI-SPL stores the hardware in an AVI-SPL data center.

- **Customer On-Premises Model:** private deployment where the customer owns the hardware, storage, and network; the customer handles all storage independently. AVI-SPL Professional Services can install and activate the hardware on the customer's premise.

- **Hybrid Model:** A hybrid software deployment spans the gap between on-premises and cloud. Allows customer to add cloud computing resources to their environment without abandoning their existing on-premises hardware investments. Customers can utilize both their own data center and a cloud service

simultaneously while delivering a seamless user experience. Provides best-of-both-worlds functionality for the user.

## Support & Field Services

AVI-SPL's Customer Care is the investment protection you need for your AV and video systems. Our team of 80+ trained and certified professionals is available for you 24x7x365, whether you require technical support, parts replacement, or upgrades and maintenance. With multiple levels of support and added exclusive services available, we can tailor our services to your unique needs.

### Optional Services

**Preventative Maintenance Visits**

Our onsite field technicians will perform regular testing, cleaning, and configuration validation based on a best-practices regimen to keep systems in optimal operating condition. Visits can be scheduled on a Quarterly, Bi-Annual, or Annual basis with scheduling flexibility on a room-by-room basis.

**Third-Party Call Consolidation Services:** provides consolidated remote technical phone support services, third-party incident management, and ticketing services for covered assets.

### Support Process

To ensure your need for assistance is resolved as quickly as possible, we follow a process that tracks calls and guides them through steps that lead to a successful resolution. Below is our three-tier process:

| Tier 1 Help Desk | Tier 2 Help Desk | Tier 3 Help Desk |
|---|---|---|
| • Log Call & Identify Coverage Level<br>• Check equipment for status/errors<br>• Perform diagnostics<br>• Adjust settings as required<br>• Escalate to Tier 2 if required | • Perform root cause diagnostic<br>• Attempt Remote Repair<br>• Order replacement components (if applicable)<br>• Schedule parts delivery<br>• Dispatch Technician<br>• Escalate to Level 3 if required | • Escalate to Manufacturer<br>• Work with Manufacturer<br>• Implement Fix<br>• Close Case |

# Quality Assurance Commitment

AVI-SPL is committed to ensuring your satisfaction through quality products, design, integration, and exceptional service. Our project managers, engineers, and technicians are all trained to adhere to high standards. For larger projects, we assign a program manager who is accountable for the quality assurance and success of your project.

To ensure your project meets our high standards, we have developed an internal quality process based on recognized objectives:

- **Assess** business processes, and **propose** and **steer** a sustainable communications plan.
- **Apply best practices** to engineering end-to-end solutions tailored to customer need and environment.
- **Build and test new systems** at our fabrication facilities for on-time delivery and integration at customer site under guidance of experienced project management team.
- **Accelerate return on investment** by fostering end-user adoption through training and documentation library.
- **Ensure value** with 24/7 help desk support, MSOC services, managed services and strategic on-site solutions.

We begin each project by taking the time to understand the needs of our clients. We then tailor our quality management oversight to meet those needs. Our program manager has the ultimate responsibility for quality management during the project.

Quality management has equal priority with deliverable execution, schedule management and cost control. We establish processes and procedures necessary to provide cost-effective services that are fully acceptable to our clients.

For larger projects, AVI-SPL follows processes of ensuring the project teams have the communication tools and processes to ensure a successful project for all.

Our Innovation Council has taken the lead in preparing a set of guidelines and templates for our sales team to work with so that you receive a clearly defined set of processes that will guide our work on your behalf.

# Integration Process

AVI-SPL is dedicated to giving you with technically sound, well-integrated, and user-friendly solutions. To that end, AVI-SPL utilizes a six-step process that ensures seamless communication and transition from project conception to project completion.

The beginning of the process is essential to the success of the implementation and Customer Care Services that ensure acclimation, adoption, and continued use of the technology.

The scope of this Design Proposal is summarized in Phases I & II. Phases III – VI outline the process through to completion including implementation of the concierge level service requested by the client.

