CASELOAD HISTORY

The Research & Statistics Section of the Budget and Statistics Unit is responsible for the Nevada Division of Welfare and Support Services (DWSS) caseload information. Current information may be accessed via the DWSS website at www.dwss.nv.gov.

Caseload History

The following pages show several graphs and summary spreadsheets all of which use DWSS historical caseload information in different permutations to explain the characteristics of the state's welfare assistance caseload.

Caseload Growth

After experiencing double-digit increases yearly through the late 1980s and the early 1990s, Nevada's Aid to Families with Dependent Children (AFDC) caseload peaked in March 1995 at 42,703 recipients, one year after the nation's peak in March 1994.

On January 1, 1997, Nevada implemented the Temporary Assistance for Needy Families (TANF) Program. This program institutes a federal 60-month lifetime time limit on receipt of benefits, increases work participation requirements, and increases mandatory sanctions for failure to participate in work requirements and failure to cooperate with the Child Support Enforcement Program. Additionally, state Welfare reform measures passed during the 1995 legislative session were implemented February 1, 1997. These include a stricter time limitation and sanction penalties.

TANF recipients decreased steadily from the middle 1990s through fiscal year 2000. Caseload decreases during this time can best be understood within the context of Nevada's welfare reform initiatives. The first two initiatives were the New Employees of Nevada (NEON) program begun in July of 1995 and the Applicant Job Search (AJS) program begun in January 1996. These two initiatives mirror national welfare reform in their emphasis on self-sufficiency through employment. Nevada, and most of the nation, enjoyed a healthy economy during this time, which attributed to the continued decline of caseloads nationwide.

Fiscal year 2001 marked the first time in several years that the TANF recipient caseload experienced growth, increasing approximately 9 percent from the prior fiscal year due to a decline in the previously robust economy and Nevada's continued population growth. The tragic events of September 11, 2001 exacerbated this growth trend, contributing to a 59 percent increase in the TANF caseload from fiscal year 2001 to 2002 and an additional 8 percent growth in fiscal year 2003.

Caseload decreases were seen once again in fiscal years 2004, 2005, 2006 and 2007 primarily due to improved conditions in Nevada's economy as well as Welfare staffs' ongoing efforts toward stressing work-first and aggressively transitioning individuals to self-sufficiency. Fiscal Year 2008 had an increase in caseloads due to the effects of the recession that started in December 2007. Since Fiscal Year 2008 all caseloads have

continued to grow at rates not seen in recorded history and have set peak records in Fiscal Year 2010 in all categories with the exception of TANF Cash.

The number of Supplemental Nutrition Assistance Program (SNAP) participating persons exhibited continued growth patterns, increasing approximately 31 percent from fiscal year 2009 to fiscal year 2010. The growth in SNAP recipients during this time is attributed to the growing population in Nevada, combined with a continual unemployment rate climb to 14.2% (June 2010) along with the current sharp decline of Nevada's economy, a nation leading home foreclosure rate and the continued deep recession. Over time, the conversion to the Electronic Benefit Transfer system, in which SNAP is handled via swipe cards similar to ATM cards, eliminated the stigma some recipients may have felt when using the actual coupons, thus encouraging additional enrollment.

A new historical peak of 322,950 participating persons was reached in November 2010 with growth expected to continue in the next fiscal year

The number of Medicaid eligibles increased in both fiscal years 2009 and 2010, growing 9.5 percent in fiscal year 2009, and 18 percent in fiscal year 2010. As with SNAP, growth in the number of Medicaid eligibles continued to grow at a substantial rate.

Some Notes on Spreadsheets in the Following Pages

"Timeline of Important Events Since PRWORA Unveiled"

The "Timeline of Important Events" spreadsheet highlights major events affecting DWSS caseload populations since September 1994.

"DWSS Aid Code Descriptions"

The "Aid Code" spreadsheet provides a list of all types of program eligibility at DWSS, along with the corresponding aid code used in the NOMADS computer system.

"Change Over Time"

The summary spreadsheet "Change Over Time" gives annual average monthly totals and the percent change from year-to-year for DWSS TANF, Medicaid and Food Stamps.

"Medicaid Eligibles"

The "Medicaid Eligibles" spreadsheet shows the annual average monthly total for current eligibles and retro eligibles for each program for fiscal years 1993 - 2010. Retro eligibles are derived from the system one year after the fiscal year ends. The third page of the spreadsheet provides the monthly detail for fiscal year 2010.

