The Natural Resource Publication series addresses natural resource topics that are of interest and applicability to a broad readership in the National Park Service and to others in the management of natural resources, including the scientific community, the public, and the NPS conservation and environmental constituencies. Manuscripts are peer-reviewed to ensure that the information is scientifically credible, technically accurate, appropriately written for the intended audience, and is designed and published in a professional manner.

The Natural Resource Technical Report series is used to disseminate the peer-reviewed results of scientific studies in the physical, biological, and social sciences for both the advancement of science and the achievement of the National Park Service's mission. The reports provide contributors with a forum for displaying comprehensive data that are often deleted from journals because of page limitations. Current examples of such reports include the results of research that addresses natural resource management issues; natural resource inventory and monitoring activities; resource assessment reports; scientific literature reviews; and peer-reviewed proceedings of technical workshops, conferences, or symposia.

Views, statements, findings, conclusions, recommendations, and data in this report are solely those of the author(s) and do not necessarily reflect views and policies of the U.S. Department of the Interior, National Park Service. Mention of trade names or commercial products does not constitute endorsement or recommendation for use by the National Park Service.

Printed copies of reports in this series may be produced in limited quantity, and are only available as long as the supply lasts. You may send a request to:

Abstract

In 2005–2006, the National Park Service’s Northern Colorado Plateau Network received funding to develop a revised checklist of the vascular plant flora of Fossil Butte National Monument. This entailed a thorough review of existing literature, re-examination of specimens from the Fossil Butte National Monument herbarium and other state and national museum collections, and additional field work to corroborate unverified species reports or locate new species. Based on this study, 546 vascular plant taxa have been confirmed or reliably reported as occurring in the monument (509 are known from validated herbarium specimens and 37 from unvouchered literature reports). Another 68 species formerly considered part of the monument flora have now been shown to be falsely reported. The current flora of Fossil Butte National Monument represents about 19.5% of the known flora of Wyoming, and 36.7% of the flora of the Wyoming Basins ecoregion within Wyoming. At least eight of these taxa are considered species of concern by the state natural heritage program. Introduced plants make up 13.2% of the monument flora (72 species), of which 10 species are considered noxious weeds by the State of Wyoming. Further surveys in Fossil Butte National Monument are likely to find additional new species (114 are known from similar habitats outside the monument boundary), especially among late-season flowering, weedy, or wetland taxa.

Acknowledgements

We would like to thank the following individuals for their assistance with this project. Dr. Angela Evenden, botanist and former leader of the Northern Colorado Plateau Network (NCPN) program in Moab, was an active proponent of this project and helped secure funding for field work and herbarium studies in 2006. Arvid Aase, curator of museum collections for Fossil Butte National Monument, provided access to all mounted and unmounted herbarium specimens from the monument herbarium. George Jones and Bonnie Heidel, of the Wyoming Natural Diversity Database, helped track down some 15-year-old sedge collections. Katie Moon, of Brigham Young University, and Rebecca Harms, of the NCPN seeps and springs inventory, shared their 2005–2006 collections from Fossil Butte for confirmation. Amy Tendick and Liz Ballenger, of the NCPN, helped record specimen label data from all mounted collections in the Fossil Butte National Monument herbarium. Libby Nance, former database specialist with the NCPN, assisted with development and quality control of the monument's NPSpecies database. Libby Nance, Janet Coles, and Helen Thomas also provided data from recent vegetation mapping and wetland inventories on the monument. Drs. Stanley Welsh and Duane Atwood provided access to herbarium collections at Brigham Young University (BRY). Dr. Ron Hartman and Ernie Nelson provided access to specimens from the Rocky Mountain Herbarium at the University of Wyoming. Thanks to the technical reviewers (Dr. Angela Evenden, Dr. Dusty Perkins, and Libby Nance) for their comments and suggestions. To any others who we may have inadvertently forgotten, please accept our apologies (and thanks).

Funding was provided by the National Park Service through the University of Wyoming. Thanks to Gary Beauvais and Pat Ortegon, of the University of Wyoming, for their assistance with contracting.

1 Introduction

In 2006, the National Park Service (NPS) established a cooperative agreement with the University of Wyoming, through the Rocky Mountains Cooperative Ecosystem Studies Unit, to produce a series of technical reports summarizing the vascular plant flora of each of the 16 national park units of the Northern Colorado Plateau Network (NCPN). These reports are based on existing information in the park service's NPSpecies database system and augmented by further data mining, reviews of state and regional herbaria, and new field surveys to resolve the status of many reported and unconfirmed species. The objective of these reports is to summarize the current state of knowledge of the flora of each park for the benefit of NPS biologists and interpretive staff, outside researchers, and the general public. The following report addresses the vascular flora of Fossil Butte National Monument, in southwestern Wyoming. Other NCPN park units are addressed in separate reports.

1.1 Background and justification

One of the primary missions of the NPS is "to conserve unimpaired the natural and cultural resources and values of the national park system for the enjoyment of this and future generations" (NPS 2000). Due to their high degree of protection and distribution across a wide variety of habitat types, the nation's national park units make a significant contribution to the protection of biological diversity (Noss and Cooperrider 1994). Unfortunately, the full contribution of the NPS system is not known, as many park units have traditionally lacked comprehensive biological inventories or monitoring programs to identify the composition and condition of their biota. Knowing the status of park flora and fauna is critical for effective park management and for systematically identifying and filling gaps in the nation's protected area network (Margules and Pressey 2000).

To rectify this shortcoming, Congress passed the National Parks Omnibus Management Act in 1998 to provide guidance and funding for an inventory and monitoring program across the entire National Park System. Since 2000, the NCPN Inventory and Monitoring Program has been developing and verifying species lists of vertebrates and vascular plants for each park unit

in the network (Evenden et al. 2002). This effort has entailed reviewing existing species checklists, corroborating the identification of specimens in park museum and herbarium collections, locating additional specimen records from other museums, mining relevant literature and datasets, and conducting field surveys to locate new taxa or confirm unsubstantiated reports.[†] All of these data have been synthesized in NPSpecies, the park service's standardized database for documenting park status (present, probably present, unconfirmed, falsely reported), abundance, residency, nativity, and rarity. With the production of a technical series of reports on the flora of each park, the NPSpecies data will now be available to a broader audience.

1.2 Objectives

The objectives of this project were to:

1. Document the current status (present, reported, potential, or falsely reported) of all vascular plant species that have been cited as occurring in Fossil Butte National Monument based on a review of herbarium collections and past literature.
2. Develop an annotated checklist of the flora of Fossil Butte National Monument with supplemental information on taxonomic synonyms, distribution, within-park abundance, flowering period, growth form, nativity, habitat, and sources for each record.

1.3 Study area

1.3.1 History and setting

Fifty million years ago, the area that is now Fossil Butte was located at the bottom of a large, freshwater lake enclosed by steep mountains (analogous to the Rift Valley lakes of central Africa today). During its two million-year existence, Fossil Lake gradually filled with fine sediments that entombed hundreds of different species of freshwater fish, invertebrates, primitive mammals, bats, giant turtles, crocodiles, birds, and a variety of subtropical plants. This Eocene time capsule remained unopened until the mid-1880s, when quarries were established at Fossil Butte and adjacent ridges at the north end of Fossil Basin (McGrew and Casilliano 1975). Since that time, several million fossil specimens have been

[†]Taxa refer to all named species, subspecies, and varieties.

quarried from the Fossil Butte area for museums and private collectors (Grande 1998).

Fossil Butte National Monument (NM) was established in October 1972, to preserve this globally significant paleontological and geological resource “. . . for the benefit and enjoyment of present and future generations . . . and to provide for the display and interpretation of scientific specimens. . . .” (Evenden et al. 2002). The monument is located at the southern end of the Tump Range in southern Lincoln County, Wyoming, approximately 12 miles west of Kemmerer on U.S. Highway 30 (Figure 1.3.1). The boundaries of the monument encompass Fossil Butte and Cundick Ridge, two sedimentary ridges that rise approximately 1,000 feet above the valley of Chicken Creek. The entire monument covers an area of 3,318 hectares (8,200 acres). Fossil Butte NM has a cool, dry, continental climate. Precipitation averages 9–12 inches (229–305 mm) and is distributed year-round with a small peak in May and June (Jones 1993). Summer daytime temperatures can exceed 90° F (with nighttime lows below 50° F), while winter lows can reach –30° F (Evenden et al. 2002).

1.3.2 Geology

Fossil Butte NM is located near the north end of the Fossil Basin, a long depression amid a series of north-south trending ridges of the Overthrust Belt (Lageson and Spearing 1988). During the Eocene, approximately 50 million years ago, the basin was hydrologically closed and inundated by a shallow, freshwater lake (Fossil Lake) that covered much of southwestern Wyoming. Over a two million-year period, the lake was gradually filled by river delta deposits that gave rise to the Wasatch Formation. Portions of the lake also were covered by fine-grained, dolomitic marlstone (also known as oil shale), which comprises much of the Green River Formation. The shoreline of the lake shifted often, resulting in frequent interfingering of the Wasatch and Green River formations. These lake deposits were uplifted several thousand feet during the Laramide Orogeny in the late Eocene and have been gradually eroding ever since. Today, remnants of the Green River Formation are exposed on the summit and upper slopes of Fossil Butte and Cundick Ridge, while the colorful badlands forming the lower slopes of these ridges consist of Wasatch deposits (McGrew and Casiliano 1975). Two members of the Green River Formation are present, with the Angelo Member located above the fossil-rich Fossil Butte Mem-

ber. Colluvial and alluvial Quaternary sediments consisting of gravel, sand, silt, and clay cover the valley bottom of the Chicken Creek drainage.

1.3.3 Vegetation

Dorn and others (1984) and Jones (1993) recognized 12–13 vegetation types in Fossil Butte NM; this classification is currently being revised by the NCPN (in ed.). Nearly three-quarters of the monument is dominated by three different taxa of sagebrush. Mountain big sagebrush (*Artemisia tridentata* var. *vaseyana*) predominates on deep, loamy soils on the summit of Cundick Ridge and, to a lesser extent, on the top of Fossil Butte. This taxon is gradually replaced by basin big sagebrush (*A. tridentata* var. *tridentata*) on lower slopes or gravelly stream deposits in the bottom of Fossil Basin, usually associated with outcrops of the Wasatch Formation or Quaternary alluvium. Alkali sagebrush (*A. arbuscula*) becomes dominant on clay-rich soils found over much of the valley floor or in scattered inclusions on ridge slopes. Some low ridges within the Chicken Creek Valley are locally dominated by western wheatgrass (*Elymus smithii*), Sandberg bluegrass (*Poa secunda*), and a variety of perennial forbs, rather than sagebrush (Jones 1993).

Several mountain shrub and forest communities occur on the upper slopes of Fossil Butte and Cundick Ridge. Small patches of mountain shrub vegetation (dominated by alder-leaf mountain mahogany, *Cercocarpus montanus*, and Utah serviceberry, *Amelanchier utahensis*) occur interspersed with mountain big sagebrush on the slopes of Cundick Ridge. Mountain shrub communities may be seral to mixed-timber forests of Douglas-fir (*Pseudotsuga menziesii*) and limber pine (*Pinus flexilis*), especially on north-facing slopes. Stands of quaking aspen (*Populus tremuloides*) are found on north-facing slopes and areas associated with drifting snow or seeps (Jones 1993). Barren, wind-swept rims and slopes on the west and south ends of Fossil Butte and Cundick Ridge support cushion plant communities that contain several of the monument’s rarer species, including the narrowly endemic tufted twinpod (*Physaria condensata*) (Fertig 2000).

The banks of Chicken Creek support wet meadow vegetation consisting of beaked sedge (*Carex utriculata*), blackcreeper sedge (*C. praegracilis*), and Nebraska sedge (*C. nebrascensis*) in wet areas and tufted hairgrass (*Deschampsia cespitosa*) and Baltic rush (*Juncus balticus*) on slightly drier sites.