### Phase I - Consultation

The consultation process is the foundation of the system design and capabilities. During this process, we meet with key personnel to gain a thorough understanding of needs, objectives, and issues:

- Architectural Criteria
- Style of Meeting
- Visual Media
- Computer Display
- Audio Systems
- Audio Conferencing
- Video Conferencing
- Control options
- Static Display
- Supplemental (Multi-room tie-in, connection type, network interconnection, existing equipment)
- Schedule (design/construction documents, construction, AV installation, occupancy)
- Contacts (client, architect/interior designer, general contractor, other)

### Phase II - Engineering & Design

Next, AVI-SPL appoints a Project Engineer, who will team up with your AVI-SPL Account Manager and follow your project through to completion. During this phase, the information acquired during the needs analysis is developed into a technically sound and functional system design. The Project Engineer and AVI-SPL Account Manager perform a feasibility study. This study includes an examination of the desired capabilities, architectural, environmental, and technical details of your system. During the engineering and design process, we select the appropriate equipment, hardware and software. The result of the engineering and design process is a system designed specifically to meet the requirements and environmental conditions that are unique to your application.

The goals for this phase of the project are:

- Verify initial design concepts
- Verify location of all devices
- Validation of the design's performance and concepts
- Provide any value engineering and performance enhancement recommendations
- Convert concept drawings to schematic, "build to" shop drawings
- Submit final shop drawings and hardware list for approval prior to procurement and construction.

The documents created by the Systems Group engineering team include but are not limited to:

- Rack Elevations
- Patch Bay Elevations
- Lighting fixture locations
- Custom assembly details
- Panel details
- Verification of Conduit Requirements
- Verification of Junction Box Requirements
- Creation of Fabrication Documentation including wire numbers
- Verification of Wire Types
- Speaker Cluster Rigging Design
- Creation of accurate hardware/bill of quantities (BOQ) list
- Create cut sheet books for hardware items
- Provide other submittals as required

At the conclusion of Phase II, the project's design is finalized, all areas of system performance have been optimized, and the hardware parts lists, as well as the engineering drawings, are given final approval. The onsite pre-wiring shall immediately begin.

## Phase III: Pre-Installation

AVI-SPL's senior procurement managers will begin procurement of the hardware required for the system. Procurement is prioritized between:

- Items immediately required for the initial on-site pre-installation by our installation team
- Long lead items
- Custom panels and custom/project specific hardware items
- All other hardware items
- Engineering and development of custom control software

The procurement manager informs our project manager of any discontinued, new models or upgraded products on the hardware list. In these instances, AVI-SPL submits cut sheets on any new hardware items for approval and substitution into the system.

The fabrication process begins upon receipt of product. AVI-SPL's fabrication team utilizes the approved engineering drawings to build the systems. All system fabrication work is performed at our fabrication facility.

AVI-SPL's fabrication process includes:

- Quality control inspection of all hardware items prior to integration into the various systems
- Preparation of internal areas of the racks for installation of cabling
- Installation of internal rack power distribution systems
- Installation of hardware into the racks as shown on the rack elevation drawings
- Installation of internal rack wiring
- Verification of internal rack wiring and wire/cable numbering
- Installation of interconnection wiring between the racks

- Testing of individual racks
- Installation of control software
- Testing and operating of multiple racks as a complete system
- "Burn in" quality-control testing of multiple racks as a complete audio visual system
- Initial modifications to show control software
- Acceptance of tested and "burned in" systems by the project manager and senior engineer
- Photographic documentation of racks and other hardware items
- Disassembly of racks in preparation for shipping and palletized as per AVI-SPL's custom shipping standards
- Delivery of the racks to the site via dedicated air ride trucks

The careful testing and "burn in" of the completed systems in the fabrication shop will prevent the likelihood of discrepancies encountered during the onsite installation and testing.

## Phase IV: Onsite Installation

The onsite installation effort is coordinated by project manager and lead installer. The lead installer will be onsite directing the installation teams. Prior to delivery and installation of pre-assembled systems, AVI-SPL field verifies conformance of installed cabling and other conditions necessary to ensure efficient integration of systems and devices. The team of onsite personnel will vary in number depending on the task requirements for that day. The project manager determines the correct resources required for the specific installation tasks. The AVI-SPL lead installer, project manager, and engineer carefully supervise our subcontractor. Depending on the required tasks, our daily onsite installation crew will include:

- AVI-SPL Project Manager
- AVI-SPL Lead Installer
- Installation Personnel as necessary

When required, AVI-SPL provides:

- Senior Engineers
- Field Engineers
- Supplemental Field Technicians
- Test and Adjust Engineers
- Specialty Labor as required

Once the installation is complete, the systems are carefully checked and brought on line. The final phases of the project begin.

