**OCCUPATION [RING CODE IN BOX]**

(d) Are/were you working as an employee or were you self employed?

an employee? 1  
 self employed? 2

**ASK EMPLOYEES ONLY**

(e) Do/ did you/ ... have any managerial duties, or were you supervising any other employees?

Manager 1  
 Foreman/supervisor 2  
 Neither? 3

**ASK BOTH EMPLOYEES AND SELF EMPLOYED**

(f) EMPLOYEE: How many people work(ed) at the establishment?  
 SELF EMPLOYED: How many people do/did you/ ... employ at the place where you worked?

None (SELF EMP ONLY) 0  
 1 - 24 1  
 25 or more 2

M INCOME

\* ASK MDK ON BEHALF OF HOUSEHOLD.  
BUT IF POSSIBLE, FIND OUT INCOME FROM PERSON RECEIVING INCOME. CONSULT WAGE SLIPS ETC.  
ELIGIBILITY: ALL USUAL MEMBERS OF HOUSEHOLD ONLY.  
EXCLUDE: REGULAR OR OCCASIONAL VISITORS, BOARDERS OR LODGERS.  
ALL INCOME SOURCES: PART-TIME WORK, UNEMPLOYED, CHILDREN'S SATURDAY JOBS.

(i) Income source:  
This card shows various possible sources of income. Can you tell me what kinds of income you and your household receive (PROMPT)?

SHOW SOURCES OF INCOME CARD

RECORD INCOME SOURCE AGAINST EACH PERSON ON GRID OPPOSITE

IF CHILDREN, PROMPT FOR CHILD BENEFIT AND ONE-PARENT BENEFIT  
CHILD BENEFIT IS CODED OPPOSITE THE WOMAN, UNLESS LONE MALE PARENT, AND IS NET + ACTUAL.  
DO NOT INCLUDE HOUSING BENEFIT

FOR EACH PERSON IN TURN, AND FOR EACH INCOME SOURCE:

(ii) Income:  
How much was paid, the last time it was paid?  
[LAST TIME PAID, EVEN IF UNUSUAL;  
INCLUDE OVERTIME, BONUSES, TIPS]  
  
NET (= TAKE HOME PAY, AFTER ALL DEDUCTIONS) PREFERRED;  
BUT FOR HOH ASK FOR BOTH NET AND  
GROSS (= BEFORE DEDUCTIONS)

**ASK SELF EMPLOYED**  
What was your income from this job/business, after paying expenses and wages, for the most recent period (eg 12 months) for which you have figures?  
CHECK: Is that with tax and National Insurance deducted?  
  
GROSS = Expenses/wages deducted  
NET = Tax and NI also deducted.

(iii) CODE WHETHER THE INCOME IS NET OR GROSS.

(iv) CODE WHETHER THE INCOME IS ACTUAL, ESTIMATED OR CARD

OBTAIN IN ORDER OF PREFERENCE: ACTUAL, ESTIMATE, AMOUNT FROM CARDS (C, D, E, F)

(v) Frequency:  
How long does this cover?  
(PROMPT: HOW OFTEN IS THAT PAID, WEEKLY, MONTHLY...?)

IF MONTHLY, CHECK WHETHER CALENDAR MONTH OR 4 WEEKLY

IF ANY INDIVIDUAL INCOMES OF ADULT MEMBERS ARE MISSING, ESTIMATE NET HOUSEHOLD INCOME

N Could you estimate the total household income each week?  
(after ALL deductions for income tax, National Insurance, etc)

SHOW INCOME CARD G

or if necessary

SHOW INCOME CARD H

WRITE IN CODE LETTERS OF INCOME BAND .....

**ASK ALL (NOT JUST PENSIONERS)**

**P** Does anyone in the household have meals on wheels?

Yes .... 1 → Ask (a) to (d)

No ..... 2

**IF YES**

(a) Which people?

(b) On which days of the week?

GIVE DETAILS OF DELIVERY DAYS IF NECESSARY

.....

(c) Is the meals on wheels paid for or free?

**IF PAID FOR (Y)**

(d) How much is paid per meal?

EXPLAIN DIARY

---

**ALL - ASK AT FINAL VISIT**

**VISITORS / HOUSEHOLD MEMBERS GONE AWAY**

**S** Can I just check please:

(i) Did you have any visitors staying 4 nights or more (during the diary week)? Yes ..... 1

No ..... 2

IF YES, WRITE IN AGE AND SEX OF EACH .....  
[ADD THESE TO THE HOUSEHOLD GRID]

(ii) Was anyone away for 4 nights or more (during the diary week)? Yes ..... 1

No ..... 2

IF YES,  
WRITE IN AGE AND SEX OF EACH .....

MDK/ HOH/ XHOH will always remain on the Household Grid - even if away all week.

Others away for 4 nights or more (eg children on school trip, at relative's),  
REMOVE FROM HOUSEHOLD GRID AND ADD TO OCCASIONAL VISITORS GRID

---

**PERMISSION TO RECALL**

**T** If we want to contact you again about any future survey,  
would it be all right if we called on you again?

Yes, it would be all right (UNCONDITIONAL) ..... 1

No (UNCONDITIONAL) ..... 2

Yes (WITH CONDITIONS/ QUALIFICATIONS) ..... 3

---

**ALL REMAINING QUESTIONS INTERVIEWER CHECK AT HOME**

**OCCASIONAL VISITORS**

(i.e. These have eaten at least one meal in the household, but have NOT stayed for 4 nights or more. Code from the 'Visitors' row of the Main Meals page of the completed Main Diary)

**Rules for coding Occasional Visitor's Grid**

One line for ALL adult males (16 yrs or more), age is always 999; sum individual net balances.

One line for ALL adult females (16 yrs or more), age is always 999; sum individual net balances.

One line for EACH child (15 yrs or less); code actual age.  
BUT if two people aged 15 yrs or less have same sex and age, combine on one line (code actual age) and sum individual net balances

Points are added as follows:

- breakfast = 3
- midday meal = 4
- evening meal = 7

Each person is allowed to score a maximum of 3 meals a day.

**WORK OUT NET WEEKLY INCOMES FOR EACH PERSON AND WRITE THEM IN GREEN ON THE INCOME PAGE**

- \* include usual members only (not visitors)
- \* convert all incomes to weekly, then convert gross to net (use computer conversion)
- \* total the net weekly incomes and write the total in green near the bottom of the Income page

**ALSO WORK OUT THE GROSS WEEKLY INCOME OF THE HOH/ XHOH (IF IT IS NOT ALREADY GIVEN) AND WRITE THAT IN GREEN ON THE INCOME PAGE**

\* These numbers will be used in coding some of the questions below

**Q153** Enter the number of people listed in the Household Grid at L

**Q154** Enter the number of **LINES** used in the Occasional Visitors Grid above. [CODE 0 IF NONE]

**Q155** Person number of **CROSS-OVER** Head of Household  
[CODE 0 IF NO XHOH]

[IF HOH RECEIVES LESS THAN £160 PER WEEK GROSS, OR IS A STATE PENSIONER, THE XHOH IS PERSON RECEIVING £160 GROSS PER WEEK OR MORE. A WIFE CAN BE A XHOH]

**Q156** Enter person number of Head of Household  
[COPY FROM GRID; THIS IS NOT THE CROSS-OVER HOH]

**Q157** Enter person number of Main Diary Keeper  
[COPY FROM GRID; USUALLY PERSON 1]

**Q158** Sum up and enter **TOTAL NET WEEKLY HOUSEHOLD INCOME (NEAREST £):**

[IF INDIVIDUAL INCOMES ARE MISSING, USE ESTIMATE AT N]  
[DONT KNOW = 9999.]

£

|  |  |  |  |  |
|--|--|--|--|--|
|  |  |  |  |  |
|--|--|--|--|--|

**Q159** Are any individual incomes missing?  
[CHECK INCOME GRID, SECTION M]

- |      |  |   |
|------|--|---|
| No,  | all known .....  | 1 |
| Yes, | one or more missing, total hhd income estimated at N .....     | 2 |
| Yes, | one or more missing, total hhd income NOT estimated at N ..... | 3 |

- |   |                       |   |
|---|-----------------------|---|
| OFFICE USE ONLY - Missing incomes checked & | no income imputed ... | 5 |
|   | one income imputed .. | 6 |

**Q160** Code type of incomes used to calculate household income (at Q158):  
 [WHEN CODING THIS QUESTION (Q160), DO NOT INCLUDE CHILD BENEFIT ]

Each person's income known and is:

|   |   |
|---|---|
| Net (N) and Actual(A) .....                         | 1 |
| Net (N) and Estimated (E) or Card (C) .....         | 2 |
| Gross (G) and Actual (A) .....                      | 3 |
| Gross (G) and Estimated (E) or Card (C) .....       | 4 |
| Some mixture of the above (ie of codes 1 - 4) ..... | 5 |

One or more individual incomes unknown:

|   |   |
|---|---|
| OFFICE USE ONLY - One income imputed .....                          | 6 |
| Total household income estimated at Question N (cards G or H) ..... | 7 |

Don't Know  
 (i.e more than one income not given, one income not given  
 and impossible to impute, No Answer to Income Card G or H) .....

|  |   |
|--|---|
|  | 9 |
|--|---|

**Q161** Code type of household

|  |   |
|--|---|
| Households with one or more 'earners' (SEE (a) BELOW FOR DEFN OF 'EARNER') ..... | 1 |
| Households without an earner .....   | 2 |
| STATE pensioner Households (SEE (b) BELOW) .....                                 | 3 |

**NOTES**

- (a) An earner includes someone unemployed for less than one year ie working codes 1 - 4, but not code 0.
- (b) A state pensioner household is one in which 75% or more of the total household income is from the state pension or from a state benefit paid in place of the state pension.  
**This takes priority over other codes**

**Q162 GROSS weekly income GRADE of Head of Household/cross over HOH**  
 [CHECK FOR X-HOH FIRST]

|  |   |
|--|---|
| i. Households with one or more 'earners' |   |
| £910 or more .....                       | 1 |
| £640 - £909 .....                        | 2 |
| £330 - £639 .....                        | 3 |
| £160 - £329 .....                        | 4 |
| Less than £160 (CHECK FOR X-HOH) .....   | 5 |
| (CHECK - CODE 7 OR 8 BELOW APPLY?)       |   |
| ii. Households without an earner         |   |
| £160 or more .....                       | 6 |
| Less than £160 .....                     | 7 |
| iii. STATE pensioner Households .....    | 8 |

**Q163** Enter GROSS weekly income for HOH (or cross-over HOH):

[NEAREST £]  
 [DONT KNOW = 9999]

