## Introduction

This catalogue appears in each of the 11 official languages of the European Union. It comprises the monographs published by the institutions of the European Union during the period 1985-97, as well as current periodicals <sup>(1)</sup>.

**NB: This catalogue replaces and updates all earlier catalogues. The period covered by the catalogue, previously shown on the cover, has been replaced by the catalogue's year of issue.**

### Presentation of the catalogue

Each publication appears in only one language. If the English version does not exist, another language version will be included, in the following order of preference:

French	Portuguese	Finnish
German	Dutch	Greek
Italian	Danish	Others
Spanish	Swedish	

Where other language versions also exist, cross-references are provided by means of a code, in the following form:

IT: 88 - 12 which signifies the following:

IT the Italian version is described in the Italian catalogue  
88 in the year 1988

12 entry number 12 in the systematic catalogue

The catalogue is divided into five parts, as follows:

1. **The systematic catalogue:** Provides a subject classification of the titles, according to the list on page 8. Under each heading, priced publications and publications that are free of charge are separated.

For each monograph or collection, the full bibliographic entry appears only once and is preceded by a sequential entry number. If the publication appears under another heading, only the title and the principal sequence number are indicated.

In the case of publications in numerous volumes (collections), the first entry is the collection, followed by each volume. If one of the volumes does not exist in the language of the corresponding collection, another language version will appear, in the order of preference and within square brackets [ ].

For the periodicals, only the title and entry number of the periodical appear.

2. **Periodicals:** Comprises the bibliographic entry of the periodical, preceded by a sequential entry number.

3. **The subject index:** Comprises the contents of each publication, with the exception of EUR documents, according to keywords (descriptors) contained in the Eurovoc thesaurus <sup>(2)</sup>.

4. **The index of titles.**

5. **The index of series:** Alphabetical list of series with corresponding monographs.

The subject index and the indexes of titles and series indicate as a reference the entry number of the systematic catalogue.

### Abbreviations and conventional signs

The text languages of publications are indicated by the following abbreviations:
