NAME	BLOOM TIME		FLOWER COLOR	SIZE Spacing x Height x Bloom Height		DESCRIPTION
Ageratum	Apr-May		Blue	6" x 6"	18 ct	Little powder puff like flowers cover these small mounding plants. Great for borders or mixed pots. Flowers fade in late summer.
Alocasia 'Borneo Giant'				4-5' X 6'	10"	Huge arrow shaped leaves, grow 2-3' across. Leaves point heavenward on thick sturdy stems. Rich, fertile, moist soil is required. Sunnier locations require larger amounts of water.
Alocasia 'Malaysian Monster'				4-5 X 6'	10"	Giant, heavily lobed leaves that resemble split leaf philodendron. The stems are very stout and strong. A very exotic specimen plant.
Alocasia 'Mayan Mask'				4' x 6'	10"	Has giant wavy, dark green leaves, pale green veins and maroon undersides, all held on stout stems. Leaves start by pointing upwards and as new leaves emerge, the older leaves will arch over and let the new leaves point upwards.
Alyssum	Oct-May		Lavender, Purple, White	9" x 4"	18 ct	Covered with clusters of tiny sweetly fragrant flowers. Looks best during the cool season.
Alyssum lobularia	Mar-Nov		White, Purple	10" x 6"	8 ct	Largest and most heat tolerant of annual Alyssum. Heavily scented. Doesn't set seed, so the flowers just keep coming. Keep hydrated in summer.
Angelonia	May-Oct		Purple, White, Mix	12" x 15" x 24"	18 ct # 1	Lacey flower spikes. A compact variety and also a larger blooming variety are available. Keeps blooming all summer. Loves the north Texas heat.
Asclepias curassavica Scarlet Milkweed	May-Aug		Red and Orange	24" x 36" x 36"	# 1	Bright flowers are born in terminal and axillary clusters between 2"-4" across. Long narrow opposite leaves. Produces a pod which splits open and reveals seeds attached to silky threads that fly with the wind. Can grow in dry or moist conditions. In north Texas A. curassavica is a re-seeding annual. The Monarch and Queen butterflies lay eggs on the leaves, then the larvae feed on the milky foliage. Flowers are a great source for nectar.
Asparagus Fern, Sprengeri				18" x 18"	10" 8 ct	Open, airy and trailing, glossy green needle-like foliage. Great in pots and in beds as filler or alone. Will come back in mild winters.
Asparagus Fern, Foxtail				18" x 18"	8 ct # 1	Tight and densely packed needle-like leaves along upright arching branches that arise from a central point. Tiny white flowers give way to bright red berries. Be careful of thorns. Slower grower than Sprengeri.
Begonia Dragon Wing	Apr-Oct		Pink, Red	12" x 15"	8 ct	Very showy. Dangling clusters of large begonia flowers hang down from angel wing-like foliage.
Begonia Wax Leaf	Apr-Oct		Rose, Scarlet, White	9-12" x 12-18"	18 ct # 1	Bronze foliage varieties are generally planted in sun and green foliage varieties in the shade. Larger leaf varieties such as "Whopper" grow much larger.
Blackfoot Daisy	Apr-Nov		White	24" x 10" x 10"	8 ct	Low round bushy plant continually covered with happy little 1" daisy flowers. Will not tolerate wet soil. Tough Texas native. Great xeric plant. Also used as a short lived perennial.
Bluebonnet	Mar-Apr		Blue	12" x 18" x 24"	18 ct # 1	State flower of Texas. Mounds of blue flower spikes in the spring. Needs 8-10 hours of direct sun. Most any soil, as long as it is well drained. Interplants well with pansies.
Bougainvillea 'Vera' series	Jun-Oct		Purple Pink		# 1	This bougainvillea is unique in that it is more compact and upright than its' sprawling vine-like kinfolk. Also, the bloom clusters form balls of flowers making for a different look. Great in containers. Traditional varieties are also available.
Cabbage Ornamental				16" x 12"	18 ct # 1	Colorful winter foliage plant. Large flat leaves form showy cabbages of white or red. Leaf color is intensified with cooler temperatures.
Caesalpinia pulcherrima 'Pride of Barbados'	Jun-Oct		Orange-yellow-red	3' x 3-4'	10"	Native to tropical America, hardy to zone 9. An annual in north Texas. Very showy Poinciana-like blooms of orange and yellow with prominent red stamens. Twice pinnate leaves and sharp prickles on the stems. Makes a small bush before it freezes in north Texas.
Caladium				12" x 12" - 36"	18 ct 18 ct	Arrowhead like foliage with a wide variety of patterns and colors. The different varieties coming in varying degrees of sun tolerance.
Candle Tree	Aug-Oct		Golden Yellow	6' x 6'	# 1	Large showy spikes resembling candelabras cover this mounding shrub in late summer and fall. Leaves fold together at night.

<b>Cardoon</b> ( <i>Cynara cardunculus</i> )	May-June		Purple	5' x 5' x 5'	# 1	Very architectural and bold texture. Arching gray-green tomentose leaves form a statuesque vase. Giant thistle like blooms add to the overall unique character. Must have well drained soil. It has a large deep taproot. Young unopened flowers can be prepared and eaten like an artichoke. Planted in fall and used for its winter foliage.
<b>Celosia</b>	Apr-Aug		Red, Gold, Orange	8" x 10" x 16"	18 ct	Bright Tongues of Fire best describes these unique heat-loving flowers. Bronze and green leaf varieties are available.
<b>Cheiranthus Wallflower</b>	Oct-Apr		Mix, Yellow	15" x 15"	18 ct	Terminal clusters of bright, fragrant flowers add something different to your cool season pots and beds. Maybe the closest rival to pansies for winter color.
<b>Citronella Scented Geranium</b>	May-Aug		White/Pink	18" X 24"	# 1	Citronella scented lacy, but coarse leaves. Some people crush the leaves and rub it on their skin to repel mosquitoes. Prefers afternoon shade when the temps rise. Likes moist, well drained soils.
<b>Chrysanthemum Garden Mum</b>	Oct-Nov		Variety of Colors	18" x 15"	8" 10"	Glorious floral display of limitless colors and flower types. A fall tradition. Can be used as a perennial.
<b>Coleus</b>				12"-18" x 24"-36"	18 ct 8 ct	A vigorous foliage plant with endless colors and patterns among the many varieties. Most thrive in bright shade and many varieties perform well in full sun if kept moist.
<b>Columbine 'Origami Mix'</b>	Mar-May		Blue, Rose, Yellow	12" x 14" x 16"	18 ct	This columbine is very uniform and compact in habit. Used as a cool season annual in north Texas. Unusual showy spurred flowers. One of the most floriferous of the varieties.
<b>Cordylone</b>			Foliage	18" x 24" - 36"	# 1	Brightly colored foliage with a growth habit much like that of a dracaena. Needs good light to maintain color, however in extreme heat, shade needed.
<b>Croton</b>			Foliage	18" x 24"	# 1 10"	Tropical foliage plant with multi-colored waxy leaves. Crotons go well in late summer and fall color schemes as well as spring landscapes.
<b>Cuphea hyssopifolia Mexican Heather</b>	Apr-Oct		Purple	9" x 12"	18 ct	Also called Mexican Heather because of its heather-like growth and small flowers. Thrives in Texas sun and heat.
<b>Cyclamen</b>	Dec-May		Red, Pink, Purple, White	8" x 8"	8 ct	A tender cool season plant, that requires protection from hard frosts and freezes. Attractive heart-shaped leaves are topped with bright flowers.
<b>Dahlberg Daisy</b>	Apr-Oct		Golden-Yellow	9" x 3-4"	18 ct	Low growing. Soft and finely cut foliage covered with small daisy-like flowers. Loves our heat. Texas native.
<b>Delphinium</b>	Apr-May		Blue, Lavender, White	1' x 1' x 2-3'	18 ct # 1	Very showy flower spikes rise from a basal rosette. Lends vertical accent to the garden. Best show if planted in the fall.
<b>Dianella tasmanica "Variegata" Variegated Flax Lily</b>	Mar-Apr		Blue	12" x 15-18"	# 1	Upright strap leaves with creamy striped edges. Small panicles of flowers in spring. Likes afternoon shade. Foliage will die down around 25 degrees.
<b>Dianthus</b>	Mar-Nov		Red, Rose, Violet, White, Salmon	9" x 8-9"	18 ct	A very durable cool season plant often used as a short-lived perennial. Blooms mainly in the fall and spring.
<b>Dichondra argentea 'Silver Falls' Silver Ponyfoot</b>				6" x 1"	18 ct	Cascading silver leaves, resembling tiny silver coins. Is stunning falling over hanging baskets and urns.
<b>Dracaena 'Spike'</b>				8" x 12"	18 ct	Vertical foliar accent. Excellent for color bowls and pots.
<b>Dusty Miller 'Cirrus'</b>				9" x 9"	18 ct	Fuzzy silver leaves and stems. Is a hardy cool season annual. Cirrus has wider and less finely cut leaves than traditional Dusty Miller. Offers a nice contrast of color and texture in beds and in pots.
<b>Dusty Miller 'Silver Dust'</b>				9" x 9"	18 ct	Fuzzy silver leaves and stems. Is a hardy cool season annual. 'Silver Dust' has more finely cut textured leaves. Offers a nice contrast of color and texture in beds and in pots.
<b>Ensete v. Maurelii Red Abyssinian Banana</b>				5' x 5'	10"	Striking red/green leaves. Inedible fruit. Does not sucker. Likes rich moist soil. Needs shade in hottest part of summer. Will freeze in north Texas.
<b>Esperanza</b>	May-Oct		Yellow	2' x 4-5'	# 1 10"	Deep green foliage with large clusters of bell-shaped flowers. This plant LOVES hot Texas summers. Deadheading helps performance. Can perennialize if mulched well in winter.
<b>Euphorbia 'Manaus'</b>	Apr-Nov		White	9" x 12"	8 ct	Heat and drought tolerant. Tiny gray-green leaves are filled with an unstoppable frothy drift of delicate blooms. Superb filler plant and combines well with most other annuals.
<b>Euphorbia milii Crown of Thorns</b>	Apr-Nov		Pink, Red	18" x 18"	# 1	Compact and slow growing crown of thorns. Needs well drained soil. They are 'Good Luck' for Thai people in Bangkok, where they collect hundreds of different varieties. Great non-stop color for summer.
<b>Euryops Daisy</b>	Mar-June		Yellow	18" x 24"	# 1	Cheerful daisies intermingled with lacy leaves add color in the cooler temperatures of spring.
<b>Evolvulus</b>	May-Oct		Blue	9" x 4"	18ct # 1	Good for front of the bed or trailing over walls. Gray-green leaves. It loves the summer heat.
<b>Firebush</b>	Jun-Oct		Orange	18" x 36"	# 1 10"	Sun and heat loving with clusters of tubular flowers that hummingbirds love. Can perennialize if well mulched.
<b>Foxglove</b>	Apr-May		Assorted	24" x 18"x 36"-48"	18 ct # 1	Plant in the fall for a lovely spring display of spotted bell shaped flowers born on spikes rising from a large rosette of leaves. Very showy. Worth the wait.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
Fuchsia 'Gartenmeister'	April-Aug	Orange	12" x 18" # 1	An upright fuchsia. Bronzy foliage and pendulous tubular flowers. Can take north Texas heat. Likes bright indirect light. Needs shade in north Texas summers.
Galphimia gracilis (Thryallis)	Jun-Oct	Yellow	2' x 3" # 1 10"	Heat and sun loving tropical shrub. Delicate flower spikes of yellow stars on pretty bronze stems. Very good for Texas summers. May come back if the winter is mild and/or mulched well.
Gazania	Mar-May	Yellow, Orange, Pink, Mix	8" x 8" 18 ct	Large 3" colorful daisy type flowers grow on short stems. The flowers are sun worshippers...they are open in the day and are closed at night.
Geranium	Mar-Jun	Variety of Colors	10" x 10" x 15"-18" 8 ct # 1	Large globular flower cluster are held high over attractive round foliage. Heat tolerant hybrids are available that will last better through the hot Texas summers. If possible pull pots into bright shade for longevity.
Gerbera Daisy	Apr-Oct	Variety of Colors	10' x 12" 8 ct # 1	Very showy daisy blooms borne on tall willowy stalks held high above large lettuce-like leaves. Great cut flower.
Ginger Variegated (Alpinia)		Foliage	30" x 48" # 1	This ginger is grown as a foliage annual in north Texas. The golden variegation of the long tropical leaves lends drama to the shade garden. Alpinia grows best in rich, moist, well drained soil. It will not bloom in north Texas. Can perennialize in mild winters and/or if mulched well.
Gomphrena	Apr-Oct	Purple, Pink	10" x 20-" 18 ct	Very tough heat loving 1" straw-like, ball-shaped flowers. Harvest the flowers for dried bouquets. Reminiscent of Grandmother's garden. Under used, mixes well with other summer annuals.
Helenium 'Dakota Gold'	May-Sept	Gold	10" x 12"-18" 18 ct	Mounds of fine textured leaves topped by happy little daisies. Loves Texas heat. North Texas Winners Circle Award. (Bitterweed). Good color for non-irrigated beds.
Heliotrope	May-Sept	Deep Blue	8" x 8- 10" 8 ct # 1	Tight clusters of intense blue flowers. Heavily veined leaves lend texture.
Hibiscus Tropical	May-Oct	Pink, Red, Yellow, Orange	12" x 18" # 1 10"	Favorite tropical for patios, pots and beds. Showy eye-catching flowers. Loves heat and sun.
Impatiens	Apr-Jun	Variety of Colors	9" x 18" 18 ct	Can look good in the summer but performs best in spring and fall.
Iresine 'Blazing Rose'		Foliage	18" x 30" 8 ct	Rose, pink and magenta foliage on an upright bush. Super accent and eye-catching.
Kale Ornamental		Foliage	16" x 12"-24" 18 ct # 1	Available in both red and white, along with varying degrees of lacey leaves and heights. Gives winter color and texture.
Lantana	May-Oct	Many Colors, Bi-colors	9"-24" x 12"-36" 18 ct # 1	A Texas favorite that loves heat. Trailing and upright varieties available. Some will be perennial in north Texas.
Lemon Lollipop	Apr-Oct	Yellow	12" x 24" 8 ct	Showy unique candelabra-type flower spikes that love the summer heat.
Lobelia	Cool Season	Blue Shades	8" x 3" 18 ct 8 ct	Spring or Fall color. Used for low borders or for spilling over garden walls, pots or baskets. Foliage has bronze cast in cooler temps.
Mandevilla	May-Oct	Pink, Red, White	3' x 12' # 1 10"	Deep green foliage with large trumpet-shaped flowers. This is a beautiful tropical vine for summer garden interest.
Marigold	Apr-Nov	Orange, Yellow, Red	9" x 12" 18 ct	Old garden favorite. Both large and small varieties available.
Melampodium 'Lemon Delight'	Apr-Aug	Yellow	10" x 10" 18 ct	Loves summer heat. Good alternative to Marigolds. Dime-sized flowers.
Moss Rose (Portulaca)	Apr-June	Mix & Solids	6" x 4" 18 ct	Bright and cheerful 2" cactus-like flowers top succulent leaves. Flowers close at night and on cloudy days. Trailing in habit. Old time garden favorite.
Mustard 'Red Giant'		Foliage	12" x 12" 8 ct # 1	Cool season foliage color. As temperature drops below 60°, a burgundy red color begins to develop.

