The Natural Resource Publication series addresses natural resource topics that are of interest and applicability to a broad readership in the National Park Service and to others in the management of natural resources, including the scientific community, the public, and the NPS conservation and environmental constituencies. Manuscripts are peer-reviewed to ensure that the information is scientifically credible, technically accurate, appropriately written for the intended audience, and is designed and published in a professional manner.

The Natural Resource Technical Report series is used to disseminate the peer-reviewed results of scientific studies in the physical, biological, and social sciences for both the advancement of science and the achievement of the National Park Service's mission. The reports provide contributors with a forum for displaying comprehensive data that are often deleted from journals because of page limitations. Current examples of such reports include the results of research that addresses natural resource management issues; natural resource inventory and monitoring activities; resource assessment reports; scientific literature reviews; and peer-reviewed proceedings of technical workshops, conferences, or symposia.

Views, statements, findings, conclusions, recommendations, and data in this report are solely those of the author(s) and do not necessarily reflect views and policies of the U.S. Department of the Interior, National Park Service. Mention of trade names or commercial products does not constitute endorsement or recommendation for use by the National Park Service.

Printed copies of reports in this series may be produced in limited quantity, and are only available as long as the supply lasts. You may send a request to:

Northern Colorado Plateau Network

Abstract

In 2005–2006, the National Park Service’s Northern Colorado Plateau Network received funding to develop a revised checklist of the vascular plant flora of Bryce Canyon National Park. This entailed a thorough review of existing literature, re-examination of specimens from the Bryce Canyon National Park herbarium and other state and national museum collections, and additional field work to corroborate unverified species reports or locate new species. Based on this study, 587 vascular plant taxa have been confirmed or reliably reported as occurring in the park (553 are known from validated herbarium specimens and 34 from unvouchered literature reports). Another 76 species formerly considered part of the park flora have now been shown to be falsely reported. The current flora of Bryce Canyon National Park represents 16.3% of the known flora of Utah, and 36.5% of the flora of the Utah High Plateaus ecoregion. Although no species are federally listed as threatened or endangered, 50 plant taxa from the park were formerly candidates for potential listing, are considered sensitive by the U.S. Forest Service and Bureau of Land Management, or are considered species of concern by the state’s natural heritage program. Introduced plants make up 10.2% of the park flora (60 species), of which only 7 species are considered noxious weeds by the State of Utah. Further surveys in Bryce Canyon National Park are likely to find additional new species (298 are known from similar habitats outside the park boundary), especially among late season flowering, weedy, or wetland taxa.

Acknowledgements

We would like to thank the following individuals for their assistance with this project. Botanist Dr. Angela Evenden, former leader of the Northern Colorado Plateau Network in Moab, Utah, was an active proponent of this project and helped secure funding for field work and herbarium studies in 2006. Kristin Legg, former Chief of Natural Resources for Bryce Canyon National Park (BRCA), assisted with herbarium access and permitting. Jan Stock, curator of museum collections for BRCA, provided access to all mounted and unmounted herbarium specimens from the park. Bruce Condie helped record specimen label data from all mounted collections in the BRCA herbarium. Libby Nance, former database specialist with the NCPN, assisted with development and quality control of the park's NPSpecies database. Libby Nance, Janet Coles, and Helen Thomas also provided data from recent vegetation mapping and wetland inventories on the park. Drs. Stanley Welsh and Duane Atwood provided access to herbarium collections at Brigham Young University (BRY). Dr. Michael Piep provided access to collections at the Utah State University (Intermountain) herbarium. Dr. Ron Hartman and Ernie Nelson provided access and specimen loans from the Rocky Mountain Herbarium at the University of Wyoming. Mark Madsen, botanist with Dixie National Forest, shared data from his Master's thesis at Brigham Young University on the Claron flora of the Paunsaugunt Plateau. Thanks to the technical reviewers (Dr. Angela Evenden, Dr. Dusty Perkins, and Libby Nance) for their comments and suggestions. To any others whom we may have inadvertently forgotten, please accept our apologies (and thanks).

Research was conducted under permit # BRCA-2006-SCI-0004 for study number BRCA-00018. Funding was provided by the National Park Service through the Rocky Mountains Cooperative Ecosystem Studies Unit and the University of Wyoming.

1 Introduction

In 2006, the National Park Service (NPS) established a cooperative agreement with the University of Wyoming, through the Rocky Mountains Cooperative Ecosystem Studies Unit, to produce a series of technical reports summarizing the vascular plant flora of each of the 16 national park units of the Northern Colorado Plateau Network (NCPN). These reports are based on existing information in the park service's NPSpecies database system and augmented by further data mining, reviews of state and regional herbaria, and new field surveys to resolve the status of many reported and unconfirmed species. The objective of these reports is to summarize the current state of knowledge of the flora of each park for the benefit of NPS biologists and interpretive staff, outside researchers, and the general public. The following report addresses the vascular flora of Bryce Canyon National Park (NP), in southern Utah. Other NCPN park units are addressed in separate reports.

1.1 Background and justification

One of the primary missions of the NPS is “to conserve unimpaired the natural and cultural resources and values of the national park system for the enjoyment of this and future generations” (NPS 2000). Due to their high degree of protection and distribution across a wide variety of habitat types, the nation’s national park units make a significant contribution to the protection of biological diversity (Noss and Cooperrider 1994). Unfortunately, the full contribution of the NPS system is not known, as many park units have traditionally lacked comprehensive biological inventories or monitoring programs to identify the composition and condition of their biota. Knowing the status of park flora and fauna is critical for effective park management and for systematically identifying and filling gaps in the nation’s protected area network (Margules and Pressey 2000).

To rectify this shortcoming, Congress passed the National Parks Omnibus Management Act in 1998 to provide guidance and funding for an inventory and monitoring program across the entire national park system. Since 2000, the NCPN Inventory and Monitoring Program has been developing and verifying species lists of vertebrates and vascular plants for each park unit in the network

(Evenden et al. 2002). This effort has entailed reviewing existing species checklists, corroborating the identification of specimens in park museum and herbarium collections, locating additional specimen records from other museums, mining relevant literature and datasets, and conducting field surveys to locate new taxa or confirm unsubstantiated reports.[†] All of these data have been synthesized in NPSpecies, the park service’s standardized database for documenting park status (present, probably present, unconfirmed, falsely reported), abundance, residency, nativity, and rarity. With the production of a technical series of reports on the flora of each park, the NPSpecies data will now be available to a broader audience.

1.2 Objectives

The objectives of this project were to:

1. Document the current status (present, reported, potential, or falsely reported) of all vascular plant species that have been cited as occurring in Bryce Canyon National Park, based on a review of herbarium collections and past literature.
2. Develop an annotated checklist of the flora of Bryce Canyon National Park, with supplemental information on taxonomic synonyms, distribution, within-park abundance, flowering period, growth form, nativity, habitat, and sources for each record.

1.1 Study area

1.1.1 History and setting

Native American cultures have occupied the area surrounding Bryce Canyon for several thousand years, but little physical evidence remains to suggest that the high-elevation badlands of the park, itself, were utilized for anything more than hunting and gathering. Following a period of region-wide severe drought around 1200 A.D., the valleys bordering the Paunsaugunt Plateau and Bryce Canyon were sparsely inhabited by transitory bands of Paiutes. The Paiutes referred to the colorful hoodoos, spires, fins, and chimneys of the Bryce area as Angka-ku-wass-a-wits (“red-painted faces”) or Unka-timpe-wa-wince-pock-ich (“red rock standing like men in a bowl-shaped recess”) (Davis and Pollock 2003).

[†]Taxa refer to all named species, subspecies, and varieties.

Mormon pioneers arrived in the area in the mid-1870s and established several small settlements, including Clifton (later abandoned), Tropic, Cannonville, and Henrieville. Ebenezer Bryce was an early settler who built a road and ditch to water the fields of Clifton in the canyon that would bear his name (Belknap 1958). Eventually, most of the Paunsaugunt Plateau in the Bryce Canyon area would be transferred to the U.S. Forest Service (as part of Powell National Forest, now known as Dixie National Forest), while the surrounding valleys were mostly converted to agriculture.

J. W. Humphrey, an early forest supervisor who recognized the tourism potential of Bryce's scenic wonders, persuaded the Union Pacific Railroad to construct roads into the area, along with a visitor lodge near Sunset Point, in the late 1910s and early 1920s. Local settler Reuben "Ruby" Syrett also built a tourist lodge that remains a local landmark (Davis and Pollock 2003). In June 1923, President Warren Harding used the Antiquities Act to create Bryce Canyon National Monument, under the administration of the U.S. Forest Service. Congress passed legislation in June 1924 to expand the monument and rename it Utah National Park. The park was renamed Bryce Canyon National Park and permanently transferred to the National Park Service in February 1928. Over the next several decades, the park's boundaries were redrawn and expanded on several occasions, until reaching its current size of 35,835 acres (14,502 ha) (Evenden et al. 2002).

Bryce Canyon National Park is located on the eastern flank of the Paunsaugunt Plateau in Garfield and Kane counties, Utah (Figure 1.3.1). The park is located approximately 50 air miles east of Cedar City and 30 air miles northeast of Kanab. Elevations range from 6,100 feet (1,859 m) along the eastern border to 9,100 feet (2,774 m) in the highlands at the park's southern end. Annual precipitation averages 16.3 inches (414 mm), with 6.7 inches falling as rain during the main growing season from June to September. Average annual air temperature is 41°F (5.2°C), with a low of 9.3°F (-12.6°C) in January and a high of 77.8°F (25.4°C) in July (Madsen 2001).

1.1.2 Geology

The oldest rocks exposed within Bryce Canyon National Park are outcrops of the Cretaceous-age Dakota Sandstone and Tropic Shale found along the park's easternmost boundary. The Dakota consists of sandstones, siltstones, and conglom-

erates laid down about 96 million years ago in a coastal environment of fluctuating marine lagoons and river deltas (Davis and Pollock 2003). Lying above the Dakota are beds of black or dark-gray shales of the Tropic Formation (named for the nearby town of Tropic) that were deposited in deep marine waters during the last major incursion of the inter-continental Cretaceous seaway that bisected North America. Younger deposits of the Straight Cliffs Formation form the "gray cliffs" of the Grand Staircase and can be as thick as 1,700 feet (515 m) in the Bryce area (Davis and Pollock 2003). The Straight Cliffs consist of alternating beds of sandstone and shale interspersed with coal seams that were deposited in a coastal area with periodically advancing and retreating marine waters. Topping the Straight Cliffs is the late Cretaceous Wahweap Sandstone, which was formed in a river delta.

Bryce's pink cliffs consist of a thick mantle of Eocene-age limey sandstones of the Claron Formation (formerly called the Wasatch Formation). The Claron was deposited 40–60 million years ago in a large freshwater lake (slightly larger than modern Lake Erie) that extended from near the Nevada state line to Boulder Mountain (Chronic 1988). Most of the Claron at Bryce Canyon consists of the lower, red member, with the upper, white member persisting only at the higher elevations of the Paunsaugunt Plateau (most of it has eroded away elsewhere on the plateau). The red member is not homogeneous, but consists of alternating bands of more-resistant limestone or conglomerate. A small area of Oligocene or Miocene-age conglomerates deposited in a small lake persists on top of Boat Mesa. The park's youngest strata consist of Quaternary alluvium in the major drainages carving the eastern flank of the Paunsaugunt Plateau (Davis and Pollock 2003).

The fantastic hoodoos, rock spires, pinnacles, chimneys, fins, and windows that characterize the Bryce Canyon area were carved primarily by the freezing and thawing of water acting on the cracks and fissures created by the regional faulting that uplifted the Paunsaugunt Plateau along the Sevier and Paunsaugunt faults. Erosion by running water formed deep gullies and sliced the eastern wall of the plateau into a series of rock fins. The natural acidity of water acted to further erode the fins into arch-like windows or solitary, chimney-like hoodoos, held in place by a caprock of less-resistant limestone or conglomerate. Ultimately, even these fall, but new erosional features continue to form as the Paria River and its tributaries march

Bryce Canyon National Park

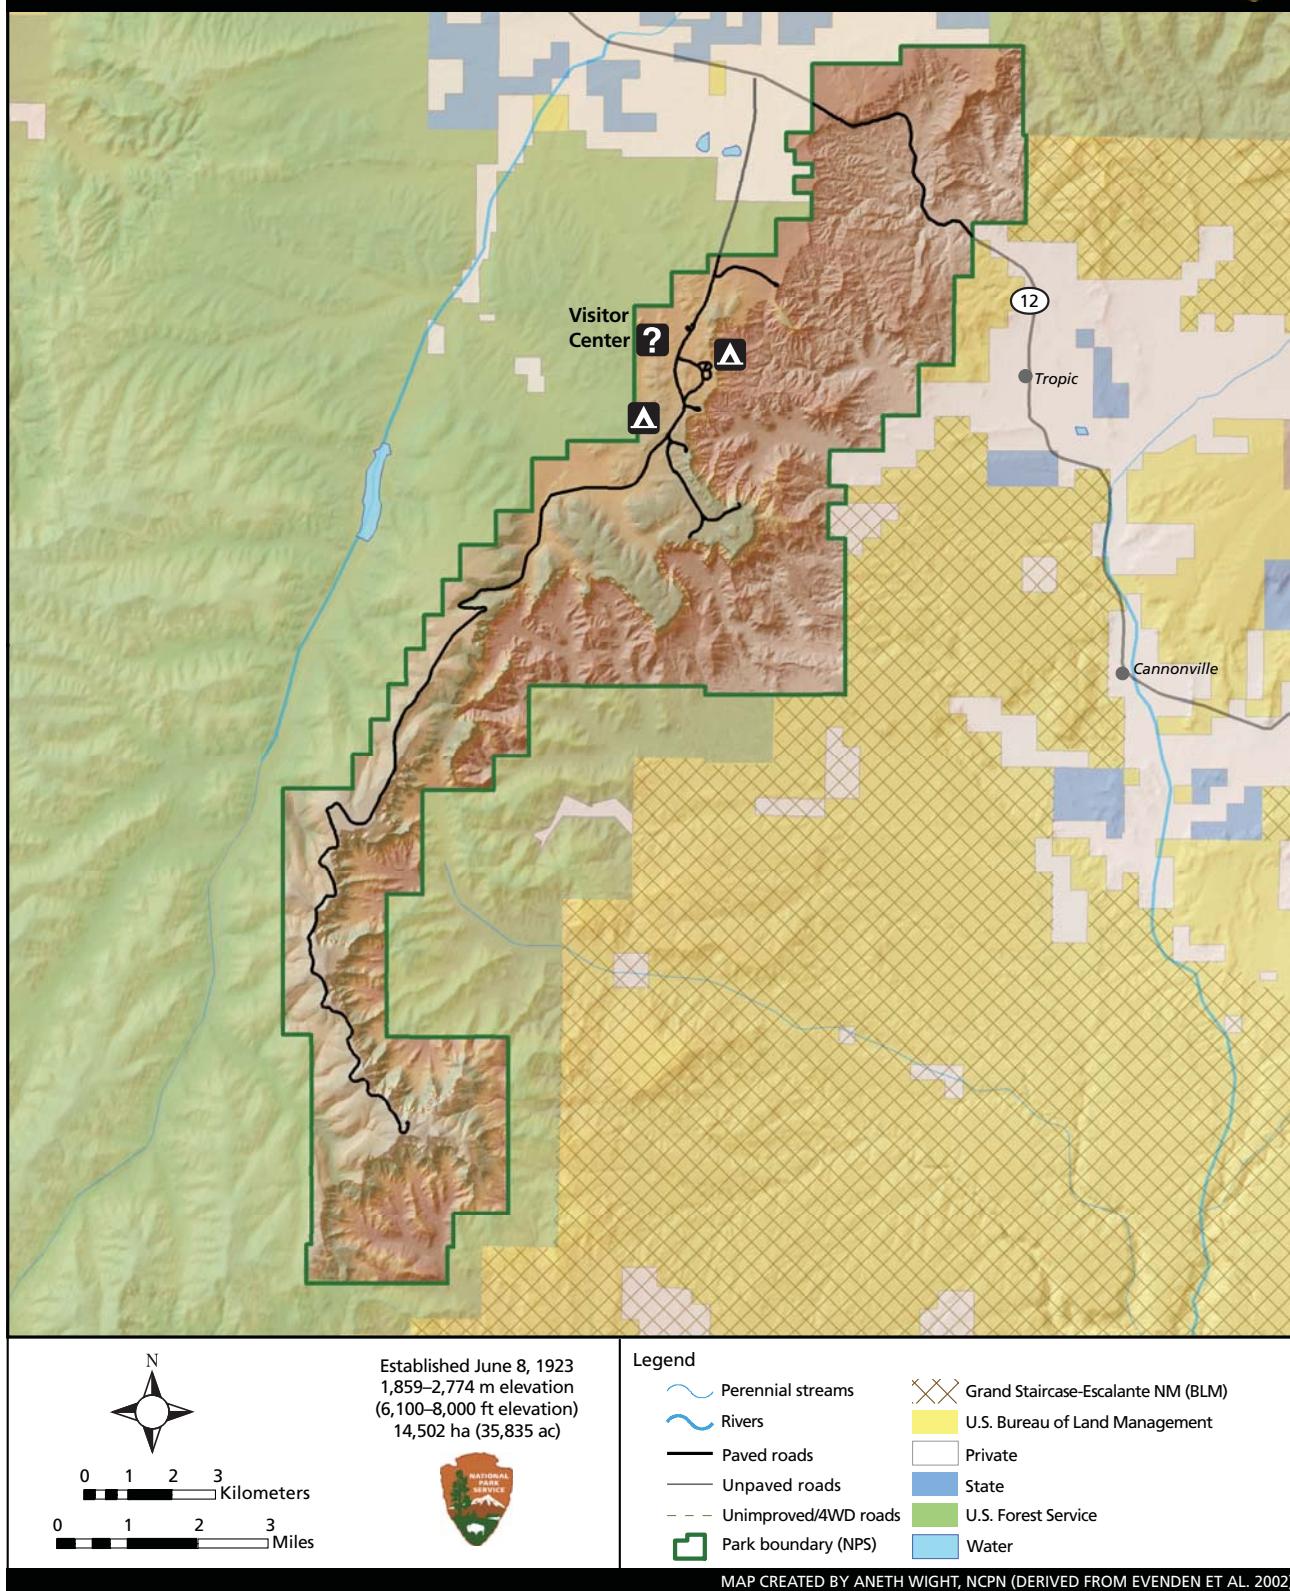

Figure 1.3.1. Location of Bryce Canyon National Park, Garfield and Kane counties, Utah.

headward against the red Claron beds at a rate of four feet (1.2 m) per century toward its ultimate capture of the East Fork of the Sevier River in 1-2 million years (Davis and Pollock 2003).

1.1.3 Vegetation

The vegetation of Bryce Canyon National Park has been described in detail elsewhere (Buchanan 1960, 1971, Buchanan et al. 1981; NCPN in ed.; Roberts et al. 1992). Buchanan (1992) presented a relatively simple vegetation classification that subdivided the park's flora into four main communities arranged within three elevational belts.

The harshest environments for plant growth within Bryce Canyon are found on the badlands slopes and breaks along the eastern escarpment of the Paunsaugunt Plateau, within the pinyon-juniper woodland belt (Buchanan 1992). Violent summer rainstorms, high winds, and freeze-thaw in winter and spring conspire to prevent deep soils from forming on barren slopes and favor cushion plants or perennial shrubs and trees. Many of the park's Claron endemic plants are restricted to these colorful badland slopes. Western bristlecone pine (*Pinus longaeva*) may be locally common on barren slopes or co-occur with ponderosa pine (*P. ponderosa*). Lower slopes and more sheltered sites may support open woodlands of two-needle pinyon (*P. edulis*), Utah juniper (*Juniperus osteosperma*) and scattered big sagebrush (*Artemesia tridentata*).

More-moderate slopes with better soil development characterize the submontane forest belt. This zone, located mostly below 8,500 feet, consists of extensive forests of ponderosa pine with an open understory of greenleaf manzanita (*Arcostaphylos patula*), antelope bitterbrush (*Purshia tridentata*), and Fendler's mountain-lilac (*Ceanothus fendleri*). Ponderosa pine forests are replaced by montane sagebrush meadows dominated by black sagebrush (*Artemesia nova*), greenish rabbitbrush (*Chrysothamnus nauseosus*), spineless horsebrush (*Tetradymia canescens*), and a variety of perennial bunchgrasses and forbs on sites with deeper soils and cold air drainage (Buchanan 1992).

Above 8,500 feet, the forests of Bryce Canyon NP are dominated by Douglas-fir (*Pseudotsuga menziesii*), Engelmann spruce (*Picea engelmannii*), and white fir (*Abies concolor*). Quaking aspen (*Populus tremuloides*) may have been historically more prevalent in the area but has apparently declined

due to long-term fire suppression. Montane forests (with the exception of aspen groves) tend to have a sparse understory of shade-tolerant shrubs and forbs, such as common juniper (*Juniperus communis*), mountain snowberry (*Symphoricarpos oreophilus*), and mountain-lover (*Pachystima myrsinites*) (Buchanan 1992).

Due to the presence of the Paunsaugunt Fault, porous sandstone overlies relatively impervious Tropic Shale along the eastern margin of the park, creating suitable conditions for small seeps and springs. Additional areas of riparian vegetation occur in drainage bottoms and along the Tropic Ditch. Wetland vegetation in Bryce Canyon NP is locally dominated by coyote willow (*Salix exigua*), yellow willow (*S. lutea*), narrow-leaved cottonwood (*Populus angustifolia*), Baltic rush (*Juncus arcticus*), and Nebraska sedge (*Carex nebrascensis*).

1.1.4 Previous botanical studies

The Pink Cliffs area was explored by the Powell Survey in 1872, under the direction of John Wesley Powell's brother-in-law, Almon Thompson. Botanist Lester Ward worked for later Powell surveys and collected extensively in the Aquarius and Fish Lake plateaus, but apparently did not collect specimens in the Bryce area as suggested by Evenden et al. (2002). Utah's preeminent pioneer botanist, Marcus E. Jones, was apparently the first plant collector to explore the immediate vicinity of Bryce Canyon. Jones procured at least two specimens from the "canyon above Tropic" near the northeast boundary of the park in 1894 (Table 1.3.4). These specimens represented types of silvery primrose (*Primula incana*) and King's flax (*Linum kingii* var. *pinetorum*, now considered taxonomically negligible). Although *Linum kingii* is known from several locations in the park today, *Primula incana* has not been relocated.

The first collector to secure specimens within Bryce Canyon National Park (earlier workers had collected in Red Canyon and other areas of adjacent Dixie National Forest) was apparently Walter Cottam, of Brigham Young University, who discovered at least eight new species starting in 1926 (Table 1.3.4, Figure 1.3.4). Mildred Mathias collected the first type specimen from the park when she discovered least lomatium (*Lomatium minimum*) in 1929. George Goodman and C. Leo Hitchcock were the first among a cadre of noteworthy taxonomists from outside Utah to collect within the park, adding at least four new

Table 1.3.4. Chronology of plant-collecting efforts in Bryce Canyon National Park.

Year	Collector(s)	# of new taxa	Comments
1894	M. E. Jones	1 reported	Marcus E. Jones collected the types of <i>Primula incana</i> and <i>Linum kingii</i> var. <i>pinetorum</i> from "canyon above Tropic" in the vicinity of Bryce Canyon National Park. <i>Linum kingii</i> has since been discovered within the park, but no confirmed records have been found for <i>Primula incana</i> .
1912	W. W. Eggleston	0	W. W. Eggleston collected the type of Breaks bladderpod (<i>Physaria [Lesquerella] rubicundula</i>) from Red Canyon, NW of Bryce Canyon
1916	H. E. Malmsten	0	H. E. Malmsten, a U.S. Forest Service employee, collected the type of Podunk groundsel (<i>Senecio malmstenii</i>) from Little Podunk Creek, apparently just outside the boundary of Bryce Canyon NP.
1926– 1929	W. P. Cottam, F. W. Hunnewell, & M. E. Mathias	13	Walter Cottam made the earliest-known collections from within Bryce Canyon NP, documenting at least 8 species from 1926 to 1929. F. W. Hunnewell added at least 3 new species while collecting for the New York Botanical Garden in 1928. Mildred Mathias collected the holotype of <i>Lomatium minimum</i> from Bryce Canyon in 1929.
1930– 1935	G. Goodman, C. L. Hitchcock, K. E. Weight, J. A. Rowe, F. M. Stone, M. C. Ferguson, A. M. Ottley, A. Eastwood, & J. T. Howell	152	George Goodman and C. L. Hitchcock discovered 4 new species for the park in 1930. Kenneth Weight established the BRCA herbarium and initiated the first major floristic study of Bryce Canyon in 1931, documenting 144 new species over the next four years. Weight (1933) developed the first checklist of the park and vicinity, listing 286 taxa. J. A. Rowe, F. M. Stone, M. C. Ferguson, and A. M. Ottley contributed 4 additional new species during this period. In 1933, Alice Eastwood and John Howell collected the holotypes of Red Canyon penstemon (<i>Penstemon bracteatus</i>) and Bryce Canyon townsendia (<i>Townsendia montana</i> var. <i>minima</i>) from Red Canyon, just west of the park.
1938	W. S. Boyle	3	W. S. Boyle discovered 3 new species for the park.
1940– 1946	H. R. Shephard, E. Gifford, J. D. Slade, J. W. Vogt, W. S. Boyle, O. Degener, L. Peiler, & B. Maguire	28	Bassett Maguire collected the type of <i>Silene petersonii</i> from Red Canyon (outside Bryce Canyon NP) in 1940. H. R. Shephard, E. Gifford, J. D. Slade, and J. W. Vogt made more than 40 collections in the park and added 17 new species to the flora in 1940–1941. W. S. Boyle contributed nearly 50 specimens to the park herbarium and 9 new species in 1942. Otto Degener, Leroy Peiler, and L. J. Mitchell added two additional species from 1942 to 1945.
1947	D. Ripley & R. Barneby	0	Dwight Ripley and Rupert Barneby collected the holotype of Jones' locoweed (<i>Oxytropis oreophila</i> var. <i>jonesii</i>) from Red Canyon, west of Bryce Canyon NP.
1950– 1954	H. H. Hall & B. F. Harrison	2	Heber Hall and Bertrand Harrison collected two new species for the park from 1950 to 1954.
1956– 1959	H. Buchanan	94	Hayle Buchanan, then a graduate student at the University of Utah, discovered 94 species in Bryce Canyon NP while conducting research on the vegetation of the park (Buchanan 1960).
1965	N. Holmgren & J. Reveal	2	Noel Holmgren and James Reveal collected the type of Reveal's paintbrush (<i>Castilleja parvula</i> var. <i>revealii</i>) from Bryce Canyon NP.
1968	L. Higgins	0	Larry Higgins collected the type of yellowish cryptanth (<i>Cryptantha ochroleuca</i>) at Red Canyon, west of Bryce Canyon NP.
1969– 1970	H. Buchanan	3	Hayle Buchanan added 3 new species to the park flora while conducting research on forest ecology of Bryce Canyon. Buchanan and Nebeker (1971) compiled a checklist of the park flora citing 218 taxa.
1971– 1973	G. Stebbins & H. Buchanan	4	Gary Stebbins discovered 3 new species in 1971–1972; Hayle Buchanan added one new taxon in 1973.
1977	R. Foster & D. Foster	3	Robert Foster discovered 3 new species in 1977.
1978– 1979	H. Buchanan	9	Beginning in 1978, Hayle Buchanan conducted a follow-up study to his doctoral work in the park, examining successional patterns with Robert Graybosch and Kimball Harper.

Table 1.3.4. Chronology of plant collecting efforts in Bryce Canyon National Park, cont.

Year	Collector(s)	# of new taxa	Comments
1980–1981	R. Graybosch	138 + 10 reported	Robert Graybosch collaborated with Hayle Buchanan to study vegetation and endemic plants of Bryce Canyon NP and added 148 new species to the park flora. Buchanan and Graybosch (1981) published a revised checklist with 446 species.
1982	R. Shaw	1	Richard Shaw added Colorado Plateau bladderpod (<i>Lesquerella rectipes</i>) to the park flora.
1986–1987	L. Gottschalk & G. Hallsten	8	Linda Gottschalk and Gregory Hallsten of Utah State University collected 8 new species for Bryce Canyon NP in 1986–1987. Hallsten and Roberts (1988) published a short paper listing 27 new species not previously reported for the park.
1989–1991	C. Schelz, J. M. Passek, and M. W. Britten	6	Charles Schelz, J. M. Passek, and M. W. Britten added 6 new species to the park flora while conducting rare plant and invasive weed studies.
1993–1994	R. Foster	24	Robert Foster discovered 24 new species for the park (specimens mostly at BRY), including the earliest collection of Barkley's groundsel (<i>Senecio wernerifolius</i> var. <i>barkleyi</i> , described as a new taxon by Welsh et al. in 2003).
1998	B. Buchanan, K. Kitchen, & J. Ames-Curtis	23	Beth Buchanan, Karen Kitchen, and Juli Ames-Curtis conducted a weed survey and discovered 22 new non-native species for the park, including 4 new Utah state noxious weeds.
2004–2007	S. Topp, K. Andersen, L. Ballenger, A. Tendick, & W. Fertig	40 + 12 reported	Dewey and Andersen (2005) reported leafy spurge (<i>Euphorbia esula</i>) as a new invasive species for Bryce Canyon during their 2004 weed survey. Sarah Topp, Amy Tendick, and Liz Ballenger of the NCPN vegetation mapping crew vouchered 37 new species and reported 11 others (without vouchers) while conducting field sampling from 2004 to 2007 (NCPN in ed., Topp 2007). W. Fertig added 3 new species in 2006 (Topp 2007).

species to the flora in 1930. In subsequent years, Alice Eastwood, John T. Howell, Dwight Ripley, Rupert Barneby, Bassett Maguire, Larry Higgins, Noel Holmgren, and James Reveal would visit the area and collect holotypes of Claron endemics, though most of these were collected in Red Canyon (on Dixie National Forest) rather than in Bryce Canyon National Park (Welsh 1982).

Kenneth Weight initiated the first major floristic study of Bryce Canyon NP in 1931. Over the next four years, Weight collected over 180 specimens for the nascent Bryce Canyon NP herbarium (BRCA) and documented 144 new species for the park. In 1933, Weight published the first checklist of the park's flora and vicinity, listing 286 taxa (Weight 1933). Over the next decades, a number of other park employees and visitors (most notably, W. S. Boyle, H. R. Shephard, and E. Gifford) contributed about 30 additional species to the park flora.

The next major floristic study of Bryce Canyon National Park began in 1956, with the work of Hayle Buchanan. During the late 1950s, Buchanan discovered 94 new species for the park flora

while conducting research toward his doctoral dissertation at the University of Utah on the vegetation of Bryce Canyon (Buchanan 1960). Buchanan returned to the park in the late 1960s and late 1970s to conduct follow-up research on successional dynamics (Buchanan 1971, Buchanan et al. 1981) and co-authored a revised park checklist in 1971 (Buchanan and Nebeker 1971).

From 1978 to 1981, Buchanan worked with graduate student Robert Graybosch on a new study of vegetation and endemic plants of Bryce Canyon NP that resulted in the discovery of 157 new taxa and increased the park's flora by nearly 33%. Buchanan and Graybosch (1981) published a revised checklist reporting 446 species for the park.

More than 100 new species have been added to the park flora in the past two decades. Linda Gottschalk and Gregory Hallsten, of Utah State University, discovered nine new species in the mid 1980s (Hallsten and Roberts 1988). Charles Schelz, Beth Buchanan, Karen Kitchen, Juli Ames-Curtis, and other park employees discovered 29 new weed species during surveys in 1989–1991 and 1998. John Spence conducted vegetation

monitoring studies in Bryce Canyon in the early 1990s, and co-authored a revised plant checklist with Hayle Buchanan in 1993, listing 458 taxa and correcting some errors from previous lists (Spence and Buchanan 1993). Robert Foster collected extensively in 1993–1994 and added 24 new species to the flora. Most recently, Sarah Topp, Amy Tendick, Liz Ballenger, and colleagues from the NCPN vegetation mapping team discovered or reported 48 new taxa for Bryce Canyon NP from

2004–2007 (NCPN in ed., Topp 2007). Dewey and Andersen (2005) added one additional species report while conducting a mapping survey of invasive weeds. Walter Fertig contributed three new species and relocated several historic records in 2006.

Additional details on plant-collecting efforts at Bryce Canyon NP can be found in Table 1.3.4.

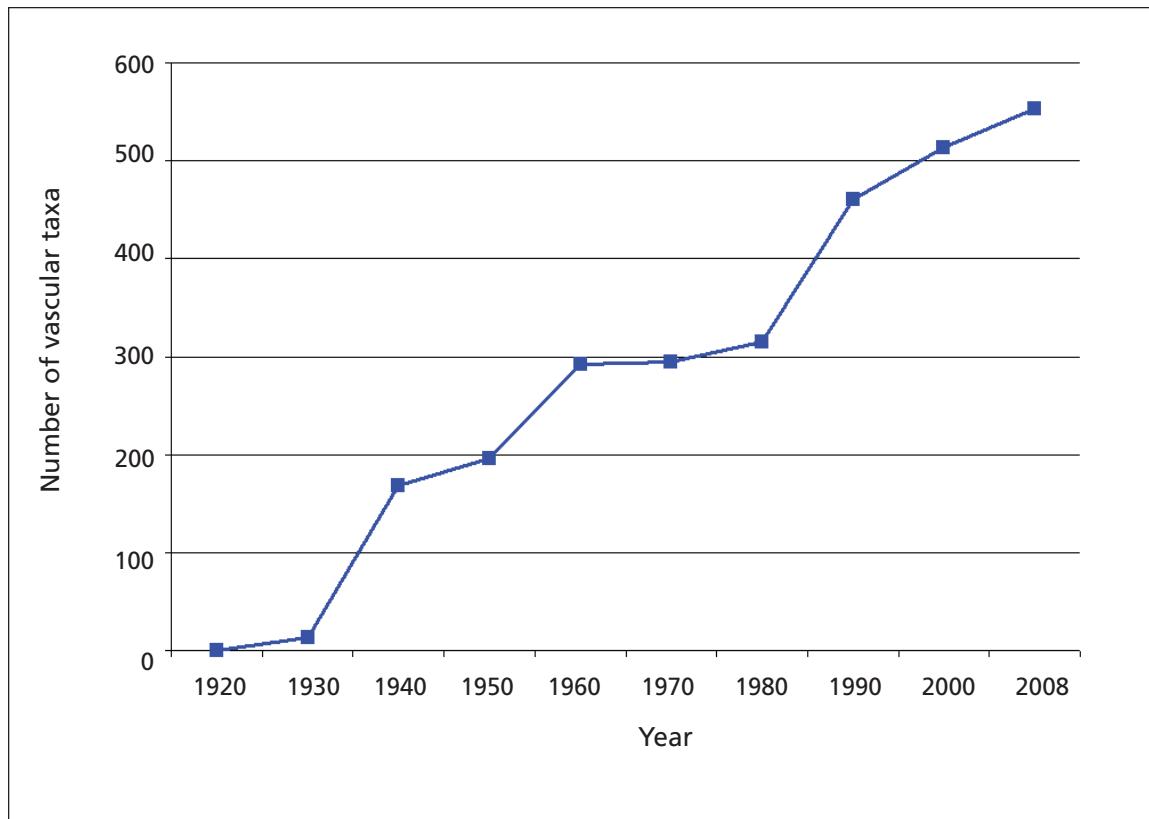

Figure 1.3.4. Increase in the number of plant taxa confirmed as present in Bryce Canyon National Park by decade, 1920–2008.

2 Methods

In April 2005, we reviewed all mounted specimens in the Bryce Canyon National Park herbarium to determine whether each was correctly identified to species, subspecies, or variety following the nomenclature of Welsh et al. (2003). As necessary, corrections and annotations were made to each specimen and to the voucher records in the park's Automated National Cataloging System (ANCS+) and NPSpecies database. Based on this herbarium work and a review of park references (Buchanan and Graybosch 1981; Hallsten and Roberts 1988; Spence and Buchanan 1993), we developed four lists:

1. A revised checklist of species that were present in the park (confirmed by an authenticated voucher; included in Appendices A and D);
2. A list of species that were reported in the literature but not corroborated with a voucher (equivalent to "probably present" in NPSpecies terminology; included in Appendices A and D);
3. A list of potential species ("unconfirmed" in NPSpecies) A list of potential species ("unconfirmed" in NPSpecies) known from the vicinity of Bryce Canyon NP using an unpublished list generated by Dr. N. Duane Atwood of Brigham Young University, Albee et al. (1988), Madsen (2001), Spence and Buchanan (1993), and Welsh et al. (1978) (Appendix B); and
4. A list of species that were known to be mis-identified by Spence and Buchanan (1993) or highly questionable (Appendix C).

Each list was annotated with supplemental information on life form, geographic range (within the context of Utah), population size in the park (derived from NCPN in ed., and field observations), flowering period, distribution across general vegetation types, nativity, data source (collector and collection number from a sample specimen or literature citation), year of earliest collection (from herbarium records), and relevant synonymy and taxonomic problems (based on review of Barkworth et al. 2003, 2007; Barneby 1989; Cronquist 1994; Cronquist et al. 1972, 1977, 1984, 1997; Dorn 2001; Flora of North America Editorial Committee 1993, 1997, 2000, 2002a, 2002b, 2003, 2005, 2006a, 2006b, 2006c; Holmgren et al. 2005; Weber and Wittmann 2001). The annotations to these lists and label data from the BRCA herbarium review were then incorporated into the NPSpecies database for the park.

Work in 2005–2007 focused on confirmation of reported and potential species for the park flora through field surveys and review of collections from state and regional herbaria. We made several collecting trips to Bryce Canyon NP in the spring, summer, and fall of 2005, 2006, and 2007 to target missing species, emphasizing under-sampled wetland, weedy, and late-flowering taxa. Herbarium studies were undertaken at Brigham Young University (BRY), Utah State University (USU), and the University of Wyoming (RM) in March, June, and October 2006 and February and March 2007. We also documented park specimens from the Virtual Herbarium website of the New York Botanical Garden (<http://sciweb.nybg.org/science2/hcol/intf/index.asp>). Finally, we found additional new species reports by examining unmounted collections and reviewing plot data from recent vegetation mapping studies (NCPN in ed.).

3 Results

3.1 Summary of the flora of Bryce Canyon National Park

Of the 1,245 vascular-plant vouchers in the main BRCA herbarium and the park's resource management collection that we examined in 2005, 124 were misidentified (10.0%), 54 were revised to a more current name (4.3%), 291 had variety or subspecies names added (23.4%), and 776 were found to be correctly determined (62.3%). Based solely on these collections, the confirmed flora of Bryce Canyon National Park stood at 467 taxa (Fertig 2006). From 2005 to 2007, we located an additional 49 taxa (mostly species reported in Spence and Buchanan 1993, but without a duplicate voucher deposited in the BRCA herbarium)

from collections at Brigham Young University, Utah State University, and the New York Botanical Garden Virtual Herbarium. Field surveys from 2005 to 2007 netted another 37 new species (Topp 2007). Overall, the documented flora of Bryce Canyon NP has increased by 86 species (15.6%), bringing the total number of taxa to 553 (Table 3.1, Appendices A, D).

Currently, 34 additional taxa have been reported for Bryce Canyon NP but have yet to be corroborated with a voucher specimen (Table 3.1, Appendix A). Of these, 27 were reported by Buchanan and Graybosch (1981), Spence and Buchanan (1993), or from observations by recent vegetation mapping and wetland research crews (NCPN in ed.). Taken together, the number of confirmed and reported vascular plant taxa in Bryce Canyon NP stands at 587 taxa (Table 3.1, Appendix A).

Table 3.1. Statistical summary of the flora of Bryce Canyon National Park.

Category	Number confirmed in park	Number additionally reported for park	Total
Taxonomic diversity			
Total taxa (including varieties and subspecies)	553	34	587
Full species (excluding varieties and subspecies)	526	27	553
Families	73	0	73
Life form diversity			
Tree taxa	18	0	18
Shrub taxa	72	2	74
Perennial forb taxa	316	23	339
Annual forb taxa	58	6	64
Perennial graminoid taxa	77	3	80
Annual graminoid taxa	7	0	7
Fern taxa	5	0	5
Biogeographic diversity			
Introduced taxa	58	2	60
Native taxa			
Locally endemic taxa	19	3	22
Regionally endemic taxa	45	4	49
Disjunct taxa	3	0	3
Peripheral taxa	2	0	2
Sparse taxa	10	0	10
Widespread taxa	416	25	441
Total native taxa	495	32	527

The number of taxa and families is based on taxonomic concepts of Welsh et al. (2003). See Appendices, "Codes and Definitions", for an explanation of the various categories.

At the start of the 2006 field season, we recognized 327 taxa as potentially occurring in Bryce Canyon NP, based on the proximity of the park to known populations (Albee et al. 1988; Madsen 2001; Fetig 2006). At least 29 of these species have recently been found in the park based on field collections or relocated herbarium specimens. The current number of potential species that we are recognizing for Bryce Canyon NP is 298 (Appendix B).

Of the original pool of species documented or reported for the park, we found that 70 taxa were falsely reported based on misidentified voucher specimens in the BRCA and BRY herbaria and the work of Spence and Buchanan (1993). We consider an additional six species cited (but not vouchered) by Spence and Buchanan (1993) and the NCPN vegetation mapping team (NCPN in ed.) to be questionable based on the absence of suitable habitat or the distance of Bryce Canyon NP to the known or expected range of each species (Appendix C).

The confirmed and reported flora of Bryce Canyon NP represents 16.3% of the 3,594 native and naturalized taxa documented for the state of Utah by Welsh et al. (2003) and 48.3% of the state's 151 plant families. Within Garfield and Kane counties, the park flora captures 34.1% of the 1,719 taxa reported by Welsh et al. (2003). At the ecoregional scale, Bryce Canyon NP contains 36.5% of the 1,608 species reported for the Utah High Plateaus (Shultz et al. 2006).

3.2 Life form and biogeographic diversity

Although ecologically dominant, tree and shrub species make up only 15.7% of the confirmed and reported plant taxa of Bryce Canyon NP (Table 3.1). Perennial forbs are the most species-rich life form in the park's flora, with 339 known and reported taxa (57.8% of the total flora). Only 12.1% of the flora is composed of annual forbs and grass-like plants. Like trees and shrubs, perennial graminoids are ecologically important but relatively species-poor, representing less than 14% of the total flora. The diversity of ferns and fern-allies in Bryce Canyon NP is particularly low (0.9%) (Table 3.1).

Of the park's 527 native taxa, 441 (83.7%) are widespread across Utah and western North America. Only 22 species (4.2% of the park's total native flora) have extremely limited global distributions (local endemics found within an area of less than

1° of latitude × 2° of longitude; see Appendices for more complete definitions of biogeographic categories). Regional endemics (largely restricted to the Utah High Plateaus ecoregion or Colorado Plateau) comprise an additional 9.3% of the park flora (Table 3.1). Less than 3% of the park flora consists of species with disjunct, peripheral, or sparse geographic distribution patterns.

3.3 Plants of special concern

Bryce Canyon National Park has no plants listed as threatened or endangered under the U.S. Endangered Species Act. At least 21 park taxa were formerly candidates for potential listing (Category 2 or 3C) under the act (Table 3.3; UDWR 1998). Another 12 species are currently listed as sensitive by the U.S. Forest Service or Utah Bureau of Land Management. The Utah Division of Wildlife Resources Conservation Data Center (UTCDC) lists 50 species from Bryce Canyon NP as species of concern based on state or range-wide rarity or lack of sufficient data (UDWR 1998). Barkley's groundsel (*Senecio wernerifolius* var. *barkleyi*) is a local endemic that was described as a new taxon by Welsh et al. (2003), but currently is not tracked by the state's natural heritage program and has no formal legal status.

Peabody (1995) conducted an extensive survey of rare plants of Bryce Canyon NP, focusing primarily on species being considered for listing under the U.S. Endangered Species Act. In addition to plotting locations and describing habitat requirements, Peabody also established long-term monitoring plots to assess changes in population size. Schelz (1990) compiled information on rare plants of Bryce Canyon NP from herbarium records and data from the state's natural heritage program. Hallsten and Roberts (1990) conducted a detailed study of the autecology of the Paria breadroot (*Pediomelum parviflorum*).

3.4 Non-native and noxious weeds

Introduced plant species (not historically native to Utah or North America) make up 10.2% of the confirmed and reported flora of Bryce Canyon National Park (Table 3.1). This figure is lower than the statewide average of 13.5% non-native species (Fetig 2007, Welsh et al. 2003). Of the 60 introduced plant species confirmed or reported for Bryce Canyon NP, seven are listed as noxious by the State of Utah (State of Utah Department of Agriculture and Food 2007) (Table 3.4). Four of the park's noxious weed species were discovered

during a survey of non-native plants by Beth Buchanan, Karen Kitchen, and Juli Ames-Curtis in 1998. Dewey and

Andersen (2005) also mapped invasive plants in 2004 and reported one new noxious species.

Table 3.3. Plant species of conservation concern from Bryce Canyon National Park.

Family	Species	Common name	TNC global rank	Federal legal status	UTCDC status
Asclepiadaceae	<i>Asclepias hallii</i>	Hall's milkweed	G3		Watch, S1
Boraginaceae	* <i>Cryptantha cinerea</i> var. <i>arenicola</i>	sand cryptanth	G5T3?	USFWS: former C2	Watch, S3?
Boraginaceae	<i>Cryptantha ochroleuca</i>	yellowish cryptanth	G1?	USFS Region 4: Sensitive; USFWS: former C2	Rare, S1?
Caryophyllaceae	<i>Silene petersonii</i>	Peterson's campion	G2G3	USFS Region 4: Sensitive; USFWS: former C2	Watch, S2S3
Compositae (Asteraceae)	<i>Artemisia ludoviciana</i> ssp. <i>candicans</i>	Louisiana wormwood	G5T5		Periph., S1
Compositae (Asteraceae)	<i>Aster wasatchensis</i> var. <i>wasatchensis</i>	Markagunt aster	G3?TNR		Watch, S3?
Compositae (Asteraceae)	<i>Chrysopsis jonesii</i>	Jones' golden-aster	G2	USFWS: former 3C	Rare, S2

Polemoniaceae	<i>Phlox glaberrima</i>	daggerleaf phlox	G3?	USFWS: former 3C	Watch, S2S3
Polygonaceae	* <i>Eriogonum aretioides</i>	Widtsoe wild buckwheat	G2	USFS Region 4: Sensitive; USFWS: former C2	Rare, S2
Polygonaceae	<i>Eriogonum subreniforme</i>	kidney-shaped wild buckwheat	G3G4		Watch, S3?
Primulaceae	<i>Primula incana</i>	silvery primrose	G4G5		Periph., S1
Pyrolaceae (Ericaceae)	<i>Pyrola picta</i>	whiteveined wintergreen	G4G5		Infreq., S1
Rosaceae	* <i>Potentilla concinna</i> var. <i>modesta</i>	modest cinquefoil	G5?T4T5Q		Tax. Ques., S?
Rosaceae	<i>Potentilla plattensis</i>	Platte River cinquefoil	G4		Periph., S1
Scrophulariaceae	<i>Castilleja parvula</i> var. <i>revealii</i>	Reveal's paintbrush	G2	USFS Region 4: Sensitive; USFWS: former C2	Rare, S2
Scrophulariaceae	<i>Orthocarpus purpureoalbus</i>	violet owl-clover	G3G4		Periph., S1S2
Scrophulariaceae	<i>Penstemon bracteatus</i>	Red Canyon penstemon	G2	USFS Region 4: Sensitive; USFWS: former C2	Rare, S2

Table 3.3. Plant species of conservation concern from Bryce Canyon National Park, cont.

Family	Species	Common name	TNC global rank	Federal legal status	UTCDC status
Scrophulariaceae	<i>Penstemon caespitosus</i> var. <i>desertipicti</i>	painted penstemmon	G5T3?		Watch, S2?
Scrophulariaceae	<i>Penstemon procerus</i> var. <i>aberrans</i>	smallflower penstemmon	G5T3?		Add. Data, S3?
Umbelliferae (Apiaceae)	<i>Cymopterus minimus</i>	least spring-parsley	G1G2Q	USFS Region 4: Sensitive; USFWS: former C2	Rare, S1S2
Umbelliferae (Apiaceae)	<i>Lomatium minimum</i>	least lomatium	G3	USFWS: former 3C	Watch, S3

This list is derived from the Utah Division of Wildlife Resources (1998) for UTCDC status.

All species are confirmed as present in the park except those indicated with an * (reported).

Codes: **TNC global rank** assesses abundance and conservation priority on a scale of 1–5 (1 being extremely vulnerable and 5 being secure) for full species (G) and varieties or subspecies (T) across their entire range. A "?" indicates uncertainty in the rank, Q = taxonomic questions, U = unknown, and NR = not ranked. A comparable scoring system is used to measure state abundance (S) in Utah under the column UTCDC status.

Under **legal status**, USFWS = US Fish and Wildlife Service. C2 = category 2 candidate (a former category used for taxa that might warrant being proposed for Threatened or Endangered status following additional research). 3C = category 3 candidates (species dropped from consideration for listing). USFS = U.S. Forest Service. BLM = U.S. Bureau of Land Management.

UTCDC status includes conservation categories adopted by the state natural heritage program to prioritize endemic and rare plant taxa (Utah Division of Wildlife Resources 1998). These categories include: Historical (presumed extinct or only known historically through their range), Rare (plants with rangewide viability concerns), Watch (regional endemics without rangewide viability concerns), Peripheral (rare or uncommon in Utah, but more common rangewide), Infrequent (plants occur infrequently over western US), Taxonomic Problems (validity of species, subspecies, or variety has been questioned), Additional Data (species appear rare, but more information needed before being assigned to a different category).

