

Furniture Fittings & Architectural Hardware Price list*

February , 2019

Technik für Möbel

Hettich Forum at Kirchlengern, Germany

The company's origins date back to 1888, when Karl Hettich began making the new clock component he had invented. By 1930, his descendants had diversified into furniture fittings, setting up production in East Westphalia – a centre of the German furniture industry. Today, Hettich, still family owned, has become an industry leader with a worldwide reputation.

We're one of the world's largest manufacturers of high-quality furniture fittings, with over 6,000 employees in more than 100 countries. The company's success has been built on four enduring values: quality, innovation, close cooperation with customers and absolute reliability.

We work to inspire our customers with our ideas and our passion.

Praised by experts. Loved by customers.

Quality

Hettich products stand for high quality. Once assembled, our fittings function perfectly day in, day out. High quality products and processes confirm our sense of value, our self confidence and our image. The way to our quality goal is for each one of us to cultivate an intense quality awareness.

Innovation

The right balance of continuity and innovation generates trust in the Hettich brand. We offer timely, high-value solutions for today's furniture; at the same time, we identify and shape the trends of tomorrow. We review and improve existing solutions ready for the future. Driving innovation is our capacity for looking at things from new angles.

Closeness to customers

For us closeness to customers implies sharpened awareness, attention to detail, a grasp of complex challenges, and efficiency in production and logistics. We know our customers. We're there when our customers need us! The keynote of our partnership with our customers is direct, person-to-person communication.

Reliability

Quality, innovation, closeness to customers – they're nothing without reliability! Reliability encompasses the durability of our products and the reliability of Hettich people – each and every one of us. The solid basis for reliability is robust and stable processes.

Free Design Service:

Looking for Designs to liven up your Living Room, Bedroom, Bathroom & Kitchen. A dedicated team of highly qualified Interior Designers is at your service to provide customised design solution to suit every taste and budget at zero cost to you.

Free Consultation at your doorstep:

Looking for perfect Furniture Fittings solution. A dedicated team of highly qualified professionals is at your service to provide the perfect furniture fittings solution to suit your need and budget at zero cost to you.

Hettich Customer Care Service:

In today's fast paced and technologically advanced era, most of the organizations succumb to the pressure of staying ahead in the competition and often, end up neglecting the most critical aspect of business i.e. CUSTOMERS. Hettich, being a CUSTOMER CENTRIC organization, is very sensitive towards this tendency; hence, we constantly try to provide the best and quality driven products and services.

Master Key System

- ▶ Below are the standard prices for master key system.
- ▶ These prices are of single cylinder only.
- ▶ For your query/requirement please multiply prices by number of cylinder needed.
- ▶ If any query please ask the technical team.

Example:

Master key system with 5 master keys for 20 locks cylinders

i.e. 10 cylinders of HSCL 60 & 10 cylinder HSCL 70

Then total pricing will be 10x price of HSCL 60 master cylinder + 10x price of HSCL 70 master cylinder

Price of whole set = 10x1565 + 10x1628 = 31930 only

Master key system Mechanical Key	For Set Quantity < 50 Cylinders		For Set Quantity > 50 Cylinders	
	Description (Cylinder Set with 3 individual cylinder keys and 5 master keys)	5 MK MRP	6MK MRP	5 MK MRP

Warranty Clause

For Warranty Regarding Architectural Hardware please refer to below site.
www.hettich.com/in

Conformité Européenne, meaning "European Conformity"

Fire Protection Certification

European Norms for Door Closing Devices

European Norms for Lever Handles & Knob furniture

European Norms for Emergency Exit Locks with Door Handles

European Norms for Panic Exit Devices

European Norms for Mechanically operated Locks, Latches & Locking Plates

European Norms for Hinges

Most of the Hettich hardware are in accordance with the following European standards:

- DIN EN 1154 A: Door Closing Devices
- DIN EN 1906 : Lever Handles & Knob furniture
- DIN EN 179 : Emergency Exit Locks with Door Handles
- DIN EN 1125 : Panic Exit Devices operated by horizontal bar
- DIN EN 12209 : Locks & Latches
- DIN EN 1935 : Hinges

EN STANDARDS		
EN Value	Recommended Door Width (MM)	Recommended Door Weight (KG)
EN 1	750	20
EN 2	850	40
EN 3	950	60
EN 4	1100	80
EN 5	1250	100
EN 6	1400	120
EN 7	1600	160

Factors to consider when specifying hinges

- ▶ Is it a fire, smoke or emergency escape door?
- ▶ How heavy is the door and what are the door dimensions (height, width and thickness)?
- ▶ What is the door's construction and are there any unusual features that could affect the hinges?
- ▶ Where is the door situated e.g. internal or external; is it near the coast or in a swimming pool?
- ▶ What level of use/abuse will the door be subject to e.g. office, hospital or school corridor?
- ▶ What other items of hardware are to be fitted, that may affect the hinge performance, typically door closers or door stops?

