

## Holdup Try Fails At Loramie Bank

An armed man used a Minster car dealer as a hostage in an attempt to hold up the Loramie Banking Company at Ft. Loramie Tuesday morning.

The man, described as about 30, tall and thin, and wearing a light-colored bandage across the left side of his forehead and face, forced Ford dealer John Westerheide to accompany him into the bank and took him along when he escaped.

The get-away car, a tan 1961 Thunderbird, owned by Westerheide, was found abandoned on the east side of South Frankfort Street in Minster.

A light trenchcoat and trousers worn by the gunman, and a brief case he was carrying during the holdup attempt, were found in the alley adjacent to the Miami & Erie Canal.

The state highway patrol, agents of the FBI, the sheriff's departments of Auglaize, Shelby and Mercer Counties, and police departments of area cities and villages were alerted and engaged in a search for the gunman.

Westerheide said he was driving at low speed south on Route 66 near the Paul Meyer farm and that a man standing along the highway acted as though he might walk in the path of his car.

He said he stopped and the man approached the car. Westerheide said he told him he was going to Ft. Loramie and that the stranger asked to ride along.

"Where do I drop you off?" Westerheide said he asked his passenger when they reached Ft. Loramie. At this point the man drew a gun and directed him to drive to the bank.

He forced Westerheide to accompany him inside. This was at 10:15 a. m. Then the holdup stalled as the gunman found himself facing the bank work area enclosed with bullet-proof glass.

The gunman ordered the bank employes to come out of the teller's cage. "One of you come out here," he shouted, holding the gun at Westerheide's right side, "or I'll let this guy have it!"

When none of the three employes moved to open up to the gunman said, "Okay, I'll count three and one of you opens up or he gets it."

He counted "one, two" and the bank door opened and a customer, Mrs. Janice Otting of Minster, walked in. The gunman ordered Mrs. Otting to the rear of the lobby.

Occupying the bank's work area were Herman A. Bornhorst, cashier; Paul Ahlers, assistant cashier, and Mrs. Joan Barge, bookkeeper.

At this point Bornhorst slid off his chair and started crawling toward the front of the area where he kept a pistol. When the gunman saw the cashier had disappeared he backed out of the bank with Westerheide.

Westerheide said the gunman drove his car back toward Minster and let him out on the Egypt Road in front of the Frank Friert residence. He was released at his own request, he said after telling the gunman to "take the car and get going but let me out of here."

## Heart Fund Drive To Be Feb. 23-25

Disease of the heart and blood vessels took the lives of 197 Auglaize Countians in 1961 according to statistics reported by Mrs. Norman Stueve in urging Minster citizens to give a warm welcome to the Heart Fund volunteers.

Mrs. Stueve is chairman for the heart fund drive to be conducted here this Friday, Saturday and Sunday by the American Legion Auxiliary.

Diseases of the heart and blood vessels accounted for 54.1 percent of the total 364 deaths from all causes in the county in 1961 according to the campaign chairman. It is estimated there are 1,985 persons in the county now suffering from these diseases.

"If you are not at home when your Heart Fund volunteer calls, look for the self-addressed 'not-at-home' envelope she will leave for you," Mrs. Stueve urged.

"Insert in it your contribution and send it to the Heart Fund. Your gift will help your Central Ohio Heart Association and the chapters in each county forward programs of research, education and community service to help save hearts in your community."

"If a person had a heart attack in your presence, would you know how to help?" Mrs. Stueve asks.

"The Heart Fund volunteer who calls at homes will leave a leaflet which gives this important information. It also, with the aid of diagrams, tells the story of heart attack. One leaflet has been designed so that it can be inserted in a telephone directory for ready reference."

Heart attack is just one of many cardiovascular diseases Heart Fund dollars are used to help combat. Rheumatic heart disease, high blood pressure, hardening of the arteries, and stroke, too, are major targets of medical scientists. These diseases account for more deaths in Ohio and in the nation each year than all other causes of death combined. They are also a leading cause of disability.

In addition to aiding research, the Heart Association conducts programs of public and professional education and community service "to help make the results of research quickly available to all of us."

