

State of Environment

General Administration in Orissa

The state of Orissa extends from Latitude 17° 31' to 20° 31' N and Longitude from 81° 31' to 87° 30' E. It is surrounded by West Bengal North East, Bihar in North, Andhra Pradesh on the South East, Madhya Pradesh in the West and Bay of Bengal in the East. The total area is 155707 sq. km., which is divided into two natural divisions: The Coastal Plain & North Western Plateau. The state is divided into 30 districts. Mahanadi is a very large river crosses through the state and its big delta merges into the deltas formed by the Brahmani and the Baitarani. The deltas are fertile and are provided with irrigation facilities.

Earlier the State was divided into 13 districts. Later it was further divided into 30 districts.

The total population as per 2001 census is 36804660, which is 16.25% more as that in 1991. The state is divided into 58 subdivisions, 171 Tahsils, 314 Blocks and 6234 GPs. There are 51349 villages in Orissa and 138 towns. The number of Assembly Constituencies are 147 where as that of Loksabha Constituencies is 21 & Rajya Sabha seat is 10. There are two Municipal Corporation working in Orissa, namely Bhubaneswar Municipal Corporation & Cuttack Municipal Corporation. Simultaneously 35 Municipalities and 66 Notified Area Council have been established.

Agriculture

Orissa is the tenth largest state in area and eleventh in population in the country, accounting for 5% of the geographical area and 4% of the population of the country. Cultivators and Agricultural labourers constitute 65% of the total workforce. Agriculture provides direct or indirect employment to 65% of the total work force and contributes 26% of the net state domestic product. Kharif is the main cropping season and rice is the principal crop during kharif season. Cropping during Rabi season is mainly confined to irrigated areas and areas with residual moisture. Other important crops produced in the state are pulses (Arhar, Mung, Biri, Kulthi), Oil seeds (Groundnut, Til, Mustard and Niger), Fibres (Jute, Mesta, Cotton), Sugarcane, Vegetables and Spices, Mango, Banana, Coconut & Cashew Nut are the main Horticultural crops of the state.

The state has a cultivated area of 62 lakh hectares out of which 27 lakh hectares is high land, 19 lakh hectares medium and 16 lakh hectares low land. The paddy area during kharif is about 42 lakh & during Rabi 2.5 lakh hectares.

The state is broadly divided into 4 Physiographic Zones namely Coastal Plains, Central Table Land, Northern Plateau and Eastern Ghats. These are further sub-divided into 10 Agroclimatic Zones namely North Western Plateau, North Central Plateau, North Eastern Coastal Plain, East and South Eastern Coastal Plain, North Eastern Ghat, Eastern Ghat High Land, South Eastern Ghat, Western Undulating Zone, Western Central Table Land and Mid Central Table Land. The state has different soil types ranging from fertile alluvial deltaic soils in the coastal plains, mixed red and black soils in the Central Table Land, red and yellow soils with low fertility in the Northern Plateau and red, black & brown forest soil in Eastern ghat region. The soil types differ widely from highly acidic to slightly alkaline and from light sandy to stiff clays. The soils are mainly acidic with the degree of acidity varying widely. About 4 lakh hectares are exposed to saline inundation, 3.54 lakh hectares to flooding and 0.75 hectares to water logging.

The state has tropical climate characterized by high temperature, high humidity, medium to high rainfall and short and mid winters. The normal rainfall of the state is 1451.2 mm. About 75% to 80% rainfall is received from June to September. Floods, droughts, and cyclones occur almost every year with varying intensity. Due to frequent occurrence of these natural calamities there is always reduction in kharif rice. Similarly in drought years there is considerable loss in population of pulses and oilseed crops during Rabi season and kharif season. Another problem in the state is operational household along with poverty line. The average size of the holding is only 1-3 hectares out of cultivable area of 65-99 lakh hectares, about 41% is under irrigated conditions. The total irrigation potential created so far from all sources is about 39.31 lakh hectares (kharif 26.65 lakh and rabi 12.66 lakh hectares). The gross irrigated cropped area is 27 lakh hectares.

The consumption of fertilizer in the state is approximately to 43 kg per hectare. Due importance has been given for certified / quality seed in the new agricultural policy. There are 68 Agricultural farms in the state producing both foundation and certified seeds. Under the seed village scheme, registered seed growers are supplied foundation seeds, the seed produced in their fields are certified by the State Seed Certification Agency & the certified seeds are produced by the State Seeds Corporation.

Adoption of Integrated Pest Management (IPM) is being given due thrust for increasing the crop productivity.

Only 3% of the total power consumption is utilized for irrigation on agriculture. The field staff of Agriculture Directorate helps the banks in collecting loan applications from the farmers for providing credit to them. Farm mechanization plays an important role for timely operations of Agricultural activities for increasing production and productivity. Under Rashtriya Krishi Bima Yojana (RKBY), Paddy, Maize, Groundnut, Niger, Arhar, Cotton during kharif season & Paddy, Groundnut, Mustard, Potato, Sugarcane during rabi season are covered.

The growth rate of agriculture in the state at present is very low due to various constraints, which are climatological, technological and sociological. Specific thrust is need to step up its growth and this provided by the New Agricultural Policy under which agriculture was given the status of the industry.