Forces operating on a door

Two main forces are influencing the performance of the hinge (vertical and the horizontal load).

The vertical load is a result of the gross door weight.

The horizontal load is created by:

- ▶ The door weight
- ▶ The door height to width ratio
- ▶ Where the hinges are positioned.

The wider the door is in relation to its height, the greater the side load that the hinges and their fixings have to support.

Hinges for use with doors of excess width

Wider doors increase the stresses exerted on the hinge. This must be allowed for by a reduction in the maximum mass of the door leaf supported by each class of hinge. The factors by which the door mass has to be adjusted for wider widths are calculated by dividing the door height by its width. For a factor of 2 or greater, no allowance has to be made. The percentage leaf mass increases are shown in the Side Loading calculations in the table:

Side Loading Calculations			
Door Size		Factor	Normal increase of mass of door leaf %
Door Height (mm)	Door Width (mm)		
2000	1000	2.0	0
2000	1050	1.9	10
2000	1100	1.82	18
2000	1150	1.74	26
2000	1200	1.66	33
2000	1250	1.6	40

Example

Door Height = 2100mm

Door Width = 1100mm

Door Weight = 65kg

Factor (Door Height/Door Width) 2100/1100 = 1.9 this implies increase of door leaf mass by 10%

Adjusted Door Weight

Different factors like a door closer or extra heavy usage are influencing the door weight. Some details for the calculation of the adjusted door weight can be found here:

Adjusted Door Weight Calculation		
Actual Door Weight	Doors of excess width, please refer to Side Loading Calculation table	
	Door closer	+20%
	Door closer (Backcheck)	+75%
	Extra Heavy Use	+10%
	Light Use	- 10%
		= Adjusted Door Weight

Example

height = 2100mm

width = 1100mm

weight = 65kg

+ increase of door leaf mass of 10%

+ installed door closer with back-check = increase of door leaf mass of +75%

= 65kg + 10% +75% = 125 kg (adjusted door leaf weight)

Simply selecting the hinge by door weight alone is very common and not 100% correct. There are many factors influencing the correct number or model of hinges. Hettich is taking the most important factors into consideration to make the choice for the right number of hinges even easier.

Follow our HBN 14 guidelines to correct hinge specification.

1. The right number of hinges and maximum door weight

The correct number of hinges is influenced by different factors such as:

- the door type
- the door weight
- the door height / width ratio (excess width side load)
- the frequency of use
- other door hardware used on the door

In order to make the choice for the right number of hinges easier, the following overview summarizes the maximum door weight with reference to the door width at a height between 2.100 to 2.300 mm.

In many cases two hinges per door will be sufficient to guarantee a smooth performance of the door system. In some cases three hinges per door are used to minimize warping in extremes of temperature or humidity. Hettich also recommends three hinges per door if the actual door weight is very close to the indicated maximum door weight for 2 hinges per door.

Width (in mm)	Max. door weight w/o door closer		Max. door weight w/ door closer		Max. door weight w/ door closer (incorporating back-check and / or hold open device)	
	2 hinges per door	3 hinges per door	2 hinges per door	3 hinges per door	2 hinges per door	3 hinges per door
max. 750	144 kg	187 kg	120 kg	142 kg	82 kg	97 kg
max. 850	144 kg	187 kg	120 kg	142 kg	82 kg	97 kg
max. 950	144 kg	187 kg	120 kg	142 kg	82 kg	97 kg
max. 1.100	131 kg	170 kg	109 kg	129 kg	75 kg	88 kg
max. 1.250	108 kg	141 kg	90 kg	107 kg	62 kg	73 kg
max. 1.400	96 kg	125 kg	80 kg	95 kg	55 kg	65 kg
max. 1.600	85 kg	111 kg	71 kg	84 kg	49 kg	58 kg

Please note: Above maximum door weight indications are based on a perfectly installed and adjusted door system as per EN 1935 test parameters and requirements. Actual values may vary in individual cases. The door system and number of hinges (incl. maximum door weight) may also be influenced by additional hardware installed with the door, the general usage, the correct installation and maintenance. In general, Hettich recommends a trial testing of the door to guarantee an adequate performance.