<b>Nemesia</b>	Mar-May		Blue, White	10" x 12"	8 ct	Mounds of early spring color. Snapdragon-like flowers on upright stems. Self cleaning. Can take a mild freeze.
<b>Osteospermum</b> Cape Daisy	Feb-Jun		Variety of Colors	12" x 9-12"	8 ct # 1	This lovely native to South Africa produces bright daisy flowers. Needs well-drained soil. Great for cool season color pots. Can go through the summer, but will need more shade as the summer gets hot.
<b>Pansy</b>	Oct-Apr		Variety of Colors	8" x 6"	18 ct 8 ct	Our best winter color option. A wide assortment of colors and mixes. Trailing varieties also.
<b>Penta</b>	Apr-Oct		Red, Pink, Violet, White	9-12" x 7-24"	18 ct 8 ct # 1	Star shaped flowers form clusters that bloom continually from spring through fall. Small and large varieties available. Good for those difficult mixed sun-shade locations. One of our best summer color options.
<b>Pepper, Ornamental</b>	Aug-Oct		Fruit & Foliage	8"-15"x10"-24"	8 ct # 1	A fiesta of colorful fruit and foliage. Useful for spicing up planters and beds. Great partnered with fall mums, asters, pumpkins and scarecrows.
<b>Pericallis</b>	Mar-Apr		Blue, Magenta, Violet, Bi-Colors	12" x 12" x 12"	# 1	Globes of neon daisies add bright color to late winter and early spring landscapes and containers.
<b>Perilla Magilla</b>			Foliage	12" x 24"	8 ct	Heat and sun loving with colorful magenta/fuchsia leaves. Has an upright and bushy habit and has a similar appearance to coleus.
<b>Persian Shield</b> Strobilanthes			Foliage	15" x 36"	8 ct	Grown for its radiant purple, lance-shaped leaves. Is striking in the shade garden.
<b>Petunia multiflora</b>	Mar-May		Variety of Colors	9" x 12"	18 ct	Common bedding petunia that provides a spectacular color show. Spring plantings require good drainage. Can plant in late summer for fall show.
<b>Petunia 'Crazytunia'</b>	Mar-June		Variety of Colors	9" x 8-10"	# 1	Crazy patterns and color schemes on this petunia. Upright and compact habit. Fun color till the north Texas heat sets in.
<b>Petunia 'Easy Wave'</b>	Mar-June		Variety of Colors	18" x 6-12"	8 ct	Easy Wave is more mounding than other waves. Blooms in cool temps and keeps blooming into the heat. New blooms bloom in the center as well as at the ends.
<b>Petunia 'Supertunia'</b>	Mar-June		Variety of Colors	12" x 12-20"	# 1	Vigorous petunia. Responds well to a cutting back.
<b>Plumbago Blue</b>	Apr-Oct		Blue	12" x 24"	8 ct # 1	Very durable plant that loves our summers. Produces a cluster of flowers that form a globular head. Has a lovely fountain-like habit.
<b>Poppy Iceland</b>	Nov-Apr		Mix	9" x 5" x 15"	18 ct	Blooming primarily in the spring with striking translucent flowers born on tall slender hairy stalks. Performs best when planted in the fall. Doesn't like heat.
<b>Primula polyanthus</b>	Jan-Mar		Mix	6" x 6"	18 ct 8 ct	Umbels of super bright, almost garishly colored flowers arise from basal clump to brighten up cool season landscapes or window sills.
<b>Purple Fountain Grass</b>	May-Nov		Burgundy	3' x 4-5'	# 1 10"	Annual grass with very attractive arching burgundy foliage with equally attractive light burgundy bottlebrush like plumes.
<b>Rudbeckia hirta 'Denver Daisy'</b>	May-July		Gold/Brown	12" x 18-24"	# 1	Large 5" golden daisy with a bold chocolate center. Hairy coarse leaves. Introduced to commemorate the 150th anniversary of Denver, CO.
<b>Salvia argentea</b> Silver Sage				12" x 10"	8 ct # 1	Grown as a cool season foliage annual in north Texas. Large silver, wooly, super soft leaves 6" wide and 8" long. Likes a loose well drained soil that does not stay wet. The plant will diminish as our summer heats up. In cooler areas, it is grown as a biennial that bears a pinkish/white flower the second year.
<b>Salvia coccinea</b>	Apr-Oct		Red, Pink, White	18" x 24" x 36"	8 ct	Very hardy reseeding annual with spiked flowers. Requires deadheading to look its' best. Will reseed and come back the following year.
<b>Salvia f. Victoria Blue</b>	May-Oct		Blue	1' x 1' x 1 1/2'	18 ct	Showy spikes of blue provide color from spring till fall. Must have well drained soil. 'Evolution' is the same, but has a purple flower. Often used as a perennial.
<b>Salvia splendens</b>	Apr-Jun		Red	9" x 10" x 18"	18 ct	Common bedding salvia with large showy flower spike. Does not tolerate north Texas summer heat well.
<b>Salvia 'Wendy's Wish'</b>	May-Oct		Coral Pink	36" x 24" x 36"	# 1	Tubular flowers on arching spikes with a pinkish-brown calyx. Grows quickly. Looks best when trimmed back regularly.
<b>Scaevola</b>	Apr-Oct		Blue, White	12" x 2"	18 ct 8 ct	Trailing color with small fan shaped flowers all season. Loves our summer.
<b>Snapdragon</b>	Oct-May		Variety of Colors	9" x 6"-18' x 24"	18 ct	Blooms during the fall and spring. Requires dead heading to look its best. Needs well-drained soil. Do not overwater. Dwarf and medium sizes available.
<b>Stock</b>	Mar-May		Rose, Mix, White	9" x 12"	18 ct	Fragrant flower spikes that are primarily used for spring color. Plant will freeze during our winters.
<b>Sunpatiens</b>	Apr-Aug		Variety of Colors	14" x 24"	8 ct	Vigorous, sturdy branching, shorter internodes and less prone to downy mildew. Requires copious amounts of water in north Texas summers especially if planted in full sun.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
Sweet Potato Vine		Foliage	24" x 12"	18 ct 8 ct Popular foliage plant available in black, red, lime and tricolor. Tricolor is the least aggressive. All produce a non-edible tuber.
Swiss Chard Ornamental		Foliage	18" x 15- 24"	18 ct # 1 Large glossy leaves with bright red, pink or gold veins/stems. Great mixed with cool season color like pansies, dianthus and snaps.
Tapioca Variegated		Foliage	2'x 4-5'	10" Eye-catching variegated palmate foliage with red petioles. This sun loving tropical needs the heat in order to thrive.
Torenia 'Moon' Series	Apr-Oct	Rose, Purple, White, Yellow	18" x 6"	8 ct Trailing annual with small gloxinia-like flowers. Can tolerate more sun than the upright form.
Torenia Wishbone Flower	Apr-Jun	Blue, Mix	6" x 8"	18 ct Two-toned blooms resembling miniature gloxinias on an upright plant.
Verbena bonariensis Lollipop Purple Vervain	Apr-Oct	Purple	18" x 24"	# 1 Tiny flowers born in small clusters on slender stems. Lends airiness and is a filler plant in the garden. This is a dwarf selection. Great for mixing in with other annuals.
Verbena x hybrids Verbena	Apr-Nov	Pink, Purple, Red, White, Peach	12" x 4" x 4"	18 ct 8 ct # 1 Trailing. Semi-evergreen and is considered a short lived perennial. Covered with small Geranium-like flower heads. Deadhead flowers for more consistent blooming. Commonly planted as an annual.
Vinca 'Cora'	May-Oct	Variety of Colors	9" x 15"	18 ct Break through in Vinca genetics. Cora exhibits more resistance to Phytophthora and Pythium. Disease tolerance has been proven in plant trials done by the Dallas Arboretum. Well-drained soils and warm night time temperatures are needed for best results. And remember Do Not plant too Early in the Spring when night time temps are still cool. Even though these have superior disease resistance it is best not replanted in the same bed year after year.
Vinca'Cora Cascade' Trailing Vinca	May-Oct	Variety of Colors	15" x 4-6"	18 ct The disease resistant Cora periwinkle with a trailing habit.
Viola	Oct-Apr	Variety of Colors	9" x 6"	18 ct Delightful cool season color. Available in a wide variety of colors and mixes. Smaller flowers than the pansy but many more blooms.
Zinnia 'Profusion'	May-Oct	Assorted Colors	12" x 14-18"	18 ct 2.5" diameter daisy type flowers on a heat and disease tolerant bushy plant. Popular in mass plantings as well as in pots.
Zinnia 'Star' Series	May-Oct	Gold, Orange, White, Mix	8" x 12"	18 ct Compact narrow foliage, small dime size flowers sets this zinnia apart. Tolerates heat and humidity. Is mildew resistant. Requires no deadheading. Also known as Mexican zinnia.

NAME	BLOOM TIME		FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION	
<b>Acanthus mollis</b> Grecian Urn Plant	Apr-May		Purple/White	3' x 2' x 5'	# 1 10"	Gigantic, lush thistle like leaves form mounds of foliage. Grandiose flower spikes emerge the in Spring. Likes dry shade. Plant goes dormant during heat of late Summer in north Texas.
<b>Achillea hybrids</b> Yarrow	April - June		Gold, Yellow, Red, Salmon	12" x 8" x 18"	# 1 # 1	Fernlike aromatic foliage. Spreads by rhizomes. Needs well drained soils. Multiple tiny flowers make up the flat flower heads.
<b>Agapanthus africanus</b> Lily of the Nile	May-Jun		Blue	18" x 18" x 36"	# 1	Clumps of arching strap-like leaves are topped by globes of trumpet shaped flowers. It is usually considered a tender perennial in north Texas. Must have well drained soil. Dwarf form is available also.
<b>Agastache 'Blue Boa'</b> Hummingbird Mint	Jun-Oct		Purple-blue	15" x 15" x 20"	# 1	Minty aromatic leaves on square stems. Flower spikes stand tall above foliage. Needs good drainage and is drought tolerant once established. Is deer resistant. Deadhead to encourage re-bloom. Blooms most all summer in north Texas!
<b>Ajuga reptans 'Black Scallop'</b> Bugleweed	May		Blue	8" x 4" x 6"	8 ct	Dark glossy burgundy-black foliage with showy flower spikes. Leaves are more colorful when given more light. Give afternoon shade in summer.
<b>Ajuga reptans 'Burgundy Glow'</b> Bugleweed	May		Blue	8" x 4" x 6"	8 ct	Variegated foliage with pink highlights on new growth. Needs afternoon shade in heat of Summer.
<b>Ajuga x tenorii 'Chocolate Chip'</b> Bugleweed	May		Blue	8" x 4" x 6"	8 ct	The chocolate tinged are narrower than it's A. reptans relative, giving this plant a different look. Plants have more color in cool sunny weather. Needs afternoon shade in summer. This variety seems to bloom more than others.
<b>Anemone japonica</b> Japanese Anemone	Oct-Nov		White Pink	1' x 1' x2'- 4'	# 1	Delicate flowers with yellow centers are held on slender stalks above soft clumps of lobed foliage. Lends a delicate and airy feel to the shade garden. Sometimes known as a Windflower. Prefers rich evenly moist soil.
<b>Anisacanthus quadrifidus var. Wrightii</b> Flame Acanthus or Hummingbird Bush	Jun-Oct		Orange	3' x 4'	# 1	Shiny green foliage with multiple flower spikes per stem. Hummingbirds love the flowers. Semi-Deciduous. Should be cut back in the winter by at least 1/2 to 2/3 to encourage dense compact growth. Is tough, drought tolerant and takes reflected heat.
<b>Aquilegia canadensis</b> 'Pink Lanterns'	Apr-May		Pink	10" x 6" x 10"	8 ct	Dainty, short lived reseeding perennial with Maiden fern-like foliage. Unique flower adds interest to a shade garden. Likes well drained and rocky soil. Pink flowered version of the wild columbine.
<b>Aquilegia chrysantha 'Hinckleyana'</b> Texas Gold Columbine	Apr-May		Gold	2' x 18" x 3'	# 1	Native to the Big Bend. It is the best columbine for our area. Fragrant flowers with outward curving spurs reminiscent of an eagles talons. Cut back when foliage declines in summer.
<b>Aquilegia x 'McKana's Giants'</b> Columbine	Apr-May		Mix	18" x 18" x 2'	# 1	A large Columbine. Short-lived, but like the others is planted for their unique flowers.
<b>Aquilegia x 'Origami'</b> Columbine	Apr-May		Mix	12" x 14" x 16"	18 ct 8 ct # 1	This columbine is very uniform and compact in habit. Can be treated as an annual or as a short lived perennial. Unusual showy spurred flowers.
<b>Artemisia schmidtiana 'Silver Mound'</b> Wormwood				8" x 8"	8 ct # 1	Finely cut silver foliage. Forms a compact mound, which is soft to the touch. Gives a foamy effect to the landscape. Doesn't like north Texas summer heat.
<b>Artemisia x 'Powis Castle'</b> Wormwood				2' x 2'	# 1	Unique, feather-like silver foliage that lends interesting texture and color to the landscape. Needs occasional pruning to keep tidy.
<b>Asarum splendens</b> Chinese Wild Ginger				12" x 6"	8 ct # 1	Beautiful heart-shaped evergreen leaves topped with silver marbling. A purple bloom of no significance. Spreads by rhizomes, often used as a ground cover in woodland or shade gardens.
<b>Asclepias tuberosa</b> Butterfly Weed	May-Aug		Orange	15" x 18" -24"	# 1	Does well in poor dry soils and re-seeds easily. A. tuberosa differs from A. curassavica in that the stems are hairy, the leaves are narrower, there is no milky sap and the flower is colored different. It is a wonderful nectar source. The larvae of the Monarch & Queen butterflies feed upon the leaves. Large pods of silky-tailed seeds are produced. A must for the butterfly gardener.
<b>Aspidistra elatior</b> Cast Iron Plant				12" x 36"	# 1	Tough, leathery, evergreen foliage. The lanceolate leaves arise directly from the roots in clumps. Thrives in low light conditions. Usually planted in masses. Direct sun will burn foliage.

NAME	BLOOM TIME		FLOWER COLOR	SIZE Spacing x Height x Bloom Height		DESCRIPTION
<b>Aster dumosus 'Alert'</b> Dwarf Aster	Aug-Sept		Purple	15" x 12-15"	# 1	Dwarf Aster covered in 1" wide daisies, great for the late summer early fall garden.
<b>Aster dumosus 'Professor Anton Kippenberg'</b> Dwarf Aster	Aug-Sept		Deep Blue	18" x 12-15"	# 1	Very tight compact blooming daisy. Smaller flowers but very profuse.
<b>Aster dumosus 'Winston Churchill'</b> Dwarf Aster	Aug-Sept		Dk. Raspberry	12-18" x 18-24"	# 1	This dwarf aster has bright single raspberry flowers. A welcome sight in late summer and early fall.
<b>Aster dumosus 'Woods Pink'</b> Dwarf Aster	Aug-Sept		Pink	18" x 12-15"	# 1	Compact habit. Mounds covered in daisy-type blooms. Blooms before the other fall asters.
<b>Aster x frikartii</b> Monch's Aster	Jun-Oct		Blue/Lavender	18" x 24" x 24-36"	# 1	The Monch's aster has a much longer bloom season than other asters. The flower is larger also, about 1.5" across. Same yellow center on a daisy-type bloom. A favorite for everyone's garden.
<b>Aster oblongifolia</b> Fall Aster						(See Symphyotrichum oblongifolium)
<b>Aster oblongifolia 'October Skies'</b> Dwarf Fall Aster						(See Symphyotrichum oblongifolium)
<b>Buddleia</b> Butterfly Bush	April-Sept		Blue, Pink, Purple White	2-3' x 5-6'	10"	Deciduous and shrubby. Covered with 6" to 12" flower spikes. Prune to keep tidy. Deadhead throughout the season to increase flowering. Easy to grow. Butterfly magnet. Dwarf varieties are available also, they grow to about half the size of standard size.
<b>Bulbine frutescens 'Orange'</b>	June-Sept		Orange/Yellow	18" X 18" X 24"	# 1	This native to South Africa has succulent onion-like foliage and spikes of orange/yellow flowers. Deadhead for more blooms. Hates wet feet.
<b>Caesalpinia gilliesii</b> Texas Bird of Paradise	June-Oct		Red-Yellow	4' x 6'	10"	Grows quickly into a small tree or large shrub with airy compound leaves. Showy spider-like flowers. Prune for fullness.
<b>Callicarpa americana</b> American Beautyberry	Oct-Dec		Purple Berries	6' x 6'	# 1 10"	Light green deciduous foliage. Berry laden stems in the fall and winter. Low maintenance. Very adaptable. Fruit attracts wildlife.
<b>Callirhoe involucrata</b> Wine Cups	May-Jul		Magenta	2' x 1' x 1'	# 1	Local wildflower with satiny cupped-shaped flowers. Rambling foliage. Do not overwater.
<b>Calylophus hartwegii</b> Sun Drops	May-Oct		Yellow	24" x 8" x 8"	8 ct # 1	Needle-like foliage with brightly colored 2" cupped flowers. Blooms heaviest in the spring, then sporadically through fall. Mounding habit.
<b>Calyptocarpus vialis</b> Horse Herb	Apr-Oct		Yellow	9" x 6" x 6"	18 ct	A tough semi-evergreen ground cover that forms dense mats in the shade. Requires very little water, can be mowed and can take small amounts of foot traffic.
<b>Canna</b> Canna Lily	Jun-Oct		Flower/Foliage		# 1	Tropical looking foliage plant with bold flowers atop. Can grow in normal or soggy conditions.
'Canova Red'			Red/Green	2' x 3' x 4'		
'Canova Rose'			Rose/Green	2' x 3' x 4'		
'Canova Yellow'			Yellow/Green	2' x 3' x 4'		
'Australis'			Red/Maroon	2' x 4' x 5'	10"	Dark maroon foliage with red flowers.
<b>Caryopteris</b> Blue Beard	Jun-Nov		Blue	2'x 2' x 3'	10"	Fluffy blue powderpuff like flowers are found in whorls along upright woody stems. Flowers on new growth, so is unaffected by pruning.. Must have well drained soils due to crown rot issues. Texas tough perennial. A bee magnet.

