PLUMBERS, ENGINE BUILDERS, STEAM and GAS FITTERS' BRASS WORK

Having outgrown our old premises on Plum street, we have just erected and moved into our new building on Spring Grove Avenue, where our facilities for manufacturing and supplying our trade will be greatly increased. We shall, as heretofore, keep to the front with the latest improvements, and produce the highest grade of goods known to the trade.

We manufacture not only a general line of Staple Goods for the trade but make a variety of **SPECIAL AND PATENTED GOODS**, which have become household words throughout the country, among which may be mentioned,

The "Star Rubber Stopper," for Wash Basins, Bath Tubs, Sinks, etc. ;
"Star Regrinding Valves," "Sight Feed Lubricator," Glass
Engine Oil Cups, Patent Guard Stop for Steam.
Water, and Natural Gas Use, etc.

In the latter service many of our largest Natural Gas Companies use no other class of Stops. We are the makers of Special Lubricators for Dynamo and Engine use, known as Patent "Signal" Oil Cups; also Grease Cups, Gate Valves, etc. Composition and Phosphor Bronze. Castings made to order: Babbitt Metal, etc.

Street Directory.

The following Directory of Streets, Avenues, Alleys, etc., is not only alphabetically arranged, but uniformly; giving the course, the beginning and ending of the streets, also the names of the streets on either side, where practicable.

All streets crossing Main are numbered East and West from Main, thus dividing each street into two distinct streets, by prefixing East or West to the same. The *even* numbers are on the North side of the street, the *odd* numbers on the South.

On streets running North from Ohio River, the numbers commence at the beginning of the street nearest the river, with the *even* numbers on the East side, the *odd* numbers on the West.