2. The installation position

Fig. 1 2 hinges per door

Fig. 2 3 hinges per door

Fig. 3 3 hinges per door

Fig. 1	The new Hettich practice where only two hinges are installed on the door. Hettich recommends to space the hinges as shown. A proper testing is recommended for an adequate door performance as explained in chapter 1.
Fig. 2	Where overhead door closers are used, additional lateral forces are applied to the top hinge. Whilst this is taken into consideration within the design calculation, to reduce the lateral force on the top hinge, it is recommended that the hinges are spaced as shown.
Fig. 3	The standard practice and most common, providing maximum resistance to 'warping' of doors, hinges are spaced as shown.

3. The definition of low, medium and high frequency doors

Building / door type	Daily usage	Frequency
Department store entrance	5,000	High
Hospital corridor doors	5,000	High
Office Building Entrance	4,000	High
School Entrance	1,500	High
School Toilet	1,500	High
Apartment Entrance (Main Door)	500	High
Office Stairwell	500	High
Office Building Toilet	500	High
School Corridor	100	Medium
Hospital Consultation Room	100	Medium
Office Building Corridor	100	Medium
Storage Room	50	Medium
Residential Entrance	30	Low
Interior Residential	20	Low

- ▶ **Closing Moment and Closing Speed:** The force generated by a door closing device which acts upon during the closing operation. It helps to adjust closing force according to width & weight of the door
- ▶ **Adjustable Closing Power:** By turning the Hex Notch clockwise or anticlockwise spring strength changes.
- ▶ **Adjustable Closing Speed:** By turning Valve Screw the flow of Liquid can be altered for adjustment of Closing speed.

Valve Adjustment

- ▶ **Latching Speed:** A speed control operable to increase the closing speed and thus the safe closing of the door, for example to overcome door seals, door locks and high air pressure. Continuously Adjustable Latching speed ensures perfect latching of all kind of locks.
- ▶ **Latching speed valve:** By turning Valve Screw the flow of Liquid can be further altered for adjustment of Latching speed.

- ▶ **Back Check:** An inbuilt buffer which helps to prevent a door leaf being flung wide open by providing cushioning effect when the door is thrown open. Reduces the opening speed starting at 70° and avoids the slamming of the door.
- Two variants in back check
1. Continuously Adjustable
 2. Constant

- ▶ **Delayed Action:** An inbuilt function that allows delay in closing door for an adjustable period of time allowing the disabled, elderly people or long trolleys, stretchers to pass through the door unhindered.
- Reduces the closing speed and allows a safer passing for people and transports. Especially suitable for the use in nursing homes and hospitals

- ▶ **Hold Open:** Additional Feature which ensure self stopping of doors at a certain angle i.e. 70° to 130°. To achieve this additional Component to be added in Slide rail or Standard Arm to be replaced by Hold Open Arm

1. Hold Open Device for Slide Rail

2. Hold Open Arm

Utilization Categories of Door Locks & Handle

Class 1: HOME

Moderate utilization by persons motivated to exercise great care and from whom there is a low risk of improper use. Typical areas of application: interior doors of residential buildings.

Class 2: OFFICE

Moderate utilization by persons motivated to exercise care but from whom there is a certain risk of improper use. Typical areas of application: interior doors of office buildings.

Class 3: PUBLIC PLACES

High utilization by the general public or other persons with low motivation to exercise care and from whom there is a high risk of improper use. Typical areas of application: interior doors of office buildings open to the general public.

Class 4: STADIUM / PUBLIC TOILETS

For use in doors that are frequently subjected to violence or damage. Typical areas of application are Cricket & Football stadium, barracks or public toilets.

Technology Behind Handles

ProLock 4 - Premium handles with ball-bearing technology

ProLock 4

ProLock 4 -bearing

These high-end project handles are characterized by an industrial ball bearing. The precise and maintenance free ball bearing technology ensures a well-balanced system. Additionally the flex-bearing, lying inside the ball bearing unit, balances uneven door surfaces for up to 3 degree. This premium and innovative solution will meet all standards for private or public doors.