Table 3.4. Noxious weed species of Bryce Canyon National Park.

Family	Species	Common name	Park status
Compositae (Asteraceae)	<i>Carduus nutans</i>	musk thistle	Present
Compositae (Asteraceae)	<i>Centaurea maculosa</i>	spotted knapweed	Present
Compositae (Asteraceae)	<i>Centaurea repens</i>	Russian knapweed	Present
Compositae (Asteraceae)	<i>Cirsium arvense</i>	Canada thistle	Present
Convolvulaceae	<i>Convolvulus arvensis</i>	field bindweed	Present
Cruciferae (Brassicaceae)	<i>Cardaria draba</i>	whitetop	Present
Euphorbiaceae	<i>Euphorbia esula</i>	leafy spurge	Reported

This list is derived from the State of Utah Department of Agriculture and Food (2007) and Dewey and Andersen (2005).

4 Discussion

Since the publication of Weight's 1933 checklist of 286 species, the confirmed and reported flora of Bryce Canyon National Park has more than doubled to 587 taxa (Table 3.1, Figure 1.3.4, Appendix A). Based on available habitats and proximity, at least another 298 plant taxa may occur within the park (Appendix B). Should all of these potential species be found, the documented flora of the park would increase by nearly 33%. Many of the "missing" potential or reported taxa consist of cryptic species that flower late in the grow-

ing season, or occur in undersampled wetland or weedy habitats. A large number of weedy species that are known for the park from specimens in the resource management collection are not yet represented in the official herbarium and should be the target of additional collection efforts. Confirmation of reported species should remain a high priority, as some of these taxa may ultimately prove to be erroneous. Additional studies would also be useful to better refine the abundance and distribution of species of high management interest (especially rare plants and invasive non-natives).

Appendices

The following appendices contain annotated checklists of the vascular flora of Bryce Canyon National Park. Appendix A lists all species that have been confirmed for the flora with an authenticated voucher specimen (including extant and historical records) or which have been reliably reported for the park in the literature (Buchanan and Graybosch 1981; Dewey and Andersen 2005; Hallsten and Roberts 1988; NCPN in ed.; Spence and Buchanan 1993). Vouchers were examined from the BRCA herbarium, including the separate resource management (BRCA-RM) repository, and collections from Brigham Young University (BRY), Utah State University (USU), the University of Wyoming (RM), and the digital museum database of the New York Botanical Garden (NY). Species entries in Appendix A are organized alphabetically by family and genus.

Appendix B includes species that may potentially occur within Bryce Canyon National Park based on the proximity of the park to other populations or the presence of suitable habitat.

Appendix C lists species that have been previously reported for Bryce Canyon National Park but are now considered erroneous because they are based on misidentified specimens or questionable literature records.

Appendix D contains the same confirmed, historical, and reported taxa as in Appendix A, but organized by life form rather than by family in order to better meet the needs of NPS interpretive specialists.

The codes and references for each field in the appropriate appendices are summarized below.

Family (Appendices A, B, C, and D)

Family concepts and nomenclature follow *A Utah Flora, third edition* (Welsh et al. 2003). Alternative family names and treatments from other regional floras (Dorn 2001; Flora of North America Editorial Committee 1993, 2002b; Holmgren et al. 2005; Weber and Wittman 2001) are listed in parentheses.

Species name (Appendices A, B, C, and D)

Nomenclature for scientific names and taxonomic concepts are derived from Welsh et al. (2003). Scientific names are listed in alphabetical rather than phylogenetic order.

Synonyms/Taxonomic notes (Appendices A, B, and C)

Pertinent synonyms are included for species with alternative scientific names in other recent state and regional floras (Barkworth et al. 2003, 2007; Barneby 1989; Cronquist 1994; Cronquist et al. 1972, 1977, 1984, 1997; Dorn 2001; Flora of North America Editorial Committee 1993,

1997, 2000, 2002a, 2002b, 2003, 2005, 2006a, 2006b, 2006c; Holmgren et al. 2005; Weber and Wittmann 2001). No effort has been made to identify additional synonyms from monographs and floras preceding the early 1970s.

Common name (Appendices A, B, C, and D)

Common names are derived primarily from Welsh et al. (2003) and the *Intermountain Flora* (Barneby 1989; Cronquist 1994; Cronquist et al. 1972, 1977, 1984, 1997; Holmgren et al. 2005).

Life form (Appendices A, B, C, and D)

Life form is based on the stature and growth habit of typical members of a species at reproductive maturity. Trees are woody perennials with a single stem or trunk and are typically over 3.5 m tall. Shrubs are woody perennials with one to many trunks arising from near the base of the plant and are usually less than 3.5 m tall. Perennial Forbs (PerF) are broad-leaved dicots or monocots with non-woody stems (at least above ground level) that live for multiple years. Annual Forbs (AnnF) are broad-leaved dicots or monocots with non-woody stems that complete their life cycle (mature, flower, and die) in one year. Perennial Graminoids (PerG) are linear-leaved, grass-like monocots that live for multiple years. Annual Graminoids (AnnG) are linear-leaved, grass-like monocots that complete their life cycle (mature, flower, and die) in one year. Ferns and fern-allies (Fern) are non-flowering vascular plants that reproduce by spores.

Range (Appendices A, B, and C)

Range represents the distribution of a species within Utah and the state's contribution to the plant's overall global range. Disjunct (Disj) taxa have their Utah distribution separated from the main, contiguous portion of their range by a gap of more than 800 km (ca 500 miles). Introduced (Intro) taxa are those that are not native to Utah or North America but have become naturalized (breeding on their own without human assistance). Local Endemics (LocEn) are taxa whose entire global range is restricted to an area of less than 16,500 km² (ca 6,370 mi², or 1° of latitude × 2° of longitude). Peripheral (Periph) taxa have a widespread global distribution but occur at the margin of their contiguous range in Utah and occupy less than 5% of the state's area (usually only within a few miles of the state border). Regional Endemics (RegEn) are taxa with a global range of 16,500–250,000 km² (an area about the size of the state of Wyoming). Sparse taxa occur widely across Utah or North America but their range within Utah is small and patchy, with populations restricted to specialized or uncommon habitats. Widespread (Wide) taxa have global ranges exceeding 250,000 km² and occur over at least 10% of the state.

Park status (Appendices A, C, and D)

Park status identifies whether a species is Present (**Pres**), Historical (**Hist**), or Reported (**Rep**) for Bryce Canyon National Park. Species are considered Present if a confirmed voucher or documented observation has been made within park boundaries since 1970. Historical species have been confirmed with a voucher from the park but have not been relocated since before 1970. Reported species are listed for the park in the literature (Buchanan and Graybosch 1981; Dewey and Andersen 2005; Hallsten and Roberts 1988; NCPN in ed.; Spence and Buchanan 1993), but have not been corroborated with a voucher specimen. Species that may potentially occur in Bryce Canyon NP are listed in Appendix B. Rejected taxa (listed in Appendix C) have either been falsely reported (**FalsRep**) in the literature based on misidentified herbarium specimens or are considered Questionable (**Ques?**) because park reports are from well outside their known or expected range.

Pop. size (Appendix A)

Population size refers to the abundance and frequency with which a species occurs within Bryce Canyon NP. Abundance data are derived from Northern Colorado Plateau Network (in ed.), and personal observations. Abundant (**Abun**) taxa have large populations, have a broad ecological amplitude (often being dominant in one to several vegetation types), or occur extensively across the park. Common (**Com**) taxa have large local populations but may be restricted to a single vegetation type or do not occur across the entire park. Uncommon (**Unc**) taxa have low to medium-sized populations, typically have a narrow ecological amplitude (or at least contribute relatively little to total vegetative cover), or have a small range across the park. Rare taxa usually have low population numbers and are restricted to a single location within the park. A “?” indicates that population size is unknown.

Source (Appendix A)

Sources are the evidence for the assigned park status. In the case of Present and Historical taxa, sources are herbarium records (with collector, collection number, and repository) that were corroborated during this study. For reported taxa, the source is a published or unpublished reference citing the species within the park. Specimen repositories include the Bryce Canyon National Park herbarium (**BRCA**) Bryce Canyon National Park resource

management collection (**BRCA-RM**), Brigham Young University (**BRY**), Utah State University (**USU**), New York Botanical Garden (**NY**), and the University of Wyoming’s Rocky Mountain Herbarium (**RM**).

Year doc. (Appendix A)

Year documented indicates the first year in which a species was confirmed or reported to occur in Bryce Canyon National Park. This year does not necessarily correspond with the date of the voucher specimen cited under Source. “NA” indicates that the first year is not known (used mostly for ‘reported’ taxa).

Comments (Appendices A, B, C, and D)

This column includes additional comments on the status of a particular species in the park, the place of origin for introduced species, legal status, and other data.

Nativity (Appendix D)

Nativity indicates whether a species is native to Utah or Introduced (Intro) based on Fertig (2007).

Flower time (Appendix D)

Flower Time refers to the months in which a species is most likely to be in flower. NA indicates a species that is a non-flowering fern or gymnosperm.

Habitat (Appendix D)

The distribution of species across generalized habitats in Bryce Canyon National Park is indicated by an “x” in the columns Sage/Grs through Wet and is derived from the vegetation classification of Buchanan (1992), Madsen (2001), and Welsh et al. (2003). Sage/Grs=black sagebrush (*Artemisia nova*) grasslands and montane meadows dominated by perennial grasses and herbaceous species. PinJun=Pinyon-Juniper woodlands of two-needle pinyon (*Pinus edulis*) and Utah juniper (*Juniperus osteosperma*). MontConf=montane brush and conifer forests of ponderosa pine (*Pinus ponderosa*), Gambel oak (*Quercus gambelii*), Douglas-fir (*Pseudotsuga menziesii*), and white fir (*Abies concolor*). Wet=Wetlands (including wet meadows, ponds, swampy forests, and seeps and springs). Additional comments are included for species that are restricted to a particular soil/geologic type or are found mostly in disturbed sites.

Boraginaceae	<i>Lappula squarrosa</i>	<i>L. squarrosa</i> var. <i>squarrosa</i> , <i>L.</i> <i>echinata</i>	European stickseed	AnnF	Intro	Native to Eurasia. Native race (<i>L. erecta</i>) from the Rocky Mountains is probably extralimital
Boraginaceae	<i>Mertensia fusiformis</i>	Included in <i>M. oblongifolia</i> by some authors	spindle-rooted bluebell	PerF	RegEn	
Boraginaceae	<i>Plagiobothrys scouleri</i> var. <i>penicillatus</i>	<i>Plagiobothrys scouleri</i> var. <i>hispidulus</i>	meadow popcorn-flower	AnnF	Wide	
Cactaceae	<i>Echinocereus engelmannii</i> var. <i>variegatus</i>	<i>E. engelmannii</i> var. <i>decumbens</i> . Vars. not recognized in <i>Flora of</i> <i>North America</i> (2003)	Glen Canyon hedgehog cactus	PerF	RegEn	
Capparaceae (Cleomaceae)	<i>Cleome serrulata</i>			Rocky Mountain beeplant	AnnF	Wide
Caprifoliaceae	<i>Lonicera involucrata</i>	<i>Distegia involucrata</i>	black twinberry	Shrub	Wide	
Caprifoliaceae (Adoxaceae)	<i>Sambucus racemosa</i> var. <i>microbotrys</i>	<i>S. microbotrys</i> , included in <i>S.</i> <i>racemosa</i> var. <i>racemosa</i> by some authors	red elderberry	Shrub	Wide	
Caryophyllaceae (Alysinaeae)	<i>Arenaria lateriflora</i>	<i>Moehringia lateriflora</i>	blunt-leaf sandwort	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Caryophyllaceae (Alysinaeae)	<i>Arenaria macradenia</i>	<i>Eremogone macradenia</i> var. <i>macradenia</i>	shrubby sandwort	PerF	Periph	
Caryophyllaceae (Alysinaeae)	<i>Arenaria rubella</i> var. <i>rubella</i>	<i>Minuartia rubella</i> , <i>Typhane</i> <i>rubella</i>	reddish sandwort	PerF	Wide	
Caryophyllaceae (Alysinaeae)	<i>Ceratium arvense</i>	<i>C. strictum</i> , <i>C. arvense</i> ssp. <i>strictum</i>	field chickweed	PerF	Wide	
Caryophyllaceae (Alysinaeae)	<i>Cerastium beeringianum</i>	<i>C. beerengianum</i> ssp. <i>earlei</i> , <i>C.</i> <i>beeringianum</i> var. <i>capillare</i>	Bering chickweed	PerF	Wide	
Caryophyllaceae (Alysinaeae)	<i>Sagina saginoides</i>		alpine pearlwort	PerF	Wide	
Caryophyllaceae	<i>Silene menziesii</i>	<i>S. menziesii</i> var. <i>menziesii</i> , <i>Anotites menziesii</i> var. <i>menziesii</i>	Menzies' campion	PerF	Wide	
Caryophyllaceae (Alysinaeae)	<i>Stellaria umbellata</i>		umbrella starwort	PerF	Wide	
Chenopodiaceae	<i>Bassia americana</i>	<i>Kochia americana</i>	greenmolly	PerF	Wide	
Chenopodiaceae	<i>Chenopodium desiccatum</i>	Includes <i>C. pratericola</i>	desert goosefoot	AnnF	Sparse	
Chenopodiaceae	<i>Chenopodium fremontii</i> var. <i>fremontii</i>	<i>C. fremontii</i>	Fremont's goosefoot	AnnF	Wide	
Chenopodiaceae	<i>Corispermum americanum</i>	Includes vars. <i>americanum</i> & <i>rydbergii</i>	American bugseed	AnnF	Wide	
Chenopodiaceae	<i>Cycloloma atriplicifolia</i>	<i>C. atriplicifolium</i>	winged pigweed	AnnF	Wide	
Chenopodiaceae	<i>Manolepis nuttalliana</i>		Nuttall's poverty-weed	AnnF	Wide	
Chenopodiaceae	<i>Salsola paulsenii</i>		barbwire Russian thistle	AnnF	Intro	Native to Eurasia
Chenopodiaceae	<i>Suaeda calceoliformis</i>	<i>S. depressa</i>	broom seepweed	AnnF	Wide	
Compositae (Asteraceae)	<i>Agoseris glauca</i> var. <i>agrestis</i>	Included in var. <i>dasycephala</i> by some authors	field agoseris	PerF	Sparse	
Compositae (Asteraceae)	<i>Agoseris glauca</i> var. <i>dasycephala</i>		short agoseris	PerF	Wide	
Compositae (Asteraceae)	<i>Ambrosia acanthicarpa</i>	<i>Franseria acanthicarpa</i>	bur ragweed	AnnF	Wide	
Compositae (Asteraceae)	<i>Ambrosia artemisiifolia</i>	<i>A. artemisiifolia</i> var. <i>elatior</i>	common ragweed	AnnF	Wide	
Compositae (Asteraceae)	<i>Antennaria pulcherrima</i>	<i>A. pulcherrima</i> ssp. <i>pulcherrima</i>	showy pussytoes	PerF	Sparse	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Compositae (Asteraceae)	<i>Antennaria umbrinella</i>		mountain pussytoes	PerF	Wide	
Compositae (Asteraceae)	<i>Arnica mollis</i>	Includes <i>A. ovata</i>	hairy arnica	PerF	Wide	
Compositae (Asteraceae)	<i>Arnica parryi</i>	<i>A. parryi</i> var. <i>parryi</i>	rayless arnica	PerF	Wide	
Compositae (Asteraceae)	<i>Artemisia biennis</i>	<i>A. biennis</i> var. <i>biennis</i>	biennial wormwood	PerF	Wide	
Compositae (Asteraceae)	<i>Artemisia bigelovii</i>		Bigelow's sagebrush	Shrub	Wide	
Compositae (Asteraceae)	<i>Artemisia cana</i> var. <i>viscidula</i>	<i>Seriphidium canum</i> ssp. <i>viscidulum</i>	silver sagebrush	Shrub	Wide	
Compositae (Asteraceae)	<i>Artemisia filifolia</i>	<i>Oligosporus filifolius</i>	sand sagebrush	Shrub	Wide	
Compositae (Asteraceae)	<i>Artemisia ludoviciana</i> var. <i>ludoviciana</i>		Louisiana wormwood	PerF	Wide	
Compositae (Asteraceae)	<i>Artemisia ludoviciana</i> var. <i>mexicana</i>		Louisiana wormwood	PerF	Wide	
Compositae (Asteraceae)	<i>Artemisia spinescens</i>	<i>Picrothamnus desertorum</i>	bud sage	Shrub	Wide	
Compositae (Asteraceae)	<i>Artemisia tridentata</i> var. <i>vaseyanana</i>	Includes <i>A. tridentata</i> var. <i>pauciflora</i> , <i>Seriophidium</i> <i>vaseyanum</i>	mountain big sagebrush	Shrub	Wide	
Compositae (Asteraceae)	<i>Aster brachyactis</i>	<i>Symphytum ciliatum</i> , <i>Brachyactis ciliata</i> ssp. <i>angusta</i>	rayless alkali aster	AnnF	Wide	
Compositae (Asteraceae)	<i>Aster foliaceus</i> var. <i>apricus</i>	<i>Symphytum foliacum</i> var. <i>apricum</i>	spruce aster	PerF	Sparse	
Compositae (Asteraceae)	<i>Aster welshii</i>	<i>Symphytum welshii</i>	Welsh's aster	PerF	LocEn	Type locality is Zion Canyon, Zion NP, Washington Co., UT (Welsh & Hays 24379 BRY).
Compositae (Asteraceae)	<i>Bahia dissecta</i>	<i>Amauriopsis dissecta</i>	cutleaf	PerF	Wide	
Compositae (Asteraceae)	<i>Bidens cernua</i>		nodding bur-marigold	PerF	Wide	

