CLEANBAG

 Das CleanBag® Staubsaugerbeutel-Sortiment wird ständig erweitert und aktualisiert um die Anforderungen des Marktes zu erfüllen. Es besteht aus beinahe 200 verschiedenen Beuteln für fast alle handelsüblichen Staubsauger-Modelle.

Die Staubsaugerbeutel haben eine optimale Passform, eine sehr hohe Filtrierung und ein gleich hohes Qualitätsniveau wie die Originalbeutel des jeweiligen Herstellers.

Die Qualität ist durch unabhängige Prüfungseinrichtungen getestet und bestätigt worden (TÜV-Zertifizierung für Qualität bei Produktion, Entwicklung und Konstruktion gemäß DIN und ISO 9001 Standard-Norm).

 The CleanBag® vacuum cleaner bags assortment is constantly actualised to match the market requirements. It consists of more than 200 different bags for almost every vacuum cleaner model.

The vacuum cleaner bags have an optimal fit, a very high filtration capacity and are qualitatively equal to the original bags from original equipment manufacturers.

The quality has been tested by independent test institutes (TÜV certified quality for production, development and construction according to DIN and ISO 9001 standards).

 Für eine höhere Staubaufnahmekapazität und Saugleistung haben wir unsere Microfleece+ Beutel im Programm.

Dieses Vlies Material filtert durch die einzigartige Kombination der verschiedenen Vliesschichten noch mehr kleine Staubpartikel und Hausstaubmilben.

 For a higher retention rate and dust loading capacity we have the Microfleece+ bags in our programm.

The fleece material with a special structure filters, through the unique combination of the different layers, more small dust particles and blocks dust mite.
