Jell-O is made in five flavors—
Lemon, Orange, Strawberry, Raspberry,
and Cherry

Lunch time

Tea or party time . . .
Dinner time . . . Any-

time, Jell-O can make something new and different and delicious! Ready . . . hours ahead . . . saving last-minute confusion. Easy . . . sure to turn out right . . . And as delicious as it looks . . . always . . . if genuine Jell-O is used.

Jell-O entrées. Jell-O salads. Jell-O relishes. Jell-O desserts. This booklet is so full of wonderfully good things you can make with Jell-O, your meals need never, *never* get monotonous. Just open it . . . any page . . . and spring a real Jell-O surprise for dinner today!

And revel in this thought, as you serve your Jell-O surprise to an admiring family . . . that it is a treat for every single one of them . . . young or grown-up . . . for Jell-O is one of the easiest foods in all the world to digest. Made of pure fruit flavors, pure cane sugar, and the finest quality gelatin, Jell-O is as good for you as it looks good!

Desserts

Who said a fine dessert couldn't be made in a hurry? Among these Jell-O desserts there are some so simple they require Jell-O and just one other ingredient . . . that's all . . . yet they are wonderfully good.

Here are more elaborate Jell-O desserts, as well—so especially “partified” in looks and so very delicious that they make any meal, however simple, as festive as a banquet.

Camp Fire Pudding

- | | |
|-----------------------------------|-------------------------------|
| 1 package Orange Jell-O | 2 oranges, free from membrane |
| 1 cup boiling water | and cut in pieces |

JELL-O Rules

FOR Measuring: Use a standard measuring cup. A standard measuring cup is one-half pint. Measure one pint (2 cups) of water or other liquid for each package of Jell-O; one cup of liquid for one-half package, if smaller recipe is needed. One package contains eight tablespoons (level) of Jell-O.

For Dissolving: Use exact amount of water or other liquid specified in the recipe. The liquid used to dissolve Jell-O must be boiling. It should be stirred until Jell-O is dissolved.

For Molding: A metal mold chills more quickly than one of enamel or earthenware. Turn Jell-O into mold. Chill, allowing Jell-O to remain in mold until firm.

For Cooling: Let mold stand in cold water or cool place. When cool, chill until firm. Time required varies with size and shape of mold. Usually, two hours are needed in a good refrigerator. If necessary to prepare Jell-O more quickly, dissolve it in one cup of boiling liquid, then add remaining liquid cold. Time may be shortened still more by placing mold in mixture of crushed ice and salt.

For Molding Fruits, Vegetables, etc., in Layers: Pour a thin layer of Jell-O in bottom of mold. Chill until firm. On this arrange fruits, etc., as desired, then add carefully with a spoon enough cold, liquid Jell-O to hold them in place, but not to cover them. When firm, add more cold, liquid Jell-O. Additional layers of fruits and Jell-O may be added by repeating process until mold is full. Raw pineapple cannot be used successfully with Jell-O. Use cooked or canned pineapple. To fix fruit in an upright position, fill mold two-thirds full with Jell-O. When thickened, press fruit into place and fill mold with cold, liquid or whipped Jell-O.

For Adding Fruits, Vegetables, Whipped Cream, Beaten Egg Whites: Jell-O should be cold and sufficiently thickened to hold these additions suspended evenly throughout. Cream or egg whites should be stiffly beaten and folded in gradually, while turning Jell-O over and over with a tablespoon to blend ingredients.

For Whipping: To whip successfully, Jell-O must be cold and slightly thickened. A rather deep, round-bottom bowl, set in a pan of cold water, is best for this purpose. Beat with a rotary egg beater until all of the Jell-O is of the consistency of whipped cream.

For Layer Jell-O: Chill each layer until firm before adding another layer. It is important that Jell-O, poured upon a firm layer, be cold but not thickened.

For Unmolding: Be sure Jell-O is firm. Dip mold up to the edge in vessel of warm water. Hold in water a moment, remove and wipe dry. Place plate over mold and turn them over together. Shake slightly and lift off mold. If not successful first time, repeat dipping process. If water is too warm, shape of mold is spoiled.