The solicitation is vitally important, Mrs. Stueve added, because over 60 percent of all funds raised during the campaign is collected in this manner.

Volunteers will present an official Heart Fund contribution envelope for the donor's convenience—and to serve as identification. After the contribution has been inserted, the envelope may be sealed before being returned to the volunteer.

For families away from home, volunteers will leave pre-addressed envelopes so that contributions can be mailed to the local Heart Fund headquarters.

## TOWNSHIP ASKS AID IN DRAINAGE PROBLEM

A McLean Township delegation appeared before Shelby County commissioners to seek relief from a drainage problem involving Lake Loramie.

The group asked the commissioners and County Engineer Edward H. Moore to join in petitioning the state to clean out the lower branch of the lake to provide a usable outlet for the Sherman ditch.

The open ditch was described as important in the area and needed to properly drain hundreds of acres of lowlying land.

Filling of the branch of the lake has reached a point where the ditch doesn't function properly in carrying off water from the land, the commission was told.

## Departure Rites Held For Priests

Departure ceremonies for two Fathers of the Precious Blood for the society's missions in South America were conducted at St. Charles' Seminary at Carthagen Sunday. The Rev. Joseph Byrne, C.P.P.S., provincial, officiated at the solemn rites.

## 50 States Observe National FFA Week

The Minster Chapter, Future Farmers of America, in cooperation with Ohio's 10,000 FFA members, are joining with 600,000 Future Farmers throughout the 50 states in observing National FFA Week, Feb. 17-24.

National FFA Week seeks to focus attention on the work of the Future Farmers of today who will be the successful farmers of tomorrow.

This nation must have a constant supply of new farmers to replace those who die, retire, or otherwise leave the farm. They must be men with experience and training, for the successful farmer of today is both a scientist and a businessman, mechanic and laborer, at the same time capable of leadership in the affairs of the community.

Generally, they must be men who began farming at an early age, so that by the time they are ready to marry and start a family they will be firmly established in a farming program that promises a good future.

Vocational agriculture and the FFA constitute the most effective program yet developed for training boys to be good farmers and helping them to become established in the farming occupations of their choice.

## Program For Poultry Day Event Expanded

Preliminary details for an expanded Versailles Poultry Day program of two nights and one day—Wednesday and Thursday, June 13 and 14—were outlined during a meeting of the committee here.

An egg smorgasbord and turkey supper are planned for Wednesday evening, along with a dance, officials announced.

The full day of activities will come on Thursday when the traditional chicken barbecue is held on the high school grounds and Miss Chick of 1962 is chosen.

Also planned for Thursday's activities are the annual parade, commercial exhibits, a speaker and round dancing.

Both the Wednesday and Thursday night dances will be held in the high school. The parade will form in the center of the town and move to the south edge, where the high school campus is located.

The extra night has been added to the program to place more emphasis on egg and turkey production, a spokesman said.

New growers in the area are handling eggs and turkeys that ever before, they said.

The committee also elected a new second vice chairman to fill out an unexpired term of Roy Ravid, who resigned when he moved from the area. The new officer is Harvey B. Hole Jr.

Treasurer Harry McGreevey reported the committee already has expended \$12,500 for the Versailles swimming pool, now under construction and due to open this summer.

## The school district would like to know how it can go about providing proper facilities as the enrollment rises and progress and at the same time continue meeting minimum standard requirements of the state.

There are 893 pupils in schools of the district now and there will be 952 this fall according to Mr. Bergman. He said that by 1966 an estimated 1,075 will be in classes. The present high school enrollment of 199 is expected to increase to 232 this fall and 331 by 1966.

There are 33 classrooms in use in the several schools, located in a farming area west of Minster in Mercer and Darke Counties, and four of these are substandard according to Ralph D. Moore of New Bremen, the district's executive head. This fall 36 classrooms will be required and by 1965 there will be need for 40, he said.

There are 33 teachers on the staff now and there will be 36 this fall, according to Moore who said that by 1965 a minimum of 40 will be required.

Finances for 1962 are being studied by the board and members of that body are attempting to learn why the district is not receiving support money for retirement of employes and teachers and an allocation in the county board of education fund, under the state foundation program.