During the period 1990-2006, the non-agriculture land has been increased. Even area marked for plantation had been decreased. The grazing land/permanent pasture land had been decreased from 726000 ha to 494000 ha. It indicates that the agriculture land has been converted to non-agriculture land very rapidly. It may be due to high population which pressurizes to convert agricultural land to domestic or industrial purpose. Increase in non-agricultural land is more in Jharsuguda district. The overall crop production has been increased to 28.8% as compared to the figure of 1990. During last three years, the production of Kharif and Rabi season are almost constant.

The major crop being rice. Major contribution of rice production is coming from Ganjam, Mayurbhanj and Bargarh districts. Wheat production has been decreased from 0.0559 million tons to 0.02378 million tones. Production of non-foodgrains and sugarcane has increased during last 3 years. Cotton and Tobacco cultivation are restricted to few districts only.

Major agriculture area has been occupied by rice production followed by non-foodgrains and pulses. Area under different principal crops has been slightly increased every year.

Pesticides have been purchased from different states of India. During the year 1999 to 2003, th demand of pesticides has been decreased. Whereas the consumption of fertilizers is gradually increasing. The consumption of fertilizer has been doubled during last 17 years.

Directorate of Aniaml Husbandry & Vaterinary Services is conducting survey on livestock of the State every alternate year. As per their publications during 1991 to 2003, population of almost all types of animals has been increased. In case of pigs, the number is fluctuating.

Bio-diversity

The state of Orissa is located on the eastern coast of Indian peninsula is quite rich in natural resources and has several bio-diversity hot spot areas of the Indian subcontinent. It has varied and wide spread forests harbouring dry deciduous, moist deciduous forests as well as mangroves with several unique, endemic, rare and endangered floral and faunal species. Orissa is one of the richest bio-diversity regions in Southeast Asia. It has 7 major river deltas of varies sizes and shapes formed by the rivers Subarnarekha, Budhabalanga, Baitarani, Brahmani, Mahanadi, Rushikulya and Bahuda. This region has 5 major morphological zones – the coastal plains, the middle mountainous and highlands region, the central plateaus, the western rolling uplands and major flood plains. Bhitarkanika Wildlife Sanctuary (BKWS) has been designated a Ramsar site in 2002(2nd in the state). It was declared as Bhitarkanika National Park in 1988. It is located in Kendrapara district. The deltaic region is surrounded by the rivers Brahmani and Baitarani sea. The dominant vegetation type is mangrove. Wild animals like Leopard cat, fishing cat, jungle cat, hyena, wild boar, spotted deer, porcupine, dolphin, saltwater crocodile including partially white (sankhua) crocodile, python, king cobra, water monitor lizard, terrapin, marine turtle, kingfisher, wood pecker, hornbill, bar headed geese, Brahminy duck, pintail white bellied sea eagle, tern, sea gull, waders and a large variety of resident and migratory birds can be seen.

Chandaka – Dampara Sanctury is located in between Khurda and Cuttack districts. Mixed and bamboo forests along with wild animals such as Asian Elephants, Chital, barking deer, mouse deer, wild pig, common langur, rhesus monkey, common Indian mongoose, hyena, sloth bear, ratel, monitor lizard and rock python and birds such as red jungle fowl, peafowl, crested serpent eagle and great horned owl can be seen.

Chilika, a wonder creation of nature, has been designated as a Ramsar site. Over a million migratory waterfowl and shore birds winter here. Over 400 vertebrate species have been record here. Several endangered, rare, threatened and vulnerable species are found here. 230 species of migratory and resident birds find their abode in this wetland. Some of them are Flamingo, white bellied sea eagle, Brahiminy kite, spotbilled pelican, Bar headed goose, open bill stork, spoonbill, Brahiminy duck, pigeon, pintail, shoveller and a large number of other ducks and geese, white ibis, cormorant, heron, egret, stork, stilt, avocet, gulls, tern, coot, osprey, purple moon hen, lapwing, curlew, whimbrel, godwit, sandpiper, little stint, plover, kingfisher etc. A total of 102 species of algae and 546 species of Angiospermic plants have been reported from Chilika lagoon and its immediate neighborhood. Some of the plants are Gracilaria verrucosa, Chaetomorpha linum, Enteromorpha intestinalis, Potamogeton pectinatus, Halophia ovalis, Schoenoplectus litoralis, Phramitis karka, Cassipourea cylanica etc.

In Debrigarh Sanctuary located in Bargarh district, the floral species found are Bija, Sal, Sisoo, Bandhan, Manul, Dhaura, Karada, Harda, Ainla, Bahada, Domkurdu and Bamboo. The wildlife found in this region are Tiger,

Leopard, Gaur, Sambar, Spotted deer, four horned antelope, sloth bear, wild boar, langur, porcupine, malabar giant squirrel, common civet etc. and Avifauna are peafowl, Bluejay, jungle crow, spur fowl, varieties of eagle, owls etc. Migratory birds such as great crested grebe, Brahminy duck, pintail, shoveller, godwal, tufted pochard and several ducks during winter.