Fossil Butte National Monument

Wyoming

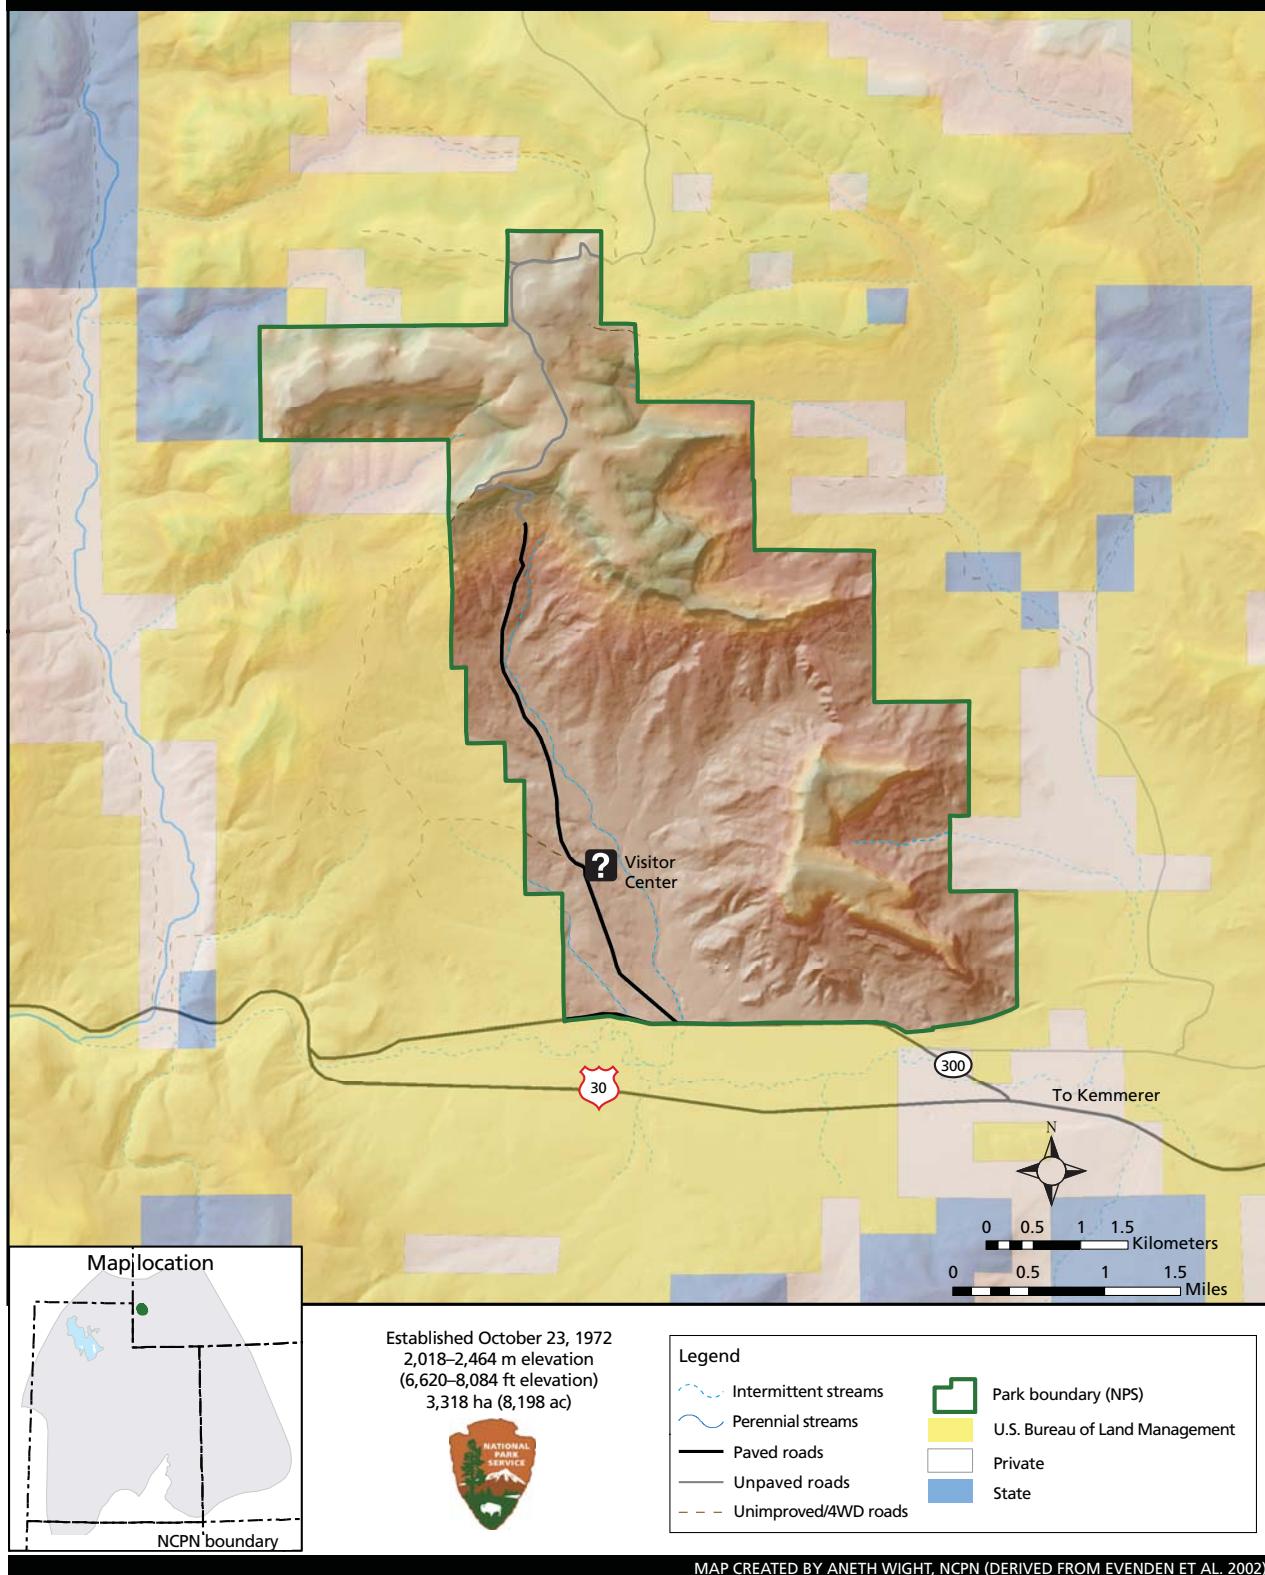

Figure 1.3.1. Location of Fossil Butte National Monument, Lincoln County, Wyoming.

Small patches of saline vegetation, dominated by greasewood (*Sarcobatus vermiculatus*) and saltbush (*Atriplex*) also occur near the creek and support populations of the rare entire-leaf pepperwort (*Lepidium integrifolium*) (Fertig 2000). Perennial springs at the base of Fossil Butte and Cundick Ridge have small thickets of yellow willow (*Salix eriocephala* var. *watsonii*) and narrow-leaved cottonwood (*Populus angustifolia*) or silver sagebrush (*Artemisia cana*)/sedge communities (Jones 1993; Springer et al. 2006).

1.3.4 Previous botanical studies

George Letterman was probably the first botanist to explore the area around Fossil Butte, stopping briefly at the Fossil Station train stop (probably in the vicinity of Twin Creek) in 1885 (Table 1.3.4). The full extent of Letterman's collecting is not known, but he did collect entire-leaf pepperwort, a rare species also found in Fossil Butte NM (Fertig 2000; Heidel 2004; Hitchcock 1936).

The first systematic study of the vegetation of Fossil Butte NM occurred in 1973, less than a year after the monument was formally established. The National Park Service hired Dr. Alan Beetle and C. B. Marlow, of the University of Wyoming's Department of Range Management, to create a baseline vegetation map and assess range conditions. Beetle and Marlow (1974) recorded 13 main vegetation types for the monument and compiled a checklist of 78 vascular plant species (now recognized as 72 taxa with the elimination of synonyms, misidentifications, and specimens from outside the monument as documented by Fertig [2000]).

William Litzinger collected approximately 200 voucher specimens in 1977, in the course of conducting vegetation transect studies and developing the Fossil Butte NM herbarium (FOBU). Through his efforts, 132 new species were added to the monument flora, bringing the total number of reported species to just over 200 (Table 1.3.4, Figure 1.3.4) (Litzinger 1977; Fertig 2000).

In 1984, the National Park Service hired Robert and Jane Dorn and Robert Lichvar, of Mountain West Environmental Services, to study grazing impacts and revise Beetle and Marlow's 1974 veg-

eration map. Dorn and others (1984) produced a detailed vegetation map depicting 12 major vegetation types and compiled a checklist of 347 vascular plants for Fossil Butte NM. In all, Dorn and colleagues reported 181 new species for the monument, of which all but 28 have since been corroborated with voucher specimens.

George Jones, plant ecologist with the Wyoming Natural Diversity Database, conducted a follow-up vegetation mapping study for the National Park Service in 1992. Jones (1993) reported two new sedge species for the monument. Recently, Bonnie Heidel reported a third new sedge, meadow sedge (*Carex praticola*), from Jones's collections deposited at the University of Wyoming. *C. praticola* was not cited in Jones's 1993 species list, nor has it previously been collected in Lincoln County. This species is tentatively included in the flora of Fossil Butte NM (Appendix A), but actually may have been collected by Jones in the Absaroka Range, on another research project, and mislabeled.

Clay Kyte, long-time (and recently retired) seasonal ranger and naturalist for Fossil Butte NM, began filling in gaps in the FOBU herbarium in 1994. From 1994 to 2000, Kyte added 101 new taxa to the monument flora and collected specimens for more than 100 other species previously reported (but not vouchered) by Dorn and others (1984) or Beetle and Marlow (1974). With the addition of Kyte's collections, the documented flora of Fossil Butte NM reached 505 taxa in 2000 (Fertig 2000).

Since 2000, Kyte has added 47 new species vouchers and one additional unvouchered record for the monument. Rebecca Harms and Clay Kyte collected seven new wetland plants during an inventory of seeps and springs in 2005 (Springer et al. 2006). Vegetation mappers with the NCPN (in ed.) contributed two additional species reports during 2005 fieldwork. Katie Moon, a graduate student at Brigham Young University, made 15 collections from Fossil Butte NM in 2006, as part of her floristic survey of northeastern Utah and adjacent Wyoming, but added no new taxa to the monument checklist.

Table 1.3.4. Chronology of plant-collecting efforts in Fossil Butte National Monument.

Year	Collector(s)	# of new taxa	Comments
1885	G. Letterman	0	George Letterman collected entire-leaf pepperwort (<i>Lepidium integrifolium</i> var. <i>integrifolium</i>) near "Fossil Station" (Fertig 2000; Hitchcock 1936). The train siding was apparently located east of the current site of Fossil Butte NM (closer to the coal seams west of Kemmerer) in the 1880s, and so this collection probably came from the Twin Creek drainage, rather than Chicken Creek.
1973	A. A. Beetle and C. B. Marlow	67 (+ 5 reported)	Alan Beetle and C. B. Marlow, of the University of Wyoming, reported 78 vascular plant taxa (72 by modern count, based on synonyms, misidentifications, and specimens documented outside the monument) while conducting a baseline assessment of range conditions and developing a vegetation map (Beetle and Marlow 1974).
1977	W. J. Litzinger	132	William Litzinger documented at least 132 new species for the monument while conducting vegetation studies and developing the FOBU herbarium. Litzinger's 1977 checklist of the Fossil Butte NM flora cited nearly 200 plant species in 137 genera and 46 families (Evenden et al. 2002).
1984	R. Dorn, J. Dorn, R. Lichvar	153 (+ 28 reported)	Dorn and others (1984) produced a revised monument checklist with 347 plant species based on their vegetation mapping and classification project for the National Park Service. Of the 181 new taxa reported by Robert and Jane Dorn and Robert Lichvar, 153 have since been corroborated with vouchers by Clay Kyte, but 28 have still not been relocated.
1992	G. P. Jones	3	George Jones, of the Wyoming Natural Diversity Database, documented 3 new sedge species while conducting a vegetation study of Fossil Butte (Jones 1993). One of Jones's collections, meadow sedge (<i>Carex praticola</i>), may have actually come from the Absaroka Range in northwestern Wyoming.
1994–1999	C. Kyte	100 (+ 1 reported)	Beginning in 1994, Fossil Butte NM seasonal naturalist Clay Kyte systematically catalogued and vouchered the flora of the monument, adding 100 new species to the local flora and confirming species previously reported by Dorn and others (1984) and Beetle and Marlow (1974).
2000–2003	C. Kyte	37 (+ 1 reported)	Kyte's collecting efforts continued into the new millennium, with 38 additional species confirmed or reported, including 27 since 2001 that were not included in the monument species list of Fertig (2000).
2004–2006	C. Kyte & W. Fertig, R. Harms, and NCPN vegetation mapping team, K. Moon (BYU)	17 (+ 2 reported)	Since 2004, Clay Kyte, Walter Fertig, and Rebecca Harms have collected 17 new species for the Fossil Butte NM flora, focusing primarily on wetland and weedy species (Springer et al. 2006). Vegetation mappers from the NCPN (in ed.) added two new species reports during their field work in 2005. Katie Moon, graduate student at Brigham Young University, collected 15 species in Fossil Butte in 2006, but none was new to the monument.

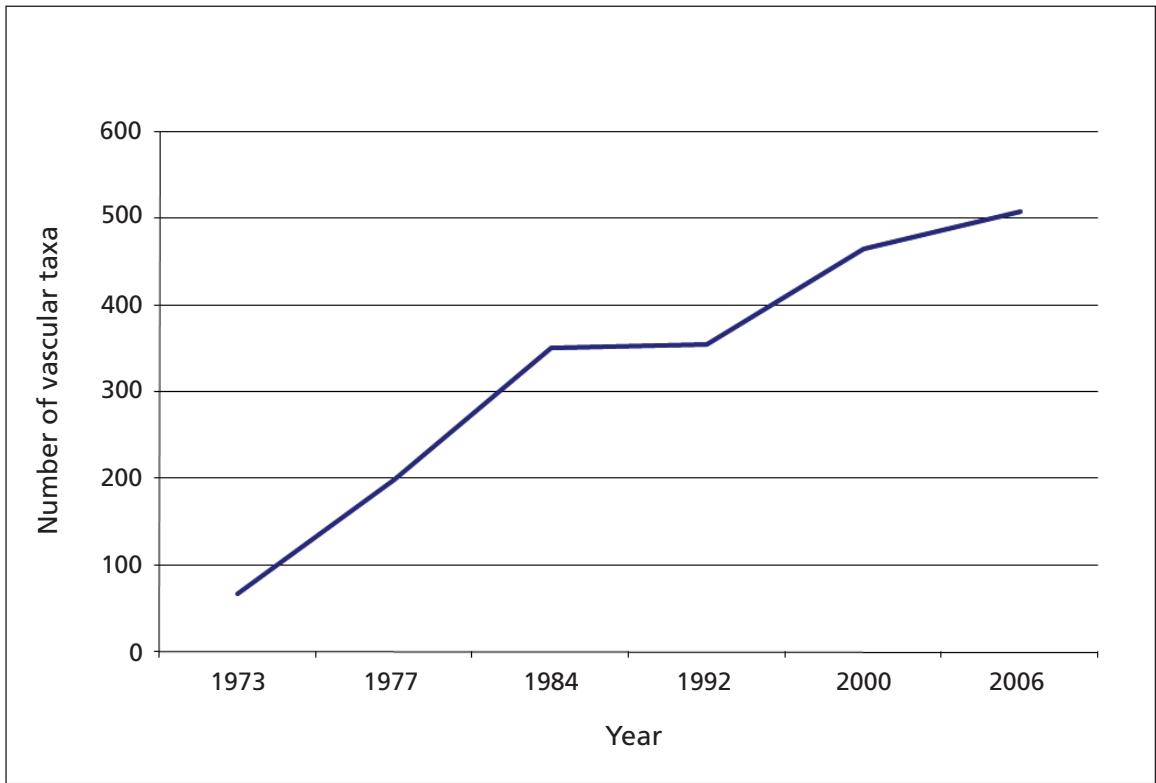

Figure 1.3.4. Increase in the number of plant taxa confirmed as present in Fossil Butte National Monument, 1973–2006.

2 Methods

In July 2004, we reviewed all mounted specimens in the Fossil Butte National Monument herbarium to determine whether each was correctly identified to species, subspecies, or variety following the nomenclature of Dorn (2001). As necessary, we made corrections and annotations to each specimen and to the voucher records in the monument's Automated National Cataloging System (ANCS+) and NPSpecies database.