<b>Cephalanthus occidentalis</b> Buttonbush	Jun-July		White	15-20' X 10"	10"	Deciduous shrub or small tree with irregular crown and sometimes twisted trunks. Often is wider than tall and can be pruned into a small multitrunk tree. Often found in wetland habitats and in moist forest understory areas. Can grow well in a landscape garden setting. Flowers are very distinctive 1" white balls that dangle from the stems. Flowers are very long lasting and are extremely rich in nectar. The fruit is brown and spherical and persists through the winter. Very adaptable plant and has few problems.
<b>Cerastigma plumbaginoides</b> Creeping Plumbago	Jul-Aug		Blue	9" x 6"	8 ct	A deciduous ground cover sprinkled with bright blue flowers. Rusty red foliage in the fall.
<b>Cestrum aurantiacum</b> Orange Zest	Jun-Oct		Pastel Orange	4' x 7'	10"	Vigorous shrubby perennial. Hardy to about 20°F. Will freeze to the ground and come back. Easy to establish. Blooms non-stop. Drought tolerant.
<b>Chaenomeles 'Rubra'</b> Flowering Quince	Feb-Mar		Red Orange	3-5' X 3-5'	10"	Deciduous shrub with flowers appearing on thorny stems just before leaf break. One inch, five petaled flowers, typical of the rose family are harbingers of spring. Towards the end of summer and into fall small pomes form. This plant is very adaptable and tolerant of soils and conditions.
<b>Chrysactinia mexicana</b> Damianita	April-Sept		Yellow	2' x 1-2'	# 1	Aromatic needle-like leaves form a dense low mound. Is evergreen and loves hot conditions. Very tough, must have well drained soil. Do not keep wet especially in the winter. 1" daisy like flowers. Only light prunings, heavy prunings can kill the plant. Makes a great border for dry locations.
<b>Colocasia antiquorum 'Illustris'</b> Imperial Taro				3' x 4'	# 1	Large elephant ear foliage with smoky-purple variegation. Not as invasive as Colocasia esculenta.
<b>Colocasia esculenta</b> Hardy Elephant Ear				3' x 4'	# 1	Spreads rapidly by stolons. Extremely hardy and durable especially around water.
<b>Colocasia e. 'Black Coral'</b>				4' x 4"	# 1	Stupendously large corrugated black leaves. Great at waters edge as well as in a garden setting. Prefers rich moist soil. Hardy to Zone 7b.
<b>Conoclinium greggii</b> Hardy Ageratum	Aug-Oct		Blue	36" x 24" x 24"	# 1	A must for butterfly gardens. Flowers are a nectar source for Monarchs. Filler plant around showier flowers. Drought tolerant once established. Formerly Eupatorium greggii.
<b>Coreopsis auriculata 'Nana'</b> Mouse Ear Coreopsis	Apr-Oct		Gold	9" x 3" x 6"	8 ct	Bright little daisy flowers on a slow spreading ground cover. The leaves look like little green mouse ears.
<b>Coreopsis grandiflora 'Early Sunrise'</b>	Apr-June		Gold	18" x 6" x 18"	# 1	Most popular of the coreopsis. The shape of the seed resembles a tick thus the name tickseed. 1" Daisy-like blooms for spring gardens. Short-lived, but reseeds.
<b>Coreopsis 'Red Shift'</b>	Jun-Oct		Yellow/Crimson	18" x 24" x 24"	# 1	From the "Big Bang" series. Butter yellow with crimson eye shifting to red in cooler temperatures.
<b>Coreopsis 'Hardy Jewel Citrine'</b>	Jun-Oct		Gold	12" X 6-8"	# 1	Extremely bright gold flowers. Very floriferous and very compact. Leaves are narrow.
<b>Coreopsis rosea 'Heaven's Gate'</b>	Jun-Oct		Pink/Raspberry	18" x 24" x 24"	# 1	Shades of pink flowers with a dark raspberry centers.
<b>Coreopsis rosea 'Mercury Rising'</b>	Jun- Oct		Deep Red	18" x 12" x 15"	# 1	From the "Big Bang" series, compact plant with deep red flower and bright yellow button center. Medium texture leaves.
<b>Coreopsis 'Route 66'</b> Threadleaf Coreopsis hybrid	Jun-Oct		Gold/Burgundy	1-2' X 1-2'	# 1	8 petaled (1") golden daisy flowers with burgundy splattered centers cover fine narrow, deep green foliage. Cut back to encourage new blooms and tidiness. Likes fertile and well drained soil.
<b>Coreopsis "Uptick" Series</b>	Jun-Oct		Gold/Bronze Cream/Red	12" X 9" X 12"	# 1	This series has large bicolor flowers and a long bloom period. Noted for its' very compact and tidy habit, this series is excellent in mixed pots and small garden spaces.
<b>Coreopsis verticillata 'Center Stage'</b>	Jun- Oct		Magenta	18" x 10" x 13"	# 1	Thread leaf coreopsis with a single magenta red flower.
<b>Coreopsis x 'Jethro Tull'</b> Tickseed	Jun-Oct		Gold	12" x 12" x 12"	# 1	A fun and different coreopsis to add to your collection. The flowers feature tubular rays with coarsely pinked edges. Very compact.
<b>Crinum Lily</b>	June		Pink/White	2' x 2' x 3'	# 1	This member of the Amaryllis family is a very durable perennial for north Texas. Crinum have been known to survive for decades with no care. They are indifferent to our heavy alkaline soils. Clumps of long, arching strappy leaves are topped by clusters of large lily-like flowers which are born on tall, stout stalks. Tough Texas perennial.
<b>Cuphea micropetela</b> Candy Corn Plant	Aug-Oct		Yellow/Orange	2' X 2' 3'	# 1 10"	Yellow cigar like flowers that age to orange. Leaves are narrow like a penstemon, and stems are red. The clump spreads outward by rhizomes. Root hardy to 15-20 degrees and is native to Mexico. Great hummingbird plant.
<b>Datura meteloides</b> Angel's Trumpet	May-Oct		White, Purple	3'x 3' x 3'	# 1	Short lived but reseeds easily. Very exotic 8" long trumpet shaped flowers opening at dusk through mid-morning. Very fragrant. Double bloomer.
<b>Delosperma cooperii</b> Hardy Ice Plant	May-Sept		Violet-Pink Salmon-Pink	18" x 8" x 8"	8 ct # 1	A trailing mat of succulent leaves with bright 1" cactus-like flowers. Needs good drainage.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION	
<b>Dianthus Hybrids</b> Spice Pinks, Border Pinks	Mar-May Oct-Nov		8 ct # 1	Dainty darlings of the perennial garden. Who can resist? Spicy, clove fragrance, pretty blue-gray evergreen foliage in tight and tidy mounds. Useful in borders, rock gardens and in mixed pots. Likes alkaline soil. Must have good drainage.	
'Baths Pink'		Pale Pink	8" x 5" x 8"	Dainty single flower with picotee edge.	
'Dianthalot Red Star'		Red/Dk Red	10" x 8" x 10"	Single red flower with dark red center. Spreading habit.	
'Early Bird Frosty'		White	8" x 5" x 8"	Double flower resembling a mini-carnation.	
'Early Bird Radiance'		Red	8" x 5" x 8"	Double flower resembling a mini-carnation.	
'Early Bird Sherbet'		Hot Pink	8" x 4" x 7"	Double flower resembling a mini-carnation.	
'Everlast Dark Pink'		Dark Pink	12" x 6" x 12"	Double flower resembling a mini-carnation.	
'Firewitch'		Hot Pink	8" x 5" x 8"	Dainty single flower with picotee edge, hot pink.	
'Kahori'		Rosy Pink	12" x 6" x 12"	Single bloom with fringed edges.	
'Pink Kisses'		Lt Pink/Raspberry	12" x 12" x 16"	Double flower of light pink with raspberry center	
'Scent First Coconut Surprise'		White/Burgundy	10" x 8" x 10"	Semi-double white with burgundy center. "Southern Living Plant Collection"	
'Scent First Coral Reef'		Coral/White	10" x 6" x 12"	Double coral-pink with a white fringed edge	
'Scent First Sugar Plum'		Pink/Raspberry	10" x 8" x 12"	Double pink flower with Raspberry	
'Scent First Passion'		Red	10" x 6" x 10"	Double flower, resembling a mini-carnation.	
'Scent First Tickled Pink'		Bubblegum Pink	11" x 6" x 10"	Solid colored, semi-double flower.	
'Sunflor Allura Cosmos'		White	8" x 4" x 8"	Miniature carnation look	
'Sunflor Allura Pink'		Pink	8" x 4" x 8"	Miniature carnation look	
'Sunflor Allura Red'		Red	8" x 4" x 8"	Miniature carnation look	
<b>Echinacea purpurea</b> Coneflower	Jun-Aug			One of the most popular perennials for north Texas. Very hardy and drought tolerant once established. Sturdy flowers are composed of petals surrounding a prominent stiff bristly cone.	
'Butterfly Orange Skipper'		Orange	18" x 6" x 18"	# 1 Compact and sturdy. Named after butterfly of the same name.	
'Cheyenne Spirit'		Mix	15" x 6" x 24"	# 1 Mix of red, orange, yellow, pink, purple and blends. Well branched, compact.	
'Magnus'		Purple	18" x 6" x 24-36"	# 1 Most common variety seen in north Texas gardens. Very hardy, easy to grow.	
'Pow Wow Wild Berry'		Dark Purple	12" x 6" x 12-18"	# 1 2010 AAS winner. Compact and heavily branched, very floriferous.	
'Pow Wow White'		White	12" x 6" x 12-18"	# 1 Compact and heavily branched variety with many more blooms.	
'Prairie Splendor'		Pink	18" x 6" x 24"	# 1 Short, compact and well branched, large flowers.	
'White Swan'		White	18" x 6" x 24-36"	# 1 Large flower, heavy scent.	
<b>Engelmania peristenia (E.pinnatifida)</b> Engelmann Daisy or Cutleaf Daisy	April-July		2' x 2' x 2.5'	# 1 Large, coarse and heavily toothed basal foliage. Daisy-like, 1" flowers. Petals will curve backwards with intense heat. In well amended soil plant becomes floppy. Needs well drained soil. Named after German-American botanist George Engelmann.	
<b>Equisetum hyemale</b> Horsetail Reed			24" x 36"	# 1 Evergreen, reed-like perennial. The stems are cylindrical, jointed, hollowed and have rough longitudinal ridges. Brown spore producing strobilus is found at the tip of fertile stems. Can tolerate prolonged wet conditions. It is a living relic from an age before dinosaurs.	
<b>Erysimum sp.</b> Wallflower	Feb-Apr		Apricot, Lavender, Yellow	18" x 18" x 24"	# 1 Fragrant flower clusters in cool season. Great source of early spring color. Needs well drained soil. Variegated forms available also.
<b>Euonymus fortunei 'Coloratus'</b> Purple Wintercreeper			12" x 6" x 12-18"	18 ct Evergreen, dense and woody stemmed ground cover. Leaves turn purple in the winter. Tolerates a wide range of soils. It will climb a vertical surface.	
<b>Eupatorium greggii</b> Hardy Ageratum				(See Conoclinium greggii)	
<b>Euphorbia x martinii 'Ascot Rainbow'</b> Variegated Hardy Spurge	Feb-Apr		Lime/Cream	20" x 20" x 24"	# 1 Evergreen with variegated green and gold foliage, upright in habit. During cool weather, the foliage is tinged red. Flowers are in billowy open clusters held above the foliage. Must have well drained soil.

<b>Euphorbia myrsinites</b> Donkey Tail Spurge	Feb-Apr		Chartreuse	12" x 4" x 6"	# 1	Long trailing arms of gray foliage with vibrant flowers in late winter and early Spring. Short lived but reseeds easily. Must have good drainage.
<b>Euphorbia 'Tiny Tim'</b>	Apr-June		Chartreuse	15" x 8-10" x 12"	# 1	Very compact habit. Leathery dark green leaves with bronzy red stems. Long lasting chartreuse flowers with bright red eye. Very suitable for containers.
<b>Farfugium j. 'Aureomaculata'</b> Leopard Plant	Aug-Nov		Yellow	24" x 18" x 30"	# 1	Unusual member of the Aster family. 6"- 8" glossy, evergreen, kidney-shaped leaves with irregular yellow spots that form soft attractive mounds of foliage. Clusters of daisy-like flowers are borne on stalks held above the leaves.
<b>Farfugium j. 'Crispatum'</b> Crested Leopard Plant	Aug-Nov		Yellow	24" x 20" x 30"	# 1	Large, leathery, round, evergreen leaves with tight wavy edges form open mounds of foliage. Clusters of daisy-like flowers stand above foliage.
<b>Farfugium j. 'Gigantea'</b> Giant Leopard Plant	Aug-Nov		Yellow	2' x 2' x 3'	# 1	Grown for its' outstanding gigantic glossy round leaves. Leaves can get up to 12"-15" across. Likes moist well-drained soil. Daisy-like flowers above foliage.
<b>Fatsia japonica</b> Japanese Aralia	Aug-Sept		White	3-6' X 6'	10"	Tropical look with large palmate leaves. Globe like flower clusters. Needs rich moist, well drained soils. Hot summer sun will burn the leaves. Hardiness can be marginal in a harsh north Texas winter.
<b>Forsythia 'Lynwood Gold'</b>	March		Gold	6' x 6-8'	10"	A true harbinger of spring. Forsythia blooms when little else has awakened from winter dormancy. It is a deciduous shrub of unruly habit. Prune just after blooming so as to not remove next springs flowers. It is nice planted with flowering quince and early daffodils. It is very tolerant of many soil types, as long as soil is well drained.
<b>Gaillardia grandiflora</b> Blanket Flower	May-June		Red/Yellow	10" x 10" x 10"	# 1	Daisy-type flowers with bands of color resembling patterns on a blanket. Doesn't like wet conditions during the winter months. Short lived perennial.
<b>Gaura lindheimeri</b> Gaura						(See Oenothera lindheimeri)
<b>Glechoma hederacea</b> Creeping Charlie				9" x 2"	8 ct	A low maintenance ground cover with scalloped round green leaves or a much slower attractive variegated form. Tiny lilac flowers grow in leaf axils. Can be invasive if not watched.
<b>Habranthus robusta</b> Pink Rainlily	Aug-Sept		Pale Pink	6" x 6-10"	8ct	Native to Brazil. Funnel shaped flowers appear when late summer rains are preceded by several months of drought. Narrow strap-like leaves. Needs well drained soil. Will naturalize.
<b>Hedera colchica</b> Persian Ivy				1' x 1'	18 ct	Large dark green leathery leaves, closely resembling H. helix but leaves are larger. More disease resistant than English Ivy. Slower growing than English.
<b>Hedera helix</b> English Ivy				1' x 10'	18 ct	Self-supporting evergreen vine with lobed leaves. Old stand-by groundcover for shady under story areas. Will grow up walls and trees, across lawns and slopes. Once established must be kept under control. Variegated form also available, called 'Glacier'.
<b>Helleborus orientalis</b> Lenten Rose	Feb-Mar		White/Purple	15" x 15" x 15"	8 ct # 1	True harbinger of spring. Cup-shaped, nodding flowers in clusters of 1-4 held above leathery palmate evergreen foliage. Flowers last for weeks. Great in mixed beds or as a woodland groundcover. Blooms during Lent.
<b>Hemerocallis Daylily</b>	May-July					One of our most popular perennials with limitless flower types and colors.
<b>'Funny Valentine'</b>			Red	18" x 18" x 30"	# 1	Early Mid-season bloom. Dormant. 5.5" flower.
<b>'Happy Returns'</b>			Bright Yellow	12" x 12" x 18"	# 1	Early season bloom, Semi-evergreen, 3" flower. Fragrant.
<b>'Hyperion'</b>			Yellow	18" x 30" x 40"	# 1	Mid-season bloom, Dormant, 5" flower. Fragrant.
<b>'Joan Senior'</b>			Creamy White	18" x 12" x 25"	# 1	Early Mid-season bloom, Evergreen, 6" flower.
<b>'Little Business'</b>			Red/Green Throat	18" x 12" x 17"	# 1	Early-mid season bloom, semi-evergreen, dwarf.
<b>'Pandora's Box'</b>			Cream/Purple Eye	18" x 16" x 20"	# 1	Early-mid season bloom, evergreen foliage, fragrant.
<b>'Pretty Woman'</b>			Pastel Pink	18" x 18" x 28"	# 1	Mid-season bloom, evergreen foliage, large 6" flower.
<b>'Rajah'</b>			Red-orange	18" x 20" x 40"	# 1	Mid-season bloom, dormant foliage.
<b>'Stella d'Oro'</b>			Gold	12" x 9" x 12"	# 1	Early-mid season bloom, dormant, re-bloomer, fragrant, dwarf.
<b>Heuchera 'Carnival Watermelon'</b> Coral Bells	May		White	12" x 12" x 20"	#1	This lovely hybrid has pink/peachy foliage that fades to bronzy green with age. Villosa parentage gives more heat tolerance. As with all Heucheras performance is better in cool weather. Protect from drying winds. Keep well drained and moist.
<b>Heuchera 'Crimson Curly'</b> Coral Bells	May		White	12" x 10" x 18"	# 1	Ruffled red-brown leaves with purple-red undersides. Typical of Heucheras, a rich moist well drained soil is preferred. Protect from hot summer sun and dry winds.
<b>Heuchera 'Midnight Rose'</b> Coral Bells	May		Cream	10" x 10" x 18"	#1	Burgundy leaves with splatters of pink, as the summer heats up the spots turn creamy. It is grown for its unique foliage. Keep moist with well drained soil. Protect from dry winds.
<b>Heuchera micrantha 'PalacePurple'</b> Coral Bells	May		Cream	9" x 6" x 18"	8 ct # 1	Deep bronze-purple foliage with sprays of small bell shaped flowers dangling above the pretty leaves. Does best in cool season. Protect from hot summer sun and dry winds.
<b>Heuchera 'Plum Pudding'</b> Coral Bells	May		White	9" x 8" x 16"	# 1	A basal mound of silvery plum leaves with darker purple veins. Some gardeners remove the flower stalks and just enjoy the foliage. Protect from hot Texas summer sun. Likes moist rich soil.
<b>Heuchera 'Obsidian'</b> Coral Bells	May		Cream	12" x 10" x 18"	# 1	Clumps of glossy black leaves are quite showy. Likes moist, rich soil. Likes cool weather. Appreciates shade when our summer gets hot. Keep from drying winds.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
<b>Hibiscus coccineus 'Texas Star'</b> Hardy Hibiscus	Jun-Sept	Red	4' x 6' x 6'	# 1 10" Hemp-like green foliage on vigorous vertical stems. 6 " flowers with reflexive, widely space petals. Texas native.
<b>Hibiscus m.'Airbrush Effect'</b> Hardy Hibiscus	Jun-Sept	Two-Toned Pink	4' x 4' x 4'	10" Large overlapping petals that have the effect of being airbrushed with shades of dark and light pink. A dark red eye . Compact with blooms all over. Keep well watered in Texas summers.
<b>Hibiscus m. 'Lord Baltimore'</b> Hardy Hibiscus	Jun-Sept	Red	5' x 5' x 5'	10" Texas 'Superstar' Large pure red flowers. Deeply lobed leaves. Needs deep and consistent watering.
<b>Hibiscus m. 'Luna Series'</b> Hardy Hibiscus	Jun-Sept			The 'Luna' series is small, compact and well branched. 6" to 8" flowers. Great for containers and beds. Like all perennial hibiscus, they are slow to emerge in the spring.
Luna Red		Red	24" x 42" x 42"	# 1
Luna Rose		Pink	24" x 42" x 42"	# 1
Pink Swirl		Pink/White Swirled	24" x 42" x 42"	# 1
Luna White		White	24" x 42" x 42"	# 1
<b>Hibiscus m. 'Mars Madness'</b> Hardy Hibiscus	Jun-Sept	Red	4' x 4' x 4'	10" Flowers are dark red-magenta with overlapping petals. Coppery-purple maple-like foliage. Blooms from top to bottom. As with all perennial hibiscus, they are late to emerge in the spring. Must be well watered to maintain lush foliage and many blooms. Deer resistant.
<b>Hibiscus m. 'Mocha Moon'</b> Hardy Hibiscus	Jun-Sept	White	4' x 4' x 4'	10" Large, slightly cupped white flowers with a prominent red eye. Bronzy, maple-like foliage. Late to emerge in spring. Likes copious amounts of water in the growing season. Deer resistant.
<b>Hibiscus m. 'Midnight Marvel'</b> Hardy Hibiscus	Jun-Sept	Red	4 x 4 x 4'	10" Plump, black-red buds open to a large red flower. Maple-like foliage grows darker purple in full sun. Compact plant has flowers from top to bottom. As with all perennial hibiscus in Texas, a good supply of water is required. Slow to emerge in the spring.
<b>Hibiscus m.'Starry Starry Night'</b> Hardy Hibiscus	Jun-Sept	Two-Toned Pink	4" x 4' x 4'	10" Most unique black foliage. Large flowers of pale pink with darker pink veins. Bright red eye. Contrasting chartreuse green calyxes stand out amongst the black leaves and colorful flowers. Flowers from top to bottom. Deer resistant. Needs ample supply of water in Texas summers.
<b>Hibiscus m 'Summer in Paradise'</b> Hardy Hibiscus	Jun-Sept	Cerise	3' x 3' x 3'	10" Cerise pink with a deep red eye. Green maple shaped leaves. Blooms appear from top to bottom. Like all perennial hibiscus in north Texas, a good supply of water is required during the hot summer months. Is deer resistant.
<b>Hibiscus syriacus (Althea)</b> Rose of Sharon	Jun- Sept	Pink, Purple, White	5-6' X 6-8"	10" Hardy, deciduous, upright, V-shaped shrub. Very prolific summer blooms come in both single and double. Loves our north Texas conditions and is easy to grow. Needs well drained soil. It is the national flower of South Korea, where it originated.
<b>Hosta</b>	Jun-Jul			Although Hostas do better in the North, they are so tough that some varieties can perform quite well here. Need rich organic, well-drained soil. Protect from slugs.
'Big Daddy'		White	18" x 18" x 36"	# 1 Large quilted blue leaves that cup with age.
'Blue Angel'		White	24" x 24" x 36"	# 1 Large sear suckered powder-blue heart-shaped leaves.
'Earth Angel'		Lavender	24" x 24" x 36"	# 1 Variegated sport of 'Blue Angel'. Large blue green heart shaped leaves with creamy edges.
'First Frost'		Lavender	24" x 15" x 24"	# 1 Thick blue green leaves with irregular gold margins that fade to creamy white in summer.
'Flavocircinalis'		Lavender	24" x 17" x 24"	# 1 Heart shaped, puckered blue-green leaves with a gold edge.
'Frosted Jade'		White	24" x 24" x 36"	# 1 Green with distinct white edge. Beautiful form.
'Guacamole'		White	24" x 18" x 30"	# 1 Large chartreuse leaves with blue-green edge. Fragrant blooms.
'Patriot'		Lavender	24" x 18" x 30"	# 1 Sport of Francee. Dark green leaves w/crisp white margins. Recommended for the south.
'Royal Standard'		White	18" x 18" x 30"	# 1 Large Green leaves slightly wavy and puckered. Fragrant flower.
'Shadowland Autumn Frost' PW		Lavender	24" x 12" x 24"	# 1 Thick powder blue leaves with wide butter yellow margins that fade to cream
'Shadowland Empress Wu' PW		Lavender	60" x 36" x 48"	# 1 Largest hosta. Huge, thick, dark green leaves with deep veining.
'Shadowland Hudson Bay' PW		Lavender	24" x 18" x 30"	# 1 Tricolor leaves, Blue margins with apple green spreading into the creamy white center.