## Phase V: Commissioning, Testing, and Adjustments

During this phase, the complete testing and final adjustments of the systems are made. Our project manager coordinates with the project team as required to complete successful testing and tuning of the system, including testing far-end Customer Care connections. Our factory-trained service engineers travel to the job site to commission the system. All installation work is thoroughly checked prior to 'turn on.' Errors or problems are corrected, and all equipment is adjusted for optimal performance in accord with the project specifications.

The test and adjustment team consist of:

- Owner's Technical Representatives
- AVI-SPL's Project Manager

The result of phase V is the shortest possible final punch list. Our projects typically have short punch lists thanks to:

- Adherence to our quality assurance program
- Correcting site-specific problems as they are detected
- Installation of fully tested and "burned in" electronic hardware
- Termination into fully tested and verified cabling and far end connections

By adhering to these engineering policies and standards, the final punch list for projects of this type is typically limited to just a few items.

## Phase VI: Training – As required

Training is available throughout the project. We recommend the owner's technical representative visit AVI-SPL's fabrication facility for initial familiarization with the system during the in-house testing phase. The fabrication manager will:

- Provide a comprehensive review of the system's hardware
- Review the system's cabling and wire numbering methods
- Discuss maintenance issues for the system
- Demonstrate initial operation of the system

The owner's technical team may observe how the system interconnects to the building's pre-installed cabling during installation and commissioning. Once the system is operational, we provide three levels of "hands on" training to the onsite operational personnel.

Training is provided to:

- System Operators (personnel who are qualified to operate the various systems)
- System Technicians (personnel who provide onsite maintenance to the systems)
- System Assistants (personnel who assist the operators and technicians)

AVI-SPL produces operator manuals and other documentation to support the systems as required.

**Sample MSOC Design & Implementation Methodology (processes)**

The AVI-SPL design and implementation methodology for Managed Services is broken into four phases:

Phase 1: Requirements, Assessment & Design

- Determine method and design for MSOC network management, monitoring and security access.
- Initiate project plan to establish network access and security policies according to mutually agreed specifications.

Phase 2: Development, Readiness & Training

- Gather client-specific room, contact, and equipment details as well as process flow for audio, web, and desktop support.

- Enable necessary components in AVI-SPL's environment such as ACD, network and client systems, and toolsets.
- Train Reservations, Help Desk, Operations and Engineering teams on client processes and procedures.

Phase 3: Service Delivery & On-Boarding

- Complete MSOC and client IT network and systems integration tasks
- Perform room certification and acceptance testing
- Complete all necessary database updates
- Assist with creation and distribution of communication campaign to client users and administrators
- Propose Go Live cut-over plan

Phase 4: Ongoing Support

- End-user scheduling process
- End-user issue resolution process
- Monthly Performance Overview and Reporting

AVI-SPL has templates developed, that can be customized, for the following items:

- Room Profile
- Site Certification
- On-Boarding Checklist
- Reservation Request
- MACD of Sites/Inventory
- Reservation Confirmation
- Outage Notification
- Reason for Outage (RFO)

## Process Control & Documentation

Reports and documentation are all standardized. Reporting and documentation for all project activities are stored in a centralized database for efficient access by integral departments (purchasing, distribution, systems integrations, account management etc.). All systems integration projects are overseen by AVI-SPL's Chief Operating Officer (COO). The COO is responsible for overseeing all documentation and daily operational activities throughout our national systems integration network. Documentation and purchase orders are reviewed regularly by the corporate office.

# Contractor Profile

Tampa, FL-based AVI-SPL is a communication and collaboration solutions provider for businesses and organizations of all types. Our business is the sale and service of audio visual, video collaboration, control system, and presentation solutions and products.

Our company is the result of a 2008 merger between the top two system integration companies in North America: Audio Visual Innovations (AVI) and Signal Perfection Ltd (SPL). We have locations throughout North America, Europe and the Middle East. In 2016, we expanded our footprint, customer base and capabilities through the opening of our Frankfurt office and the acquisitions of Anderson Audio Visual and VideoLink LLC. In 2017, we became the first national provider of AV and collaboration technology solutions through the acquisition of Sharp's Audio Visual in Canada. Through our experience and expertise, AVI-SPL provides forward-thinking solutions to the communication challenges of today and tomorrow. We continue to maintain the top position in our industry, completing over 50,000+ projects on an annual basis, and honoring more than 8,000+ service contracts, and producing 274,000+ conferences a year while earning a reputation as the leader in customer satisfaction.