Based on this herbarium work and a review of monument references (Beetle and Marlow 1974; Dorn et al. 1984; Fertig 2000; Jones 1993; NCPN in ed.; Springer et al. 2006), we developed four lists:

1. A revised checklist of species that were present in the park (confirmed by an authenticated voucher; included in Appendices A and D);
2. A list of species that were reported in the literature but not corroborated with a voucher (equivalent to "probably present" in NPSpecies terminology; included in Appendices A and D);

3. A list of potential species ("unconfirmed" in NPSpecies) known from the vicinity of Fossil Butte National Monument based on Fertig (2000) (included in Appendix B); and
4. A list of species that are now known to be misidentified or highly questionable (Appendix C).

Each list was annotated with supplemental information on life form, geographic range (within the context of Wyoming), population size in the monument (derived from NCPN in ed.; Springer et al. 2006; and field observations), flowering period, distribution across general vegetation types, nativity, data source (collector and collection number from a sample specimen or literature citation), year of earliest collection (from herbarium records), and relevant synonymy and taxonomic problems (based on review of Barkworth et al. 2003, 2007; Barneby 1989; Cronquist 1994; Cronquist et al. 1972, 1977, 1984, 1997; Flora of North America Editorial Committee 1993, 1997, 2000, 2002a, 2002b, 2003, 2005, 2006a, 2006b, 2006c; Holmgren et al. 2005; Weber and Wittmann 2001; and Welsh et al. 2003). The annotations to these lists and label data from the FOBU herbarium review were then incorporated into the NPSpecies database for the monument.

3 Results

3.1 Summary of the flora of Fossil Butte National Monument

Of the 1,146 vascular plant vouchers in the FOBU herbarium that we examined in 2004, 124 were misidentified (10.8%), 84 were revised to a more current name (7.3%), 126 had variety or subspecies names added (11.0%), and 812 were found to be correctly determined (70.9%). In 2000, the confirmed (vouchered) flora of Fossil Butte NM stood at 436, with another 69 known from literature reports (Fertig 2000). Since 2000, Clay Kyte, Walter Fertig, and Rebecca Harms have corroborated the presence of 19 species on the reported list and added 54 new taxa to the monu-

ment's confirmed species list, bringing the total of vouchered species to 509 (Table 3.1, Appendices A, D).

Currently, 37 additional taxa have been reported for Fossil Butte NM but have yet to be corroborated with a voucher specimen (Table 3.1, Appendix A). Of these, 33 were reported by Dorn and others (1984) or Beetle and Marlow (1973) and four others came from observations by recent vegetation mapping crews (NCPN in ed.) or Fossil Butte NM naturalist Clay Kyte. Taken together, the number of confirmed and reported vascular plant taxa in Fossil Butte National Monument stands at 546 taxa (Table 3.1, Appendix A).

Fertig (2000) identified 146 additional plant species that might potentially occur in Fossil Butte NM, based on the existence of suitable habitat

Table 3.1. Statistical summary of the flora of Fossil Butte National Monument.

Category	Number confirmed in park	Number additionally reported for park	Total
Taxonomic diversity			
Total taxa (including varieties and subspecies)	509	37	546
Full species (excluding varieties and subspecies)	486	35	521
Families	77	0	77
Life form diversity			
Tree taxa	5	0	5
Shrub taxa	52	3	55
Perennial forb taxa	284	25	309
Annual forb taxa	78	2	80
Perennial graminoid taxa	82	7	89
Annual graminoid taxa	6	0	6
Fern taxa	2	0	2
Biogeographic diversity			
Introduced taxa	69	3	72
Native taxa			
Locally endemic taxa	1	0	1
Regionally endemic taxa	20	0	20
Disjunct taxa	0	0	0
Peripheral taxa	8	0	8
Sparse taxa	1	0	1
Widespread taxa	410	34	444
<i>Total native taxa</i>	<i>440</i>	<i>34</i>	<i>474</i>

The number of taxa and families is based on taxonomic concepts of Dorn (2001). See Appendices for an explanation of the various categories.

or the proximity of the monument to known populations (Hartman et al. 1996; Refsdal 1996; Rocky Mountain Herbarium's digital atlas of the Flora of Wyoming <<http://www.rmh.uwyo.edu>>). At least 29 of these species (19.9%) have been discovered in the monument since 2000, and 3 others have been dropped to the falsely reported list or are no longer recognized as valid taxa. The current number of potential species that we are recognizing for Fossil Butte National Monument is 114 (Appendix B).

Following the 2000 FOBU herbarium review (Fertig 2000), 56 plant species previously reported for Fossil Butte NM in the literature or from herbarium specimens were found to be misidentified or documented outside of the monument. Currently, the number of falsely reported taxa for the monument stands at 68 (Appendix C). Of these, 17 were based on unvouchered literature reports (Beetle and Marlow 1974; Dorn et al. 1984; Fertig 2000; Springer et al. 2006) that are now considered questionable because Fossil Butte NM either lacks likely habitat or is well outside of a species's expected range. The remaining 51 false reports are based on misidentified specimens.

The confirmed and reported flora of Fossil Butte NM represent 19.5% of the 2,800 native and naturalized taxa documented for the state of Wyoming by Dorn (2001) and 54.2% of the state's 142 plant families (Table 3.1). Within Lincoln County, the monument flora captures 44.7% of the 1,222 taxa reported by Dorn (2001). At the ecoregional scale, Fossil Butte NM contains 36.7% of the 1,487 species reported for the Wyoming Basins ecoregion (Fertig et al. 2002).

3.2 Life form and biogeographic diversity

Although ecologically dominant, tree and shrub species make up only 11.0% of the confirmed and reported plant taxa of Fossil Butte NM (see Table 3.1). Perennial forbs are the most species-rich life form in the monument's flora, with 309 known and reported taxa (56.6% of the total flora). Less than 16% of the flora is comprised of annual forbs and grass-like plants. Like trees and shrubs, perennial graminoids are ecologically important but relatively species-poor, representing 16.3% of the total flora. The diversity of ferns and fern-allies in Fossil Butte NM is especially low (0.4%) (see Table 3.1).

Of the monument's 474 native taxa, 444 (93.7%)

are widespread across Wyoming and western North America. Only 21 species (4.4% of the monument's native flora) are restricted to the state of Wyoming or the Utah–Wyoming Rocky Mountains and Wyoming Basins ecoregions (regional and local endemics). Nine other species (1.9%) are at the edge of their global range (peripheral) or occur sparsely across the state (see Table 3.1).

3.3 Plants of special concern

Fossil Butte National Monument contains no plants presently listed as threatened or endangered under the U.S. Endangered Species Act. Tufted twinpod was formerly a Category 2 candidate for potential listing under the act (Table 3.3), but was dropped as a candidate when the Category 2 designation was eliminated in 1995. The Wyoming Natural Diversity Database (WYNDD) currently lists eight species from Fossil Butte NM as species of special concern or potential concern (Heidel 2007). A ninth species, Payson's beardtongue (*Penstemon paysoniorum*), is a Wyoming endemic that was formerly considered a potential species of concern (Fertig 2000), but was recently dropped from the WYNDD list. Several rare species projects have recently been completed for Fossil Butte NM, including surveys of tufted twinpod (Fertig 2002; Kyte 2000b), and entire-leaved peppergrass (Heidel 2004), and a summary of rare species (Fertig 2000).

3.4 Non-native species and noxious weeds

Introduced plant species (not historically native to Wyoming or North America) make up 13.2% of the confirmed and reported flora of Fossil Butte NM (see Table 3.1). This figure is slightly higher than the statewide average of 12.6% non-native species (Fertig 1999). Of the 72 introduced plant species confirmed or reported for Fossil Butte NM, 10 are listed as noxious by the State of Wyoming (Table 3.4) (Wyoming Department of Agriculture 2003). Since the early 1990s, the monument has had an active control program for Canada thistle (*Cirsium arvense*), musk thistle (*Carduus nutans*), spotted knapweed (*Centaurea maculosa*), diffuse knapweed (*Centaurea diffusa*), common hound's-tongue (*Cynoglossum officinale*), five-stamen tamarisk (*Tamarix chinensis*), and several other weed species not on the state noxious list (Kyte 2000a). These efforts have resulted in the eradication of diffuse knapweed and five-stamen tamarisk (Evenden et al. 2002).

Table 3.3. Plant species of conservation concern from Fossil Butte National Monument.

Family	Species	Common name	TNC global rank	Legal status	WYNDD status
Apiaceae	<i>Lomatium bicolor</i> var. <i>bicolor</i>	Wasatch biscuitroot	G4T3T4		PotConc, S2
Apiaceae	<i>Lomatium triternatum</i> var. <i>anomalum</i>	ternate desert-parsley	G5T4T5		SpecConc,S1
Brassicaceae	<i>Lepidium integrifolium</i> var. <i>integrifolium</i>	entire-leaved pepperwort	G1G2T1?		SpecConc,S1
Brassicaceae	<i>Physaria condensata</i>	tufted twinpod	G2	WY BLM: Sensitive, USFWS: former C2 candidate	SpecConc, S2
Chenopodiaceae	<i>Atriplex falcata</i>	falcate saltbush	G4Q		SpecCon, S1
Cuscutaceae	<i>Cuscuta occidentalis</i>	western dodder	G4G5		SpecCon, S1
Fabaceae	<i>Astragalus lentiginosus</i> var. <i>salinus</i>	Sodaville milkvetch	G5T5		SpecCon, S1
Rhamnaceae	<i>Ceanothus martinii</i>	Martin's ceanothus	G4		SpecCon, S1
Scrophulariaceae	<i>Penstemon paysoniorum</i>	Payson beardtongue	G3		S3

This list is derived from Heidel (2007) and Fertig (2000).

Codes: TNC global rank assesses abundance and conservation priority on a scale of 1–5 (1 being extremely vulnerable and 5 being secure) for full species (G) and varieties or subspecies (T) across their entire range. A "?" indicates uncertainty in the rank, Q = taxonomic questions, and NR = not ranked. A comparable scoring system is used to measure state abundance (S) in Wyoming under the column WYNDD status. Under legal status, USFWS = U.S. Fish and Wildlife Service. WY BLM = U.S. Bureau of Land Management, Wyoming Office. C2 = Category 2 candidate (a former category used for taxa that might warrant being proposed for threatened or endangered status following additional research). WYNDD status includes species of concern (SpecConc) that are actively tracked by the state natural heritage program and species of potential concern (PotConc) that are mostly intrinsically rare regional endemics that are currently stable, but could become species of concern if present management conditions or trends change significantly (Heidel 2007).

Table 3.4. Noxious weed species of Fossil Butte National Monument.

Family	Species	Common name	Park status
Asteraceae	<i>Arctium minus</i>	burdock	Present
Asteraceae	<i>Carduus nutans</i>	musk thistle	Present
Asteraceae	<i>Centaurea diffusa</i>	diffuse knapweed	Eradicated
Asteraceae	<i>Centaurea maculosa</i>	spotted knapweed	Present
Asteraceae	<i>Centaurea repens</i>	Russian knapweed	Present
Asteraceae	<i>Cirsium arvense</i>	Canada thistle	Present
Boraginaceae	<i>Cynoglossum officinale</i>	common hound's-tongue	Present
Convolvulaceae	<i>Convolvulus arvensis</i>	field bindweed	Present
Poaceae	<i>Elymus repens</i>	quackgrass	Present
Tamaricaceae	<i>Tamarix chinensis</i>	five-stamen tamarisk	Eradicated

This list is derived from the Wyoming Department of Agriculture (2003).

4 Discussion

In the nearly 35 years since Beetle and Marlow's original survey, the flora of Fossil Butte National Monument has grown from 73 to 546 taxa, an increase of 86% (Tables 1.3.4 and 3.1, Figure 1.3.4, Appendix A). Based on available habitats and proximity, at least 114 additional plant taxa may occur within the monument (Appendix B). Should all of these potential species be found, the documented flora of the monument would in-

crease by nearly 17%. Many of the “missing” potential or reported taxa consist of cryptic species that flower late in the growing season, or occur in undersampled wetland or weedy habitats. Confirmation of reported species should remain a high priority, as some of these taxa may ultimately prove to be erroneous. Additional studies would also be useful to better refine the abundance and distribution of species of high management interest (especially rare plants and invasive non-natives).

Appendices

The following appendices contain annotated checklists of the vascular flora of Fossil Butte National Monument.

Appendix A lists all species that have been confirmed for the flora with an authenticated voucher specimen (including extant and historical records) or that have been reliably reported for the monument in the literature (Beetle and Marlow 1974; Dorn et al. 1984; Jones 1993; Fertig 2000; NCPN in ed.; Springer et al. 2006). Vouchers were examined from the FOBU herbarium, and collections from Brigham Young University (BRY) and the University of Wyoming (RM). Species entries in Appendix A are organized alphabetically by family and genus.

Appendix B includes species that may potentially occur within Fossil Butte NM based on the proximity of the monument to other populations or the presence of suitable habitat.

Appendix C lists species that have been previously reported for Fossil Butte NM but are now considered erroneous because they are based on misidentified specimens or questionable literature records.

Appendix D contains the same confirmed, historical, and reported taxa as in Appendix A, but organized by life form rather than by family in order to better meet the needs of NPS interpretive specialists.

The codes and references for each field in the appropriate appendices are summarized below.

Family (Appendices A, B, C, and D)

Family concepts and nomenclature follow *Vascular Plants of Wyoming, third edition* (Dorn 2001). Alternative family names and treatments from other regional floras (Flora of North America Editorial Committee 1993, 2002b; Holmgren et al. 2005; Weber and Wittman 2001; Welsh et al. 2003) are listed in parentheses.

Species name (Appendices A, B, C, and D)

Nomenclature for scientific names and taxonomic concepts are derived from Dorn (2001). Scientific names are listed in alphabetical rather than phylogenetic order.

Synonyms/Taxonomic notes (Appendices A, B, and C)

Pertinent synonyms are included for species with alternative scientific names in other recent state and regional floras (Barkworth et al. 2003, 2007; Barneby 1989; Cronquist 1994; Cronquist et al. 1972, 1977, 1984, 1997; Flora of North America Editorial Committee 1993, 1997, 2000, 2002a, 2002b, 2003, 2005, 2006a, 2006b, 2006c; Holmgren et al. 2005; Weber and Wittmann 2001; Welsh et al. 2003).

No effort has been made to identify additional synonyms from monographs and floras preceding the early 1970s.

Common name (Appendices A, B, C, and D)

Common names are derived primarily from Welsh and others (2003) and the *Intermountain Flora* (Barneby 1989; Cronquist 1994; Cronquist et al. 1972, 1977, 1984, 1997; Holmgren et al. 2005).