£

|  |  |  |  |
|--|--|--|--|
|  |  |  |  |
|--|--|--|--|

**FOLLOW THESE RULES:**

|                  |                                  |
|------------------|----------------------------------|
| GROSS + ACTUAL   | CODE AMOUNT                      |
| GROSS + ESTIMATE | CODE AMOUNT                      |
| GROSS + CARD     | CODE 9999 (= DONT KNOW)          |
| NET + ACTUAL     | CONVERT TO GROSS AND CODE AMOUNT |
| NET + ESTIMATE   | CODE 9999 (= DONT KNOW)          |
| NET + CARD       | CODE 9999 (= DONT KNOW)          |
| DONT KNOW        | CODE 9999                        |

**Q165** Income Support  
 Does the household receive any income from Income Support?  
 [CHECK INCOME GRID, SECTION M]

|           |   |
|-----------|---|
| Yes ..... | 1 |
| No .....  | 2 |

**Q166** Family credit  
 Does the household receive any income from Family Credit?  
 [CHECK INCOME GRID, SECTION M]

|           |   |
|-----------|---|
| Yes ..... | 1 |
| No .....  | 2 |

**Q167** Code job status of HOH (or cross-over HOH):  
 [FROM (d), (e) AND (f) OF OCCUPATION SECTION]

|   |   |
|---|---|
| Employee - Manager (SAME CODE AS (e)) .....                     | 1 |
| Employee - Foreman/supervisor (SAME CODE AS (e)) .....          | 2 |
| Employee - Other (SAME CODE AS (e)) .....                       | 3 |
| Self employed, zero employees .....                             | 4 |
| Self employed, with employees .....                             | 5 |
| Not apply (eg HOH unemployed for a year or more; retired) ..... | 6 |

**Q168** Size of work establishment of HOH (or cross over HOH)  
 [COPY CODE FROM (f) ON GRID ]

|  |   |
|--|---|
| None (SELF EMP ONLY) .....                         | 0 |
| 1 - 24 .....                                       | 1 |
| 25 or more .....                                   | 2 |
| Not Apply (unemployed 1 yr or more/ retired) ..... | 3 |

**Q169** Code '1' if the HOH is unemployed (regardless of how long)

|   |   |
|---|---|
| Unemployed .....                          | 1 |
| All others (eg employed, not apply) ..... | 2 |

Note: Unemployed does not include:  
 Students or Full time education  
 Housewives  
 Retired  
 Sick or on holiday  
 These should be coded '2'

NOTES FOR CODING HOUSEHOLD GRID

OCCUPATION CODES

**Every** household member/ regular visitor must be given an Occupation code (in OCC Box).  
Those working or unemployed less than one year (ie with Working Code 1, 2, 3 or 4) get one of the Standard Occupation Codes.

All others (school children, housewives, pensioners.. ie those with Working Code 0) should be given one of the following non-standard codes:

SOC Code

RETIRED/PENSIONS

- 001 Unoccupied - main source (ie largest amount) of income State Retirement pension (OAP; including widows over 60 with widows' pensions)
- 002 Unoccupied - main source of income (ie largest amount) other state pensions (e.g. Widows under 60, disability pensions including blind pension).
- 003 Retired and unoccupied person where main source (ie largest amount) of income is not from state.

UNEMPLOYED/STUDENTS

- 004 Unemployed, and receiving state benefits as main source of income  
(eg Job Seekers Allowance, Income Support).
- 005 Unemployed, and state benefits NOT main source of income.  
Students. (INCL aged 16 or more at school)

NB. Sick Leave - code their job: Individuals who are off work on sick leave, should be coded according to their job.

NON-EARNERS/ REGULAR VISITORS

- 006 Other non-earners (children 0-15 yrs, 'housewives', etc) including women in receipt of maternity allowances who are not working and not returning to work.  
  
Regular visitors: children (i.e aged 0 - 15)
- 007 Regular visitors: adults (i.e aged 16 or more)
- 008 No information

NET BALANCE

- \* Each person starts with a score of 100 points
- \* Deduct points for meals out (NOT for meals missed or packed lunches)
  - Meals out are shown on 'Meals Out' row of Meals page of Main Diary
- \* Points are as follows:
  - breakfast = 3 points
  - midday meal = 4 points
  - evening meal = 7 points
- \* A 'meal out' is a meal which is 'not from the household food supplies'.
- \* Meals on wheels are meals out.
- \* EXAMPLE: A person has an evening meal in a friend's house. All other meals are at home.  
Net balance = 100 - 7 = 93
- \* EXAMPLE: A person eats lunch in the works canteen 5 days per week. All other meals are at home.  
Net balance = 100 - 20 = 80
- \* EXAMPLE: A person eats 1 meal a day at home, and eats nothing else.  
Net balance = 100 (no deductions for missed meals)

---

## CODING CHECKLIST

---

### Questionnaire

- \* Occupation (everyone gets a a code). See page 15 for non-standard codes.
- \* Net balance (do not deduct points if a meal is missed). See page15 for coding rules.
- \* Household grid
  - check that no-one in h/h except MDK and HOH were away for more than 4 nights
- \* Occasional visitors grid - adults: age = 999
  - all male adults (16+) summed on one line
  - all female adults (16+) summed on one line
- \* Income
  - don't forget the child benefit @ £11.05 & £9.00 until end-March 1998
  - calculate Net Wkly Income
- \* Code pages 11 onwards.

---

### Main Diary

- \* Right page: All members of household accounted for at each meal?
- \* Left page: Code bottom boxes: Meals out and children's (5-14yrs) lunches
- \* Section 1:
  - Code food items
  - Any weights/prices missing? (but no weights for codes 33501 & 33601)
  - Weights and prices plausible?
  - Correct units? eg litres = L (not LT); G not GRM, EGG not EGGS
  - Milk shown as delivered on Qnaire should be on main diary shopping pages
  - Yoghurts, desserts and milk products: convert to liquid milk equivalent
  - Convert nuts to net weight; convert trimmed veg to gross weight.
- \* Section 4:
  - Add school milk (section 2 indicates if received that day)
  - Include **only** eligible gifts. Delete others.
  - Add margin code 1 or 2

---

### Eating Out Diary

- \* Cross out 'home' food (eg packed lunches)
- \* Check that meals out are consistent with main diary.
- \* Write food codes and outlet codes on EO Diaries
- \* Add meal/snack codes where several items covered by one price.

### Transfer Sheet

- \* One transfer sheet per person (unless whole household refused = 1 sheet)
- \* Code response correctly - codes 1 and 2 only if agree with main diary (check esp 2)  
(response code should be written on EO Diary and transfer sheet)
- \* Use meal/snack codes as 'headers'
  - single items with one price do not need a meal/snack code
  - don't bracket several lines with one price

---

**General plea** - *please put a full serial number on diaries which the hhld will post back to the office*

---

# NATIONAL FOOD SURVEY (HOUSEHOLD DIARY)

**IN CONFIDENCE**  
**All the particulars you give in this diary will be treated in STRICT CONFIDENCE.**  
**Please do not put your name and address on it.**

**Please read the notes and look at the examples on pages 2-5 before  
you start completing the diary.**

The interviewer will call again on:-

| DAY | DATE | TIME |
|-----|------|------|
|     |      |      |
|     |      |      |
|     |      |      |

**HOUSEHOLD  
COMPOSITION**

|    | SEX | AGE |
|----|-----|-----|

| OTHER LUNCHES BOUGHT OUTSIDE HOME | <input type="text"/> |

## REMINDER ABOUT RECORDING FOOD, SOFT DRINKS, ALCOHOLIC DRINK AND SWEETS BROUGHT HOME

This is a diary for you to record all food, soft drinks, alcohol, sweets and chocolates that are bought and brought home by you or by other members of your household. Please do not record anything which you buy and eat outside your home.

### The left hand page (opposite)

It will help us very much if you make sure that you put down all the food you buy and bring home on the day you buy it.

**Please enter each item you buy on a separate line. For each item we would like to know, if possible, the exact total weight and the exact total cost as well as a description of what you bought.**

### Packaged and tinned food

For packaged and tinned food or soft drinks the weight should be marked on the tin, bottle or package. Please remember also to record the brand name.

If you buy more than one tin, bottle or package of the same brand, please try to enter the total weight of all the tins/ bottles or packages together in the column headed 'total weight'.

Then enter the total cost of all the tins or bottles or packages of the item in the column headed 'total cost'.

It will also be helpful if you enter the number of tins or packages or bottles in the Description column with the weight per bottle or tin or package. Several examples of how to do this are shown on the Example Page (2 Sunblest sliced white loaves @ 800gms = 1600 gms; 2 tins of Heinz baked beans @ 420 gms = 840gms; 2 packets Krona Double Blend @ 250 gms = 500 gms.)

However, don't worry if you can't work out the total weight. The interviewer will help you when he or she comes back.

### Fresh fruit and vegetables

It is not necessary to put down the numbers of items that are bought unpackaged. Just enter the total weight and the total cost and a description. This holds for meat (chops, sausages, burgers) as well as for all vegetables and fruit. It is not necessary to count the numbers, e.g. we do not need 4 apples, as long as you enter the total weight of apples is, for example 1 $\frac{1}{2}$ lbs

Please remember to record the weight of fresh fruit and vegetables, weighing them at home if necessary.

There is one exception. Please enter the number of eggs you have bought; you do not need to weigh the eggs!

### Takeaway meals

All takeaway meals and snacks, such as fish and chips, Chinese, Indian, pizza etc, should be recorded on the "shopping" page, with the number of portions of each and the total price, if they are brought home to eat. Please record whether the food was delivered to your home or bought from a restaurant, takeaway place, fish and chip shop or other catering place, or bought from a retail shop, such as a bakery or supermarket.

For pizzas brought home please state whether it was a whole pizza - with the size of possible, or pizza slices - with how many slices, and the price.

The right-hand page (opposite)

Please write in a detailed description of each meal served at home, together with the number of people eating it, and also describe how each member of your Household who did **not** eat at home obtained a meal. If they did not eat a meal at that time, this too should be noted. Thus everyone in the Household should be accounted for at each meal, as well as any visitors.

The kind of detail we want is what would be found on a normal menu. We do not need the ingredients of made-up dishes, but the ingredients of salads should be itemised. Quantities are not required. There is no need to distinguish between things eaten by everyone and things eaten by certain members only.

If a takeaway meal was served at home, please give details including the number of portions, for example "fish and chips, (takeaway) 1 portion fish; 1 portion chips". See example on opposite page.

If a member of your household has a packed meal for, say, their mid-day meal, note the sex and age of the individual in the space provided, and write briefly the content of that packed meal. See example opposite.

**THANK YOU FOR YOUR TIME AND TROUBLE.**

## NATIONAL FOOD SURVEY 1997

### Basic data for the processing and analysis of the National Food Survey, NFS.

#### 1 Basic Data

Gathered from two documents -

- 1 family and personal data taken from the NFS schedule (interviewers's questionnaire)
- 2 details of foods, purchased or free, taken from the NFS log-books

The questions are numbered on the schedule. Answers for each household are keyed to disc, followed by the food code details from the log-book and the coding unit which is converted to the storage unit before validation.

The data is validated and any inconsistencies are flagged. After the validation certain additional household and personal details are generated, and a permanent record written to a database on a mainframe computer.