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Compositae (Asteraceae)	<i>Brickellia atractyloides</i>	<i>B. atractyloides</i> var. <i>atractyloides</i>	spiny brickellbush	Shrub	Wide	
Compositae (Asteraceae)	<i>Brickellia californica</i>		California brickellbush	Shrub	Wide	
Compositae (Asteraceae)	<i>Brickellia grandiflora</i>		tassel-flower brickellbush	PerF	Wide	
Compositae (Asteraceae)	<i>Brickellia longifolia</i>	<i>B. longifolia</i> var. <i>longifolia</i>	longleaf brickellbush	Shrub	Wide	
Compositae (Asteraceae)	<i>Centaurea virgata</i> var. squarrosa	<i>C. triumfetti</i>	squarrose knapweed	PerF	Intro	Utah state noxious weed. Native to Eurasia
Compositae (Asteraceae)	<i>Chamaechaenactis scaposa</i>	<i>C. scaposa</i> var. <i>parva</i>	Eastwood-plant	PerF	Wide	
Compositae (Asteraceae)	<i>Chrysothamnus greenii</i>		Green's rabbitbrush	Shrub	Wide	
Compositae (Asteraceae)	<i>Chrysothamnus nauseosus</i> var. <i>juncus</i>	<i>Ericameria nauseosa</i> var. <i>junccea</i>	rush rabbitbrush	Shrub	RegEn	Type locality is St. George, Washington Co., UT (Palmer s.n. NY)
Compositae (Asteraceae)	<i>Chrysothamnus nauseosus</i> var. <i>leiospermus</i>	<i>Ericameria nauseosa</i> var. <i>leiosperma</i>	smoothseed rabbitbrush	Shrub	RegEn	Type locality is St. George, Washington Co., UT (Palmer s.n. NY)
Compositae (Asteraceae)	<i>Chrysothamnus parryi</i> var. <i>howardii</i>	<i>C. parryi</i> var. <i>attenuatus</i> , <i>Ericameria parryi</i> var. <i>howardii</i>	longbract rabbitbrush	Shrub	Wide	
Compositae (Asteraceae)	<i>Chrysothamnus viscidiflorus</i> var. <i>puberulus</i>		puberulent rabbitbrush	Shrub	Wide	
Compositae (Asteraceae)	<i>Cirsium calcareum</i> var. <i>bipinnatum</i>	Var. not recognized by Cronquist (1994), <i>C. arizonicum</i> var. <i>bipinnatum</i>	wingless thistle	PerF	RegEn	
Compositae (Asteraceae)	<i>Cirsium clavatum</i> var. <i>clavatum</i>		Fish Lake thistle	PerF	RegEn	Type locality is Fish Lake, Sevier Co., UT (Jones 5715 NY)
Compositae (Asteraceae)	<i>Cirsium scariosum</i> var. <i>thorneae</i>		Thorne's thistle	PerF	LocEn	Type locality is Otter Creek, Grass Valley, Piute Co., UT (Welsh 14369 BRY).
Compositae (Asteraceae)	<i>Crepis acuminata</i>	<i>Psilochenia acuminata</i>	mountain hawksbeard	PerF	Wide	
Compositae (Asteraceae)	<i>Crepis atribarba</i>	<i>Psilochenia atribarba</i>	slender hawksbeard	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Compositae (Asteraceae)	<i>Erigeron argentatus</i>		silver daisy	PerF	Wide	
Compositae (Asteraceae)	<i>Erigeron eximius</i>	<i>E. superbus</i> , included in <i>E. formosissimus</i> by some authors	splendid daisy	PerF	Wide	
Compositae (Asteraceae)	<i>Erigeron formosissimus</i>		beautiful daisy	PerF	Wide	
Compositae (Asteraceae)	<i>Erigeron leiomerus</i>		smooth daisy	PerF	Wide	
Compositae (Asteraceae)	<i>Erigeron nauseosus</i>		Marysvale daisy	PerF	RegEn	Type locality is Marysvale, Piute Co., UT (Jones 5386 POM)
Compositae (Asteraceae)	<i>Erigeron sionis</i>	<i>E. proselyticus</i> , <i>E. sionis</i> var. <i>sionis</i> , <i>Zion daisy</i> <i>E. flagellaris</i> var. <i>trilobatus</i>		PerF	LocEn	Type locality is Zion NP, Washington Co., UT (Pilsby s.n. PH). USFWS: former C2 candidate
Compositae (Asteraceae)	<i>Erigeron utahensis</i> var. <i>utahensis</i>		Utah daisy	PerF	RegEn	Type locality is Kanab, Kane Co., UT (Thompson s.n. GH)
Compositae (Asteraceae)	<i>Eupatorium herbaceum</i>	<i>Ageratina herbacea</i>	white thoroughwort	PerF	Wide	
Compositae (Asteraceae)	<i>Gaillardia parryi</i>		Parry's blanketflower	PerF	RegEn	Type locality is "Southern Utah" (Parry 120 GH)
Compositae (Asteraceae)	<i>Gnaphalium palustre</i>		lowland cudweed	AnnF	Wide	
Compositae (Asteraceae)	<i>Haplopappus clementis</i>	<i>Pyrrhocoma clementis</i> var. <i>clementis</i>	Clement's goldenweed	PerF	Wide	
Compositae (Asteraceae)	<i>Haplopappus lanceolatus</i>	<i>Pyrrhocoma lanceolata</i>	meadow goldenweed	PerF	Wide	
Compositae (Asteraceae)	<i>Helenium hoopesii</i>	<i>Hymenoxys hoopesii</i> , <i>Dugaldia hoopesii</i>	orange sneezeweed	PerF	Wide	
Compositae (Asteraceae)	<i>Helianthella microcephala</i>		purpledisk sunflower	PerF	RegEn	Type locality is Abajo Mountains, San Juan Co., UT (Newberry s.n. GH)

