Agenda #	Relate To	Position	Name	Comments
The following individuals submitted comments on agenda item:				
73-A.		Favor	BERT RIVERA	A vaccine passport creates medical "apartheid" creating 2 classes of people. This is not life and liberty in the USA, this is communism. Creating 2 classes of citizens based on any medical injection is illegal according to the Unruh Civil Rights Act. Other treatments are available. Medical choice is an individual choice, not a choice made by government for the individual. Any form of coercion via medical mandates, vaccine passports, QR does or any type of verification to show proof of vaccination violates Health & Safety codes #24171 "right of individuals to determine what is done to their own bodies" and #24172(J) "Be given the opportunity to decide to consent or not to consent to a medical experiment without the intervention of any element of force, fraud, deceit, duress, coercion, or undue influence on the subject's decision". Universally accepted codes of medical ethics including the Nuremberg Code and the Declaration of Helsinki absolutely prohibit any form of coercion to force individuals participate in a medical experiment. Big Pharma states the vaccines are voluntary and for Emergency Use Authorized only. There are many individuals who are already immune from Covid 19 as they have had the virus and recovered. There are not exceptions for these individuals further violating their rights. The manufacturers of the vaccines are exempt from liability and many individuals are getting sick and dying after being injected with the unknown substances in their drug cocktails.
			Brett Staal	I Oppose I strongly Oppose forcing the vaccine on anyone. No matter who someone works for being a private or government employee that person should have the right and ability to choose for themselves what is best for their own health.
			Bridgette Smith	Freedom of choice
			Bruce Lewis	
			Bryan Cranston	
			Bryce Rankin	
			C Mcc	Discrimination no mandate!!!!
			Cara Hackett	
			Carmen Halit	
			carol assa	
			Catherine MacGillivray	
			Catherine Sarah S Fullmer	
			Channing Binder	No government should mandate an experience ram vaccine

Agenda #	Relate To	Position	Name	Comments
73-A.		Favor	Dr Susan Butler-Wu	<p>Good morning, my name is Dr. Susan Butler-Wu & I am the director of the clinical microbiology lab at LAC+USC Medical Center. I'm writing in strong support of the motion ratifying Supervisor Solis' Executive Order requiring County employees to be fully vaccinated by October 1. As a clinical microbiologist, I am responsible for overseeing infectious disease testing at LAC+USC, which includes testing for COVID. As part of my job, I review the results of all COVID tests we perform and I see the amount of virus present in our COVID patients' samples. As you can imagine, I have looked at 1000's and 1000's of these results since the pandemic began. What I can tell you, is that what I'm seeing now with the arrival and now dominance of the delta variant into LA county are clinical samples that are, simply put, absolutely teeming with virus (viral RNA), with orders of magnitude more virus than what I observed during the winter surge. This all fits with what we know about the delta variant, namely that it is more transmissible and more infectious. 90% of our COVID positive case are unvaccinated & this is a pandemic being driven by the unvaccinated members of our community.</p> <p>This needs to be contained and the only real solution to being able to do so is by vaccination. The more we allow this virus to spread, the more likely it is continue to mutate and become potentially even more infectious. We know that the vaccines are safe and effective, we know that they reduce transmission and reduce spread. As an expert in COVID testing, I can tell you that testing is NOT a substitute for vaccination. By requiring vaccinations of all County employees, we are ensuring the health and safety of colleagues in the County, many of whom are in public facing roles. And in doing so providing the confidence to our residents that it's safe to access the much-needed services the County provides. This executive Order requiring County employees to be fully vaccinated by October 1 is right thing to do to protect county employees and residents alike. I am proud to see LA County is ready to do its part, and I urge all of the Board to support this motion.</p>
			El Mahdi Young	
			Elizabeth Green	
			Elizabeth Krausse	Please oppose the anti-American policy
			Elizabeth Perez	
			Elizabeth Soghomoniantz	
			Eric crittenden

73-A.		Favor	Eric Garcia	
			Erica Streelman	
			Geanne Murphy	
			Genevieve M Clavreul	
			George Bozic	My body, my choice. Not FDA approved emergency use only in a free society we would never force individuals anything against their will. Are we still the land of the free where if under 60 you have a 99% percent chance of recovery if you contract SARS-Cov2. Focus on nutrition, exercise, sunlight, vitamins and minerals.
			Gina lee	
			Gita Lalezari	
			Guillermo Rios	
			Guy Grant	
			Haley Mcdonald	
			HaleyRae C Porwoll	
			Hank Fung	I support requiring the vaccine, but only when the FDA officially authorizes a vaccine under regular procedures. Currently all vaccine takers have to sign a disclaimer that there is no FDA approved vaccine. There are a small percentage of people that are reluctant to take the vaccine while it is still under emergency authorization. I am vaccinated for COVID but recognize that all other vaccines, like for polio, measles, flu, shingles, etc. have been fully FDA approved and COVID should be no different.
			Hannah Lerner	
			Helena Patino	
			Hooman Melamed	
			Jackie Cleveland	This is not a vaccine, its experimental Gene therapy and it has not been tested properly!! It will not protect anyone from actually getting covid-19 if exposed. It also has been proven to have too many serious side effects. No one has the right to force a medical treatment on a individual who does not want that "treatment" Its a personal choice, not a government choice!
Jacob M DeMonte-Finn	This will save lives.			
Jade Corona	Oppose

			Alethea Lee	
			Alex Agualr	
			Alex Baldwin	Again, it is a personal choice between you and your doctor
			Alex Bowers	The vaccine has not been fully approved by the FDA. Some people have personal reasons why they aren't getting it. I, for example, am not a "never" person, but do not feel comfortable getting it at this time. I understand the risks with waiting, and accept them fully. I would like to wait at least 18 months from the time the vaccine came out to take it. Furthermore, the variants seem to beat the vaccine anyway. The argument of having "less severe" symptoms doesn't make sense, as 99.98% chance of recovery exists. Please leave the choice to the people.

			Amir Mahmud	<p>These vaccines are only approved under EUA and are not fully FDA approved. They have completely skipped proper animal trials. They have now been unblinded by the manufacturers so we will never know the long term side effects. Based on VAERS data (this is a CDC and FDA run website to track vaccine adverse events) the short term side effects are catastrophic. To mandate these experimental vaccines is a direct violation of the Nuremberg code. To top it off, under the PREP act, no one is held liable when injuries happen as a result of these experimental jabs. Please, think of your kids and grandkids futures. This mandate will be a disaster for our community.</p> <p>Thank you!</p>

Agenda #	Relate To	Position	Name	Comments
73-A.		Oppose	Ang Mac	<p>I oppose all mandatory vaccines for the state, county, and Federal employees! There is an insufficient Pfizer Study based on Pfizer's 53 page report which was posted on the FDA website before the EUA approval which stated that Pfizer would be conducting a 30 month study between the vaccinated and unvaccinated using data from health care workers, VETs, and Military. That study was beginning around December 2020. It has not been finished yet (June 2023) . There's isn't enough data at this time to be conclusive that Pfizer, Moderna or J & J vaccines are effective against CVD 19 or the variants and people I know who are vaccinated are coming down with a Covid 19. More research needs to be done.</p> <p>Science must be accurate and be studied by many different researchers. Many different researchers across the states will need time to do the research with accurate numbers not just the same researchers ie Hopkins...Pushing a vaccine agenda is not Science and especially threatening people's jobs is appalling!</p> <p>Also there must medical and religious exemptions. Children and adults should have the opputunity to research and do what's best for them and not be forced to take mandatory CVD 19 vaccines or booster shots. Parents and adults should have the right to opt out. The Pfizer, Moderna and J and J studies are not completed studies for both adults and children. Even on CSPAN while Moderna was discussing EUA approval, the voting members were concerned with cross cultural contamination. Pushing Mandatory vaccines on people is not the answer. Listen to all viewpoints. After reading the newly changed legislative codes on Jan 2020, I was appalled by difficult steps to even have a waiver approved by a doctor/surgeon. (120440, 120375,12030, 49403, 49426) I'm a very concerned citizen who believes in Science and sound reasoning.</p>

			Anthony M Servera	The C1 vaccine is for "emergency use only" IF there were no cures. Ivermectin and HCQ are proven to have work therefore a vaccine is not necessary. Also, if you look at recent research, a lot of NEW C19 case are from Vaccinated people, not the unvaccinated. Where does the mandates stop?? You mean every single time a new virus comes out, we are forced to get another round of shots??

Forcing a medical experiment upon an individual as a condition to participate in society is illegal, unlawful and immoral and reprehensible and it is a violation of our God-given, Natural, and Common Law rights, as expressed and confirmed in the American Declaration of Independence, and as reflected in the constitution of this state and the constitution of the United States.

1. There is no emergency. There never has been one. The numbers don't support it.

2. This board is perpetuating the notion of an emergency to get money, to impose tyranny and to unlawfully force medical experimentation upon the populace. This so-called vaccine has only gotten an emergency use authorization under the guise of an emergency; otherwise the EUA is null and void (by the way, masks and covid tests are EUAs as well.)

3. Even if this could be called an emergency, no emergency suspends one's rights. Rights cannot be taken from you.

4. This board is perpetrating fraud, and fraud is a felony and a felony carries a prison sentence. You are hereby notified that if you engage in harassment, intimidation and/or retaliation against any member of the public including me, for this statement of truth, such actions will be reported to the FBI.

It doesn't matter whether vaccines work or not.

It doesn't matter whether this is even a vaccine or not.

What matters is that each individual has sovereignty and authority over their own body.

We know what this board is doing.

We know exactly what this board is doing.

Here's the real truth:

These so-called vaccine can never be required as a condition for commerce.

Among many laws that protect individuals from the excess power of government tyrants, here are three...

1. EMERGENCY USE AUTHORIZATION LIMITATIONS on All COVID-19 vaccines , which are under an Emergency Use Authorization (EUA) and cannot be made mandatory.

On its website, the U.S. Food and Drug Administration (FDA) notes the following: "...Recipients must be informed... that they have the option to accept or refuse the vaccine ."

2. Forced vaccination violates the right to privacy, which is protected, secured and guaranteed by the 4th Amendment of the US and the constitution of this state.

3. Forced vaccination is unlawful DISCRIMINATION, discriminating against those who have cell phones or want to participate in AI.

Further, forced vaccination is a violation of:

- CA GOV Code 51, which protects FREE AND EQUAL access to ALL PUBLIC ACCOMMODATIONS.

Public Accommodations are "private businesses engaged in commerce." That means retail stores, banks, restaurants, recreation, transportation – and entity, location or establishment that is open to the public is prohibited from discriminating against the entry of a member of the public.

- CA GOV CODE 12926 (q) protects one's religious liberty and practice, including the ability to NOT PARTICIPATE in practices that violate one's sincerely held religious beliefs

- CA GOV CODE 37100 – prevents any creation, application or enforcement of a law or policy that violates the California Constitution or the Constitution of the United States.

-- CA HSC 24171 and 24172 declare that individuals have the right to determine what is done to their own bodies and to refuse consent to medical experimentation without duress, coercion or influence

WARNING TO ALL GOVERNMENTAL, PUBLIC AND PRIVATE ENTITIES AND PERSONS

Based on the above, and on behalf of all those named and referenced herein:

(a) No business or organization, including any governmental agency has the authority to force me or anyone else to take any and all COVID-19 vaccines, as well as any other vaccine;

(b) No business or organization, including any governmental agency, has the authority to deny me any and all services provided to COVID-19 vaccinated individuals;

(c) Denial of any such services, will be a violation of our God-given, Natural, Common Law, state and federal constitutional and international rights not to be vaccinated in any way or form without our consent, this includes our right not to be tracked based on our vaccination status; and

(d) Any such government agency, business or organization, person's acting as offices of such entities, man and/or woman, violating our right not to

vaccinate against COVID-19 will be liable under tort law and for deprivation of rights under color of law, and will be subject to lawsuits, accordingly.

A tort, in common law jurisdiction and otherwise, is a civil wrong that causes a claimant to suffer loss or harm, resulting in legal liability for the person who commits the tortious act. It can include intentional infliction of emotional distress, negligence, financial losses, injuries, invasion of privacy, and many other things. In summary, no COVID-19 vaccination can be required in order to operate in community and social life, whether it is to go shopping, to work, to visit recreational areas, to visit persons in medical establishments, to travel, to visit restaurants or any business, or to enjoy are God-given right to go about our lives without government or corporate interference.

Failure to respect this, and any intent to violate anyone's right not to receive any vaccine for COVID-19 or any other disease may and will result in legal action against those involved:

(1) In the case of government officials, coercing and forcing any person to take such vaccines is a violation of your Oath of Office, your obligation to protect our constitutional rights, and will strip you of any and all governmental immunity for acting outside of your authority; and

(2) In the case of any business and organization, man or woman, coercing and forcing any person to take such vaccination in order to provide any services or to provide access to your establishment, will be considered a violation of constitutional rights, subjecting your business or entity, and you as a private citizen, a man or a woman, to legal action against all of your assets. Business and organization policies are not above the law.

LEGAL NOTICE: If I am compelled or forced to vaccinate to receive your services and I am injured, it will be considered coercion, duress and against our will, and you will be held liable for any such injury. I note here that we are not refusing vaccination, we are simply declining such vaccination for the reasons noted herein, and as mandated by God, the highest legal authority.

Boris Elkis	
Brad Hartman	<p>Mandating Vaccination to reduce the spread of Covid is misguided. Israel has one of the highest vaccination rates in the world and the Health Ministry has discovered that the infection rate of vaccinated individuals is the same as unvaccinated individuals. The vaccines are not stopping the Delta variant. See the chart on the uploaded document.</p> <p>Forcing an experimental Vaccine on individuals that will not reduce the spread of Covid is unconscionable, considering that increasing individual's immune systems using Vitamin D, C, Zinc and Quercetin, would do more to protect the population. Ivermectin has successfully prevented and treated Covid infections throughout the world including a 93% reduction in cases in India during their recent surge. See FLCCC.net for more details and protocol specifics and Ivermectin study results.</p> <p>Do not require vaccination for County Employees or the general public as it will cause more harm than good. See the CDC VAERS database showing 12,000 deaths due the Vaccine and thousands of heart and circulatory problems in young men.</p>
Brad Hartman	<p>Successful Treatments including Ivermectin exist to prevent and treat Covid without mandating minimally tested vaccines that cause irreparable harm. The CDC VAERS reports between 12,000 and 45,000 deaths and many more side effects including disability. Younger people are 25 times more likely to have a side effect than get seriously ill with Covid. Recovery rate is greater than 99% even without vaccination. Individuals who have already had Covid will be harmed getting vaccinated as it hyper sensitizes their immune system. Do NOT mandate vaccination.</p>
Brad Hartman	<p>This serves as notice that the requirement for any individual to be vaccinated against COVID-19 for employment or participation at a university or other institution violates federal law. All COVID-19 vaccines are merely authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely "may be effective." Federal law states: Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act states: individuals to whom the product is administered are informed— (I) that the Secretary has authorized the emergency use of the product; (II) of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and (III) of the option to accept or refuse administration of the product, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks. EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be</p>

	<p>coerced to participate in a medical experiment. Consent of the individual is "absolutely essential." A federal court held that the U.S. military could not mandate EUA vaccines to soldiers. Doe #1 v. Rumsfeld, 297 F.Supp.2d 119 (2003). The court held: "...the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs." Id. at 135. No court has ever upheld a mandate for an EUA vaccine. The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates. Children's Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse EUA COVID-19 vaccines.</p>

Brianna Canales	
Brianna Essagholian	
brianna gassman	
Brianna Ladapo	<p>The right of each sovereign person to make choices about his/her personal health is unalienable, and can never be mandated. Even if we were in possession of a vaccine that had passed all safety trials, allowing citizens to exercise informed consent--which we do not--it would still be well beyond your right to require any sovereign person to receive it (and this overreach makes even less sense in the context of a) the thousands of individuals who have already recovered from COVID-19 and now have natural immunity, which offers far more protection than anything created in a lab, and b) the thousands of severe adverse events and deaths attributed to the COVID-19 vaccines, as recorded in the CDC's own VAERS database, which is projected to represents only 1-10% of the true number of adverse events).</p> <p>It astonishes me that so many of you who have valiantly fought to protect the health freedoms of women, children, and underrepresented minorities now casually abandon your principles simply because you are fearful and/or feel political pressure. Health and wellness are NOT political issues, and whether you agree or disagree with the health choices of another is irrelevant. You should be ashamed for even considering taking away the constitutional rights of your constituency; it constitutes serious overreach, and will not stand.</p>

We don't know what the long term effects of the vaccine are on the human body. It's my body. It's my choice what I put into it.
Chad Garrett	
chad holt	
Chad Micek	
Chad Moseley	
chad smith	This treatment/mandate for an emergency order vaccine that has not studies on long term effects is inhumane for force on the unwilling population without their consent. failure to provide choice of bodily injections will lead to decrease in workforce, malicious treatment between opposing sides creating Human Resources burdens amongst many other morale related workplace issues. Allow employees to decide for themselves and their families what should be put into their own bodies, not the state/county etc. especially considering that the death rate (which is what ultimately matters) is far less than 1%. Stop the forced vaccinations as it is also obvious and scientifically proven that just as many people with the vaccine fall ill due to covid as those who are without a vaccine. If nothing else, allow to 1-5 years time to pass to study side effects of a quickly generated vaccine before mandating.
CHAD A LAGUNA	
chad s Carmichael	take mandatory out of your vocabulary this is a free country. leave us alone.

