AMA elisa kit :: Human Anti-Myocardial Antibody (AMA) ELISA Kit

Catalog #

MBS261398

Unit / Price

- 48-Strip-Wells / \$260 +1 FREE 8GB USB
- 96-Strip-Wells / \$405 +1 FREE 8GB USB
- 5x96-Strip-Wells / \$1,615 +2 FREE 8GB USB
- 10x96-Strip-Wells / \$2,880 +3 FREE 8GB USB

Product Name

Anti-Myocardial Antibody (AMA), ELISA Kit

Full Product Name

Human Anti-Myocardial Antibody (AMA) ELISA Kit

Product Gene Name

AMA elisa kit

Research Use Only

For Research Use Only. Not for use in diagnostic procedures.

Species Reactivity

Human

Preparation and Storage

Store all reagents at 2-8 degree C.

Product Note

Select online data sheet information is drawn from bioinformatics databases, occasionally resulting in ambiguous or non-relevant product information. It is the responsibility of the customer to review, verify, and evaluate the information to make sure it matches their requirements before purchasing the kit. Our ELISA Kit assays are dynamic research tools and sometimes they may be updated and improved. If the format of this assay is important to you then please request the current manual or contact our [technical support team](#) with a presales inquiry before placing an order. We will confirm the current details of the assay. We cannot guarantee the sample manual posted online is the most current manual.

Other Notes

Small volumes of AMA elisa kit vial(s) may occasionally become entrapped in the seal of the product vial during shipment and storage. If necessary, briefly centrifuge the vial on a tabletop centrifuge to break the vial's seal. Do not touch the container's cap. Certain products may require to ship with dry ice and additional dry ice

Searchable Terms for AMA purchase

MBS261398 is a ready-to-use microwell, strip plate ELISA (enzyme-linked immunosorbent assay) Kit for analyzing the presence of the Anti-Myocardial Antibody (AMA) ELISA Kit target analytes in biological samples. The concentration gradients of the kit standards or positive controls render a theoretical kit detection range in biological research samples containing AMA. The ELISA analytical biochemical technique of the MBS261398 kit is based on AMA antibody-AMA antigen interactions (immunosorbency) and an HRP colorimetric detection system to detect AMA antigen targets in samples. The ELISA Kit is designed to detect native, not recombinant, AMA. Appropriate sample types may include undiluted body fluids and/or tissue homogenates, secretions. Quality control assays assessing reproducibility identified the intra-assay CV (%) and inter-assay CV(%).