A sum of \$23,631, to which the board believes the district is entitled from the state under the foundation program, has not been received. One board member remarked that "this money never reaches us."

The board was informed by the clerk, Anthony Homan of Chickasaw. The district will have a total of \$258,369 for operation this year. Of this amount \$127,770 comes from the state and \$130,590 from local property taxes.

In other action the board authorized insulation of flooring and changes in the heating system in the classroom of Mrs. Drees in the Osagood school.

Other board members are Cyril Broering, vice president, and Leo Pohlman, both of Maria Street, and Richard Krizan and Alphonse Kremer, both of Chickasaw.

Mark McElroy, Atty. Gen. of Ohio

**MUNICIPALITIES CAN REGULATE BUT NOT PROHIBIT**

The police power granted to municipalities under the Ohio constitution includes the right to "regulate" but it does not give power to "prohibit."

Perhaps this distinction is made more clear with a recent court case taken as an example. An Ohio city passed an ordinance banning any firm, person or corporation from selling any ice cream in any form on the streets, sidewalks, alleys or parks in the city.

An ice cream manufacturer, who sold directly to the public from handcars, brought suit to test the validity of the municipal ordinance.

The courts ruled the city or-

inance invalid.

In ruling, the court said the occupation of peddling is a property right protected by both Ohio Constitution (Article I) and the Federal Constitution (14th Amendment).

These amendments protect us from unwarranted and arbitrary interference by legislative bodies.

Section 3, Article 18 states: Municipalities shall have authority to exercise all powers of local self-government. They can adopt and enforce within their limits such local police, sanitary and other similar regulations as are not in conflict with general laws.

The Ohio Constitution uses the word "regulations," and not the word "prohibitions."

Court rulings have held the term "regulation" has been construed to include "prohibition" when the object of the legislative regulation is an inherently evil occupation, trade or business.

Under a general power to regulate and license, a municipality, directly or indirectly, however, cannot prohibit a useful occupation or privilege.

However, each question of this nature is an involved legal question. It is always a good idea to consult your lawyer when a problem of this nature arises in your business life. He is the person qualified to give you sound, competent advice.

Getting The Most Where The Most Is Got

Russia, hat in hand, a few weeks ago came crawling to the UN and begged to be excused from paying her share of Congo war expenses. Russia pleaded poverty and the continuing costs of rebuilding after the war.

Remember how Russia brags about the economic superiority of Communism. When was it Big K said he would bury us? One way to get ahead is to refuse to pay your bills. Saves lots of money.

One of Russia's many economic troubles is a food shortage due to the consistent failure of her gigantic collectivized and state farms. Since we claim we have more food than we want, and the Reds admit they have less than they want, why don't we trade American farmers for Russian farmers; then let Russia deal with the plague and the curse of burdensome surplus food.

As much moaning and groaning as we've done about being cursed with blessings, maybe it would be a refreshment to go hungry for a few years while Russia zoomed ahead in industry, health, living standards and military might, all based on a newly-productive agriculture. Then with our bins and bellies empty and hers full, perhaps she

would be less reluctant to attack us than she is now.

If you want cheap food, fiber and industrial raw materials, go to the American farm family. If you want new, better ways of doing things, go to the American farm. Farm machinery tycoons make no secret of the fact that the entire farm machinery industry is based on farmers' inventions—refined and polished and merchandised by the factories. If you want stout-hearted, stout-souled people who can laugh off adversity and build a better tomorrow from the ashes of yesterday, go to America's farm families.

To get the most of anything good, go where the most of it is—America's family farms.

## APPLE FRANKFURTER BAKE

This is the season for sturdy, satisfying fare that "hits the spot," as the saying is. So along comes Apple Frankfurter Bake, simple and hearty and tasty. And easy to prepare, into the bargain.

The ingredients are all everyday friends . . . frankfurters, sweet potatoes, zesty tangy apple sauce, nutmeg, butter. Yet put together, the apple tang happily merges with the rich juicy flavor of the frankfurters, the sweet maleness of the potatoes, to give you a dish, choice, robust and savory . . . and one which announces same with warm, fresh-from-the-oven whiffs.