Christian A Meadows	<p>I oppose this motion. There is strong evidence from CDC the vaccinated are more likely to fall ill. Additionally, there is no test which identifies covid from any other virus. There is definitely not a "Delta" test. This is from the CDC. Additionally, a 5% drop in employees will trigger a public safety crisis, with firefighters, deputies, nurses and doctors leaving county employment. Overtime and the cost to replace scorned employees will be the financial topic soon, just as the defunding the police concept was a dismal failure.</p> <p>leginfo.ca.gov/faces/codes_displayText.xhtml?lawCode=HSC&division=20.&title=&part=&chapter=1.3.&article=</p> <p>California Laws on Human Experimentation biotech.lsu.edu/research/ca/ca.htm</p> <p>Outbreak of SARS-CoV-2 Infections, Including COVID-19 Vaccine Breakthrough Infections, Associated with Large Public Gatherings — Barnstable County, Massachusetts, July 2021 MMWR cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s_cid=mm7031e2_w</p>

Christina Huntington	I 100% believe in vaccines. I also 100% believe that they cannot and should not be government mandated. As an adult woman who has a history of deadly allergic reactions to vaccines and regular pharmaceuticals that do not adversely affect most other people, I can speak for those of us who this kind of mandate would be detrimental to our health and wellbeing. In a free democratic country, adults should be able to decide what they do with their bodies and if they are able to undergo a medical procedure based on their unique medical history. If someone was allergic to peanuts, the government should not be able to force them to eat peanuts in order to get to work. It is the same exact thing with any pharmaceutical or vaccine. No one should be forced to take it in order to exist in society if their particular body is not a good medical candidate for it. Not all bodies are the same and not all bodies react the same way to outside substances and that needs to be accounted for. People with allergies need to be CONSIDERED and PROTECTED by the government, just as much as anyone else.
Christina Linhardt	Again this is discrimination

David Shaw	My body my choice.
David Smith	
David St Pierre	
David Stepanyan	
David Stringer	
David Susman	People are dying from the vaccine. This is an inconvenient truth, even if it's not one that's being reported broadly. People are getting maimed by the vaccine. They are suffering from myocarditis, pericarditis, severe menstrual disruption, bleeding, neurological disorders, heart attacks, strokes -- and death. J&J, Pfizer, and Moderna have no liability whatsoever for any of this. 100% of the medical costs are absorbed by individuals -- and 100% of the pain and suffering, too. Do not mandate this shot. It's dangerous. And to make someone choose between a potentially dangerous procedure and their livelihood -- is cruelty on every level.

David B Rajewski	STRONGLY OPPOSE.
David C Barbaro	Freedom of choice and informed choice must be maintained.
David D Lopez	If you want to get the vaccine, get the vaccine. If you don't want the vaccine, you shouldn't be forced to.
David E Linke	
David E Washington	In the years following the case, the anti-vaccine movement mobilized and the Anti-Vaccination League of America was founded three years later in Philadelphia under the principle that "health is nature's greatest safeguard against disease and that therefore no State has the right to demand of anyone the impairment of his or her health," and aimed "to abolish oppressive medical laws and counteract the growing tendency to enlarge the scope of state medicine at the expense of the freedom of the individual." The League warned about what it believed to be the dangers of vaccination and allowing the intrusion of government and science into private life,
David F Nunez	I am convinced that encouragement and incentives to get the vaccine is very successful and working and still the best course to continue to pursue.
David G Eastham	
David H Bolger	
David L Baral	No masks and no mandatory vaccines or we are coming for you to vote you out.

Dawn M Da Anderson	You have no right to force an experimental vaccine on people . We have what is known as a Nuremberg code due to such experiments in history . We do not know the long term affects of such a drug . In a free country no one has the right to violate a person's body nor their free will to function in society . It is a violation of their 4th Amendment and is medical tyranny . Enforcing anything like this is clear Fascism . Americans died fighting to end that . Don't be complicit with bringing it to America . Do the right thing for liberty and freedom . You were not elected to make medical decisions for anyone . You are to protect freedom .

Diana Krivonogova	Nuremberg code violation. CDC admits that covid vax is not as useful, does not stop the spread, people still get sick, why then everyone needs to have one? For the virus with survival rate over 98%. Everyone needs to have their own choice and have medical freedom.
Diana Limon	Government cannot force free citizens to take medicine or medical procedures.
Diana Mejia	
Diana Ohanjanian	
Diana Regan	
Diana Regan	It's unconstitutional to require vaccines in order to keep your job. It's a personal choice, not the governments.
Diana Rivera	The request is inherently dangerous as it breaks an individual's federal right to privacy of medical records and ability to choose medical procedures. Individuals of all stripes have stated that there has been no informed consent, which is imperative for any medical prevention especially those that are considered experimental. The vaccine is an experimental, genetic enhancement injection (see CDC) and many are not clear about the long-term effects that could be dangerous on their health. Further, the intervention is based on a virus and other viral strands that have not been appropriately isolated in clinical studies.

Dianna Haq	
Dianna Lira	Oppose medical tyranny. Don't take away medical freedom from our city's employees! They deserve to manage their own health. These vaccines are experimental and rushed. When this happened in the 70's many people were injured and suffered permanent disabilities. Don't do this to our valuable city employees. Everyone's genetics are different, we don't have enough data to determine that these vaccines are safe for everyone. Vaccine injury is a fact, check the VAERS system. We need to take medical freedom seriously and protect it. City officials are not doctors nor do they attend to the care of each and every citizen. I feel this opens up a ton of liability for our city that we don't need.

Dinoah G Maya	It has been proven that the vaccine does not prevent you from getting covid 19 or the variants. We should not be forced to inject something into our bodies that is not effective for preventing this disease.
Dionne Muller	
Dionte Marquard	
Dishan Jayasinha	
Dmitry Vakhlis	
Do Mick	
Doctor Lopez	<p>I am a healthcare professional. I have seen vaccine injured patients in my practice, including patients who lost family members to vaccine injury. Vaccines, like any other medication or treatment, carry potential adverse effects. Therefore, it should be up to each person to weigh the risks and benefits of engaging in ANY and ALL kinds of treatments or medication courses along with their health care provider(s).</p> <p>It is also standard ethical practice in the field of research that experimental subjects should always be given the choice to refuse to participate in the experiment or leave at any time without any coercion or negative repercussions. Since this vaccine is only approved for emergency use, in essence anyone receiving it is an experimental subject and should have the right to accept or refuse. Why would the Local Health Department endorse basic ethical violations that go against the Nuremberg Code?</p> <p>In addition, the CDC recently shared research showing that this vaccine DOES NOT prevent transmission and that vaccinated and unvaccinated individuals have similar viral loads when ill with Covid-19. I understand the goal of mandatory vaccination would be to help protect people in contact with others but, If this vaccine does not prevent transmission, what is the logic in mandating it? Individuals should have the right to decide whether they want to minimize the risk of illness, hospitalization or death since it is something that affects them exclusively. There is no harm to others.</p> <p>There is additionally the issue of social justice. If the local health department passes this law, it will be engaging in discriminatory, segregationist practices.</p>

Elizabeth M Zacharias	Vaccination mandates and all other forms of coercion are unconstitutional, against the Nuremberg code, and a violation of each citizen's God given rights to bodily autonomy and personal sovereignty. It is foolish to think that if we hand these rights over to government authority instead of leaving them in the hands of individuals, that government medical overreach will be limited to the Covid-19 vaccines. Additionally, many of the individuals who choose not to receive the shots have robust, long-term natural immunity due to previous infection and so forcing shots is unscientific. Many others have valid medical contraindications and philosophical or religious objections, making these mandates discriminatory.
Elizabeth z Mcdonnell	Completely unconstitutional

Elvin Apelian	
Elvir Sosa	Absolutely oppose this over reach of the BOS. There is too much evidence showing the dangers of the vaccine and its side effects. The deaths related to this vaccine within the last 6months far exceeds any vaccine used over the last 4 years. I didn't serve this great country in the Marine Corps so this BOS can violate my Constitutional Rights as a human being.
Elvir Sosa	Forcing people to do things against their will is called dictatorship. I didn't serve in the Marine Corps to have my personal freedoms trampled on by a board of individuals. There is too much evidence/ research showing the harms of this Emergency Use vaccine & even if you choose to get it you can still spread it and infect others. Natural immunization is a better option compared to the amount of deaths related to this vaccine.

selfish, uneducated, non researched, not following the "science" for not willing to take this vaccine UNTIL the clinical trials are over at least two years from now??

Finally, after all the vaccines (shots) I listed above, I have never seen a vaccine like this one that discriminates, divides, and judges a society such as this one.

This is one powerful vaccine!

It does all these things that I mentioned and yet, It doesn't do what all the other vaccines (shots) that I mentioned earlier were designed to do (and successfully achieved, I might add) which is....fight off Covid 19 that you have an extremely high chance (99.8%) of recovery from.

I Understand this is not about my health!

If it was, they would not censor professionals and scientists who have contrary opinions.

If it was, they would investigate thoroughly the over 11k deaths reported and over 500k adverse events following the shot

If it was about your health, they would not be censoring world renowned doctors who have developed treatment protocols with great success for Covid positive patients. In fact one was nominated for a Nobel Prize.

If it was about health they would not be sacrificing our young people(no risk) to protect others.

If it was about health, informed consent, individual choice and privacy would be important.

If it was about health, then freedoms would not be suspended for choosing to put off the shot.

If it was about health why are college students taking the shot because they are being coerced with threats of limited freedoms and inconveniences and NOT for better health.

If it was about health they would stop using the faulty PCR to measure infection NOW and not wait until the end of the year.

Please do not pass this ordinance that obviously is not about health. If you pass this you will be on the wrong side of history. You will be responsible for more Angelinos being out of work. More people spending their money outside of LA County. And you will also be responsible for any injury or death that is the result of people taking this vaccine because they have no other choice.

Erik Whitmyre	<p>Do not force your employees to vaccinate whatever their reason as there are many reasons not to. For example -</p> <p>I had Covid and now have natural immunity which has always been better and longer lasting than vaccine induced immunity. In fact least 45% of the unvaccinated have this natural 'gold standard' immunity. Also they may have family members who have been vaccine injured and died from a vaccine - like at least 10,000 of our citizens have who took this poorly tested experimental vaccine - they died for the greater good and the number is probably far higher. Lastly, many of us do not trust the industry that brought us the opioid crisis and who is fully exempt from any 'problems' - deaths, short or long term damage - NO LIABILITY. If their product is so great why not stand behind it. They won't and you want us to trust them? How many of your employees need to die before you see you made a terrible mistake.</p> <p>Also, know that if your employees become debilitated due to blood clots or seizure disorder created by vaccination there will be no help for them as insurance and the medical profession will not recognize them as true victims... this is the reality of those injured by Covid vaccines - GET THE VACCINE BUT IF YOU ARE INJURED... WE DON'T KNOW YOU AND WE DON'T CARE.</p>

Garrett LaRue	
Garrett Lilley	<p>The Sars Covid-2 corona virus (Covid) is spread by aerosol particles which are small enough to go through every mask that is available according to three studies conducted by the NIH and are worthless at stopping the spread of Covid. Much like the common cold, influenza, and respiratory syncytial virus, Covid has animal reservoirs, meaning that it cannot be eliminated by way of vaccine and it will continue to circulate throughout the year regardless of how many people are vaccinated. Vaccination changes nothing about the transmission of the virus. Why are we doing things for Covid that we did not do for the common cold, influenza, and respiratory syncytial virus? Typically, respiratory viral syndromes breakout during the winter months when individuals have low vitamin D levels and their immune systems are lower. If the vaccine is so effective, why are we having a respirator viral breakout during the middle of the summer when respiratory viruses don't do that? It's because of antibody mediated viral enhancement. This is a condition that happens when a vaccine is created and used incorrectly and causes the immune system to fight the virus the wrong way and makes the individual to be more susceptible to infection. This causes the infection to be worse than it would have been with native infection. That is why we are starting to see an outbreak happen in the middle of summer. That is why 75% of the people that were infected in the Barnstable County, Massachusetts outbreak were fully vaccinated. Therefore, there is no reason to treat anyone vaccinated differently than anyone who is unvaccinated from a medical perspective. No vaccine, even more common non-experimental ones, ever stops infection. It merely reduces symptoms for the vaccinated individuals. You can learn more about this topic from Dr. Dan Stock practicing in Indiana.</p> <p>Furthermore, you are creating a system that is illegal, immoral, and unethical. The system clearly discriminates against minority groups who have lower uptake for vaccination, against individuals who cannot take the vaccine for medical or religious reasons, and against those who are morally opposed to the vaccine. The Covid vaccine is currently only under an emergency use authorization and has no long term studies that show long-term side effects. The Nuremberg Code clearly states on experimental treatments, "The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or</p>

	other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision." I emphasize the follow, "without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion." These laws are a form of coercion of the worst kind. You are taking away people's abilities to living and work in a free society. Thank you.
Garrett L Childers	
Garrett M Kelly	
Garry Dolley	
Garth D Wilson	The COVID shots are not even FDA-approved, and have killed tens of thousands of people in the US. It is especially unnecessary and harmful to those who have already had, and recovered from, COVID-19. However, the all-cause mortality rate in the US last year (2020) was lower than every single year up through 1976. So where's the emergency?! There is so much wrong with this agenda!!

Gricelda Munguia	The covid vaccine has risks. There is proof of that in the testing data collected and documented done on the animals before this experimental vaccine was offered as a choice to humans. Therefore, it should remain as a choice for our bodies and not mandated. Our medical choice to take that risk needs to remain. Our body our choice. Stop selling out to politics and being afraid to do what is right and constitutional. The rise of covid cases has increased after the covid vaccine came out.. a lot of the new covid cases are fully vaccinated people. What if someone you love, such as your son or daughter, parent, siblings or spouse be the next to die or have a severe negative reaction to the vaccine, because they felt forced to vaccinate. With if they were not giving a choice and happen to be that 1 out of 100.. How would you feel then mandating this? Let people decide for themselves what they choose to inject in their bodies, not by governmental money hungry, power driving evil people. Do what is right and oppose the mandate!! The economy will be worse in California if you mandate this, a lot of people have already left California. Hold up the state by doing what is right..

are offered under Emergency Use Authorization to push back against such mandates. I believe it is critical that the conversation not center around EUA, but around individual choice and a sensible evaluation of real-world data. Natural immunity has been shown to be superior to the waning efficacy of any product that might be mandated. As such, those who have been ill and recovered are already better-than-vaccinated. Those with certain medical conditions such as autoimmune disorders, severe allergies, and prior injury from an artificially induced immune response (such as autoimmune diabetes) would be placing themselves at tremendous personal risk to achieve population numbers along a single dimension which ignores the kinds of individual variation that require more nuanced choice. Ample research has already shown conclusively that the spike protein itself IS the cause of many of the debilitating and chronic symptoms of this illness. Given that the injections in question introduce that protein into the body (two of the three by instructing the body's own cells to manufacture it!), it is not wonder there are many orders of magnitude more adverse affects being reported from these products than from any previous widely adopted vaccination campaign. Persons, institutions, and other entities making the case that any person should be compelled to accept such a treatment for an illness they either don't currently have or may already be immune to are acting in reprehensible disregard for the public good. Furthermore, many top doctors and scientists (including the inventor of mRNA vaccine technology himself) have explained exactly how a vaccination campaign like this one during a worldwide proliferation an illness is linked directly to the appearance of ever more variants/mutations because of the evolutionary pressure induced by external attempts at control. By this logic, ramping up the pressure to vaccinate is worsening the problem and we need to be campaigning for robust health more broadly. To summarize ... Mandates are reactions that assert a singular response, which may not be appropriate for all individuals and, in fact, are intolerably risky for some. The assumptions and presumptions behind such a mandate fall apart under scrutiny. Fostering good health is the way we truly move beyond an illness's capacity to negatively affect a population. This can never be accomplished by risking further injury to the very biological systems that are already finely tuned to adapt to their environments and evolve broad-spectrum protection when cared for. Healthy bodies and healthy communities end pandemics. Fear, authoritarian control, and risky medical interventions all interfere with the cultivation of true health.

James Gregory

Jason Chamberlin	
Jason Cook	
Jason Dautremont	
Jason Dohring	
Jason Freund	
Jason Funke	
Jason Han	
Jason Hempel	
Jason Knopke	Hell no!
Jason Laine	
Jason Larson	
Jason Lefkowitz	
Jason Leslie	Overstepping your authority. You can not force your employees to take an unapproved by the CDC (emergency approval ONLY). Your actions are on record and you know that your actions could cause the tax payers millions in later settlements should the Board Found to have violated the rights of nearly 100 thousand employees. This is your moment! Are you trying to be a trend setter or think you are cutting edge with your decision. Step back and watch this play out before you endanger the taxpayers money and open Pandora's box with lawsuits that could end your career.
Jason Levi	
Jason Lloyd	My body, My choice. Forced medical treatment is inhumane and hostile to the values and beliefs of the United States.

Jason D Perez	
jason I kihara	
Jason K Samson	
Jason M St Pierre	
Jason M Wick	Where there is risk, there needs to be choice. People should NOT be forced to lose their jobs based on a personal medical decision.
Jason N Land	
Jason R White	Mandating an experimental medication is a strict violation of the Nuremberg Code section 1. It requires test subjects to volunteer. Mandating an experimental medication or taking away the option of employment should the subject declines involves you in the act of coercion. Enough VAERS reports have come in to also invalidate the continued vaccination of any subject based upon the Nuremberg code section 5. Treatments that have for over a year been made available by only a fragment of medical professional have proven to substantially lessened the risk of fatality due to the CV-19 disease. Mandating the experimental medication thus violates the Nuremberg Code section 6. Nuremberg Code attached for reference.

Jenifer V Johnson	
Jenn Abdelmesseh	I have had many vaccines. But this vaccine or gene therapy which you should call it is a new technology. NO LONG TERM STUDIES EXIST. When they tried to create MRNA vaccines in the past they never made it out of animal trials. I do not believe it is right to mandate a new vaccine with no LONG TERM STUDIES. You must uphold personal and religious beliefs for this. Half the population does not feel comfortable taking it yet. This kind of overreaching mandates will have devastating effects.

Jessica Pettyjohn	A person should have a say over what to put in their bodies, regardless of if you think their choice is sane or not
Jessica Ponce	Mandating a trial vaccine that has no proof of effectiveness nor long term ramifications is a violation of our bodies. "My body, my choice" should apply to what I deem necessary and safe to put into my body. If the virus can still be spread as well as contracted with only lessening the symptoms with the vaccine, then the only party that is being affected are those that have chosen not to vaccinate at this time. We should have the freedom to make informed decisions about what is best for our health and immune system. Your public servants showed up throughout this pandemic only to be told come October 1st we no longer have a job if we do not comply with your demands. Pressuring someone to make a medical decision that they are not comfortable with is coercion. We deserve an alternative holistic option to routinely test.

Julie Perkins	Data clearly shows that the COVID vaccines are not effective against preventing the disease. They are only effective in lessening the severity of the symptoms. Therefore, mandating vaccinations will NOT reduce the spread of COVID-19 or its variants. As such, it should be up to the individual to assess their own health risks when deciding whether or not to get vaccinated. In addition, those who have already had the disease should count as being vaccinated as they have acquired the desired immunity naturally.
Julie Rangel	Oppose
Julie Saldivar	
Julie Scarr	We cannot usher in these policies! We must be able to make our own choices free of pressure and coercion!