## Strategic Technology Partners

AVI-SPL has long-term relationships with the top manufacturers in the AV and collaboration industry. The volume of our work empowers us to choose the best manufacturers based on their product quality and customer service. Some of our preferred partners include:

# Exclusive Programs

## Enterprise Accounts

AVI-SPL's Enterprise Accounts Program provides our multinational clients with customized AV and video communication solutions.

AVI-SPL is dedicated to your success. AVI-SPL Enterprise Account clients each have a team solely dedicated to their account with one point for client contact: your Enterprise Accounts Manager.

Working from our comprehensive support process, the Enterprise Account Manager leads a team that includes a Project Engineer and Project Manager -- this will ensure that our technical staff understands your AV and networking environment. With the Enterprise Account Manager as a key resource, clients have access to this team 24 hours a day, seven days a week, and may also check the status of their multiple projects through the online password-protected ViewPoint Extranet. Through the services of the ViewPoint Extranet, your complete portfolio is kept up to date, including drawings, proposals and project status.

## Minority Business Enterprise (MBE) Outreach

AVI-SPL recognizes the need for diversity through maximizing MBE participation in all areas of our business operations. AVI-SPL's Corporate Diversity Policy includes MBE outreach as well as financial support protocols. AVI-SPL has identified a process to represent our Good Faith Effort to meet the MBE requirements set for our clients and our partners.

To reach these goals, we partner with associations that support MBE including:

- Professional Women in Construction (By State)
- Minority Supplier Development Council
- Association of Minority Contractors (By State)
- Division of Minority and Women's Business Development (By State)
- Equal Opportunity Review Commission (By State or City)

The minority firms we partner with can provide services and integration solutions. However, many of these firms lack the credit history that would allow them to bid on portions of the work that we do. They do not have the financial capacity to wait 30 to 60 days required for normal payment on large or continuous projects or opportunities.

In support of these partners, we offer:

- A lenient bonding position for MBE firms
- Assistance in payment terms
- Assistance in the accounts payable and purchasing areas

## ViewPoint Extranet

The AVI-SPL ViewPoint Extranet is a custom-branded secure purchasing portal. Our team will customize your password-protected Extranet based on your specific business needs.

The ViewPoint Extranet includes:

- Project management and project tracking tools to:
  - View and update project milestone dates
  - Track orders and change orders
  - Create document libraries
- Custom purchasing tools to:
  - Upload and submit purchase orders
  - Pay by credit card or purchase order
  - Place tax-exempt orders directly from the custom catalog
  - See order history
  - Track spending

We also support punchout and hosted catalogs to centralize your company's purchasing and invoicing. Our custom catalogs integrate with major e-procurement portals, including Ariba, SciQuest, Perfect Commerce, SAP and more.

## Sustainability – AVI-SPL Equipment Recycling Program

AVI-SPL is proud to be an active member of the U.S. Green Building Council (USGBC). By following LEED standards, corporations can drastically reduce costs, save energy and generate carbon credits. We care about environmental sustainability, and we consistently collaborate with our manufacturers, consultants and associations to ensure that our customers benefit from green standards.

AVI SPL
AV Equipment Recycling Program
powered by MPC

AVI-SPL has taken steps within our own company to go green. AVI-SPL started by piloting formal sustainability plans in key offices and then rolling customized plans based on geographic location, building type, as well as size and activity of staff. As part of our corporate goal of focusing on the community, AVI-SPL offers sustainable solutions to reduce environmental impact. We also promote the various sustainability initiatives offered by our manufacturer partners.

Our corporate sustainability program includes:

- Equipment Recycling Program: Fabrication waste recycling, disposal, and recycling of obsolete equipment, projector lamp recycling.
- LEED Green AP Accredited Professionals: Assisting clients with the specification of sustainable technology to meet LEED certified building standards.
- Internal Sustainability Programs: Waste management and recycling, energy management and building controls, internal IT technology recycling/refurbishment.
- Video Conferencing Solutions: Solutions that result in less travel, increased productivity, improved collaboration, and a smaller carbon footprint.

It is becoming increasingly important for companies to consider their environmental impact and how to provide better value to shareholders, employees, and customers by integrating sustainable solutions into their business practices. With a focus on the new triple bottom line – people, planet, and profit – more businesses are seeking sustainable options for their business processes, including e-waste management, to minimize their legal exposure.
