

Liberator[®] 10

Liquid Oxygen Reservoir

Small and Compact

CAIRE's Liberator 10 is the most easily transported oxygen reservoir available. The Liberator 10 was designed with the active patient in mind. The smaller diameter, short profile and light weight make the Liberator 10 easy to move around. Besides maximizing patient convenience, the unit also optimizes oxygen distribution for greater profitability.

The Liberator 10 is available in all popular industry standard fill connectors. All controls (including the easy to read LED contents meter) come mounted on top for quick reference and ease of operation. The Liberator 10 is also designed to support CAIRE's fast fill procedure. The side flip handles allow the unit to be both easily carried and secured in a vehicle for travel. The unit is also backed by CAIRE's standard five-year vacuum warranty.

Features

- 10.7 L capacity
- 68 hours of operation at 2 LPM
- 0-6 LPM flow rate
- Fill time 2.0 minutes warm; 0.54 minutes cold
- 5-year vacuum warranty
- Lightweight & easily transported
- Rugged & reliable
- Compatible with all CAIRE, Inc.'s side and top fill portables