"Welfare Eligibles"

"Welfare Eligibles, Tables 1, 2 and 3" are not the official DWSS caseload information but are presented here for estimation purposes only. The information is a snapshot in time as of June 30, 2010. Each table is shown within the context of the official county population estimates by the Nevada State Demographer for March 2010. These tables can be used to establish comparative relationships or to examine a specific county or counties.

Table 1 shows the estimated percent each county has of the statewide caseload per program. Significantly, Clark County, which has about 72 percent of the state's population, accounts for proportionately more than its share of the following programs: TANF, Total Medicaid, and SNAP. Washoe County, which accounts for 15 percent of the population, has proportionately more than its share in Blind, QMB, SLMB, County Match and Child Welfare.

Table 2 puts each county's caseload within the context of its population. For example, 11 percent of Clark County's population receives SNAP and almost 10 percent are Medicaid eligible.

Table 3 shows each county's caseload within the context of total statewide population. For example, almost 10 percent of Nevada's population is Medicaid Eligible, with 7 percent in Clark County, and another 1.4 percent in Washoe County.

Notes 1. Based from MPR Report WL80737A 1 year after the FY ends.

2. Child Welfare is Title XXIX only.

3. Family Preservation Program (FPICOP) transferred to MHDS effective FY06.

** FP recipients are not automatically eligible for Medicaid and have been deducted from the Total Medicaid line (FY02-05).

* FY02 Kinship average is based on 6-month average, since the program started mid-fiscal year. A 12-month average is used for FY02 Total TANF.

** FY06 Hurricane Katrina average is based on a 4-month average. Since the program started mid-fiscal year and will end December 2005. A 12-month average is used for FY06 Total TANF.

Therefore, Total TANF will not equal the sum of each program since Hurricane Katrina is listed at a higher 4-month average.

*Hurricane Katrina Aid Code HK started Sep 05 and ended Dec 31, 2005 (HK TANF) and Feb 2006 (HK Med Only).

Starting October 2007 all TANF Cash Program recipients are not automatically eligible for Medicaid. TANF Cash recipients have a dual TANF/Med aid code.

**FY08 YTD column includes July-September 2007 average TANF grants as they were Medicaid eligible during those months.

Notes: Applications not tracked starting FY02.