Justin Bailey	I believe other vaccines in their early stages (similar to the Covid-19 vaccines) were actually pulled from availability due to small numbers of deaths and deemed unsafe. This should be no different and with so much more still to learn on these vaccines, mandatory vaccination is a tremendously irresponsible decision. If the vaccines are effective, it should not matter if vaccinated people are around unvaccinated people. It should be individual choice until all risks and personal safety can be thoroughly known. period.

	goes against my religious beliefs respect that right. You mean to tell me to get a mandatory vaccine, while you guys try to censor people and take our guns away get lost and resign. The vaccine went from safe and effective to now it is the better choice. There have been many who have died form this vaccine. Democrat's and the CDC keep messing around with facts and data. I will not take a shot for something that was created in a lab. California was such a nice place and you guys really had to try to screw it up. But now you have a chance to try and head in the right direction of respecting peoples rights but it does not seem like you are after having this meeting secretly and the fact that we have to talk about this. Lets face it you bastards already have your mind made up. Why are you guys okay with discrimination. I believe people who have not taken the vaccine have been treated worst than slaves have. You all need to wake up and stop playing these dangerous political games.

Kathie A Geyer	
Kathleen Ambrosi	
Kathleen Bishop	Time to face the facts, you miracle-drug zealots! The science is not settled with the experimental mRNA vaccines, as the public has recently seen with the drastic increase of cases after the implementation of mass vaccination. There is no reason to rush into these mandates with our low and stable daily death toll. The monetary gain driving this incentive reeks of corruption especially in the wake of recent breakthrough numbers. It seems the only logic in getting this vaccine to any more of the populace lies in maximizing the profit of this "miracle cure " as much possible before evidence of inefficacy and long term side effects can no longer be squashed by pharma funded censors and "fact checkers" . Moderna and Pfizer are both suddenly admitting that vaccine recipients may need a booster after 6 months. 6 LOUSY MONTHS. Such a claim is indicative to the extent that the manufacturers really understand their own drug. Nothing about these mandates and overall PEER PRESSURE makes any sense except that it exudes from a swamp of corruption heavily laden with health and political "representatives".
Kathleen DeLeon	
Kathleen Harjes	
Kathleen LaManna	
Kathleen Lilly	I strongly oppose any vaccine mandates. This is unconstitutional, disproportionately impacts our minority population, and discriminates against those with medical conditions where people are unable to take the vaccine. Please do not be on the wrong side of history, and vote no. Thank you.

kayla adams	Science has proven regardless of vaccination status, one carries the same if not higher viral load in vaccinated persons as unvaccinated persons, therefore rendering the vaccine requirements to promote safety ineffective and creates a false sense of safety and security for those whom are vaccinated.
Kayla Atkinson	
Kayla Beatty	
kayla berg	
Kayla Burkhead	Vaccines should never be mandatory!
Kayla C	I am opposed to any and all COVID-19 vaccine requirements and mandates. All of the currently available injections have only been available under Emergency Use Authorization and are still in clinical trials until 2022 and 2023. clinicaltrials.gov/ct2/show/NCT04470427 clinicaltrials.gov/ct2/show/NCT04368728 clinicaltrials.gov/ct2/show/NCT04505722 As they are still experimental, it is unethical and not allowed to attempt to mandate or coerce anyone to take them. Please reference page 56 of the meeting notes and summary from the August 2020 meeting of the DHHS and CDC Advisory Committee on Immunization Practices where Dr. Cohn reminds everyone of this: "Dr. Cohn reminds everyone that under an EUA, vaccines are not allowed to be mandatory. Therefore, ...individuals must be consented and cannot be mandated to be vaccinated." cdc.gov/vaccines/acip/meetings/downloads/min-archive/min-2020-08-508.pdf?fbclid=IwAR03xYf0qfZFsZ0CJT-XZx-IW4y6KhFcw5_xnRmgXY26cbpsvDkbo5JxyP4

	<p>To attempt to mandate or coerce anyone into a medical treatment or procedure that is experimental violates the Nuremberg Code, the Declaration of Helsinki, and other international human rights edicts. To violate these codes, edicts, and declarations shall be considered crimes against humanity and all those who aided or perpetuated these crimes shall be held accountable.</p> <p>Further, both Pfizer and Moderna's own SEC filings with the government state that all mRNA products are currently classified and considered gene therapies by the FDA. This has not been properly disclosed to the public, which is an egregious violation as the Pfizer and Moderna cannot even be considered vaccines in that respect; they are gene therapies. You cannot mandate experimental gene therapies. See especially pg. 21 of the Pfizer SEC filing: sec.gov/Archives/edgar/data/1776985/000119312519241112/d635330df1.htm And pgs. 69 and 70 of the Moderna SEC filing: sec.gov/Archives/edgar/data/1682852/000168285220000017/mrna-20200630.htm</p> <p>Further, data is emerging demonstrating that these injections may not prevent transmission or spread of Covid and therefore mandating them may prove futile as vaccinated people can still carry the same viral load as an unvaccinated person (Dr. Fauci) and therefore would pose the same risk of spreading it as an unvaccinated individual.</p> <p>I am vehemently opposed to all Covid-19 vaccine mandates.</p>

That is what the Board of Supervisors will be doing to the employees of Los Angeles County if they Ratify the executive Order to mandate covid 19 vaccinations. Per Osha rules if a employer makes the vaccine mandatory and the employee gets ill it is covered under workers compensation. Can the county afford to loose workers getting sick or worse from getting this experimental vaccine? Under Subsection bbb-3(e)(1)(a)(ii)(III) of section 360 of title 21 of the United States Code, otherwise known as the Emergency Us Authorization section of the Federal Food, Drug, and Cosmetic Act, demands that everyone give employees the " option to accept or REFUSE ADMINISTRATION" of the covid19 vaccine. Los Angeles County is often the leader to positive change in the workplace. Please let the choice to get vaccinated or not be one of them!

- Financial risks to the individual and the County
- Diminishing vaccine efficacy
- Reproductive toxicity (pregnancy) and fertility studies not complete

*** "First, do no harm" -Hippocrates ***

EMPLOYEES ARE UNABLE TO PROVIDE INFORMED CONSENT

Informed consent to medical treatment is fundamental in both ethics and law. Patients have the right to receive information and ask questions about recommended treatments so that they can make well-considered decisions about care.

Every prescription is supplied with an information sheet describing the chemical makeup of the as well as side effects and drug interactions which is NOT the case with Covid-19 vaccinations.

Attached are front and back photos the drug information insert packaged with the vaccines (exhibit 1). This was retrieved from a CVS drug store Moderna package and as is simply printed with "INTENTIONALLY BLANK" on both sides.

I asked several of people who had been vaccinated if they receive any information about side effects. The answer was uniformly NO, other than to go to the ER or call 911 if they didn't feel well.

The FDA Vaccines and Related Biological Products Advisory Committee meeting on 10/22/2020 briefly displayed a draft of possible adverse event outcomes from Covid-19 vaccines (exhibit 2). Among the outcomes are Myocarditis/Pericarditis, Guillain-Barre syndrome, Pregnancy and birth complications, and death among others.

This has draft has not been finalized and provided to the public that I'm aware of. Yet the Vaccine Adverse Event Reporting System (VAERS) database maintained by the department of Health and Human Services details numerous and growing instances of exactly these and other life altering outcomes.

A simple real estate transaction requires dozen of pages of disclosures acknowledged by all parties. Yet your employees are being compelled to accept a medical treatment without receiving full disclosure of the potential short term and completely unknown long term effects.

At minimum this is a violation of the duty of care and I cannot think of any profession where this would be deemed acceptable, morally, ethically, or legally.

FINANCIAL RISKS TO THE INDIVIDUAL AND THE COUNTY

Covid-19 vaccine manufacturers have been granted near absolute immunity from liability under the PREP Act with the single exception of "willful misconduct", a very difficult standard of proof to meet. They have received billions in government funding while completely transferring the risk back onto the public.

This leaves the individual responsible for medical costs resulting from vaccine injury, or at minimum any co-pay and deductible. Anecdotal reports are emerging of vaccine recipients facing thousands of dollars in unreimbursed hospital costs after experiencing an adverse outcome. This is before continuing care costs are added.

Is the county prepared to indemnify individuals harmed after vaccination and to what extent? Will your insurance carrier cover injury from a non-approved experimental treatment if too many claims arise? Will the employee be left to financially fend for himself should injury occur?

By some counts, VAERS had recorded over 6,000 deaths shortly after vaccination. Compelling employees to make what may be a life or death decision to maintain their job status treads into what many would consider coercion.

Does LA County enjoy immunity under the PREP Act or will it be answerable to dozens, perhaps hundreds of claims? Past experience has shown that even claims with little or no merit are settled for vast sums.

DIMINISHING VACCINE EFFICACY

CDC Director Rachael Walensky made this comment August 5, 2021 on CNN: "...what they [vaccines] can't do anymore is prevent transmission." She also cited that CDC had updated its guidance on August 3, 2021 recommending those fully vaccinated now wear masks to limit transmission.

Vaccinated individuals are not only limited to transmission, but also infection. Israel which boasts a vaccination rate of over 90% is now seeing a surge in post vaccination breakthrough cases. A CDC study published July 30, 2021 documented a recent outbreak in Massachusetts in which 74% of the cases had already been vaccinated.

What this is telling us is the vaccine neither prevents transmission to slow the spread nor prevents acquiring infection. There are anecdotal reports of symptom reduction after infection but I have not seen any clinical studies to support this.

Additionally, a third "booster" shot is now being discussed. It is unclear whether this is an additional dose or a new formulation to encompass variant strains and what if any studies have been conducted. It does however indicate this is not a vaccine but rather an ongoing treatment (or Gene Therapy as Moderna characterized it in their SEC filing).

Continued vaccination will do little if anything to slow the spread of Covid-19 is now suspected of being the proximate cause of the delta variant. Further, research at MIT and the NIH is underway to determine if Antibody Dependent Enhancement (ADE) due to vaccination is occurring. ADE may have the effect of compromising the immune system and rendering one MORE susceptible to infection.

REPRODUCTIVE (PREGNANCY) STUDIES NOT COMPLETE

Reproductive toxicity and fertility studies have yet to be published showing vaccination is safe during pregnancy and the long term effects on fertility. What we do have is VAERS data showing hundreds of miscarriages and other adverse outcomes.

More oddly are reports of post menopausal women experiencing something similar to menstruation after injection. Younger women have also reported events outside their normal cycle. There is speculation that the endometrium which lines the uterus is rich in ACE2 receptors targeted by the vaccine spike protein.

It may take years before the effect on fertility is known, something that should be well established before millions of women (and soon girls) receive an injection.

Perhaps this vaccine (or Gene Therapy) will cause no harm. I truly pray so. The horrific birth defects from Thalidomide numbered in the mere thousands from a drug that was not properly vetted, yet we are injecting orders of magnitude more women and girls with completely unknown long term effects.

Please rescind or suspend this order until more we know about what the effects are.

Lewis Francescon	Forced medical treatments is inhuman and hostile to my values and beliefs and to the United States. My body; my choice.
lex pappas	FORCING PEOPLE TO VACCINATE IS MEDICAL TYRANNY. THE VACCINES ARE NOT EFFECTIVE. MASKS HAVE 50 YEARS OF METADATA FROM 12+ STUDIES THAT SHOW THEY DO NOT PROTECT FROM VIRAL SPREAD THE GOVERNMENT DOES NOT CONTROL PEOPLES BODIES. IF THE VACCINE MAKERS AND THE GOVERNMENT HAVE NO LIABILITY OVER THE OUTCOME, THEN PEOPLE SHOULD HAVE THE RIGHT TO REJECT INJECTIONS WHEN THEY ARE RESPONSIBLE FOR THE OUTCOME THE ONLY PURPOSE VACCINE PASSPORTS SERVE TO TRICK THE PUBLIC INTO OPTING-IN TO GOVERNMENT SURVEILLANCE AND THE CONTROL OF THEIR MOVEMENT. IF YOU FORCE GOV EMPLOYEES, THEN I WOULD LIKE TO SEE THE BLOOD TEST RESULTS OF EVERY HIGH RANKING POLITICIAN IN LA COUNTY TO SEE THE VACCINE SPIKE PROTEINS PRESENT IN THEIR BLOOD. OTHERWISE, YOU WONT GET IT. I WOULD ALSO LIKE TO SEE HIGH RANKING LA COUNTY POLITICIANS TRACKED AND TRACED WITH THEIR VACCINE PASSPORTS 247 ONLINE OPEN TO THE PUBLIC

They also are not stopping infection or transmission, according to the news this very week. How can you force a vaccine that doesn't stop infection? A vaccine that doesn't halt transmission? Recent data from Israel, Iceland and the UK show drastically waning efficacy, and experts fear Antibody Dependent Enhancement could be happening. Please, please, don't mandate this shot.

			Mais Agajanyan	
			Maisie L Gutierrez	
			Maja Nuoffer	
			Maja Trochimczyk	It is proven that Covid-19 "vaccine" does not protect from Covid-19 infection, more than 75% of newly hospitalized with Covid-19 have been fully vaccinated (data from various states, Israel among others, and Gibraltar where 100% residents were "vaccinated" and infections rose recently by something like 2500% among the vaccinated. It is a betrayal of the citizens living in L.A. County to put this motion forward, something on a par with apartheid, or other incredibly evil segregation and coercion "rules". There are major lawsuits proceeding now against "emergency authorization" of this genetic experimental injection to modify human DNA - e.g. by Frontline doctors, a group of physicians faithful to their oath, doctors with wisdom and conscience. I hope that LA County BOS shows that they are not corrupt, not bought by big Pharma, and that they will not betray citizens that voted for them, so they will stop this and any other mandatory "vaccines". It is well known that mandatory medical procedures under coercion and duress were

	done in Nazi German concentration camps. My mother's uncle, a Catholic priest, Father Wajszczuk was murdered in one of these experiments in Dachau. None of the Supervisors individually have a right to conduct medical experiments on county employees leading potentially to murder or manslaughter of employees of the county of Los Angeles. VAERS shows that over 12,000 people died; swine flu vaccination was stopped when 46 died. If the Supervisors proceed, they will put themselves on a par with the worst criminals of last century. Please note that the Nuremberg 2 trials have also began in the Hague, with CDC, WHO, FDA, Gates and GAVI as defendants in this global genocidal crime.

first quarter of 2021 are attributed to the COVID-19 Vaccines, and only 1% are attributed to all other vaccines. The number of vaccine deaths reported in the same period constitutes a 12,000% to 25,000% increase in vaccine deaths, year-on-year. The Vaccines appear to be linked to a range of profoundly serious medical complications, among them myocarditis, miscarriage, irregular vaginal bleeding, clotting disorders, strokes, vascular damage and autoimmune disease. Meanwhile, Pfizer, Moderna and Janssen enjoy statutorily conferred immunity from liability for any harm caused by their experimental products.

Additionally there has never has been, a bona fide "public health emergency" due to the SARS-Cov-2 virus or the disease COVID-19. Virtually all of the PCR tests were calibrated to produce false positive results, which has enabled the Federal, state and local governments to publish daily reports containing seriously inflated COVID-19 "case" and "death" counts that grossly exaggerate the public health threat. Even assuming the accuracy of these counts, we now know that COVID-19 has a fatality rate far below that originally anticipated - 0.2% globally, and 0.03% for persons under the age of 70. According to the CDC, 95% of "COVID-19" deaths involve at least four additional co-morbidities. The benefits of the Vaccines when used to diagnose, prevent or treat COVID-19, do not outweigh the risks of these experimental agents. There are multiple adequate, approved and available alternative products that have been used safely and effectively for decades.

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for</p>

	<p>ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment...</p> <p>It is primarily for this basic principle that I firmly oppose any forced mandate to be vaccinated against my will as a human being fully capable of making independent decisions, free from coercion in any form, about what to allow in my body. Voluntary consent to participate in experiments affecting the human body is a must. My moral conviction about voluntary consent is strong and non-negotiable.</p> <p>Thank you for your sincere consideration on this important human rights matter.</p> <p>Sincerely, Maricela L. Castillo</p>

Megan Waugh	<p>1) The vaccine is not FDA-approved.</p> <p>2) Long-term side effects of the COVID-19 vaccine are unknown.</p> <p>3) Short-term side effects of the COVID-19 vaccine are disregarded, dismissed, downplayed, or censored.</p> <p>4) Presently, the effectiveness of the vaccine is unknown in stopping the spread, or contamination of COVID-19. Vaccinated individuals contract and spread COVID-19. It seems that the COVID-19 vaccine decreases the likelihood of death, but the likelihood of death upon contracting COVID-19 is low regardless (2%-3%) so it is hard to determine whether the low death count is the result of the COVID-19 vaccine, or because the virus already has a low death rate.</p> <p>5) COVID-19 and its variants are mild viruses with a death rate of 2%-3%. Presently, it is unknown whether the risks of the vaccine outweigh the risks of COVID-19 and its variants.</p> <p>6) Concerned regarding social unrest and violations of First Amendment rights. Information suggesting that the vaccine may not be effective, may be harmful, or that there may be other alternatives are often censored. This lack of information and subsequent censorship breeds mistrust.</p> <p>7) Concerned that this is driven by financial incentives/motivations for the Pharmaceutical companies producing the COVID-19 vaccine.</p> <p>8) Concerned that there is essentially no liability upon the government or the Pharmaceutical companies for injuries resulting from the COVID-19 vaccine. Currently, there is no liability for the long-term negative side effects from the COVID-19 vaccine for the government, or the Pharmaceutical companies. This is especially concerning in light of the opioid epidemic which has resulted in 841,000 deaths since 1999, and has resulted in billions of dollars in punitive lawsuits against Pharmaceutical companies.</p> <p>9) Concerned that there is no religious exemption.</p> <p>10) Concerned that there is no medical exemption for individuals at-risk.</p> <p>11) Concerned that this will begin to close the door to "my body, my choice", and how the mandated vaccine may be subsequently be used to justify infringement upon rights related to abortion and birth control, or other health care decision rights.</p>

	<p>vaccinations are approved only for Emergency Use Authorization, for investigational use only and are presently still in Phase III clinical trials until 2023 to 2024. Proceeding with this egregious executive order violates the Constitution, Federal and California state laws and the Nuremberg code. Demanding that employees be subjected to experimental vaccines when pharmaceutical companies are exempt from liabilities is unconscionable, meanwhile those very same pharmaceutical companies are making billions of dollars.</p> <p>16 American Jurisprudence 2d, Sec. 177 “The general misconception is that any statute passed by legislators bearing the appearance of law constitutes the law of the land. The U.S. Constitution is the supreme law of the land, and any statute, to be valid, must be in agreement. It is impossible for both the Constitution and a law violating it to be valid; one must prevail. This is succinctly stated as follows: The general rule is that an unconstitutional statute, though having the form and name of law, is in reality no law, but is wholly void, and ineffective for any purpose; since unconstitutionality dates from the time of its enactment, and not merely from the date of the decision so branding it. An unconstitutional law, in legal contemplation, is as inoperative as if it had never been passed.”</p>

	<p>MDs & scientists have said the deaths were already going down before many people had the Covid-19 vaccines. The lower Covid case & death counts are not a result of the vaccines according to many scientists & MDs: the lower counts are from herd immunity already reached by early this year & by effective & better treatments being used on patients more often by Jan of this year which brought deaths down. Also, warmer weather starting in the spring brought deaths down by the time a lot of people took the vaccines.</p> <p>Very credible video testimony including a biologist with a background in immunology and an entrepreneur who has been funding scientists studying repurposed drugs to end the pandemic. They show evidence of the vaxes causing many more than the 7000+ deaths reported by the CDC's chaotic VAERS, lack of safety review & testing of the Covid-1984 vaxes, how the gene therapy in the vaxes dangerously moves throughout the body, masks, positive evidence on low cost treatments, & censorship of credentialed scientists and MDs. They convincingly show how the Covid-1984 vax has probably already caused more death than all previous vaxes in the US in the last 30 years combined. Covid-911 vaxes easily could have killed over 60,000 in the US by now Dr Malone MD & other experts say.</p> <p>Dr. Robert Malone MD, the inventor of mRNA Vaccine technology, works with the FDA on regulation & has talked recently to high level people at the FDA who admit they are frustrated by the lack of organization of the data & associated analysis of injuries & deaths caused by the Covid-1984 vaxes. The deaths & injuries caused by the Covid-1984 vaxes are being suppressed and Dr Malone talks about this.</p> <p>This is 3 hours long but still an incredible must watch.</p>

Michelle R Rodriguez	
michelle s van arendonk	What have we become? Grandparents all over the world sent their children to almost certain death to fight in wars just to preserve the IDEA of freedom. It was worth every risk. Even death. Now a miniscule risk, a 0.04 chance of getting hospitalized, is an excuse to take away those very freedoms we died for. You want to remove body autonomy and segregate the "undesirables" from the population? Anyone with common sense can see how absurd and divisive this is. Your soul is at stake if you come for the kids next...especially since we know that the vaccine is a risk to them, whereas the virus is not. Not one child should be sacrificed so adults can feel safer. If we do that, if we put children at risk so that adults can feel less fearful, then we are not a species worth saving. It goes against nature. So does removing autonomy

Mindy Cole	
Mindy Schinnerer	I am 100% in opposition of a mandatory medical procedure as a requirement for employment. And an employer cannot possibly know what is in the best medical interest of an employee. This is a personal decision between patient and doctor. If an employer requires vaccination and an employee should have medical issues, such as heart issues or seizures or death as a result, is that company or county then going to take financial responsibility for that employees life altering condition or death?
Mindy Sue	No. NO. NO. Do not do this. No more executive orders. There should be robust discussion. The timing is so manipulative. No time for anything, just take the jab. Just no. Enough with the control. People in America make their own health choices. This is wrong.
Minerva Juarez	Mandatory? Gambling with your life.