#### 2 Generated data

There are two main types of data stored on the NFS computer system, log-book data derived from the household diaries, and reference data which is used to interpret and validate. The log-book data, keyed or generated, is described in this document and attributed to variables in one of the following data sets -

- Household (HH)
- Household member (PER)
- Visitor (VIS)
- Food item (FD)
- Meals out (MO)

This information is transferred by tape to an SAS database where it is held as permanent SAS data sets.

Useful variables generated using reference data, but not permanently stored are shown in parentheses.

- 3 Appendix A gives the classification by occupations
- 4 Appendix B lists the post-code sectors being surveyed
- 5 Appendix C lists current food codes
- 6 Appendix D is the proposed timetable

**A HOUSEHOLD AND PERSONAL DETAILS TAKEN FROM SCHEDULE**

| Question on schedule | Variable  | Data Set |   |
|----------------------|-----------|----------|---|
|                      |           |          | <u>Serial Number of the log-book completed by the chief diary keeper</u>  |
| A                    | CYCLE     | HH       | C Two digit period code (The survey runs in monthly periods, but data is delivered in 24 batches)   |
| B                    | ( REG     | HH       | A Since 1996, a two digit code denoting the standard statistical region (Northern Ireland =10)  |
|                      | ( LAD     | HH       | B Three digit code denoting the area (local authority districts in GB or district council areas in NI) within the region  |
|                      |           |          | These codes together denote the area (local authority district)   |
| C                    | ( GORMET2 | HH       | Since 1997, a two digit code denoting the Government Office region  |
|                      | ( POSTREF | HH       | Since 1997, a three digit code denoting the ONS postcode reference number   |
|                      |           |          | The GO region and postcode reference number make up the <i>quota number</i>   |
|                      | ( SER     | HH       | D Serial number of household in area (local authority district)   |
|                      |           |          | The 28 addresses selected in each quota are numbered 1-28   |
|                      | ( ADDRESS | HH       | The households selected at each address are numbered 1-3  |
|                      |           |          | <b><u>Quota + Serial No + Household number give a unique serial number for each household</u></b>   |
| D                    | DATIREC   | HH       | <u>Date of first interview</u><br>day, month and year (2 digits each day, month and year)   |
| E1                   | MIC       | HH       | <u>Microwave oven in the household</u><br>Yes = 1<br>If no, coded 2 and stored as a blank   |
| E2                   | FREZ      | HH       | <u>Deep-freezer in the household</u><br>Yes = 1<br>If no, coded 2 and stored as a blank   |
| I                    | EXPRWK    | HH       | <u>Expenditure in previous week</u><br>Amount of money spent on food during preceding week expressed in £'s to 2 decimal places Don't know, etc, coded 999 99 and stored as a missing value |

'A' continued

Notes

(a) A person is anyone who spends at least four nights in the household during the week of the Survey and also has at least one meal a day from the household food supply on at least four days, except that if/she is the head of the household or the chief diarykeeper, he or she is regarded as a person, in all cases

(b) If the age is not given, or for visitors over 18, may be coded as 999

(c) Whether Working This is converted into two variables WWK and PREG (see Section B) The keyed codes are

|                        |                 |
|------------------------|-----------------|
| 0 = Not working        | 5 = if pregnant |
| 1 = Full-time          | 6 = if pregnant |
| 2 = Part-time          | 7 = if pregnant |
| 3 = Unemployed         | 8 = if pregnant |
| 4 = Sick or on Holiday | 9 = if pregnant |

(d) Occupation A three digit NFS code derived from the Standard Occupational Classification (SOC) (Total number of values = 380) Details are given in Appendix A

(e) Net balance A net balance is a mathematical expression of that number of meals consumed from the household supplies A person having all his meals at home during the week (including packed meals provided from household supplies) is said to have a total net balance of 100, when meals are obtained from elsewhere deductions are made from this total to give a "net balance" of meals eaten at home by that person The scale of deductions used for this purpose is as follows

|                             |           |
|-----------------------------|-----------|
|                             | (per day) |
| Breakfast                   | 3         |
| Mid-day meal                | 4         |
| Main Afternoon/Evening Meal | 7         |

If two afternoon/evening meals are taken, the value 7 may be accordingly Visitors are credited a net balance from zero for each meal taken in the household

(f) Visitor A visitor is anyone who does not qualify as a person (see note (a) above) but has at least one meal from the household food supply during the week of the Survey

## Government Office Regions with Metropolitan split (GORMET2)

This regional classification follows the same pattern as the current GHS stratifier, which subdivides Standard Regions. Here the areas shown are subdivisions of the Government Offices for the Regions.

- 1 North East Metropolitan
- 2 North East Non-Met
- 3 North West Metropolitan
- 4 North West Non-Met
- 5 Merseyside
- 6 Yorks and Humberside Metropolitan
- 7 Yorks and Humberside Non-Met
- 8 East Midlands
- 9 West Midlands Metropolitan
- 10 West Midlands Non-Met
- 11 Eastern Outer Metropolitan
- 12 Eastern Other
- 13 London Inner
- 14 London Outer
- 15 South East Outer Metropolitan
- 16 South East Other
- 17 South West
- 18 Glamorgan, Gwent
- 19 Clwyd, Gwynedd, Dyfed, Powys
- 20 Highland, Grampian, Tayside
- 21 Fife, Central, Lothian
- 22 Glasgow
- 23 Strathclyde ex Glasgow
- 24 Borders, Dumfries, Galloway

This classification excludes the Scottish Islands and mainland Scotland North of the Caledonian Canal, in line with SSD's standard practice. Northern Ireland, the Scilly Isles and the Isle of Man are excluded from SSD's copy of the PAF.

Initial coding of Foodstuffs

## Appendix C

| Food Code No | Descriptions                  | Seasonal (S) or convenience (CC, CF, CO) foods <sup>(a)</sup> | Measure (b)            | Definition  |
|--------------|-------------------------------|---|------------------------|---|
|              | <u>MILK and CREAM</u>         |   |                        |   |
| 402          | "UHT" liquid milk, full price |   | liquid                 | Uht whole milk (cartons)  |
| 403          | Sterilised milk, full price   |   | liquid                 | includes some "Long-life", whole milk   |
| 404          | Other liquid milk, full price |   | liquid                 | includes <u>pasteurised and homogenised</u> wholemilk; Channel Isles (gold top); unpasteurized (green top), breakfast milk  |
| 501          | Milk, liquid, welfare         |   | liquid                 |   |
| 601          | Milk, liquid, school          |   | liquid                 |   |
| 901          | Milk, condensed               |   | liquid milk equivalent | includes sweetened and unsweetened evaporated milk; liquid milk concentrate   |
| 1101         | Infant milks                  |   | liquid milk equivalent | Full cream or half cream dried milk (baby milk) or ready to serve liquid milk e.g. "Ostermilk", Cow and Gate" milk, "Milupa", "SMA, soya baby milk                            |
| 1201         | Milk, instant                 |   | liquid milk equivalent | eg, "Marvel", "Milkquick",  |
| 1301         | Yoghurt                       |   | liquid                 | includes fruit yoghurt and flavoured yoghurts eg, Shape, Ski; yoghurt drinks eg, Yop  |
| 1302         | Fromage frais                 |   | liquid                 |   |
| 1502         | Fully skimmed milk            |   | liquid                 | eg, "Trimilk", Unigate Balance", "Lowfat Vita Pints", "Fresh 'n Low", blue/silver hashed (carton or bottle)   |
| 1503         | Semi and others skimmed milk  |   | liquid                 | eg, "Light Gold", "Unigate Long-Life Semi-Skimmed milk", "St Ivel Shape", Vita pints", red/silver strip (carton or bottle), flavoured semi-skimmed milk                       |
| 1603         | Dairy desserts                |   | liquid equivalent      | all chilled dairy based desserts (including those containing cream, milk or skimmed milk solids) eg, mousse, cheesecake, trifle, syllabub, soufflé, cream dessert, fruit fool |
| 1604         | Other milks                   |   | liquid equivalent      | eg, goats milk, soya milk, flavoured whole milk, Complian, Slimfast, sour milk, butter milk, Mars milk drink, Tzatziki, malted milk, coconut milk                             |
| 1701         | Cream                         |   | liquid                 | fresh (or processed or frozen), bottled or canned, (but excluding "substitute", and "imitation" cream - see code 14807), sour cream, creme fraiche                            |

| 15001        | Sugar  |   | weight      | includes icing sugar (but not instant icing - see code 32303)   |
| 15101        | Jams, jellies, fruit curds                         |   | weight      | if home-made only the amount withdrawn from larder stocks during Survey week is coded   |
| 15201        | Marmalade  |   | weight      | includes jelly marmalade  |
| 15301        | Syrup, treacle                                     |   | weight      | includes maple syrup  |
| 15401        | Honey  |   | weight      | includes honey spreads  |
|              | <u>VEGETABLES</u>                                  |   |             |   |
| 15501        | Previous year's crop potatoes purchased Jan to Aug | S   | weight      |   |
| 15502        | Current year's crop potatoes purchased Jan to Aug  | S   | weight      |   |
| 15503        | Current year's crop potatoes purchased Sept to Dec | S   | weight      |   |
| 16201        | Cabbages, fresh                                    |   | weight      | eg, red cabbage, savoy cabbage, spring cabbage, spring greens, brussel tops, kale, curly greens, savoy greens, Chinese leaf   |

NATIONAL FOOD SURVEY 1998

Initial coding of Foodstuffs

| Food Code No | Descriptions                   | Seasonal (S) or convenience (CC, CF, CO) foods <sup>(a)</sup> | Measure (b) | Definition  |
|--------------|--------------------------------|---|-------------|---|
| 16301        | Brussels, sprouts, fresh       | S   | weight      |   |
| 16401        | Cauliflower, fresh             | S   | weight      | includes headed broccoli, eg Calabrese  |
| 16701        | Leafy salads, fresh            | S   | weight      | eg, lettuce, endive, watercress, mustard and cress, chicory, mixed salad vegetables et M & S continental salad, (pre-packed meat, fish, cheese and egg salads are coded 20202)  |
| 16801        | Peas, fresh                    | S   | weight      |   |
| 16901        | Beans, fresh                   | S   | weight      | Runner beans, broad beans, French beans, etc  |
| 17101        | Other fresh green vegetables   | S   | weight      | eg, spinach, spinach beet, sprouting broccoli, turnip tops  |
| 17201        | Carrots, fresh                 | S   | weight      |   |
| 17301        | Turnips and swedes, fresh      | S   | weight      |   |
| 17401        | Other root vegetables, fresh   | S   | weight      | eg, parsnips, beetroot, Kohlrabi, horseradish, artichokes, yams, sweet potatoes, fennel, root-ginger (fresh)  |
| 17501        | Onion, shallots, leeks, fresh  | S   | weight      |   |
| 17601        | Cucumbers, fresh               | S   | weight      |   |
| 17701        | Mushrooms, fresh               | S   | weight      |   |
| 17801        | Tomatoes, fresh                | S   | weight      |   |
| 18301        | Miscellaneous fresh vegetables | S   | weight      | eg, celery, radishes, marrow, courgettes, asparagus, celeriac, sea kale, pimentoes, aubergines, green/red peppers, corn-on-the cob, salsify, fresh & pot herbs, pumpkin, sweetcorn, green bananas, capsicum, chillies, okra, bean sprouts, plaintains, bamboo shoots, stewpack (mixed vegetables) |
| 18401        | Tomatoes, canned or bottled    | CC  | weight      |   |
| 18501        | Peas, canned                   | CC  | weight      | garden, processed etc   |
| 18802        | Baked beans in sauce           | CC  | weight      | includes baked beans in tomato sauce, curry sauce etc   |
| 18803        | Other canned beans and pulses  | CC  | weight      | includes broad beans, butter beans, kidney beans, chick peas, lentils, refried beans, etc (but not runner beans - see code 19101)   |