Karlapat sanctuary is located close to Bhawanipatna of Kalahandi districts. The forest consists of floral species such as Bija, Asan, Harida, Karyada, Amla, Bahada, Karada, Sidha and Kumbhi. The major wildlife include Tiger, Leopard, Black panther, Elephant, Barking deer, Malabar giant squirrel, Wild pig, Sloth bear, Gaur, Sambar, Pangolin, Mouse deer, Indian Wolf, Common palm civet, Wild dog, Jungle cat, varieties of birds like Peafowl, Hornbill, Red jungle fowl, Spur fowl, partridges, Hill myna, Brahminy kite etc and reptilian fauna includes mugger crocodile, monitor lizards, snakes both poisonous and non-poisonous.

Satkoshia sanctuary spreads over four districts i.e. Angul, Cuttack, Boudh, Nayagarh. So far 400 species of plants (126 trees, 98 shrubs, 125 herbs and 51 climbers) are found.

Fauna species found in this region are highly endangered gharial, mugger, fresh water turtles along with other wildlife like Elephant, Tiger, Leopard, Sambar, Spotted deer, Barking deer, Chousingha, Mouse deer, Rhesus macaque, Langur, Porcupine, Hare, Civet cat, Ratel, Wild dog etc. 128 species of birds, 27 species of reptiles, 4 species of amphibians and 183 species of fish have been recorded in the region.

There are 94 species of orchids and 1076 species of other plants in Similipal. It includes two species of orchids which are endemic, eight plants endangered, eight species vulnerable and 34 rare species of plants. It has a rich variety of animals. The identified species of fauna include 12 species of amphibians, 29 species of reptiles, 264 species of birds and 42 species of mammals. Rare species such as black and melanistic tiger are also seen.

Sunabeda sanctuary is located close to the boundary of Chhatisgarh state. The rich flora species are piasal, teak, bija, sisoo, ashan, harida, sidha, mai, char, kumbhi, genduli, salia bamboo.

A varieties of endangered species in this region are Tiger, Leopard, Wild buffalo, Nilgai, Sambar, Gaur, Barking deer, Chital, Porcupine, Hyena, Wild boar, Langur, Rhesus monkey etc. birds like hill myna, peafowl, red jungle fowl, partridge, green pigeon, coots, dabchick, teal, snake bird, open billed stork, fishing eagle etc. are seen in this region.

Regular study on biodiversity is not being conducted. Some of the information collected from different sources is tabulated here.

ANIMAL SPECIES (Year- 1991)		
Species Category	Species Name	Species Type
Vulnerable	Canis lupus pallipes Sykes	Mammalia
Vulnerable	Platanista gangetica (Roxburgh)	Mammalia

Source - The Flora of Orissa

Climate

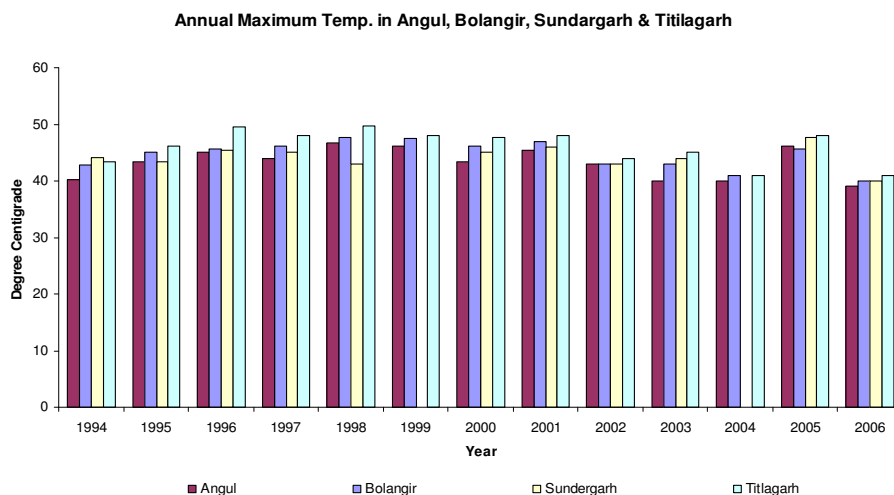

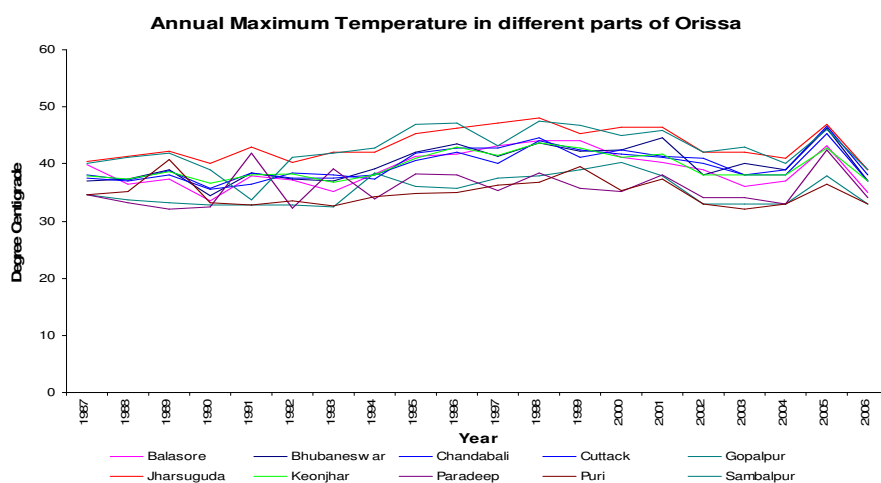

The state has tropical climate, characterized by high temperature, high humidity, medium to high rainfall and short and mild winters. As per Koppen's climatic classifications most part of Orissa comes under the AW having a tropical Savannah type of climate. The south-west monsoon normally sets in between 5th June and 10th June in the coastal plain, and by 1st July the whole of the state is under the full sway of the south-west monsoons. By 15th October, the south-west monsoon withdraws completely from Orissa. These are the normal dates which fluctuate from year to year. As per "Thorntwaite's classification", Orissa comes under the "Sub humid" category, implying deficient winter rains.