'Shadowland Whee !'	PW		Lavender	24" x 12" x 24"	# 1	Ruffled green leaves with creamy margins. Creamy margins will widen as plant matures.
'So Sweet'			White w/Lavender	18" x 12" x 30"	# 1	Good hosta for north Texas. Green with creamy edge.
'Stained Glass'			Lavender	15" x 15" x 24"	# 1	Gold leaves with green margins. 2006 Hosta of the Year.
'Sun Hosta'			Lavender	15" x 15" x 24"	# 1	Green with creamy yellow edges on lance-like leaves.
'Undulata Albomarginata'			Lavender	18" x 15" x 24"	# 1	Wavy white edges. Good for north Texas. May lose color in extreme heat.
'Vulcan'			Lavender	18" x 16" x 30"	# 1	White centers with dark green margins, streaks of chartreuse bleed into the white. Large round leaves.
<b>Hydrangea macrophylla 'Matilda Gutches'</b> Mophead hydrangea	May-June		Pink/Blue	3' x 3'	10"	Large globular flower clusters bloom on previous years growth. Must have rich, moist, well drained soil. Needs protection from drying winds. Flowers are pink in alkaline soils and they are blue in acidic conditions.
<b>Hydrangea quercifolia 'Snow Queen'</b> Oak Leaf Hydrangea	May-Jun		White	8' x 8'	10"	A selection with pure white flowers. Excellent red fall foliage and flowers turn pink to tan in the fall. Attractive exfoliating bark. Deciduous.
<b>Hymenocallis</b> Spider Lily	Jun		White	3' x 3' x 4'	# 1 10"	Very lush tropical foliage of thick strap-like leaves radiating from the center. Delicate 6" wide spidery flowers on stalks above the foliage. Very hardy. Takes most any soil. Can tolerate wet or dry conditions.
<b>Hymenoxys</b> Four Nerve Daisy	May-Aug	  	Yellow	9" x 8" x 10"	# 1	Clumping evergreen foliage with solitary daisy occurring at the top of a bare stalk. Four veins visible on petal, hence 'Four Nerve'. Great for Xeriscape.
<b>Hypericum patulatum 'Henryii'</b> St. John's Wort	May		Yellow	3' x 3'	10"	Slow to establish, but this selection performs and blooms well in north Texas. Semi-evergreen woodland shrub with a soft fountain habit. Drought tolerant. Stunning bright yellow flowers in spring.
<b>Hypericum 'Hypearls'</b>	June-July		Yellow	2' x 2'	# 1	Low growing shrub. Flowers on new wood, followed by cream colored berries that turn to red. Appreciates protection from hot Texas summer sun.
<b>Iberis sempervirens</b> Candy Tuft	Mar-Apr	 	Snowy White	18" x 4" x 4"	8 ct # 1	Mounds of evergreen foliage covered with clusters of very bright flowers in spring. Great for borders or spilling over walls. Trim back to keep tidy.
<b>Iris germanica</b> German Bearded Iris	Mar-Apr					Soft green lance-like leaves that shoot straight up from the soil. Beautiful bearded flowers that come in a wide assortment of colors and combinations.
'Babbling Brook'			Sky Blue		# 1	
'Clarence'			Lt Blue/White		# 1	
'Harvest of Memories'			Yellow		# 1	
'Immortality'			White		# 1	
'Night Owl'			Dk Purple		# 1	
'Sultan's Palace'			Red		# 1	
'Vanity'			Pink		# 1	
'Victoria Falls'			Blue/white		# 1	
<b>Iris Louisiana</b> Louisiana Iris	May	 				Semi-evergreen sword-like foliage makes a great vertical accent. Easy to grow in regular garden soil and or at waters edge. Great plant for those areas of poor drainage.
'Dwarf Sky Blue'			Light Blue	24" x 24" x 36"	# 1	
Lavender			Lavender	24" x 40" x 40"	# 1	
Purple			Purple	24" x 40" x 40"	# 1	
'Rubie's Love'			Crimson/Yellow	24" x 40" x 40"	# 1	
'Sloan's Yellow'			Yellow	24" x 40" x 40"	# 1	
Violet			Violet	24" x 40" x 40"	# 1	
<b>Iris pseudacorus</b> Yellow Flag	May	 	Yellow	4' x 5'	# 1	Upright deep green sword-like foliage. Very vigorous. Similar to Louisiana Iris but larger.
<b>Kniphofia 'Flamenco'</b> Red Hot Poker	Jun-Jul	 	Orange/Red/ White	3' x 2' x 4'	# 1	Yucca-like foliage with dramatic flower spikes. Requires good drainage.
<b>Lagerstromia X 'Ebony Fire'</b> Crape Myrtle	Jun - Oct		Red	8' x 10 -12'	10"	Deciduous. Unique black foliage makes for a showy accent plant. Dark color is maintained throughout the summer. Once the plant is established, it is very drought tolerant. Red Raider fans love the red and black colors.
<b>Lagerstromia X 'Pokemoke'</b> Crape Myrtle	Jun - Oct		Deep Pink	3-4' X 2-3'	10"	A true dwarf cultivar released by the National Arboretum .It has a tight mounding habit and is wider than it is tall. A nice multitrunk deciduous shrub that is drought tolerant once established. It is powdery mildew resistant. Great for small garden spaces.
<b>Lagerstromia indica 'Velma's Royal Delight'</b> Crape Myrtle	Jun - Oct		Purple	3-5' X 3-6'	10"	Deciduous, compact, upright and very cold hardy. Will tolerate air pollution and has good mildew resistance. Drought resistant wonce established.
<b>Lamiastrum galeobdolon</b> False Lamium		 	Yellow	9" x 8"	8 ct	Semi-evergreen ground cover with silver variegated foliage. Slow to establish but very tough. Takes the place of Lamium, which does not do well in north Texas heat.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
<b>Lavandula angustifolia</b> English Lavender	May-July	Lavender	18" x 18" x 24"	# 1 Although called English lavender, it is not native to England. It is called that due to the fact that it formed the basis for the lavender oil industry in England in the 1700's. Because of the lower levels of camphor in the flowers and foliage English lavender is considered the sweetest of lavenders, therefore most sought after by culinary experts. Must have well drained alkaline soils.
<b>Lavender X intermedia 'Phenomenol'</b>	May-July	Purple	18" x 18" x 24"	# 1 This lavender is bred for heat and humidity tolerance. It is also a good lavender for drying. As with all lavenders, excellent drainage is a must.
<b>Lavender x intermedia 'Provence'</b> Lavender Hybrid	May-July	Blue	24"-36" x 24" x 36"	# 1 Lavender hybrid that is bred to tolerate heat and humidity better. 'Provence' has high essential oil content and robust growth. In addition to the spring bloom flush, 'Provence' can bloom again in the fall. Good air circulation and drainage are essential. Likes an alkaline soil.
<b>Lavandula stoechas</b> Spanish Lavender	May- July	Violet Purple	18" x 18" x 24"	8 ct # 1 Native to the Mediterranean. As with other lavenders it blooms best in the spring and is enjoyed as a fragrant gray-green shrub the rest of the year. The bloom looks like a little pineapple with rabbit ears on top. Prefers chalky well drained soils.
<b>Lavandula s. 'Silver Anouk'</b>	May - July	Blue	18" x 18" x 24"	# 1 Unique hybrid that is characterized by a more silvery-white foliage and compact heavily branched habit. Needs good drainage. Performed well at the Dallas Arboretum Trial Gardens.
<b>Leucanthemum x 'Angel'</b>	May-Jun	White	12" x 8" x 12"	# 1 A short compact shasta daisy. Nice for containers, tight spaces or borders.
<b>Leucanthemum x 'Becky'</b> Shasta Daisy	May-Jun	White	18" x 9" x 30"	# 1 Large daisy flowers on strong stems. Improved variety. Good for north Texas.
<b>Leucanthemum x 'Freak'</b> Shasta Daisy	May-Jun	White	18" x 6" x 14"	# 1 Double rows of ruffley petals. A fun variation of the traditional Shasta daisy.
<b>Leucanthemum vulgare</b> Oxeye Daisy	Apr-May	White	12" x 6 x 24"	# 1 Easy daisy to grow. It naturalizes by seed. Blooms earlier than other daisies. Can be invasive if not watched.
<b>Leucophyllum sp</b> Texas Sage	May-Aug	Purple	3' x 4'	10" Popular silver leaf, heat, drought, salt tolerant native. Takes reflected heat. Is semi-deciduous. Does not like humidity or standing water. Must have well drained soil. Will flower when rain is in the forecast, hence the name 'Barometer Plant' varieties such as 'Lynn's Ever-blooming' are not dependent upon high humidity levels to bloom.
<b>Liatris spicata</b> Spike Gayfeather	Jun-Jul	Purple, White	12" x 18" x 36"	# 1 Tall flower spikes open from the bottom towards the tip on this flowering wand.
<b>Lilium asiaticum</b> Asiatic Lily	Jun-Jul	Orange, Red, Yellow, White	1' x 2-3'	# 1 Striking lily blooms borne atop tall straight stems. Unlike Oriental lilies, Asiatic lilies do not have a scent. Well drained organically rich soils are required. They are beautiful accents for porches patios, pots as well as gifts.
<b>Liriope muscari 'Big Blue'</b> Lily Turf	Aug-Sept	Purple	12" x 12"	18 ct # 1 Evergreen and clumping. Does not spread by underground rhizomes. Flower spike is borne above foliage. Does well in dry shade. Needs protection from hot reflected heat in hottest part of north Texas summer. Also needs more water.
<b>Liriope muscari 'Evergreen Giant'</b>	Aug-Sept	Purple	12" x 24"	# 1 Evergreen, clumping, tall groundcover, border or accent.
<b>Liriope muscari 'Silvery Sunproof'</b>	Aug-Sept	Purple	12" x 15" x 18"	18 ct Green and Yellow Striped leaves. Clumping evergreen. For tidy look, cut back in early spring.
<b>Liriope muscari 'Super Blue'</b>	Aug-Sept	Purple	18" x 24"	18 ct Clumping evergreen grass. Improved variety, crown rot resistant. Taller than 'Big Blue'.
<b>Liriope spicata 'Silver Dragon'</b>	Aug-Sept	Lavender	12" x 12"	18 ct Green with white edges. Spreads by underground rhizomes. Great for naturalizing. Flower is barely taller than the foliage.

<b>Liriope spicata</b> Creeping Lily Turf	Aug-Sept	 Lavender	12" x 12" x 15"	18 ct	Grass-like blades spread by rhizomes. Flower spike is barely taller than the leaves. Makes a dense groundcover. Excellent for erosion control. Mow in the spring to remove the old foliage.
<b>Lobelia 'Starship Scarlet'</b> Cardinal Flower	June- Sept	 Red	12" x 10" x 18"	# 1	Spikes of tubular flowers rise above a basal rosette of bronzy-green foliage. Afternoon shade is a must in north Texas summers. Keep well mulched in summer. Likes medium to wet soil, never let the soil get dry.
<b>Lysimachia nummularia 'Gold'</b> Golden moneywort		 9" x 1"	9" x 1"	8 ct	Mat-forming ground cover with round leaves. Bright golden leaves. Prefers wet conditions. Can be used in containers as a spiller.
<b>Malvaviscus drummondii</b> Turk's Cap	Jul-Oct	 Red, Pink	3' x 4' x 4'	# 1 # 1 10"	Very tough plant for all conditions. Lush green foliage with small, unopened Hibiscus-like flowers, that resemble a turban.
<b>Mazus reptans</b>	May-June	 Lavender	12" x 2"	8 ct	Non-evergreen mat forming groundcover that roots at the nodes. Likes rich well drained moist soils. Will tolerate some foot traffic. Good groundcover for small areas and in between stepping stones.
<b>Melampodium leucanthum</b> Blackfoot Daisy	Apr-Nov	 White	24" x 10"	8 ct # 1	Continually covered with happy little 1" daisies during the growing season. Will not tolerate wet soil. Short lived perennial, sometimes used as an annual.
<b>Monarda didyma 'Balmy' series</b> Dwarf Monarda	May-July	 Purple, Rose	10" x 12"	# 1	Tight and compact bee balm. Great for containers and confined garden spaces. Blooms are like shaggy pom-poms. Aromatic leaves and flowers can be used in herbal teas.
<b>Muehlenbeckia axillaris</b> Creeping Wire Vine		 6" x 4"	6" x 4"	8 ct	Low creeping groundcover with wiry stems covered with dark, glossy green leaves. Has an interesting texture. Inconspicuous white flower. Can be mown yearly to encourage thicker growth. Can be used for topiary.
<b>Musa basjoo</b> Hardy Banana		 3-5' x 5-10'	3-5' x 5-10'	10"	Fertilize regular during the growing season. Will freeze down in north Texas winters, therefore will not produce fruit. Cut down after first killing frost and mulch heavily.
<b>Musa 'Bordelon'</b> Ornamental Banana		 9'- 14'	9'- 14'	# 1	Discovered in Bordelonville, LA. Foliage has maroon undersides with maroon streaks on the top sides. For best growth results, temperatures should be above 65 degrees. It needs about 12 months frost free to produce a flower stalk. The fruit is inedible. Makes a nice container plant. Hardiness zone 8-9.
<b>Nepeta faassenii 'Walker's Low'</b> Catmint	Apr-Sept	 Light Blue	24" x 12"	8 ct # 1	Vigorous gray-green foliage. Requires occasional pruning to keep in bounds. Can tolerate dry conditions. Blooms most all summer. Deer resistant.
<b>Oenothera lindheimeri</b> Guara	May-Aug	 White Pink	12" x 8" x 18"	# 1	Basal rosette of leaves topped with slender wands of small butterfly like flowers. Makes a nice airy filler in the perennial garden. Named after the Father of Texas Botany, Ferdinand Jacob Lindheimer.
<b>Ophiopogon japonicus</b> Mondo Grass		 8" X 5"	8" X 5"	18 ct 18 ct	Fine textured clumping evergreen grassy groundcover. Excellent for shady areas. Requires minimum attention once established. Shear back in early spring before new growth appears. Dwarf variety available, it grows to about 3" tall. Variegated also available.
<b>Oxalis crassipes</b> Pink Wood Sorrel	Feb-Jun	 Pink	9" x 6"	8 ct	Mounds of clover like foliage. Spring and Fall bloomer. Goes dormant in the heat.
<b>Oxalis triangularis</b> Purple Shamrock	Apr-Oct	 Pale Pink	12" x 6"	8 ct	Bold purple shamrock foliage that disappears in winter and re-emerges in spring. Easy to grow.
<b>Pachysandra terminalis</b> Japanese Spurge		 6" x 6"	6" x 6"	8 ct	Slow growing and evergreen. Waxy leaves are clustered at stem apex. Prefers moist well-drained acidic soils, can tolerate dry shade.
<b>Pavonia braziliensis</b> Brazilian Rock Rose	May-Oct	 White/PurpleEye	3' x 3'	# 1	Semi-woody shrub that nearly freezes to the ground in the winter. Small hibiscus like flowers. Re-seeds easily. Very drought tolerant and suitable for xeriscapes. Shear often to keep compact.
<b>Pavonia lasiopetala</b> Rock Rose	May-Oct	 Pink	3' x 3'	# 1	Native to Texas. Very popular due to its long bloom period and versatility to full or part sun and to dry or irrigated soils. Woody at the base and herbaceous on top. Heart shaped leaves and very open branching. The hibiscus-like flowers open in the morning. Frequent pruning will keep plant compact. Re-seeds easily. High heat tolerance.
<b>Penstemon barbatus 'Rondo Mix'</b> Hybrid Beard Tongue	Apr-May	 Pink, Purple, Red Mix	15" x 6" x 16"	# 1	Glossy, green rosettes produce spikes of tubular flowers. Requires good drainage.
<b>Penstemon digitalis 'Huskers Red'</b>	Apr-May	 White	18" x 18" x 24"	# 1	White tubular flowers contrast against striking maroon foliage and stems.
<b>Penstemon 'Prairie Twilight'</b> Hybrid Beard Tongue	April-May	 Pink/White	18" x 18" x 24"	# 1	Green Lance-like foliage on upright in habit. Flowers are on vertical spikes. Cut back after blooming to promote more flowers.
<b>Penstemon schmidel 'Little Red Riding Hood'</b>	April-May	 Bright Red	18" x 18" x 24"	# 1	Super bright tubular red flowers atop Christmas green leaves. Makes a statement.
<b>Penstemon tenuis</b> Brazos Penstemon	Apr-May	 Lavender-Pink	18" x 10" x 24"	# 1	Grows under many conditions and reseeds easily. Produces a profusion of spiked flowers. Texas native that does well in north Texas. Evergreen rosette.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION	
Peony	Apr-May	Pink, Red, White	18" x 30" x 30"	10"	Favorite for bridal bouquets. Makes a lovely cut flower, also stunning left in the landscape. Needs protection from hot afternoon sun in north Texas, leaves will suffer burn when very hot. Likes a well drained rich soil.
Perovskia atriplicifolia Russian Sage	Jun-Sept	Silver Blue	3' x 2' x 3'	# 1 10"	Sparse wands of silver-gray foliage tipped with narrow spiked flowers highlight the landscape. Responds well to being cutback. Needs well drained soil.
Persicaria capitata Pink Bubbles	Jun-Sept	Light Pink	12" x 3"	8 ct	Mat of burgundy-green leaves with a darker burgundy halo. Flowers resemble miniature popcorn balls.
Phlomis russeliana Jerusalem Sage	Jun-Aug	Yellow	24" x 24" x 30"	# 1	Unusual whorls of hooded yellow flowers on spikes above slightly fuzzy, olive green foliage. Avoid wet soil. From Turkey.
Phlox divaricata 'Blue Moon' Louisiana Phlox	Mar-Apr	Blue	12" x 6" x 12"	8 ct # 1	Much improved variety of Louisiana phlox. Has glossy, evergreen leaves. Flower clusters in spring. Fragrant.
Phlox paniculata Summer Phlox	Jun-Aug				Upright plants with large fragrant, flower panicles. These selections are resistant to powdery mildew. They prefer a rich moist organic soil and need good air circulation. Also benefit from summer mulch to keep roots cool. Dead head for repeat blooming.
'Bubblegum'		Pink	24" x 30" x 36-40"	# 1	
'Coral Crème Drop'		Coral	24" x 30" x 36-40"	# 1	
'David'		White	24" x 30" x 36-40"	# 1	
'John Fanick'		Lt Pink w/rosy eye	24" x 30" x 36-40"	# 1	
'Robert Poore'		Violet Pink	24" x 30" x 36-40"	# 1	
'Victoria'		Dark Pink	24" x 30" x 36-40"	# 1	Victoria is a Texas Super Star. Very hardy, tolerates heat and drought.
Phlox p. "Fashionably Early" Series Summer Phlox	May-Aug	Lilac, Pink, White	18" x 20" x 32"	# 1	Earlier blooming series by 2-3 weeks. Thick green foliage is mildew resistant. Must have good air circulation and no overhead watering. Same large, fragrant flower panicles. Needs a rich, moist soil & generous mulch.
Phlox 'Paparazzi' Series	Mar-May	Lavender, Pink Purple, White	18" x 8" x 10"	# 1	Hybrid Phlox with subulata type flowers and glossy green leaves. Low growing mounding habit. Good for containers and borders. Likes moist, rich soil. Mulch in the summer to keep roots cool.
Phlox pilosa Prairie Phlox	Mar-May	Pink	12" x 10" s 15"	# 1	Deciduous perennial. Fragrant flowers. Needs well drained soil. Elizabeth Laurence is a vigorous, long lived variety.
Phlox subulata Thrift	Feb-Mar			8 ct # 1	Forms a mat of needle-like evergreen foliage with incredible floral display in early spring. Requires summer irrigation and loose well-drained soil.
'Drummond's Pink'		Dark Pink	12" x 3" x 3"		
'Emerald Blue'		Baby Blue	12" x 3" x 3"		
'White Delight'		Pure White	12" x 3" x 3"		
Phylla nodiflora (Lippia) Texas Frog Fruit	May-Aug	White	12" x 1" x 4"	8 ct	Deciduous Texas native groundcover that is very adaptable to either sand or clay, wet or dry soil, even floods or drought. It is also salt tolerant. The flowers look like miniature verbena flowers on tiny little stalks.
Physostegia Obedient Plant	Jul-Oct	Rosy Lavender White	12"x 15"x 18-36"	# 1 # 1	Square stems. Tubular flowers make showy spikes of color. A wonderful vertical accent in the perennial garden and it is easy to grow. Flowers can be swiveled into new positions and they will stay obediently. The rosy lavender spreads quickly. A dwarf white less invasive variety (Crystal Peak) is available also.
Platycodon grandiflorus Balloon Flower	May-Aug	Blue, White, Pink	9" x 6" x 8"	8 ct # 1	Novel balloon-like buds open up to 2" star-shaped flowers. Slow to emerge in the spring.
Poliomntha longiflora Mexican Oregano	Jun-Oct	Pink/Lavender	2' x 3'	10"	Semi-woody perennial with small pungent leaves that can be used as a seasoning substitute for oregano. Requires good drainage. Trim back occasionally to maintain a compact form. Tolerates highly alkaline soils.