Life form (Appendices A, B, C, and D)

Life form is based on the stature and growth habit of typical members of a species at reproductive maturity. Trees are woody perennials with a single stem or trunk and are typically over 3.5 m tall. Shrubs are woody perennials with one to many trunks arising from near the base of the plant and are usually less than 3.5 m tall. Perennial Forbs (PerF) are broad-leaved dicots or monocots with non-woody stems (at least above ground level) that live for multiple years. Annual Forbs (AnnF) are broad-leaved dicots or monocots with non-woody stems that complete their life cycle (mature, flower, and die) in one year. Perennial Graminoids (PerG) are linear-leaved, grass-like monocots that live for multiple years. Annual Graminoids (AnnG) are linear-leaved, grass-like monocots that complete their life cycle (mature, flower, and die) in one year. Ferns and fern-allies (Fern) are non-flowering vascular plants that reproduce by spores.

Range (Appendices A, B, and C)

Range represents the distribution of a species within Wyoming and the state's contribution to the plants overall global range. Disjunct (Disj) taxa have their Wyoming distribution separated from the main, contiguous portion of their range by a gap of more than 800 km (ca 500 miles). Introduced (Intro) taxa are those that are not native to Wyoming or North America, but have become naturalized (breeding on their own without human assistance). Local Endemics (LocEn) are taxa whose entire global range is restricted to an area of less than 16,500 km² (ca 6,370 mi², or 1° of latitude × 2° of longitude). Peripheral (Periph) taxa have a widespread global distribution but occur at the margin of their contiguous range in Wyoming, and occupy less than 5% of the state's area (usually only within a few miles of the state border). Regional Endemics (RegEn) are taxa with a global range of 16,500–250,000 km² (an area about the size of the state of Wyoming). Sparse taxa occur widely across Wyoming or North America, but their range within Wyoming is small and patchy, with populations restricted to specialized or uncommon habitats. Widespread (Wide) taxa have global ranges exceeding 250,000 km² and occur over at least 10% of the state.

Park status (Appendices A, C, and D)

Park status identifies whether a species is Present (Pres), Historical (Hist), or Reported (Rep) for Fossil Butte NM.

Species are considered Present if a confirmed voucher or documented observation has been made within monument boundaries since 1970. Historical species have been confirmed with a voucher from the monument but have not been relocated since before 1970. Reported species are listed for the monument in the literature (Beetle and Marlow 1974; Dorn et al. 1984; Jones 1993; Fertig 2000; NCPN in ed.; Springer et al. 2006), but have not been corroborated with a voucher specimen. Species that may potentially occur in FOBU are listed in Appendix B. Rejected taxa (listed in Appendix C) have either been falsely reported (**FalsRep**) in the literature based on misidentified herbarium specimens or are considered Questionable (**Ques?**) because park reports are from well outside their known or expected range.

Pop. size (Appendix A)

Population size refers to the abundance and frequency with which a species occurs within Fossil Butte NM. Abundance data are derived from Jones (1993), NCPN (in ed.), and personal observations. Abundant (**Abun**) taxa have large populations, have a broad ecological amplitude (often being dominant in one-to-several vegetation types), or occur extensively across the monument. Common (**Com**) taxa have large local populations but may be restricted to a single vegetation type or do not occur across the entire monument. Uncommon (**Unc**) taxa have low to medium-sized populations, typically have a narrow ecological amplitude (or at least contribute relatively little to total vegetative cover), or have a small range across the monument. Rare taxa usually have low population numbers and are restricted to a single location within the monument. A “?” indicates that population size is unknown.

Source (Appendix A)

Sources are the evidence for the assigned park status. In the case of Present and Historical taxa, sources are herbarium records (with collector, collection number, and repository) that were corroborated during this study. For reported taxa, the source is a published or unpublished reference citing the species within the monument. Specimen repositories include the Fossil Butte NM herbarium (**FOBU**), Brigham Young University (**BRY**), and the University of Wyoming’s Rocky Mountain Herbarium (**RM**).

Year doc. (Appendix A)

Year documented indicates the first year in which a species was confirmed or reported to occur in Fossil Butte NM. This year does not necessarily correspond with the date of the voucher specimen cited under Source. “NA” indicates that the first year is not known (used mostly for “reported” taxa).

Comments (Appendices A, B, C, and D)

This column includes additional comments on the status of a particular species in the monument, the place of origin for introduced species, legal status, and other data.

Nativity (Appendix D)

Nativity indicates whether a species is native to Wyoming or Introduced (Intro) based on Fertig (1999).

Flower time (Appendix D)

Flower time refers to the months in which a species is most likely to be in flower. NA indicates a species that is a non-flowering fern or gymnosperm.

Habitat (Appendix D)

The distribution of species across generalized habitats in Fossil Butte NM is indicated by an “x” in the columns Sage/Grs through Wet and is derived from the Fossil Butte NM vegetation classification (NCPN in ed.), Dorn and others (1984), Jones (1993), and Beetle and Marlow (1974). **Sage/Grs** = big sagebrush or alkali sagebrush grassland and montane shrub communities. **Mix Con** = Douglas-fir or limber pine woodlands. **Asp** = quaking aspen forests. **Wet** = wetland areas (including pond margins, wet meadows, and willow thickets). Additional comments are included for species that are restricted to a particular soil/geologic type or are found mostly in barren or disturbed sites.

Cyperaceae	<i>Carex filifolia</i>		threadleaf sedge	PerG	Wide	Rep	?	Dorn et al. (1984)	1984	
Cyperaceae	<i>Carex geyeri</i>		elk sedge	PerG	Wide	Rep	?	Dorn et al. (1984)	1984	

Appendix A. Confirmed, historical, and reported vascular plant taxa of Fossil Butte National Monument, organized by family and scientific name with taxonomic and biogeographic notes, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Pop. size	Source	Year doc.	Comments
Cyperaceae	<i>Carex hoodii</i>		Hood's sedge	PerG	Wide	Pres	Unc	Kyte & Fertig (FOBU)	2004-04	
Cyperaceae	<i>Carex microptera</i> var. <i>microptera</i>	<i>C. festivella</i> , <i>C.</i> <i>macloviana</i> var. <i>microptera</i>	small-wing sedge	PerG	Wide	Pres	Unc	Litzinger 1190 (FOBU)	1977	
Cyperaceae	<i>Carex nebrascensis</i>		Nebraska sedge	PerG	Wide	Pres	Unc	Kyte s.n. (FOBU)	1995	
Cyperaceae	<i>Carex pellita</i>	<i>C. lanuginosa</i>	woolly sedge	PerG	Wide	Pres	Unc	Kyte 2000-26 (FOBU)	1984	
Cyperaceae	<i>Carex petasata</i>		liddon sedge	PerG	Wide	Pres	Unc	Kyte 2001-35 (FOBU)	1977	
Cyperaceae	<i>Carex praegracilis</i>		blackcreeper sedge	PerG	Wide	Pres	Unc	Kyte 96-92 (FOBU)	1977	
Cyperaceae	<i>Carex praticola</i>		meadow sedge	PerG	Wide	Pres	Rare	Jones 502 (RM)	1992	Jones collection is out of range and was not cited in Jones (1993). Specimen may be from the Absaroka Range (Aug 1992).
Cyperaceae	<i>Carex rossii</i>	<i>C. deflexa</i> var. <i>bootii</i> ; <i>C. brevipes</i> ,	Ross' sedge	PerG	Wide	Pres	Com	Jones s.n. (FOBU)	1992	
Cyperaceae	<i>Carex simulata</i>	<i>C. pityophila</i>	analogue sedge	PerG	Wide	Pres	Unc	Kyte s.n. (FOBU)	1995	
Cyperaceae	<i>Carex stenophylla</i>	<i>C. duruscula</i> , <i>C. eleocharis</i> , <i>C.</i> <i>stenophylla</i> ssp. <i>eleocharis</i>	narrowleaf sedge	PerG	Wide	Pres	Com	Kyte 2001-02 (FOBU)	1973	
Cyperaceae	<i>Carex utriculata</i>	<i>C. rostrata</i> (<i>sensu</i> <i>lato</i>)	beaked sedge	PerG	Wide	Pres	Unc	Kyte 97-120 (FOBU)	1977	
Cyperaceae	<i>Carex vallicola</i>		valley sedge	PerG	Wide	Pres	Unc	Kyte 2001-18 (FOBU)	1992	
Cyperaceae	<i>Eleocharis acicularis</i>		slender spikerush	PerG	Wide	Pres	Unc	Kyte 2001-61 (FOBU)	2001	

Appendix A. Confirmed, historical, and reported vascular plant taxa of Fossil Butte National Monument, organized by family and scientific name with taxonomic and biogeographic notes, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Pop. size	Source	Year doc.	Comments
Cyperaceae	<i>Eleocharis palustris</i>	Includes <i>E. macrostachya</i> , <i>E. erythropoda</i> , & <i>E. uniglumis</i>	common spikerush	PerG	Wide	Pres	Unc	Kyte s.n. (FOBU)	1984	
Cyperaceae	<i>Schoenoplectus acutus</i> var. <i>occidentalis</i>	<i>Scirpus acutus</i> , <i>Schoenoplectus lacustris</i> ssp. <i>acutus</i>	hardstem bulrush	PerG	Wide	Pres	Unc	Kyte 96-200 (FOBU)	1996	
Elaeagnaceae	<i>Shepherdia canadensis</i>		Canada buffaloberry	Shrub	Wide	Pres	Unc	Kyte 96-210 (FOBU)	1973	
Equisetaceae	<i>Equisetum arvense</i>		field horsetail	Fern	Wide	Pres	Unc	Kyte 2000-38 (FOBU)	2000	
Equisetaceae	<i>Equisetum laevigatum</i>	<i>Hippochaete laevigata</i> , <i>E. kansanum</i>	smooth scouring-rush	Fern	Wide	Pres	Unc	Kyte s.n. (FOBU)	1977	
Ericaceae	<i>Arctostaphylos uva-ursi</i> var. <i>uva-ursi</i>	<i>A. uva-ursi</i> ssp. <i>coactilis</i> . Vars. not recognized by Holmgren et al. (1997)	bearberry	Shrub	Wide	Pres	Unc	Kyte 97-101 (FOBU)	1973	
Ericaceae (Pyrolaceae)	<i>Pyrola asarifolia</i>	<i>P. rotundifolia</i> ssp. <i>asarifolia</i>	pink wintergreen	PerF	Wide	Pres	Unc	Kyte 96-136 (FOBU)	1996	
Euphorbiaceae	<i>Chamaesyce glyptosperma</i>	<i>Euphorbia glyptosperma</i>	ridge-seeded spurge	AnnF	Wide	Pres	Unc	Litzinger 1503 (FOBU)	1977	
Euphorbiaceae	<i>Chamaesyce serpillifolia</i>	<i>Euphorbia serpillifolia</i>	thyme-leaved spurge	AnnF	Wide	Pres	Unc	Kyte 96-137 (FOBU)	1996	
Fabaceae (Leguminosae)	<i>Astragalus agrestis</i>	<i>A. dasycnema</i>	field milkvetch	PerF	Wide	Pres	Unc	Kyte s.n. (FOBU)	1973	
Fabaceae (Leguminosae)	<i>Astragalus argophyllus</i> var. <i>argophyllus</i>		silver-leaved milkvetch	PerF	Wide	Pres	Unc	Kyte s.n. (FOBU)	1984	
Fabaceae (Leguminosae)	<i>Astragalus bisulcatus</i> var. <i>bisulcatus</i>		two-grooved milkvetch	PerF	Wide	Pres	Rare	Kyte 2001-44 (FOBU)	2001	
Fabaceae (Leguminosae)	<i>Astragalus bisulcatus</i> var. <i>major</i>	Included in var. <i>bisulcatus</i> by Barneby (1989)	two-grooved milkvetch	PerF	Wide	Pres	Unc	Kyte s.n. (FOBU)	1984	
Fabaceae (Leguminosae)	<i>Astragalus canadensis</i> var. <i>brevidens</i>		pasture milkvetch	PerF	Wide	Pres	Unc	Litzinger 1338 (FOBU)	1977	

Appendix A. Confirmed, historical, and reported vascular plant taxa of Fossil Butte National Monument, organized by family and scientific name with taxonomic and biogeographic notes, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Pop. size	Source	Year doc.	Comments
Fabaceae (Leguminosae)	<i>Astragalus cicer</i>	chickpea milkvetch	PerF	Intro	Pres	Unc	Kyte s.n. (Fertig 2000)	2000	Native to Europe. Specimen hasn't been relocated; may be at RM.	
Fabaceae (Leguminosae)	<i>Astragalus convallarius</i>	<i>A. diversifolius</i> var. <i>campestris</i> , <i>A.</i> <i>convallarius</i> var. <i>convallarius</i>	lesser rushy milkvetch	PerF	Wide	Pres	Unc	Kyte 97-92 (FOBU)	1973	
Fabaceae (Leguminosae)	<i>Astragalus jejunus</i> var. <i>jejunus</i>		starveling milkvetch	PerF	Reg En	Pres	Unc	Kyte 96-23 (FOBU)	1984	Type locality is Bear River Valley near Evanston, Unita Co., WY (Watson 279 US)
Fabaceae (Leguminosae)	<i>Astragalus kentrophyta</i> var. <i>tegetarius</i>	<i>A. kentrophyta</i> var. <i>implexus</i>	mountain kentrophyta	PerF	Wide	Rep	?	Dorn et al. (1984)	1984	
Fabaceae (Leguminosae)	<i>Astragalus lentiginosus</i> var. <i>chartaceus</i>	<i>A. lentiginosus</i> var. <i>platyphyllidus</i>	broad-leaved milkvetch	PerF	Wide	Pres	Unc	Kyte 97-81 (FOBU)	1984	
Fabaceae (Leguminosae)	<i>Astragalus salinus</i>		salt milkvetch	PerF	Periph	Pres	Rare	Kyte 97-82 (FOBU)	1995	
Fabaceae (Leguminosae)	<i>Astragalus tenuifolius</i>		timber milkvetch	PerF	Wide	Pres	Unc	Kyte s.n. (FOBU)	1973	
Fabaceae (Leguminosae)	<i>Astragalus purshii</i>	<i>A. purshii</i> var. <i>purshii</i>	Pursh's milkvetch	PerF	Wide	Pres	Unc	Kyte 96-16 (FOBU)	1984	
Fabaceae (Leguminosae)	<i>Astragalus spatulatus</i>		spoonleaf milkvetch	PerF	Wide	Pres	Unc	Kyte 97-26 (FOBU)	1984	
Fabaceae (Leguminosae)	<i>Astragalus tenellus</i>		pulse milkvetch	PerF	Wide	Pres	Unc	Kyte s.n. (FOBU)	1995	
Fabaceae (Leguminosae)	<i>Glycyrrhiza lepidota</i> var. <i>lepidota</i>		licorice-root	PerF	Wide	Pres	Unc	Kyte 97-134 (FOBU)	1977	
Fabaceae (Leguminosae)	<i>Hedysarum boreale</i> var. <i>pabulare</i>	Var. not recognized by some authors	Utah sweet-vetch	PerF	Reg En	Pres	Unc	Kyte 97-80 (FOBU)	1997	
Fabaceae (Leguminosae)	<i>Lupinus argenteus</i> var. <i>rubricaulis</i>		subalpine lupine	PerF	Wide	Pres	Com	Kyte 97-88 (FOBU)	1984	