Nancy Brodersen	The covid-19 vaccine is experimental. The judgment by the war crimes tribunal at Nuremberg laid down standards to which physicians must conform when carrying out experiments on human subjects in a new code that is now accepted worldwide. Namely, the principle of voluntary informed consent protects the right of the individual to control his own body. Mandatory Covid-19 vaccines are unethical and violate the Nuremberg code if required by government.

Nattee Bartlett	
Nava Skolnik	Employer can not force a medical procedure on its employees, we are not a totalitarian country. The health choices of each person is up to him/ her This is classic case of my body my choice. The vaccine is under emergency authorization, and it should be the choice of each person to join the experiment or not. Also, there is many evidence that many people are already hurt from the actual vaccine. People that are generally healthy and are now sick with autoimmune diseases either with heart inflammation, or kidney inflammation or dead.

Noteboom Justin	Mandates for vaccines/masks are not based on science. They also eliminate one's ability to use informed consent for medical procedures. This literally takes away a person's freedom and I am appalled to see this happening in America.

Previously-infected individuals are categorically imaged as "unvaccinated", and therefore subsequently marginalized to be at fault for transmission of COVID, especially the current "Variant of Concern-Delta". Yet published studies have identified that, "[...] results question the need to vaccinate previously-infected individuals." p. 1, see attached document.</p> <p>Additionally, the CDC, when referencing the Delta Variant, which is the most monitored variant in the United States at this moment, has ceased to state to the public that the available injection/vaccines will prevent infection within individuals, and are increasing including statements such as, "Fully vaccinated people with breakthrough infections from this variant appear to be infectious for a shorter period." [1]</p> <p>Historically, vaccination policies are constructed in order to inhibit the acquisition and the transmission of a disease. The current vaccinations are now associated with increased identifications of breakthrough infections in those who have received the injection(s), as well as identifications of periods during which vaccinated individuals who are also infected are transmitting the virus to those in their surrounding environments (regardless of vaccination status). *None* of the discussed and proposed policies to date require *all* employees, regardless of vaccination status, to undergo weekly testing. As a</p>

Raquel Mirambell	
Raquel Mortell	You are forcing employees to get a "vaccine" that is an experiment. It has not been proven to prevent COVID-19. In fact, its widely known that people who have received the "vaccine" are still getting COVID-19. This is a violation of human rights. You are scaring your loyal civil servants by threatening us with our livelihood, after we showed up to work every day because we were exempt to all of the stay at home orders. Now we are being told we will not have a job come October 1st if we don't receive the "vaccine"? It does not prevent what it was made for. You tout human rights when it's convenient: how to accept people's gender choices, religion, and others, but when it comes to what we put in our body, you are using an iron fist, or else. We should have freedom of choice to know what is in our body and affecting our immune system. Our body our choice, right? Not anymore when it comes to

	keeping your job. It's important to add that you allow your civil servants to smoke, subjecting your non-smoking civil servants to second-hand smoke, both with countless health risks and deaths far more than COVID-19. Where is the non-smoking mandate? Or, a mandate for mandatory mental health days for employees to prevent suicide, unhealthy coping mechanisms, etc? Suicide is the cause for more deaths than COVID-19. Half of your work force will be unemployed come October 1st. How does that make you feel?

Roberta Marr	So you haven't been able to convince a sizeable portion of the county's employee's the vaccine is safe and effective so you throw your so called science out the window and go with DO IT BECAUSE I SAID SO? You ought to be able to do better
Roberta Perry	
Roberta Sponsler	No mandate on vaccine. Individual freedom of choice.
Roberta Timario	
Roberta Weiss	Forcing people to take a chemical into their bodies that they do not want us just wrong. And not everyone can tolerate it - as evidenced by many who have died or been severely injured. IF the City enforces a mandate against its employees, then the City should accept liability for any employee that dies or is injured. The City should accept full responsibility, including paying medical bills, funeral costs, as well as support for families who lose a family member.
Roberta J BARBIERI

Sean Carrick	
sean coleman	
Sean Crane	
Sean Durham	
Sean Durham	Unconstitutional to force anyone to get a vaccine that they do not want to receive. People have inalienable right to autonomy over their own body.
Sean Gray	<p>1) The vaccine is not FDA-approved.</p> <p>2) Long-term side effects of the COVID-19 vaccine are unknown.</p> <p>3) Short-term side effects of the COVID-19 vaccine are disregarded, dismissed, downplayed, or censored.</p> <p>4) Presently, the effectiveness of the vaccine is unknown in stopping the spread, or contamination of COVID-19. Vaccinated individuals contract and spread COVID-19. It seems that the COVID-19 vaccine decreases the likelihood of death, but the likelihood of death upon contracting COVID-19 is low regardless (2%-3%) so it is hard to determine whether the low death count is the result of the COVID-19 vaccine, or because the virus already has a low death rate.</p> <p>5) COVID-19 and its variants are mild viruses with a death rate of 2%-3%. Presently, it is unknown whether the risks of the vaccine outweigh the risks of COVID-19 and its variants.</p> <p>6) Concerned regarding social unrest and violations of First Amendment rights. Information suggesting that the vaccine may not be effective, may be harmful, or that there may be other alternatives are often censored. This lack of information and subsequent censorship breeds mistrust.</p> <p>7) Concerned that this is driven by financial incentives/motivations for the Pharmaceutical companies producing the COVID-19 vaccine.</p> <p>8) Concerned that there is essentially no liability upon the government or the Pharmaceutical companies for injuries resulting from the COVID-19 vaccine. Currently, there is no liability for the long-term negative side effects from the COVID-19 vaccine for the government, or the Pharmaceutical companies. This is especially concerning in light of the opioid epidemic which has resulted in 841,000 deaths since 1999, and has resulted in billions of dollars in punitive lawsuits against Pharmaceutical companies.</p> <p>9) Concerned that there is no religious exemption.</p> <p>10) Concerned that there is no medical exemption for individuals at-risk.</p> <p>11) Concerned that this will begin to close the door to "my body, my choice", and how the mandated vaccine may be subsequently be used to justify infringement upon rights related to abortion and birth control, or other health care decision rights.</p>
Sean Hardman	No "vaccine" mandates, especially for a treatment that is at best a therapeutic and still under EAU.

Sharon Goodberry	
Sharon Hernandez	
Sharon Kotas	I have worked closely with the public throughout all of last year until now and I strongly oppose this order. I do not think it is right to force an experimental product on people, when actual data that shows the harms of this vaccine are being covered up. There are over 500,000 adverse reactions, including deaths, from the Covid-19 vaccine on VAERS(Vaccine Adverse Event Reporting System) that is used by the CDC. Where there is risk there must be choice, as with previous vaccines it should be a choice whether someone wants to get it or not. Private medical information should not be given out, this applies with people who are HIV-positive they do not need to disclose this information, so why is vaccine status any different? Federal law, 21 Unites States Code 360bbb-3 demands that employees are given the option to accept or refuse administration of a product, which includes the Covid-19 vaccine. These vaccines are not FDA approved, and the clinical trials are not over until 2023 so this is still in the experimental phase. What happened to my body my choice? The CDC has admitted that vaccinated people are super spreaders, and countries with the most vaccinations such as Israel, Iceland, and Gibraltar have the highest case per capita rates in the world. So this shows that vaccines are not reducing the number of cases or deaths. When an employee suffers an adverse reaction will the County be responsible for paying their bills? Because the vaccine manufacturers have no liability if you're injured or die. The County has no right to force an experimental product on people and should honor medical freedom for people to choose whether they want it or not, without being coerced.
Sharon Len	This is evil. 150,000 dead from this vaccine already and no clinical trials? Thats genocide. Blood on your hands

Stacy J Cole	This does not make any sense based on all the research and data available not only in the US, but internationally over the past 18months. Ratification should not happen. More availability of the known preventions and treatments, all of them, should be readily available. Not just the EUA inoculations. Supplements and nutrition, along with a closer look that the real data behind Ivermectin needs to be top priority. The numbers of severe adverse effects along with the deaths involved with the EUA inoculations is tremendously above any other inoculations divvied out in this Arena. It is unprecedented. In the past when 25-50 deaths were recorded an operation was shut down. These inoculations should not be pushed on all citizens, or consequences onto an individual/family if one chooses to opt out. EUA regulations dictate that the strength in mandating them lies within there being no known alternatives available. That is not the situation we find ourselves in 18months later. Ivermectin has shown it's strength/value over the last 8months. Another strong known factor is innate immunity. We see data internationally on this very truth. The true crime is that it's being ignored and mixed information is propagated from those who wish to give the impression that the inoculations are your ONLY salvation. This just is not the case, and we have to face it. OVER vaccination is counter productive, experts have appealed to WHO that it is dangerous with all considered. Especially now that this is bearing down on our children.

	<p>influenza and recovered, were never forced to get a Flu Vaccine following their recovery. The same applies to other communicable diseases (no vaccine has been forced upon someone who recovered and showed active immunity). In addition, this is still not FDA approved and still considered experimental as we are still gathering reported effects in VAERS. I have never been in favor of mandating vaccinations, as I feel people have the right to choose what is best for them and their families. We have always allowed people to refuse as no one should be forced to get a treatment they do not want. As a patient advocate, I strongly disagree with using coercion or bribery to get people to comply. It is illegal and unethical. In addition, there is no accountability for Pharmaceutical companies should we suffer serious adverse effects. If employers mandate it and employees suffer serious adverse effects, can they be sued for mandating this vaccine as a condition of keeping employment?</p> <p>I urge you to reconsider this mandate as I feel that this is viewed by many HCWs as a betrayal to all the frontline workers who put their lives on the line working throughout the pandemic while we had a PPE shortage, we were scared and no vaccine or treatment was available. I hope you still believe in our constitutional rights and allow us to make our own medical decisions. Thank you for your time.</p>

IT IS NOT SAFE, NOR EFFECTIVE, NOR APPROVED; IT IS EXPERIMENTAL AND THE SAFETY TRIALS WILL NOT BE COMPLETED FOR AT LEAST 2 YEARS. THERE HAVE ALREADY BEEN THOUSANDS OF DEATHS FROM THIS VACCINE AND COUNTLESS ADVERSE REACTIONS, SOME SEVERE AND LIFE ALTERING. THE CURE CANNOT BE WORSE THAN THE DISEASE WHICH HAS A 99.75-.99% SURVIVAL RATE. SINCE THERE ARE MANY KNOWN TREATMENTS AND CURES FOR COVID, IT IS NEITHER NECESSARY NOR LEGAL TO MANDATE VACCINES. IT IS UNCONSTITUTIONAL, ILLEGAL, IMMORAL AND INHUMANE TO FORCE ANYONE TO PUT ANYTHING IN THEIR BODY AGAINST THEIR WILL. VOTE FROM YOUR HEART AND YOUR HUMANITY AND END THIS INSANITY!

Tino Julian	<p>With new information coming available from around the world that NONE of the Covid vaccines are effective and (more importantly) are actually harmful to those that take it, WHY would this body even consider making these experimental treatments mandatory?</p> <p>Recent studies from Cleveland University & the St. Louis Clinic indicate that individuals who were previously infected & RECOVERED actually have MORE IMMUNITY (& are better able to fight-off the variants) than those that have been vaccinated (with 1% or less experiencing re-infection). These studies further found that for those that were previously infected, the vaccination does NOTHING to improve their immunity (& actually carries greater risk).</p> <p>During the H1N1 outbreak, the FDA put a halt to the vaccine trials when 25 people died. The "official" numbers of vaccine-related deaths from the CDC now exceed 11,000 & a recent disclosure from a whistleblower at the CDC indicate that his former agency has routinely been purging the database of valid deaths to keep the numbers low. How many people need to needlessly die before we put a halt to this madness?</p> <p>Ask yourself this question, why would doctors, nurses, cops and firefighters (who have seen more deaths in the last 12 months than at any time in their careers STILL be choosing not to get vaccinated if there was no risk involved?</p>

Vicky Chen	Strongly against it. It is against human right!
Vicky Hernandez	Absolutely NO
Vicky Palyan	
Vicky Saikali	
Vicky Tavitian	It is unethical to assume sovereignty as a governing body over ones physical body, without taking case by case consideration of each person as an individual with their own physical, physiological and personal limitations and mandate them or ostracize them for not getting vaccinated, especially against a virus with a 99.8% recovery rate. There is no science behind this and everything has been misinformation thus far from everyone we've trusted. As an individual with an inflammatory autoimmune condition it is not safe for me to be vaccinated without longer trials and data, and it is unfair to prohibit me from entering a gym or restaurant or mandate I wear a mask 24/7. That should be an individual businesses decision.

WILLIAM R ROUHANA	THIS IS AGAINST OUR HUMAN RIGHTS
willow aragno	
Wilma Hall	<p>Dr. Robert Malone, M.D., M.S., a distinguished physician who discovered RNA transfection and invented mRNA vaccines, recently shared some alarming news—new data indicates that people who have taken the Pfizer and Moderna vaccines are at greater risk of getting Covid than someone who is not vaccinated.</p> <p>Dr. Malone has warned of this risk for several months. What are we to do? Malone says that instead of relying on the flawed vaccines, Doctors should use drugs for treating Covid that have proved effective, such as Ivermectin , is neutralizing Covid:</p> <p>What should scare the hell out of you is the extraordinary efforts being taken to silence and discredit Dr. Malone. I encourage you to read Michael Haynes piece from July 5, which details Malone’s Kafkaesque ordeal.</p> <p>This is the kind of authoritarian censorship carried out by Adolf Hitler, Josef Stalin and Pol Pot. When the media and the Government conspire to quash dissenting opinions and legitimate, provable facts, we have crossed the threshold of fascism.</p> <p>The same effort to discredit Dr. Malone also has been unleashed against non-vaccine treatment methods. Remember what happened to anyone who dared suggest using Hydroxychloroquine or Ivermectin?</p> <p>And do you remember the news stories in May about how Covid was devastating India? I bet you have heard little about the efficacy of Ivermectin in stopping Covid in Dehli.</p> <p>?</p> <p>It is your duty as an American to challenge and question everything the Government represents as true. We now have concrete evidence that Dr. Anthony Fauci has taken diametrically opposed positions without blinking an eye. Some call that “lying.” The same with the CDC (as I pointed out in my last article). Perhaps the CDC should be renamed the Center for Disinformation & Confusion in light of the contradictory guidance issued regarding masks and vaccines.</p> <p>thegatewaypundit.com/2021/07/inventor-mrna-vaccine-covid-vaccines-make-virus-dangerous/</p>

Subject: Right to Health Freedom (Oppose S-1, 21, 73A, and 73B)

Hello to whom it may concern,

I whole heartedly apposed the ban on unvaccinated from having the right to live and take care of their health and life how they see fit. I OPPOSE passing S-1, 21, 73A, and 73B!!!!!!!!!!!!!!

The action to ban a certain group of individuals based on personal choice to care for their health in alternative methods is a sincere impeadment on the human rights our country is known to offer its residents. I am appalled at such an action being considered. What right does the government have to tell me how to care for myself? They do not know my implications nor my family history. They fo not have a right to control me nor deny me the pursuit of happiness and health in ways suited to my life and well being. This disease does impact others and they have the right to do as they see fit, vaccinated or unvaccinated.

With power as a US citizen and with love that we can care for one another without controlling one another,

Christa Irene Ostdiek

My name is Rosalie Aranda,

I'm sending this to show opposition to the following agendas I'm opposing 21, 73A,73B I'm opposing these agendas because it's unconstitutional, unethical, and bias, natural medicine is being silenced, and this not right. And unless the "underlying diseases" are addressed as well then this just does not make sense. On a side note, why if the delta variant is so intense... why isn't our southern boarder closed?

I hope you would consider these comments. Thank you for your time.

Not the public comment line. Your WEBSITE WHERE THE PUBLIC CAN show opposition or support for certain agenda items. We could not click on the boxes for Agenda Items 21, 73A, & 73B. I called the main # 213-974-1411 and they confirmed the site CRASHED. They were trying to get it back up and running. I used Google Chrome as suggested and other web engines to no avail. I am not the only one who was prevented from voting on your site as to this issue. And I was not called on during public comment at the hearing.