<b>Prunus glandulosa rosea</b> Flowering Almond	Feb-Mar		Pink	3' x 3-4'	10"	Multi-branched, upright, deciduous flowering shrub. Plump double pink flowers line bare stems in early spring. Not particular about soil pH or type. Can not tolerate standing water. Is tolerant of urban pollution. Needs afternoon shade in hot north Texas summers. Prune just after flowering.
<b>Rosemary Topiary Cones</b>				1 x 2'	# 1 10"	Conical trees of rosemary. Great for hostess gifts, holiday tables, porches and patios as well as in the landscape.
<b>Rosemary officinalis 'Hills Hardy'</b> Upright Rosemary		 		3' x 3 -4'	# 1 10"	Upright and evergreen. Popular in herb gardens and in landscapes. Aromatic foliage can be used in cooking. Must have well drained soil. Trailing variety ('Prostratus') is also available, but less hardy.
<b>Rubus calycinoides</b> Trailing Raspberry		  		8" x 3"	8 ct	A mat of semi-evergreen crinkled raspberry-like foliage turning rusty during winter. The leaf texture is very interesting. Pretty tucked into mixed pots and small rock gardens.
<b>Rudbeckia fulgida 'Goldsturm'</b> Black-Eyed Susan	July-Sept	   	Gold/Black	15" x 10" x 24-36"	# 1	One of the best perennials for north Texas. A bushy upright clump that produces a showy display of black-eyed golden yellow daisies.
<b>Ruellia brittoniana 'Dwarf'</b> Dwarf Mexican Petunia	May-Oct	  	Blue, Pink	12" x 12" x 12"	8 ct # 1	Sword shaped leaves form mounds. Bell shaped flowers bloom just atop the foliage. Blooms best in the heat and full sun. Makes a great border or groundcover. Discovered by Katie Ferguson at her nursery in Conroe, TX (hence, it's known as 'Katie's' Dwarf ruellia).
<b>Ruellia "Mayan"</b> Mexican Petunia	May-Oct	  	Blue, Pink	24" x 24" x 24"	# 1	Sterile cultivar (no seeds produced) however it still spreads by underground roots. Developed by the University of Florida. Same hardy aspects, will grow almost anywhere, just not invasive like the species.
<b>Rumex sanguineus</b> Bloody Sorrel, Dock		 	Foliage	1' x 1' x 1'	8 ct	A rosette of elongated red-veined leaves. Grown as an ornamental foliage plant. Produces tiny flowers on an erect stem above the foliage.
<b>Salvia chamaedryoides</b> Germander Sage	June- Oct	  	Sky Blue	18" x 12" x 18"	# 1	Semi-evergreen to deciduous. Spreading by underground runners. Makes a soft mound and has small gray leaves. Blooms sporadically through the growing season with bursts of color in early summer and fall. Appreciates protection from afternoon sun in hot north Texas summers. Does not like heavy clays. Needs well drained soil.
<b>Salvia farinacea "Augusta Duelberg"</b> Mealy-Cup Sage	May-Nov	  	White	18" x 30" x 36"	# 1	Found in an un-irrigated cemetery in La Grange, TX. Very vigorous and drought tolerant. Looks like Salvia 'Henry Duelberg', but not quite as tall. Has a silvery white bloom. Reseeds easily. Along with 'Henry Duelberg' these are our most vigorous farinaceas.
<b>Salvia farinacea 'Evolution'</b> Mealy-Cup Sage	May-Oct	 	Violet-Purple White	12" x 12" x 18"	18 ct # 1	A new brighter flower color for the traditional S. farinacea. Just as hardy and tough. Grown as an annual but makes a good perennial also.
<b>Salvia farinacea 'Fairy Queen'</b> Mealy-Cup Sage	May-Oct	 	Blue/White	12" x 12" x 18"	# 1	Bi-color flowers make this S. farinacea a standout in the garden. Very tough, heat drought and humidity tolerant.
<b>Salvia farinacea 'Henry Duelberg'</b> Mealy-Cup Sage	May-Nov	  	Blue	24" x 36" x 44"	# 1	Very drought tolerant, sturdy and vigorous. The overall plant is like a mealy-cup sage on "steroids", the leaves and blooms are larger. This salvia was found in an un-irrigated cemetery at the gravesite of Henry Duelberg in La Grange, TX. A "Texas Superstar". Reseeds readily.
<b>Salvia farinacea 'Victoria Blue'</b> Mealy-Cup Sage	May-Oct	   	Blue	12" x 12" x 18"	18 ct # 1	Grown normally as an annual this plant is a reliable perennial if given well-drained soil and not irrigated in winter. Shear completely to the ground after the first flush of flowers fade for best results.
<b>Salvia greggii</b> Autumn Sage	Apr-Oct	  	Coral, Pink, Red, Violet, White, Yellow	30" x 24" x 30"	# 1 10"	Semi-evergreen desert-like shrub covered with short bright flower spikes. Benefits from occasional shearing to shape plant.
<b>Salvia greggii 'Mirage' series</b>	Apr-Oct	  	Cream, Pink, Red, Rose, Purple	14" x 14" x 1'4"	# 1	Dwarf version of our species Salvia greggii. Stays lower, more compact. Nice for pots and small gardens. Same heat and drought loving semi-evergreen.
<b>Salvia guaranitica 'Amistad'</b>	Apr-Oct	 	Purple/Black Calyx	2' x 3' x 3-4'	# 1	Bright purple tubular flower with deep black calyx. Cut back to encourage more bloom.
<b>Salvia guaranitica 'Black and Blue'</b> Anise Scented Sage	Apr-Oct	 	Cobalt Blue/Black Calyx	2' x 3' x 3-4'	# 1	Very intense neon-blue flowers with black calyxes'. Has a crinkly leaf surface.
<b>Salvia leucantha</b> Mexican Bush Sage	Sept-Oct	 	Purple/White	4' x 3' x 4'	# 1 10"	Narrow gray green foliage produces velvet flower spikes in the fall. A must for butterfly gardens.
<b>Salvia leucantha 'Santa Barbara'</b> Dwarf Mexican Bush Sage	Sept-Oct	  	Purple/White	3' x 2' x 3'	# 1	A wonderful dwarf version of the Mexican Bush Sage.
<b>Salvia microphylla 'Hot Lips'</b>	Apr-Oct	  	Red/White	30" x 30" x 36"	# 1 10"	Sometimes bi-colored flowers appear alongside solid ones even on the same branch, this is more common during cool months. Has dainty, heart-shaped leaves. Thrives on neglect. Shear back to keep a nice form. Very similar in growth to Salvia greggii.
<b>Salvia 'Mystic Spires'</b>	Jun-Oct	  	Blue	24" x 30" x 40"	# 1	A vigorous salvia. Leaves and flower spike are larger than S. farinacea. Very hardy and drought tolerant. This is a more compact version of 'Indigo Spires'.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
<b>Salvia nemorosa</b> Meadow Sage 'Blue Marvel' 'Caradonna' 'May Night' 'New Dimension Blue' 'New Dimension Rose' 'Snow Hill'	Apr-Sept	Blue-Purple Violet-Blue Purple-Blue Deep Blue Rose-Pink White	18" x 8-18" x12-18"	8 ct # 1 Small salvia. Perfect for front borders. 6-8" long bloom spikes. Sheer back after first bloom to rejuvenate foliage and to promote new blooms. Blooms are long lasting.
<b>Salvia oresbia (darcy)</b>	Sept-Oct	Scarlet	3' x 3' x 4'	# 1 Great flower show for the summer's end with bright red spikes against chartreuse green leaves. Cut back occasionally to keep a tidier appearance. Drought tolerant. Texas tough.
<b>Salvia verticillata</b> Purple Rain Salvia	Apr-Jul	Smoky Purple	18" x 6" x 15"	# 1 Clumps of broad heart-shaped leaves bear stalks of flowers in late spring through summer.
<b>Salvia 'Silkes Dream'</b>	July-Oct	Red-Orange	30" x 24" x 36"	# 1 A cross between Salvia oresbia and Salvia microphylla. A real show stopper! 12"-15" bloom spikes (like S. oresbia ) cover this more compact salvia in late summer and fall. Just like other salvias, well drained soils are required. Deer resistant.
<b>Santolina incana</b> Lavender Cotton	Aug-Sept	Yellow	18" x 8" x 10"	8 ct # 1 Silver evergreen border with ½" button-like flowers. Requires perfect drainage. Prune heavily after flowering.
<b>Santolina virens</b> Lavender Cotton	Aug-Sept	Yellow	24" x 8" x 8"	8 ct # 1 Very similar to Santolina incana but has bright green foliage.
<b>Saxifraga stolonifera</b> Strawberry Geranium	April	White	9" x 4" x 12"	8 ct Evergreen ground cover round gray-green leaves with silver veins and a maroon underside. Produces airy flowers that are borne on wispy stalks above the foliage.
<b>Scabiosa columbaria</b> Pincushion Flower 'Butterfly Blue' 'Pink Mist'	Jan-Dec	Lavender blue Lavender pink	12"x6-8"x 8-10" 12"x6-8"x 8-10" 12"x6-8"x 8-10"	8 ct # 1 # 1 Evergreen compact mounds of foliage produce 2" pincushion flowers held above the foliage. Flowers heaviest in spring and fall, but can be seen flowering year round. Requires good drainage.
<b>Scutellaria suffrutescens</b> Pink Texas Skullcap	May-Oct	Pink	18" x 10" x 18"	# 1 Semi-evergreen with small leaves resembling thyme. Woody base with a very compact and dense form. Small flowers resemble snapdragons. Occasional shearing to keep a uniform appearance. Excellent low water plant. Requires good drainage. A tough Texas native. Most blooms in May and June.
<b>Scutellaria X Deep Violet</b>	May-Oct	Violet	18" x 10" x 18"	# 1 Hybrid skullcap. Same woody compact mounding habit. Needs well drained soil. Perfect as a low border, or as a ground covers. Can take summers hot reflected heat.
<b>Sedum spectabile 'Autumn Joy'</b>	Aug-Sept	Rose Bronze	18" x 12" x 18"	# 1 Large succulent gray-green foliage. Upright branched shrub-like. Clusters of flowers in late summer and fall. Needs well drained soil.
<b>Sedum spectabile 'Elsie's Gold'</b>	Aug-Sept	Pink	18" x 12" x 18"	# 1 Sport of Sedum 'Autumn Joy'. Has cream-gold variegated leaves. Blooms in fall. Is deciduous. Needs well drained soil.
<b>Setcreasea pallida</b> Purple Heart	Apr-Sept	Pink	12" x 9" x 9"	8 ct Grown mainly for its striking deep purple foliage. Fleshy stems trail along the soil. Native to Mexico.
<b>Sophora secundiflora</b> Texas Mountain Laurel, Mescal Bean	March-April	Purple	5'-15' x 10'-20'	10" Evergreen, multi-trunk shrub or small tree. Glossy, compound leaves. Very showy heavily scented flower clusters smell like grape chewing gum. Grayish, brown seed pods contain shiny red, but hallucinogenic, poisonous seeds. Likes rocky, calcareous limestone well drained soil. Very drought tolerant. Very slow grower. Hates wet feet. Texas native.
<b>Spirea 'Anthony Waterer'</b>	May-June	Dark Rosy Pink	2' x 3'	10" Semi-evergreen, low soft, mounding shrub. Blooms later in the spring with lacy flower clusters. Tolerant of a wide range of soils. Flowers are produced on new wood.
<b>Spirea 'Reeves'</b>	March	White	4'-5'x 4'-6'	10" Deciduous to semi-evergreen. Mounds of arching branches are covered in snow white flower clusters in early spring. Prune just after blooming. Is heat and rough tolerant. Deer resistant.

