Copyright (c) 2013 Lubomir Popov <ipopov@mm-sol.com>, MIM Solutions New i2c_read, i2c_write and i2c_probe functions, tested on OMAP4 4430/60/70), OMAP5 (5430) and AM335X (3359); should work on older OMAPs and derivatives as well. The only anticipated exception would be the OMAP2420, which shall require driver modification. Rewritten i2c_read to operate correctly with all types of chips old function could not read consistent data from some I2C slaves). Optimized i2c_write. New i2c_probe, performs write access vs read. The old probe could hang the system under certain conditions (e.g. unconfigured pads). The read/write/probe functions try to identify unconfigured bus. Status functions now read irqstatus_raw as per TRM guidelines except for OMAP243X and OMAP34XX). Driver now supports up to I2C5 (OMAP5).