Appendix A. Confirmed, historical, and reported vascular plant taxa of Fossil Butte National Monument, organized by family and scientific name with taxonomic and biogeographic notes, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Pop. size	Source	Year doc.	Comments
Fabaceae (Leguminosae)	<i>Lupinus leucophyllus</i>		white-leaved lupine	PerF	Wide	Rep	?	Dorn et al. (1984)	1984	
Fabaceae (Leguminosae)	<i>Lupinus sericeus</i>	<i>L. sericeus</i> var. <i>sericeus</i>	silky lupine	PerF	Wide	Pres	Com	Kyte & Fertig 2004-12 (FOBU)	1973	
Fabaceae (Leguminosae)	<i>Medicago lupulina</i>		black medick	AnnF	Intro	Pres	Unc	Kyte 98-4 (FOBU)	1998	Native to Europe
Fabaceae (Leguminosae)	<i>Medicago sativa</i> var. <i>sativa</i>		alfalfa	PerF	Intro	Pres	Unc	Kyte 97-126 (FOBU)	1984	Native to Europe
Fabaceae (Leguminosae)	<i>Melilotus albus</i>	<i>M. alba</i> , included in <i>M. officinalis</i> by some authors	white sweet-clover	AnnF	Intro	Pres	Unc	Kyte 96-139 (FOBU)	1996	Native to Europe
Fabaceae (Leguminosae)	<i>Melilotus officinalis</i>		yellow sweet-clover	PerF	Intro	Pres	Unc	Litzinger 1454 (FOBU)	1977	Native to Europe
Fabaceae (Leguminosae)	<i>Oxytropis deflexa</i> var. <i>sericea</i>		nodding locoweed	PerF	Wide	Pres	Unc	Kyte 96-186 (FOBU)	1996	
Fabaceae (Leguminosae)	<i>Oxytropis sericea</i> var. <i>sericea</i>		white locoweed	PerF	Wide	Pres	Unc	Kyte 97-69 (FOBU)	1984	
Fabaceae (Leguminosae)	<i>Trifolium hybridum</i>	<i>gymnocarpon</i> var. <i>plummerae</i>	holly-leaf clover	PerF	Wide	Pres	Unc	Kyte 96-17 (FOBU)	1984	
Fabaceae (Leguminosae)	<i>Trifolium repens</i>		alsike clover	PerF	Intro	Pres	Unc	Kyte 98-32 (FOBU)	1998	Native to Europe
Fabaceae (Leguminosae)	<i>Corydalis aurea</i> var. <i>aurea</i>		white clover	PerF	Intro	Pres	Unc	Litzinger 1345 (FOBU)	1977	Native to Europe
Fumariaceae	<i>Fraseria speciosa</i>	<i>Swertia radiata</i>	golden smoke	PerF	Wide	Pres	Unc	Kyte 96-141 (FOBU)	1984	
Gentianaceae	<i>Gentiana affinis</i> var. <i>affinis</i>		elkweed	PerF	Wide	Pres	Unc	Litzinger 1170 (FOBU)	1977	
Gentianaceae	<i>Gentianella amarella</i>	<i>Gentiana amarella</i> , var. <i>amarella</i>	Rocky Mountain gentian	PerF	Wide	Pres	Unc	Kyte s.n. (FOBU)	1977	
Gentianaceae	<i>Gentianella amarella</i>	<i>Gentianella amarella</i> , var. <i>amarella</i>	northern gentian	PerF	Wide	Pres	Unc	Kyte 96-187 (FOBU)	1984	

Appendix A. Confirmed, historical, and reported vascular plant taxa of Fossil Butte National Monument, organized by family and scientific name with taxonomic and biogeographic notes, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Aceraceae	<i>Acer grandidentatum</i>		bigtooth maple	Tree	Periph	
Adiantaceae (Polypodiaceae or Sispteridaceae)	<i>Pellaea breweri</i>		Brewer's cliffbrake	Fern	Wide	
Adoxaceae (Caprifoliaceae)	<i>Sambucus racemosa</i> var. <i>microbotrys</i>	Included in <i>S. racemosa</i> var. <i>racemosa</i> by some authors	red elderberry	Shrub	Wide	
Alliaceae (Liliaceae)	<i>Allium brandegeei</i>	<i>A. brandegeei</i>	Brandegee's onion	PerF	Wide	
Anacardiaceae	<i>Rhus aromatica</i> var. <i>trilobata</i>	<i>R. trilobata</i> var. <i>trilobata</i>	squawbush	Shrub	Wide	
Apiaceae (Umbelliferae)	<i>Cymopterus bulbosus</i>		onion spring-parsley	PerF	Wide	
Apiaceae (Umbelliferae)	<i>Heracleum sphondylium</i> var. <i>lanatum</i>	<i>H. lanatum</i> , <i>H. maximum</i> , <i>H. sphondylium</i> ssp. <i>montanum</i>	cow parsnip	PerF	Wide	
Apiaceae (Umbelliferae)	<i>Lomatium grayi</i>	<i>L. grayi</i> var. <i>grayi</i>	milfoil lomatium	PerF	Wide	
Apiaceae (Umbelliferae)	<i>Osmorrhiza depauperata</i>		blunt sweet-cicely	PerF	Wide	
Aspleniaceae (Polypodiaceae)	<i>Cystopteris fragilis</i>	Some authors include <i>C. utahensis</i> , <i>C. reevesiana</i> , & <i>C. tenuis</i>	brittle bladder-fern	Fern	Wide	
Asteraceae (Compositae)	<i>Agoseris aurantiaca</i>	Includes vars. <i>aurantiaca</i> & <i>purpurea</i>	orange agoseris	PerF	Wide	
Asteraceae (Compositae)	<i>Artemisia arbuscula</i> var. <i>arbuscula</i>	<i>Seriphidium arbusculum</i> var. <i>arbusculum</i>	low sagebrush	Shrub	Periph	
Asteraceae (Compositae)	<i>Crepis atrabaria</i>	<i>C. atrabaria</i>	slender hawksbeard	PerF	Wide	
Asteraceae (Compositae)	<i>Crepis occidentalis</i> var. <i>costata</i>		basin hawksbeard	PerF	Wide	
Asteraceae (Compositae)	<i>Crepis runcinata</i> var. <i>runcinata</i>	<i>Pilosella runcinata</i>	meadow hawksbeard	PerF	Wide	
Asteraceae (Compositae)	<i>Eurybia integrifolia</i>	<i>Aster integrifolius</i>	thick-stem wood-aster	PerF	Wide	
Asteraceae (Compositae)	<i>Hymenopappus filifolius</i> var. <i>luteus</i>		Wyoming halineherb	PerF	RegEn	
Asteraceae (Compositae)	<i>Matricaria matricarioides</i>	<i>M. discoidea</i> , <i>Lepidotheca suaveolens</i>	pineapple-weed	AnnF	Wide	
Asteraceae (Compositae)	<i>Packera streptanthifolia</i> var. <i>rubricaulis</i>	<i>Senecio streptanthifolius</i> var. <i>rubricaulis</i>	red-stemmed cleft-leaved groundsel	PerF	Wide	
Asteraceae (Compositae)	<i>Solidago missouriensis</i> var. <i>missouriensis</i>	Includes var. <i>extraria</i>	Missouri goldenrod	PerF	Wide	
Asteraceae (Compositae)	<i>Stenotus armerioides</i>	<i>Haplopappus armerioides</i> var. <i>armerioides</i>	thrift goldenweed	PerF	Wide	
Asteraceae (Compositae)	<i>Symphytum ciliatum</i>	<i>Aster brachyactis</i> , <i>Brachyactis ciliata</i> ssp. <i>angusta</i>	rayless alkali aster	AnnF	Wide	

Appendix B. Potential (unconfirmed) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Asteraceae (Compositae)	<i>Sympphytum lanceolatum</i> var. <i>hesperium</i>	<i>Aster lanceolatus</i> var. <i>hesperius</i> , <i>A. hesperius</i>	Siskiyou aster	PerF	Wide	
Asteraceae (Compositae)	<i>Tragopogon lamottei</i>	<i>T. pratensis</i>	meadow salsify	PerF	Intro	Native to Europe
Asteraceae (Compositae)	<i>Xylorhiza glabriuscula</i>	<i>Machaeranthera glabriuscula</i> . Includes vars. <i>glabriuscula</i> & <i>villosa</i>	smooth woody-aster	PerF	RegEn	
Boraginaceae	<i>Cryptantha affinis</i>		ally cryptanth	AnnF	Wide	
Boraginaceae	<i>Cryptantha flavoculata</i>	<i>Oreocarya flavoculata</i>	yellow-eye cryptanth	PerF	Wide	
Boraginaceae	<i>Cryptantha torreyana</i>		Torrey's cryptanth	AnnF	Wide	
Boraginaceae	<i>Hackelia micrantha</i>	<i>H. jessicae</i>	smallflower stickseed	PerF	Wide	
Boraginaceae	<i>Lappula redowskii</i> var. <i>cupulata</i>	<i>L. texana</i> , <i>L. occidentalis</i> var. <i>cupulata</i> , <i>L. marginata</i>	cupseed stickseed	AnnF	Wide	
Boraginaceae	<i>Lithospermum incisum</i>		showy stonedeed	PerF	Wide	
Brassicaceae (Cruciferae)	<i>Boechera cobrensis</i>	<i>Arabis cobrensis</i>	masonic rockcress	PerF	Wide	
Brassicaceae (Cruciferae)	<i>Boechera demissa</i> var. <i>languida</i>	<i>Arabis demissa</i> var. <i>languida</i>	nodding rock cress	PerF	Wide	
Brassicaceae (Cruciferae)	<i>Boechera holboellii</i> var. <i>pinetorum</i>	<i>Arabis holboellii</i> var. <i>pinetorum</i> , name may be misapplied (Holmgren et al. 2005)	Holboell's rockcress	PerF	Wide	
Brassicaceae (Cruciferae)	<i>Boechera lignifera</i>	<i>Arabis lignifera</i>	Sweetwater rockcress	PerF	Wide	
Brassicaceae (Cruciferae)	<i>Cardaria pubescens</i>		hairy whitetop	PerF	Intro	Native to Asia. WY state noxious weed
Brassicaceae (Cruciferae)	<i>Conringia orientalis</i>		hare's-ear mustard	AnnF	Intro	Native to Europe
Brassicaceae (Cruciferae)	<i>Descurainia incana</i> var. <i>major</i>	<i>D. richardsonii</i> var. <i>richardsonii</i> , <i>D. incana</i> ssp. <i>incana</i>	mountain tansy-mustard	PerF	Wide	
Brassicaceae (Cruciferae)	<i>Descurainia pinnata</i> var. <i>nelsonii</i>		western tansy-mustard	AnnF	Wide	
Brassicaceae (Cruciferae)	<i>Ixatis tinctoria</i>		Dyer's woad	PerF	Intro	Native to Europe. WY state noxious weed
Brassicaceae (Cruciferae)	<i>Lepidium densiflorum</i> var. <i>macrocarpum</i>	Included in var. <i>densiflorum</i> by some authors	miner's pepperwort	AnnF	Wide	

Appendix B. Potential (unconfirmed) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Brassicaceae (Cruciferae)	<i>Lepidium latifolium</i>	<i>Cardaria latifolia</i>	broad-leaf pepperwort	PerF	Intro	Native to Eurasia. WY state noxious weed
Brassicaceae (Cruciferae)	<i>Lesquerella condensata</i>	<i>L. alpina</i> var. <i>condensata</i> , <i>Physaria reediana</i> var. <i>condensata</i>	dense bladderpod	PerF	RegEn	Type locality is Tipton, Sweetwater Co., WY (Nelson 4797 RM)
Brassicaceae (Cruciferae)	<i>Lesquerella prostrata</i>	<i>Physaria prostrata</i>	prostrate bladderpod	PerF	RegEn	WY BLM: Sensitive.
Brassicaceae (Cruciferae)	<i>Physaria dormii</i>		Dorn's twinpod	PerF	LocEn	WY BLM: Sensitive. USFWS: former C2 candidate.
Brassicaceae (Cruciferae)	<i>Physaria integrifolia</i>	Includes var. <i>monticola</i>	Snake River twinpod	PerF	RegEn	Type locality is Rock Creek Ridge, Lincoln Co., WY (Dorn 3476 RM)
Brassicaceae (Cruciferae)	<i>Rorippa palustris</i> var. <i>hispida</i>	<i>R. islandica</i> var. <i>hispida</i>	hairy yellowcress	PerF	Wide	
Brassicaceae (Cruciferae)	<i>Sisymbrium loeselii</i>		false London rocket	AnnF	Intro	Native to Eurasia
Brassicaceae (Cruciferae)	<i>Stanleya pinnata</i>	Includes vars. <i>bipinnata</i> & <i>pinnata</i>	prince's-plume	PerF	Wide	
Callitrichaceae	<i>Callitrichie palustris</i>	<i>C. verna</i>	Vernal water-starwort	PerF	Wide	
Caryophyllaceae (Aisinaeae)	<i>Eremogene hookeri</i> var. <i>hookeri</i>	<i>Arenaria hookeri</i> var. <i>hookeri</i>	Hooker's sandwort	PerF	Wide	
Caryophyllaceae (Aisinaeae)	<i>Spergularia rubra</i>		ruby sandspurrey	AnnF	Intro	Native to Europe
Chenopodiaceae	<i>Atriplex argentea</i>	<i>A. argentea</i> var. <i>argentea</i>	silver orache	AnnF	Wide	