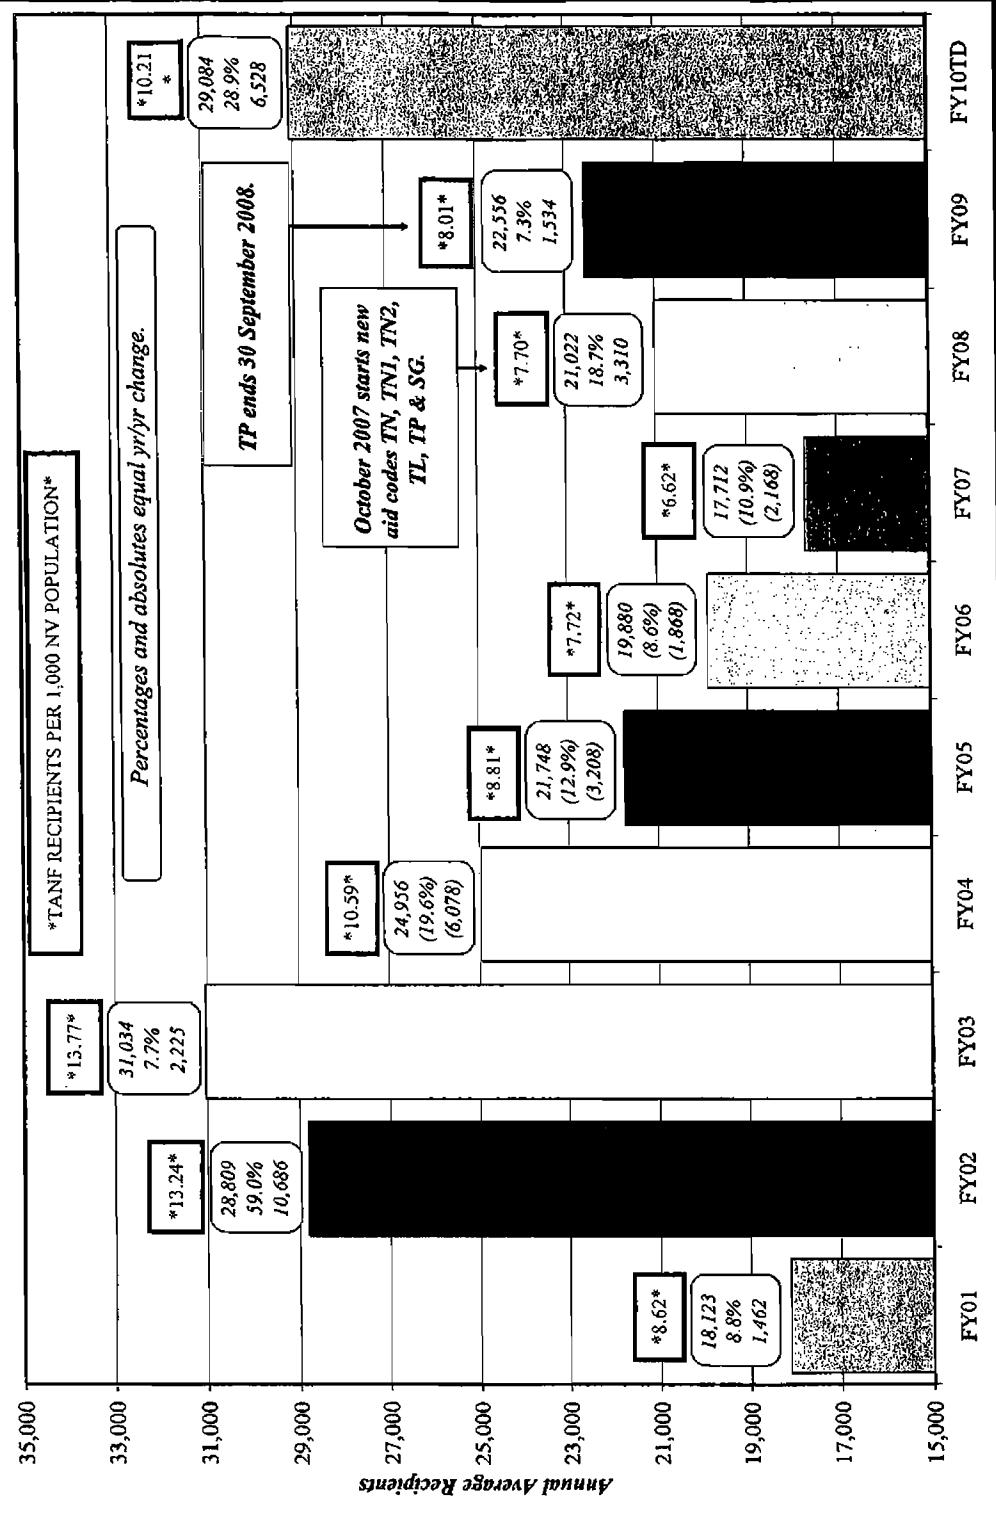

EFT starts FY2003 - DMI and DIR returns no longer used.