On the basis of climate type, Orissa has been divided into ten agro-climatic zone. The normal rainfall of the state is 1451.2 mm. About 75% to 80% of rainfall is received from June to September. Floods, droughts and cyclones occur almost every year varying intensity.

During the year 1998 to 2002, the annual rainfall was low as compared to the normal rainfall of the state. After that it gradually increased. The rainfall of the state indicates variable with time.

In the past, the state's western region routinely experienced high temperatures and frequent droughts. The mean daily maximum temperature of the state is gradually increasing as also the mean daily minimum temperature. Orissa has experienced contrasting extreme weather conditions from heat waves to cyclones, from droughts to floods. The state of Orissa has been declared disaster affected for 95 years out of the last 105 years. In the recent decades orissa's climate has been changing for the worse owing to a combination of factors such as deforestation, extensive construction activities, uncontrolled mining, elimination of water bodies and extensive carbon consumption.

The most high temperature readings were generally found in the areas such as Bolangir, Angul, Sundargarh and Titilagarh.

Demography:

According to the 2001 Census, the total population of Orissa is 36,804,660 consisting of 18,660,570 males and 18,144,090 females. The state holds eleventh rank among states and union territories in population size. Orissa has registered a net accretion of 5,144,924 persons to the 1991 Census population figure of 31,659,736. About 85 percent population is residing in the rural areas of the state. Among the districts, Ganjam is the most populated district with 3,160, 635 population and constitutes 8.6 percent of the state's population. While Deogarh is the least populated district with 274108 population which accounts for 0.7 percent of the state's population. There has been decline in the houseless population in the 2001 Census.

The Scheduled Castes population in Orissa constitutes 16.5 percent of the total population as against 16.2 percent in 1991 census. Similarly Scheduled Tribes population is 22.1 percent against 22.2 percent in 1991 census. The lowest percentage of ST population is in puri.

The growth rate of population in Orissa is fluctuating from decade to decade. Population density is gradually increasing from decade to decade. The crude birth rate and crude death rate is gradually decreasing from decade to decade.

In 2001 Census, the crude birth rate and crude death rate is recorded at 22.3 and 9.5 respectively. Literacy and education are reasonably good indicators of development in a society. The literacy rate of the state in 2001 census is 63.1 percent as compared to the natural average of 64.8 percent. It is improved to 14 percent as compared to 1991 census. The highest literacy is recorded in Khurdha followed by Jagatsinghpur and Puri. The population attending school has been drastically declined to 18.07% as compared to 35.65% in 1991 census. Major population is in the age group of 16-64.

Economy

Orissa comprises of 4.74% of India's landmass and 36.80 million people (2001 Census), accounts for 3.58% of the population of the country. Nearly 85% of its population live in rural areas and depend mostly on agriculture for their livelihood. The state has abundant mineral resources including precious and semi-precious stones. It has also plentiful water resources. The total cultivable land is nearly 65.59 lakh hectares. The state can be divided into ten agro-climatic zones on the basis of soil, weather and other relevant characteristics. Its land can be classified into three categories namely low, medium and up-lands.

The decennial growth rate of population of Orissa during 1991-2001 was 16.25% as against 20.06% in the previous decade. As per 2001 census the total workers in the state account for 142.76 lakh which is 38.79% of the total population of the state. Out of the total workers, main workers accounted for 67.2%. In the category of main workers, cultivators and agricultural labourers accounted to be 57.7%.

The Gross State Domestic Product (GSDP) at constant prices (1999-00) of Orissa has increased from Rs. 42,527.07 crore in 1999-00 to Rs. 63,774.71 crore in 2006-07 as per quick estimate. It shows an annual compound growth rate of 5.96 percent over the period. The Gross Fixed Capital Formation for the public sector by Industry of use and type of assets of Orissa at current prices has increased from Rs. 5476 crore in 1999-00 to Rs. 7586 crore during 2004-05 (6.73% compound growth rate). Agriculture and Allied sectors contributed about 26% to NSDP at 1999-00 prices.

The state has vast scope for development of fisheries sector and allied activities. The total fish production in the state was 3.42 lakh tonne in 2005-06 of which the marine fish accounted for 37.5%, brackish water fish 6.6% and fresh water fish 55.9%. Export of fish to other states and countries was 890.2 thousand MT during 2005-06. The production of milk during 2006-07 was 14.31 lakh tonne. The revenue receipts from forest produce were Rs. 60.2 crore in 2005-06 against Rs. 65 crore in 2004-05.

From all sources about 2120 MW of power was available against the estimated average demand of 1760 MW. The state's share in installed capacity in the state sector was 2814.88 MW in 2006-07 which includes hydro 1938.88 MW and thermal 880.00 MW. Out of the 46989 inhabited villages in the state, 38,044 villages have been electrified by 2005-06.

