

# 2004 Statistics on Philippine Protected Areas and Wildlife Resources

Department of Environment and Natural Resources  
**PROTECTED AREAS AND WILDLIFE BUREAU**

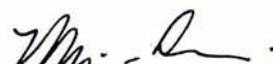

## FOREWORD

The publication of Statistics on Protected Areas and Wildlife Resources is a continuing activity of the Protected Areas and Wildlife Bureau in order to provide timely and accurate statistical information on protected areas and wildlife resources essential to planning, policy formulation and decision-making. It represents basic and updated information provided by the DENR Field Offices and other operating units of the Bureau.

The information contained in the CY 2004 edition are represented in three (3) parts. Part I covers the statistics on protected areas both for the initial components and newly proclaimed protected areas under NIPAS; Part II comprises the information on wildlife resources; and Part III deals with Trade and Revenues on the transportation and exportation of wildlife resources as well as the income generated from the entrance and use of park facilities and amenities.

It is hoped that the information contained in this publication will be of use to the general public, particularly those who are interested in the conservation of biodiversity in the Philippines.

We wish to thank all the officials and employees of the DENR Field Offices and other individuals who extended their support in order to make the publication of this statistical report possible.

**THERESA MUNDITA S. LIM**  
Director

## SYNOPSIS

### PROTECTED AREAS

Pursuant to Republic Act 7586 otherwise known as the National Integrated Protected Areas System (NIPAS) Act of 1992, protected areas shall be established to maintain essential ecological processes and life-support systems, to preserve genetic diversity, to ensure the sustainable use of resources found therein, and to maintain their natural conditions to the greatest extent possible. This Act also designated those areas which were proclaimed by law, presidential decree, proclamation or executive order as national park, game refuge, bird and wildlife sanctuary, wilderness area, strict nature reserve, watershed, mangrove reserve, fish sanctuary, natural and historical landmark, protected and managed landscape/seascape as well as identified virgin forests before the effectivity of the NIPAS Act as initial components of the System.

There are a total of **209** sites comprising the initial components consisting of around 2.5 million hectares (Table 1.2). The law requires that these areas be assessed and if found still suitable for biodiversity conservation shall be established as protected areas under the NIPAS. Otherwise, these areas may be disestablished and placed under a different management regime in accordance with other existing laws.

Among the 209 sites identified as initial components of NIPAS, **65** were proclaimed as protected areas under the System covering about 1.9 million hectares. In addition to the initial components, there were **34** sites newly established as protected areas with a total area of 1.5 million hectares. These areas are reported here as additional sites.

To date, a total of **99** protected areas with an aggregate area of 2.9 million hectares were already proclaimed under the NIPAS (Table 1.3). There are still a number of areas being assessed and proposed for proclamation.

### WILDLIFE RESOURCES

The Philippines is considered as one of the 17 megadiversity countries in the world. In 1999, we were also identified as one of the 25 global hotspots, ranking 3rd for threatened birds and 8th for threatened mammals. Studies, however, show that on a per unit area basis, the Philippines is the top megadiversity country and the hottest of the hotspots. The conservation and sustainable use of our wildlife resources are therefore of extreme importance and need the support of everyone.

In this report, the lists of Philippine birds and mammals and their geographic distribution are shown in Tables 2.4 and 2.5, respectively. Likewise, we will find here the Philippine wildlife species included in the Appendices of the Convention on International Trade in

Endangered Species of Wild Fauna and Flora (CITES), and the National Red List. We have also shown in Tables 2.6 and 2.7 the partial lists of the pet shops and plant stalls found in the country, and the accredited wildlife facilities, respectively.

The Philippines is one of the signatories of the CITES, a multilateral environmental agreement which regulates the international trade of plants and animals through a system of permits. The plant and animal species are subject to different degrees of regulation as listed in Appendices I, II or III of the CITES. Species listed under Appendix I are those threatened with extinction and for which trade must be subject to particularly strict regulation and may only be authorized in exceptional circumstances. To date, a total of **27** Philippine wildlife species are listed under CITES Appendix I (Table 2.1). This consists of twenty-four (26) animal species and only one (1) plant species (*Paphiopedilum spp.*).

Appendix II, on the other hand, includes species that are not necessarily now threatened with extinction but may become so unless trade in them is strictly regulated. A total of one hundred twenty-two (**116**) species of wildlife consisting of 100 animal species and 16 species of plants as well as all species of orchids (except *Paphiopedilum spp.*) and all species of tree ferns are listed under CITES Appendix II (Table 2.2).

