

ASSISTO

Make life easier

The bathtub with door designed for your well-being

The Assisto bathtub allows you to experience total relaxation with its unique ergonomic design that reduces the risk of falls and accidents. It was designed to give you the moments of relaxation you deserve and to allow you to remain in the comfort of your home longer.

Ideal for adapted bathrooms

Designed to improve comfort and well-being, the Assisto bathtub offers solutions to meet the specific needs of people who require an adapted bathroom and wish to remain at home longer.

- Aging population
- People with reduced mobility
- Larger people

Exceptional comfort and relaxation

Unique on the market, the ergonomic design and optional features of the Assisto bathtub allow you to experience unparalleled comfort and relaxation.

Increased autonomy and dignity

Since there is no threshold and no need to step over anything, the risk of falls is reduced, offering more dignity and autonomy to people with fragile health or mobility problems, allowing them to reside in their own homes longer.

Safety is our priority

The design of the Assisto bathtub with door considerably reduces the risk of falls. Its height meets North American accessibility standards and allows for a safer bathtub transfer.

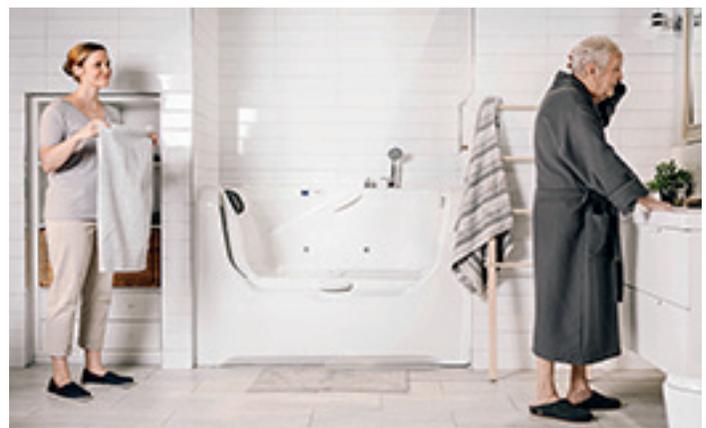

Caregivers and home care staff

The ergonomic design makes it easier for seniors to access the bathtub's various features, reducing the risk of injury and providing a more comfortable experience for seniors and caregivers.

Health care Institutions

The design of the bathtub promotes a better patient-worker relationship while improving the comfort and safety of both. Its features allow institutions to offer more frequent hygienic care and increased dignity to beneficiaries.

An unparalleled relaxation experience

The unique features of the no threshold Assisto bathtub with vertical door were all developed with the goal of providing an optimal and safe relaxation experience.

Easily accessible

Designed for the safety and well-being of its users, the bathtub integrates perfectly into an adapted bathroom. Thanks to its easy access without a threshold or the need to step over anything, the risk of injury is reduced.

Horizontal position

The ergonomic design of the Assisto bathtub with door provides a horizontal bathing experience, just like a conventional bathtub, with the difference that you are never standing upright. The bathtub handle on the inside provides extra stability and safety.

Lightweight vertical door

The lightweight door (less than 1 lb. [0.5 kg]) is easy to handle. Its secure locking system ensures that it remains closed as soon as there is water inside the bathtub.