<b>Stachys byzantina (lanata)</b> Lamb's Ear	May-Jun		Lavender	18" x 8" x 15"	8 ct # 1	Gray leaves covered in silky white hair and very soft to the touch. Foliage is considered evergreen but tends to go dormant after flowers fade. Prefers rich well drained soil. Native to Turkey and Armenia. Extract of leaves has shown anti-microbial activity against Staphylococcus aureus that is resistant to Vancomycin.
<b>Stachys lanata 'Helen Von Stein'</b> Lamb's Ear	May-Jun		Purple	18" x 8" x 12"	# 1	Similar to the species, but it rarely flowers. The foliage is slightly less silver but does not melt as badly in the summer.
<b>Symphoricarpos orbiculatus</b> Coralberry			Coral-Purple Berries	18" x 18"	# 1	Deciduous, sub-shrub with an open branched understory. Bright chartreuse leaves and colorful berries. Tolerates poor alkaline soils. Persistent berries through the winter. Great in mass plantings.
<b>Symphotrichum oblongifolium</b> Fall Aster	Oct-Nov		Blue/Lavender	4' x 3'	# 1 10"	Very hardy and long-lived Aster covered with 1" daisy flowers in the fall. Rhizomatous slowly spreading aster. Aromatic foliage.
<b>Symphotrichum oblongifolium "October Skies"</b> Dwarf Fall Aster	Sept-Oct		Blue/Lavender	18" x 18"	# 1	Same as the species but more compact. (New Name for Aster oblongifolia).
<b>Tagetes lemmonii</b> Copper Canyon Daisy	Oct-Dec.		Gold	4' x 4-5'	# 1	Tough as nails, drought and heat tolerant. Good for hot west walls. Leaves are very aromatic. Daylight sensitive, thus will bloom only during short days. Covered in 1" diameter gold daisies that shine brightly in the fall sun. One of the last plants to bloom in the fall. The flowers tolerate early frost.
<b>Tagetes lucida</b> Mexican Mint Marigold/TX Tarragon	Oct		Orange	36" x 24" x 24"	# 1	Deep green aromatic foliage topped with 1/2" daisies in the fall. Leaves smell strongly of licorice when crushed. Fall garden interest. Can be used as a tarragon substitute.
<b>Teucrium chamaedrys</b> Germander	May-Jun		Pink	12" x 10" x 10"	# 1	Evergreen, small shiny leaves. Often used to outline parterres and knot gardens. Prune heavily in early spring to keep plants tight and compact.
<b>Thymus serpyllum 'Elfin'</b> Elfin Thyme				8" x 1"	8 ct	Flat tiny leafed thyme that forms a mat. It is often used between stepping stones or in stone walls. Needs well-drained neutral soil. Extremely slow growing and rarely flowers.
<b>Trachelospermum asiaticum</b> Asian Jasmine				12" x 6"-12"	18 ct	Most commonly used groundcover for our area. Compact dark glossy green leaves form an evergreen mat.
<b>Tradescantia pallida 'Pale Puma'</b>				8" x 8"	8 ct	Grown for foliage. Soft purple green leaves with silver hair. Semi-erect habit growing in clumps.
<b>Tradescantia sillamontana</b> White Velvet	May-Oct		Bright Pink	12" x 10" x 10"	8 ct	Fascinating plant with succulent gray-green leaves covered with white cobwebs. Is highly adaptable. Native to mountains of Texas and northern Mexico.
<b>Tulbaghia violacea</b> Society Garlic & Variegated Society Garlic	Apr-Jul		Lavender	12" x 12" x 18"	# 1 # 1	Onion-like evergreen foliage with a loose cluster of flowers. Offered in a variegated form.
<b>Verbena bonariensis 'Lollipop'</b> Vervain	June--Sept		Purple	2' x 2' x 2'	# 1	Easy to grow dwarf selection. Nice filler plant bearing clusters of tiny purple flowers at the tops of the plant Heat and drought tolerant..
<b>Verbena x hybrids</b>	Apr-Nov		Assorted Colors	12" x 6"- 8"	# 1	Popular in mixed pots, in borders, or as a ground cover. Can be used as a perennial or as an annual. Showy flower clusters about 2" across cover the vines in Spring and sporadically in Summer. Responds well to being cut back after first big flush.
<b>Veronica peduncularis 'Georgia Blue'</b> Creeping Speedwell	Feb-Apr		Deep Blue	12" x 2" x 2"	# 1	A low, creeping ground cover with bright blue Forget-Me-Not like flowers. Beautiful with daffodils growing through the mat of foliage. Evergreen.
<b>Veronica spicata</b> Speedwell	June-Oct		Blue	12" x 12" x 12-18"	# 1	Upright perennial. Tall intense blue bloom spikes.
<b>Viguiera stenoloba</b> Skeletonleaf Goldeneye	Jun-Frost		Gold	4' x 3' x 3'	# 1	Texas native sub-shrub found on washes and slopes. Dark green aromatic leaves are topped with terminal daisy-type flowers. Extremely drought tolerant. Will perform well with no watering and left alone. Likes well drained soils. Also known as "Resinbush" Very tough and very hardy. Great performer in North Texas.
<b>Vinca major</b> Trailing Periwinkle	Mar-Apr		Blue	9" x 12"	18 ct	Deep green round leaves spotted with blue Periwinkle flowers. Also has a variegated form. Will naturalize. Will defoliate each summer by leaf rollers.
<b>Vinca minor 'Bowles'</b> Dwarf Trailing Periwinkle	Mar-Apr		Blue	6" x 4"	18 ct	Small glossy green leaves form a trailing mat. Pretty spring blooms.
<b>Viola odorata 'Royal Robe'</b> Wood Violet	Feb-Apr		Purple	9" x 6" x 6"	8 ct # 1	Lush heart-shaped green foliage dotted with small violet flowers. This variety is not as invasive as our native Viola.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
<b>Vitex agnus castus</b> Chaste Tree	May-August	Blue	12' x 15' 10"	Multi-trunk vase shape small tree or shrub. Gray-green, scented, palmate leaves. Flower spikes from 6" to 12" long.. Trimming back old flower spikes will promote more blooms. Good drainage is very important, Vitex will not tolerate wet feet. Clay soils will need to be amended. Vitex is native to the Mediterranean regions. Some parts of the tree are used as an anaphrodisiac, hence the name " Chaste Tree". Many different flower colors and growth habits are now available.
<b>Zantedeschia Calla Lily</b>	May-July	Orange,Pink, Purple,Red, Yellow,White	1-2 X 1-3 x 2-4' # 1 10"	Unusual spathe bloom in many different colors. Grown as an accent plant for planters, porches and patios. Also available is the giant white Zanteschia aethiopica that can be planted into the landscape in a shady situation with rich moist soil.
<b>Zephyranthes candida</b> Rain Lily	Aug-Sept	White	9" x 6" x 8" 8 ct	Tubular grassy foliage covered with star-shaped flowers. Blooms after late summer rains.
<b>Zephyranthes La Bufa Rosa</b> Giant Rain Lily	June-Aug	Whit/Pink	8" x 8" 8 ct	Found under evergreen trees on La Bufa del Diente mountain in Mexico by John Fairey, this is one of the larger rain lilies. It can take shade as well as sun, but appreciates shade in hottest part of north Texas summer.
<b>Zexmenia hispida (Wedelia texana)</b> Hairy Wedelia	May-Oct	Gold	18" x 18" x 24" # 1	Small daisy-like flowers wave above coarse hairy foliage. Drought tolerant. Very dependable bloomer. Will have some color all summer, just not huge amounts.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
<b>Acorus gramineus 'Variegatus'</b> Variegated Sweet Flag			12" x 12" # 1	Semi-evergreen, Fragrant ( citrus -like) green and white leaves are 1/8" wide. Leaves are erect and grow like fans. Spreads by underground rhizomes. Likes moist boggy areas, also areas at waters edge. Leaf tips can scorch if plants do not get enough water. Afternoon shade is required in hot north Texas summers.
<b>Bouteloua gracilis 'Blonde Ambition'</b> Blue Grama Grass	June-Aug	Blonde	12" x 12" x 24" # 1	Warm season clump-forming perennial grass. Very unique horizontal flower heads look like tiny flags flying above the foliage. With age the chartreuse flowers turn blonde. This grass can tolerate most soils, just make sure soil is well drained. Will naturalize.
<b>Carex glauca 'Blue Zinger'</b>			12" x 12" # 1	Narrow glaucous foliage. Wet site tolerant and shade tolerant. Prefers moist alkaline soil, but adapts well to other soil types. Cut back early spring for tidier appearance. Can be used as a shade ground cover, an accent or as a border. Evergreen.
<b>Carex oshimensis 'Evergold'</b> Japanese Sedge			12-18" x 8-12" # 1	Drooping, semi-evergreen clumping grass with variegated foliage. Yellow stripe with green edges, giving an overall golden appearance. Thrives in moist soils, but will grow in regular soils. Dislikes complete submersion. Do not allow to dry out. Good for low spots.