- ▶ EN 1906, class 4
- ▶ With spring and 90 degree carrier
- ▶ Patented flex-bearing unit
- ▶ 1 million cycle tested

ProLock 3 - Handles with friction bearing technology

ProLock 3

ProLock 3-bearing

The main characteristic of this handle is a maintenance free nylon bearing that is floating on the steel base rose and balancing radial and axial free-play. This class 4 handle bearing can be used on doors with high frequency and a potential for violent usage such as in schools or Cricket & Football stadium.

- ▶ EN 1906, class 4
- ▶ Unsprung
- ▶ 200,000 cycle tested

ProLock 2 - Handles with standard friction bearing technology

ProLock 2

ProLock 2 -bearing

The bearing made of glass fiber reinforced nylon is guiding the handle axial as well as radial. A wave spring is compensating angular tolerances. A perfect and certified price/performance ratio for frequently used handles in all kind of buildings.

- ▶ EN 1906, class 3
- ▶ With spring
- ▶ 200,000 test cycles

ProLock 1 - Handles with standard friction bearing technology

ProLock 1

ProLock 1 -bearing

The steel base rose and return spring ensure a proper and stable fixing on the door. The economic bearing is perfect for interior doors in public buildings or private houses.

- ▶ With spring
- ▶ 200,000 internal test cycles

Prolock handles: PZ and WC Sets

As mentioned in the Price List, each handle is having two versions with two Article codes as per below :

		Prolock 1 HH 2110 (Hollow)							
		Article Code 1	Article Code 2	Description	Quantity	Unit	Quantity	Price	Article Code
		9228099	9228099	ProLock 1 HH 2110 Handle + Handle set SS	1	Set	1	1,334	83024110
		9228101	9228101	ProLock 1 HH 2110 Handle + WC Bathroom set SS (Please order only Bathroom Lock along with WC version set)	1	Set	1	1,934	83024110

What is Handle + handle set and Handle + WC bathroom Set?

The PZ version handles are used for all the locking solutions in which Euro profile cylinders are used for key Locking

PZ version Mortise handle

- For use with Sash Lock, Latch Lock, Night Latch Lock and Panic Lock bodies
- Set comprises of set of Handles, Set f PZ escutcheon and fixing material
- Widely used version of handle
- Available in all handle shapes

The WC version handles are used for bathroom or privacy doors with bathroom handles

WC version Mortise handle

- For use with **only** Bathroom Lockbody
- Set comprises of set of Handles, Set of WC escutcheon with indicator and fixing material
- Less used version of handle mostly where WC escutcheon with indicator is required
- Available in all handle shapes

Handing of doors for Lift Off Hinge

Lift Off Hinge illustration for DIN Right & DIN Left hinge and for ordering

How to determine if the door is DIN Left or DIN Right

What is DIN Left And Right: DIN Right/Left denotes the direction of the opening of the door

DIN Left: When the hinges are placed to the left of the door leaf, then the door is opened DIN left.

DIN Right: When the hinges are placed to the right of the door leaf, then the door is opened DIN right.

DIN left means Hinge barrel is visible on Left side that means a person will use left hand to operate the door

DIN Right means Hinge barrel is visible on right side that means a person will use Right hand to operate the door.

Why we need DIN Left/Right versions?

It is required as the outer handle is fixed and only operable with key that means only inside handle will be moving and hence we need to have different handles motion for DIN Left/Right opening Doors from inside.

DIN Left set

DIN Right set

NOTE: There is no need to order both DIN left and DIN right for a single door.

How to decide article no. while placing Order?

If a person will be using leftward opening door then DIN left will be used. Article no: 9228485 (For SS Finish only)

If a person will be using rightward opening door then DIN right will be used. Article no : 9228501 (For SS Finish only)

Prolock Infinity : The Complete Main Door Solution

	Prolock Infinity Handles Design 1 (HSN Code - 83024110)		Qty.	Unit	PU	MRP
	9228485	Prolock Infinity 1 SS DIN Left	01	Set	01	4,606
	9228501	Prolock Infinity 1 SS DIN Right	01	Set	01	4,606

Same concept applies to all ProLock Infinity Handles Design.

NOTE: There is no need to order both DIN left and DIN right for a single door.