### APPLE FRANKFURTER BAKE

6 medium sweet potatoes, cooked, peeled and sliced  
 3 1/2 cups canned apple sauce  
 1/4 teaspoon nutmeg  
 8-10 frankfurters, scored  
 3/4 teaspoon salt  
 1/4 cup butter or margarine

In lightly buttered shallow casserole, arrange layer of sweet potato slices; cover with apple sauce and sprinkle with nutmeg. Arrange frankfurters on top of apple sauce with remainder of potato slices. Sprinkle with salt and dot with butter. Bake in a moderate oven, 350 degrees for 25 to 30 minutes. Makes 6 servings.

## Wildcats Bow Out Of Auglaize Tournament

Minster and Wapak St. Joe dropped out of the Auglaize County A basketball tournament Tuesday night as result of losses to Waynesfield and New Knoxville.

Minster, leading 10-1 early in the game and ahead 10-3 at end of the first quarter, hit a cold streak both from the field and the charity line, and in the rebounding department, and Waynesfield caught up and forged ahead late in the contest which ended with the Wildcats on the short end of 46-42 count.

Favored New Knoxville had plenty of trouble with fired-up St. Joe. Wapak led practically the entire game and the Rangers were forced into overtime before taking a 50-48 verdict.

The Wildcats defeated New Bremen 56-50 at St. Marys last Wednesday in their first tournament game, a thriller played before an overflow crowd of 1,300. Hemmelgarn was high for the Wildcats against Waynesfield with 14 points. Frericks and Boeckman each had 8, J. Albers 6, N. Albers 4 and Heitkamp 2.

New Knoxville and Waynesfield met for the championship at 8 p. m. Friday in McBroom gym.

## Feed Grain Program Payment Available

Producers who participate in the 1962 feed grain program are entitled to payments for diverting acreage from production of corn and grain sorghum according to Thomas A. Byrne, chairman, Auglaize County Agricultural Stabilization and Conservation Committee.

Up to half of the estimated payment to be earned may be paid in advance when the producer signs up.

Chairman Byrne said this program provision should benefit growers who can use ready cash during the spring planting season. Signup for the program is from now through March 30.

The program offers payments to producers for diversion of feed grain cropland to approved soil conserving uses. It is voluntary, but farmers who cooperate must divert a minimum acreage in order to be eligible for price support on the normal production of their 1962-crop corn and grain sorghum acreage.

Members were asked for their cooperation in saving the following articles: Bleach containers, plastic gallon or half-gallon, pencils, Christmas cards, good used clothing for children of school age, toys, catalogues, magazines and comic books. The usual entertainment will be omitted at the next meeting March 13. Those members planning to attend are asked to have a scissors to help in a project. **March of Dimes Helps Dry Youngster's Tears of Pain**

Anthony Ryan wasn't normally a crybaby. But at 10 months he began crying almost incessantly, and at times even screamed.

His loving parents in Philadelphia were nearly out of their minds. With four other small children, the household was pandemonium. No one appeared to know precisely what was causing the infant's dreadful paroxysms of pain.

Eight months and countless tears later, the cause of Anthony's agony was at last diagnosed as rheumatoid arthritis, seemingly afflicting every area of his tiny body.

It's 11 years now since Anthony was stricken. He will limp the rest of his life; he cannot play baseball today with the other boys in the block, and he is still in a great deal of pain. As a matter of fact, until just a short time ago he couldn't even turn his head.

Science has not yet licked the problem of Anthony and of thousands of children like him. There is still no simple, accurate test for the early diagnosis of rheumatoid arthritis, although the outlook is hopeful. But many rheumatologists would agree today that had modern diagnostic tools been available to him, and had Anthony been examined immediately by a "team" of specialists in the medical and allied professions—the group of orthopedists, pediatricians, laboratory research scientists, physical therapists and others now available in March of Dimes-financed treatment centers in many parts of the nation—Anthony today might be skating with the other kids on the frozen pond at the bottom of Prince Circle where he lives.

Although much of the injury done to Anthony in past

ON EAST COAST, Dr. John D. Bridges, director of March of Dimes Arthritis Treatment Center at Children's Hospital, Philadelphia, examines Anthony Ryan, 12 years.