Appendix B. Potential (unconfirmed) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Chenopodiaceae	<i>Bassia hyssopifolia</i>		five-horn smotherweed	AnnF	Intro	Native to Eurasia
Chenopodiaceae	<i>Salicornia rubra</i>	<i>S. europaea</i> , <i>S. europaea</i> ssp. <i>rubra</i>	red saltwort	AnnF	Wide	
Cyperaceae	<i>Carex vesicaria</i>		blistер sedge	Perg	Wide	
Equisetaceae	<i>Equisetum hyemale</i> var. <i>affine</i>	<i>Hippochaete hyemalis</i> ssp. <i>affinis</i> , <i>E. praealtum</i>	tall scouring-rush	Fern	Wide	
Ericaceae (Pyrolaceae)	<i>Orthilia secunda</i>	<i>Pyrola secunda</i>	sidebells pyrola	PerF	Wide	
Fabaceae (Leguminosae)	<i>Astragalus chamaeleuce</i>	<i>A. chamaeleuce</i> var. <i>chamaeleuce</i>	cicada milkvetch	PerF	Wide	
Fabaceae (Leguminosae)	<i>Astragalus cibarius</i>		browse milkvetch	PerF	Wide	
Fabaceae (Leguminosae)	<i>Astragalus miser</i> var. <i>decumbens</i>		timber milkvetch	PerF	RegEn	
Fabaceae (Leguminosae)	<i>Astragalus utahensis</i>		Utah milkvetch	PerF	Periph	
Fabaceae (Leguminosae)	<i>Hedysarum occidentale</i>	<i>H. occidentale</i> var. <i>occidentale</i>	western sweetvetch	PerF	Wide	
Fabaceae (Leguminosae)	<i>Lupinus argenteus</i> var. <i>argenteus</i>		silvery lupine	PerF	Wide	
Fabaceae (Leguminosae)	<i>Lupinus lepidus</i> var. <i>utahensis</i>	<i>L. lepidus</i> var. <i>caespitosus</i> , <i>L.</i> <i>caespitosus</i> var. <i>utahensis</i>	stemless lupine	PerF	Wide	
Fabaceae (Leguminosae)	<i>Lupinus pusillus</i> var. <i>intermontanus</i>		Great Basin lupine	AnnF	Wide	
Fabaceae (Leguminosae)	<i>Trifolium andinum</i>	<i>T. andinum</i> var. <i>andinum</i>	Andean clover	PerF	RegEn	
Fabaceae (Leguminosae)	<i>Trifolium longipes</i> var. <i>reflexum</i>		Wind River clover	PerF	Wide	
Grossulariaceae (Saxifragaceae)	<i>Ribes aureum</i> var. <i>aureum</i>		golden currant	Shrub	Wide	
Grossulariaceae (Saxifragaceae)	<i>Ribes oxyacanthoides</i> var. <i>setosum</i>	<i>R. setosum</i>	Missouri gooseberry	Shrub	Wide	
Hydrophyllaceae	<i>Phacelia scopulina</i>	<i>P. lutea</i> var. <i>scopulina</i> includes ssp. <i>vulgaris</i>	Debeque scorpion-weed	AnnF	Wide	
Lamiaceae (Labiatae)	<i>Prunella vulgaris</i>	<i>P. vulgaris</i> var. <i>lanceolata</i> , self-heal	self-heal	PerF	Wide	
Linaceae	<i>Linum kingii</i>		King's yellow flax	PerF	Wide	
Loasaceae	<i>Mentzelia albicaulis</i>	<i>Acrolasia albicalyx</i> , <i>A. gracilis</i> , <i>M.</i> <i>obscura</i>	white-stem blazingstar	AnnF	Wide	
Onagraceae	<i>Camissonia breviflora</i>	<i>Oenothera breviflora</i>	dandelion camissonia	PerF	Wide	

Appendix B. Potential (unconfirmed) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Onagraceae	<i>Camissonia scapoidea</i>	<i>C. scapoidea</i> var. <i>scapoidea</i> , <i>Oenothera scapoidea</i>	Paiute suncup	AnnF	Wide	
Onagraceae	<i>Oenothera cespitosa</i> var. <i>marginata</i>		long-tube evening- primrose	PerF	Periph	
Onagraceae	<i>Oenothera pallida</i> var. <i>trichocalyx</i>		pale evening-primrose	PerF	RegEn	
Onagraceae	<i>Oenothera villosa</i> var. <i>strigosa</i>	<i>O. strigosa</i> , <i>O. biennis</i>	biennial evening-primrose	PerF	Wide	
Poaceae (Gramineae)	<i>Agrostis exarata</i>		spike bentgrass	PerG	Wide	
Poaceae (Gramineae)	<i>Agrostis scabra</i>	<i>A. hiemalis</i> , <i>A. geminata</i>	tickleggrass	PerG	Wide	
Poaceae (Gramineae)	<i>Hesperostipa comata</i> var. <i>intermedia</i>	<i>Stipa comata</i> var. <i>intermedia</i>	needle-and-thread	PerG	Wide	
Poaceae (Gramineae)	<i>Muhlenbergia filiformis</i>		pullup muhly	AnnG	Wide	
Poaceae (Gramineae)	<i>Poa annua</i>		annual bluegrass	AnnG	Intro	Native to Eurasia and W North America
Poaceae (Gramineae)	<i>Poa juncifolia</i> var. <i>juncifolia</i>	Included in <i>P. secunda</i> by some authors; <i>P. nevadensis</i> var. <i>juncifolia</i>	alkali bluegrass	PerG	Wide	
Poaceae (Gramineae)	<i>Poa palustris</i>		fowl bluegrass	PerG	Wide	
Poaceae (Gramineae)	<i>Poa wheeleri</i>	<i>P. nervosa</i> var. <i>wheeleri</i>	Wheeler bluegrass	PerG	Wide	
Polemoniaceae	<i>Alisciella leptomeria</i>	<i>Gilia leptomeria</i> var. <i>leptomeria</i>	common gilia	AnnF	Wide	
Polemoniaceae	<i>Ipomopsis aggregata</i> var. <i>attenuata</i>	<i>Gilia aggregata</i> var. <i>attenuata</i>	scarlet gilia	PerF	RegEn	
Polemoniaceae	<i>Lathrocasis tenerima</i>	<i>Gilia tenerima</i>	delicate gilia	AnnF	Wide	
Polygonaceae	<i>Eriogonum brevicaule</i> var. <i>micranthum</i>		shortstem wild buckwheat	PerF	RegEn	
Polygonaceae	<i>Eriogonum heracleoides</i>	<i>E. heracleoides</i> var. <i>heracleoides</i>	whorled wild buckwheat	PerF	Spars	
Polygonaceae	<i>Eriogonum umbellatum</i> var. <i>dichrocephalum</i>	Included in var. <i>majus</i> by some authors	sulphur-flower wild buckwheat	PerF	Wide	
Polygonaceae	<i>Polygonum kelloggii</i> var. <i>kelloggii</i>	<i>P. polystachys</i> var. <i>kelloggii</i>	Kellogg's knotweed	AnnF	Wide	
Polygonaceae	<i>Rumex maritimus</i> var. <i>fueginus</i>	<i>R. fueginus</i>	golden dock	AnnF	Wide	

Appendix B. Potential (unconfirmed) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/Taxonomic notes	Common name	Life form	Range	Comments
Polygonaceae	<i>Rumex utahensis</i>	<i>R. salicifolius</i> var. <i>montigenitus</i> , <i>R. salicifolius</i> var. <i>denticulatus</i> , included in <i>R. salicifolius</i> by some authors	Utah dock	PerF	Wide	
Potamogetonaceae	<i>Stuckenia filiformis</i> var. <i>occidentalis</i>	<i>Potamogeton filiformis</i> var. <i>occidentalis</i>	slenderleaf pondweed	PerF	Wide	
Ranunculaceae	<i>Ranunculus macounii</i>		Macoun's buttercup	PerF	Wide	
Rosaceae	<i>Fragaria vesca</i>	<i>F. vesca</i> var. <i>bracteata</i>	woodland strawberry	PerF	Wide	
Rosaceae	<i>Ivesia gordonii</i>		Gordon's ivesia	PerF	Wide	
Rosaceae	<i>Potentilla concinna</i> var. <i>concinna</i>		red cinquefoil	PerF	Wide	
Rosaceae	<i>Potentilla ovina</i> var. <i>ovina</i>		sheep cinquefoil	PerF	Wide	
Rosaceae	<i>Rosa sayi</i>	<i>R. acicularis</i> var. <i>sayi</i>	prickly rose	Shrub	Wide	
Rosaceae	<i>Rubus idaeus</i> var. <i>strigosus</i>	<i>R. idaeus</i> var. <i>aculeatissimus</i> , <i>R. idaeus</i> ssp. <i>melanosius</i>	common red raspberry	Shrub	Wide	
Salicaceae	<i>Salix lasiandra</i> var. <i>caudata</i>	<i>S. lucida</i> ssp. <i>caudata</i>	whiplash willow	Shrub	Wide	
Scrophulariaceae	<i>Castilleja angustifolia</i> var. <i>angustifolia</i>		narrowleaf paintbrush	PerF	Wide	
Scrophulariaceae	<i>Castilleja miniata</i>	Includes <i>C. gracillima</i>	scarlet paintbrush	PerF	Wide	
Scrophulariaceae	<i>Limosella aquatica</i>		mudwort	PerF	Wide	
Scrophulariaceae	<i>Linaria dalmatica</i>	<i>L. genistifolia</i> ssp. <i>dalmatica</i>	Dalmatian toadflax	PerF	Intro	Native to Europe. WY state noxious weed
Scrophulariaceae	<i>Mimulus suksdorffii</i>		Suksdorf's monkeyflower	AnnF	Wide	
Scrophulariaceae	<i>Pedicularis crenulata</i>		purple-flower lousewort	PerF	Wide	
Scrophulariaceae	<i>Penstemon caespitosus</i>	<i>P. caespitosus</i> var. <i>caespitosus</i>	mat penstemmon	PerF	Wide	
Scrophulariaceae	<i>Penstemon fremontii</i>	<i>P. fremontii</i> var. <i>fremontii</i>	Fremont's penstemmon	PerF	RegEn	
Scrophulariaceae	<i>Veronica anagallis-aquatica</i>		water speedwell	PerF	Intro	Native to Europe

The vascular plant species listed here are known from the vicinity of Fossil Butte National Monument in Lincoln County, Wyoming, but have not previously been reported or confirmed for the monument. Species on this list are derived from Fertig (2000), Hartman et al. (1996), Refsal 1996, and the digital Atlas of the Vascular Plants of Wyoming (www.esf.utexas.edu/chumley/wyomap/atlas.htm). Some species from Appendix C could be considered as potentially occurring in the monument, but are not included here.

Appendix C. Rejected (falsely reported or questionable) taxa of Fossil Butte National Monument.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Alliaceae (Liliaceae)	<i>Allium geyeri</i> var. <i>geyeri</i>	Geyer's onion	PerF	Wide	FalsRep	Report from BRY & FOBU herbaria based on misidentified specimens of <i>A. textile</i>	
Amaranthaceae	<i>Amaranthus albus</i>	tumble pigweed	AnnF	Intro	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>Chenopodium glaucum</i> var. <i>salinum</i> . Native to tropical America.	
Apiaceae (Umbelliferae)	<i>Lomatium juniperinum</i>	juniper lomatium	PerF	RegEn	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>L. macrocarpum</i> .	
Apiaceae (Umbelliferae)	<i>Lomatium orientale</i>	oriental desert-parsley	PerF	Wide	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range	
Asteraceae (Compositae)	<i>Antennaria rosulata</i>	Breaks pussytoes	PerF	na	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>A. dimorpha</i> .	
Asteraceae (Compositae)	<i>Arnica latifolia</i> var. <i>latifolia</i>	broadleaf arnica	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>A. cordifolia</i> .	
Asteraceae (Compositae)	<i>Artemisia campestris</i> var. <i>scouleriana</i>	<i>Oligosporus</i> <i>campestris</i> ssp. <i>pacificus</i> , <i>A.</i> <i>campestris</i> ssp. <i>pacifica</i>	sand wormwood	PerF	Wide	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range. Specimen from FOBU herbarium is based on a misidentified specimen of <i>A. biennis</i> var. <i>biennis</i> .
Asteraceae (Compositae)	<i>Artemisia tripartita</i> var. <i>rupicola</i>	three-tip sagebrush	Shrub	RegEn	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range	
Asteraceae (Compositae)	<i>Balsamorhiza incana</i>	hoary balsamroot	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>B. macrophylla</i> .	
Asteraceae (Compositae)	<i>Chaenactis stevioides</i>	stevia dusty-maiden	AnnF	Periph	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>C. douglasii</i> var. <i>montana</i> .	
Asteraceae (Compositae)	<i>Chrysanthemum viscidiflorus</i> ssp. <i>pumilus</i>	Included in var. <i>viscidiflorus</i> by many authors	green rabbitbrush	Shrub	na	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>C. viscidiflorus</i> var. <i>viscidiflorus</i>
Asteraceae (Compositae)	<i>Cirsium scopulorum</i>	<i>C. eatonii</i> var. <i>erioccephalum</i>	carmine thistle	PerF	na	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>C. pulcherrimum</i> .
Asteraceae (Compositae)	<i>Conyza canadensis</i>	<i>C. canadensis</i> var. <i>glabrata</i>	Canadian horseweed	AnnF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>Gnaphalium palustre</i> .