NATIONAL FOOD SURVEY 1998

Initial coding of Foodstuffs

| Food Code No | Descriptions   | Seasonal (S) or convenience (CC, CF, CO) foods <sup>(a)</sup> | Measure (b) | Definition   |
|--------------|--|---|-------------|--|
| 19101        | Canned vegetables, other than pulses, potatoes or tomatoes | CC  | weight      | eg, carrots, beetroot (but not pickled beetroot - see code 32701) celery, spinach, runner beans, mixed vegetables, canned vegetable salad, sweet corn, mushrooms, asparagus tips (baby foods, canned or bottled, are coded 31501) now <u>excludes</u> kidney beans (see 18803)   |
| 19201        | Dried pulses, other than air-dried                         |   | weight      | eg, lentils, split peas, mixed barley, peas and lentils, (but note "Surprise" peas - see code 19501), masoor, broth mix, chick pea flour   |
| 19501        | Air-dried vegetables                                       | CO  | weight      | eg "Surprise" peas and beans, "Swel" onions and mixed vegetables, red and green peppers, celery, "Farmhouse Brunch"  |
| 19601        | Vegetable juices   | CC  | liquid      | includes tomato juice and puree, carrot juice  |
| 19701        | Chips, excluding frozen                                    | CO  | weight      | includes chips purchased as part of takeaway food (eg with fish, meat pies, pasties, sausages)   |
| 19801        | Instant potato   | CO  | weight      | eg "Smash", "Yeoman"   |
| 19901        | Canned potato  | CO  | weight      | inc. bottled potatoes  |
| 20002        | Crisps & potato snacks                                     | CO  | weight      | e.g. crisps, chipples, mini-chips, crunchie stix   |
| 20003        | Other potato products                                      | CO  | weight      | Quavers, Hula-hoops, Tuba-loops<br>eg, potato scones, pies and cakes, potato salad, filled baked potatoes  |
| 20202        | Other vegetable products                                   | CO  | weight      | eg vegetable salad, sauerkraut, coleslaw, peas meal, peas pudding, cheese and onion pie, lava (layer) bread, pre-packed meat, fish, cheese and egg salads, falafel, dahl, creamed mushrooms, beans and pasta (canned), hummous, onion bhajis, vegetable samosa, pic & mix salad bar, vegetarian sausages, vegetable slices, vegetable stirfry, non-meat pasties, vegetable bake. Now <u>excludes</u> fried or savoury rice (Mixed salad vegetables alone are coded 16701) ( <u>not</u> takeaway) |
| 20203        | Other vegetable products, takeaway                         | CO  | weight      | eg omelettes containing vegetables, vegetable-based side dishes, dahl, vegetable accompaniments (such as onion bhajis, spring rolls, vegetable samosas) to Chinese or Indian takeaway or home delivered meal   |
| 20301        | Frozen peas  | CF  | weight      |  |

NATIONAL FOOD SURVEY 1998

Initial coding of Foodstuffs

| Food Code No | Descriptions  | Seasonal (S) or convenience (CC, CF, CO) foods <sup>(a)</sup> | Measure (b) | Definition   |
|--------------|---|---|-------------|--|
| 20401        | Frozen beans  | CF  | weight      | all varieties  |
| 20501        | Frozen chips and other frozen convenience potato products                   | CF  | weight      | includes puffs, fries, fritters, croquettes, "Cheesies"  |
| 20801        | All frozen vegetables and frozen vegetable products not specified elsewhere | CF  | weight      | eg, asparagus, broccoli, carrots, Brussel sprouts, cauliflower, mixed vegetables, spinach, corn-on-the cob, sweet corn, ratatouille, bubble and squeak, avocado dip, spring rolls, vegeburgers, vegetarian sausages, vegetable stirfry |
|              | <u>FRUIT</u>  |   |             |  |
| 21001        | Oranges, fresh  | S   | weight      |  |
| 21401        | Other citrus fruit, fresh   | S   | weight      | eg, lemons, grapefruit, tangerines, clementines, limes, ortaniques, mandarins, satsumas, kumquat, ugli   |

| 30801        | Coffee, instant (including AFD)                   | CO  | weight      | includes accelerated freeze-dried instant coffee - eg Nestles "Gold Blend", "Mellow Birds" includes "Coffee Break"   |
| 30901        | Coffee, essences                                  | CO  | liquid      |  |
| 31201        | Cocoa, drinking chocolate and instant chocolate   |   | weight      | eg, Cadbury drinking chocolate. Now incl. Instant choc drinks e.g. Options, Highlights, Chocolate Break eg, Cadbury drinking chocolate                               |
| 31301        | Branded food drinks                               |   | weight      | eg, "Bournvita", "Horlicks", "Ovaltine", and own brand & chocolate versions of these. n.b. instant choc drinks now coded 31201.                                      |
|              | <u>MISCELLANEOUS</u>                              |   |             |  |
| 31401        | Mineral water                                     |   | liquid      | eg, 'Evian', Malvern, Perrier etc  |
| 31501        | Baby foods, canned or bottled                     | CC  | weight      | eg, Heinz or Gerber strained foods and junior meals in glass jars or cans (dried infant milk is coded 1101; other infant foods are coded 29101)                      |
| 31801        | Soups, canned                                     | CC  | weight      | includes broths, fresh stock and canned condensed soups incl. cartons ( <u>Note</u> : baby food soups are coded 31501)   |
| 31901        | Soups, dehydrated and powdered                    | CO  | weight      | includes 'cup-soup'  |
| 32001        | Accelerated freeze-dried foods (excluding coffee) |   | weight      | NO LONGER VALID  |
| 32302        | Salad dressings                                   |   | weight      | eg, salad cream, low calorie salad cream, mayonnaise, 1000 Island, oil and vinegar dressing, sandwich spread, garlic spread egg mayonnaise if purchased as a dish    |
| 32303        | Other spreads and dressings                       |   | weight      | eg, chocolate spread, instant icing, rum butter, chocolate syrup   |

NATIONAL FOOD SURVEY 1998

Initial coding of Foodstuffs

| Food Code No | Descriptions                             | Seasonal (S) or convenience (CC, CF, CO) foods <sup>(a)</sup> | Measure (b) | Definition  |
|--------------|--|---|-------------|---|
| 32701        | Pickles and sauces                       |   | weight      | includes tomato, brown, HP, tartare, horseradish, worcester, soy, curry, "Lea + Perrin", chutneys and continental sauces (but not sauce mixes - see 29913), mint sauce, Homepride "Cook-in", apple or cranberry sauce, olive paste (tapenade)   |
| 32801        | Meat and yeast extracts                  |   | weight      | eg, "Oxo", "Marmite", "Bovril", "Knorr", beef stock cubes, chicken stock cubes, vegetable stock cubes, fish stocks cubes  |
| 32901        | Table jellies, squares and crystals      |   | weight      |   |
| 33203        | Ice-cream                                | CO  | liquid      | includes flavoured blocks or tubs soft scoop etc  |
| 33302        | Ice-cream products                       | CO  | liquid      | includes choc-ice cornetto, ice-cream desserts (eg, Viennetta) ice lollies containing ice-cream   |
| 33303        | Other frozen dairy foods and ices        | CO  | liquid      | includes frozen mousse, sorbet, ice lollies   |
| 33401        | Salt                                     |   | weight      | includes sea salt, Lo-salt  |
| 33501        | Artificial sweeteners (expenditure only) |   |             | eg, saccharin, "Hermesetas", "Saxine", "Sweetex", "Canderel"  |
| 33601        | Miscellaneous                            |   |             | eg, bones, vinegar, gravy salts, gravy mixes eg "Bisto", forcemeat, malt, mustard pepper, made-up jellies, flavourings and colourings, gelatine, yeast, herbs, curry powders, spices, instant tea. "Nesquik", milk shake (syrup and powder), baking powder, bicarbonate of soda, herbal tea, stuffing mix, glucose, wine/beer making kits |
| 33901        | Novel protein foods                      |   | weight      | eg, textured vegetable protein, eg, "Soya mince", Cross & Blackwell "Mince Savour", Cadbury Schweppes" Soya Choice, "Quorn, dried egg white, tofu, sports foods (eg Protein 80 plus)  |

|--------------|---|---|-------------|---|
|              | <u>ALCOHOLICS DRINKS</u>                        |   |             |   |
| 38001        | Low alcohol beers, lagers and ciders            |   | liquid      | low alcohol lager, low alcohol bitter, low alcohol cider      |
| 38101        | Beers   |   | liquid      | bitter, pale ale, stout, other beers, beer (unspecified)      |
| 38201        | Lagers and continental beers                    |   | liquid      | lagers  |
| 38301        | Ciders and perry                                |   | liquid      | cider, cider & mixer, perry, Babycham                         |
| 38401        | Wine  |   | liquid      | red wine, white wine, rose wine, wine (unspecified) Champagne |
| 38501        | Wine (not full strength) spirits with additions |   | liquid      | LA wine, wine & mixer, spirits, with mixer                    |
| 38601        | Fortified wines                                 |   | liquid      | sherry, port, other fortified wines                           |
| 38701        | Spirits   |   | liquid      | whisky, white spirits, other spirits                          |
| 38801        | Liqueurs  |   | liquid      | liqueurs, cocktails   |
| 38901        | "Alco-Pops                                      |   | liquid      | Hooch, TwoDogs, Jag   |

- (a) CC = Canned convenience foods  
 CF = Frozen convenience foods  
 CO = Other convenience foods

- (b) Foods should be coded in any of the liquid or weight measures below, according to the coding unit type specified. The 104 character for the unit used is put in the 'Units' column on the diary'. This must not be left blank, except in the case of code 33501 and 33601. The units are then converted by the computer into the storage units.