<b>Carex divulsa (tumulicola)</b> Berkeley Sedge			Green/Brown	18" x 12-18"	# 1 10"	Very adaptable and tough. Loose evergreen tufts of fine-bladed foliage. Once established it can take heavy foot traffic. Can tolerate drought but prefers regular water, can adapt to damp sites.
<b>Chasmanthium latifolium</b> Inland Sea Oats	Aug-Feb			18" x 30"	# 1	Deep green bamboo-like foliage with dangling oat-like spikelets. Very attractive. Reseeds readily. Great grass for shady areas.
<b>Cyperus alternifolia</b> Umbrella Plant				4' x 3'-4'	# 1 10"	Grown for its unusual umbrella-like foliage. Prefers bog conditions, but not necessary. Very tough.
<b>Cyperus diffusus</b> Dwarf Umbrella Plant				12" x 9"	# 1 10"	The same interesting foliage as Cyperus alternifolius but this one forms a much shorter and tighter spreading ground cover. Is very tough.
<b>Eragrostis curvula</b> Love Grass	Aug-Sept			24" x 24" x 40"	# 1	African native. Introduced to Stillwater, OK in 1935. Used as livestock forage and for erosion control. Its' massive root network makes it great for erosion control. Has now spread into wild habitats. The leaves are wispy, long and weep over. Is used ornamentally now. Very tolerant of any soil type. Open flower panicles wave above the foliage.
<b>Festuca ovina var. glauca</b> Blue Fescue	Jun			9" x 6" x 9"	# 1	Very attractive cool season blue clumping grass. Very fine textured. Short lived perennial grass.. Requires good drainage.
<b>Juncus inflexus 'Blue Arrows'</b>				12" x 20-30"	# 1	Vertical, stiff ,blue-gray leaves grow in a clump. Can be grown as a pond plant or on dry land. It provides structure in containers. Heat and cold tolerant. Is usually evergreen.
<b>Juncus pallidus 'Javelin'</b> Javelin Rush				24" x 36"	# 1	Striking upright stiff green grass. Very rugged. Once established it can be heat and drought tolerant. Can also grow in standing water. Low maintenance. Turns wheat colored in the winter.
<b>Leymus arenarius 'Blue Dune'</b>	July-Aug		Tan	24" x 36"	# 1	Very bright blue foliage. Can grow in sandy as well as a rich soil. Must be well drained. Is salt tolerant. Spreads by rhizomes, therefore can be used as a ground cover or for erosion control. Also, great for texture and color contrast in pots and color beds. Deciduous.
<b>Miscanthus sinensis 'Adagio'</b> Dwarf Maiden Grass	Aug-Oct		Pink to Cream	4' x 3' x 5'	# 1 10"	Arching clump of 3/8" wide, fine textured, silver-green leaves. Graceful, fan-shaped plumes in late summer. This is an excellent maiden grass for the smaller garden.
<b>Miscanthus sinensis 'Gracillimus'</b> Maiden Grass	Aug-Oct		Copper to Silver	4' x 5' x 7'	# 1 10"	One of the oldest and most popular cultivars of Miscanthus sinensis. Narrow green leaves with a silver mid-rib form a large rounded arching clump. Tassel-like plumes form in late summer and early fall. Cut old foliage back just as new foliage emerges.
<b>Muhlenbergia capillaris</b> Gulf Muhly	Sept-Oct		Raspberry Pink	3-4' x 3' x 4'	# 1 10"	Very popular native grass, with narrow hair-like leaves that arise from a basal clump. Clouds of brightly colored cotton candy-like panicles stand above the foliage. Tolerant of a wide variety of soil conditons, must be well drained. Very popular.
<b>Muhlenbergia lindheimeri</b> Lindheimer's Muhly	Sept-Oct		Tan	4' x3-4' x 5'	10"	Popular Texas native. Semi-evergreen gray-green foliage. Fine textured arching grass with upright narrow feather-like spikes. Heat and cold tolerant. Strong performer.
<b>Nassella tenuissima</b> Mexican Feather Grass	Jun-Sept			24" x 24" x 24"	# 1 10"	Texas native. A winter grass that produces dense hair-like foliage that is green in the cool season and turns straw colored in the summer. Hates wet feet. Reseeds readily.
<b>Pennisetum alopecuroides 'Hameln'</b> Dwarf Green Fountain Grass	Aug-Oct		Cream	2' x 2' x 3'	# 1 10"	Clumping grass with fine textured foliage. Covered with tiny bottle brush-like inflorescences. A popular ornamental grass in north Texas.
<b>Pennisetum alopecuroides 'Little Bunny'</b> Miniature Fountain Grass	Aug-Oct		Cream	12" x 8" - 10" x 18"	# 1	A miniature form of 'Hameln'. Cute tufts of grass that are covered in little fuzzy plumes. Great for borders, rock gardens and tiny pocket gardens. Plumes of this grass and Hameln grass can be used dried or fresh in floral arrangements.
<b>Pennisetum setaceum 'Rubrum'</b> Purple Fountain Grass	May-Nov		Tan	3' x 4' x 5'	# 1 10"	Annual grass with very attractive arching burgundy foliage with equally attractive light tan bottlebrush like plumes.
<b>Pennisetum X 'Black Stocking'</b>				3-4' x 5-6'	10"	Upright perennial grass. Black/purple leaves and canes with green hues. Can take low water situations, loves the heat. After leaves brown out from freezes, you can cut them back or leave till new ones emerge in the spring. No flowers in north Texas.
<b>Pennisetum X 'First Knight'</b> Napier Grass				2-3' x 4'	10"	Dark purple black leaves. Upright sword-like leaves in the middle of th clump with arching outer leaves. Loves the heat. Full sun for best color. No flowers in north Texas. In fall/winter leaves will turn brown. Remove brown leaves before new ones come up in the spring.
<b>Pennisetum X ' Princess Caroline'</b> Napier Grass				3' x 4'	10"	Arching, dark purple strap leaves make a compact mound. No flowers are produced in north Texas due to winter freezes. Remove brown leaves of winter before the new ones emerge in the spring. Loves the heat. Is very drought tolerant. Full sun for best color. Heavy nitrogen causes leaves to turn green. This is a Texas Super Star.
<b>Schizachyrium scoparium</b> Little Bluestem	Sept-Nov		Red	12' X 36'	# 1	Fine textured, warm season, bunch grass. Blue-green foliage in the summer turning bronze-red the fall and winter. Does not like irrigation. Very vertical habit. Deer resistant.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
<b>Autumn Fern 'Brilliant'</b> <i>Dryopteris erythrosora</i>			18" x 18"	8 ct # 1 10" Stiff fronds with copper colored new growth turning to a bronze-green when mature. Evergreen. Keep out of sun light.
<b>Beautiful Wood Fern</b> <i>Dryopteris pulcherrima</i>			18" x 18"	# 1 Evergreen fern. Endures the hot north Texas summer and still looks great. Likes rich, moist, compost laden soil.
<b>Dixie Wood Fern</b> <i>Dryopteris x australis</i>			2' x 4'	# 1 A large growing semi-evergreen fern with deep green traditional fronds.
<b>Japanese Holly Fern</b> <i>Cyrtomium falcatum 'Rochfordianum'</i>			24" x 24"	8 ct # 1 Coarse fronds that have leaflets that resemble Holly leaves. Does not like soggy soil. Semi-evergreen.
<b>Japanese Painted Fern</b> <i>Athyrium nipponicum 'Pictum'</i>			12" x 9"	8 ct # 1 Deciduous fern emerges in late spring with pink-tinted silver foliage. Requires constantly moist conditions.
<b>Korean Rock Fern</b> <i>Polystichum tsus-simense</i>			9" x 6"	8 ct Compact, dark green fronds with black stems. Evergreen. Prefers rich moist soil but will tolerate dry periods.
<b>Lace Fern</b> <i>Microlepia strigosa</i>			12" x 24"	# 1 Deciduous and tough clumping fern with frilly-edged foliage. Tender perennial in north Texas.
<b>Maidenhair Fern, Hardy</b> <i>Adiantum x mairisii</i>			12" x 12"	# 1 Dainty, delicate and airy foliage. Propagated by tissue culture, this sterile hybrid is a knock-off of Southern Maidenhair fern. Usually evergreen in north Texas. Needs shade, moist well drained soil and a sheltered environment.
<b>Mexican Male Fern</b> <i>Dryopteris pseudo felix-mas</i>			36" x 36"	# 1 Upright vase form. Native of Mexico. Needs rich moist soil. Fronds are produced throughout growing season. Can be evergreen if the winter is mild. Protect fronds from wind for better appearance.
<b>Southern Wood Fern</b> <i>Thelypteris kunthii</i>			18" x 24"	8 ct # 1 The hardiest and most commonly grown fern in our area. Spreads by underground runners. Deciduous light green foliage.
<b>Tassel Fern</b> <i>Polystichum polyblepharum</i>			15" x 12"	8 ct Very glossy bright green evergreen foliage. Grows during the spring. Not particularly fond of hot north Texas summers.
<b>Wavy Cloak Fern</b> <i>Cheilanthes sinuata (Astrolepis sinuata)</i>			12" x 6" - 18"	8 ct # 1 Native to Big Bend. This fern is adapted to extremely dry areas. Needs well drained soil. Roots like the shade and fronds like the sun. Semi-evergreen. Deer resistant.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
Basil		White	18" x 24"	8 ct Annual, warm season herb. Very cold sensitive. All time favorite for the Texas Herb Gardener.
Chives, Garlic		White	10" x 12"	8 ct Perennial herb. This chives species has a flattened leaf and a mild garlic flavor. Can remove flowers to prevent reseeding. Makes an attractive ornamental perennial with late summer blooms of white globes.
Chives, Onion		Lavender	10" x 12"	8 ct Perennial herb. One of the most widely used herbs. Dark green, cylindrical leaves form an evergreen clump w/pom-pom flowers.
Cilantro			6" x 8"	8 ct Annual herb. Aromatic foliage resembles flat leafed parsley. Popular herb for Mexican foods. Prefers cooler weather. Allow to go to seed for self sowing.
Fennel 'Rubrum'		Yellow	12" x 36"	8 ct Perennial herb. Finely cut bronzy-red foliage, flat flowers, licorice-scented leaves and seeds.
Lavender x 'Provence' Lavender Hybrid	May-July	Blue	18" x 24" x 30"	8 ct Hybrid that is bred to tolerate heat and humidity better. 'Provence' has high essential oil content and robust growth. In addition to the spring bloom flush, 'Provence' can bloom again in the fall. Good air circulation and drainage are essential as is an alkaline soil.
Lavender, Spanish	May-July	Violet Purple	18" x 18" x 24"	8 ct Native to the Mediterranean. As with other lavenders it blooms best in the spring and is enjoyed as a fragrant gray-green shrub the rest of the year. The bloom looks like a little pineapple with rabbit ears on top. Prefers chalky well drained soils.
Lemon Grass			24" x 24"	8 ct Aromatic clump forming strap-like leaves with an arching habit. Lemon grass is tropical. In north Texas, it is treated as an annual. It is used for making teas and in Thai cooking. Must have moist well drained soils. Does not like to stay dry. Foliage suffers in periods of drought.
Oregano, Italian		White	36" x 12"	8 ct Perennial herb. Italian oregano is a cross between Greek oregano and sweet marjoram. This cross results in the perfect blending of flavors excellent for cooking. Can be used dried or fresh. Oregano has a spreading habit.
Parsley, Curled			12" x 12"	8 ct Biennial herb. Ruffled decorative leaves create a nice garden accent as well as an edible garnish. Remove flower stalks to keep plant going into 2nd year.
Parsley, Italian or Flat Leafed			12" x 12"	8 ct Biennial herb. Dark green leaves resemble celery tops. The leaf flavor of Italian parsley is more flavorful than the curled.
Rosemary 'Hill's Hardy'		Blue	3' x 3'	8 ct Perennial evergreen woody herb that grows upright with aromatic foliage. Can be used dried or fresh. Needs well-drained soil.
Sage 'Berggarten'		Purple	2' x 2'	8 ct Perennial herb. Aromatic silver-gray leaves. It is drought resistant and sensitive to wet feet. Prefers loose soil.
Sage 'Tricolor'			2' x 2'	8 ct Perennial herb with green, white and pink foliage. Can be used in cooking and also for its decorative foliage.
Spearmint		White	2' x 1'	8 ct Grows best in moist soil. Spreads vigorously by underground rhizomes. (Can become invasive) For peak flavor cut leaves as plant begins to flower. Can be sheared after bloom to stimulate new growth. Ready for mojitos or mint juleps?
Tarragon, French			24" x 18"	8 ct Best-flavored tarragon. For best flavor, use fresh or frozen. Cannot be grown from seed. Divide every 3-4 years to maintain vigor. Cut back in the spring. Must have good drainage at all times.
Thyme, English		Lavender/White	12" x 12"	8 ct Semi-creeping and evergreen. Tiny aromatic leaves. Most common type of thyme. Must have well drained soil.
Thyme 'Golden Lemon'			10" x 8"-10"	8 ct Fantastic upright golden variegated cultivar with delightful lemon scent and flavor. Evergreen.
Thyme "Silver Edged"		Pink	10" x 8"-10"	8 ct Evergreen. Each tiny leaf is outlined in white. Tight and compact. Can be used in containers or in the garden. Must have well drained soil. Use as you would any other thyme.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
<b>Bignonia capreolata 'Tangerine Beauty'</b> Cross Vine	May-Jun	Orange-Red	6' x 30'	# 1 Evergreen foliage. Showy 2" long trumpet-shaped flowers. Vines cling with tendrils. Very vigorous and very tough.
<b>Clematis x hybrida</b> Clematis Vine 'Bee's Jubilee' 'Henryi' 'Jackmanii' 'Sunset' 'Ramona'	Apr-May	Two Tone Pink White Purple Raspberry-/Purple Wedgewood Blue	1'- 2' x 6'-8'	# 1 Large star-like flowers on thin delicate vines. Mulch and shade root zone from summer heat, The top of the vine will need sunlight. Needs a rich, well drained soil. Do not let soil stay dry.
<b>Clematis paniculata</b> Sweet Autumn Clematis	Aug-Sept	White	5' x 20'	# 1 10" Twining, vigorous and easy to grow. Blooms on current seasons wood. Responds to heavy pruning. Fragrant 1"star-shaped blooms appear on new growth, unusual silvery seed heads. A grand show when vine is covered in blooms. Needs sturdy support. Is semi-evergreen.
<b>Cypress Vine</b>	July-Oct	Red	3' x 8'	# 1 Finely cut, soft foliage decorated with tiny bright trumpet-shaped flowers. Fast growing and reseeds readily. Annual.
<b>Ficus pumila</b> Creeping Fig			2' x 20'	# 1 Self-clinging vine that forms a solid green mat. Often used to cover unsightly walls or to soften architectural features. With age the vine will become woody and will produce an occasional fruit. Does not like hot west walls.
<b>Gelsemium sempervirens</b> Carolina Jessamine	Feb-Mar	Yellow	3' x 20'	# 1 Twining evergreen vine needs support. Dark shiny green leaves. Showy clusters of trumpet shaped flowers. It can be trained to cover arbors or walls. All plant parts contain toxic alkaloids. Its early blooms announce the arrival of spring. Does best in moist well drained soil. State flower of South Carolina.
<b>Lonicera sempervirens 'Major Wheeler'</b> Coral Honeysuckle	April-Jun	Coral Red	4' x 8'	# 1 Mildew resistant variety. The more sun it gets the more blooms it will have. Needs a support to climb, since it is a twining vine. Blooms on new and previous years growth.
<b>Mandevilla</b>	May-Oct	Pink, Red, White	3' x 12'	# 1 10" Deep green foliage with large trumpet-shaped flowers. This is a beautiful twining tropical vine for summer garden interest. Likes the heat.
<b>Passiflora caerulea 'Blue Crown'</b> Passion Vine	May-Oct	Blue/White	4' x 12'	# 1 Very unusual, almost plastic looking flower, about 3" across. The flower is symbolic of the Passion of Christ. It is a white flower with a corona of blue filaments, five greenish-yellow stamens and 3 purple stigma. The leaves are lobed. Twining tendrils attach to anything of close proximity. An oval orange edible fruit is produced (but not very exciting tastewise). Is semi-evergreen.
<b>Passiflora incarnata 'Inspiration'</b> Passion Vine	May-Oct	Purple	4' x 12'	# 1 Exotic scented flowers open in the morning and last only one day. Certain north Texas butterfly larvae feed on the passion vine. Very fast grwoing vine, must be kept in bounds.
<b>Passiflora x 'Lady Margaret'</b> Passion Vine	May-Oct	Red	4' x 10'	# 1 Red flower with white center. May not survive the north Texas winter. Adds a lovely tropical feel to the garden.
<b>Passiflora X 'Purple Passion'</b> Passion Vine	May-Oct	Purple	4' x 12'	# 1 Vigorous and prolific sterile cultivar. Lovely and unusual flower representing the Passion of Christ. Flowers last only one day. Likes fertile soil. Give it pleny of room. Butterfly larvae feed on this vine.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION
<b>Aloe ferox</b> Cape Aloe or Bitter Aloe		Red-Orange	1' x 2' x 3'	#1 From the Cape region of South Africa., this aloe is one of the tallest of Aloe's. It is a single stem that grows up to 10' tall in its native habitat, growing in dry rocky places with scrub. Thick fleshy leaves arranged in a rosette have brownish-red marginal spines and smaller spines on the leaf surfaces. Flowers are erect candleabra racemes. "Bitter Aloes" a purgative is made from this aloe. Like most all succulents, a dry, well drained soil is a must. Hardiness zone is 9-11. This aloe is a bit more frost hardy than most other aloes.
<b>Caralluma caudata</b>		Yellow/Purple	6" x 3"-5"	8 ct Five pointed starfish-like flowers. The flowers are yellow with purple-brownish spots and a concave purple center. The smell emitted from the flower is that of rotting meat. This fetid odor attracts pollinating flies. Upright, 4-angled, fleshy, spine-like stems of green. Native to Africa, it is found in half shaded, dry, rocky places. In north Texas summers it will need to be moved to a bright shady location.
<b>Crassula coccinea 'Campfire'</b>			12" x 12"	8 ct Large coarse propeller-like leaves. Trailing in habit. Leaves turn red in cool sunny weather. In hot north Texas summer, shade is required. Must have good drainage. Is not winter hardy in north Texas.
<b>Crassula mucosa</b> Princess Pine		Yellow	6" x 6"-10"	8 ct Somewhat upright but mostly a sprawling habit. Resembling a club moss in texture. Unique tiny, tightly overlapping scale-like leaves completely hide the stem on 'Princess Pine. Needs shade in the hot summer. Not hardy in north Texas.
<b>Crassula tetragona</b> Miniature Pine Tree			8" x 12"	8 ct Upright succulent resembling a miniature pine tree. Not winter hardy in north Texas. Allow plant to dry between waterings. Needs well drained soil. Great in mixed succulent containers. If kept indoors, needs a sunny spot and kept dry.
<b>Delosperma cooperii</b> Hardy Ice Plant	May-Sept 	Violet-Pink	18" x 8" x 8"	8 ct # 1 Trailing mat of succulent leaves with bright 1" cactus-like flowers. Needs good drainage. Hybrids of different colors also available.
<b>Delosperma Fire Spinner</b>	May-July 	Orange-Magenta	12" x 1" x 2"	8 ct Originating from the high altitudes of South Africa. Neon bright 1 1/2" flowers cover a mat of succulent foliage. Nice in rock gardens and also trailing over containers. Needs some shade in hottest part of north Texas summer. Must have a well drained soil. Hardy in north Texas.
<b>Echeveria gibbiflora</b>		Red-Yellow	12" x 12" x 18"	8 ct Many hybrids have derived from this species, (which itself is quite variable). It is the parent of the majority of the Echeveria hybrids. Fleshy rosettes of greenish leaves with pink margins.
<b>Echeveria imbricata</b>		Red-Yellow	12" x 12" x 18"	8 ct Probably the most well known of the " Hens and Chicks". E. imbricata is a cross between E. gibbiflora and E. secunda. Everyone's mother or grandmother had this one. Very durable and more cold tolerant than most of the other hybrids. Pale blue, grey, green fleshy rosettes. Pink margins. Arching flower inflorescences. Needs well drained porous soil. In hot summer of N. Texas shade is welcomed.
<b>Echeveria nodulosa</b>		Yellow	1' x 1'	8 ct Succulent with horizontal branches that arch upwards and bear large rosettes of green leaves topped with red striping. Needs well drained soil . Likes full sun when it is cool, but prefers shade when the sun heats up in summer.
<b>Echeveria 'Perle Von Nurnberg'</b>		Coral	6" x 5" x 14"	8 ct Stiff, fleshy, acuminate leaves form a symmetrical, solitary rosette. Waxy gray leaves have rose pink highlights and the appearance of being dusted with fine talc. Floral inflorescences are born on one foot tall stalks. Not winter hardy in north Texas, but will take a light frost. In most intense summer heat shade is suggested.
<b>Echeveria runyonii 'Topsy Turvy'</b>		Coral	6" x 6" x 12"	8 ct Rosette forming succulent. Gray leaves that curve upward and inward. Flowers appear on an arching stalk above the foliage. Needs well drained soil. May need some shade in hottest part of summer. Not winter hardy in north Texas, but can take a light frost.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION	
<i>Echeveria setosa</i> 'Arrow Shape'		Orange	8" x 8" x 12"	8 ct	Fine white fuzz on 3" long narrow leaves that are tipped with red which form loose rosettes. It is multi-branched and takes on a shrubby appearance. Needs well drained soil. Needs extra protection from sun as north Texas summer heats up.
<i>Echeveria strictiflora</i>	Jun-Aug	Red	5" x 5" x 8-12"	# 1	Native to the Trans Pecos region of Texas. Rosettes of smooth, fleshy, gray, green, spatulate leaves. Red margins found on some. Red flower scape above foliage bears scarlet flowers. Good drainage is a must. Some shade needed in hottest of Texas summer. Plant is semi-deciduous. Can overwinter outside.
<i>Graptopetala</i> 'Fred Ives'		Pale Yellow	8" x 5" x 10"	8 ct	Succulent leaves of bronzy pink form clumps of rosettes. This is a hybrid of <i>G. paraguayense</i> . One foot stems with branched inflorescences rise above the foliage. Hardy to around 25-30 degrees.
<i>Graptopetalum paraguayense</i> Ghost Plant		White	12" x 8" x 15"	8 ct	Succulent gray rosettes with pink highlights. The rosettes are found at the end of long snaking stems. Leaves are brittle and fall off easy. In the hottest part of the summer more shade is required. May freeze in the north Texas winters. Native to Mexico. Old-timey pass-a-long plant.
<i>Huernia zebrina</i> Lifesaver Plant		Yellow with wine	8" x 6"	8 ct	Low growing, somewhat creeping succulent with 4-5 sides angled fleshy stems. Very unusual flower with a shiny wine-red annulus (resembling a life-saver) around the corolla mouth. The corolla is yellow with wine-colored stripes. Needs well drained soil. In the hottest part of the north Texas summer shade is needed. Not winter hardy but can take a light frost.
<i>Kalanchoe beharensis</i> Velvet Leaf	Dec-Jan	Yellowish/Green	2' x 2'	8 ct	Discovered near Behara, Madagascar. Succulent shrub with large somewhat triangular leaves covered in soft velvety hairs. The leaves turn a golden brown when grown in sun and are silvery gray when grown in shade. In the hottest part of north Texas summer some shade is beneficial. If grown inside place in a bright sunny window. The variety called 'Fang' has hooked tubercles on the backside of the leaf that resemble tiny teeth or 'fangs'. Winter hardy to around 30 degrees.
<i>Kalanchoe marnieriana</i> Mariners Kalanchoe		Rosy Pink	24" x 12"	8 ct	Round succulent blue-green leaves face inward towards the stem. Leaves have a pink tinge in cooler weather. Pink flowers dangle from red flower stalks which are held above the foliage. Is cold hardy to around 25 degrees. Well drained soil. Some shade in hottest of north Texas summer sun.
<i>Kalanchoe thyrsiflora</i> Flap Jack Plant, Paddle Plant	Dec-Jan	Yellow/White	12" x 12" x 20"	8 ct	Thick fleshy pancakes of glaucous leaves are outlined in bronzy red. The unique leaves are arranged on a thick stalk. In hottest heat of summer, additional shade is required. Winter protection is needed in north Texas, May take a light frost. Well drained soil is required.
<i>Kalanchoe tomentosa</i> Panda Plant			10' x 10"	8 ct	Velvety gray leaves are outlined in brown. Can take full sun if outdoors until the north Texas heat becomes intense. The plant then must be moved to a shady locale. Can be grown indoors in a bright sunny location. Must have a well drained soil. Keep soil on the dry side.
<i>Lampranthus</i> Bush Ice Plant	May-Oct	Rose	12" x 12"	8 ct	Three sided, 1-2" narrow, gray-green, succulent leaves. Stems become somewhat woody with age. Sprawling habit. Well drained soils. 1" bright cactus like flowers. Tender perennial.
<i>Portulacaria afra</i> Elephant Bush			1' x 1'	8 ct	Native to South Africa where it is called 'Spekboom' (Bacon Tree) by the Afrikaans. There it is an essential for browsing wildlife. It can remain succulent for long periods of searing heat and drought. It has thick upright mahogany stems with round green succulent leaves. Great in mixed succulent containers as the upright element or also very popular grown as a bonsai. Hardy to around 25-30 degrees.
<i>Sedum kamtschaticum</i>		Yellow	9" x 2" x 4"	8 ct	Succulent trailing green leaves toothed on the tips. Leaves are arranged in a whorl.
<i>Sedum makinoi</i> 'Ogon'		Yellow	9" x 2" x 4"	8 ct	Spreading golden mat of dainty round leaves. Tiny yellow star shaped flowers on stalks above the foliage. Protect from hot afternoon sun. Must have well drained soil. Hardy to zone 7.

<b>Sedum m. 'Lemon Ball'</b>	June		Yellow	9" x 3" x 6"	8 ct	Bright yellow spruce-like succulent foliage. It is brighter yellow than 'Angelina'.
<b>Sedum nussbaumerianum</b>			White	12" x 8" x 15"	8 ct	Short stemmed shrub-like succulent with small rosettes at stem end. Color intensifies to a rusty red with more sun exposure. The inflorescence is white. Needs well drained soil. Is hardy to around 30 degrees.
<b>Sedum potosinum</b>	June		White	9" x 2" x 2"	8 ct	A mat of tiny, whitish-green succulent leaves. This evergreen is excellent between stepping-stones. In extreme heat some shade is welcomed. White star shaped flowers. Very hardy.
<b>Sedum reflexum</b> Gray Sedum	June		Yellow	9" x 3" x 6"	8 ct	A mat of blue-gray spruce-like foliage. Needs well drained soil. Most commonly seen in north Texas. Some shade needed in hottest summer sun.
<b>Sedum rubrotinctum</b> Pork and Beans			Yellow	6" x 6" x 6"	8ct	Upright clusters of 'jellybeans' with red tips. Red color is more pronounced with sun and cooler temps. Has yellow star shaped flowers. Not winter hardy. Needs well drained soil.
<b>Sedum rupestre 'Angelina'</b>	June		Yellow	9" x 3" x 5"	8 ct	Mats of succulent needle shaped foliage with golden highlights. Cooler temperatures leave a kiss of orange on the leaf tips. Star shaped flowers wave above the foliage. Well drained soil needed. Hardy in north Texas.
<b>Sedum spectabile 'Autumn Joy'</b>	Aug-Sept		Rose Bronze	18" x 12" x 18"	# 1	Large succulent gray-green foliage. Upright branched shrub-like. Covered with 6" flat flower heads late summer and fall. Hardy.
<b>Sedum spectabile 'Elsie's Gold'</b>	Aug-Sept		Pink	18" x 12" x 18"	# 1	Sport of Sedum 'Autumn Joy'. Has cream-gold variegated leaves. Blooms in fall. Is deciduous. Needs well drained soil. Hardy.
<b>Sedum spurium 'Dragon's Blood'</b> Dragon Blood Sedum	June		Rose Red	9" x 2" x 2"	8 ct	Semi-evergreen little rosettes with a trailing habit. Outstanding red foliage with sunlight. May need afternoon shade in extreme heat conditions. Likes well drained soils.
<b>Sedum spurium 'John Creech'</b>	Aug-Sept		Pink	9" x 3-4" x 5"	8 ct	Discovered by Dr. John Creech, former director of the US National Arboretum, in 1971. Spreading low growing mat of little round leaves with serrated edges. Hardy.
<b>Sedum 'Sunsparkler Cherry Tart'</b>	Jul- Sept		Red	12" x 6" x 8"	# 1	Fleshy, oval, cherry, red foliage sprawling in habit. Leaves are about 1/2' to 1" wide and long. Large flower clusters are held above the foliage. Needs well drained soil. Is evergreen to semi-evergreen.
<b>Sedum 'Sunsparkler Dazzleberry'</b>	Jul- Sept		Raspberry	12" x 6" x 8"	# 1	Smokey, blue-grey foliage that is about 1/2" to 1" wide and long. Flower clusters above the succulent foliage. Great as a ground cover or in containers. Needs well drained soil. Is evergreen to semi-evergreen.
<b>Sedum 'Sunsparkler Lime Zinger'</b>	Jul- Sept		Pink	12" x 6" x 8"	# 1	A low mound of succulent apple green leaves with pink margins. Flower clusters appear in late summer. Spreading in habit. Great in containers or as a front border in a bed. Evergreen to semi-evergreen. Must have well drained soil.
<b>Sempervivum sp</b> Houseleek			Pink	5" x 3"	8 ct	Tinged rosettes of green, burgundy or coral, turn darker with cooler temperatures. Bristly bloom stalk will emerge from the base and will have a pink flower. Prefers cool temperatures. They were traditionally grown on rooftops between roof tiles in Europe, hence their nickname of "Houseleek". Will need protection from the heat and sun of north Texas summers.
<b>Senecio talinoides ssp mandraliscae</b>			White	12" x 12"	8 ct	Blue gray cylindrical succulent leaves form a conical upright mini-tree. Needs well drained soil. Prefers light shade in the heat of summer. Not winter hardy in north Texas.