Appendix C. Rejected (falsely reported or questionable) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Asteraceae (Compositae)	<i>Erigeron peregrinus</i> var. <i>scapulus</i>	<i>E. peregrinus</i> var. <i>callianthemus</i> , <i>E.</i> <i>glacialis</i> var. <i>glacialis</i>	wandering fleabane	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>E. speciosus</i> .
Asteraceae (Compositae)	<i>Packera fendleri</i>	<i>Senecio fendleri</i>	Fendler's groundsel	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>P. multiflora</i> .
Asteraceae (Compositae)	<i>Packera streptanthifolia</i> var. <i>borealis</i>	<i>Senecio streptanthifolius</i> var. <i>borealis</i>	boreal cleft-leaved groundsel	PerF	na	FalsRep	Reports from FOBU herbarium based on misidentified specimens of <i>Senecio multiflora</i>
Asteraceae (Compositae)	<i>Senecio rapifolius</i>		turnip-leaf ragwort	PerF	RegEn	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>Packera streptanthifolia</i> var. <i>streptanthifolia</i>
Asteraceae (Compositae)	<i>Senecio sphaerocephalus</i>		ballhead groundsel	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>S. serra</i> var. <i>serra</i> .
Asteraceae (Compositae)	<i>Symphyotrichum eatonii</i>	<i>Aster eatonii</i> , <i>A.</i> <i>bracteolatus</i>	Eaton's aster	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>Aster glaucodes</i> .
Boraginaceae	<i>Cryptantha gracilis</i>		slender cryptanth	AnnF	Periph	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>C. fendleri</i> .
Boraginaceae	<i>Hackelia deflexa</i> var. <i>americana</i>	<i>H. leptophylla</i>	nodding stickseed	PerF	Wide	FalsRep	Reports from FOBU herbarium (as <i>H. leptophylla</i>) are based on misidentified specimens of <i>H. floribunda</i> & <i>H. patens</i> .
Boraginaceae	<i>Mertensia ciliata</i>		streamside bluebell	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>M. oblongifolia</i> .
Brassicaceae	<i>Barbara vulgaris</i>		European wintercress	PerF	Intro	Ques?	Reported by Dorn et al. (1984) and Springer et al. (2006) without a voucher, but Fossil Butte is well outside its known range. Native to Eurasia.
Brassicaceae (Cruciferae)	<i>Cardaria draba</i>	<i>C. draba</i> var. <i>draba</i> , <i>Lepidium draba</i>	whitetop	PerF	Intro	FalsRep	Reports from FOBU herbarium based on misidentified specimens of <i>C. chalepensis</i> and <i>Lepidium densiflorum</i> var. <i>densiflorum</i> . Native to Europe. WY state noxious weed.
Brassicaceae (Cruciferae)	<i>Descurainia pinnata</i> var. <i>osmiarum</i>	<i>D. pinnata</i> ssp. <i>halictorum</i>	western tansy- mustard	AnnF	Wide	FalsRep	Report from Fertig (2000) is based on collections from outside FOBU.
Brassicaceae (Cruciferae)	<i>Physaria didymocarpa</i>	<i>P. didymocarpa</i> var. <i>didymocarpa</i>	common twinpod	PerF	Wide	FalsRep	Reports from FOBU and UW Range herbaria based on misidentified specimens of <i>P. condensata</i> .

Appendix C. Rejected (falsely reported or questionable) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Brassicaceae (Cruciferae)	<i>Thelypodium sagittatum</i>	<i>Thelypodopsis sagittata</i> var. <i>sagittata</i>	arrowhead thelypody	PerF	Sparse	FalsRep	Report from FOBU based on a misidentified specimen of <i>T. paniculatum</i>
Caprifoliaceae	<i>Symporicarpos occidentalis</i>		western snowberry	Shrub	Periph	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>S. oreophilus</i> var. <i>utahensis</i> .
Caryophyllaceae (Aislinaceae)	<i>Cerastium arvense</i>	<i>C. strictum</i> , <i>C. arvense</i> ssp. <i>strictum</i>	field chickweed	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>C. fontanum</i> .
Chenopodiaceae	<i>Atriplex patula</i>		spear orache	AnnF	Periph	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>A. subspicata</i> .
Chenopodiaceae	<i>Atriplex suckleyi</i>	<i>Endolepis dioica</i>	Suckley's saltbush	AnnF	Wide	FalsRep	Report from Fertig (2000) based on misinterpretation of Dorn et al. (1984) report of <i>A. dioica</i> which is a synonym of <i>A. subspicata</i> , not <i>Endolepis dioica</i> [= <i>A. suckleyi</i>].
Chenopodiaceae	<i>Chenopodium album</i>	<i>C. album</i> var. <i>album</i>	lambsquarter	AnnF	Intro	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>C. atrorivens</i> . Native to Eurasia.
Chenopodiaceae	<i>Grayia spinosa</i>	<i>Atriplex spinosa</i> , <i>A. grayi</i>	spiny hop-sage	Shrub	Wide	FalsRep	Report from Fertig (2000) is based on records from outside FOBU.
Crassulaceae	<i>Sedum rhodanthum</i>	<i>Rhodiola rhodantha</i> , <i>Clementisia rhodantha</i>	reddtop stonecrop	PerF	Wide	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range
Euphorbiaceae	<i>Chamaesyce fendleri</i>	<i>Euphorbia fendleri</i>	Fendler's spurge	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>C. glyptosperma</i> .
Fabaceae (Leguminosae)	<i>Astragalus alpinus</i>		alpine milkvetch	PerF	Wide	FalsRep	Reports from FOBU herbarium based on misidentified specimens of <i>A. canadensis</i> var. <i>brevidens</i> and <i>Oxytropis deflexa</i> var. <i>sericea</i> .
Fabaceae (Leguminosae)	<i>Astragalus laxmannii</i> var. <i>robustior</i>	<i>A. adsurgens</i> var. <i>robustior</i>	standing milkvetch	PerF	Wide	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range
Fabaceae (Leguminosae)	<i>Astragalus platytropis</i>		broad-keeled milkvetch	PerF	Periph	Ques?	Report from Beetle & Marlou (1974) probably based on a misidentified specimen of <i>A. jejunus</i> var. <i>jejunus</i> .
Fabaceae (Leguminosae)	<i>Astragalus vexilliflexus</i>		bent-flower milkvetch	PerF	Wide	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range

Appendix C. Rejected (falsely reported or questionable) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Fabaceae (Leguminosae)	<i>Lupinus polyphyllus</i>	hairy bigleaf lupine	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>L. argenteus</i> var. <i>rubricaulis</i>	
Hypericaceae (Guttiferae)	<i>Hypericum formosum</i> var. <i>formosum</i>	<i>H. scouleri</i> ssp. <i>nortoniae</i>	western St. John's-wort	PerF	Wide	FalsRep	Report from Fertig (2000) based on a misidentified specimen of <i>H. formosum</i> var. <i>scouleri</i>
Iridaceae	<i>Sisyrinchium montanum</i>	<i>S. montanum</i> var. <i>montanum</i>	mountain blue-eyed grass	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>S. idahoense</i> var. <i>occidentale</i> .
Juncaceae	<i>Juncus filiformis</i>	thread rush	PerG	Periph	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>J. ensifolius</i> var. <i>montanus</i> (not var. <i>saximontanus</i> as reported in Fertig 2000).	
Juncaceae	<i>Juncus nevadensis</i>	Includes vars. <i>badius</i> & <i>nevadensis</i>	Nevada rush	PerG	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>J. ensifolius</i> var. <i>montanus</i> (not var. <i>saximontanus</i> as reported in Fertig 2000).
Lamiaceae (Labiatae)	<i>Agastache pallidiflora</i>	Bill Williams Mountain giant hyssop	PerF	na	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>A. urticifolia</i> .	
Malvaceae	<i>Malva pusilla</i>	<i>M. rotundifolia</i>	low mallow	AnnF	Intro	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range. Native to Europe.
Malvaceae	<i>Sphaeralcea ambigua</i>	<i>S. ambigua</i> var. <i>ambigua</i>	MoHAVE globemallow	PerF	na	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>S. munroana</i> . <i>S. ambigua</i> is not native to Wyoming.
Onagraceae	<i>Chamerion angustifolium</i> var. <i>angustifolium</i>	<i>Epilobium angustifolium</i> var. <i>angustifolium</i>	narrowleaf fireweed	PerF	Wide	Ques?	Reported for FOBU by Fertig 2000 based on a report from Dorn et al. (1984) that did not include the variety. No vouchers of var. <i>angustifolia</i> have been documented from FOBU, but var. <i>canescens</i> has been collected.
Onagraceae	<i>Epilobium palustre</i> var. <i>palustre</i>	<i>E. palustre</i> var. <i>grammadophyllum</i>	marsh willowherb	PerF	Sparse	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>E. ciliatum</i> var. <i>ciliatum</i>
Onagraceae	<i>Gayophytum ramosissimum</i>	branching groundsmoke	AnnF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>G. diffusum</i> var. <i>strictipes</i> .	

Appendix C. Rejected (falsely reported or questionable) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Oncagraceae	<i>Oenothera elata</i>	<i>O. hookeri</i> , <i>O. elata</i> ssp. <i>hirsutissima</i>	western evening- primrose	PerF	na	FalsRep	Report from FOBU herbarium (under <i>O. hookeri</i>) is based on a misidentified specimen of <i>O. flava</i> .
Orchidaceae	<i>Corallorrhiza trifida</i>		early coralroot	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>C. striata</i> .
Plantaginaceae	<i>Plantago tweedyi</i>		Tweedy's plantain	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>P. eriopoda</i> .
Poaceae (Gramineae)	<i>Elymus trachycaulus</i> var. <i>andinus</i>	<i>Agropyron caninum</i> var. <i>andinum</i> . Considered a hybrid between <i>E.</i> <i>trachycaulus</i> and <i>E. scribnieri</i> in FNA (2007).	slender wildrye	PerG	Wide	Ques?	Report in Fertig 2000 was incorrectly based on Dorn et al. 1984 citation of <i>Agropyron</i> <i>caninum</i> (without variety). The Dorn et al. 1984 report is now considered to represent <i>Elymus trachycaulus</i> var. <i>trachycaulus</i> rather than var. <i>andinus</i> .
Poaceae (Gramineae)	<i>Nassella viridula</i>	<i>Stipa viridula</i>	green needlegrass	PerG	Wide	Ques?	Reported by Beetle & Marlou (1974) and Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range
Poaceae (Gramineae)	<i>Poa glauccifolia</i>	Included in <i>P. arida</i> by some authors	pale-leaf bluegrass	PerG	Wide	FalsRep	Reports from Dorn et al. (1984) and FOBU herbarium are based on misidentified specimens of <i>P. arida</i> .
Polemoniaceae	<i>Linanthus caespitosus</i>	<i>Leptodactylon</i> <i>caespitosum</i>	matted prickly-phlox	PerF	Sparse	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>Phlox hoodii</i> .
Polygonaceae	<i>Eriogonum flavum</i> var. <i>flavum</i>		yellow wild buckwheat	PerF	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>E. brevicaule</i> var. <i>laxifolium</i> .
Polygonaceae	<i>Eriogonum</i> <i>microthecum</i> var. <i>effusum</i>	<i>E. effusum</i>	spreading wild buckwheat	Shrub	Wide	Ques?	Report from Beetle & Marlou (1974) probably based on a misidentified specimen of <i>E. microthecum</i> var. <i>laxifolium</i> .
Potamogetonaceae	<i>Potamogeton pusillus</i> var. <i>pusillus</i>		dwarf pondweed	PerF	Wide	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range
Ranunculaceae	<i>Clematis hirsutissima</i> var. <i>scottii</i>		sugar-bowls	PerF	na	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>Clematis</i> <i>hirsutissima</i> (without variety)
Ranunculaceae	<i>Ranunculus</i> <i>hyperboreus</i>	<i>R. natans</i> var. <i>intertextus</i> , <i>R.</i> <i>hyperboreus</i> var. <i>intertextus</i>	floating buttercup	PerF	Periph	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>R. sceleratus</i> var. <i>multifidus</i> .

Appendix C. Rejected (falsely reported or questionable) taxa of Fossil Butte National Monument, cont.

Family	Species name	Synonyms/ Taxonomic notes	Common name	Life form	Range	Park status	Comments
Ranunculaceae (Thalictroaceae)	<i>Thalictrum venulosum</i>	veiny-leaf meadow- rue		PerF	Wide	Ques?	Reported by Dorn et al. (1984) without a voucher, but Fossil Butte is well outside its known range. Reports from FOBU herbarium are based on misidentified specimens of <i>T. occidentale</i> .
Salicaceae	<i>Populus deltoides</i> var. <i>occidentalis</i>	<i>P. deltoides</i> ssp. <i>monilifera</i>	plains cottonwood	Tree	Wide	Ques?	Reported by Beetle and Marlow (1974) without a voucher, but Fossil Butte is well outside its known range. Report may have been based on a cultivated individual that has since died. State tree of Wyoming.
Salicaceae	<i>Salix lemmontii</i>		Lemmon's willow	Shrub	Wide	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>S. geyeriana</i>
Scrophulariaceae	<i>Penstemon</i> <i>attenuatus</i> var. <i>pseudoprocerus</i>		sulphur beardtongue	PerF	RegEn	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>P. radicosus</i> .
Scrophulariaceae	<i>Penstemon saxosorum</i>		upland beardtongue	PerF	RegEn	FalsRep	Report from FOBU herbarium based on a misidentified specimen of <i>P. cyananthus</i> .
Violaceae	<i>Viola nuttallii</i>	<i>V. nuttallii</i> var. <i>major</i>	yellow prairie violet	PerF	Wide	Ques?	Reported by Beetle and Marlow (1974) without a voucher, but Fossil Butte is well outside its known range

The vascular plant species listed here have been reported for Fossil Butte NM from published and unpublished literature (Beetle and Marlow 1974, Dorn et al. 1984) or from herbarium specimens, but are now believed to be erroneous because of misidentifications (False Reports or FalsRep) or because the monument is well outside the known or expected range of the species (Questionable or Ques?).

Appendix D. Confirmed, historical, and reported taxa of Fossil Butte National Monument, organized by life form with ecological notes.