Codes in Units column  
 (use as capitals shown)

Name

Liquid measures

|      |                 |
|------|-----------------|
| ML   | millilitres     |
| CL   | centilitres     |
| L    | litres          |
| FLOZ | fluid ounces    |
| 10PT | tenths of pints |
| 9PT  | ninths of pints |
| 3PT  | thirds of pints |
| PT   | pints           |
| GALL | gallons         |

Weight measures

|      |               |
|------|---------------|
| MG   | milligrams    |
| G    | grams         |
| 100G | hundred grams |
| KG   | kilograms     |
| OZ   | ounces        |
| LB   | pounds wt     |
| ST   | stones        |

Other

|     |                |
|-----|----------------|
| DOZ | dozens of eggs |
|-----|----------------|

Initial coding of FoodstuffsEGG  
CCeggs  
cubic centimetres

Quantities may now be input with decimal (in the past they had to be input as integers)

INFORMATION RECORDED IN LOG BOOK:- Data Set = Meals Out (MO)

Items of information recorded in log book:-

Variable

Mid-day meals by school children

|       |       |   |
|-------|-------|---|
| SCHML | (i)   | Number of mid-day school meals by school children   |
| PKDL  | (ii)  | Number of packed lunches taken from home, regardless where eaten (including week-ends and holidays) |
| OTHL  | (iii) | Number of other lunches obtained outside the home (including weekends and holidays)                 |

Meals eaten outside the home

|       |       |  |
|-------|-------|--|
| MLWHL | (i)   | Number of meals on wheels  |
| MIDML | (ii)  | Number of mid-day meals obtained outside the home including meals on wheels and mid-day meals by school children |
| MLSO  | (iii) | Total number of meals obtained out by all persons  |

## 1 Introduction

In the revised National Food Survey Statistical Analysis System (NFSSAS) most of the Statements of Results of the National Food Survey (NFS) can be computed with unequal weighting given to selected groups of households. This allows statistics to be produced when there is deliberate over or under representation of groups of households in the Survey, such as occurred in 1996 with the introduction of data from Northern Ireland which was over-sampled relative to Great Britain. It also allows reweighting of results to correct for differential response rates across households.

### 1.1 Demographic Classification Types

Most NFSSAS analyses are conducted for each of a number of Demographic Classification Types (DCTs) in turn. A DCT is a way of classifying households, for example by household composition type or region. When an analysis is requested for a DCT it is performed separately for each Demographic Classification Value (DCV) defined for that DCT, e.g. for each defined region of the country or for each household composition type.

### 1.2 Specification of Weights

In the revised NFSSAS each Statement of Results for a DCT can be performed weighted or unweighted and DCTs also serve as the basis for defining weights. If weights are defined for a DCT (e.g. region) then all households within a DCV defined for that DCT (e.g. in Northern Ireland) will have a common weight during a year. Weights can vary across DCVs and across years.

Weights have been introduced into NFSSAS in a flexible and easy to use way. If no weight is specified for a DCT request for a Statement of Results then an unweighted analysis is conducted. If a weighted analysis is requested but no weights are defined for the nominated weight DCT then weights of 1 are assumed for all households so that an unweighted analysis is conducted. All unspecified weights are assumed to be 1 so that only non-unit weights need to be specified. Weights are constant within statistical year but can vary across statistical years. Weights only need to be defined as they change.

### 1.3 Weighted statistics

When a weighted analysis is requested all totals (sums of quantities of foods, nutrients and expenditures, total net balance, counts of persons, visitors and households) are calculated as weighted totals and other statistics are produced by manipulating these totals. For example average price paid is calculated as the ratio of weighted total expenditure to weighted total quantity.

Index numbers are produced by manipulating totals calculated separately for two groups of households. In a weighted analysis of index numbers weighted totals are used and different weight DCTs can be specified for the two groups of households being compared. Computation of standard errors is fundamentally affected by weighting in a manner described in Section 3.3.

#### 1.4 The Interactive Interface to NFSSAS

In the interactive interface to NFSSAS weight DCTs are (optionally) entered at the same time as conventional analysis DCTs are specified in a new field that appears on the DCT request screen. Typing "?" in this field and then pressing the Enter key shows a list of DCTs which are potentially the basis for a weighted analysis from which a selection can be made. DCT character codes entered manually by the user are checked for validity by the interactive system.

Statements 37 and 40 which have complex data input specifications have a separate button for weight DCT specification on their data input screens. For regular monthly, quarterly and annual analyses weights are specified in new fields in the reference data set STMNTDCT. Values of weights are held in a new reference data set WEIGHT.

#### 1.5 Revisions to NFSSAS

The revisions to NFSSAS have entailed

- 1 amending approximately 120 SAS<sup>1</sup> programs and macros, listed in Section 7,
- 2 creating one new macro (*getwght mac* in the *Maclib* suite),
- 3 amending the SAS catalog that drives the interactive interface to NFS-SAS and associated SCL, AF and FSEDIT programs and help screens held internally in the catalog and amending SAS macros called during operation of the interactive interface,
- 4 creating one new reference data file (WEIGHT),
- 5 amending the essential control data sets IFFMT CTL, IFFILES CTL,
- 6 amending the specification of the control data sets STMTDCVA CTL, SELECT37 CTL, SELECT40 CTL,
- 7 amending the reference data sets STMNTDCT, STMTDCVR

---

<sup>1</sup>SAS, SAS/AF, and SAS/FSP are registered trademarks of SAS Institute Inc

The next section describes the operation and use of the revised *NFSSAS* so far as weighted analyses are concerned. Details concerning computations are described in Section 3, tests conducted to check the correctness of the calculations and the integrity of the revised *NFSSAS* are described in Section 4. Details of changes to reference and control data are set out in Section 5. Materials provided with the revised *NFSSAS* are listed in Section 6, amended program and macro code is listed in Section 7 and amendments to the *SAS* catalog governing the interactive interface are listed in Section 8.

## 2 Operation and use of the revised *NFSSAS*

### 2.1 Availability of weighted analyses

Weighted statistics are available for the following Statements: 2, 3, 4A, 4B, 4C, 5, 6, 7, 8A, 8B, 8C, 9, 10, 11, 12A, 12B, 12C, 13, 20, 21, 25, 26, 29, 35, 36, 37, 38, 40, 41, 43. When a weighted analysis is performed a message of the form "WEIGHTED BY DCT aaaa" is printed in the header of the listing of results where "aaaa" is the character code (up to 8 characters) of the weight DCT. For Statement 10 (Index Numbers) the message can appear for the base or current group or both. When no weighting is requested no message is printed.

If a weight DCT is specified for a Statement for which no weighting is permitted then the request is ignored. In the interactive interface to *NFSSAS* an incorrect request such as this cannot be made.

### 2.2 Defining values of weights

Weights are associated with Demographic Classification Types (DCTs). All households with a common Demographic Classification Value (DCV) carry a common weight. A new reference data file (WEIGHT) holds values of weights for each DCV of each DCT with which weights are associated. These can vary from one statistical year to another. Missing weights are taken to be equal to 1. For each DCV weights are taken to be unchanged until a change is recorded in the file.

An example of a WEIGHT dataset is shown in Table 1. In this example the following points should be noted:

1. There is assumed to be a new DCT, numbered 888 in this example and with character code GBNI, classifying households as Great Britain (DCV=1) or Northern Ireland (DCV=2).

Table 1 Example of Reference Data Set WEIGHT

| DCT  | DCTNO | DCV | STYR | WEIGHT |
|------|-------|-----|------|--------|
| GBNI | 888   | 1   | 1996 | 1 00   |
| GBNI | 888   | 2   | 1996 | 0 80   |
| GBNI | 888   | 2   | 1998 | 0 70   |
| GBNI | 888   | 2   | 1999 | 0 80   |

- 2 There are no weights specified prior to 1996. Weights are assumed to be 1 for all households prior to 1996.
- 3 Only the NI weights change through time. Therefore there is only one entry for GB and in fact that could be omitted since a weight of 1 would be assumed if it was.
- 4 There is no NI weight for 1997. The NI weight for 1997 is taken to be the same as that for 1996.
- 5 If weighting by another DCT were to be desired on some occasions then records for that DCT could be placed in the data set WEIGHT as well.
- 6 There is no need to sort the data set WEIGHT since all such manipulations are done by NFSSAS.
- 7 Only DCTs known to NFSSAS can be specified in the data set WEIGHT and the DCT character and numeric codes must match and be correct. DCV numeric codes must be known to NFSSAS.
- 8 Weights can be specified as integers or in floating point form. Weights do not have to add to one and in practice will often not do so.

### 2.3 Specifying weights to use in analyses

When a Statement of Results is requested, for each selected DCT to be used as the basis for analysis, a DCT to be used as the basis for weighting can be specified. If no such weighting DCT is specified then all households will be taken to carry equal weight. These weighting DCTs are specified in the current reference data set STMNTDCT (for irregular analyses in the control data set STMNTDCT CTL) in two new fields following on the current fields. The interactive interface to NFSSAS gathers weight information via a data entry screen and writes the appropriate entries in a STMNTDCT data set.

An example of a part of the new STMNTDCT data set is shown in Table 2. In this example the following points should be noted

Table 2 Example of Reference Data Set STMNTDCT

| STMNT | FREQ | DCT   | DCTNO | DCTWGT | DCTWGTNO |
|-------|------|-------|-------|--------|----------|
| 4A    | Q    | ALLHH | 1     | GBNI   | 888      |
| 4A    | Q    | GBNI  | 888   |        |          |
| 5     | A    | FREZ  | 132   | GBNI   | 888      |
| 6     | A    | ALLHH | 1     | GBNI   | 888      |

- 1 The specification of the first four columns of the data set is unchanged Column 1 specifies the Statement, column 2 defines the frequency (M = monthly, Q = quarterly, A = annual, I = irregular) Columns 3 and 4 define the DCT by which the analysis is to be conducted giving respectively a character and numeric code
- 2 The two new columns (5 and 6) specify the DCT to use as the basis for weighting giving respectively a character and a numeric code
- 3 The new fields can be left empty as in the second record in the example The revised NFSSAS will take this to mean that all households are to carry unit weight when Statement 4A is produced for each DCV in the DCT "GBNI"
- 4 Only GBNI is requested as a basis for weighting but it would be possible to have some analyses done using a different weighting DCT Note that in any single analysis run (i.e. among common values of the FREQ variable) analysis can be done for a given DCT *either* unweighted *or* weighted but *not* both Further, in any single analysis run an analysis DCT can have at most *one* weight DCT associated with it In separate runs different weighting DCTs can be specified <sup>2</sup>

## 2.4 Transfer and Importation of data

The changes to NFSSAS result in some changes to the data transfer (tape onto workstation) and importation (workstation disk ASCII files to NFSSAS database) procedures

- 1 There is a new reference data set WEIGHT This must be in the NFSSAS data base or the revised NFSSAS may fail even when no weight requests are made The WEIGHT data set need not contain any non-missing values so it is not essential to define weights immediately

---

<sup>2</sup>Simultaneous production of weighted and unweighted results for a DCT can be achieved by defining a "duplicate" DCT in the NFSSAS system having the same DCVs and SAS code associated with it but with different DCT character and numeric code Only the NFSSAS system manager can make such changes

at installation. Because there is a new reference data set there are the following changes

