Plant Life At The Preserve

Hundreds of plant species await your discovery at Tallgrass Prairie National Preserve. The last remaining areas of tallgrass prairie in North America are important habitat for many species of plants, many of which can survive only on the tallgrass prairie. Different seasons bring different kinds of plants, with their intricate interactions necessary for the tallgrass prairie's survival. Please help us preserve these priceless plants and the tallgrass prairie ecosystem by leaving them where you find them and enjoy the rich diversity of the tallgrass prairie!