ON WEST COAST, identical twins Cathy and Carol Gile, 7 years, are greeted at March of Dimes Congenital Defects Clinic in University of Washington Hospital, Seattle.

years is irreparable, doctors at a new arthritis treatment center at Philadelphia Children's Hospital, sponsored by five March of Dimes chapters in the area, check him regularly to ease his pain and avoid further damage.

This same "team approach" is also employed by the ever-growing number of National Foundation-March of Dimes chapter-sponsored clinics for treatment of birth defects, another area in which the health organization is concentrating. Infants with any of hundreds of major birth defects are now examined by as many as 12 specialists at each clinic, working together as a team that might include a pediatrician, neurosurgeon, urologist, orthopedist and internist as well as others.

For instance, consider the perils from one birth defect

that surrounded Cathy and Carol Gile, identical 8-year-old twins of Vancouver, Wash. From birth, the children have been seriously ill with a succession of maladies—pneumonia (each six times), ear infections (again, each six times) and other disorders which have meant prolonged hospitalization. Both were found to be afflicted with an inherited lack of antibodies, the substances in the blood which combat bacteria.

At the University of Washington Hospital, Seattle, where 56 March of Dimes chapters in Washington, Idaho and Alaska have financed a birth defects clinic, the attractive little girls twice monthly are given injections which literally keep them alive.

The Seattle "team" at the March of Dimes clinic watches over the twins devotedly.

There are tens of thousands of Anthonys and Cathys and Carols in the United States today. One reason The National Foundation-March of Dimes turned to these diseases three years ago is that almost 700 babies are born each day in this country with significant birth defects, accounting for more than 21,000 deaths each year. Crippling rheumatoid arthritis affects 50,000 children and adolescents—apart from the overall toll of 11 million American victims of rheumatic diseases.

An increasing number of sufferers from these two cruel handicaps are receiving treatment from the specialist "teams" at March of Dimes-financed chapter clinics. As more funds become available, additional centers will be established to provide medical care for even more victims of chronic crippling disease.

"Hocking County possesses more points of interest to lovers of nature than can be found in any other portion of the State." So stated Dr. O. C. Farquhar of Zanesville, in the middle of the last century in Howe's Historical Collections of Ohio.

Today this is as true as it was then. The Hocking State Parks, within a ten-mile circle southwest of the city of Logan, make up a region visited by more people than some of the National Parks.

Old Man's Cave, pictured above, is one of the most popular of the Hocking State Parks. This park features a variety of waterfalls, caves, towering cliffs, and boulder strewn gorges. A shelter house, picnic ground, and a camping area help popularize Old Man's Cave State Park.

Hikers, picnickers, and nature study enthusiasts find Old Man's Cave State Park of intense interest as they find the other Hocking State Parks nearby. This list of State Parks includes: Ash Cave, Cedar Falls, Cantwell Cliffs, Rock House, Conkle's Hollow, and the Hocking State Forest.

The National Safety Council says: "Always carry a pair of reinforced ice chisels. In deep snow and on ice, they help you go and stop more safely." Winter tires aid for medium snow, but do not rely on them for deep snow or ice conditions. Don't be a traffic victim.

## WASHINGTON AND "SMALL BUSINESS" BY C. WILSON HARDER

The cartel producing objective of the drive to put the U.S. economy into an alliance with the European Common Market is perhaps best seen in the plan the aluminum industry would like to put across.

The U.S. industry would like to be free to enter into negotiations with the 11 aluminum exporting nations, which communist Yugoslavia is one, in a world trade in the C. W. Harder metal.

Under the proposal, the U.S. would guarantee these export rights to the same share of the U.S. aluminum market as they now hold, plus a share of any increases in the use of the metal in this country.

In return, the other countries would give the U.S. aluminum industry guarantees to a share of the world market.

This would result, an industry spokesman said in a method to "organize the world aluminum trade on an orderly basis."

This plan, of course, would eliminate free competition in the world aluminum market and substitute for it a monopoly. In addition, it would be a monopoly composed of a partnership between private investors, ownership, socialistic government ownership and in the case of Yugoslavia, communist ownership.

