CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES OF WILD FAUNA  
AND FLORA - EC ANNUAL REPORT 1984

This document has been prepared for use within the Commission. It does not necessarily represent the Commission's official position.

CONTENTS :

1. Presentation and Introduction to the EC 1984 annual report to CITES	:	p. 1 - 5
2. Imports	:	p. 1 - 199
3. Exports - Re-exports	:	p. 1 - 206
4. Index of country codes used	:	p. 1 - 6

PRESENTATION OF THE EC 1984 ANNUAL REPORT TO CITES

In accordance with art. 8, par. e) of the EC Reg. 3626/82<sup>1)</sup> and art. VIII (6) and (7) of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) the Commission of the European Communities gathered the necessary trade data from all Member States and charged the Wildlife Trade Monitoring Unit with the production of the annual report.

The Community's 1984 CITES report consists of a cumulative report showing all trade in CITES specimens between the Community and the rest of the world.

Annexes with information on each Member State's individual trade with third countries have been established as well, except for Ireland and Luxemburg, as these countries declared that no trade in CITES-listed species had taken place involving non-Community countries. These annexes contain to the extent possible for each shipment<sup>2)</sup> :

- The States with which such trade occurred;
- the number or quantities and types of specimens;
- the latin names of the specimens;
- size and sex of the specimens, where applicable;
- purpose of the exportation, re-exportation, importation or introduction from the sea;
- permit numbers.

Because of the volume of these annexes it has not been possible to publish them together with the Community report. They were, however, made available to the Community Member States and the Convention Secretariat. A limited number of copies is available for interested Parties. Requests should be made to the Commission of the European Communities, 200, rue de la Loi, Directorate General for the Environment, Consumer Protection and Nuclear Safety, telex nr. 21877 COMEU - B.

---

1 OJ N° L 384 of 31.12.1982, p. 1

2 Some Member States have not been able to provide information on a shipment by shipment basis, but will do so for the 1985 annual report.

INTRODUCTION TO THE EC 1984 ANNUAL REPORT TO CITES

1. LEGISLATION

In the process of the development of a common environmental policy, Member States' competences have increasingly been transferred to the Community as it was recognised that common action was more efficient than individual action by Member States.

In the case of CITES there is an additional Community aspect: CITES mainly employs commercial policy instruments to attain its objectives and ever since the establishment of the EEC, international trade regulations have fallen in the competence of the Community.

The progressive removal of the controls at the internal borders in the framework of the Community integration process implies that the Community Member States are not in a position to carry out all of the obligations under the Convention in the absence of a common implementation system.

Therefore the European Community has adopted autonomous measures to implement CITES per 1.1.1984 under two EC Regulations (3626/82<sup>1</sup> and 3418/83<sup>2</sup>). These regulations, have been followed by a number of subsequent amendment regulations, mainly with a view to adapting them to changes to the Appendices to the Convention and its own Annexes listing the species to be controlled.

The regulations on CITES, which are directly applicable in all Member States, establish a detailed set of provisions for the common implementation of CITES in the Community and bind its Member States to respect the objectives and principles of the Convention. The regulations brought also two countries, who have at present not yet ratified or acceded to the Convention, within the ambit of CITES.

---

2 OJ N° L 344 of 7.12.83, p.1

## 2 STRICTER COMMUNITY MEASURES

Regulation 3626/82 contains a number of stricter measures regarding the conditions for trade of specimens of species included in the Appendices to the Convention, which are allowed for under Article XIV of the Convention.

2.1. Annex C part 1 of the Regulation contains 66 (sub)species, 6 groups of species, 1 family and 3 orders of fauna and 110 species of flora listed in Appendices II or III of the Convention, which shall be considered as species listed in Appendix I to the Convention (Article 3 (1)).

2.2. Annex C part 2 of the Regulation covers 43 (sub)species, 8 groups of species, 4 families and 2 orders of fauna as well as 3 species of flora from Appendices II and III of the Convention for which stricter criteria for the issue of import permits shall apply (Articles 3 (2) and 10 (1) (b)). These criteria are:

Import permits shall only be issued where

- it is clear, or where the applicant presents trustworthy evidence, that the capture or collection of the specimens in the wild will not have a harmful effect on the conservation of species or on the extent of the territory occupied by the populations in question of the species;
- the applicant provides proof that the specimen has been obtained in accordance with the legislation on protection of the species in question;
- the recipient of live animals possesses adequate facilities suitable for accommodating the species and suited to its behaviour;
- there are no other requirements relating to conservation of the species which militate against issue.

2.3. Any introduction into the Community, except where specimens are placed under either a customs transit or temporary storage procedure, is subject to the presentation of an import permit or import certificate (Article 5 (1) and 10). The Convention only requires import permits for specimens of Appendix I species. In case of the transit or temporary storage procedure, presentation of the relevant export documentation or satisfactory proof of its existence may be required (Article 5 (4)).

2.4. Article 6 of the Regulation prohibits

- display to the public for commercial purposes
- sale
- keeping for sale
- offering for sale or
- transporting for sale

of (a) Appendix I and Annex C part I specimens as well as of (b) Appendices II and III and Annex C part II specimens that have been imported without an import permit or certificate.

Member States may grant exemptions for specimens mentioned under (a) above in the case of "pre-Regulation" specimens entered in accordance with the Convention; bred in captivity or artificially propagated specimens; for research, teaching, breeding or propagation and for specimens originating from a Member State in accordance with legal provisions or approval of the competent authorities.

2.5. Transportation within the Community of live animals of the species included in Appendix I or Annex C 1 from their address specified in the import permit shall be subject to prior authorization from the management authority (authorities concerned (Article 13.2)).

### 3. REPORTING ON INTRA-COMMUNITY TRADE

As a result of the consequences of the integration process of the EC, namely the progressive removal of controls at the national borders between Member States, it is technically impossible and it would be in contradiction with the Treaty of Rome to maintain the records which would be required for the establishment of annual reports on intra-Community trade.

The internal CITES certificates are not surrendered to customs at internal borders, but are produced on the request of the competent authorities, not necessarily at the border, and remain in possession of the owner of the goods as proof of their legality. Consequently there is no data basis for the establishment of intra-Community reports.

Moreover, reporting on intra-Community trade may to a certain extent be useful for the monitoring of the level of implementation by individual Member States but would add nothing to the information which is required for conservation purposes: the Community annual report indicates the total volume of trade in all species covered by CITES.

The uniform implementation of CITES at the outside borders of the Community, together with the stricter measures described in (2) above, contains sufficient elements to guarantee an implementation of the Convention which meets the highest possible standards.