Brassicaceae (Cruciferae)	<i>Erysimum cheiranthoides</i>	worm-seed wallflower	Native	Pres	Jun–Aug				X	
Brassicaceae (Cruciferae)	<i>Erysimum inconspicuum</i>	shy wallflower	Native	Pres	Apr–Jul	X				
Brassicaceae (Cruciferae)	<i>Lepidium integrifolium</i>	entire-leaf pepperwort	Native	Pres	Jun–Aug	X				Alkaline soils
Brassicaceae (Cruciferae)	<i>Lesquerella alpina</i>	alpine bladderpod	Native	Pres	May–Jul	X			X	Barren sites
Brassicaceae (Cruciferae)	<i>Physaria acutifolia</i>	sharp-leaf twinpod	Native	Pres	May–Jul	X				
Brassicaceae (Cruciferae)	<i>Physaria densata</i>	tufted twinpod	Native	Pres	May–Jun	X				Barren sites
Brassicaceae (Cruciferae)	<i>Rorippa curvipes</i> var. <i>curvipes</i>	blunt-leaf yellowcress	Native	Pres	May–Aug			X	X	
Brassicaceae (Cruciferae)	<i>Schoenocrambe linifolia</i>	flax-leaved plainsmustard	Native	Pres	Apr–Jul	X				
Brassicaceae (Cruciferae)	<i>Stanleya viridiflora</i>	green prince's-plume	Native	Pres	May–Aug	X				Barren sites
Brassicaceae (Cruciferae)	<i>Streptanthus cordatus</i>	heart-leaf jewelflower	Native	Pres	Apr–Jul	X	X			
Brassicaceae (Cruciferae)	<i>Thelypodium integrifolium</i>	entire-leaf thelypody	Native	Pres	Jun–Sep	X			X	
Brassicaceae (Cruciferae)	<i>Thelypodium paniculatum</i>	northwestern thelypody	Native	Pres	Jun–Aug				X	
Cactaceae	<i>Opuntia polyacantha</i> var. <i>polyacantha</i>	plains prickly pear	Native	Pres	May–Jun	X				
Calochortaceae (Liliaceae)	<i>Calochortus nuttallii</i>	segov-lily	Native	Pres	Jun–Jul	X				
Caryophyllaceae (Alysinaceae)	<i>Cerastium fontanum</i>	mouse-ear chickweed	Intro	Pres	Apr–Sep	X				
Caryophyllaceae (Alysinaceae)	<i>Eremogene congesta</i> var. <i>congesta</i>	ball-head sandwort	Native	Pres	May–Aug	X				
Caryophyllaceae (Alysinaceae)	<i>Eremogene kingii</i> var. <i>glabrescens</i>	basin sandwort	Native	Pres	May–Aug	X				

Appendix D. Confirmed, historical, and reported taxa of Fossil Butte National Monument, organized by life form with ecological notes, cont.

Family	Species name	Common name	Nativity	Park status	Flower time	Sage/Grs	MIX Con	Asp	Wet	Comments
<i>Perennial/Forbs, cont.</i>										
Caryophyllaceae (Aisinaeae)	<i>Minuartia nuttallii</i>	Nuttall's sandwort	Native	Pres	May–Aug					Barren sites
Caryophyllaceae (Aisinaeae)	<i>Moehringia lateriflora</i>	blunt-leaf sandwort	Native	Pres	Apr–Aug				X	
Caryophyllaceae (Aisinaeae)	<i>Pseudostellaria jamesiana</i>	James' chickweed	Native	Rep	Jun–Aug				X	
Caryophyllaceae	<i>Silene drummondii</i>	Drummond's catchfly	Native	Pres	May–Sep	X				
Caryophyllaceae	<i>Silene menziesii</i> var. <i>menziesii</i>	Menzies' campion	Native	Pres	Jun–Aug			X		
Caryophyllaceae (Aisinaeae)	<i>Stellaria longipes</i>	long-stalk starwort	Native	Pres	May–Aug	X		X		
Convallariaceae (Liliaceae)	<i>Maianthemum canadense</i> var. <i>amplexicaule</i>	false Solomon's-seal	Native	Pres	Jun–Jul			X		
Convallariaceae (Liliaceae)	<i>Maianthemum stellatum</i>	starry false Solomon's-seal	Native	Pres	Apr–Jun	X	X	X		Disturbed areas
Convolvulaceae	<i>Convolvulus arvensis</i>	field bindweed	Intro	Pres	Jun–Aug	X				
Convolvulaceae (Cuscutaceae)	<i>Cuscuta occidentalis</i>	chaparral dodder	Native	Pres	May–Aug	X				
Crassulaceae	<i>Sedum lanceolatum</i>	lance-leaved stonewort	Native	Pres	Jun–Aug	X				
Ericaceae (Pyrolaceae)	<i>Pyrola asarifolia</i>	pink wintergreen	Native	Pres	Jun–Aug			X		
Fabaceae (Leguminosae)	<i>Astragalus agrestis</i>	field milkvetch	Native	Pres	May–Aug	X		X		
Fabaceae (Leguminosae)	<i>Astragalus argophyllum</i> var. <i>argophyllum</i>	silver-leaved milkvetch	Native	Pres	Apr–Jun			X		
Fabaceae (Leguminosae)	<i>Astragalus bisulcatus</i> var. <i>bisulcatus</i>	two-grooved milkvetch	Native	Pres	May–Aug	X				Barren sites
Fabaceae (Leguminosae)	<i>Astragalus bisulcatus</i> var. <i>major</i>	two-grooved milkvetch	Native	Pres	May–Aug	X				Barren sites
Fabaceae (Leguminosae)	<i>Astragalus canadensis</i> var. <i>brevidens</i>	pasture milkvetch	Native	Pres	May–Sep			X	X	
Fabaceae (Leguminosae)	<i>Astragalus cicer</i>	chickpea milkvetch	Intro	Pres	May–Aug	X				Disturbed areas
Fabaceae (Leguminosae)	<i>Astragalus convallarius</i>	lesser rushy milkvetch	Native	Pres	May–Aug	X

Brassicaceae (Cruciferae)	<i>Lepidium campestre</i>	field pepperwort	Intro	Pres	May–Jul	X				Disturbed areas
Brassicaceae (Cruciferae)	<i>Lepidium densiflorum</i> var. <i>densiflorum</i>	prairie pepperwort	Native	Pres	May–Jul	X				Disturbed areas
Brassicaceae (Cruciferae)	<i>Lepidium perfoliatum</i>	clasping pepperwort	Intro	Pres	May–Jul	X				Disturbed areas
Brassicaceae (Cruciferae)	<i>Lepidium ramosissimum</i> var. <i>ramosissimum</i>	branched pepperwort	Native	Pres	Apr–Aug			X		
Brassicaceae (Cruciferae)	<i>Lepidium virginicum</i> var. <i>pubescens</i>	poorman's pepperwort	Native	Pres	Apr–Aug	X				Disturbed areas

Appendix D. Confirmed, historical, and reported taxa of Fossil Butte National Monument, organized by life form with ecological notes, cont.

Family	Species name	Common name	Nativity	Park status	Flower time	Sage/Grss	MIX Con	Asp	Wet	Comments
<i>Annual Forbs, cont.</i>										
Brassicaceae (Cruciferae)	<i>Malcolmia africana</i>	African mustard	Intro	Pres	Apr–Jul	X				Disturbed areas
Brassicaceae (Cruciferae)	<i>Sisymbrium altissimum</i>	tumble mustard	Intro	Pres	May–Aug	X				Disturbed areas
Brassicaceae (Cruciferae)	<i>Thlaspi arvense</i>	field pennycress	Intro	Pres	May–Aug	X				Disturbed areas
Capparaceae (Cleomaceae)	<i>Cleome serrulata</i>	Rocky Mountain beeplant	Native	Pres	May–Oct	X				Disturbed areas
Chenopodiaceae	<i>Atriplex rosea</i>	tumbling orache	Intro	Pres	Jul–Sep	X				Barren sites
Chenopodiaceae	<i>Atriplex subspicata</i>	thickleaf orache	Native	Pres	Jun–Sep	X		X		Barren sites
Chenopodiaceae	<i>Atriplex truncata</i>	wedge-leaf orache	Native	Pres	Jun–Sep	X				Alkaline soils
Chenopodiaceae	<i>Bassia sieversiana</i>	summer-cypress	Intro	Pres	Aug–Oct	X				Disturbed areas
Chenopodiaceae	<i>Chenopodium atrorivens</i>	mountain goosefoot	Native	Pres	Jul–Sep	X				Disturbed areas
Chenopodiaceae	<i>Chenopodium berlandieri</i> var. <i>zschackei</i>	pitseed goosefoot	Native	Pres	Jul–Sep	X				Disturbed areas
Chenopodiaceae	<i>Chenopodium capitatum</i> var. <i>parvicapitatum</i>	smallhead goosefoot	Native	Pres	Jun–Sep			X		
Chenopodiaceae	<i>Chenopodium fremontii</i>	Fremont's goosefoot	Native	Pres	Aug–Oct	X				
Chenopodiaceae	<i>Chenopodium glaucum</i> var. <i>salinum</i>	oakleaf goosefoot	Native	Pres	Aug–Sep			X		
Chenopodiaceae	<i>Chenopodium leptophyllum</i>	narrow-leaf goosefoot	Native	Pres	Jul–Sep		X			
Chenopodiaceae	<i>Chenopodium rubrum</i> var. <i>glomeratum</i>	low goosefoot	Native	Pres	Jun–Aug					
Chenopodiaceae	<i>Halopeplis glomeratus</i>	halogeton	Intro	Pres	Jul–Aug	X				Disturbed areas
Chenopodiaceae	<i>Monolepis nuttalliana</i>	Nuttall's poverty-weed	Native	Pres	Apr–Jul	X				Disturbed areas
Chenopodiaceae	<i>Salsola tragus</i>	Russian-thistle	Intro	Pres	Jun–Sep	X				Disturbed areas
Chenopodiaceae	<i>Suaeda calceoliformis</i>	broom seepweed	Native	Pres	Jul–Sep	X				Alkaline soils
Euphorbiaceae	<i>Chamaesyce glyptosperma</i>	ridge-seeded spurge	Native	Pres	Jun–Aug	X				
Euphorbiaceae	<i>Chamaesyce serpyllifolia</i>	thyme-leaved spurge	Native	Pres	May–Sep	X				Disturbed areas
Fabaceae (Leguminosae)	<i>Medicago lupulina</i>	black medick	Intro	Pres	May–Oct	X				Disturbed areas
Fabaceae (Leguminosae)	<i>Melilotus albus</i>	white sweet-clover	Intro	Pres	May–Oct	X				Disturbed areas

Appendix D. Confirmed, historical, and reported taxa of Fossil Butte National Monument, organized by life form with ecological notes, cont.

Family	Species name	Common name	Nativity	Park status	Flower time	Sage/Grs	MIX Con	Asp	Wet	Comments
<i>Annual/Forbs, cont.</i>										
Geraniaceae	<i>Erodium cicutarium</i>	stork's-bill	Intro	Pres	Feb–Oct	X				Disturbed areas
Hydrophyllaceae	<i>Nemophila breviflora</i>	Great Basin nemophila	Native	Pres	Apr–Jul	X		X		
Limnanthaceae	<i>Floerkea proserpinacoides</i>	false mermaid	Native	Pres	Apr–Aug	X	X	X		
Onagraceae	<i>Epilobium brachycarpum</i>	autumn willow-herb	Native	Pres	Jul–Sep	X		X		Disturbed areas
Onagraceae	<i>Gayophytum diffusum</i> var. <i>strictipes</i>	diffuse groundsmoke	Native	Pres	May–Aug	X				
Onagraceae	<i>Gayophytum racemosum</i>	raceme groundsmoke	Native	Rep	May–Aug	X				
Polemoniaceae	<i>Collomia linearis</i>	small collomia	Native	Pres	May–Aug	X				
Polemoniaceae	<i>Leptosiphon septentrionalis</i>	northern linanthus	Native	Pres	May–Aug	X				
Polemoniaceae	<i>Microsteris gracilis</i> var. <i>humilior</i>	slender phlox	Native	Pres	Mar–Jun	X				
Polemoniaceae	<i>Navarretia breweri</i>	yellow navarretia	Native	Pres	May–Jul	X				
Polemoniaceae	<i>Navarretia intertexta</i> var. <i>propinqua</i>	Great Basin navarretia	Native	Pres	Jun–Aug	X				
Polygonaceae	<i>Eriogonum cernuum</i>	matted wild buckwheat	Native	Pres	Apr–Oct	X				Disturbed areas
Polygonaceae	<i>Polygonum aviculare</i>	yard knotweed	Intro	Pres	May–Oct	X		X		Disturbed areas
Polygonaceae	<i>Polygonum douglasii</i> var. <i>douglasii</i>	Douglas' knotweed	Native	Pres	Jun–Oct	X		X		
Polygonaceae	<i>Polygonum sawatchense</i>	Sawatch knotweed	Native	Pres	Jun–Aug			X		
Polygonaceae	<i>Stenogonium salignumosum</i>	smooth wild buckwheat	Native	Pres	Apr–Sep					Barren sites
Primulaceae	<i>Androsace septentrionalis</i> var. <i>subulifera</i>	pygmy-flower rock-jasmine	Native	Pres	May–Aug	X		X		
Ranunculaceae	<i>Myosurus apetalus</i> var. <i>montanus</i>	bristly mouse-tail	Native	Pres	Apr–Aug			X		
Ranunculaceae	<i>Ranunculus sceleratus</i> var. <i>multifidus</i>	blistер buttercup	Native	Pres	May–Sep			X		
Ranunculaceae	<i>Ranunculus testiculatus</i>	bur buttercup	Intro	Pres	Apr–Jun	X				Disturbed areas
Rosaceae	<i>Potentilla biennis</i>	biennial cinquefoil	Native	Pres	May–Aug	X		X		Disturbed areas
Rubiaceae	<i>Galium bifolium</i>	twin-leaf bedstraw	Native	Pres	May–Aug	X		X		
Scrophulariaceae	<i>Collinsia parviflora</i>	blue-eyed Mary	Native	Pres	Apr–Jun	X	X	X		
Scrophulariaceae	<i>Cordylanthus ramosus</i>	bushy bird's-beak	Native	Pres	Jun–Aug	X				
Scrophulariaceae	<i>Orthocarpus luteus</i>	yellow owl-clover	Native	Pres	Jul–Aug			X		
Scrophulariaceae	<i>Orthocarpus tolmiei</i>	Tolmie's owl-clover	Native	Pres	Jul–Sep			X		

Appendix D. Confirmed, historical, and reported taxa of Fossil Butte National Monument, organized by life form with ecological notes, cont.

Family	Species name	Common name	Nativity	Park status	Flower time	Sage/Grss	MIX Con	Asp	Wet	Comments
<i>Annual Forbs, cont.</i>										
Scrophulariaceae	<i>Veronica biloba</i>	two-lobe speedwell	Intro	Pres	May–Jun	X		X		
Solanaceae	<i>Hyoscyamus niger</i>	black henbane	Intro	Pres	Jun–Aug	X				Disturbed areas
Solanaceae	<i>Nicotiana attenuata</i>	coyote tobacco	Native	Pres	Jun–Sep	X				Burned area
Solanaceae	<i>Solanum triflorum</i>	cut-leaf nightshade	Native	Pres	May–Sep	X				Disturbed areas
Perennial Graminoids										
Cyperaceae	<i>Carex aquatilis</i>	water sedge	Native	Pres	Jun–Aug					X
Cyperaceae	<i>Carex athrostachya</i>	slender-beaked sedge	Native	Pres	May–Aug					X