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Compositae (Asteraceae)	<i>Helianthella quinquenervis</i>		fivenerve sunflower	PerF	Wide	
Compositae (Asteraceae)	<i>Hymenoxys acaulis</i> var. <i>caespitosa</i>	<i>H. acaulis</i> var. <i>lanata</i> , <i>Tetraneuris acaulis</i> var. <i>caespitosa</i> , <i>T. brevifolia</i>	lunate hymenoxys	PerF	Wide	
Compositae (Asteraceae)	<i>Hymenoxys acaulis</i> var. <i>nana</i>	<i>H. depressa</i> , <i>Tetraneuris acaulis</i> var. <i>nana</i>	low hymenoxys	PerF	LocEn	Type locality is E of the Muddy River, San Rafael Reef, Emery Co., UT (Atwood & Goodrich 8652 BRY). USFWs: former C2 candidate
Compositae (Asteraceae)	<i>Hymenoxys cooperi</i>	<i>Actinella cooperi</i>	Cooper's hymenoxys	PerF	Wide	
Compositae (Asteraceae)	<i>Iva xanthifolia</i>	<i>Cyclachaena xanthifolia</i>	marsh-elder	AnnF	Wide	
Compositae (Asteraceae)	<i>Machaeranthera commixta</i>	<i>M. bigelovii</i> var. <i>commixta</i> , <i>Dieteria bigelovii</i> var. <i>commixta</i>	Bigelow's aster	PerF	RegEn	Type locality is Bromide Pass, Henry Mountains, Garfield Co., UT (Jones 5695y US)
Compositae (Asteraceae)	<i>Senecio canus</i>	<i>Packera cana</i>	woolly groundsel	PerF	Wide	
Compositae (Asteraceae)	<i>Senecio douglasii</i> var. <i>longilobus</i>	<i>S. longilobus</i> , <i>S. flaccidus</i> var. <i>flaccidus</i> , <i>S. flaccidus</i> var. <i>douglasii</i>	Douglas' groundsel	PerF	Wide	
Compositae (Asteraceae)	<i>Senecio eremophilus</i> var. <i>kingii</i>		cut-leaved groundsel	PerF	Wide	
Compositae (Asteraceae)	<i>Senecio integrerrimus</i> var. <i>exaltatus</i>		western groundsel	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Compositae (Asteraceae)	<i>Senecio malmstenii</i>		Podunk groundsel	PerF	LocEn	Type locality is "Little Podunk Creek", Kane Co., UT (Malmsten 131 US) believed by Madsen (2001) to be just outside the SW corner of Bryce Canyon NP; USFS; Region 4 Sensitive, USFWS; former C2 candidate.
Compositae (Asteraceae)	<i>Senecio neomexicanus</i> var. <i>mutabilis</i>	<i>Packera neomexicana</i> var. <i>mutabilis</i>	New Mexico groundsel	PerF	Wide	
Compositae (Asteraceae)	<i>Senecio pauperculus</i>	<i>Packera paupercula</i>	balsam groundsel	PerF	Wide	
Compositae (Asteraceae)	<i>Senecio streptanthifolius</i> var. <i>streptanthifolius</i>	<i>Packera streptanthifolia</i> var. <i>streptanthifolia</i> . Vars. not recognized in <i>Flora of North America</i> (2006)	Rocky Mountain groundsel	PerF	Wide	
Compositae (Asteraceae)	<i>Solidago canadensis</i> var. <i>salebrosa</i>	<i>S. altissima</i> , <i>S. lepida</i> var. <i>salebrosa</i>	Canadian goldenrod	PerF	Wide	
Compositae (Asteraceae)	<i>Solidago multiradiata</i> var. <i>scopulorum</i>	Vars. not recognized in <i>Flora of North America</i> (2006).	Rocky Mountain goldenrod	PerF	Wide	
Compositae (Asteraceae)	<i>Solidago nana</i>		baby goldenrod	PerF	Wide	
Compositae (Asteraceae)	<i>Stephanomeria exigua</i>	<i>S. exigua</i> ssp. <i>exigua</i>	white-plume wire-lettuce	AnnF	Wide	
Compositae (Asteraceae)	<i>Tetradymia glabrata</i>		littleleaf horsebrush	Shrub	Wide	
Compositae (Asteraceae)	<i>Thelesperma subnudum</i> var. <i>subnudum</i>	Vars. not recognized in <i>Flora of North America</i> (2006).	scapeose greenthread	PerF	Wide	Type locality is "Southern Utah" (Parry 109 GH)
Compositae (Asteraceae)	<i>Viguiera multiflora</i> var. <i>multiflora</i>	<i>Helimeris multiflora</i> var. <i>multiflora</i>	showy goldeneye	PerF	Wide	
Compositae (Asteraceae)	<i>Wyethia arizonica</i>		Arizona muleears	PerF	RegEn	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Crassulaceae	<i>Sedum lanceolatum</i>	<i>Amerosedum lanceolatum</i> , includes ssp. <i>lanceolatum</i> & <i>subalpinum</i>	lance-leaved stonecrop	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Arabis lemmonii</i> var. <i>lemmonii</i>	<i>Boechera lemmonii</i> var. <i>lemmonii</i> . Vars. not recognized in Holmgren et al. (2005)	soldier rockcress	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Cardamine cordifolia</i> var. <i>cordifolia</i>		heartleaf bittercress	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Chorispora tenella</i>		blue mustard	AnnF	Intro	Native to Asia
Cruciferae (Brassicaceae)	<i>Descurainia californica</i>		California tansy-mustard	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Draba aurea</i>		golden draba	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Draba cuneifolia</i> var. <i>cuneifolia</i>		wedgeleaf draba	AnnF	Wide	
Cruciferae (Brassicaceae)	<i>Draba rectiflucta</i>		mountain draba	AnnF	RegEn	
Cruciferae (Brassicaceae)	<i>Draba stenoloba</i> var. <i>nana</i>	<i>D. albertina</i>	slender whitlow-grass	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Lepidium densiflorum</i> var. <i>ramosum</i>	Includes var. <i>macrocarpum</i>	prairie pepperwort	AnnF	Wide	
Cruciferae (Brassicaceae)	<i>Lepidium lasiocarpum</i> var. <i>lasiocarpum</i>		hairy-pod pepperwort	AnnF	Wide	
Cruciferae (Brassicaceae)	<i>Lepidium montanum</i> var. <i>jonesii</i>		Jones' pepperwort	PerF	Wide	Type locality is St. George, Washington Co., UT (Jones 1636 NY)
Cruciferae (Brassicaceae)	<i>Nasturtium officinale</i>	<i>Rorippa nasturtium-aquaticum</i>	watercress	PerF	Intro	Native to Europe
Cruciferae (Brassicaceae)	<i>Physaria acutifolia</i> var. <i>acutifolia</i>	<i>P. australis</i>	sharp-leaf twinpod	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Physaria ludoviciana</i>	<i>Lesquerella ludoviciana</i>	silver bladderpod	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Cruciferae (Brassicaceae)	<i>Physaria wardii</i>	<i>Lesquerella wardii</i> , included in <i>P. kingii</i> var. <i>parvifolia</i> by Holmgren et al. (2005)	Ward's bladderpod	PerF	RegEn	Type locality is Aquarius Plateau, Garfield Co., UT (Ward 589 GH)
Cruciferae (Brassicaceae)	<i>Rorippa curvipes</i> var. <i>alpina</i>	<i>R. alpina</i>	alpine yellowcress	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Rorippa curvipes</i> var. <i>curvipes</i>		blunt-leaf yellowcress	PerF	Wide	
Cruciferae (Brassicaceae)	<i>Rorippa tenerima</i>		low yellowcress	AnnF	Wide	
Cruciferae (Brassicaceae)	<i>Sisymbrium altissimum</i>		tumble mustard	AnnF	Intro	Native to Europe
Cruciferae (Brassicaceae)	<i>Sisymbrium loeselii</i>		false London rocket	AnnF	Intro	Native to Eurasia
Cruciferae (Brassicaceae)	<i>Thelypodium integrifolium</i> var. <i>integrifolium</i>	<i>T. integrifolium</i>	entire-leaf thelypody	PerF	Wide	
Cyperaceae	<i>Carex aquatilis</i>	<i>C. aquatilis</i> var. <i>aquatilis</i>	water sedge	PerG	Wide	
Cyperaceae	<i>Carex bella</i>		beautiful sedge	PerG	Wide	
Cyperaceae	<i>Carex dioica</i>	<i>C. gynocrates</i> , <i>C. dioica</i> ssp. <i>gynocrates</i>	northern bog sedge	PerG	Wide	
Cyperaceae	<i>Carex disperma</i>		soft-leaved sedge	PerG	Wide	
Cyperaceae	<i>Carex ebenea</i>		ebony sedge	PerG	Wide	
Cyperaceae	<i>Carex egglestonii</i>		Eggleston's sedge	PerG	RegEn	
Cyperaceae	<i>Carex haydeniana</i>		Hayden's sedge	PerG	Wide	
Cyperaceae	<i>Carex obtusata</i>		blunt sedge	PerG	Wide	
Cyperaceae	<i>Carex occidentalis</i>		western sedge	PerG	Wide	
Cyperaceae	<i>Carex petasata</i>		Liddon sedge	PerG	Wide	
Cyperaceae	<i>Carex simulata</i>		analogue sedge	PerG	Wide	
Cyperaceae	<i>Eleocharis parishii</i>		Parish's spikerush	PerG	Wide	
Cyperaceae	<i>Scirpus acutus</i>	<i>Schoenoplectus acutus</i> var. <i>occidentalis</i> , <i>Schoenoplectus lacustris</i> ssp. <i>acutus</i> , <i>Schoenoplectus acutus</i> var. <i>acutus</i>	hardstem bulrush	PerG	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Cyperaceae	<i>Scirpus maritimus</i>	<i>Scirpus maritimus</i> var. <i>paludosus</i> , <i>Schoenoplectus maritimus</i> , <i>Bolboschoenus maritimus</i> var. <i>paludosus</i>	alkali bulrush	PerG	Wide	
Elaeagnaceae	<i>Elaeagnus commutata</i>		silverberry	Shrub	Periph	
Ephedraceae	<i>Ephedra torreyana</i>		Torrey's ephedra	Shrub	Wide	
Gramineae (Poaceae)	<i>Agrostis exarata</i>		spike bentgrass	PerG	Wide	
Gramineae (Poaceae)	<i>Agrostis scabra</i>	<i>A. hiemalis</i> , <i>A. geminata</i>	tickleglass	PerG	Wide	
Gramineae (Poaceae)	<i>Alopecurus aequalis</i>	<i>A. aequalis</i> var. <i>aequalis</i>	shortawn foxtail	PerG	Wide	
Gramineae (Poaceae)	<i>Catabrosa aquatica</i>		brookgrass	PerG	Wide	
Gramineae (Poaceae)	<i>Danthonia intermedia</i>		timber oatgrass	PerG	Wide	
Gramineae (Poaceae)	<i>Elymus elongatus</i>	<i>E. elongatus</i> var. <i>ponticus</i> , <i>Agropyron elongatum</i> , <i>Thinopyrum ponticum</i>	tall wheatgrass	PerG	Intro	Native to Eurasia
Gramineae (Poaceae)	<i>Festuca dasyclada</i>	<i>Argillochloa dasyclada</i>	Utah fescue	PerG	RegEn	Type locality is "central Utah", Emery Co?, UT (Parry 93 US). USFWSS: 3C
Gramineae (Poaceae)	<i>Festuca thurberi</i>		Thurber's fescue	PerG	Wide	
Gramineae (Poaceae)	<i>Lolium perenne</i>		perennial ryegrass	PerG	Intro	Native to Eurasia and Africa
Gramineae (Poaceae)	<i>Phalaris arundinacea</i>	<i>Phalaroides arundinacea</i>	reed canary grass	PerG	Wide	
Gramineae (Poaceae)	<i>Poa annua</i>		annual bluegrass	AnnG	Intro	Native to Eurasia and W North America, but introduced in Utah.
Gramineae (Poaceae)	<i>Poa leptocoma</i>		bog bluegrass	PerG	Wide	
Gramineae (Poaceae)	<i>Puccinellia distans</i>		weeping alkaligrass	PerG	Intro	Native to Eurasia
Gramineae (Poaceae)	<i>Trisetum spicatum</i>	Includes ssp. <i>alaskanum</i> & <i>congdonii</i> ; <i>T. montanum</i>	spike trisetum	PerG	Wide	
Haloragaceae	<i>Myriophyllum spicatum</i>	<i>M. exaltatum</i> , <i>M. spicatum</i> var. <i>exaltatum</i>	European milfoil	PerF	Intro	Native to Europe.
Hydrophyllaceae	<i>Phacelia alba</i>	<i>P. neomexicana</i> var. <i>alba</i>	white scorpion-weed	AnnF	Wide	
Hydrophyllaceae	<i>Phacelia hastata</i>	Includes vars. <i>hastata</i> , <i>leucophylla</i> , & <i>alpina</i>	lanceleaf phacelia	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Hydrophyllaceae	<i>Phacelia heterophylla</i>	Includes ssp. <i>heterophylla</i> & var. <i>virgata</i>	wand phacelia	PerF	Wide	
Juncaceae	<i>Juncus ensifolius</i> var. <i>montanus</i>	<i>J. saximontanus</i> , includes <i>J. tracyi</i> , <i>J. xiphoides</i>	mountain rush	PerG	Wide	
Juncaceae	<i>Juncus mertensianus</i>		Mertens' rush	PerG	Wide	
Juncaceae	<i>Juncus nevadensis</i>	Includes vars. <i>badius</i> & <i>nevadensis</i>	Nevada rush	PerG	Wide	
Juncaceae	<i>Juncus nodosus</i>		knotted rush	PerG	Wide	
Labiatae (Lamiaceae)	<i>Agastache urticifolia</i>		nettle-leaf horsemint	PerF	Wide	
Labiatae (Lamiaceae)	<i>Stachys palustris</i> var. <i>pilosa</i>	<i>S. pilosa</i> var. <i>pilosa</i>	hairy hedge-nettle	PerF	Wide	
Leguminosae (Fabaceae)	<i>Astragalus cibarius</i>		browse milkvetch	PerF	Wide	
Leguminosae (Fabaceae)	<i>Astragalus cicer</i>		chickpea milkvetch	PerF	Intro	Native to Europe
Leguminosae (Fabaceae)	<i>Astragalus lentiginosus</i> var. <i>palans</i>		straggling milkvetch	PerF	RegEn	Type locality is Montezuma Canyon, San Juan Co., UT (Eastwood s.n. POM)
Leguminosae (Fabaceae)	<i>Astragalus limnocharis</i> var. <i>tabulaeus</i>	Included in <i>A. limnocharis</i> var. <i>montii</i> by Barneby (1989)	Table Cliff milkvetch	PerF	LocEn	Type locality is 6 miles E of Widtsoe Junction, Garfield Co., UT (Welsh 20666 BRY). USFS: Region 4 Sensitive, USFWS: former C2 candidate
Leguminosae (Fabaceae)	<i>Astragalus subcineratus</i> var. <i>silerianus</i>	Vars. not recognized by Barneby (1989)	Siler's milkvetch	PerF	RegEn	Type locality is Sink Valley (near Alton), Kane Co., UT (Jones s.n. POM)
Leguminosae (Fabaceae)	<i>Astragalus welshii</i>	Included in <i>A. loanus</i> by some authors	Welsh's milkvetch	PerF	LocEn	Type locality is W of Loa Pass, 0.8 mi E of Piute Co line, Wayne Co., UT (Welsh, Isely, & Moore 6473 BRY)
Leguminosae (Fabaceae)	<i>Dalea searsiae</i>		Searls' prairie-clover	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Leguminosae (Fabaceae)	<i>Glycyrrhiza lepidota</i>	<i>G. lepidota</i> var. <i>lepidota</i>	Nuttall's licorice	PerF	Wide	
Leguminosae (Fabaceae)	<i>Lathyrus lanszwertii</i> var. <i>laetivirens</i>	<i>L. laetivirens</i>	largeflower sweetpea	PerF	RegEn	
Leguminosae (Fabaceae)	<i>Lotus plebeius</i>	<i>L. longibracteatus</i>	longbracted trefoil	PerF	Wide	
Leguminosae (Fabaceae)	<i>Lupinus caudatus</i> var. <i>utahensis</i>	<i>L. argenteus</i> var. <i>utahensis</i>	Utah lupine	PerF	Wide	
Leguminosae (Fabaceae)	<i>Lupinus lepidus</i> var. <i>utahensis</i>	<i>L. lepidus</i> var. <i>caespitosus</i> , <i>L. caespitosus</i> var. <i>utahensis</i>	stemless lupine	PerF	Wide	
Leguminosae (Fabaceae)	<i>Lupinus polyphyllus</i> var. <i>humicola</i>	<i>L. wyethii</i>	Wyeth's lupine	PerF	Wide	
Leguminosae (Fabaceae)	<i>Sophora stenophylla</i>		silvery sophora	PerF	Wide	
Leguminosae (Fabaceae)	<i>Trifolium fragiferum</i>		strawberry clover	PerF	Intro	Native to Europe
Leguminosae (Fabaceae)	<i>Trifolium kingii</i> var. <i>kingii</i>		King's clover	PerF	RegEn	
Leguminosae (Fabaceae)	<i>Trifolium longipes</i> var. <i>rusbyi</i>	<i>T. longipes</i> var. <i>brachypus</i>	Rusby's clover	PerF	Wide	
Leguminosae (Fabaceae)	<i>Trifolium pratense</i>		red clover	PerF	Intro	Native to Europe
Liliaceae (Alliaceae)	<i>Allium brevistylum</i>		short-style onion	PerF	Wide	
Liliaceae (Alliaceae)	<i>Allium cernuum</i>	Includes vars. <i>cernuum</i> & <i>obtusum</i>	nodding onion	PerF	Wide	
Liliaceae (Alliaceae)	<i>Allium geyeri</i> var. <i>geyeri</i>		Geyer's onion	PerF	Wide	
Liliaceae (Melanthiaceae)	<i>Zigadenus paniculatus</i>	<i>Toxicoscordion paniculatum</i>	foothills death camas	PerF	Wide	
Linaceae	<i>Linum puberulum</i>	<i>Mesynium puberulum</i>	downy flax	AnnF	Wide	
Loasaceae	<i>Mentzelia rusbyi</i>	<i>Nuttallia rusbyi</i>	Rusby's stickleaf	PerF	Periph	
Malvaceae	<i>Sidalcea candida</i>	Includes vars. <i>candida</i> & <i>glabrata</i>	white checker-mallow	PerF	Wide	
Malvaceae	<i>Sidalcea neomexicana</i>	Includes vars. <i>crenulata</i> & <i>neomexicana</i>	New Mexico checker-mallow	PerF	Wide	
Onagraceae	<i>Camissonia breviflora</i>	<i>Oenothera breviflora</i>	dandelion camissonia	PerF	Wide	
Onagraceae	<i>Epilobium brachycarpum</i>	<i>E. paniculatum</i> var. <i>paniculatum</i>	autumn willow-herb	AnnF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Onagraceae	<i>Epilobium glandulosum</i>	<i>E. ciliatum</i> var. <i>glandulosum</i>	glandular willow-herb	PerF	Wide	
Onagraceae	<i>Epilobium hornemannii</i> var. <i>hornemannii</i>		Hornemann's willow-herb	PerF	Wide	
Onagraceae	<i>Epilobium saximontanum</i>		Rocky Mountain willow-herb	PerF	Wide	
Onagraceae	<i>Gayophytum decipiens</i>		deceptive groundsmoke	AnnF	Wide	
Onagraceae	<i>Gayophytum diffusum</i> var. <i>strictipes</i>	<i>G. diffusum</i> ssp. <i>parviflorum</i> , <i>G. lasiospermum</i>	diffuse groundsmoke	AnnF	Wide	
Onagraceae	<i>Oenothera caespitosa</i> var. <i>navajoensis</i>		Paria evening-primrose	PerF	RegEn	Type locality is Paria River, Kane Co., UT (Cronquist 10202 MO)
Onagraceae	<i>Oenothera elata</i>	<i>O. elata</i> ssp. <i>hirsutissima</i>	western evening-primrose	PerF	Wide	
Ophioglossaceae	<i>Botrychium simplex</i>	Includes vars. <i>compositum</i> & <i>tenebrorum</i>	little grapefern	Fern	Sparse	
Orchidaceae	<i>Corallorrhiza trifida</i>		early coralroot	PerF	Wide	
Orchidaceae	<i>Habenaria hyperborea</i>	<i>Limnorchis hyperborea</i> , includes <i>Platanthera aquilonis</i> , <i>P. huronensis</i>	northern bog orchid	PerF	Wide	
Orobanchaceae	<i>Orobanche corymbosa</i>		flat-topped broomrape	PerF	Wide	
Pinaceae	<i>Abies lasiocarpa</i>	<i>A. bifolia</i>	subalpine fir	Tree	Wide	
Pinaceae	<i>Picea engelmannii</i>		Engelmann spruce	Tree	Wide	
Plantaginaceae	<i>Plantago tweedyi</i>		Tweedy's plantain	PerF	Wide	
Polemoniaceae	<i>Collomia linearis</i>		small collomia	AnnF	Wide	
Polemoniaceae	<i>Gilia inconspicua</i>	Includes vars. <i>inconspicua</i> & <i>sinuata</i> , <i>G. ophthalmooides</i> , <i>G. sinuata</i> , <i>G. clokeyi</i>	shy gilia	AnnF	Wide	
Polemoniaceae	<i>Ipomopsis aggregata</i> var. <i>macrocephala</i>	<i>I. tenuituba</i> , <i>Gilia aggregata</i> var. <i>macrocephala</i>	scarlet gilia	PerF	Wide	
Polemoniaceae	<i>Leptodactylon watsonii</i>	<i>Linanthus watsonii</i>	Watson's prickly-phlox	PerF	Wide	
Polemoniaceae	<i>Microsteris gracilis</i> var. <i>humilior</i>	<i>Phlox gracilis</i> ssp. <i>humilis</i>	slender phlox	AnnF	Wide	
Polemoniaceae	<i>Navarretia intertexta</i>	<i>N. intertexta</i> var. <i>propinquua</i>	Great Basin navarretia	AnnF	Sparse	
Polemoniaceae	<i>Polemonium pulcherrimum</i> var. <i>delicatum</i>	<i>P. pulcherrimum</i> var. <i>pulcherrimum</i>	pretty Jacob's-ladder	PerF	Wide	
Polygonaceae	<i>Eriogonum hookeri</i>		Hoeker's wild buckwheat	AnnF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Polygonaceae	<i>Eriogonum umbellatum</i> var. <i>majus</i>	<i>E. umbellatum</i> var. <i>subalpinum</i> , <i>E. subalpinum</i> , includes vars. <i>dichrocephalum</i> & <i>desereticum</i>	cream wild buckwheat	PerF	Wide	
Polygonaceae	<i>Eriogonum umbellatum</i> var. <i>umbellatum</i>	Includes var. <i>aureum</i> from <i>Flora of North America</i> (2005)	sulfur wild buckwheat	PerF	Wide	
Polygonaceae	<i>Polygonum amphibium</i>	<i>Polygonum amphibium</i> var. <i>emersum</i> , <i>Polygonum coccineum</i> , <i>Persicaria coccinea</i> , <i>Persicaria amphibia</i>	water smartweed	PerF	Wide	
Polygonaceae	<i>Polygonum douglasii</i> var. <i>douglasii</i>	<i>P. douglasii</i>	Douglas' knotweed	AnnF	Wide	
Polygonaceae	<i>Polygonum kelloggii</i>	<i>P. polygaloides</i> spp. <i>kelloggii</i> , <i>P. kelloggii</i> var. <i>kelloggii</i>	Kellogg's knotweed	AnnF	Wide	
Polygonaceae	<i>Rumex occidentalis</i>	<i>R. aquaticus</i> var. <i>fenestratus</i> , <i>R. aquaticus</i> spp. <i>occidentalis</i>	western dock	PerF	Wide	
Polygonaceae	<i>Rumex paucifolius</i>	<i>Acetosella paucifolia</i>	alpine sorrel	PerF	Wide	
Polypodiaceae (Aspleniaceae, Athyriaceae)	<i>Athyrium filix-femina</i> var. <i>cyclosorum</i>	<i>A. filix-femina</i> var. <i>californicum</i>	lady fern	Fern	Wide	
Polypodiaceae (Aspleniaceae, Athyriaceae)	<i>Cystopteris fragilis</i>	Includes <i>C. utahensis</i> , <i>C. reevesiana</i> , & <i>C. tenuis</i>	brittle bladder fern	Fern	Wide	
Polypodiaceae (Aspleniaceae, Aspidiaceae)	<i>Dryopteris filix-mas</i>		male fern	Fern	Wide	
Polypodiaceae (Aspleniaceae, Woodsiaceae)	<i>Woodisia oregana</i>	<i>W. oregana</i> spp. <i>oregana</i>	Oregon woodsia	Fern	Periph	
Polypodiaceae (Aspleniaceae, Woodsiaceae)	<i>Woodisia scopulina</i>	<i>W. scopulina</i> spp. <i>scopulina</i>	Rocky Mountain woodsia	Fern	Wide	
Portulacaceae	<i>Lewisia pygmaea</i>	<i>Oreobroma pygmaea</i> . Some authors include <i>L. nevadensis</i> .	alpine bitter-root	PerF	Wide	
Portulacaceae	<i>Montia chamissonis</i>	<i>Crunocallis chamissonis</i>	Chamisso's candy-flower	PerF	Wide	
Portulacaceae	<i>Talinum parviflorum</i>	<i>Phemeranthus parviflorus</i> , <i>P. confertiflorus</i>	small-flowered fame-flower	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Potamogetonaceae	<i>Potamogeton filiformis</i> var. <i>occidentalis</i>	<i>Stuckenia filiformis</i> var. <i>occidentalis</i>	slenderleaf pondweed	PerF	Wide	
Potamogetonaceae	<i>Potamogeton vaginatus</i>	<i>Stuckenia vaginata</i> , <i>Coleogeton vaginatus</i>	sheathed pondweed	PerF	Periph	
Pyrolaceae	<i>Pyrola secunda</i>	<i>Orthilia secunda</i>	sidebells pyrola	PerF	Wide	
Ranunculaceae (Ericaceae)	<i>Actaea rubra</i>	<i>A. rubra</i> ssp. <i>arguta</i>	red baneberry	PerF	Wide	
Ranunculaceae (Helleboraceae)	<i>Aquilegia elegantula</i>		elegant columbine	PerF	Wide	
Ranunculaceae (Helleboraceae)	<i>Caltha leptosepala</i>	<i>C. biflora</i> , <i>Psychrophila leptosepala</i>	white marsh-marigold	PerF	Wide	
Ranunculaceae (Helleboraceae)	<i>Delphinium barbeyi</i>		subalpine larkspur	PerF	RegEn	
Ranunculaceae	<i>Ranunculus alismifolius</i> var. <i>montanus</i>		plantain buttercup	PerF	Wide	
Ranunculaceae	<i>Ranunculus aquatilis</i> var. <i>diffusus</i>	<i>R. circinatus</i> , <i>R. longirostris</i> , <i>R. trichophyllum</i> var. <i>eradicatus</i> , <i>R. trichophyllum</i> var. <i>trichophyllum</i> , <i>Batrachium longirostre</i> , <i>B. circinatum</i> ssp. <i>subrigidum</i> , <i>B. trichophyllum</i>	thread water-buttercup	PerF	Wide	
Ranunculaceae	<i>Ranunculus cardiophyllus</i>		heart-leaf buttercup	PerF	Wide	
Ranunculaceae	<i>Ranunculus glaberrimus</i> var. <i>ellipticus</i>	Includes <i>R. oreogenes</i>	sagebrush buttercup	PerF	Wide	
Ranunculaceae	<i>Ranunculus macounii</i>					
Ranunculaceae	<i>Ranunculus testiculatus</i>	<i>Ceratocephala orthoceras</i> , <i>C. testiculata</i>	Macoun's buttercup	PerF	Wide	
Ranunculaceae (Thalictraceae)	<i>Thalictrum sparsiflorum</i>	<i>T. sparsiflorum</i> var. <i>saximontanum</i>	bur buttercup	AnnF	Intro	Native to Eurasia
Rosaceae	<i>Amelanchier alnifolia</i>					
Rosaceae	<i>Geum macrophyllum</i> var. <i>perincisum</i>					
Rosaceae	<i>Petrosyton caespitosum</i>	<i>Spiraea caespitosa</i>	Saskatoon serviceberry	Shrub	Wide	
Rosaceae	<i>Potentilla arguta</i> var. <i>convallaria</i>	<i>Dymocallis arguta</i> , includes ssp. <i>arguta</i>	large-leaved avens	PerF	Wide	
			rock spiraea	PerF	Wide	
			tall cinquefoil	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Rosaceae	<i>Potentilla biennis</i>		biennial cinquefoil	AnnF	Wide	
Rosaceae	<i>Potentilla diversifolia</i> var. <i>diversifolia</i>		wedgeleaf cinquefoil	PerF	Wide	
Rosaceae	<i>Potentilla glandulosa</i> var. <i>pseudorupicola</i>	<i>Dymocallis glandulosa</i> , includes var. <i>intermedia</i> .	sticky cinquefoil	PerF	Wide	
Rosaceae	<i>Potentilla gracilis</i> var. <i>brunneascens</i>	Included in <i>P. gracilis</i> var. <i>elmeri</i> by some authors	glandular cinquefoil	PerF	Wide	
Rosaceae	<i>Potentilla norvegica</i>	<i>P.norvegica</i> ssp. <i>monspeliensis</i>	Norwegian cinquefoil	AnnF	Intro	Native to Europe and possibly E North America
Rosaceae	<i>Potentilla ovina</i> var. <i>ovina</i>		sheep cinquefoil	PerF	Wide	
Rubiaceae	<i>Gaulium aparine</i> var. <i>echinispermon</i>	<i>G. spurium</i>	cleavers	AnnF	Wide	
Rubiaceae	<i>Gaulium multiflorum</i> var. <i>multiflorum</i>		shrubby bedstraw	PerF	Wide	
Rubiaceae	<i>Gaulium triflorum</i>		sweet-scented bedstraw	PerF	Wide	
Salicaceae	<i>Salix boottii</i>		Booth's willow	Shrub	Wide	
Salicaceae	<i>Salix planifolia</i>	<i>S. phyllicifolia</i> , includes vars. <i>monica</i> & <i>planifolia</i>	planeleaf willow	Shrub	Wide	
Salicaceae	<i>Salix scouleriana</i>		Scoulter's willow	Shrub	Wide	
Saxifragaceae	<i>Heuchera rubescens</i> var. <i>versicolor</i>	<i>H. versicolor</i>	hairy alumroot	PerF	Wide	
Saxifragaceae	<i>Ribes leptanthum</i>		trumpet gooseberry	Shrub	Wide	
Saxifragaceae (Grossulariaceae)	<i>Ribes montigenum</i>		alpine prickly currant	Shrub	Wide	
Saxifragaceae (Grossulariaceae)	<i>Ribes viscosissimum</i> var. <i>viscosissimum</i>		sticky currant	Shrub	Wide	
Saxifragaceae	<i>Saxifraga odontoloma</i>	<i>S. arguta</i> , <i>Micranthes odontoloma</i>	brook saxifrage	PerF	Wide	
Saxifragaceae	<i>Saxifraga rivularis</i>	<i>S. debilis</i> , <i>S. rivularis</i> var. <i>debilis</i> , <i>S. hyperborea</i> ssp. <i>debilis</i>	pygmy saxifrage	PerF	Wide	
Scrophulariaceae	<i>Castilleja exilis</i>	<i>C. minor</i> ssp. <i>minor</i>	annual paintbrush	AnnF	Wide	
Scrophulariaceae	<i>Castilleja miniata</i>		scarlet paintbrush	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Scrophulariaceae	<i>Castilleja scabrida</i> var. <i>scabrida</i>		Eastwood's paintbrush	PerF	RegEn	
Scrophulariaceae	<i>Linaria vulgaris</i>	butter-and-eggs	PerF	Intro	Native to Eurasia	
Scrophulariaceae	<i>Pedicularis groenlandica</i>	elephant-head	PerF	Wide		
Scrophulariaceae	<i>Penstemon barbatus</i> var. <i>barbatus</i>	<i>P. barbatus</i> var. <i>torreyi</i>	beardlip penstemon	PerF	Wide	
Scrophulariaceae	<i>Penstemon laevis</i>		smooth penstemon	PerF	RegEn	Type locality is Springdale, Washington Co., UT (Jones 5250 in part US)
Scrophulariaceae	<i>Penstemon linarioides</i> var. <i>sileri</i>		Siler's penstemon	PerF	RegEn	Type locality is Osmerville, Kane Co., UT (Siler s.n. GH)
Scrophulariaceae	<i>Penstemon palmeri</i> var. <i>eglantulus</i>		Palmer's penstemon	PerF	RegEn	Type locality is 2.5 miles N of Kanab, Kane Co., UT (Maguire, Maguire, & Piranian 12279 UTC)
Scrophulariaceae	<i>Penstemon thompsoniae</i>		Thompson's penstemon	PerF	RegEn	Type locality is near Kanab, Kane Co., UT (Thompson s.n. GH)
Scrophulariaceae	<i>Penstemon whippleanus</i>		Whipple's penstemon	PerF	Wide	
Scrophulariaceae	<i>Synthyris laciniata</i>	<i>S. pinnatifida</i> var. <i>laciniata</i>	cutleaf synthyris	PerF	RegEn	Type locality is Fish Lake Mountains, Sevier Co., UT (Ward 327 GH)
Scrophulariaceae	<i>Veronica anagallis-aquatica</i>		water speedwell	PerF	Intro	Native to Europe
Scrophulariaceae	<i>Veronica peregrina</i> var. <i>xalapensis</i>		purslane speedwell	AnnF	Wide	
Scrophulariaceae	<i>Veronica serpyllifolia</i>	<i>Veronica serpyllifolia</i> var. <i>humifusa</i> , <i>Veronicastrum serpyllifolium</i> ssp. <i>humifusum</i>	thyme-leaved speedwell	PerF	Wide	
Scrophulariaceae	<i>Veronica wormskjoelii</i>	<i>V. nutans</i>	American alpine speedwell	PerF	Wide	
Solanaceae	<i>Datura stramonium</i>	jimson weed	AnnF	Intro	Native to tropical America	
Solanaceae	<i>Nicotiana attenuata</i>		coyote tobacco	AnnF	Wide	
Sparganiaceae	<i>Sparganium eurycarpum</i>	giant burr-reed	PerF	Wide		