NAME	BLOOM TIME	FLOWER COLOR	SIZE Spacing x Height x Bloom Height	DESCRIPTION	
<b>Agave americana</b> Century Plant	Infrequent	Yellow	8'-10' x 6' x 15' - 20'	# 1 10"	Most attractive large blue agave. This clone has grown successfully in N. Tx since the early 90's. Massive, smooth, thick blue leaves can be 6' long and 10" wide with curved spines along margins and a very prominent 1" long spine at the tip. Flowers about every 10 years in North Texas. Flower stalk can reach between 20-30" tall and will be topped with layered umbels of flowers. The plant dies after blooming, does make offsets. Needs well drained gravelly soil. Can tolerate some shade. Winter damage can occur in severe winters.
<b>Agave neomexicana</b> New Mexico Century Plant	Infrequent	Yellow	2' x 2' x 12'	# 1 10"	Most cold hardy agave, to around 0° F. Native to Texas and New Mexico. Large, gray to light green, heavily armed, leathery foliage form a rosette. Suckers freely. After 8-20 years of slow growth, a bloom stalk of up to 12' will produce a yellow candelabrum of flowers. Hummingbirds love the flowers.
<b>Agave ovatifolia</b> Whale's Tongue Century Plant	Infrequent	Greenish/Yellow	4' x 4-5' x 10'	# 1 10"	Most attractive medium blue agave for north Texas. If you must choose one Agave, choose this one. Symmetrical rosette of wide, blue cupped leaves. Toothed leaf margins with a 1" long terminal spine. Needs well-drained soil and is drought tolerant. Will grow larger if given some irrigation. Hardy to around 10 degree.. Lovely new selection called 'Vanzie' is also available.
<b>Agave parryi</b>	Infrequent	Yellow	2' x 2' x 10'	# 1 10"	Slow growing. Compact rosette of silver-blue leaves that are 7" to 20" long. Marginal dark brown teeth, very prominent dark tip. Colonies are formed from offsets. Plant dies after blooming. Good drainage is a must, especially in the winter. Cold hardy for north Texas around 10-15 degrees.
<b>Agave salmiana</b> Pulque Agave	Infrequent	Yellow	6' x 5 x 12-20'	# 1 10"	Huge specimen plant. Open, graceful and green. The leaves are spined and can grow 6' long and 1' wide. Produces pups readily. At around age 15 a bloom spike will be produced and the mother plant will die. Tolerant of many different soils, as long as they are well drained. Fermented drink called pulque is made from the sap. Native to Mexico. Hardy to around 10-15 degrees. Best green agave.
<b>Agave scabra</b> Rough Leave Agave	Infrequent	Yellow	3-5' x 3-5' x 15'	# 1 10"	Blue Agave. Leaves have a fierce terminal spine and recurved marginal spines. An open rosette that freely suckers. Rigid curved leaves are rough and sandpaper-like on the backside. Takes reflected heat well. Very hardy in north Texas winter. Suffers less winter damage than Agave americana. As with all agaves, well drained soil is required. Great Blue Agave for north Texas.
<b>Agave victoriae-reginae</b> Queen Victoria Agave	Infrequent	Reddish	1' x 1' x 10'	# 1	Noted for leaf margins that are outlined in white. The short thick geometric leaves form a tight rosette. Is extremely slow growing. Could take from 5-10 years to reach soccer ball size. Leaf margins are smooth but the leaf tip is spined. Likes good drainage, slightly sloped site is good. Very heat and cold tolerant. Rarely blooms, may take up to 40 years to send up a 10' bloom stalk. Plant will die after blooming. Hardy to about 10 degrees. Native to central Mexico.
<b>Dasyliirion texanum</b> Texas Sotol	May-Aug	Cream	5' x 5' x 15'	# 1 10"	Very heat tolerant Texas native. Evergreen. Grows naturally in arid rocky limestone. Very sharp spines, leaves that are 2.5' long and less than 1/2" wide Must have well drained soil.
<b>Dasyliirion wheeleri</b> Common Sotol	May-Jul	White	6' x 4-6' x 10'	# 1 10'	Very heat and drought tolerant. Must have well drained soil. Hardy to 5°F. Evergreen, narrow, 1/2" wide, 2'-3' long blue-green leaves radiate from short thick central stem. Leaf edges are armed with hooked teeth. Bloom stalk of 6'- 10' will bear tiny white flowers that form a spike. Use crushed granite or limestone mulches. Deer resistant.
<b>Dyckia 'Burgundy Ice'</b>			1' x 1'	# 1	A yucca-like rosette. Deep burgundy leaves have heavily spined margins. A beautiful addition to someones cactus and succulent collection. Great in a pot so it can be brought inside during the cold days of winter.
<b>Hesperaloe parviflora</b> Red Yucca	Spring-Frost	Coral	3' x 2 - 3' x 5'	# 1 10"	Hardy xeriscape plant with long bloom season. Adaptable to a wide range of soils and climates. Arching evergreen foliage has curly threads along the blade edge. Hummingbirds love its nectar. Cold hardy in north Texas.
<b>Hesperaloe parviflora 'Yellow'</b> Red Yucca- (Yellow Bloom)	Spring-Frost	Yellow	3' x 2 - 3" x 5'	# 1 10"	The unique yellow flower on this plant sets this Hesperaloe apart from the more common coral blooming one. It is just as hardy and long blooming as its' coral blooming relative. Also evergreen, hardy and tough.

<b>Manfreda 'Spot'</b>	Spring		Pink/Green	18" x 18" x 72"	# 1 10"	Known for its' outstanding maroon spots. Green leaves emerge from a central rosette. The spots become more pronounced with age on this semi-succulent perennial. It may go dormant in the winter, but if protected will not. The flowers are born on 5' stalk. Agave Spot is drought and humidity tolerant.Can take some shade in hot summer. Needs well-drained soil. Readily produces pups.
<b>Opuntia cacanapa 'Ellisiana'</b> Spineless Prickly Pear	May-Jun		Yellow	3'-6' x 3-4'	10"	Typical Prickly Pear cactus,without the long spines. It does have tiny tufts of hair-like glochids (beware). Produces red fruit (tunas) that ripen in late summer. Easy to grow and is drought resistant.
<b>Opuntia engelmannii</b> Prickly Pear Cactus	May-Jun		Yellow	4-7' x 3-5'	10"	Flat fleshy green pads have long wicked spines and hair like glochids. The red egg shaped fruits are borne on the edges of the pads. Pads, flowers and fruit are edible. Also makes a great natural fence. Hardy Easy to grow.
<b>Opuntia e. 'Linguiformis'</b> Cow's Tongue Prickly Pear Cactus	May-Jun		Yellow	5-6' x 2-6'	10"	Originally found south of China Grove, TX. The prickly pads (stems) are elongated like a cows tongue and can grow up to 18" long. The edible fruit ripen to purple in late summer.
<b>Opuntia imbricata</b> Tree Cholla Cactus	May-Jun		Magenta	5-6' x 6-7'	10"	Native to the Chihuahuan desert of Texas. Dark green heavily branched cylindrical stems that can grow up to 14" have prominent tubercles (small wart-like projections on the stems from which spines grow). Spines are red. The 2" yellow fruit is dry and not very tasty. The dead stems often made into walking canes.
<b>Opuntia microdasys</b> Bunny Ears Cactus	May-Jun		Yellow	2.5' X 3-4"	10"	Native to Mexico. 3-6" pads covered in dense clusters of white glochids, no spines. The glochids are easily detached when touched, causing great skin irritation until removed. Bunny Ears are smoother and more delicate in appearance than prickly pear. Burns when temps dip into the teens.
<b>Opuntia violacea</b> Purple Prickly Pear Cactus	May-Jun		Yellow	3' x 5'	10"	Same prickly pear traits but with striking purple pads. Purple color is more intense in times of stress. Has fewer spines than other prickly pear cactus.
<b>Yucca aloifolia</b>	May-July		Cream	4'-5' x 5-10'	10"	Likes sandy soil. Native to the Atlantic and Gulf states. Hardy zone 8-11 . Tall, narrow trunk. When the trunk gets too tall it will fall over on the ground and the tip will then grow upwards.Young leaves stand erect and the older leaves reflex down,turn brown and hang down around the trunk. Readily offshoots at the base. Purple, 2" elongated fruit. High salt tolerance.
<b>Yucca baccata</b> Banana Yucca	May-July		Cream	3' x3' x 4'		Common yucca found in the Southwest. It is a stemless rosette with narrow, blue-green, spine-tipped leaves that can reach up to 30" long. Leaves area curved inwards and have marginal filaments. Plants grow in clusters. Flower stalks are covered in dangling bells of cream, tinged with purple. Fruit is fleshy and banana shaped. Very cold hardy in north Texas.
<b>Yucca filamentosa 'Bright Edge'</b> Adam's Needle	May-July		Cream	3' x 3' x 6'	# 1 10"	Small soft leaf yucca. Leaves are edged in creamy white to yellow. Evergreen. Nice as a container accent as well as in the landscape. Must have a well drained soil.
<b>Yucca filamentosa 'ColorGuard'</b> Adam's Needle	May-July		Cream	3' x 3' x 6'	# 1 10"	Hundreds of curly white hairs cover the golden centered soft foliage. During cooler months the leaf centers take on rose overtones. Bloom spike is covered with bell shaped flowers. Must have well drained soil. Winter hardy in north Texas.
<b>Yucca filamentosa</b> Adam's Needle	May-July		Cream	3' x 3' x 6"	# 1 10"	Extreme amount of corkscrew filaments along leaf margins. Leaves are blue-green and sword-like. Bell-shaped flowers are borne on the bloom spikes
<b>Yucca gloriosa 'Variegata'</b> Variegated Spanish Dagger	Summer		Cream	3' x 4' x 7'	# 1 10"	Rigid green leaves have cream-colored edges, smooth margins and sharp pointed tips. The variegation blushes to red in winter. Bloom spike is covered with bell-shaped flowers.
<b>Yucca pallida</b> Pale-Leaf Yucca	Spring		Cream	2' x 2' x 5'	# 1	Rigid blue leaves have cream-colored edges, smooth margins and sharp pointed tips. The variegation blushes to red in winter. Bloom spike is covered with bell-shaped flowers.
<b>Yucca recurvifolia</b> Soft Leaf Yucca	Spring		White	4' x 5' x 6-8'	# 1	Soft flexible 2-3' long blue green leaves that curve downward with age. Trunk forming. Keep dead leaves removed for a tidier appearance.
<b>Yucca rostrata</b> Beaked Yucca	Spring		Cream	3-5' x 6-10'	# 1 10"	Solitary tree-like trunk with blue-green foliage with sharp tip. Very slow growing. Rostrata beans are beaked, like that of a bird. Like all yuccas, it needs well drained soil. Is hardy to around 0-10 degrees.
<b>Yucca rupicola</b> Twisted Leaf Yucca	Summer		White	2' x 2' x 5'	# 1 10"	A stemless yucca that is ideal for small spaces. The leaves twist and turn, giving the plant a unique form. Found growing under native Mesquite and Oak trees as well as areas of full sun. Hardy to Zone 8

Little Bluestem	Schizachyrium scoparium
Louisiana Phlox	Phlox divaricata
Love Grass	Eragrostis
Maiden Grass	Miscanthus
Mallow	Hibiscus moscheutos
Mangave	Manfreda hybrid
Meadow Sage	Salvia nemorosa
Mealy-Cup Sage	Salvia farinacea
Mexican Bush Sage	Salvia leucantha
Mexican Feather Grass	Nassella tenuissima
Mexican Mint Marigold	Tagetes lucida
Mexican Oregano	Poliomentha longiflora
Mexican Petunia, Dwarf	Ruellia brittoniana
Mexican Tarragon	Tagetes lucida
Milkweed	Asclepias
Mondo Grass	Ophiopogon japonica
Moneywort	Lysimachia nummularia
Mouse Ear Coreopsis	Coreopsis auriculata
Muhly Grass	Muhlenbergia lindheimerii
NewMexicoCenturyPlant	Agave neomexicana
Obedient Plant	Physostegia virginiana
Oxeye Daisy	Leucanthemum vulgare
Paddle Plant	Kalanchoe thyrsiflora
Pale-Leaf Yucca	Yucca pallida
Passion Vine	Passiflora
Periwinkle, Trailing	Vinca major, Vinca minor
Persian Ivy	Hedera colchica
Pincushion Flower	Scabiosa columbaria
Plantain Lily	Hosta
Prickly Pear Cactus	Opuntia
Purple Coneflower	Echinacea
Purple Heart	Setcreasea pallida
Purple Shamrock	Oxalis triangularis
Purple Wintercreeper	Euonymus fortunei coloratus
Rain Lily	Zephyranthes
Red Hot Poker	Kniphofia
Red Yucca	Hesperaloe parviflora
Resin Bush	Viguiera stenoloba

Rock Rose	Pavonia
Rose Mallow	Hibiscus moscheutos
Rush	Juncus
Russian Sage	Perovskia atriplicifolia
Sedge	Carex
Shasta Daisy	Leucanthemum
Skeletonleaf Goldeneye	Viguiera stenoloba
Skullcap	Scutellaria suffrutescens
Society Garlic	Tulbaghia violacea
Sotol	Dasyliirion
SpanishDaggerVariegated	Yucca gloriosa 'Variegata'
Speedwell	Veronica
Spiderlily	Hymenocallis
Spineless Prickly Pear	Opuntia ellisiana
Spurge	Euphorbia
St. John's Wort	Hypericum patulum 'Henryii'
Stonecrop	Sedum
Strawberry Geranium	Saxifraga stolonifera
Summer Phlox	Phlox paniculata
Sun Drops	Calylophus hartwegii
Sweet Autumn Clematis	Clematis paniculata
Sweet Flag	Acorus gramineus
Texas Bird of Paradise	Caesalpinia
Texas Gold Columbine	Aquilegia chrysantha
Texas Sage	Leucophyllum sp.
Thrift	Phlox subulata
Tickseed	Coreopsis
Trailing Raspberry	Rubus calcynoides
Turk's Cap	Malvaviscus drummondii
Twisted Leaf Yucca	Yucca rupicola
Umbrella Grass	Cyperus
Wallflower	Erysimum
Wavy Cloak Fern	Cheilanthes sinuata
Weeping Love Grass	Eragrostis
Whale's Tongue Agave	Agave ovatifolia
Wine Cups	Callirhoe involucrata
Wire Vine	Muhlenbeckia axillaris
Wood Sorrel	Oxalis
Wood Violet	Viola odorata
Wormwood	Artemesia
Yarrow	Achillea
Yellow Flag	Iris pseudacorus

## Common Names - Botanical Names

Adam's Needle	<i>Yucca filamentosa</i>	Creeping Jenny	<i>Lysimachia nummularia</i>
Ageratum, Perennial	<i>Conoclinium greggii</i>	Creeping Phlox	<i>Phlox subulata</i>
American Beautyberry	<i>Callicarpa americana</i>	Creeping Plumbago	<i>Ceratistigma plumbaginoides</i>
Angel's Trumpet	<i>Datura</i>	Creeping Wire Vine	<i>Muehlenbeckia axillaries</i>
Anise Scented Sage	<i>Salvia guaranitica</i>	Cross Vine	<i>Bignonia capreolata</i>
Asian Jasmine	<i>Trachelospermum asiaticum</i>	Damianita	<i>Chrysactinia mexicana</i>
Aster, Fall	<i>Symphytotrichum oblongifolium</i>	Daylily	<i>Hemerocallis</i>
Autumn Sage	<i>Salvia greggii</i>	Donkey Tail Spurge	<i>Euphorbia myrsinites</i>
Balloon Flower	<i>Platycodon</i>	Elephant Ear	<i>Colocasia, Alocasia</i>
Banana, Hardy	<i>Musa</i>	Engelmann Daisy	<i>Engelmannia peristenia</i>
Barrel Cactus	<i>Ferocactus wislizenii</i>	English Ivy	<i>Hedera helix</i>
Beaked Yucca	<i>Yucca rostrata</i>	False Lamium	<i>Lamium galeobdolon</i>
Beard Tongue	<i>Penstemon</i>	False Sunflower	<i>Heliopsis helanthoides</i>
Bear's Breeches	<i>Acanthus</i>	Fescue, Blue	<i>Festuca glauca</i>
Bee Balm	<i>Monarda</i>	Fire wheel	<i>Gaillardia</i>
Bird of Paradise, Texas	<i>Caesalpinia</i>	Flame Acanthus	<i>Anisacanthus quadrifidus</i>
Black-Eyed Susan	<i>Rudbeckia</i>	Flag, Iris	<i>Iris pseudacorus</i>
Blackfoot Daisy	<i>Melampodium leucanthum</i>	Flax Lily	<i>Dianella tasmanica</i>
Blanket Flower	<i>Gaillardia</i>	Flowering Almond	<i>Prunus glandulosa rosea</i>
Bloody Sorrell	<i>Rumex sanguineus</i>	Fountain Grass	<i>Pennisetum</i>
Blue Beard	<i>Caryopteris</i>	Four Nerve Daisy	<i>Hymenoxys</i>
Blue Fescue	<i>Festuca</i>	Frog Fruit	<i>Phyla nodiflora</i>
Brazilian Rock Rose	<i>Pavonia braziliensis</i>	Garlic, Society	<i>Tulbaghia violacea</i>
Brazos Penstemon	<i>Penstemon tenuis</i>	Gay Feather	<i>Liatris spicata</i>
Bugleweed	<i>Ajuga</i>	Germander	<i>Teucrium chaemedrys</i>
Butterfly Bush	<i>Buddleia</i>	Ghost Plant	<i>Graptopetalum paraguayense</i>
Butterfly Weed	<i>Asclepias</i>	Giant Spider Lily	<i>Hymenocallis</i>
Butterfly Vine	<i>Mascagnia macroptera</i>	Ginger	<i>Alpinia, Asarum</i>
Calla Lily	<i>Zantedeschia aethiopica</i>	Grecian Urn Plant	<i>Acanthus</i>
Candy Tuft	<i>Iberis</i>	Gulf Muhly	<i>Muhlenbergia capillaries</i>
Carolina Jessamine	<i>Gelsemium sempervirens</i>	Hen and Chicks	<i>Echeveria, Sempervivum</i>
Cast Iron Plant	<i>Aspidistra eliator</i>	Horse Herb	<i>Calyptocarpus vialis</i>
Catmint	<i>Nepeta</i>	Horsetail Reed	<i>Equisetum hyemale</i>
Century Plant	<i>Agave americana</i>	Houseleek	<i>Sempervivum</i>
Cheddar Pinks	<i>Dianthus gratianopolitanus</i>	Hummingbird Bush	<i>Anisacanthus quadrifidus</i>
Cherry Sage	<i>Salvia greggii</i>	Hyssop	<i>Agastache</i>
Columbine	<i>Aquilegia</i>	Ice Plant	<i>Delosperma</i>
Coneflower	<i>Echinacea, Rudbeckia</i>	Indian Blanket	<i>Gaillardia</i>
Copper Canyon Daisy	<i>Tagetes lemonii</i>	Indian Grass	<i>Sorghastrum nutans</i>
Coral Bells	<i>Heuchera</i>	Inland Sea Oats	<i>Chasmanthium latifolium</i>
Coralberry	<i>Symphoricarpus orbiculatus</i>	Jade, Baby	<i>Crassula portulacae</i>
Cow Tongue Prickly Pear	<i>Opuntia linguiformis</i>	Japanese Aralia	<i>Fatsia aralia</i>
Creeping Charlie	<i>Glechoma hederacea</i>	Japanese Spurge	<i>Pachysandra terminalis</i>
Creeping Fig	<i>Ficus pumila</i>	Jerusalem Sage	<i>Phlomis</i>