I am a testament to the success of hydroxychloroquine, ivermectin, azithromycin, and key supplements that helped me conquer Covid. They are also effective in preventing the infection of COVID. We have seen that those with the shots are still getting COVID. Look at what is happening IN ISRAEL CURRENTLY. I also know 2 people who have been detrimentally affected by Covid experimental shots - one went blind, the other died. This is happening to good people because the Big Pharma and politicians are not following the science and silencing those with safe, alternative methods of preventing and fighting COVID.

The community in opposition to these experimental shots have been silenced.

On Tue, Aug 10, 2021 at 10:28 AM Supervisor Janice Hahn (Fourth District) <fourthdistrict@bos.lacounty.gov> wrote:

Good morning,

Thank you for reaching out to our office. I just checked and the public comment line is open and working fine. Who did you speak to that said it was not working?

Subject: Opponents to Agenda 21, 73A, and 73B Cannot Get onto your Public Comment Site to vote in opposition to Mandatory Experimental Covid shots

Please be advised that I and many other LA County residents have been shut out from making public comment on your County website in opposition to Agenda Items 21, 73A, and 73B in opposition to mandatory Covid vaccines.

There are still too many unanswered questions about the long-term health consequences of Covid 19 experimental shots. To force these experimental shots upon LA County employees is in violation of our Constitutional rights and HIPAA privacy rights.

I called your main # and learned the site has been down. That is a great way to silence the community. I also cannot get in to publicly comment at the live meeting.

You need to know that People's voices have been silenced by your site's failure to work properly. You need to provide People more opportunity to comment on the mandatory experimental shots.

REspectfully,
Nicole Flood

Subject: FW: AGENDA ITEMS for 8/10 S-1, 21, 73A and 73B - voicing my opposition
Date: Tuesday, August 10, 2021 11:27:53 AM

The following correspondence is being forwarded to you for your review/information.

From: Tracy Coe <coedynamics@hotmail.com>
Sent: Tuesday, August 10, 2021 11:05 AM
To: ExecutiveOffice <ExecutiveOffice@bos.lacounty.gov>
Subject: AGENDA ITEMS for 8/10 S-1, 21, 73A and 73B - voicing my opposition

I'm and many I know are in in opposition of the agenda items listed in the subject line.
Mandating shots is against the law and civil rights of US and California.

1. The covid 19 shots are NOT FDA approved
 2. Covid 19 shots are NOT safe and not effective VAERS shows over 5,000 deaths and over 500,000 severe adverse reaction (and this is old data)
 3. there is a NUMBER of breakthrough cases of those who have already been vaccinated and they are spreading
 4. it has never been proven that any of hte covid19 shots are able to stop the spread nor stop a "vaccinated" person from being infected covid19
 5. there is much successful treatment and protection for COVID 19 Ivermectin, Zinc, adequate hydroxy-25 (D3 levels)
 6. *Microbiology & Infectious Diseases*, January 2021, veteran immunologist J. Bart Classen: "RNA-based COVID vaccines have the potential to cause more disease than the epidemic of COVID-19." <https://scivisionpub.com/pdfs/covid19-rna-based-vaccines-and-the-risk-of-prion-disease-1503.pdf>
 7. CDC: Best estimate for survival rates by age group are in most cases over 99%. (birth to 19: 99.997%; age 20-49: 99.98%; age 50-69: 99.5%; age 70 and over: 95%) <https://www.cdc.gov/coronavirus/2019-ncov/hcp/planning-scenarios.html>
 8. Someone who has already have been infected by COVID 19, has a stronger immunity then any vaccinated person against all its variants thats how the immune system work and has worked since man has been created.
 9. mandating proof is a violation of medical privacy and violation of ADA
- OPPOSE THESE AGEND ITEMS - do real research i'm also happy to send you more research

To: ExecutiveOffice <ExecutiveOffice@bos.lacounty.gov>
Subject: Comments on 21 and 73A

To the Board of Supervisors,

I am writing to say no to 21 and 73A.

The science shows that none symptomatic people do not transmit disease and proves that it is not the pathogen, but the terrain that is the cause of any disease.

This vaccine, we should not call it vaccine, was supposed to be for emergency use only for those people who were at risk. Vaccines should be a choice and not forced on people. We are becoming a communistic country where no one has any freedom of choice. But let me remind you that we live in United States of America. We have a constitution that protects our rights.

This is not a vaccine but experimental gene therapy. People with comorbidity should not be getting this gene therapy and you should not pass any law to forcefully give this gene therapy to people. Instead of forcing people to get this needle, force them to not put chemicals on and inside their bodies.

I say no to forced vaccination. And it must be a choice. You need to spend time reading the TRUE science.

Thank you,

Raya Shanazarian

Dear Board of Supervisors,

Your public comment server is going down.

I OPPOSE the following proposals.

21

You do not own the bodies of your employees. Under EUA and just pure informed consent we have the right to refuse medical procedures people do not want.

73A

Ratification of August 4, 2021 Executive Order and Directive to the Chief Executive Officer Regarding Establishment of a Mandatory COVID-19 Vaccination Policy for County Employees

Its also incredibly unethical to tell others what to do with their bodies. They have the right to demand transparency on what are the long term implication for this medical treatment. There are also other treatments available and people (public health and hospitals) refuse simply because they are being advocated by "republicans" . Its terrible. If we want to tackle this issue long term then we have to address the poor metabolic health of Angelenos and obesity rates that were made worse by the lockdowns. People have emerged in worse health due to being shut in. Consequently, science showed that most transmissions occurred in family homes and not public spaces.

73B Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

This is so unconstitutional. You are punishing people who made a choice about their health. People like myself spend several hours during the week looking at data, hearing different points of view, and searching PUB MED articles. You know what is the overarching theme? Obesity and Diabetes are big factors in Covid related problems and people are well enough to respond to this crisis. And we need incentives to better everyone's health not mandate something a lot people are not comfortable with. Its also against The Civil Rights Act of 1964 prohibits discrimination on the basis of race, color, *religion*, sex or national origin. Provisions of this civil rights act forbade discrimination on the basis of sex, as well as, race in hiring, promoting, and firing. *The Act prohibited discrimination in public accommodations and federally funded programs.*

You are discriminating against peoples beliefs/religion/philosophical objections against mandated

interventions. The science is not settled on this matter. Not by a longshot. Further proof is how other fully vaccinated countries like England, Israel, Iceland, etc. are dealing with new surges of cases because at the end of the day, the vaccine **does not stop transmission.**

Thank you.

Sonia

Subject: Public comment submission for 8/10/2021 agenda items #21, #73-A, and #73-B

My name is Chase Bruno, resident of Los Angeles County. Please submit the following text in its entirety as my public comment to items #21, #73-A, and #73-B on the Board of Supervisors Agenda for 08/10/2021, since the website to do so is not functioning properly:

That this is even being discussed by the board is outrageous. No person, much less an elected official has domain over another person's body. By considering this action, you are implying that you are qualified to make medical decisions on behalf of every single person in Los Angeles County, and your opinions supersede that of every primary care provider of your constituents. The board's decision making abilities and leadership over this past year hardly reflect the notion that you are qualified to perform the basic functions of supervisors, much less the basic functions of a healthcare professional, a job none of you remotely meet the requirement for.

If your goal is to get the entirety of Los Angeles County Vaccinated, perhaps you should address the issues that make people weary of vaccination in the first place, before defaulting to tyrannical and far-overreaching measures such as mandating medical procedures for your constituents in order for them to participate in society. Perhaps, instead of attending a dinner at a restaurant shortly after voting to ban outdoor dining, Sheila Kuehl could have ordered GrubHub and had her actions reflect her words, instead of blatantly contradicting them. Perhaps, in doing so, you could earn back the trust of the public. Sheila Kuehl is just one example of this, I don't know that I need to name more elected who's actions have contradicted their decisions affecting the public, but we can also talk about Supervisor Hilda Solis' constant habit of deleting negative or critical comments from her Instagram page, almost as if she would rather pretend critics don't exist rather than answer for her actions. On March 4th, when the Trump Administration barred abortion providers from receiving federal funding, Solis stated "The Trump Administration's latest attack on women's health diminishes the sanctity of the doctor-patient relationship and impacts the quality of healthcare accessed by four million people throughout the country". Yet she wishes to do the very same (diminish the sanctity of the doctor-patient relationship) by imposing herself as the chief medical decision maker for LA County Employees and residents by requiring them to undergo a medical procedure, the COVID-19 vaccine by way of coercion.

What is further contradictory is that the LA County Board of Supervisor's "Policy of Equity", which can be found on the County Equity Oversight Panel website states the following: "The County WILL NOT tolerate unlawful discrimination on the basis of age; ancestry; color; ethnicity; religious creed; ...; disability; marital status; MEDICAL CONDITION; ...; or any other characteristic protected by state of federal law." Further, "as a preventive measure, the County also will not tolerate inappropriate

conduct toward others based on a protected status even if the conduct does not meet the legal definition of discrimination or unlawful harassment. All County employees are responsible for conducting themselves in accordance with this Policy and its associated Procedures." This section is preceded by the statement "The Los Angeles County Policy of Equity reflects and builds upon our MISSION, VISION, and VALUES, which each employee is responsible for demonstrating in both ACTIONS AND WORDS".

The very fact that the board is considering requiring individuals to be vaccinated in order to participate in society displays that the Board is willing to act contradictory to its MISSION, VISION, and VALUES, and does in fact condone discrimination- discrimination against those who have decided for themselves that the COVID-19 vaccine is not the right medical choice for themselves. The Board is willing to discriminate against grown, functioning, free Americans, who have decided that the repeated contradictions surrounding the vaccine have caused them not to trust it enough to let it enter their body. The county is willing to discriminate against those who wonder why, after being told repeatedly by government and public health officials, large corporations, big tech, and countless other bodies that the vaccine is ONLY "Safe and Effective", they are simultaneously being told "the virus can still spread, masks must still be worn", what benefit remains to outrisk a blood clot, unknown reaction, or the unknown long-term effects. The governor of California has called this "A Pandemic of the Unvaccinated", yet the unvaccinated seem to be no better off than the vaccinated at this point. At this point, it now appears that there is no benefit to being vaccinated besides being free from threat, not from the virus but from tyrannical policy. Any foreign substance being introduced into the body can present a risk, whether small or large. If those who are otherwise healthy and have little chance of infection by the virus, and now have a wide range of treatments available to them to treat an infection, and have a high likelihood of getting through any infection by the virus without great harm to themselves decide that they'd rather not introduce a new substance into their body from a manufacturer that has a history of lawsuits (and one of those manufacturers holding the record for the largest criminal settlement ever awarded in history), developed under a presidential administration many did not trust in record time for the chance that it may avert what turns out for them to be a little worse than the flu they had before, is that outrageous? If their risk to transmit to others is at the same level of those who have already taken the shot(s), as we've discovered in the previous weeks, is it honest to say that forcing them to receive the same shot is for the best interest of the public? This very agenda item displays that this is not a pandemic of the unvaccinated, but a pandemic of bad leadership- a pandemic of policymakers who recklessly, and without suffering consequence of their own policy, demand control over the sanctity of their constituents' own bodies under the veil of "saving lives". How can anyone on this board think you are uniquely qualified to "save lives" when you haven't even demonstrated your ability to save money, electricity, or a small business?

This state has not learned from any bad decision it has made during this pandemic. It has demonstrated that it is not careful, nor considerate to the rights of its Citizens by any measure of the imagination. You have locked our children out of schools and inside their homes for a year, while allowing adult-appearing children to destroy parts of our cities for days on end, and while law abiding citizens were locked in their homes under curfew. You have kept healthy people out of fitness facilities while allowing liquor stores and smoke shops to remain open. You closed small businesses from serving their customers without proving anywhere near beyond a reasonable doubt that they were a danger to them, while allowing the homeless to setup shop on sidewalks, riverbeds, and parks. You arrested people for going to the beach while you released dangerous criminals from

prisons, and now you are considering requiring County employees to take a vaccine that does not inhibit the risk of infecting others, and considering banning otherwise healthy people from utilizing indoor public spaces for the same.

Above all else, the board simply lacks the authority, moral or otherwise, to require someone to put something into their body against their will, in addition to lacking the authority to retaliate, segregate, or discriminate against them by withholding access to indoor facilities, or any right by any means for their refusal to do so.

The decision to take a vaccine should not be made under duress, threat or fear, because everyone is telling you to get it, or that you won't be able to participate in certain things without it, that you will not have the same rights as others without it. It should simply be, as with any other medical procedure, that the person freely and willfully chooses to because they believe or are convinced that it is the best decision for themselves.

Dear Members,

I attempted to go on site to put my concern and vote for the following measure that is being voted on today. the following Agenda items: 21, 73A, 73B.

I am completely opposed to all of these measures, especially the one that bans us from restaurants if unvaccinated.

I am an American Citizen and registered to vote. It will take my constitutional rights, if this passes.

Sincerely,
Patricia Souder

Subject: 8/10/21 LA County Board of Supervisors Meeting
Date: Tuesday, August 10, 2021 11:00:39 AM

To Whom It May Concern,

Please add to the public record for this meeting today, that I, Michael A. Kander, am a registered voter in LA County, and I am OPPOSED to the following three agenda items scheduled for vote in the meeting today. I believe the Board of Supervisors should know and understand that the Constitution of the United States and the State of California support an individual's right to choose for themselves whether or not they should have a vaccination, and that their employment should not be subject to termination should they choose not to be vaccinated. I would urge all of those on the Board of Supervisors to follow the science as they make these decisions. There are more than just a few thoughtful, intelligent, well qualified and lettered medical doctors and scientists that have contributed to the research in order to provide a deeper understanding of COVID-19 and how to fight it. These are physicians and scientists who have grave concerns about the vaccines. I urge you to follow-up with them, review their work, interview them before you make decisions that will have a profound impact on those of us in the general population.

Thank you.

21. COVID-19 Vaccine for Los Angeles County Employees

73-A. Ratification of August 4, 2021 Executive Order and Directive to the Chief Executive Officer Regarding Establishment of a Mandatory COVID-19 Vaccination Policy for County Employees

73-B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

Respectfully,
Michael A. and Pamela J. Kander

I am writing to **OPPOSE the following: S1, 21, 73A & 73B**, for the following reasons. I don't believe there should be any mandatory Covid-19 vaccines for any employee or Citizen due to the fact that the Covid-19 vaccine has not worked the way the so-called experts said it would. The vaccinated are now causing the unvaccinated to become infected and each other. This is still an experimental use approved vaccine and there has **never been a successful mRNA animal trial and now the quinea pigs, rats, ferrets and monkeys are people**. There are proven data from other Countries where the way to get better was to open up and not require masks or vaccination. We are our worse enemy by not following the true science.

I hope you'll consider these words and vote to oppose the aforementioned agendas.

Sincerely,

Claude Richardson

I want to send in my vote to OPPOSE the Agenda Items for your meeting today which are Items 21, 73A, 73B

You all need to educate yourself about the Vaccines which are not REAL Vaccines only experimental therapeutics which have never been approved by the FDA as a MRNA. Please look at these short presentations <https://videopress.com/v/p8R7ebPy> and see for yourself. This is no joke and so many people have already died from the vaccines.

Also see what Dr. Dan Stock has to say in his presentation about the misinformation of the so called vaccines.

Subject: Agenda Item 73A - NO Mandatory Vaccines for Employees/Citizens

Dear Board Members,

One of the things that I really believe is happening in LA County is that our leaders are reacting and following outside orders that are not legal and sound and have nothing to do with Scientific Evidence but with a massive Government Control from the ONU - New World Order agenda. I am sure, you know that is what is at stake - the vaccines and the Covid-19 is an excuse to shut down local governments to bring a NEW WORLD ORDER. It's easier to infringe fear and terror in your constituents, and if Covid -19 accomplishes that then it is not rocket science that people in places of power can/would abuse this power to infringe in personal liberties, freedoms and to the point of sending people to concentration camps like in Nazi Germany. The County of LA and the Board of Supervisors is going along in this dichotomy that with one hand says people are going to be safe and healthy if you do x,y and z. Then, the people do x,y, and z, and now the government says we want you to be a human experiment, which is clearly a violation of the Nuremberg code, and a violation of every single Constitution in the world including the Magna Carta, and even the UN Charter.

It is obvious that our leaders get paid for their services. We need to note that the Constituents pay all your bills and they elected all of you to become our public servants. Stop listening to the ONU, World Bank, the Economic Forum, the DAVOS forum, the Wall Street Elites, and other well known rich philanthropists such as the Rockefellers, and Bill Gates Foundation. You were elected by us - 'the People.'

Please don't just throw some scientist and doctors in the middle to make us 'the people' believe that everything that is being done in the name of 'health and safety' is

constitutional because you and every Politician knows that behind the smoke - there are superpowers controlling you and you are afraid of them, but not of the people who elected you because they don't have the money and the power according to you, but the citizens are the ones with the power and they can take it from you - of course - legally by recalling you, by voting you out of power, by referendum, by new elections, etc... Just it takes time, but it can surely be done.

At this point, let's make it clear that our political leaders (including all of you) are all colluding and rigging the system of liberty and seizing control of the most basic individual rights in the name of 'safety, and health'. This is obvious and clear. We fine the people we don't like, we arrest those that gather to request that our government be accountable to its constituents. It's never the other way around.

We the People were told to stay home, while BLM was all year long last year were burning buildings, making chaos on the streets, gathering without masks in big protests around the Country. They have the right because of discrimination. Yes, of course, they have rights while we don't have rights? They protested in the County of LA - they were at the LAPD headquarters, and at the City Hall, but that was OKAY. That was peaceful and legal...

They were making riots while the rest of us and our families have to watched our jobs vanish, our businesses closed, and our children without education and people lacking access to our courts, churches, and our lives were stopped but not BLM - they were highly active with the benediction from our County Leaders, Our City Leaders, Our President's blessings, etc... Even Gil Garcetti, our City Mayor joined in, and other Politicians did so too.

Now, did BLM was a super spreader of the Covid 19 virus? but that was okay? right --- nobody said anything. They did not needed any vaccines and no social distancing requirements was enforced and they did not have to show proof of vaccination?

Everyone in the Board knows that Covid -19 is being used to take away the rights of the citizens around the world. Why continue to lie to the masses? Can you explain to me, why 191 countries are all taking away liberties from their citizens in the name of the wuham virus? Why are you and others so focus on vacinating the masses so fast even not caring about the legal risks, the people who and will die from it? etc... (are you following Agenda 2021/agenda 2030) - where it indicates that only 2/3 of the world population needs to be gone by 2030. Are you trying to help eliminate all of those lives?