During 2005-06, 216.85 lakh MT of cargo was exported through paradeep port. Similarly 114.24 lakh MT of goods were imported in 2005-06 as against 84.38 lakh MT in 2004-05.

During 2006-07, about 1614.45 lakh tones of minerals valued at Rs. 7629.63 crore were produced showing an increase of 15.6% of production against previous year. Out of them 162 lakh tones of minerals / ores has been exported. During this period 4556 Micro, Small and Medium Enterprises went into production with total investment of Rs.271.14 crore and 20839 persons were provided employment opportunities.

POWER:

Energy is one of the inputs for both the economic development as well as over-all wellbeing of the people. Orissa was the first state in the country towards introduction of sweeping reforms in the power sector. During 2006-07, the state's share in the installed capacity of the state sector power projects was 2814.88 MW and generated power of 1542.67 MW. It increased to 20.97% as compared to the figure of previous year. Out of 1542.67 MW power generated, 840.34 MW was from Hydro power projects and the balance 702.33 MW from thermal power projects. Power generation under hydro power projects and thermal power projects has been increased to 40.52% and 3.71% over the previous year. Besides state's share in installed capacity of central sector projects was 739.01 MW and power generated was 485.32 MW.

Installed capacity and power generation of different power projects in Orissa during 2004-05 & 2006-07.

Power projects	Installed capacity	State's share in installed capacity	State's share in power generation		
			2004-05	2005-06	2006-07
Hydro power projects	1992.25	1934.88	809.11	598.01	840.34
Thermal power projects	880.00	880.00	649.82	677.2	702.33
Central sector	4390.00	739.01	497.50	524.64	485.32
	7262.25	3553.89	1956.43	1799.85	2027.99

Coal based thermal power projects are generally located in Angul and Jharsuguda districts. There are five hydel power projects in the state distributed in Malkangiri, Angul, Sambalpur, Kalahandi and Koraput districts. During 2006-07 there were about 24.77 lakh power consumers in the state of which 21.36 lakh (80.01%) were domestic consumers and 2.05 lakh (8.45%) were commercial consumers. Distribution of power is being done through CESCO, NESCO, WESCO, SOUTHCO.

Environment

Orissa is well endowed with forest, minerals and bio-diversity. Its natural heritage includes a 480 km. Long coastline, a rich bio-diversity, forest cover which accounts for 37.34% of its total land area and some prime biological assets of the world such as the Similpal National Park and the Bhitarkanika Wild Life Sanctuary, abundant water resources and an enviable mineral reserve in the country.

Orissa is rich in major minerals like Coal, Iron ore, Chromite ore, Manganese ore, Bauxite, Dolomite and Limestone.

Orissa is a coastal state and the eastern part has been formed by deltas of major rivers such as Mahanadi, Brahmani, Rushikulya and Subarnarekha with its numerous tributaries.

Forest resources of Orissa is one of the richest in the country and also it supplies essential raw materials to the pulp and paper industries.

The industrial growth in the state has mostly taken place in the areas where raw materials, water and power are available. The state can be divided into 12 industrially active zones / areas such as Rourkela – Rajgangpur area, Ib valley area, Hirakud area, Talcher-Angul area, Choudwar area, Balasore, Chandikhol, Paradeep area, Khurda-Tapang area, Joda-Barbil area and Rayagada area. There are 1566 nos. of industries in the Red category, 269 in orange category and 626 in Green category. Orissa has 18 nos. of grossly polluting industries. The major sources of water pollution is discharge of industrial waste water, sewage discharge from urban bodies, disposal of industrial and urban solid waste. About 25 million tons of solid waste is generated from industrial sectors in the state. Hazardous waste generation in the state has been estimated as 80003 MT / annum.

Out of the total recorded forest area of 58136.23 sq. km., 272.7 sq. km. has been diverted to 247 nos. of different as on 31.03.2003.

A sewerage pipeline is being constructed in puri. It has covered 604 km by 2004.

Forest

Forest plays a vital role in maintaining ecological stability. They provide protection against and reduce impact of natural calamities like droughts, floods and cyclones. Forests are also an important sources of livelihood for weaker sections of society. Forests also provide a wide variety of products of commercial value such as timber, lac, resins, oilseeds, kendu leaves and medical plants. However forest cover is dwindling at a fast pace. This may be due to factors like rising population, increase in needs of fuel wood, timber and fodder and increasing industrialization & urbanization.

Orissa has a recorded forest area of 58226.17 sq. kms. which comprising at 26,329.12 sq. kms. of reserved forest, 15615.25 sq. kms. demarcated and protected forests, 20.55 sq. kms. of un-classed forest and 16,261.34 sq. kms. of other forests including village and private forests. It occupies 37.39% of the state's geographical area. As per the "State Forest Report - 2005" prepared by the Forest Survey of India, the state has only 48,374 sq. kms. of forest cover including 203 sq. kms. of mangrove forest.

Forests of the state are unevenly distributed. The coastal districts with high population density are having comparatively smaller areas of forest. Higher forest coverage is found in the districts of Kandhamal, Sundargarh, Mayurbhanj, Sambalpur, Malkangiri, Gajapati, Deogarh and Keonjhar. The state has 31.06% forest cover according to the Forest Survey of India. The per capita forest area in the state is 0.13 hectares against National average of 0.076 hectares.

