

©MN DNR, C. Iverson

Black Bullhead

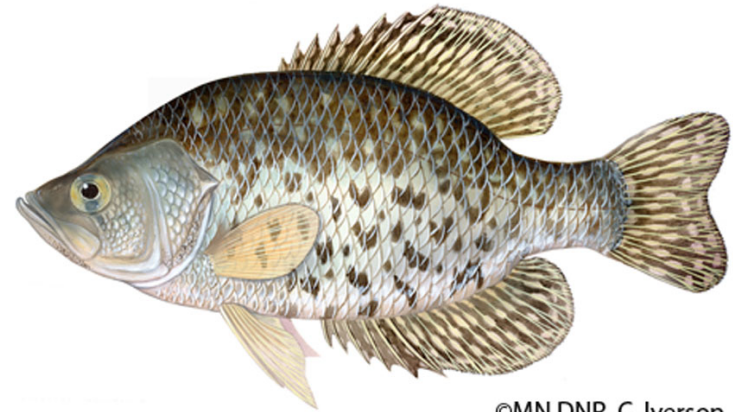

Ameiurus melas

Body Shape: Flat-bottomed

Fins: Small dorsal fin center of back; (one spine and soft rays) adipose fin near tail

Unique Traits: Barbels (“whiskers”) near mouth

Scales: Absent

©MN DNR, C. Iverson

Black Crappie

Pomoxis nigromaculatus

Body Shape: Pan-Shaped

Fins: Connected two-part dorsal fin (sharp spines and soft rays)

Scales: Present

©MN DNR, C. Iverson

Bluegill

Lepomis macrochirus

Body Shape: Pan-Shaped

Fins: Connected two-part dorsal fin (sharp spines and soft rays)

Scales: Present

©MN DNR, C. Iverson

Brook Trout

Salvelinus fontinalis

Body Shape: Torpedo-shaped

Fins: Small dorsal fin center of back; (soft rays) adipose fin near tail

Scales: Present; very small

©MN DNR, C. Iverson

Brown Bullhead

Ameiurus nebulosus

Body Shape: Flat-bottomed

Fins: Small dorsal fin center of back; (one spine and soft rays) adipose fin near tail

Unique Traits: Barbels (“whiskers”) near mouth

Scales: Absent

©MN DNR, C. Iverson

Channel Catfish

Ictalurus punctatus

Body Shape: Flat-bottomed

Fins: Small dorsal fin center of back; (one spine and soft rays) adipose fin near tail

Unique Traits: Barbels (“whiskers”) near mouth

Scales: Absent

©MN DNR, C. Iverson

Coho Salmon

Oncorhynchus kisutch

Body Shape: Torpedo-shaped

Fins: Small dorsal fin center of back; (soft rays) adipose fin near tail

Scales: Present; very small

©MN DNR, C. Iverson

Flathead Catfish

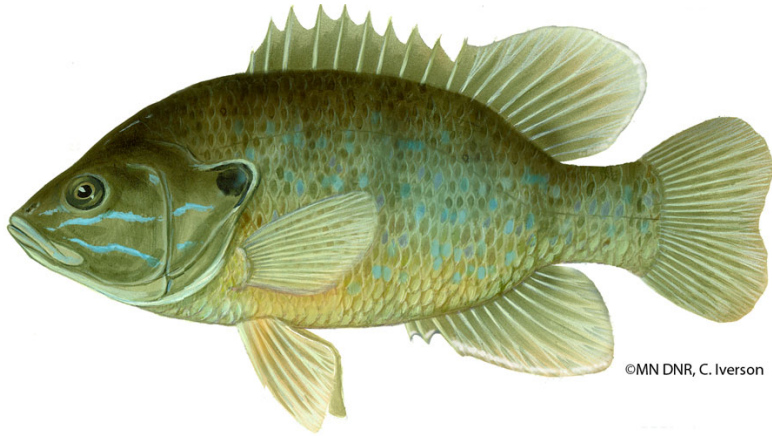

Pylodictis olivaris

Body Shape: Flat-bottomed

Fins: Small dorsal fin center of back; (one spine and soft rays) adipose fin near tail