Maybe, this is one of the many reasons for this mass vaccination taking place in LA County and across the United States, not to mention across the globe.

Only five (5) Political - Board members in LA are able to determine the fake of millions of families, millions of residents, and millions of lives loss. Is it more important for the Board of Supervisors to make millions of money in Big Pharma money rather than to place the lives and dignity of your Constituents and workers First, which is exactly why they elected you to represent them, so you can be vigilant

and safeguard their rights against all enemies, and traitors.

It is time you choose to be in the right side of history. **VOTE NO and Against Mandatory Vaccines and passports for the Community, Workers, and the Public in General.**

See attached information that you can research on your own to help you and guide to make the correct choices.

Subject: FW: August 10 meeting - opposition to S-1, 21, 73A, 73B
Date: Tuesday, August 10, 2021 10:31:01 AM

The following correspondence is being forwarded to you for your review/information.

From: Naomi Poole <momnaomi@hotmail.com>
Sent: Monday, August 9, 2021 11:16 PM
To: ExecutiveOffice <ExecutiveOffice@bos.lacounty.gov>
Subject: August 10 meeting - opposition to S-1, 21, 73A, 73B

I write to voice strong opposition to the following items on the August 10 agenda: S-1, 21, 73A, 73B.

S-1 Public Health Order S-1, which would BAN THE UNVACCINATED FROM RESTAURANTS, GYMS, ENTERTAINMENT VENUES, ETC.

21 COVID-19 Vaccine for Los Angeles County Employees

73A Ratifying 8/4/21 order establishing a Mandatory COVID-19 Vaccination Policy for County Employees

73B. Evaluation of COVID-19 Vaccine Requirements for Indoor Public Spaces

The government should NOT require anyone to be injected with anything in order to live and work freely in the society. This is a violation of human rights, and is also discrimination. Whatever a person's view is on the current covid vaccines, it is a PERSONAL choice what goes into a person's body. The government cannot mandate this. And must not create rules that restrict his normal citizen freedoms to try to enforce this (i.e., now you can't go to restaurant or gym or public entertainment venues...what next, can't go shopping for life necessities and food????).

And county employees should not be forced to get the vaccine in order to serve LA County.

This is the United States of America. We're supposed to be free citizens here.

Naomi Poole
Sylmar CA

Subject: OPPOSE Item #'s S1, 21, 73A & 73B
Date: Tuesday, August 10, 2021 1:20:03 PM

I want to make sure you know the opinion of one of your constituents on the topics you will be discussing tonight.

I am adamantly opposed to taking people's rights away - period. We have HIPPA laws in place for very good reason and it is not ok to start mandating an Emergency Use Authorized Vaccine that is in stage 3 clinical trials and that has not been approved by the FDA.

To be clear, I am OPPOSED to any sort of Covid Vaccine Passport/Mandate/Proof - whatever you want to call it.

I DO NOT agree with any sort of segregation based on whether or not you got a covid vaccine. As of now, people with the vaccine are still catching covid. As of now, vaccinated people are still able to shed the covid virus. So, the vaccine is not protecting people the way it was sold to us. It is not working. And now to make it mandatory is against all I stand for and all I thought this country stood for....freedom. Freedom to my body. What else will you start mandating if we all let this happen?

PLEASE VOTE NO on any sort of Covid Vaccine Mandate.

Kelly Evans

Subject: Vote No to Vaccine passports, mandates or any other name you want to call it.

I strongly oppose 21, 73A & 73B. We all know the evil you're trying to pull. If you were truly concerned you would mandate vitamin D testing. You would also make Ivermectin and Hydroxychloroquin a protocol for early intervention or prevention. But then how would you control us?

If you are not evil, you will start promoting exercise, nutrition and start promoting the known remedies. Ivermectin and Hydroxychloroquin have saved numerous lives.

Jesus is still on the throne. Heaven and hell are real. I'd give up this evil agenda. I will pray for you.

Subject: Cannot get onto your LA County Comment site to Oppose Mandatory Covid shots under Agenda Items 21, 73A, & 73B

Hello, LA County Board of Supervisors,

Many of us have not been able to get onto your website to vote in opposition to Agenda Items 21, 73A, and 73B which would mandate experimental Covid shots upon LA County employees and all residents in order to go about our daily lives. I called your 213 # and they admitted your site was down. I see the clear attempt to silence the community who will be harmed by your mandated experimental vaccines.

Mandating these shots is not only unconstitutional but also violates all of our HIPPA rights and opens doors for lawsuits based on discrimination.

I am opposed to these mandates for many reasons, but for starters I just had a family member pass away and it was confirmed it was from the vaccine. Mandating myself and my family get this experimental shot after we just buried our loved one from the shot is grotesque. I also just recovered from Covid myself and had no issues. With already having Covid I am a prime candidate to have an adverse reaction to this experimental shot. This is not a one size fits all issue. The other issue is you are blatantly lying to the public saying mandating vaccines will end this pandemic which is completely false. I got Covid from a fully vaccinated person. I currently know 10 people who have Covid and all are fully "vaccinated". The "vaccine" does not stop the spread of Covid and requiring the "vaccine" for all will not do anything to stop the spread. How about encouraging people to get healthy, check their vitamin D levels, exercise and eat clean?

The other issue is since this experimental drug is not FDA approved you are mandating all residents voluntarily sign up for these experimental drug trials without providing everyone with the proper waivers and paperwork required when someone signs up for a vaccine trial. You are infringing on our constitutional rights and violating our civil liberties while trying to silence our voices.

You have not heard from all in opposition to this mandatory imposition of vaccines in violation of People's constitutional and HIPAA privacy rights. You will be responsible for the future negative health consequences of our future generations. The known and unknown consequences of these experimental Covid shots where we, the public, are the guinea pigs are the reasons why you cannot mandate these experimental shots.

Please take note that many in the community have been silenced by your site conveniently crashing.

Respectfully,

Brittany Calvillo

Subject: Opposition

I oppose these items on the Agenda for August 10, 2021:
21, 73A and 73B

I have tried over five times to voice my opinion on these items through the online form provided for public comment but, to no avail. I would like a better way than through email to be heard before you vote on items affecting the well-being of the citizens of LA County. I've wasted an entire morning on this so far.

Here are my concerns regarding these items:

21 OPPOSE

This should be an individual choice on the advice of one's personal physician. My own doctor has advised me NOT TO GET THE VAX as I suffer from an autoimmune condition. This would set into motion a cascade of events that could adversely affect my health. I spend thousands of dollars a year on medications and supplements so that I can live as healthily as possible given my circumstances. Please do your own research and look at the facts. Here is the VAERS website to visit to find out how many people have died or have suffered serious adverse reactions after receiving the vaccines. <https://vaers.hhs.gov/> This is our own government's website that tries to track adverse events. If you do a deep dive, you will see that the reactions from the covid vax have outnumbered ALL VACCINES IN PREVIOUS YEARS TO DATE!

73A OPPOSE

This is against the Nuremberg code. This injection is an experimental gene therapy shot. It has not been approved, it has only been authorized. The pharmaceutical companies have no liability at all for any adverse reactions. See the 1986 act here. <https://www.congress.gov/bill/99th-congress/house-bill/5546> Are you willing to bankrupt the County due to potential lawsuits?

73B OPPOSE

There is no basis for discriminating against an individual due to health concerns. Have you looked at any data that reports those that have been injected carry as much viral load and can transmit the disease just as easily as one who has not received the vax? See the report of the patients in Massachusetts here. <https://www.cnn.com/2021/07/30/cdc-study-shows-74percent-of-people-infected-in-massachusetts-covid-outbreak-were-fully-vaccinated.html> The CDC reported a study

that showed 74% of the people infected in the outbreak were fully vaccinated. Furthermore, my son was fully vaccinated in April. Since that time he has been sick twice with various “flu-like symptoms.” Last week (first week in August 2021) he tested positive for covid. He still does not have his sense of smell nor can he taste anything after this last illness.

Read the science! There are countless doctors across the United States successfully treating individuals on an out-patient basis with a protocol that keeps them out of the hospital. It is not hard to understand why ivermectin is receiving a bad rap. It is out of patent and therefore of no use to the bottom line on the pharmaceutical company’s profit and loss statement. Out of patent drugs can be manufactured by other companies which means there is no money in it. There are ongoing clinical trials now set up to test the efficacy of this drug. There are other items within the protocol used and I advise each and every one of you Board members to do your homework. Please let’s approach this subject with common sense.

Jeanne OBrien

I could not leave comments for the record, because the system kept crashing; you must have such a great online attendance to voice opposition that the system could not support it.

I AM SENDING THIS EMAIL TO REGISTER MY STRONG OPPOSITION TO THESE NEW MANDATES!
SOME OF THE MOST DETRIMENTAL ACTIONS AGAINST THE CITIZENS OF LOS ANGELES COUNTY!

I STRONGLY OPPOSE ITEMS: 16, S-1, 21, 73A and 73B.

PLEASE HEAR THE VOICES OF YOUR CONSTITUENTS AND VOTE NO on these unconstitutional efforts.

We are a nation of laws, and by breaking your oath to upholding laws, because you have a different opinion, you are making it a nation of men (in this case women) Either way, you are not the legislators and even they can not pass laws that are unconstitutional. We the people are tired of being ignored and ruled like this is your little kingdom.

Lastly: Give funding back to the police and sheriff! We are scared, violent crime is up! We can't all afford private security, or live in gated communities.

Thank you,

Lars Rottler

Subject: NO on Vaccine madates/vaccine passports

Attention LA County Board of Supervisors,

As you begin to review data regarding mandating vaccines and vaccine passports, as a voting citizen of LA county, I am writing to express that I am 100% AGAINST any mandating of vaccines and 100% AGAINST any vaccine passports at any time, now or in the future.

There is an overwhelming amount of data proving that vaccines are NOT sufficient to block transmission of C-19 and variants. (I can provide you credible resources on this if you are lacking such information).

Additionally, every American citizen must have the freedom to decide what they want to eat, drink and inject or not inject into their body - pandemic or no pandemic. I am PRO freedom and pro-choice in all aspects of personal health choices.

Vote NO to any vaccine mandates and/or vaccine passports of any kind (S-1, 21, 73A, 73B)

Sincerely,

Britt-Marie Gustafsson
LA County resident

So many of us were on the phone to oppose Agenda 21, 73A, and 73B and we were not given a chance. You should not ask us our stance, only our names. Then you cannot pick and choose who you will listen to.

Disgraceful!

I tried to leave an e-mail comment and it would not send.

I was on the phone about 1:40 and not heard.

The website isn't working properly and I cannot submit my vote.

<https://publiccomment.bos.lacounty.gov>

I'd like to submit my votes for the following items:

S1 - OPPOSE
12 - OPPOSE
73A - OPPOSE
73B - OPPOSE

I am a resident of Los Angeles County and would like my vote to be counted!

Thank you.
Best,
Danielle Savka

NOTICE FOR EMPLOYERS, UNIVERSITIES AND OTHER INSTITUTIONS MANDATING COVID-19 VACCINES

Revised 6/4/21

This serves as notice that the requirement for any individual to be vaccinated against COVID-19 for employment or participation at a university or other institution violates federal law. All COVID-19 vaccines are merely authorized, not approved or licensed, by the federal government; they are Emergency Use Authorization (EUA) only. They merely “may be effective.” Federal law states:

Title 21 U.S.C. § 360bbb-3(e)(1)(A)(ii)(I-III) of the Federal Food, Drug, and Cosmetic Act states:

individuals to whom the product is administered are informed—

- (I)** that the Secretary has authorized the emergency use of the product;
- (II)** of the significant known and potential benefits and risks of such use, and of the extent to which such benefits and risks are unknown; and
- (III) of the option to accept or refuse administration of the product**, of the consequences, if any, of refusing administration of the product, and of the alternatives to the product that are available and of their benefits and risks.

EUA products are by definition experimental and thus require the right to refuse. Under the Nuremberg Code, the foundation of ethical medicine, no one may be coerced to participate in a medical experiment. Consent of the individual is “absolutely essential.” A federal court held that the U.S. military could not mandate EUA vaccines to soldiers. *Doe #1 v. Rumsfeld*, 297 F.Supp.2d 119 (2003). The court held: “...the United States cannot demand that members of the armed forces also serve as guinea pigs for experimental drugs.” *Id.* at 135. No court has ever upheld a mandate for an EUA vaccine.

The liability for forced participation in a medical experiment, including injury or death, may be incalculable. Medical and religious exemptions will be insufficient to overcome the illegality of EUA vaccine mandates. Children’s Health Defense urges U.S. employers, universities and other institutions to respect and uphold the rights of individuals to refuse EUA COVID-19 vaccines.

Medical Director

Dear Supervisors;

On behalf of LAC USC Medical Center Foundation and our flagship Wellness Center, a community organization with vested interest in the health of our community, I write to you today asking you to support the Executive Order issued by Supervisor Solis requiring all County employees to be vaccinated by October 1. With the increased spread of the Delta variant, case rates surging and hospitalizations increasing, it's critical we take bold and meaningful action to slow the spread. By requiring vaccinations for County employees, not only are we protecting their health, but also the health and safety of the vulnerable residents they serve.

We are committed to these protective measures as we serve more than 33,000 Angelenos annually with health and wellness wrap around services per year. Additionally, this sets a strong example for employers across the County to model for their own employees, while increasing our overall vaccination rates to bring us closer to community immunity.

As our County Supervisors, I ask that you help put this pandemic behind us and support this Executive Order. Thank you in advance for your consideration of this letter of support, should you have any questions, do not hesitate to contact me at any time at (213) 784-9252 or via email at rosa@lacuscfoundation.org.

We thank you for your ongoing support of our work and community!

Warm regards,

A handwritten signature in blue ink, appearing to read "Rosa Soto", written over a horizontal line.

9 August 2021

LA County Government

CEO, Chief Executive Office
500 W. Temple St., Room #358
Los Angeles, CA 90012

Dear whom it may concern,

May this letter find you all in good health and spirit. Greetings, my name is Erica Singsay and I am writing this letter in regards to opposing these bills that you all are trying to pass. I am opposing bill number 21, 73A, and 73B. If this bill passes it is stating that we are still living up to the $\frac{3}{5}$ compromise which falls under the 13 Amendment. In hence, stating that we as a human being have no rights and we are still own and are properties to your governmental biological warfare experiments. While having rights in America as human beings, we then should have rights to our body and choices. So this is why I am opposing these bills, because you guys are contradicting yourself with the law taking off the 13 Amendment of $\frac{3}{5}$ compromise. Instead, your governmental officials and politicians are still enforcing the $\frac{3}{5}$ compromise by being secretive and using tricknology on humankind by trying to pass the 21, 73A, and 73B bills.

Sincerely,

Erica Singsay

Erica Singsay

Dear County Board of Supervisors

Mandating Vaccination to reduce the spread of Covid is misguided. Israel has one of the highest vaccination rates in the world and the Health Ministry has discovered that the infection rate of vaccinated individuals is the same as unvaccinated individuals. The vaccines are not stopping the Delta variant. See the chart below.

Forcing an experimental Vaccine on individuals that will not reduce the spread of Covid is unconscionable, considering that increasing individual's immune systems using Vitamin D, C, Zinc and Quercetin, would do more to protect the population. Ivermectin has successfully prevented and treated Covid infections throughout the world including a 93% reduction in cases in India during their recent surge. See www.FLCCC.net for more details and protocol specifics and Ivermectin study results.

Do not require vaccination for County Employees or the general public as it will cause more harm than good. See the CDC VAERS database showing 12,000 deaths due the Vaccine and thousands of heart and circulatory problems in young men.

Israel Confirmed Cases, June 27 th – July 3 rd , Vaccinated vs. Unvaccinated				
Age Group	Cases, Vaccinated	Cases, Unvaccinated	Percent of Cases Vaccinated	Percent of Population Vaccinated

TO: Los Angeles County Board of Supervisors

FROM: DAVID LAKE

RE: Mandatory Vaccinations

Dear Board members, I am a firefighter/paramedic in the County of Los Angeles, and I strongly oppose any forced or mandatory COVID-19 vaccinations on healthcare workers. During 2020 and early 2021 I did not retreat from my profession to help and treat hundreds of coronavirus patients many which were very severe. During that time I got covid myself, recovered and returned to the battlefield to help coronavirus victims. I did this without a vaccine and feel that my natural anti-bodies are sufficient for any future attacks for years to come. Even top scientist and health officials back this claim. It is astounding to me that you are about to impose a mandate that could lead to the firing or resignation of thousands of healthcare workers that saved thousands if not hundreds of thousands of lives just less than a year ago! Does that make any sense? Step back and just think about that for a minute. That is shameful and even unethical as you will put even more people's lives at risk with less healthcare workers to care for the sick. Not to mention the thousands of healthcare workers that would be out of work.

Mandating vaccines is not the American way and sets up a dangerous precedent. You have the power now in your hands to affect the direction and decisions of future generations to come! Think very carefully what you are about to do and the accountability of that decision that will be tied to you.

The COVID-19 vaccines are NOT effective against the spread of covid, only guards against getting symptoms of the disease. So, to mandate anybody to get the vaccine in order to curb the "spread" of the disease is ludicrous and is not an answer. In fact, persons that have been vaccinated that have covid are more dangerous than unvaccinated persons because the vaccinated person may not know they are spreading it whereas the unvaccinated would more likely self-isolate if they were showing signs of the virus. The vaccines are not FDA approved and is an experimental drug at this time which we do not yet fully understand their consequences. Albeit there have been some serious negative side effects so far that should not be ignored or downplayed. I still would not support mandatory vaccinations even with FDA approval. Vaccinations should be voluntary.

Finally, it is my body and my choice. It is my God given right to say what goes in my body or not. If I am forced to take a vaccine and sustain injury whatsoever, I will hold each of you accountable before God for it as well as my healthcare brothers and sisters.

Sincerely, David Lake

Abstract

Worldwide shortage of vaccination against SARS-CoV-2 infection while the pandemic is still uncontrolled leads many states to the dilemma whether or not to vaccinate previously infected persons. Understanding the level of protection of previous infection compared to that of vaccination is critical for policy making. We analyze an updated individual-level database of the entire population of Israel to assess the protection efficacy of both prior infection and vaccination in preventing subsequent SARS-CoV-2 infection, hospitalization with COVID-19, severe disease, and death due to COVID-19. Vaccination was highly effective with overall estimated efficacy for documented infection of 92.8% (CI:[92.6, 93.0]); hospitalization 94.2% (CI:[93.6, 94.7]); severe illness 94.4% (CI:[93.6, 95.0]); and death 93.7% (CI:[92.5, 94.7]). Similarly, the overall estimated level of protection from prior SARS-CoV-2 infection for documented infection is 94.8% (CI:[94.4, 95.1]); hospitalization 94.1% (CI:[91.9, 95.7]); and severe illness 96.4% (CI:[92.5, 98.3]). Our results question the need to vaccinate previously-infected individuals.