The main objective and strategy of forest planning is to achieve the mandated 33% forest cover and the Government has already implemented afforestation programme during 2003-04 under different state plan and central plan schemes over a total area of 39,376.50 hectares.

By the end of the year 2006 19391 tonnes of fuel wood and 110284 nos. of bamboo have been produced.

After 1995, there is a slight increase in protected forest. Dense forest has been increased. By the end of 2004, 42791.913 ha. of forest area was under mining of Bauxite, Chromite, Copper, Iron and Manganese.

Health:

Although the health care system in the state has improved remarkably over the years, communicable and nutrition related diseases continue to be a major problem mostly in tribal and backward as well as in the remote rural areas. By the end of year 2004 death toll due to non-communicable diseases especially water borne diseases has declined in the state. The common communicable diseases in the state are Diarrhoea, Dysentery, Jaundice, respiratory infection and measles where as the major non-communicable disease being malaria, steps have have been taken to bring adequate improvement in the health care system of the state especially in the rural and tribal areas and backward regions with objectives of providing adequate qualitative preventive and curative health care services; reduce material and infantmortality rate; ensuring health care services to all; providing affordable quality health care through allopathic, homeopathic and ayurvedic systems of medicine; ensuring greater access to primary health care by providing medical institutions as close to the people as possible or through mobile health units; and improving health care facilities in the KBK districts of the state.

HEALTH STATUS OF THE STATE				
Year	Name of Diseases	Type of Diseases	Cause of Diseases	No. of Death
1998	Acute diarrhoeal disease	NonCommunicable	Water Borne	0
1999	Cholera	NonCommunicable	Water Borne	208
2000	Cholera, Typhoid, Malaria	NonCommunicable	Water Borne	650
2001	Malaria	NonCommunicable	Water Borne	305
2002	Malaria	NonCommunicable	Water Borne	
2003	Malaria	NonCommunicable	Water Borne	333
2004	Malaria	NonCommunicable	Water Borne	283

Industry & Mining

Occupying an important position on the country's map, Orissa's rich mineral reserves constitute 28% Iron ore, 24% coal, 59% Bauxite and 98% Chromite of India's total deposits. The state's comparative advantage on this account has attracted the attention of many mining and metallurgical companies. In Orissa, industrialization started shortly after independence. The oldest industries in the state were coalmines at Talcher and Ib valley and paper mills at Choudwar and Brajrajnagar. After nationalization of coal in 1975 and the national policy on energy sector many power plants were set up. As a result, the Talcher-Angul area has become the power house of the state. Major industries in Orissa at the moment include an integrated steel plant at Rourkela, NALCO (National Aluminium Company Ltd.), Thermal power plants, Fertilizer plants, Pulp and paper industries, Ferro alloys plants, cement plants etc. The industrial growth in the state has mostly taken place in the areas where raw materials, water and power are available. The state can be divided into twelve industrially active zones / areas namely:

1. Rajgangpur Area (Iron & Steel, Sponge Iron, Cement, Secondary steel. Melting and rolling mill & refractories and chemicals).
2. Ib valley area (Thermal power, Sponge iron, refractories, and coal mines)
3. Hirakud area (Aluminum & rolling mills)
4. Talcher-Angul area (Thermal power, Aluminum, Coal washeries, Ferro alloys, Coal mines).
5. Choudwar area (Ferro alloys, Thermal power, pulp and paper, coke oven)
6. Balasore area (pulp and paper, ferro alloys, rubber industries)
7. Chandikhol (stone crusher, coke oven)
8. Duburi (Integrated steel, ferro alloys, rubber industries)
9. Paradeep area (fertilizer, sea food processing, petroleum coke)
10. Khurda - Tapang area (stone crusher)
11. Joda - Barbil area (iron, sponge iron, ferro alloys, iron ore crusher, mineral processing).
12. Rayagada area (pulp and paper, ferro alloys).

Total 2461 industries in large, medium and small scale are operating in the state. 47 nos. of industries are under 17 categories of polluting industries are operating in the state. As per the State of Environment Report published by Orissa State Pollution Control Board; the red, orange and green industries in the state are 1779, 561 and 414 nos. respectively.

By the end of 2006-07, there were about 92417 nos. of SSI units setup in the state. Maximum number of industries have been set up in Sundergarh district (457 nos.) followed by Khurda (356 nos.) and Ganjam districts (352 nos.).

Besides the reserves of major minerals like chromite, nickel, bauxite, iron-ore and coal; other minerals like china clay, fire clay, limestone, quartz,

precious and semi precious stones, copper, manganese, graphic, vanadium etc. are also available in the state.

Iron ore is abundantly available in the districts of Mayurbhanj, Sundargarh, Keonjhar and Jajpur. While chromite is mostly available in Jajpur, Dhenkanal and Keonjhar districts, manganese deposits are available in Sundargarh and Keonjhar districts. Dolomite is available plentifully only in the district of Sundargarh. There are two major coal bearing areas in the state which are currently being exploited namely Talcher and the Ib valley. As per the latest estimation the total reserve of coal in the state is 61999 million tonne followed by iron ore (5371 million tonne), bauxite (1743 million tonne) and limestone (1015 million tonne) in Orissa.