Unique Traits: Barbels (“whiskers”) near mouth

Scales: Absent

©MN DNR, C. Iverson

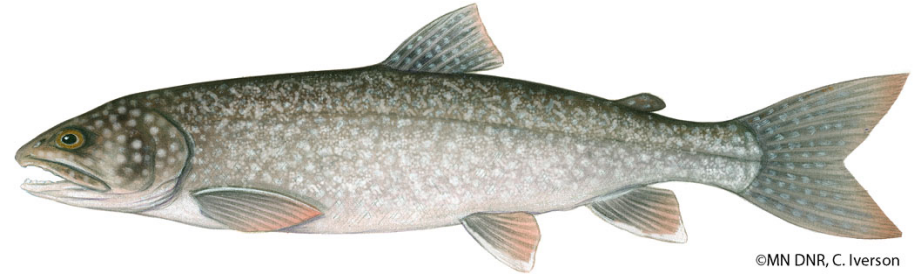

Green Sunfish

Lepomis cyanellus

Body Shape: Pan-Shaped

Fins: Connected two-part dorsal fin (sharp spines and soft rays)

Scales: Present

©MN DNR, C. Iverson

Lake Trout

Salvelinus namaycush

Body Shape: Torpedo-shaped

Fins: Small dorsal fin center of back; (soft rays) adipose fin near tail

Scales: Present; very small

©MN DNR, C. Iverson

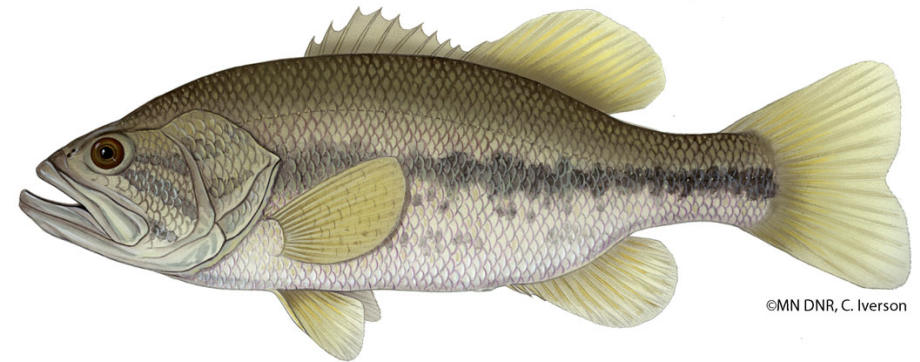

Lake Whitefish

Coregonus clupeaformis

Body Shape: Torpedo-shaped

Fins: Small dorsal fin center of back; (soft rays) adipose fin near tail

Scales: Present; very small

©MN DNR, C. Iverson

Largemouth Bass

Micropterus salmoides

Body Shape: Pan-Shaped

Fins: Connected two-part dorsal fin (sharp spines and soft rays)

Scales: Present

©MN DNR, C. Iverson

Muskellunge

Esox masquinongy

Body Shape: Torpedo-shaped

Fins: Small dorsal fin near tail (soft rays)

Unique Traits: Duckbilled mouth, sharp teeth

Scales: Present

©MN DNR, C. Iverson

Northern Pike

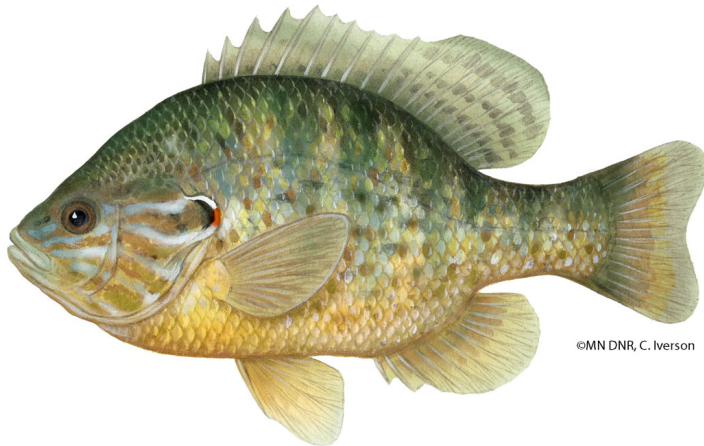

Esox lucius

Body Shape: Torpedo-shaped

Fins: Small dorsal fin near tail (soft rays)