Keywords: vaccine efficacy, COVID-19, SARS-CoV-2, previous infection, protection from reinfection

Introduction

Israel is currently in the later stages of a vaccination campaign to reduce both SARS-CoV-2 infection and the number of COVID-19 cases. Israel is administering the BNT162b2 vaccine, developed by BioNTech in cooperation with Pfizer,¹ for which an Emergency Use Authorization (EUA) was issued by the Food and Drug Administration (FDA).² The vaccine is administered in two doses, with a 21-day interval between doses. Israel launched its COVID-19 vaccination program on December 20, 2020. The vaccine became available, free of charge, to different risk groups in stages: first to those older than 60 years old, nursing home residents, healthcare workers, and patients with severe comorbidities, and then gradually to younger age groups. As of February 6, 2021, the vaccine was made available to all individuals aged 16 or older not previously infected by SARS-CoV-2. As of March 20, 2021, 77% of the eligible population is vaccinated. Due to the high caseload and the local detection of viral mutants such as B.1.1.7, Israel went into a third nationwide lockdown during the vaccination campaign. A light lockdown began on December 24, 2020, and was tightened on January 5, 2021. Restrictions were eased in stages starting February 7, 2021. The dynamics of the epidemic as well as the vaccination campaign appear in Figure 1.

SARS-CoV-2 testing in Israel is carried out according to the following policy: individuals may request testing due to either symptoms or contact with an individual who tested positive. These PCR tests are given free of charge. Individuals who have come into contact with an individual who tested positive are required to self-quarantine for 14 days. This quarantine period may be shortened to 10 days if the individual is tested twice during the first 10 days, and both test results are negative. Individuals who have received both vaccine doses, and had the second dose seven days or more before a contact with a positive individual, and do not have symptoms, are not required to self-quarantine, and thus have

less motivation to get tested. In addition to voluntary testing, Israel conducts routine testing of all nursing-home workers.

Recent results based on aggregated data³⁻⁵ and individual level data⁶⁻¹⁰ have shown that the vaccine substantially reduces the number of severe COVID-19 cases. Two studies also indicate that the viral load of vaccinated individuals is significantly reduced.^{11,12} These encouraging initial results are based on a short follow-up of vaccinated individuals. Results on previous COVID-19 infection¹³⁻¹⁶ suggest protection against reinfection compared to uninfected unvaccinated individuals.

In this study, we estimate the efficacy of the vaccine in the reduction of documented SARS-CoV-2 infection and severe COVID-19 disease. We focus on four cohorts: unvaccinated individuals; vaccinated individuals followed from first dose to a week after the second dose; vaccinated individuals followed from a week after the second dose onwards, and the Recovered Cohort of unvaccinated individuals previously infected with SARS-CoV-2. For more details, see the Methods section. All efficacies, of vaccine or previous infection, are compared to the unvaccinated cohort.

The prospective observational analysis that we present faced several challenges. The first challenge was self-selection of treatment, which implies differences in potential risk factors between vaccinated and non-vaccinated individuals. These include age, sex, socio-demographic level,¹⁷ level of infection in the immediate environment, and possibly other behavioral variables that could affect level of exposure to the virus. The second challenge was detection bias: willingness to undergo vaccination can be associated with trust in the healthcare system, which may also imply a tendency to comply with testing regulations. On the other hand, vaccinated individuals may feel more protected and may ignore mild symptoms indicative of the disease, and have less motivation to get tested as they are not required to self-quarantine after a contact with a positive individual. The third challenge was the variation in infection risk throughout the vaccination campaign, mainly due to varying lockdown levels, relative prevalence of viral mutants, and local outbreaks. Lastly, the status of individuals (i.e., unvaccinated, partially vaccinated, or fully vaccinated) was

dynamic: with time, individuals move from one cohort to another, and between risk groups. In the Methods Section we explain how we designed the analysis to address these challenges.

Methods

Data

The database included two main tables. The first table was of all 1373 municipalities in Israel, with data on the number of residents, the daily count of PCR tests, and the daily positive results. This table was constructed based on data from the Israel Ministry of Health and the Israel Central Bureau of Statistics.

The second table was an individual-level table on persons aged 16 and above collected by the Israeli Ministry of Health based on data received routinely from all HMOs and hospitals and linked using the person's identity number. This table contained basic demographic data and information on dates of first and second vaccinations, if received, and dates and results of all PCR tests performed from March 1, 2020, up to March 20, 2021. For individuals with a positive PCR test, the table contained information on symptoms, as well as the maximum severity status throughout the course of the disease (hospitalization, severe disease, death). The definition of hospitalization, severe disease, and death due to COVID-19 is based on international recommendations.¹⁸ Specifically, hospitalization is defined as being admitted due to COVID-19. Disease is considered severe when a patient has >30 breaths per minute, oxygen saturation on room air $<94\%$, or ratio of arterial 148 partial pressure of oxygen to fraction of inspired oxygen <300 mm mercury. Data on symptoms were also available but we found them less reliable and thus did not include symptomatic COVID-19 as an outcome.

Thus, the table contained an entry for every adult (age ≥ 16) in Israel who had at least one PCR test or had received at least the first dose of the vaccine (with a total of 5,682,928 entries). Adults with no PCR test and no vaccination (668,975) were added to the table using data from the Israel Central Bureau of Statistics. Thus, this second table included

6,351,903 entries with basic demographic data of the total adult population in Israel, as well as their PCR tests and vaccination dates. Individuals under age 16 are not eligible for vaccination and were excluded from this study. A summary of the data appears in Table 1.

To account for environmental risk, we calculated a municipality daily risk index by the number of cases newly confirmed in the past seven days per 10,000 residents. We used a 7-day moving average since the number of PCR tests typically drops at weekends. The index was categorized into four risk levels (up to one, one to four, four to ten, and more than ten daily cases per 10,000) to yield the municipality daily risk category, and was used as a covariate in the risk model.

Behavioral differences among people may result in different levels of exposure to infection and compliance with PCR testing guidelines. We partially accounted for this by counting the number of PCR-test clusters that an individual underwent from March 1, 2020, to December 20, 2020 (i.e., prior to the vaccination program). Here, a PCR-test cluster comprised all consecutive tests performed within 10 days of each other. We then defined three individualized background risk levels: no PCR tests, one cluster, and two or more clusters, and this covariate was also included in the risk model. For previously-infected individuals, we set the level to one cluster and checked sensitivity to this value. Note that the time interval for defining this variable (up to December 20, 2020) did not overlap with the follow-up period.

In addition to estimating vaccine efficacy, we estimated the protection of prior SARS-CoV-2 infection against a recurrent infection. Thus, we also included in the dataset individuals who had recovered from COVID-19. Recovery from SARS-CoV-2 infection is not well-defined, and individuals may continue to show traces of the virus weeks and sometimes even months after the infection.¹⁴ We defined as a recurrent infection only cases occurring three months or more after the first diagnosis. We also considered only individuals for whom the first infection was diagnosed between June 1 and September 30, 2020, as the PCR results before June 1 are considered less reliable. Hence, individuals infected before

June 1, 2020 or between October 1, 2020 and December 20, 2020 were excluded from the analysis.

Statistical Modeling

To estimate the efficacy of the Pfizer BNT162b2 vaccine in reducing documented SARS-CoV-2 infection and other COVID-19 events, we considered four dynamic sub-populations or cohorts:

- Cohort 0: Unvaccinated and not previously infected with SARS-CoV-2;
- Cohort 1: Vaccinated and followed from the day of first vaccination to 6 days after the second dose;
- Cohort 2: Vaccinated and followed from a week after the second dose onwards;
- Recovered: Unvaccinated and previously diagnosed with SARS-CoV-2 between June 1 and September 30, 2020.

On any given calendar day, each individual included in the analysis belongs to a single cohort, but cohort membership is dynamic. Moreover, individuals may not only move between cohorts over time (for example, from cohort 0 to cohort 1 after first vaccination, or from cohort 1 to cohort 2 at 7 days after the second vaccination), but also exit from the follow-up (for example, on infection with SARS-CoV-2 or death). The outcomes hospitalization, severe disease, and death, were attributed to the date on which COVID-19 was documented.

We modeled the daily risk of each individual from December 20, 2020 to March 20, 2021, as a function of calendar time, the cohort to which the individual currently belonged, and the individual's current risk factors, which included fixed covariates: age group (16-39, 40-49, 50-59, 60-69, 70-79, and 80+), sex, and background risk level (0,1, and 2+ past PCR tests), and the time-dependent variable: municipality risk level(low, medium, medium-high,

and high). We refer to each combination of possible covariate values (age group, sex, background risk level, and municipality risk level) as the risk profile.

Our analysis model falls within the framework of multi-state survival models, where each cohort represents a separate state;¹⁹ see Figure S1. Similar to the study of mRNA-1273, the vaccine developed by Moderna,²⁰ we defined the efficacy of the vaccine in terms of hazard ratios, where the main interest is in comparing the hazard of a non-vaccinated individual (Cohort 0) to that of an individual who had completed the recommended protocol (Cohort 2). Hazard ratios between cohorts and for each adjusting covariate were estimated via a generalized linear model with a Poisson distribution and logarithmic link function, and an offset for each risk profile.²¹

Our model assumes that for a given cohort and risk profile, the hazard was constant and did not depend on the time from the second dose (Cohort 2). Obviously, the hazard of individuals who have never received the first dose (Cohort 0) cannot depend on the time of the first dose, but we also assumed that the time elapsed from the second vaccination did not affect the hazard in Cohort 2. In other words, we assumed that the protection level did not change with time after the “completion” of the vaccination protocol. While protection by vaccination is expected to decrease in the long run, our assumption is reasonable given the time frame of only three months after first vaccination, where waning immunity is not expected to play a role. We split Cohort 1 into two sub-cohorts: Cohort 1A from the first dose to two weeks after the first dose, and Cohort 1B from 15 days after the first dose to six days after the second dose. Following Skowronski and De Serres,²² we considered, as a crude approximation, a constant hazard for each of these two sub-cohorts for every risk profile. To estimate the level of protection among the Recovered Cohort, we made a similar assumption, that the time elapsed from SARS-CoV-2 infection did not affect the hazard ratio.

The formal definition of vaccine efficacy adopted was as follows. Consider any particular risk profile. Let h_i denote the hazard of an individual in one of the vaccinated cohorts 1A, 1B, 2, or Recovered, and let h_0 be the hazard of an individual having the identical risk

profile in the unvaccinated group. Efficacy of the vaccine in that cohort for that risk profile is defined as $1 - h_i/h_0$. Note that the calendar time affects the hazards of the different cohorts only via the time-dependence of the municipality risk level. From the model assumptions, the ratio h_i/h_0 is the same for each risk profile, so the estimate of vaccine efficacy may be combined over all the risk profiles. For more details about the model, see Appendix. We analyzed efficacy separately for each of the following outcomes: documented infection, hospitalization, severe disease, and death.

Results

The data are based on follow-up of the four cohorts from December 20, 2020 up to March 20, 2021, with over 573 million person-days of follow-up. The lengths of follow-up for the fully vaccinated and the recovered cohorts appear in Figures S2 and S3, respectively. During this time 4,606,247 PCR tests were performed (8,040 per million person-days), and 306,712 individuals tested positive (5.4 infections per 10,000 person-days). Of those testing positive, 14,019 (4.6%) required hospitalization, 8,463 (2.8%) were defined as severe cases, and 2,727 (0.9%) died. Table 2 presents these numbers by cohort and age group. The numbers of PCR tests performed per million person-days appear in Table 3. There is a decrease in the rate of PCR testing in both Cohort 2 and the Recovered Cohort compared to the other cohorts. This is likely since fully vaccinated or recovered individuals (Cohorts 2 & Recovered) are more protected against SARS-CoV-2 infection. Additionally, people in Israel need to self-quarantine for 14 days after contacting SARS-CoV-2 infected persons, which can be shortened to ten days if they present two negative PCR tests. This is not required for fully vaccinated and recovered persons unless they develop symptoms.

We first investigated the dynamics of the vaccination program, disease outcomes, PCR testing, and municipality risk as a function of calendar time. Figures S4 and S5 present the proportion of vaccinated over time among different age and municipality risk groups, respectively. As can be seen from Figure S4, the Israeli vaccination policy was initially to immunize the older population, and as time progressed, younger age groups. Figure S5 shows the association between environmental risk and vaccination. Figure S6 shows the

rates over time of the different age groups among those tested, infected, hospitalized, having severe disease, and dying. Table 4 shows, by age group, the estimated vaccine efficacy for the main outcomes for Cohort 2 (fully vaccinated) adjusted for sex, municipality risk, and past PCR. Note that for age groups below 60 years, there were, fortunately, none or very few events of severe illness and death, and thus estimates were omitted for these groups. The table shows that vaccine efficacy was quite similar in all age groups with some decrease in efficacy for the 80+ age category. Fitting a model without age-group/cohort interaction yielded overall vaccine efficacy for documented infection of 92.8% (CI: [92.6, 93.0]); hospitalization 94.2% (CI: [93.6, 94.7]); severe illness 94.4% (CI: [93.6, 95.0]); and death 93.7% (CI: [92.5, 94.7]). We repeated the analysis with full vaccination defined as 15 days or more after the second dose. The results are similar (not shown).

Table 5 presents the results for the Recovered Cohort when the past PCR-based individualized risk was set to one PCR cluster. Again, the protection was quite similar in all age groups with some decrease in efficacy for the 80+ age category, and quite similar to the results in Table 4. The overall estimated protection of prior SARS-CoV-2 infection for documented recurrent infection was 94.8% (CI: [94.4, 95.1]); hospitalization 94.1% (CI: [91.9, 95.7]); and severe illness 96.4% (CI: [92.5, 98.3]). As there were only 1 death cases in the Recovered Cohort, protection against death was not estimated.

As described above, we assigned the recovered individuals to the middle PCR risk group, so that the estimated protection of a prior infection is compared to unvaccinated individuals having a single PCR cluster in the past. The protection levels afforded by a prior infection compared to unvaccinated persons who had no or 2+ past PCR tests are given in a sensitivity analysis shown in Table S1. In addition, Table S1 presents results of a model without PCR, which can be interpreted as the overall protection of a prior infection. As expected, the protection of a prior infection compared to unvaccinated persons who did not have past PCR tests is estimated to be smaller and compared to those who had 2+ tests is larger. The results when omitting the PCR variable are very similar to the figures in Table 5.

The results for Cohorts 1A and 1B appear in Tables S2 and S3, respectively. The results up to two weeks after the first dose (Cohort 1A) suggest low but statistically significant efficacy. For Cohort 1B that comprises individuals at more than two weeks after the first dose, the efficacy is higher, being 57.7% (CI: [57.1, 58.4]) for documented infection; 69.4% (CI: [67.5, 71.2]) for hospitalization; 65.9% (CI: [63.1, 68.5]) for severe illness; and 62.7% (CI: [58.0, 66.8]) for death. The coefficients of all four models used for analyzing the data appear in Tables S4-S7.

Discussion

This population-based observational study demonstrates the high efficacy of the BNT162b2 vaccine and prior SARS-CoV-2 infection against both subsequent SARS-CoV-2 infection and other COVID-19–related outcomes. There are a few characteristics that make this study unique. First, it was a nationwide study and thus represented the real-world effectiveness of vaccination and prior infection on the full population. Second, it used individual-level data that enabled, at least to some degree, to mitigate biases caused by selection to get vaccinated, selection to undergo PCR testing, and time-changing level of risk, via adjustment for between-cohort differences in individuals' characteristics and municipality risk level. Third, the study included follow-up of the population for a period of three months, allowing follow-up of the fully vaccinated cohort over an extended duration. Fourth, this is the first large-scale study that has explored the protection due to prior SARS-CoV-2 infection compared to the Pfizer BNT162b2 vaccine.

There are some limitations to this observational study. One major source of confounding is related to possible population differences between individuals who were vaccinated compare to those who were not. This confounding is partially addressed by controlling for risk factors. Specifically, for each individual we adjusted for sex, age group, number of past PCR tests and the time-dependent environmental exposure. Another major source of potential bias is related to detection of SARS-CoV-2 infection. As apparent from the PCR test counts in Table 3, individuals who are fully vaccinated or were previously infected get tested less often than the unvaccinated cohort. Our results for the outcomes of

hospitalization, severe disease, and death do not suffer from this bias and thus are more reliable. The vaccine protection against infection might be biased upward as explained above, nevertheless the remarkable curtailing of the outbreak in Israel which followed the high vaccine uptake by the Israeli population further suggest that the vaccine is efficient in blocking transmission, see Figure 1.

The efficacy estimates of the BNT162b2 vaccine in this study are similar to those reported by previous large-scale studies. For the severe disease outcome, the randomized trial of BNT162b2¹ reported 89% efficacy for severe disease. A study by the Israeli Ministry of Health using aggregated data⁵ reported 96% efficacy for people as defined in our Cohort 2. A study on data from Israel's largest HMO⁶ split people as defined in our Cohort 1B and reported an efficacy of 62% and 80% for the third and fourth weeks after the first vaccine, respectively, and of 92% for their Cohort 2. In comparison, our analysis showed efficacy of 66% for Cohort 1B and 94% for Cohort 2. For other outcomes, the estimated vaccine efficacy for Cohort 2 in our study were 93% and 94%, for documented infection and hospitalization, respectively. These estimates are similar to previous studies^{5,6} that estimated efficacy of 92% and 96% for documented infection, and of 87% and 96% for hospitalization. Our findings are based on a longer follow-up and a larger number of event than in the previous individual-level data reports. For example, the analysis of severe cases in the randomized clinical trial is based on only 10 cases, and that of Israel's largest HMO on 229.⁶ In comparison, the analysis in our study is based on 8,463 cases, including 2,240 cases from Cohort 1 and 319 cases from Cohort 2. On the other hand, the other two studies^{1,6} have the respective advantages of randomization and a detailed matching process which help in bias reduction.

The estimated protection against reinfection in this study is similar to that of the BNT162b2 vaccine. For documented SARS-CoV-2 reinfection, these results are similar to the results obtained in a large study from Qatar of 95% protection,¹³ and suggest higher protection than reported by other previous studies. A large study from Denmark¹⁴ suggested 80% protection against reinfection. A study on healthcare workers in the United Kingdom¹⁶ reported that previous infection was associated with an 83% lower risk of infection. These

two studies are based on 11,727 and 6,614 previously infected individuals, with 72 and 44 reinfections, respectively. In comparison, the Recovered cohort in our study comprised 187,549 individuals, with 894 reinfections. One possible reason for the differences in the estimated protection against reinfection could be related to detection bias of SARS-CoV-2 infection. However, our estimated high levels of protection against hospitalization and serious disease after reinfection are unlikely to be affected by detection bias, and are reassuring.