Appendix B. Potential (unconfirmed) taxa of Bryce Canyon National Park, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Typhaceae	<i>Typha domingensis</i>		southern cattail	PerG	Wide	
Umbelliferae (Apiaceae)	<i>Lomatium nevadense</i> var. <i>parishi</i>		Nevada lomatium	PerF	Wide	
Umbelliferae (Apiaceae)	<i>Oreoxis alpina</i>	<i>Cymopterus alpinus</i>	matted spring-parsley	PerF	Wide	
Umbelliferae (Apiaceae)	<i>Osmorhiza depauperata</i>		blunt sweet-cicely	PerF	Wide	
Urticaceae	<i>Urtica dioica</i> var. <i>occidentalis</i>	<i>U. dioica</i> ssp. <i>holosericea</i> , <i>U.</i> <i>gracilis</i> ssp. <i>holosericea</i>	stinging nettle	PerF	Wide	
Verbenaceae	<i>Verbena macdougalii</i>		New Mexico vervain	PerF	Periph	
Violaceae	<i>Viola canadensis</i>	<i>V. canadensis</i> var. <i>rugulosa</i> , <i>V.</i> <i>scopulorum</i> , <i>V. rydbergii</i>	Canadian white violet	PerF	Wide	
Violaceae	<i>Viola palustris</i>	Includes vars. <i>brevipes</i> & <i>palustris</i>	alpine marsh violet	PerF	Wide	
Zygophyllaceae	<i>Tribulus terrestris</i>	puncture vine	AnnF	Intro	Native to Eurasia	

The vascular plant species listed here are known from the vicinity of Bryce Canyon National Park in Garfield and Kane counties, Utah, but have not previously been reported or confirmed for the park. Species on this list are derived from a checklist of potential species for NCPN parks prepared by Dr. N. Duane Atwood of Brigham Young University in 2001, the *Atlas of the Vascular Flora of Utah* (Albee et al. 1988), Madsen (2001), and Spence and Buchanan (1993). Some species from Appendix C could be considered as potentially occurring in the park, but are not included here.

Appendix C. Rejected (falsely reported or questionable) taxa of Bryce Canyon National Park.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Berberidaceae	<i>Berberis fendleri</i>		Fendler's barberry	Shrub	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>Mahonia fremontii</i> .
Boraginaceae	<i>Cryptantha cinerea</i> var. <i>jamesii</i>	<i>C. jamesii</i> ; <i>Oreocarya suffruticosa</i>	James' cryptanth	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on a misidentified specimen of <i>C. cinerea</i> var. <i>cinerea</i> .
Boraginaceae	<i>Cryptantha virginensis</i>		Virgin River cryptanth	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>C. fulvocanescens</i> .
Cactaceae	<i>Opuntia erinacea</i> var. <i>utahensis</i>	<i>O. polyacantha</i> var. <i>hystricina</i>	Utah pricklypear	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>O. erinacea</i> var. <i>erinacea</i> .
Campanulaceae	<i>Campanula rotundifolia</i>		harebell	PerF	Periph	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>C. parryi</i> .
Caryophyllaceae (Aisinaeae)	<i>Arenaria fendleri</i> var. <i>fendleri</i>	<i>Eremogone fendleri</i>	Fendler's sandwort	PerF	Periph	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>A. fendleri</i> var. <i>glabrescens</i> .
Caryophyllaceae (Aisinaeae)	<i>Arenaria nuttallii</i>	<i>Minuartia nuttallii</i> var. <i>nuttallii</i> ; <i>Minuopsis nuttallii</i>	Nuttall's sandwort	PerF	Wide	Ques?	Cited as outside range of BRCA in Spence and Buchanan 1993.
Compositae (Asteraceae)	<i>Aster integrifolius</i>	<i>Eurybia integrifolia</i>	thick-stem wood-aster	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>A. wasatchensis</i> var. <i>wasatchensis</i> .
Compositae (Asteraceae)	<i>Balsamorhiza macrophylla</i>		cutleaf balsamroot	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>B. sagittata</i> .
Compositae (Asteraceae)	<i>Cirsium canovirens</i>	<i>C. cymosum</i> var. <i>canovirens</i>	gray-green thistle	PerF	Periph	FalsRep	Reports from BRCA are based on misidentified specimens of <i>C. undulatum</i> var. <i>undulatum</i> .
Compositae (Asteraceae)	<i>Cirsium rydbergii</i>		Rydberg's thistle	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>C. undulatum</i> var. <i>undulatum</i> . USFWS: 3C
Compositae (Asteraceae)	<i>Erigeron caespitosus</i>		tufted fleabane	PerF	Wide	FalsRep	Report from BRCA herbarium based on a misidentified specimen of <i>E. pumilus</i> var. <i>condensatus</i> .

Appendix C. Rejected (falsely reported or questionable) taxa of Bryce Canyon National Park, cont..

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Compositae (Asteraceae)	<i>Erigeron simplex</i>	Includes <i>E. grandiflorus</i> alpine daisy		PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>E. vagus</i> , not <i>E. compositus</i> as cited in Spence and Buchanan (1993).
Compositae (Asteraceae)	<i>Euthamia occidentalis</i>	<i>Solidago occidentalis</i> western goldenrod		PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>Solidago velutina</i> .
Compositae (Asteraceae)	<i>Senecio cymbalariaeoides</i>	<i>Packera subnuda</i> , <i>P. bukii</i>	Buek's groundsel	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>S. hartianus</i> .
Compositae (Asteraceae)	<i>Solidago missouriensis</i>	<i>S. missouriensis</i> var. <i>missouriensis</i> , includes var. <i>extraria</i>	Missouri goldenrod	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>S. velutina</i> .
Compositae (Asteraceae)	<i>Tanacetum nuttallii</i>	<i>Sphaermeria argentea</i>	silver chicken-sage	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>Sphaeromeria capitata</i> .
Cruciferae (Brassicaceae)	<i>Arabis holboellii</i> var. <i>holboellii</i>		Holboell's rockcress	PerF	Wide	Ques?	Native to Greenland, not known from Utah
Cruciferae (Brassicaceae)	<i>Arabis pendulina</i>	<i>Boechera pendulina</i> , <i>A. oxylobula</i>	rabbit-ear rockcress	PerF	RegEn	FalsRep	Report from Buchanan and Graybosch (1981) based on misidentified specimens of <i>A. demissa</i> . Welsh et al. (2003) do not recognize <i>A. pendulina</i> as distinct from <i>A. demissa</i> .
Cruciferae (Brassicaceae)	<i>Caulanthus cooperi</i>		Cooper's wild cabbage	AnnF	Periph	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>Streptanthus cordatus</i> .
Cruciferae (Brassicaceae)	<i>Descurainia obtusa</i>		blunt tansy mustard	PerF	Wide	FalsRep	Report from Buchanan and Graybosch (1981) probably based on misidentified specimen of <i>D. incana</i> . <i>D. obtusa</i> is native to SW US but is not known from Utah.
Cruciferae (Brassicaceae)	<i>Physaria newberryi</i>	<i>P. newberryi</i> var. <i>racemosa</i>	Newberry's twinpod	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>P. intermedia</i> and <i>P. rubicundula</i> var. <i>rubicundula</i> .
Cruciferae (Brassicaceae)	<i>Thelypodopsis sagittata</i> var. <i>sagittata</i>	<i>Thelypodium sagittatum</i> var. <i>sagittatum</i>	arrowhead thelypody	PerF	Wide	Ques?	Cited as outside range of BRCA in Spence and Buchanan 1993.