- (a) The entries for reference data and logbook + reference data in the IFFILENO CTL control data set must be incremented by 1
  - (b) The control file IFFILES CTL requires a new record indicating the WEIGHT is a reference data set (R) and is to be sorted by the sort key DCT DCV STYR
  - (c) The control file IFFMT CTL contains 5 new records describing the layout and content of each field in the WEIGHT dataset
- 2 The reference dataset STMNTDCT has two new fields and STMTDCVA and STMTDCVR have four additional fields so additional records are required in the control data set IFFMT CTL describing the column numbers occupied by the new variable in ASCII files read during importation, variable type, etc

The new versions of IFFMT CTL, IFFILES CTL and IFFILENO CTL must be in place before data transfer or importation is attempted with the revised NFSSAS

## 2 5 Changes to the Interactive Interface to NFSSAS

The interactive interface has been changed to allow the user to select weight DCTs, as follows

- 1 All screens that allow entry of a DCT character code or selection of such a code using a selection list have been changed so that there is now an additional entry field where a weight DCT can optionally be provided. A selection list appears if a "?" is entered. User entered codes are checked when definition of the Statement is complete and DCT requests with invalid (i.e. unknown) user entered weight DCT codes are removed. These (FSEDIT) screens appear automatically when Statements 2A, 3 and 4A are requested and appear when a DCT button is pressed in other Statements
- 2 The screens gathering information for Statements 6, 13 and 26 have a new button allowing selection of a series of DCT's. The screen this button leads to allows entry of a weight DCT, as above
- 3 The (AF) screen defining STMTDCVA accessed when inputting information for Statement 10A has been changed. There are now two new data entry fields for base and current group weight DCTs. As above these produce selection lists if a "?" is entered and user entered codes are corrected as they are entered

- 4 The screen gathering information for Statement 37 has been amended There is now a button leading to a screen (AF) in which a weight DCT can be entered A selection list appears if a "?" is entered User entered codes are checked as they are entered
- 5 The screen gathering information for Statement 40 has been amended, exactly as the screen for Statement 37
- 6 The version number of the altered screens that appear at the tops of displayed windows have been incremented to 2 0
- 7 Help screens have been amended to explain how weight DCT information is provided This change affects most of the help screens associated with irregular analyses

### 3 Details of computation

#### 3.1 Method used to calculate weighted statistics

Weighted statistics are produced using the `WEIGHT` facility in the SAS procedures (mainly `PROC SUMMARY`) previously used to compute unweighted statistics In *NFSSAS* a Statement is produced for a sequence of DCTs by a sequence of `SAS DATA` and `PROC` steps generated by the `SAS MACRO` processor, one member for each DCT As each DCT is processed the need for a weighted analysis and the weight DCT to employ are determined If a weighted analysis is required then appropriate `WEIGHT` statements are written in the SAS code, statements to retain weight variables on data sets are written and text strings are produced to place on listings indicating the weighting that has been performed If for analysis by a DCT a weight is not specified then the `SAS MACRO` processor does not write `WEIGHT` and associated statements and a conventional unweighted analysis is done

#### 3.2 Compatibility with previous software

##### 3.2 1 Changed record layout

The new fields in the reference data sets `STMNTDCT` and `STMTDCVR` and the control data sets `STMNTDCT CTL`, `STMTDCVA CTL`, `SELECT73 CTL` and `SELECT40 CTL` are optional and if missing are taken to indicate that all households receive equal weight Consequently analyses set up prior to the introduction of weighting can be run and will produce unweighted results

### 3 2 2 New reference data set

The revised NFSSAS expects to find the reference data set WEIGHT and to find the new fields defined on the reference data sets STMNTDCT and STMTDCVR. These fields can contain missing values but the SAS data sets must contain reference to the new variables. Consequently old NFSSAS programs will not run until an importation has occurred in which reference data sets conforming to the new specification are provided.

### 3.2.3 Changed control files

Two control files that define elements of the NFSSAS database have been amended. IFFILES CTL has a new record defining the WEIGHT data set as reference data and specifying its sort key in NFSSAS. IFFMT CTL carries new records defining the layout of each field in WEIGHT and defining the new fields in STMNTDCT, STMTDCVR and STMTDCVA. These files must be in place in reference data when the importation that introduces the new reference data is conducted.

### 3 2 4 Enhancements

Statements 6, 13 and 26 can now be run for a sequence of DCTs. Prior to revision these Statements could only be run for the "All Households" DCT.

### 3 2 5 Timing and disk usage

Timing is hardly affected by the changes made in this revision. Only at the stage when DCV codes are calculated (usually at the start of a NFSSAS run) is there any significant extra computation, caused by the need to compute DCV codes for selected weight DCTs and for each weight DCT to sort a household data set by DCV in order to attach weights from the WEIGHT dataset. This will only be noticeable when a large number of distinct weight DCTs are selected in a single analysis run.

There is a very small increase in disk usage while programs run due to the need to retain values of weights on certain datasets. When no weighting is requested no such variables are retained so unweighted analyses have the same requirements as in the past.

## 3.3 Statements requiring special consideration - Standard Errors - Statements 20 and 21

The computation of standard errors is fundamentally affected when weighted rather than unweighted totals are used as the basis for calculating per person averages. Let  $T(x)$  denote a *weighted* sum across households where  $x$  is a quantity or expenditure. Let  $w$  denote a weight and  $p$  a count of persons

in a household. Let  $r$  be the value of the ratio of means (e.g. expenditure per person = total expenditure for a group / total number of persons in the group) whose standard error is being computed and let  $N$  be the (unweighted) count of households. The formula employed is

$$SE(r) = \sqrt{\frac{T(w^2)}{T(w)} \frac{1}{T(p)} \left( \frac{N}{N-1} (T(x^2) - 2rT(xp) + r^2T(p^2)) \right)^{1/2}}$$

This formula assumes that variances of quantities, expenditures and household sizes are constant within and across groups of households with common weight values. When all households carry equal weight the leading term involving the weights vanishes and the result is as produced in NFSSAS prior to the introduction of weighting. The term  $\frac{N}{N-1}$  is retained in the formula to ensure that compatibility though it is debatable whether it is needed.

## 4 Tests of the revised NFSSAS

During production of the revised NFSSAS tests have been conducted to ensure that correct weighted and unweighted results are produced and that the response to incorrect requests and incorrect reference and control data is appropriate.

### 4.1 Checks on unweighted calculations and compatibility with previous results

To check that unweighted results are produced correctly the test suite put in place when the system was originally installed has been run. The numerical results obtained matched the target results with a few minor exceptions, as follows:

- 1 Certain results concerning welfare milk in Statements 4B, 4C, 6 and 26 failed to match exactly. This is believed to be due to a change made at MAFF's request after delivery of Phase 1 NFSSAS (non-interactive system). The test area used for the tests performed here has not been updated to reflect this change. These Statements were rerun using the SAS code provided by MAFF at the start of this redevelopment and there was then exact agreement with the results produced with the revised NFSSAS.
- 2 There are minor differences in the spacing, decimal places used for printing and pagination in some of the results for Statements 9, 41 and

43 The numerical results are unaffected so far as can be determined given the different number of decimal places reported in places. These differences are believed to be due to changes made at MAFF since delivery of NFSSAS.

#### **4.2 Checks on weighted results**

To check that weighted results are produced correctly the following procedure was employed. First a weight DCT, e.g. REG, was chosen. A Statement was run for the all households DCT with weighting defined by REG. The Statement was then run unweighted using REG as the analysis DCT. Hand computation using the results of the unweighted analysis by REG were compared with the results of the weighted analysis. This procedure was performed for each Statement for which weighting is allowed, usually employing data for one or more months of 1994.

Tests were performed to check that weighting was done correctly when the analysis period spans a year boundary across which there was a change of weight values. Tests were done to ensure that if a weight DCT is requested for which some or all weights are missing then unit weights are assumed. All these tests were passed.

#### **4.3 Checks on data importation**

Tests were done to ensure that importation fails if the WEIGHT data set has unknown or non-matching DCT numeric or character codes or unknown DCV numeric codes. Similar tests were done to ensure that the new fields and records in STMNTDCT, STMTDCVR, STMTDCVA CTL, SELECT37 CTL and SELECT40 CTL were checked for valid DCT codes. All these tests were passed.

#### **4.4 Checks on the interactive interface**

The interactive interface was tested to ensure that incorrect entries were treated correctly, that selection lists appeared where required, that correct entries were written to the correct files in the correct format and that help screens appeared where required and carrying correct information. All these tests were passed.

## 5 Details of changes to specification of reference and control data sets

### 5.1 Reference data sets

The following reference data sets are affected by the introduction of weighting STMNTDCT, STMTDCVA, STMTDCVR. There is a new reference data set, WEIGHT with five fields as shown in Table 3. Here and later \* refers to any keyboard symbol and "length" is the maximum number of characters for character variables and the number of bytes of storage reserved for numeric variables.

There are two new fields in STMNTDCT as set out in Table 4 and four additional optional fields in STMTDCVA and STMTDCVR as set out in Table 5.

Table 3 Specification of fields in reference data set WEIGHT

| NAME   | TYPE | LENGTH | RANGE       | MISSING | DESCRIPTION        |
|--------|------|--------|-------------|---------|--------------------|
| DCT    | C    | 8      | *           | N       | DCT character code |
| DCTNO  | N    | 3      | 1-999       | N       | DCT numeric code   |
| DCV    | N    | 4      | 1-99999     | N       | DCV numeric code   |
| STYR   | N    | 4      | 1-999       | N       | Statistical year   |
| WEIGHT | N    | 8      | 0-999999999 | N       | Weight             |

Table 4 Specification of additional fields in reference data set STMNTDCT

| NAME     | TYPE | LENGTH | RANGE | MISSING | DESCRIPTION       |
|----------|------|--------|-------|---------|-------------------|
| DCTWGT   | C    | 8      | *     | Y       | Weight DCT code   |
| DCTWGTNO | N    | 3      | 1-999 | Y       | Weight DCT number |

Table 5 Specification of additional fields in reference data sets STMTDCVA and STMTDCVR

| NAME     | TYPE | LENGTH | RANGE | MISSING | DESCRIPTION               |
|----------|------|--------|-------|---------|---------------------------|
| WTDCTB   | C    | 8      | *     | Y       | Weight DCT code base      |
| WTDCTBNO | N    | 3      | 1-999 | Y       | Weight DCT number base    |
| WTDCTC   | C    | 8      | *     | Y       | Weight DCT code current   |
| WTDCTCNO | N    | 3      | 1-999 | Y       | Weight DCT number current |

Table 6 Specification of additional fields in control data sets SELECT37 CTL and SELECT40 CTL

| LINE | NAME     | TYPE | LENGTH | RANGE | MISSING | DESCRIPTION       |
|------|----------|------|--------|-------|---------|-------------------|
| "W"  | DCTWGT   | C    | 8      | *     | Y       | Weight DCT code   |
| "W"  | DCTWGTNO | N    | 3      | 1-999 | Y       | Weight DCT number |

## 5 2 Control data sets

The following control data sets are affected by the introduction of weighting STMTDCT CTL, SELECT37 CTL, and SELECT40 CTL. The control data set STMTDCT CTL is just a user provided version of the reference data set STMTDCT so the specification in the previous section applies. The data sets SELECT37 CTL and SELECT40 CTL now carry optionally a record starting with the single character "W" specifying a weight DCT character and numeric code as specified in Table 6.