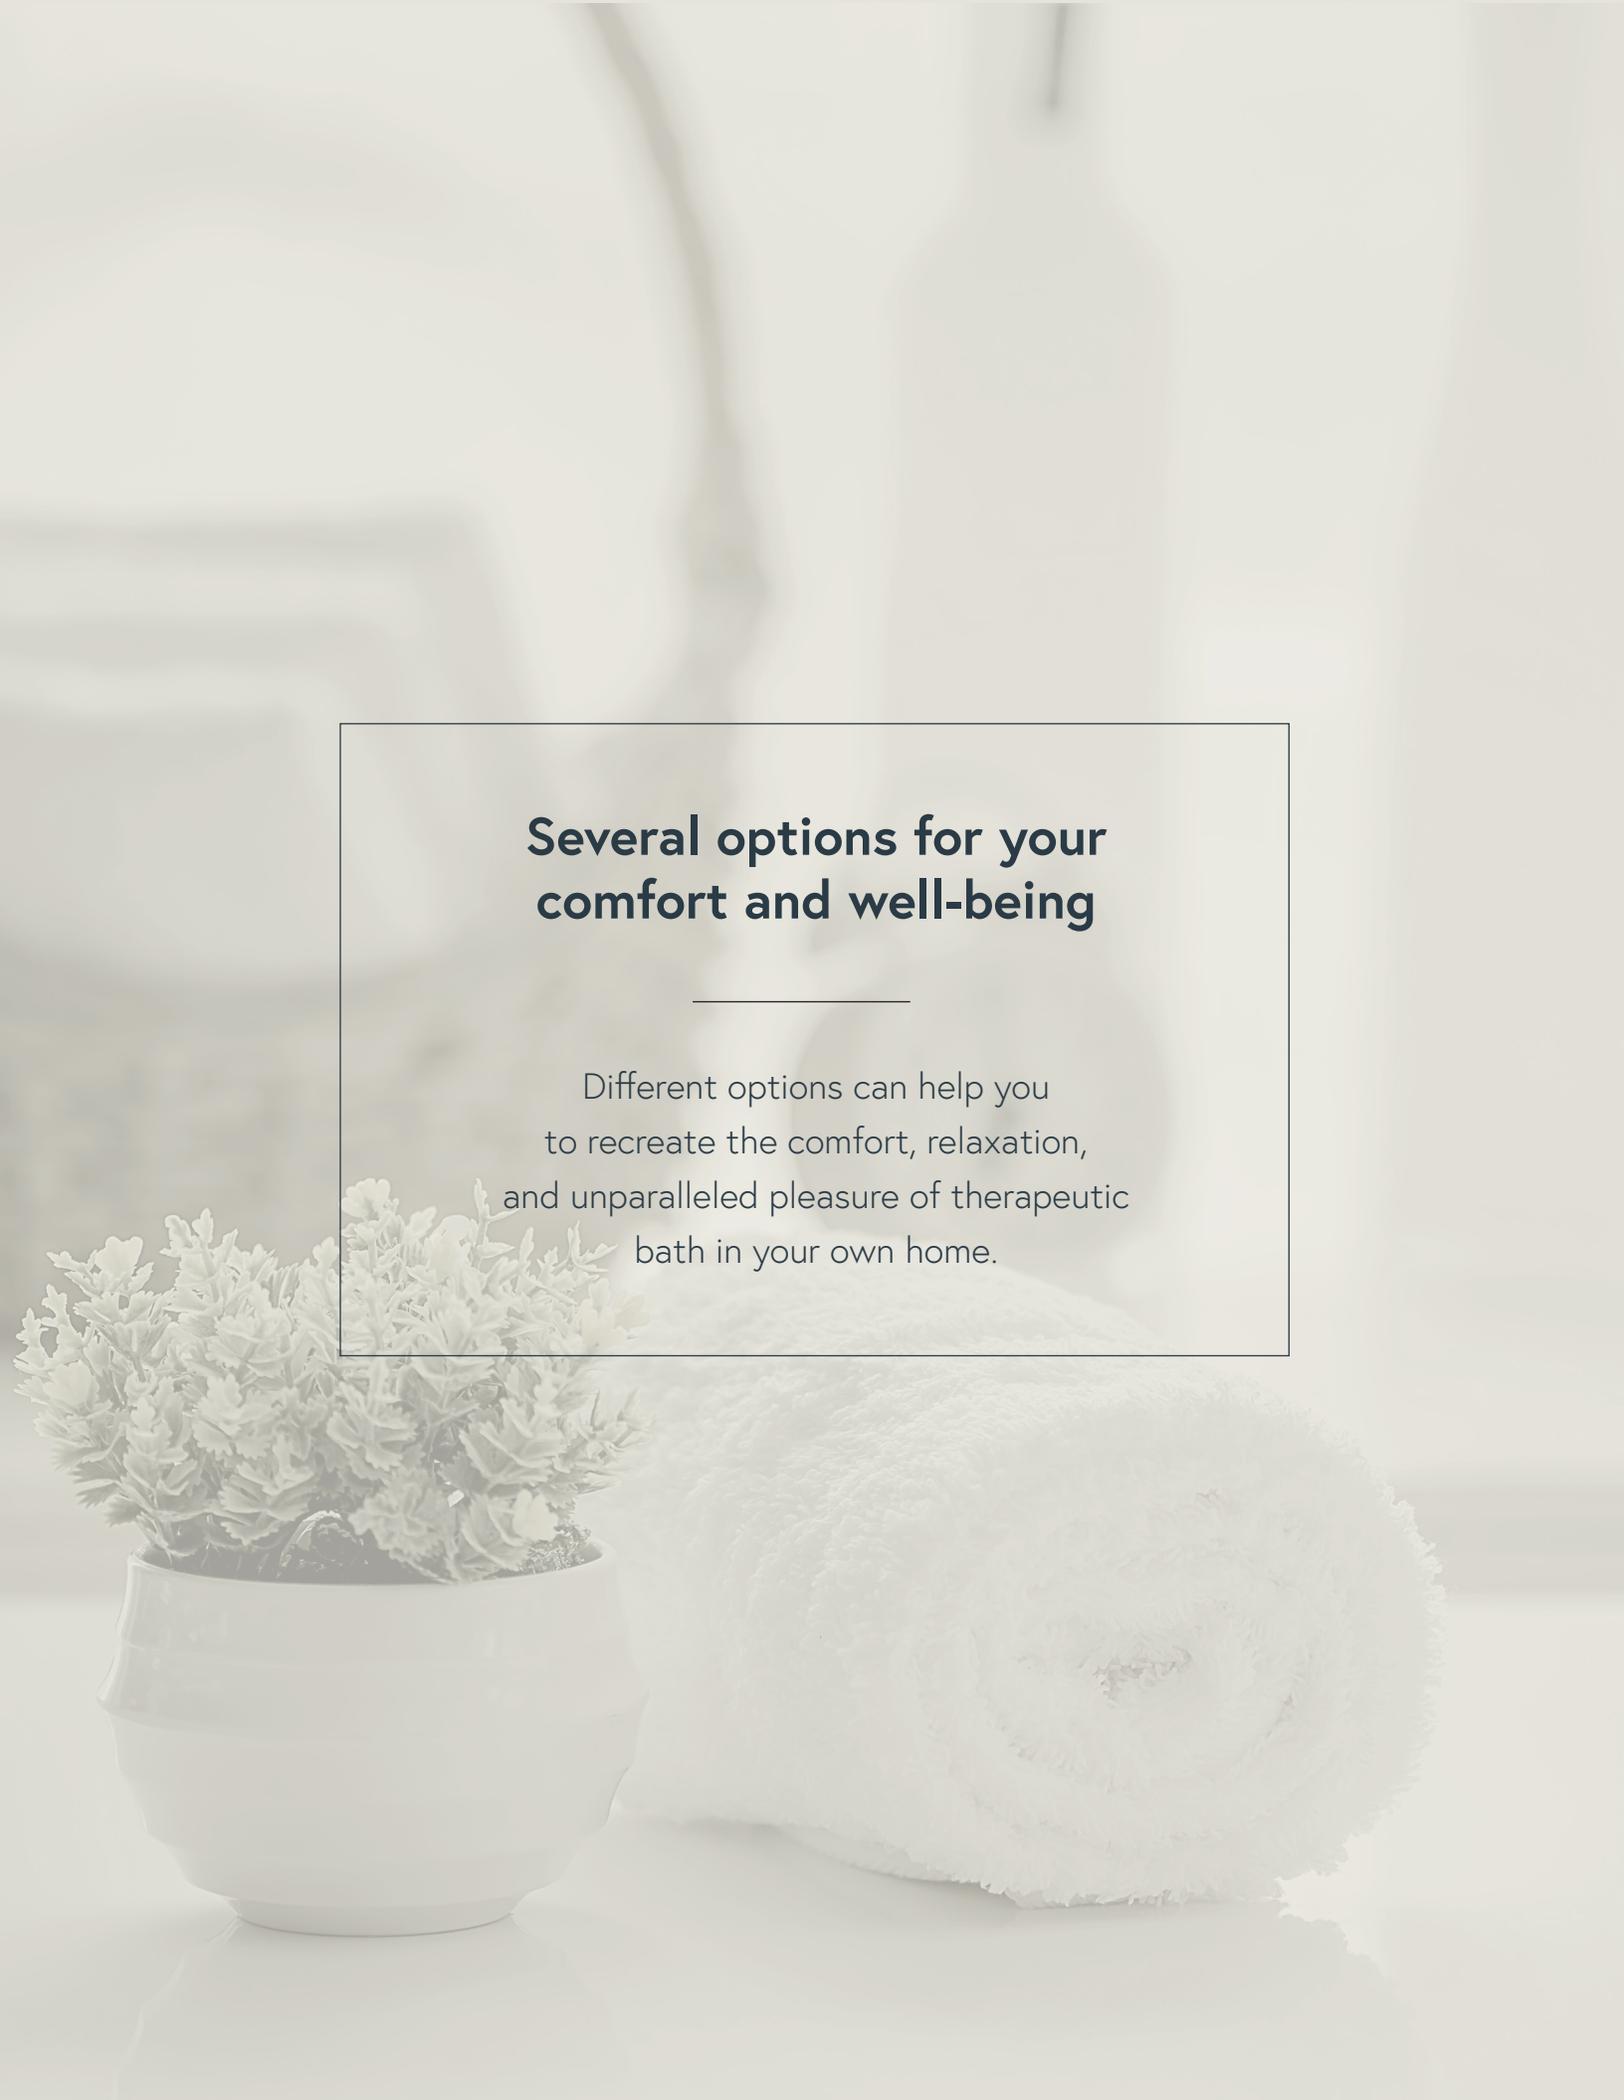

A high-flow valve

The quick and efficient filling of the bathtub is completed in just a few minutes, allowing you to enjoy the comfort and warmth of the water right away. In addition, a hand shower is integrated into each bathtub.

Water drainage in less than 15 seconds

Assisto's patented drain system allows water to drain in less than 15 seconds. This makes getting out of the bath faster and easier, without having to feel cold while the bathtub empties.

The background of the entire page is a soft-focus photograph. On the left, there is a small, white, rounded ceramic pot containing a green, leafy plant. To the right of the pot, a white, fluffy towel is rolled up. The background is bright and airy, with a window or light source visible in the upper right corner.

Several options for your comfort and well-being

Different options can help you
to recreate the comfort, relaxation,
and unparalleled pleasure of therapeutic
bath in your own home.

Heated backrest

