

## Twenty-Year Index to the *Records of the Hawaii Biological Survey* (1994 through 2013)<sup>1</sup>

COMPILED BY NEAL L. EVENHUIS

*Hawaii Biological Survey, Bernice Pauahi Bishop Museum, 1525 Bernice Street, Honolulu, Hawai‘i 96817-2704, USA; email: NealE@bishopmuseum.org*

The following is an index to articles and taxa appearing in the volumes of the *Records of the Hawaii Biological Survey* for the years 1994 through 2013. The articles are alphabetized by author. The taxa are in two parts: (1) alphabetized by genus within kingdoms; and (2) alphabetized by species within kingdoms. All pagination is given by a combination of volume number of the HBS *Records* and the first page upon which the article starts (author list) or the taxon appears (taxon lists).

The *Records of the Hawaii Biological Survey* have been published in the *Bishop Museum Occasional Papers* (OP) series as follows:

<b>HBS Records for Year</b>	<b>Date published</b>	<b>OP Volume Number(s)</b>

### INDEX TO TAXA BY GENUS

The following index is alphabetized by genus within kingdom and species within genera. Pagination is by OP volume number: page. Taxa listed in this index include only those Hawaiian taxa involved in a new nomenclatural action (new combination, spelling change, new species, etc.) or other new note (new state record, new island record, notable rediscovery, removal from list, etc.). Species that were treated as part of checklists, keys, or that otherwise only were synopses or republication of previously published information are not indexed here. New taxa are indicated in **boldface**.

### INDEX TO TAXA BY SPECIES

The following index is alphabetized by genus within kingdom and species within genera. Pagination is by OP volume number: page. Taxa listed in this index below include only those Hawaiian taxa involved in a new nomenclatural action (new combination, spelling change, new species, etc.) or other new note (new state record, new island record, notable rediscovery, removal from list, etc.). Species that were treated as part of checklists, keys, or that otherwise were only synopses or republication of previously published information are not indexed here.