Unique Traits: Duckbilled mouth, sharp teeth

Scales: Present

©MN DNR, C. Iverson

Pumpkinseed

Lepomis gibbosus

Body Shape: Pan-Shaped

Fins: Connected two-part dorsal fin (sharp spines and soft rays)

Scales: Present

©MN DNR, C. Iverson

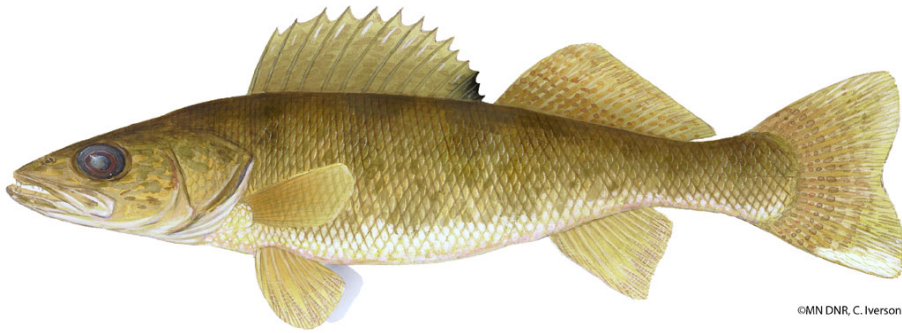

Smallmouth Bass

Micropterus dolomieu

Body Shape: Pan-Shaped

Fins: Connected two-part dorsal fin (sharp spines and soft rays)

Scales: Present

©MN DNR, C. Iverson

Walleye

Sander vitreum

Body Shape: Torpedo-shaped

Fins: Separated two-part dorsal fin (sharp spines and soft rays)

Unique Traits: Sharp teeth

Scales: Present

©MN DNR, C. Iverson

Yellow Bullhead

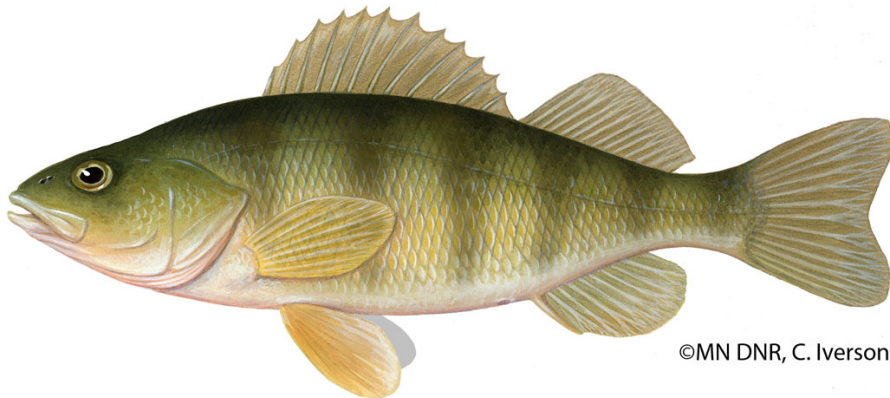

Ameiurus natalis

Body Shape: Flat-bottomed

Fins: Small dorsal fin center of back; (one spine and soft rays) adipose fin near tail

Unique Traits: Barbels (“whiskers”) near mouth

Scales: Absent

©MN DNR, C. Iverson

Yellow Perch

Perca flavescens

Body Shape: Torpedo-shaped

Fins: Separated two-part dorsal fin (sharp spines and soft rays)

Unique Traits: Sharp teeth

Scales: Present

Pike Family: *Esocidae*

Members of this family have torpedo-shaped bodies, a small one-part dorsal fin near the tail, and duck-billed snout.

Catfish Family:

Ictaluridae

Members of this family have flat undersides, an adipose fin near the tail, no scales and barbels (“whiskers”) on their faces.

Trout and Salmon Family: *Salmonidae*

Members of this family have torpedo-shaped bodies and an adipose fin near the tail.

Sunfish Family:

Centrarchidae

Members of this family have pan-shaped bodies and a connected two-part dorsal fin (sharp spines and soft rays).

Perch Family:

Percidae

Members of this family have torpedo-shaped bodies and a separated two-part dorsal fin (sharp spines and soft rays).