The heated backrest allows you to enjoy a superior relaxing experience as soon as you step into the bathtub. Its two levels of heat intensity allow you to adjust your comfort level to your liking for total relaxation and relief from everyday stress.

Air jets

Experience the pleasant sensation of being wrapped in a cushion of bubbles for a relaxing, revitalizing, and unique experience that maximizes your well-being. Treat yourself to the benefits of a spa at home.

Chromatherapy

Relax in comfort with a multi-sensory experience. Chromatherapy allows you to benefit from the therapeutic effects of light on your body by creating a relaxing or invigorating atmosphere, depending on the colour you choose. Each colour acts on a specific energy point in your body.

A worthwhile investment

The bathroom (with shower or bathtub) is where falls are most common. Unfortunately, more than one third of them result in a loss of autonomy leading to a transfer to a hospital, and eventually to a nursing home. By installing an Assisto bathtub, you can enjoy increased comfort and safety at home for years to come.

Made in Canada

Assisto bathtubs with door are produced in Canada. We always ensure exemplary quality control and conduct all the necessary tests to deliver an optimal product that responds to your expectations.

Certified ECORESPONSIBLE

Assisto cares about the environment, and we aim to reduce our ecological footprint every day. Our responsible and recognized practices in ecodesign and sustainable development have allowed us to obtain ECORESPONSIBLE Attestation - ECODESIGNED PRODUCT.

Patented product

Over five years of research has led to a patented product for Canada and the United States and a patent-pending product for Europe and Japan.

Quick installation

The Assisto bathtub can be installed in a single day, allowing you to enjoy its benefits in no time. Plus, there is no need to change existing plumbing.

Peace of mind

Enjoy peace of mind with Assisto's basic and extended bathtub warranties. Our product has also received ETL Certification.