The total number of mining leases in the state are 602 covering an area of 97020 hectares out of which working leases are 370 nos. The Orissa Mining Corporation is having 35 leases covering 19041 hectares leased area out of which 15 leases are in operation.

The mineral production in 2006-07 increased by 15.58% over 2005-06. Total 1614.45 lakh MT minerals has been produced during this period. Metallic mineral production increased by 16.96% and non-metallic also increased by 15.22%. Iron Ore is abundantly available in the districts of Mayurbhanj, Sundargarh, Keonjhar and Jajpur. Chromite is mostly available in Jajpur, Dhenkanal and Keonjhar districts. Talcher and Ib valley are two major coal bearing areas in the state having total reserve of 61999 million tonne out of which 812.81 lakh tonne was exploited during 2006-07.

Natural Resources:

The state is endowed with various natural resources. It occupies a geographical area of 1557100 hectares. During the period of 1990 to 2006 many changes have been noticed. The area under permanent pastures & other grazing land decreased to 494000 ha. against 726000 ha. in 1990. Similarly area under miscellaneous tree crops and groves and culturable wasteland decreased gradually during this period. After 2000, the forest area and fallow land increased. From 1990 to 1994, the area under gross cropped area has increased. It gradually decreased after 1994 and then it increased slightly. Area sown more than once was 3306000 ha. by the end of 2006. forest area with respect to total geographical area is more in Kandhamal followed by Gajapati district.

LAND USE

The State is broadly divided into 4 physiographic zones namely coastal plains, central tableland, northern plateau and Eastern Ghats. Total geographical area of the state is 155.71 lakh hectares out of which 58.13 lakh hectares is forest area, 4.82 lakh hectares of miscellaneous tree & groves, 4.43 lakh hectares of permanent pasture, 3.92 lakh hectares culturable waste land and 8.43 lakh hectares barren & unculturable land. The State has a cultivated area of 62 lakh hectares out of which 27 lakh hectares is high land, 19 lakh hectares medium and 16 lakh hectares low land.

As per the report of Orissa Remote Sensing Application Centre of 2002, water body covers an area of 230104.36 hectares. While the Wastelands Atlas of India - 2000 reports shifting cultivation area in the state to be 10014.07 hectares and mining industrial wastelands of 35.45 hectares. This area is increasing gradually according to various published reports.

TOURISM

Orissa offers not only nature in all its glory with its beaches, rivers, waterfalls, hills, forests, wildlife and tribal life, but also a great tradition of architecture, monuments and sculptural art. Some of these monuments date back to the 3rd Century B.C. and are well preserved and are intact to this day. The entire length and breadth of the State is dotted with 4000 monuments and archeological sites. They include early Jaina Caves and temples; Buddhist monasteries (Viharas), domes structures (Chaityas), and Pillars (Stupas); Hindu temples; mosques; churches; ancient and medieval forts, palaces and colonial architecture. Bhubaneswar is the Capital city of the modern state and the ancient Kingdom of Kalinga. It is also known as the Temple City of India. The main attractions in the city are: the Lingaraj Temple (built in 11th Century); Mukteswar Temple (built in 10th Century); the Rajarani Temple; Vaital Temple; Yogini Temple; the Parsurameswara Temple; the Svarnajaleswara temple; Dhauli, rock-cut Caves in hills of Kahndagiri and Udaygiri; Orissa State Museum; Tribal Research Institute's Museum; Ekamra Kanan; Regional Science Centre; Pathani Samant Planetarium; BDA Nicco Park; Nandan Kanan Zoological Park and Atri Hot Sulphur spring.

Puri is the city by the sea and is a major pilgrim centre in India. It is also famous for its Golden Beach, ideal for swimming and surfing. Puri is also famous for the Jagannath Temple and annual Rath Yatra or Car Festival. Other tourist attractions are Vimala temple, Lakshmi temple, Vishnu temple, Anand Bazar (World's biggest food market), Gundicha Ghar, Shri Loknath temple, the Grand road Bada Danda, Swargadwara, the Atharanala Bridge, Balighai Beach, the Sakshigopal temple, Satpada (ideal place to enjoy Chilika), Konark (Orissa's best architecture temple) and Ramachandi temple.

Cuttack is one of the Orissa's oldest cities. This is the best place to shop in the state. The main attractions are Barabati Fort, the Katak Chandi temple, Qadam-I-Rasool (Sacred to the Hindus as well as the Muslims). The Paramahansanath temple, the shrine of Goddess Charchika at Banki, Bhattarika, Mahavinayak temple at Chandikhol, Ansupa Lake (haven for migratory birds in winter) and Dhavaleswar.

The main attractions of Jajpur district are the sacred Shrines of mother Goddess Viraja, Sveta Varaha and Sapta Matruka. Three hills namely Ratnagiri Lalitgiri and Udaygiri is a remarkable Buddhist Complex.

Paradeep is a major sea port of India for trade activities with a fine sea beach located in Jagatsighpur district. The shrine of Goddess Sarala is also a important tourist attraction.

Bhitarkanika National Park is an important tourist attractions for having a variety of animals and migratory birds.

Taptapani (hot sulphur spring) and Jaugarh (famous for Asokan Rock edicts) are located in Berhampur.

Spread over 1100 sq.km., Chilika is the Country's largest inland lake. Dotted with islands, it has the richest variety of aquatic fauna and is a bird watcher's paradise when migratory birds arrive in winter. Sunset and sunrise are memorable experiences here.