Polemoniaceae	<i>Polemonium viscosum</i>		sky pilot	PerF	Wide	Ques?	Cited as outside range of BRCA in Spence and Buchanan 1993.
Polygonaceae	<i>Polygonum ramosissimum</i>	<i>P. ramosissimum</i> var. <i>prolificum</i> , <i>P. ramosissimum</i> var. <i>ramosissimum</i>	bushy knotweed	AnnF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>P. aviculare</i>
Ranunculaceae	<i>Ranunculus flammula</i> var. <i>ovalis</i>	<i>R. flammula</i> var. <i>filiformis</i> , <i>R. flammula</i> var. <i>reptans</i> , <i>R. reptans</i>	creeping buttercup	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>R. glaberrimus</i> and may be from outside the park
Rosaceae	<i>Fragaria vesca</i> var. <i>bracteata</i>		woodland strawberry	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>F. virginiana</i> .
Rosaceae	<i>Potentilla concinna</i> var. <i>proxima</i>		near cinquefoil	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>P. anserina</i> .
Rosaceae	<i>Potentilla fissa</i>	<i>Dymocallis fissa</i>	big-flower cinquefoil	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>P. crinita</i> .
Rosaceae	<i>Potentilla gracilis</i> var. <i>pulcherrima</i>	<i>P. pulcherrima</i>	beautiful cinquefoil	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>P. hippiana</i>
Salicaceae	<i>Populus fremontii</i> var. <i>wislizeni</i>	<i>P. deltoides</i> var. <i>wislizeni</i>	Rio Grande cottonwood	Tree	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>P. fremontii</i> var. <i>fremontii</i> .
Salicaceae	<i>Salix drummondiana</i>		Drummond's willow	Shrub	Wide	FalsRep	Reports from BRCA herbarium based on misidentified specimens of <i>S. bebbiana</i> .
Salicaceae	<i>Salix glauca</i>		gray-leaf willow	Shrub	Wide	Ques?	Reported by Northern Colorado Plateau Network (in ed.), but BRCA is well outside the known or expected range of this species.
Salicaceae	<i>Salix lucida</i> ssp. <i>caudata</i>	<i>S. lasiandra</i> var. <i>caudata</i>	whiplash willow	Shrub	Wide	FalsRep	Reports from BRCA herbarium based on misidentified specimens of <i>S. bebbiana</i>

Appendix C. Rejected (falsely reported or questionable) taxa of Bryce Canyon National Park, cont..

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Saxifragaceae (Parnassiaceae)	<i>Parnassia parviflora</i>	<i>P. palustris</i> var. <i>parviflora</i>	small-flowered grass- of-Parnassus	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>P. palustris</i> var. <i>montanensis</i> .
Scrophulariaceae	<i>Penstemon humilis</i> var. <i>brevifolius</i>		shortleaf penstemon	PerF	RegEn	Ques?	Specimen cited at NY Botanical Garden, but BRCA is well outside the expected range of this taxon.
Scrophulariaceae	<i>Penstemon rydbergii</i>		Rydberg's penstemon	PerF	Periph	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>P. procerus</i> var. <i>aberrans</i> .
Umbelliferae (Apiaceae)	<i>Cicuta maculata</i> var. <i>angustifolia</i>	<i>C. douglasii</i> , <i>C.</i> <i>occidentalis</i>	water-hemlock	PerF	Wide	FalsRep	Reports from BRCA herbarium based on misidentified specimens of <i>Angelica pinnata</i>
Umbelliferae (Apiaceae)	<i>Cymopterus</i> <i>purpurascens</i>		basin white-cup spring-parsley	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>C. minimus</i> .
Umbelliferae (Apiaceae)	<i>Cymopterus purpureus</i> var. <i>rosei</i>	<i>C. rosei</i>	Rose's spring-parsley	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>C. minimus</i> . USFWS: 3C.
Umbelliferae (Apiaceae)	<i>Ligusticum filicinum</i>		fernleaf ligusticum	PerF	Wide	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>L. porteri</i> .
Umbelliferae (Apiaceae)	<i>Lomatium graveolens</i> var. <i>alpinum</i>	<i>L. kingii</i>	King's lomatium	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>L. parryi</i> .
Umbelliferae (Apiaceae)	<i>Lomatium nuttallii</i>	<i>L. megarhizum</i> , <i>Aletes</i> <i>nuttallii</i>	Nuttall's lomatium	PerF	RegEn	FalsRep	Reports from BRCA herbarium are based on misidentified specimens of <i>L. parryi</i> . Native to Wyoming and the western Great Plains (not known from Utah).

The vascular plant species listed here have been reported for Bryce Canyon National Park from published and unpublished literature (Spence and Buchanan 1993) or from herbarium specimens, but are now believed to be erroneous because of misidentifications (False reports or FalsRep) or because the park is well outside the known or expected range of the species (Questionable or Ques?).

Appendix D. Confirmed, historical, and reported taxa of Bryce Canyon National Park, organized by life form with ecological notes.

Family	Species name	Common name	Nativity	Park status	Flower time	Sage/ Grs	Pin-Jun	Mont Conf	Wet	Comments
Trees										
Aceraceae	<i>Acer grandidentatum</i>	bigtooth maple	Native	Pres	Apr-May		x			
Betulaceae	<i>Betula occidentalis</i>	water birch	Native	Pres	Apr-May			x		
Cupressaceae	<i>Juniperus scopulorum</i>	Rocky Mountain juniper	Native	Pres	NA		x	x		
Elaeagnaceae	<i>Elaeagnus angustifolia</i>	Russian olive	Intro	Pres	May-Jul		x			
Fagaceae	<i>Quercus gambelii</i> var. <i>gambelii</i>	Gambel oak	Native	Pres	Apr-Jun	x	x	x		
Pinaceae	<i>Abies concolor</i>	white fir	Native	Pres	NA		x			
Pinaceae	<i>Picea pungens</i>	blue spruce	Native	Pres	NA		x			
Pinaceae	<i>Pinus edulis</i>	two-needle pinyon	Native	Pres	NA	x	x	x		
Pinaceae	<i>Pinus flexilis</i>	limber pine	Native	Pres	NA		x			
Pinaceae	<i>Pinus longaeva</i>	western bristlecone pine	Native	Pres	NA		x			
Pinaceae	<i>Pinus ponderosa</i> var. <i>scopulorum</i>	ponderosa pine	Native	Pres	NA		x			
Pinaceae	<i>Pseudotsuga menziesii</i> var. <i>glauca</i>	Douglas-fir	Native	Pres	NA		x			
Rosaceae	<i>Malus pumila</i>	common apple	Intro	Pres	May					Cultivated
Salicaceae	<i>Populus angustifolia</i>	narrow-leaved cottonwood	Native	Pres	Apr-Jun		x			
Salicaceae	<i>Populus fremontii</i> var. <i>fremontii</i>	Fremont cottonwood	Native	Pres	Mar-Jun		x			
Salicaceae	<i>Populus tremuloides</i>	quaking aspen	Native	Pres	Mar-Jun		x	x		
Salicaceae	<i>Populus × intercurrens</i>	lance-leaf cottonwood	Native	Pres	Apr-Jun		x			
Ulmaceae	<i>Ulmus pumila</i>	Siberian elm	Intro	Pres	Mar-Apr	x	x			
Shrubs										
Aceraceae	<i>Acer glabrum</i> var. <i>glabrum</i>	Rocky Mountain maple	Native	Pres	Apr-Jun		x	x		
Agavaceae	<i>Yucca angustissima</i>	narrowleaved yucca	Native	Pres	May-Jul	x	x			
Agavaceae	<i>Yucca baccata</i>	datil yucca	Native	Pres	Apr-Jun	x	x			
Agavaceae	<i>Yucca harrimaniae</i> var. <i>harrimaniae</i>	Harriman's yucca	Native	Pres	Apr-May	x	x	x		
Anacardiaceae	<i>Rhus aromatica</i> var. <i>trilobata</i>	squawbush	Native	Pres	May-Jul	x	x	x		
Berberidaceae	<i>Mahonia fremontii</i>	Fremont's mahonia	Native	Pres	Apr-Jul	x	x	x		
Berberidaceae	<i>Mahonia repens</i>	Oregon-grape	Native	Pres	Apr-Jun	x	x	x		
Caprifoliaceae (Adoxaceae)	<i>Sambucus caerulea</i>	blue elderberry	Native	Pres	May-Jul	x	x	x

Cyperaceae	<i>Carex valliscola</i>	valley sedge	Native	Pres	May–Jul	x		x		
Cyperaceae	<i>Eleocharis palustris</i>	common spikerush	Native	Pres	May–Aug			x		
Cyperaceae	<i>Eleocharis quinqueflora</i>	few-flower spikerush	Native	Pres	Jun–Aug			x		
Cyperaceae	<i>Eleocharis rostellata</i>	beaked spikerush	Native	Rep	Jun–Aug			x		
Cyperaceae	<i>Scirpus pungens</i> var. <i>longispicatus</i>	three-square bulrush	Native	Pres	May–Aug			x		
Gramineae (Poaceae)	<i>Agropyron cristatum</i>	crested wheatgrass	Intro	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Agrostis stolonifera</i>	redtop	Intro	Pres	Jun–Sep			x		
Gramineae (Poaceae)	<i>Aristida purpurea</i>	purple three-awn	Native	Pres	Mar–Sep	x	x	x		
Gramineae (Poaceae)	<i>Bouteloua gracilis</i>	blue grama	Native	Pres	Jul–Sep	x	x	x		
Gramineae (Poaceae)	<i>Bromus anomalus</i>	nodding brome	Native	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Bromus carinatus</i>	mountain brome	Native	Pres	May–Aug	x		x		
Gramineae (Poaceae)	<i>Bromus ciliatus</i>	fringed brome	Native	Pres	Jul–Sep			x		
Gramineae (Poaceae)	<i>Bromus inermis</i> var. <i>inermis</i>	smooth brome	Intro	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Calamagrostis scopulorum</i>	Jones' reedgrass	Native	Pres	Jul–Aug		x	x		
Gramineae (Poaceae)	<i>Calamagrostis stricta</i>	slimstem reedgrass	Native	Pres	Jul–Aug			x		
Gramineae (Poaceae)	<i>Dactylis glomerata</i>	orchard grass	Intro	Pres	Jun–Aug	x		x		
Gramineae (Poaceae)	<i>Deschampsia cespitosa</i>	tufted hairgrass	Native	Pres	Jul–Sep		x	x		
Gramineae (Poaceae)	<i>Distichlis spicata</i>	desert saltgrass	Native	Pres	Jun–Sep			x		
Gramineae (Poaceae)	<i>Elymus canadensis</i>	Canada wildrye	Native	Pres	Jul–Aug			x		
Gramineae (Poaceae)	<i>Elymus cinereus</i>	Great Basin wildrye	Native	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Elymus elymoides</i>	squirreltail	Native	Pres	May–Aug	x	x	x		
Gramineae (Poaceae)	<i>Elymus glaucus</i>	blue wildrye	Native	Pres	Jul–Aug			x		
Gramineae (Poaceae)	<i>Elymus hispidus</i>	intermediate wheatgrass	Intro	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Elymus junceus</i>	Russian wildrye	Intro	Pres	Jun–Jul	x	x	x		
Gramineae (Poaceae)	<i>Elymus lanceolatus</i>	thickspike wheatgrass	Native	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Elymus salinus</i>	Salina wildrye	Native	Pres	Jun–Jul	x	x	x		
Gramineae (Poaceae)	<i>Elymus scribnieri</i>	Scribner wheatgrass	Native	Pres	Jul–Aug			x		
Gramineae (Poaceae)	<i>Elymus smithii</i>	western wheatgrass	Native	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Elymus spicatus</i>	bluebunch wheatgrass	Native	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Elymus trachycaulus</i>	slender wheatgrass	Native	Pres	Jun–Aug	x	x	x		

Appendix D. Confirmed, historical, and reported taxa of Bryce Canyon National Park, organized by life form with ecological notes, cont.

Family	Species name	Common name	Nativity	Park status	Flower time	Sage/Grss	Pin-Jun	Mont Conf	Wet	Comments
<i>Perennial Graminoids, cont.</i>										
Gramineae (Poaceae)	<i>Festuca ovina</i> var. <i>saximontana</i>	Rocky Mountain fescue	Native	Pres	Jul–Aug		x		x	
Gramineae (Poaceae)	<i>Festuca pratensis</i>	meadow fescue	Intro	Pres	Jun–Aug		x	x	x	
Gramineae (Poaceae)	<i>Glyceria striata</i>	fowl manna grass	Native	Pres	Jul–Aug				x	
Gramineae (Poaceae)	<i>Hilaria jamesii</i>	galleta	Native	Pres	May–Aug	x	x			
Gramineae (Poaceae)	<i>Hordeum brachyantherum</i>	meadow barley	Native	Pres	Jun–Aug	x	x	x	x	
Gramineae (Poaceae)	<i>Hordeum jubatum</i>	foxtail barley	Native	Pres	Jun–Aug	x	x	x	x	
Gramineae (Poaceae)	<i>Koeleria macrantha</i>	junegrass	Native	Pres	Jun–Aug	x	x	x	x	
Gramineae (Poaceae)	<i>Muhlenbergia andina</i>	foxtail muhly	Native	Pres	Jul–Sep				x	
Gramineae (Poaceae)	<i>Muhlenbergia asperifolia</i>	scratchgrass	Native	Pres	Jul–Aug				x	
Gramineae (Poaceae)	<i>Muhlenbergia montana</i>	mountain muhly	Native	Pres	Jul–Sep				x	
Gramineae (Poaceae)	<i>Muhlenbergia pungens</i>	sandhill muhly	Native	Pres	Jul–Sep	x	x			
Gramineae (Poaceae)	<i>Muhlenbergia richardsonis</i>	mat muhly	Native	Pres	Jul–Sep	x	x	x		
Gramineae (Poaceae)	<i>Oryzopsis micrantha</i>	littleseed ricegrass	Native	Pres	Jun–Aug	x	x	x	x	
Gramineae (Poaceae)	<i>Phleum pratense</i>	timothy	Intro	Pres	Jun–Sep	x	x	x	x	
Gramineae (Poaceae)	<i>Phragmites australis</i>	common reed	Native	Pres	Jul–Sep				x	
Gramineae (Poaceae)	<i>Poa compressa</i>	Canada bluegrass	Intro	Pres	Jun–Aug	x	x	x	x	
Gramineae (Poaceae)	<i>Poa fendleriana</i>	muttongrass	Native	Pres	May–Aug	x	x	x		
Gramineae (Poaceae)	<i>Poa glauca</i> var. <i>glauca</i>	interior bluegrass	Native	Pres	Jun–Aug	x	x	x	x	
Gramineae (Poaceae)	<i>Poa pratensis</i>	Kentucky bluegrass	Intro	Pres	May–Aug	x	x	x	x	
Gramineae (Poaceae)	<i>Poa secunda</i>	Sandberg's bluegrass	Native	Pres	Apr–Sep	x	x	x	x	
Gramineae (Poaceae)	<i>Puccinellia nuttalliana</i>	Nuttall's alkali grass	Native	Pres	May–Aug	x	x	x	x	
Gramineae (Poaceae)	<i>Schizachyrium scoparium</i>	little bluestem	Native	Pres	Jul–Sep	x	x	x	x	
Gramineae (Poaceae)	<i>Spartina gracilis</i>	alkali cordgrass	Native	Pres	Jun–Sep				x	
Gramineae (Poaceae)	<i>Sporobolus airoides</i> var. <i>airoides</i>	alkali sacaton	Native	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Sporobolus cryptandrus</i>	sand dropseed	Native	Pres	Jun–Aug	x	x	x		
Gramineae (Poaceae)	<i>Stipa comata</i> var. <i>comata</i>	needle-and-thread	Native	Pres	May–Jul	x	x	x	x	
Gramineae (Poaceae)	<i>Stipa hymenoides</i>	Indian ricegrass	Native	Pres	May–Jul	x	x	x	x	
Gramineae (Poaceae)	<i>Stipa lettermanii</i>	Letterman's needlegrass	Native	Pres	Jul–Sep	x	x	x	x	
Gramineae (Poaceae)	<i>Stipa nelsonii</i> var. <i>nelsonii</i>	Nelson's needlegrass	Native	Pres	Jun–Sep	x	x	x	x	
Gramineae (Poaceae)	<i>Stipa pinetorum</i>	pine needlegrass	Native	Rep	Jun–Aug	x	x	x	x	

Appendix D. Confirmed, historical, and reported taxa of Bryce Canyon National Park, organized by life form with ecological notes, cont.

Family	Species name	Common name	Nativity	Park status	Flower time	Sage/Gr's	Pin-Jun	Mont Conf	Wet	Comments
Perennial Graminoids, cont.										
Gramineae (Poaceae)	<i>Stipa x bloomeri</i>	Bloomer's ricegrass	Native	Pres	Jun-Aug	x	x			
Juncaceae	<i>Juncus arcticus</i>	Baltic rush	Native	Pres	May-Jul				x	
Juncaceae	<i>Juncus ensifolius</i> var. <i>brunneascens</i>	Tracy's rush	Native	Pres	Jun-Aug				x	
Juncaceae	<i>Juncus longistylus</i>	longstyle rush	Native	Pres	Jun-Aug				x	
Juncaceae	<i>Juncus torreyi</i>	Torrey's rush	Native	Pres	Jun-Aug				x	
Juncaginaceae	<i>Triglochin maritima</i> var. <i>elata</i>	seaside arrowgrass	Native	Pres	May-Aug				x