An important assumption made here is that rates of infection or hazards are independent of time from vaccination. However, the rate of infection is expected to depend on time from vaccination or on time from first infection. Studying the hazard as a function of time is crucial for understanding waning immunity and for the need for additional booster vaccinations. Follow-up is currently too short to answer time-dependent questions, but this is a crucial and required next step that can be answered using the national Israeli data in the future. The hazard may also depend on calendar time, not only via environmental exposure, but also because of new variants appearing, against which, the vaccine may have different efficacy. During the period over which the data were collected, the COVID-19 variant B.1.1.7 was by far the most prevalent variant, and accounted for most of the documented cases, hence the approximation of a constant hazard is justified. Yet, it is of great importance to repeat this study in other populations in order to estimate the efficacy for other variants and vaccines.

This study suggests that both the BNT162b2 vaccine and prior SARS-CoV-2 infection are effective against both subsequent SARS-CoV-2 infection and other COVID-19–related outcomes. Moreover, the effectiveness seems similar for both cohorts. This puts into question the need to vaccinate recent (up to six month) previously-infected individuals.

Contributors

LF, YG, AH and MM were responsible for study design and for writing of the manuscript. RF, YG, MM, IN, YW, RY, and AZ analyzed the data. YW and AZ were responsible for collecting the data and for data management. LF, YG, AH and MM did the literature survey. LF, RF, YG, MM, and IN developed the mathematical model. YG and YW developed the software for analyzing the data. All authors interpreted the data and reviewed the draft and final versions of the manuscript.

Ethics statement

The study was approved by the Institutional Review Board of the Sheba Medical Center. Helsinki approval number: SMC-8228-21

Funding

None

Competing interests statement

All authors declare no competing interests.

Data sharing

The data used in this study are sensitive and will not be made publicly available.

Acknowledgments

The authors would like to thank Guy Katriel for fruitful discussions.

Table 1: Population level data. Columns Male, Female, and Total are in thousands.

Columns PCR tests, Positive tests, Hospitalized, Severe, and Death, are the counts during the period December 20, 2020 to March 20, 2021.

Age	Male	Female	Total	PCR	Positive	Hospitalization	Severe	Death
16-39	1,513	1,484	2,997	2,414,803	183,617	2,722	684	44
40-49	531	542	1,073	810,988	49,373	1,614	814	64

Table 4: Vaccination efficacy. Vaccination efficacy for the different age groups adjusted for sex, municipality risk, and past PCR. The overall estimates are based on models without cohort-age interaction. Estimates are not provided for Severe and Death outcomes for the lowest age groups due to very low case numbers in the vaccinated cohorts.

Age	Positive	Hospitalized	Severe	Death
16-39	95.1% [94.8, 95.4]	96.5% [93.8, 98.0]	—	—
40-49	92.5% [92.0, 93.0]	94.4% [91.7, 96.2]	—	—
50-59	92.7% [92.2, 93.1]	95.0% [93.3, 96.3]	—	—
60-69	92.4% [91.9, 92.9]	96.1% [95.1, 97.0]	96.4% [95.1, 97.3]	94.0% [90.4, 96.2]
70-79	92.2% [91.6, 92.8]	94.8% [93.8, 95.6]	95.5% [94.5, 96.4]	95.4% [93.5, 96.7]
80+	85.6% [84.3, 86.7]	91.2% [89.8, 92.4]	91.9% [90.4, 93.2]	92.6% [90.6, 94.1]
Overall	92.8% [92.6, 93.0]	94.2% [93.6, 94.7]	94.4% [93.6, 95.0]	93.7% [92.5, 94.7]

Table 5: Protection of prior SARS-CoV-2 infection. Protection of prior SARS-CoV-2 infection for the different age groups adjusted for sex, municipality risk, and past PCR. The overall estimates are based on models without cohort-age interaction. Estimates are not provided for Severe outcomes for the lowest age groups and for Death for all age groups due to very low case numbers in the previously-infected cohorts.

Age	Positive	Hospitalized	Severe
16-39	94.5% [94.1, 94.9]	92.8% [87.3, 95.9]	—
40-49	95.1% [94.2, 95.9]	95.4% [87.7, 98.3]	—
50-59	95.2% [94.1, 96.1]	93.9% [87.1, 97.1]	—
60-69	96.1% [94.6, 97.2]	95.7% [89.6, 98.2]	96.1% [87.8, 98.7]
70-79	97.0% [94.7, 98.3]	94.1% [86.8, 97.3]	98.7% [90.5, 99.8]
80+	91.4% [85.5, 94.9]	94.2% [84.5, 97.8]	94.2% [81.9, 98.1]
Overall	94.8% [94.4, 95.1]	94.1% [91.9, 95.7]	96.4% [92.5, 98.3]

Figure 1: Population dynamics. Documented new infections and cumulative vaccinated persons by date. The study period and the infection period of the recovered cohorts are marked by vertical lines.

Web Appendix: The Statistical Model

We define the efficacy of the vaccine in terms of hazard ratios. We use the following constant hazard models to describe the dynamics of an uninfected individual risk over time (calendar time and time from vaccination), where, in the most general model, each cohort has different coefficients:

$$h_i(x) = \exp\{\alpha_i + \beta_i^T x\} \quad i = 0, 1A, 1B, 2, \text{Recovered}.$$

Here x indicates a set of risk factors of an individual, including time dependent variables (municipality risk). While the model above is quite general, enabling different coefficients for the different cohorts, our basic model restricts the coefficients of sex, past PCR tests and municipality risk to be equal among the cohorts. Specifically, let

$$\beta_i^T x = \beta_{i,age} \times \text{Age} + \beta_{i,sex} \times \text{Sex} + \beta_{i,ppcr} \times \text{Past PCR} + \beta_{i,risk} \times \text{Municipal risk},$$

We assume that for $i = 0, 1A, 1B, 2, \text{Recovered}$,

$$\beta_{i,sex} = \beta_{sex}, \quad \beta_{i,ppcr} = \beta_{ppcr}, \quad \text{and} \quad \beta_{i,risk} = \beta_{risk}.$$

Thus, the effect of sex, past PCR test, and municipal risk on efficacy is multiplicative and identical among cohorts. However, efficacy may vary between different age groups.

The constant hazard assumption implies underlying exponential event-free models for these cohorts, with time-dependent covariates. The analysis can be carried out by performing Poisson regression with offsets for each risk profile. Specifically, consider a group of individuals' days in Cohort i with a certain risk profile x_0 (here the profile also includes time-dependent covariates, so only days satisfying x_0 count). The response variable is 'case count' – the number of cases among these individuals' days, and the exposure is the sum of all at-risk days for individuals with cohort and risk-profile combination (i, x_0) . Thus, the model implies

$$\frac{E(\text{case count} \mid x_0, \text{at-risk days})}{\text{at-risk days}} = \exp\{\beta_i^T x_0\}.$$

In other words, the daily hazard for an event for an individual in Cohort i and risk profile x , denoted by $h_{i,x}$, is $e^{\beta_i^T x}$. The relative risk for Cohort $i = 2$ with risk profile x is defined as $h_{2,x}/h_{0,x}$, and the efficacy is defined as $1 - h_{2,x}/h_{0,x}$. Under the assumption of equal coefficients for sex, past PCR tests and municipality risk, the relative efficacy depends only on the age group.

Technically, in order to estimate the coefficients in the model, we create a working dataset as follows. For each combination of cohort, age group, sex, municipality risk level, and individualized risk level, we count the number of COVID-19 events and the number of at-risk days. Consider, for example, a 56-year-old male who lives in Tel Aviv, had 1 negative PCR test before December 20, 2020, received his first dose on January 1, 2021, and his second dose on January 23, 2020, and tested positive on February 8, 2021. Assume that the Tel Aviv risk level was category 1 during the period December 20, 2020 to January 20, 2021, category 2 from January 21, 2021 until the end of follow-up on February 8, 2021. This person contributes:

1. 11 days (Dec-20 to Dec-31) and 0 events to the group:
cohort_0/50-60/male/mun_risk=1/past_pcr=1
2. 14 days (Jan-1 to Jan-14) and 0 events to the group:
cohort_1A/50-60/male/mun_risk=1/past_pcr=1
3. 6 days (Jan-15 to Jan-20) and 0 events to the group:
cohort_1B/50-60/male/mun_risk=1/past_pcr=1
4. 9 days (Jan-21 to Jan-29) and 0 events to the group:
cohort_1B/50-60/male/mun_risk=2/past_pcr=1
5. 10 days (Jan-30 to Feb-8) and 1 event to the group:
cohort_2/50-60/male/mun_risk=2/past_pcr=1

Figure S1: The dynamics of the cohort model. Solid arrows indicate possible transitions between cohorts. Dashed arrows indicate possible disease outcomes.

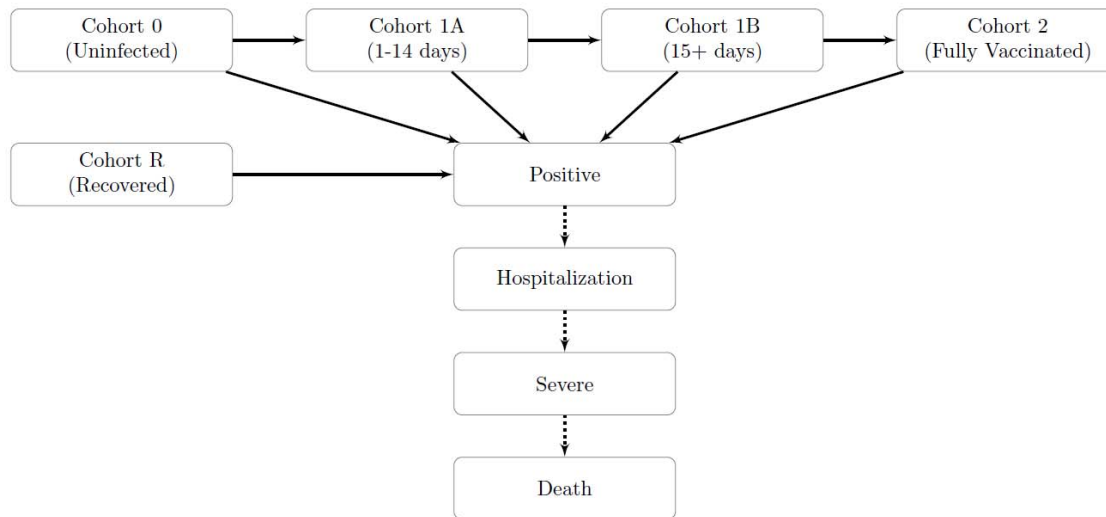

Figure S2: Length of follow-up for Cohort 2. Length of follow-up for Cohort 2 of the fully vaccinated, according to age group. Vaccination became available first to the 60+ age groups and then gradually to younger age groups as can be seen from the follow-up counts.

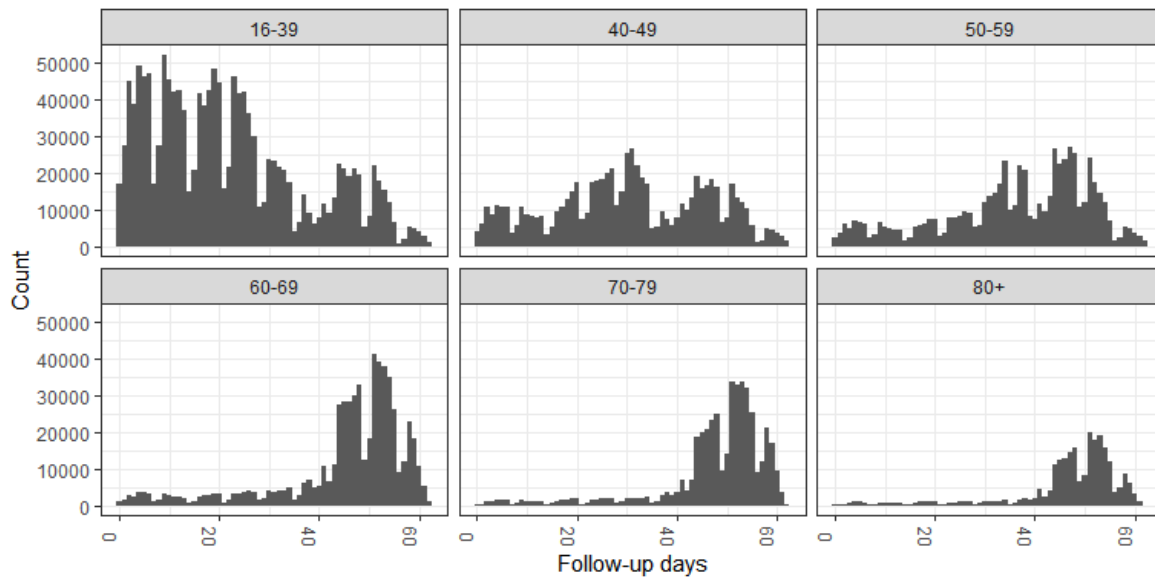

Figure S3: Length of follow-up for the Recovered Cohort. Length of follow-up from first positive PCR test for the Recovered Cohort, according to age group. This cohort included individuals that had a positive PCR test between June 1 and September 30, 2020. Note the sharp decrease in counts as a function of the follow-up. Note that each subfigure has a different scale.

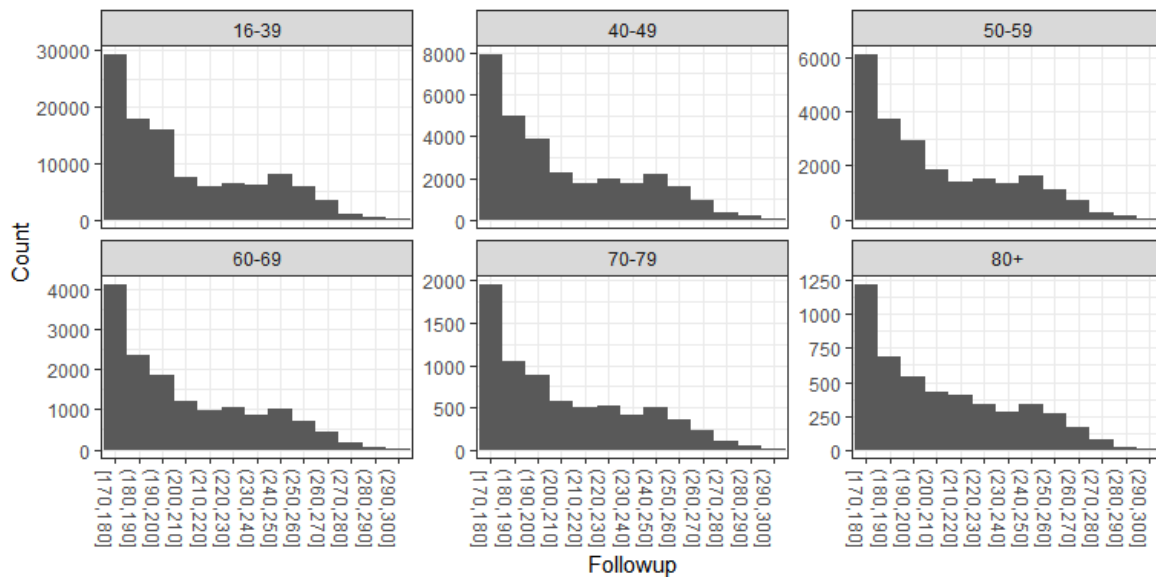

Figure S4: Vaccination by age. Percent of individuals vaccinated with the first and the second dose, by age group. The vaccination initiated in the 60+ age group. See text for details.

Figure S5: Vaccination by municipality risk. Percent of individuals vaccinated with the first and the second dose, by municipality risk group. The municipality risk was calculated as the median of the daily risk over the research period. Note that there is a negative correlation between vaccine coverage and risk group.

Figure S6: Events over time. Cases per 100,000, smoothed using seven-day moving average for the different age groups and the outcomes: PCR tests, documented infection cases, hospitalized cases, severe cases, and deaths.

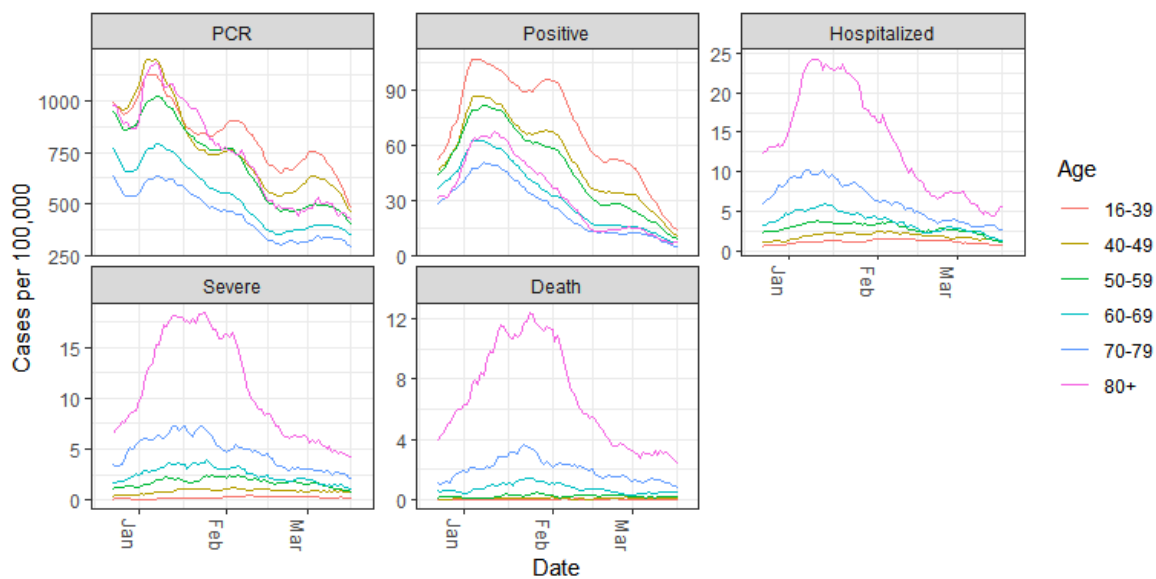

Table S1: Sensitivity analysis of past PCR on prior SARS-CoV-2 infection. Protection of prior SARS-CoV-2 infection for the different age groups. The model was fitted when the number of PCR clusters is assigned to be 0, 1, 2+, and omitted.

Analysis	Age	Positive	Hospitalized	Severe