2750 sq.km Similipal National Park in Mayurbhanj district is one of eighteen Tiger Reserves of India. Apart from more than 95 tigers, it is also the home of many wild animals including leopards, elephants and reptiles like the mugger crocodiles. Besides, it has 231 species of birds. The forest is full of hills and waterfalls. The Barehipani waterfall is 399 meters high.

The main attractions in Dhenkanal district are Kapilas (the serene hill of epic fame houses the hilltop shrine of Lord Shiva); Joranda (headquarters of Mahima Cult); Saptasajya (hill of uncommon scenic charm); Tiakapara Gharial Sactuary; and Deulijhari hot spring.

Chandipur is a peaceful sea side resort where the sea recedes and proceeds 5 Km everyday located in Balasore. Other places of tourist interest are Remuna, Panchlingeswar, Aradi and Chandaneswar.

Keonjhar district attracts tourists for Vishnu temple, Jagannath temple, Siddha Jagannath, Siddha Kali, Panchbati, Sanghagara water fall, Badaghagara waterfall, Khandadhar waterfall, Ghatagaon Goddess Tarini etc.

In Rayagada, Hatipathar (great scenic beauty with waterfalls) and Minajhola (a scenic spot and confluence point of three rivers) are the main tourist spots.

Bhawanipatna is famous for different cities of Hindu pantheon like Bhawanishankar, perennial waterfall Phurli Jharan, the historic fort Asurgarh, Karlapat (known for charming wildlife) and the Ampani Hills (view point for colorful wildlife and prehistoric cave paintings).

Tourist spots in Phulbani district are namely Goddess Barala Devi temple at Balaskumpa, Shiva temple at Chakapad, Lord Charisambhu temple, Daringibadi (Known as Kashmir of Orissa) and dense forest Belghar (place for viewing colourful wildlife).

Hypaethral temples at Ranipur-Jharia, Harishankar on Gandhamardan hills and mountains at Patnagarh are the main attraction sites in Bolangir.

Charming waterfall Duduma, scenic spot with the cave shrine of Lord Shiva Gupteswar, Shiva temple with Champak trees at Papadhandi and Batris Simhasan at Nandapur are important tourist interest places in Jeypore.

Ushakothi Wildlife Sanctuary, Huma's Leaning temple, Nrusimhanath (9temples with waterfalls) and waterfalls at Pradhanpat are the main attractions of Sambalpur.

Besides, Orissa is also a choice for her colourful fairs and festivals such as Lok Mahatsava, Makarmela, Parab, Maghamela, Mahasivaratri, Dola, Taratarini mela, Ashokastami, Chaitra Parba, Sitalasathi, Rathyatra, Durga Puja, Lakshmi Puja, Beach festival, Baliyatra, Konark festival and Dhanu Yatra.

Orissa is also known for its exquisite handicrafts. Some of them are Silver filigree, horn work, Patachitra, metalware, stoneware and Applique work.

SOLID WASTE MANAGEMENT

Solid waste management is an integral part of the Environmental Management of each city. Due to rapid growth of urban population, as well as constraint in resources, the management of solid waste poses a difficult and complex problem for the society and its improper management gravely affects the public health and degrades environment. In Indian scenario, the growth of population is about 50 % in 2001 as compared to that in 1947. Accordingly waste generation increases from 0.295 Kg/capita/day in 1947 to 0.56 Kg/capita/day in 2001. Total waste generated per year comes to 55.3 million ton/year in 2001 as compared to 6 million ton/year in 1947. Municipality solid waste is positively related to variation in per capita income and with population size. A survey estimates highest generation of solid waste in US (2.4 Kg/capita/day).

The general composition of solid waste being generated from the cities of India is 40.15 % vegetables & twigs, 3.8% glass, 0.8 % paper, 0.62% plastic, 0.44 ceramics, 0.64% metals, 41.81% sand & grit and others 11.73%.

The per capita generation of solid waste in Rourkela and Puri Municipality of Orissa is 0.5 Kg/day and 0.3 to 0.5 Kg/day respectively. The most common way of treating solid waste in Orissa is land filling. Awareness on Solid Waste management among the people and various Institutions, Government Organisations and non-government Organisations are working on it. In Puri Municipality there exists a mechanized Bio-compost plant for treatment of garbage of 100 TPD capacity.

Solid waste from industrial activities is one of the major environmental concern. About 25 million tons of solid waste is being generated from industrial sectors in the state. It includes fly ash & bottom ash from thermal power plants, chemical slags from Iron 7 Steel plants and red mud from Aluminium industries. Some of the wastes are designated as hazardous because of their composition and hazard potential. About 80000 MT/annum of hazardous waste being generated in the state. In the mining sectors, the major solid waste is the overburden waste.

STATUS OF SOLID WASTE MANAGEMENT OF THE STATE					
Year	City	Municipal Solid Waste Generation (Tonnes/day)	Municipal Solid Waste Per Capita (Kg/day)	No. of Landfill Area	No. of Safai Karamchari
2000	Cuttak	325	0.808	-	-
2000	Rourkela	60	0.346	-	-
2000	Sambalpur	34	0.259	-	-
2000	Balasore	2.6	0.30	-	-
2001	Puri	79	0.3 to 0.5	1	484
