PANTONE Goe™ System

uncoated GSPS002 **£319**

Our plastics color system provides a way for designers and manufacturers to accurately specify colors for their products.

- System includes transparent, opaque, pearlescents, fluorescents and metallics.
- Color chips provide three thicknesses to display different levels of translucency.
- Chips are arranged and stored in ring binders. All chips have a gloss finish & opaque chips a matte finish.
- Large-size polypropylene chip standard in your favorite PANTONE Color.
- The PANTONE® PLASTICS selector is widely used in the manufacture of plastic materials and products.

A richer color vocabulary with 2,100 technically achievable shades for fashion, home and interiors featuring the most sought after hues for today and tomorrow.

- A broad assortment of nuanced neutrals and mid-tones
- Many complex hues with greater depth and intensity
- A wide variety of vibrant brights across all color families
- Subdued and smoky variations of popular choices

To help uphold consistency and accuracy of all 2100 colors in our system we formed a partnership with Clariant International Ltd., one of the world's largest textile colorant and chemical producers. Together, Pantone and Clariant are proud to present our SMART system, the world's first method of color creation designed with the fashion and home furnishings markets in mind.

SMART color

SMART color swatch card

Setting up seasonal colour palettes has never been easier. Individual unbacked loose fabric swatches available for all 2100 colours provide a precise way to select, specify, control and communicate your colour choices. Double folded fabric measures 10 x 10 cm; unfolded swatch measures 10 x 20 cm; giving vendors twice the amount of fabric for optimum colour visualization and instrumental evaluation. Each card is identified with four PANTONE Color name and number strips so that a swatch can be cut when being used for design or merchandising tools.

FASHION + HOME cotton swatch