## 6 Items provided with the revised NFSSAS

- 1 This document "Weighted analyses in NFSSAS"
- 2 SAS program and macro code
- 3 SAS catalog containing the interactive interface to NFSSAS
- 4 Listings of test results
- 5 Listings of SAS program and macro code
- 6 SAS program and macro documentation (printed copy and on disk)
- 7 Revised control datasets IFFMT CTL and IFFILES CTL
- 8 Examples of revised control and reference datasets STMTDCT, STMTDCVR, STMTDCVA CTL, SELECT37 CTL, SELECT40 CTL
- 9 Revised NFSSAS system design document pages

## **7 List of SAS programs and macros amended**

Tables 7, 8, 9, and 10, list the SAS programs and macro programs amended during this revision, organised by program suite. SAS programs are distinguished as type "s", macro programs as type "m". Version numbers of programs have been incremented by 1 and in each case a brief amendment note with amendment date has been added to the program header.

Program documentation has been edited only where changes are at the level of detail covered in the documentation. For example most macros governing printing have only been changed by adding a single macro variable reference which resolves to a null string (if no weighting is done) or text identifying the weight DCT used in weighting. In such cases program documentation has been left untouched. Where program documentation has been amended version numbers have been brought into line with version numbers on the amended programs.

## **8 Interactive Interface: List of changes to SAS catalog**

Tables 11 and 12 list amended entries in the SAS catalog nfssas.sct01 which drives the interactive interface to NFSSAS. Entries of type "formula" are FSVIEW formulas, entries of type "help" provide information for help screens, entries of type "program" are AF programs, entries of type "screen" are FSEDIT screen descriptions.

Table 7 Amended SAS programs and macros Fqe

| Suite | Program   | Type |
|-------|-----------|------|
| Fqe   | cdwant37  | m    |

Steps in installation of revised NFSSAS

- 1 Identify area to serve as workspace for installation ✓
- 2 Copy code and transport version of catalog file, files of control and reference data and Target results from diskettes/Exabyte tape to MAFF workstation hard disk installation workspace area ✓
- 3 Run shell script to copy code and catalog to copy of Sascode directory created for installation ✓
- 4 Set permissions to read only (444) for these files ✓
- 5 Identify referencedata to be used to test installation ✓
- 6 Copy control files to reference data ✓
- 7 Create (if necessary) and place new reference data sets (STMNTDCT, STMTDCVR, WEIGHT) in area from which importation can occur ✓
- 8 Amend NFN20MTH and TRANSFER CTL files in importation area ✓
- 9 Conduct irregular importation and check results AZ ✓
- 10 Place control datasets SELECT37 CTL, SELECT40 CTL, STMNTDCT CTL, STMTDCVA CTL in Workarea for irregular analyses AZ ✓
- 11 Conduct tests of revised NFSSAS, regular monthly, irregular unweighted (1) and irregular weighted (2)
- 12 Check log files and compare results with targets ✓
- 13 Revise test area
  - (a) Copy SAS dataset versions of IFFMT CTL, and WEIGHT to test area reference data in Test/Tdata/Refdat/Orig ✓
  - (b) Run SAS and amend test area versions of STMNTDCT and STMTDCVR so that they contain appropriate additional fields for weight DCTs ✓
  - (c) Run testrun for the Fh and Pd suites to check correct operation ✓
- 14 Run program to convert transport version of interactive interface to compiled version ✓
- 15 Invoke interactive interface
  - (a) Check that weight DCT fields appear as required in Statements 2A, and 7 Enter DCTs and weight DCTs ✓

Test

data set  
length variables  
let char =  
run

for all new variables

SAS versions of

change file etc in testrun sh

sub menu  
work1/A1

3

/work1/A1/NFSSAS/Code/Shell/testrun sh

- (b) Check that weight DCT fields appear for Statements 37 and 40 and complete requests including weight DCTs
  - (c) Check that help screens appear for a selection of screens
  - (d) Exit *NFSSAS*, requesting submission now
  - (e) Check that correct control files have been written ✓
- 16 Hand over materials, provide instruction on use of revised *NFSSAS*, plan activities during acceptance period ✓

# SAS DATA SET DESCRIPTION

## EXPLANATORY NOTES CONCERNING LAYOUT

- 1 SAS DATA SET NAME      The SAS data set will have this name terminated by " SSD"
- 2 LOCATION                Location of data set in the system    Logbook data for year yyyy are held in  
                              /Nfshome/Data/Logdat/Datyyyy    Reference data and control data are usually held in  
                              /Nfshome/Data/Refdat/Present    This entry provides information in cases not covered by this rule
- 3 SOURCE OF INFORMATION    The origin of the data
- 4 TYPE OF DATA            Can be "Logbook data", "Processed log book data", "Reference Data Scope/layout", "Reference data Interpretive" or "Reference data Validation" or "System Control Data"
- 5 BRIEF DESCRIPTION        A description of the contents and significance of the file
- 6 READ IN SAS PROC (S)     A list of the SAS programmes that access the file    In this list "NFSSAS" indicates the SAS catalog that manages interactive NFSSAS
- 7 SORTED BY                The variables by which the data set can be assumed to be sorted, as specified in the SAS "BY" statement that achieves the sort

## 8 VARIABLES AND THEIR DESCRIPTIONS

---

| NO | NAME | TYPE | LENGTH | RANGE | REFERENCE | VALID MISSING | BRIEF DESCRIPTION |
|----|------|------|--------|-------|-----------|---------------|-------------------|
|----|------|------|--------|-------|-----------|---------------|-------------------|

---

In this table there is a row for each variable in the data set    The following information is contained in the columns of this table

NO                            An identifying number    A number followed by a dash, e g 5- indicates that a sequence of similar fields follows.

NAME                        The name of the variable in the SAS data set

EXPLANATORY NOTES CONCERNING LAYOUT (continuation)

TYPE N = numeric, C = character

LENGTH The number of bytes allocated for storing each value of the variable, as specified on the SAS 'LENGTH' statement. For character variables this is the maximum number of characters allowed in a character string. For numeric variables this is 8 for floating point number. For positive integers this is as follows

| <u>SAS data length</u> | <u>Value</u>               |
|------------------------|----------------------------|
| 3                      | <= 999                     |
| 4                      | >= 1000 and <= 999999      |
| 5                      | >= 1000000 and <= 99999999 |
| 8                      | Otherwise                  |

RANGE This entry shows valid values in files received from the SIR system. For numeric variables, one or more ranges within which the variables' values must lie if they are not missing. The symbol '(' indicates that a lower bound is not to be included in the range and the symbol ')' indicates that the upper bound is not to be included in the range. For example "(0 - 99" indicates that the valid range includes any number larger than zero and no greater than 99. For character variables, "apc" indicating any printable character but not all spaces, or a list of admissible values.

REFERENCE Reserved for future use

VALID MISSING Y = Missing value is valid, N = missing value is not valid

BRIEF DESCRIPTION A description of the meaning of the variable preceded by its name in the system design

SAS DATA SET DESCRIPTION

SAS DATA SET DESCRIPTION

- 1 SAS DATA SET NAME Flyyyyymm where yyyy = year, e g 1989 and mm = month, e g. 03 for March.
2. LOCATION
- 3 SOURCE OF INFORMATION SAS version of the SIR/SAS Interface file FOODITEM, written after range and missing value checks
- 4 TYPE OF DATA Logbook Data
- 5 BRIEF DESCRIPTION Records of acquisitions of food items regarded as falling within the main scope of the Survey These foods are identifiable because the exclusion indicator is set to zero (see the data set MAJFD) for the major foods within which they are contained There is one record for each acquisition
- 6 READ IN SAS PROC (S) FQE7, HL2.
- 7 SORTED BY HHNO
- 8 VARIABLES AND THEIR DESCRIPTIONS

- 1    SAS DATA SET NAME        F2yyyymm where yyyy = year, e g 1989 and mm = month, e g 03 for March
- 2    LOCATION
- 3    SOURCE OF INFORMATION    Aggregation of food acquisition information contained in SAS data set Flyyyyymm
- 4    TYPE OF DATA              Logbook Data
- 5    BRIEF DESCRIPTION        Total acquisitions in the Survey week of food items regarded as falling within the main scope of the Survey. These foods are identifiable because the exclusion indicator is set to zero (see the data set MAJFD) for the major foods within which they are contained. There is one record for each household for each minor food acquired by the household. There is information on numbers of purchases.

# SAS DATA SET DESCRIPTION

1 SAS DATA SET NAME FDCTMJFD  
2 LOCATION  
3 SOURCE OF INFORMATION SAS version of SIR/SAS Interface File FDCTMJFD, written after range and missing value checks  
4 TYPE OF DATA Reference Data Interpretive  
5 BRIEF DESCRIPTION Lists major food codes that are contained in each food category Note that a major food can appear in more than one food category  
6 READ IN SAS PROG (S) FQE1 - FQE7, HL2, HL3, NF1 - NF5, NTD1, NTD2, R23, R25, NFSSAS  
7 SORTED BY FDCAT, MAJFD

SAS DATA SET DESCRIPTION

- 1 SAS DATA SET NAME Glyyyyymm where yyyy = year, e g 1989 and mm = month, e g 03 for March
- 2 LOCATION
- 3 SOURCE OF INFORMATION SAS version of the SIR/SAS Interface File FDITEMOS, written after range and missing value checks
- 4 TYPE OF DATA Logbook Data
- 5 BRIEF DESCRIPTION Records of acquisitions of food items (minor food codes) regarded as falling outside the main scope of the Survey These foods are identifiable because the exclusion indicator is set to one (see the data set MAJFD) for the major foods within which they are contained At the time of system design these food acquisition records are only accessed in the "non-main" parts of Statement 4 and related Statements There is one record for each food acquisition
- 6 READ IN SAS PROG (S) HL2, FQE7
- 7 SORTED BY HHNO
- 8 VARIABLES AND THEIR DESCRIPTIONS

## SAS DATA SET DESCRIPTION

1. SAS DATA SET NAME.        IFFILES
2. LOCATION                    /Nfshome/Workarea
3. SOURCE OF INFORMATION    SAS version of ASCII file containing information concerning file type, sort variables and roots for construction of file names associated with files imported from SIR in the interface
4. TYPE OF DATA              System control data
5. BRIEF DESCRIPTION         See 3 above
6. READ IN SAS PROG (S)      None
7. SORTED BY                  TABLE

