COLOUR MULTIFUNCTIONALS FOR A4 FORMAT

ECOSYS stands for ECOlogy, ECOnomy and SYStem-printing. With their long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership with regard to maintenance, administration and consumables. The cartridge-free system means that only the toner has to be replaced regularly. The modular design concept allows you to add workflow-enhancing functions as required. Integrated system software provides long-term cross-network compatibility. KYOCERA's long-life components cost you and the environment less.

PRESCRIBE IIc
With the KYOCERA page design and control language PRESCRIBE IIc, even complex graphics, logos and forms (multipart forms) can be created independently on the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

The KM NetViewer
The KM NetViewer enables complete monitoring and control of all ECOSYS printers and digital KYOCERA multifunction units from any Windows© PC and thus provides ideal network administration. It also supports the standardised SNMP protocol.

Status Monitor and Command Center
The Status Monitor shows the current printer's condition and gives direct access to the Command Center for the modification of settings that are not contained in the drivers (e.g. network settings, adjustment of sleep mode or blocking of the control panel).

USB Host Interface for USB Flash Memory
Documents can be printed directly from and scanned to a USB Flash Memory (e.g. USB stick) via the USB host interface. The documents stored as PDF, XPS, TIFF or JPEG are selected directly via the printer's control panel. No computer is required.

KYOCERA

BRINGING ECOLOGY AND ECONOMY TO YOUR OFFICE.

ECOSYS ECOSYS is the business approach to eco-friendly office operations. Our hardware and toner technology have been designed to consume only the absolute minimum and still deliver highest quality. And when the toner finally does run out, all you have to replace is the toner-kit and not an entire cartridge including also drum and/or developer. That saves resources, reduces your company's environmental impact and means even lower costs for you. Duplex printing is standard, saving you money and reducing your paper consumption simply by allowing you to print on both sides of the paper. And ECOSYS does more than just reduce the use of consumables and energy to give you exceptionally low printing costs. With KYOCERA's long-life technology you enjoy the benefits of longer maintenance cycles that ensures exceptional reliability. Designed to avoid ozone emissions and to reduce the noise level, ECOSYS also helps to achieve an excellent office environment. ECOSYS: it is where economy and ecology meet. For the environment.