In addition, it would negate thoroughly and completely the American principle of free competition and would result in global price rigging.

Back in 1776 the founders of the nation shed blood to escape from this sort of thing, and by and large in the years that followed the nation has done quite well.

Many Congressmen are astounded that any open mouth would ever be made to get the nation to forsake these principles to enter into such a thing as the European Common Market.

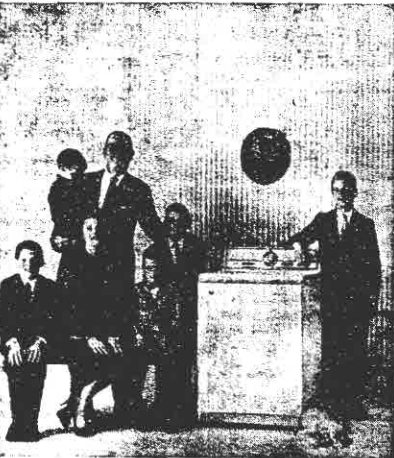

Of course, there is a facet of this European Common Market agreement that has not been brought too much to light in the U.S. That is the fact that the existing agreements provide for a free movement of labor between the signatory nations. There are no immigration quotas on workers between the nations.

If the U.S. accepted this part of the agreement it is not hard to imagine that every 40 and 60 cent worker in Europe would be swarming into America.

It is, of course, a part of the current proposal to recognize that many U.S. industries would be forced to shut down as they would be unable to compete with the flood of cheap foreign imports. The plan then is to assess the taxpayers for funds to retrain all the dispossessed American workers for jobs in other fields.

But nobody has yet come up with an estimate on how many billions of dollars it will take to send all these millions of displaced workers through Harvard to enable them to qualify for jobs as government economists, which appears to be the only substantially growing area of employment left in the nation.

The Feb. 13 meeting of St. Ann Rosary-Altar society was conducted by the first vice president, Mrs. Marie Fleckenstein. There were 77 members present. A new member, Mrs. Wilma Brunswick, was welcomed. Mrs. John Albers will take donations for the Madonna Plan. Many gifts have been received for this cause. Communion clothes were discussed and it was decided to have them the same as last year. Thank you note was read from Clemens Sanders for his Christmas gift. A letter was read on Catholic relief service suggesting the president of the Holy Name society give a 15-minute explanation at the March meeting. Mass offerings were made for living and dead members and for the late Rev. Anthony Moeller who died 10 years ago in June. Because of need of new drapes for St. Michael's Hall, the cleaning will be done in March. Mrs. Leo Boerger and Mrs. Bud Heckman were appointed to order the material. Others who volunteered to help make the drapes are Mrs. Anthony Seger, Mrs. Julius Henke, Mrs. Frank Seger, Mrs. Marcelus Lachey, Mrs. Clem. Ruhenkamp and Mrs. Ed Ahrens. Father Leibold spoke, urging subscriptions to Telegraph-Register. He explained importance in keeping up on news of a coun-

**You don't buy a Maytag; you adopt it**  
(A Maytag has a way of becoming a member of the family)

Among the things you live with in your home, a few objects become real friends — a favorite chair, perhaps, or old silver. Home just wouldn't be the same without them.

A certain family in West Hyattsville, Md., has had reason to feel much that way about their Maytag. There were five boys, ages 13, 11, 10, 8, and 2 — and one Maytag Automatic, age 9. One day the machine stopped cold. Mother thought, with all the wear and tear her old washer had been given, it might be beyond repair.

Her serviceman thought otherwise, however, and two hours later her 9-year-old Maytag was "operating" as though it was a new machine.

Mother wrote: "Please keep making Maytags in the future as you have in the past."

We mean to. Of course, the new Maytags have many, many new features. But when you buy yours, you can expect the same old dependability. So be prepared to live with it as a member of the family.

Today's Maytag gives you all these advanced features right along with dependability: An Automatic Bleach Dispenser and bleaching mistakes, a Lin-Filter Agitator eliminates lint problems, an Automatic Water Level Control saves money, a Safety Lid stops action in seconds when opened, a Zinc-coated Steel Cabinet protects against rust.