### 8. VARIABLES AND THEIR DESCRIPTIONS

SAS DATA SET DESCRIPTION

1 SAS DATA SET NAME LADGRP  
2 LOCATION  
3 SOURCE OF INFORMATION SAS version of SIR/SAS Interface File LADGRP, written after range and missing value checks  
4 TYPE OF DATA Reference Data Interpretive  
5 BRIEF DESCRIPTION File that associates LAD names with DCV numbers for DCTs which define a geographical classification Used for example when locating households in the values of the DCT "sample class"  
6 READ IN SAS PROG (S) None  
7 SORTED BY DCT, DCV, STYRST

8 VARIABLES AND THEIR DESCRIPTIONS

---

| NO | NAME | TYPE | LENGTH | RANGE   | REFERENCE | VALID MISSING | BRIEF DESCRIPTION  |
|----|------|------|--------|---------|-----------|---------------|--|
| 1  | DCT  | C    | 8      | apc     |           | N             | DEMOG CLASS TYPE<br>Character code identifying demographic classification type (containing LADs as DCVs)                       |
| 2  | DCV  | N    | 4      | 0-99999 |           | N             | DEMOG CLASS VALUE<br>Numeric code indicating demographic classification value  |
| 3  | LAD  | N    | 4      | 0-9999  |           | N             | LOCAL AUTHORITY DISTRICT<br>Numeric code identifying local authority district associated with demographic classification value |

---

SAS DATA SET DESCRIPTION

1 SAS DATA SET NAME LADQTR

2 LOCATION

3 SOURCE OF INFORMATION SAS version of SIR/SAS Interface File LADQTR, written after range and missing value checks

4 TYPE OF DATA Reference Data Interpretive

5 BRIEF DESCRIPTION Defines periods during which demographic classification values are valid At time of system design used to identify periods during which local authority districts contributed households to the Survey

6 READ IN SAS PROG (S) DCVCAL, FQE4, HL3, NF5, FQE5, NFSSAS

7 SORTED BY DCT, DCV, STYRST, STQTRST

## SAS DATA SET DESCRIPTION

1 SAS DATA SET NAME       NFNDATE  
2 LOCATION                /Nfshome/Workarea  
3 SOURCE OF INFORMATION:  SAS version of header record on the SIR/SAS interface file NFN20MTH, written after range and missing value checks  
4 TYPE OF DATA           Reference Data   Interpretive  
5 BRIEF DESCRIPTION       Information concerning the period to which SIR/SAS interface files refer  
6 READ IN SAS PROG (S)    IMPREAD  
7 SORTED BY  
8 VARIABLES AND THEIR DESCRIPTIONS

| NO | NAME     | TYPE | LENGTH | RANGE     | REFERENCE | VALID MISSING | BRIEF DESCRIPTION   |

SAS DATA SET DESCRIPTION

1 SAS DATA SET NAME NUTCNTSL

2 LOCATION

3 SOURCE OF INFORMATION SAS version of SIR/SAS Interface File NUTCNTSL, written after range and missing value checks

4 TYPE OF DATA Reference Data Interpretive

5 BRIEF DESCRIPTION Conversion factors to determine nutrient content of minor foods for a year and season Only contains foods for which nutrient content varies seasonally and contains all such foods Note that as time passes a food can cease to have a seasonally varying nutrient content

6 READ IN SAS PROG (S) HL3, NF1 - NF5, NTD1, NTD2, R23

7 SORTED BY MINFD, NUTRIENT, SEAS, STYRST

# SAS DATA SET DESCRIPTION

- 1 SAS DATA SET NAME NUTCNTYR
- 2 LOCATION
- 3 SOURCE OF INFORMATION SAS version of SIR/SAS Interface File NUTCNTYR, written after range and missing value checks
- 4 TYPE OF DATA Reference Data Interpretive
- 5 BRIEF DESCRIPTION Conversion factors to determine nutrient content of minor foods for a year Can contain foods for which nutrient content varies seasonally For such foods the file gives annual "average" nutrient conversion factors These are used in Statement 12 at the time of system design
- 6 READ IN SAS PROC (S) HL3, NF1 - NF5, NTD1, NTD2, R23
- 7 SORTED BY MINFD, NUTRIENT, STYRST
- 8 VARIABLES AND THEIR DESCRIPTIONS

---

| NO | NAME     | TYPE | LENGTH | RANGE             | REFERENCE | VALID MISSING | BRIEF DESCRIPTION  |
|----|----------|------|--------|-------------------|-----------|---------------|--|

- 2   LOCATION
- 3   SOURCE OF INFORMATION    SAS version of SIR/SAS Interface File   NUTSEAS, written after range and missing value checks
- 4   TYPE OF DATA             Reference Data   Interpretive
- 5   BRIEF DESCRIPTION        Indicates whether a minor food has nutrient conversion factors which vary across season   There is at least one entry for each minor food   The presence of seasonal variation in nutrient conversion factors can alter from one year to another
- 6   READ IN SAS PROG (S)      NF1, NF2, NTD1, NTD2, R23
- 7   SORTED BY                 MINFD, STYRST

SAS DATA SET DESCRIPTION

- 1 SAS DATA SET NAME Plyyyyymm where yyyy = year, e g 1989 and mm = month, e g 03 for March
- 2 LOCATION
- 3 SOURCE OF INFORMATION SAS version of SIR/SAS Interface File PERSON, written after range and missing value checks
- 4 TYPE OF DATA Logbook Data
- 5 BRIEF DESCRIPTION Logbook data giving information concerning regular members of a household
- 6 READ IN SAS PROG (S) HL2, HL3, NTD1, NTD2, NF5, PD1
- 7 SORTED BY HHNO

8 VARIABLES AND THEIR DESCRIPTIONS

| NO | NAME  | TYPE | LENGTH | RANGE    | REFERENCE | VALID MISSING | BRIEF DESCRIPTION  |
|----|-------|------|--------|----------|-----------|---------------|--|

## SAS DATA SET DESCRIPTION

1 SAS DATA SET NAME RDI  
2 LOCATION  
3 SOURCE OF INFORMATION SAS version of SIR/SAS Interface File RDI, written after range and missing value checks  
4 TYPE OF DATA Reference Data Interpretive  
5 BRIEF DESCRIPTION Recommended daily intakes and minimum daily intakes for nutrients and nutrient groups  
6 READ IN SAS PROG (S) NTD1, NTD2, NF5, HL3  
7 SORTED BY NUTCDTP, NUTCD, NUTRQTP, NUTRQCD

### 8 VARIABLES AND THEIR DESCRIPTIONS

| NO | NAME    | TYPE | LENGTH | RANGE | REFERENCE | VALID MISSING | BRIEF DESCRIPTION  |
|----|---------|------|--------|-------|-----------|---------------|--|
| 1  | NUTCDTP | C    | 1      | N,G   |           | N             | NUTRIENT CODE TYPE<br>Character code indicating whether record relates to a nutrient (N) or a nutrient group (G) |
| 2  | NUTCD   | N    | 3      | 1-999 |           | N             | NUTRIENT CODE (SINGLE/GROUP)<br>Numeric code identifying nutrient or nutrient group                              |
| 3  | NUTRQTP | C    | 8      | apc   |           | N             | NUTRIENT REQUIREMENT TYPE<br>Character code identifying person classification type                               |

SAS DATA SET DESCRIPTION

1. SAS DATA SET NAME      STMTARG
2. LOCATION
3. SOURCE OF INFORMATION    SAS version of ASCII system control file STMTARG, written after range and missing value checks
4. TYPE OF DATA            System control data
5. BRIEF DESCRIPTION        Provides values for parameters that define the content of Retrievals    This information is additional to that contained in the SAS data set STMTDCT
6. READ IN SAS PROG (S)     FQE2, FQE3, FQES, NT01, NT02, PD1
7. SORTED BY                STMT, FREQ

8. VARIABLES AND THEIR DESCRIPTIONS

| NO | NAME | TYPE | LENGTH | RANGE   | REFERENCE | VALID MISSING | BRIEF DESCRIPTION  |

SAS DATA SET DESCRIPTION

1 SAS DATA SET NAME UNITCONV  
2 LOCATION  
3 SOURCE OF INFORMATION SAS version of SIR/SAS Interface File UNITCONV, written after range and missing checks  
4 TYPE OF DATA Reference Data Interpretive  
5 BRIEF DESCRIPTION Conversion factors for converting from one unit of measurement to another  
6 READ IN SAS PROG (S) FQE1 - FQE7, NF1 - NF5, HL2, HL3  
7 SORTED BY UNABVSRC, UNABVTRG

8 VARIABLES AND THEIR DESCRIPTIONS

SAS DATA SET DESCRIPTION

1 SAS DATA SET NAME Vlyyyyymm where yyyy = year, e g 1989 and mm = month, e g 03 for March

2 LOCATION

3 SOURCE OF INFORMATION SAS version of the SIR/SAS Interface File VISGP, written after range and missing value checks

4 TYPE OF DATA Logbook Data

5 BRIEF DESCRIPTION Logbook data concerning visitor groups

6 READ IN SAS PROG (S) HL1, HL2, HL3, PD1

7 SORTED BY HHNO

8 VARIABLES AND THEIR DESCRIPTIONS

| NO | NAME    | TYPE | LENGTH | RANGE    | REFERENCE | VALID MISSING | BRIEF DESCRIPTION  |
|----|---------|------|--------|----------|-----------|---------------|--|
| 1  | HHNO    | N    | 4      | 1-999999 |           | N             | HOUSEHOLD NUMBER<br>Numeric code uniquely identifying a household                            |
| 2  | VISGPNO | N    | 4      | 1-9999   |           | N             | VISITOR GROUP NUMBER<br>Numeric code uniquely identifying a visitor group within a household |
| 3  | SEX     | N    | 3      | 1,2      |           | N             | SEX<br>Sex of visitors recorded under visitor group, male (1) or female (2)                  |
| 4  | AGE     | N    | 3      | 0-110    |           | Y             | AGE<br>Age of visitor group in years Missing if age is 18 years or more                      |

## 8 VARIABLES AND THEIR DESCRIPTIONS (continuation)

| NO | NAME    | TYPE | LENGTH | RANGE  | REFERENCE | VALID<br>MISSING | BRIEF<br>DESCRIPTION  |
|----|---------|------|--------|--------|-----------|------------------|---|
| 5  | OCC     | N    | 4      | 0-9999 |           | N                | OCCUPATION CODE<br>Numeric code indicating occupation of visitor group This may identify the category "unknown"   |
| 6  | DACT    | N    | 3      | 0-3    |           | N                | DEGREE OF ACTIVITY<br>Numeric code indicating degree of activity as other (0), sedentary (1), moderately active (2), very active (3)  |
| 7  | NBALVIS | N    | 4      | 1-9999 |           | N                | NET BALANCE<br>Net balance of visitor group taking the value 100 if the visitor group takes from the household food supply only, meals equivalent to an entire weeks' meals for one regular person Note this entry can exceed 100 if there is more than one visitor recorded within a visitor group |