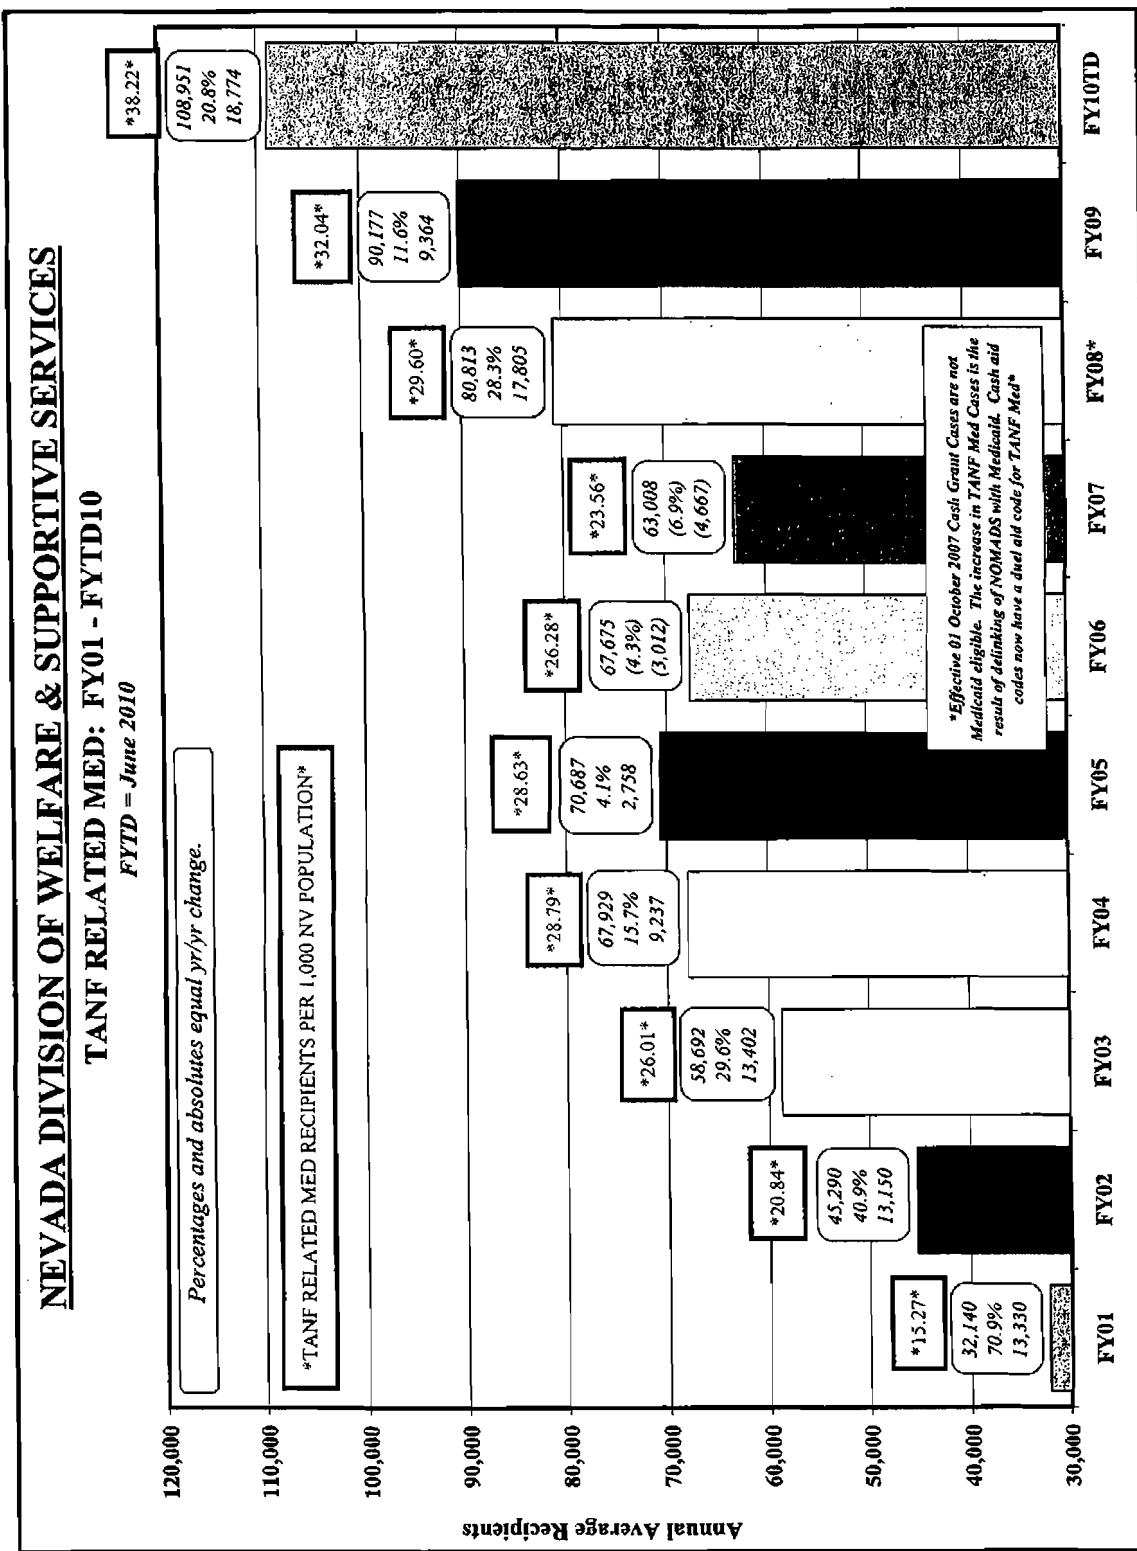

In March 2005, federal mandated changes for definitions of "PA" and "NA" for Participating Cases and Persons implemented. This has affected the average family size for both in FY2003.

In April 2003, the instance cycle was changed from a fiscal month to a calendar month.