The National List of Threatened Fauna as shown in Table 2.3 includes species which are presently considered as threatened. There are **146** species in the list composed of 33 species of mammals, 80 species of birds, 18 species of reptiles and 15 species of amphibians.

## **WILDLIFE TRADE, PARK VISITORS AND REVENUES**

The enactment of Republic Act 9147 or the Wildlife Act of 2001 has tremendously decreased the illegal collection and trade of our wildlife resources. A total of **2,803** head of illegally collected and traded wildlife were confiscated in Metro Manila (Table 3.1) by the DENR Wildlife Monitoring Team. On the other hand, a total of **313** head of wildlife have been donated or turned over to the Wildlife Rescue and Rehabilitation Center of the Protected Areas and Wildlife Bureau. There has been a decrease of **3,353** head of wildlife or 82% compared to last year's record of confiscation. Likewise, confiscated/donated wildlife and its by-products by regions is also shown in Table 3.3.

A total of **3,812** local transport permits for the movement of wildlife within the country were issued by the DENR Regional Offices. A total of **366,755** pcs. of flora and fauna were transported to the different parts of the country under said permits (Table 3.9). DENR Region XI in Davao City recorded the highest number of transport permits issued for the year, that is a total of **2,862** permits, all of which covering the transport of orchids alone. The total revenue generated from the issuance of local transport permits based on regional reports is **PhP 248,980.00** (Table 3.11).

In 2004, PAWB as the CITES Management Authority for terrestrial species issued a total of **2,441** CITES Permits and Non-CITES Permits. This generated a total revenue of **PhP 3,655,699.51**. The amount of PhP 2,930,240.04 was generated from the issuance of

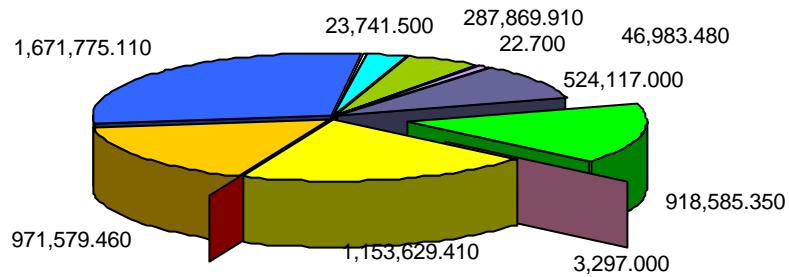

CITES Permits while the amount of PhP 725,459.47 was derived from the issuance of Non- CITES permits. An average income of PhP5.7 Million was generated for the last ten years and is shown in Table 3.17

The different protected areas established under the NIPAS and the Ninoy Aquino Parks and Wildlife Center which is presently being administered by PAWB had been frequented by a number of visitors consisting of local and foreign tourists that have generated some revenues for these areas. Statistical reports from the DENR Regional Offices and PAWB showed a total of **627,349** park visitors and promenaders that generated a total income of **PhP 13,752,112.07**. The Ninoy Aquino Parks and Wildlife Center (NAPWC) in Quezon City and the Hinulugang Taktak National Park (HTNP) in Antipolo City were recorded to have the most number of visitors for the year. NAPWC has recorded a total of **401,182** park visitors while HTNP had **83,431** visitors. In terms of revenues generated, NAPWC collected a total of **PhP3,525,788.00** while HTNP was able to collect a total of **PhP1,407,911.00**. The revenues were derived from entrance fees and fees for the use of park facilities and amenities.

A comparison on the number of park visitors and income generated at the NAPWC for a 10-year period, that is from 1995-2004, is shown in Table 3.7. The highest number of park visitors and income generated was recorded both in 2002 (Table 3.7). In the case of HTNP, the highest number of park visitor and income generated was recorded both in 2004. This has been attributed to increase in collection of fees for the use of park facilities.

# **PROTECTED AREAS**

## SUMMARY OF PROTECTED AREAS IN THE PHILIPPINES

- |  |                                  |

			<i>T. r. cotabato</i>	E	Mindanao, and Sanga Sanga; subsp. Batan.
		Black-necked Grebe	<i>Podiceps nigricollis nigricollis</i>	M	Luzon
Procellariiformes	Procellariidae	Tahiti Petrel	<i>Pterodroma rostrata rostrata</i>	A	Luzon and Negros
		Dark-rumped Petrel	<i>Pterodroma phaeopygia sandwichensis</i>	A	Negros
		Kermadec Petrel	<i>Pterodroma neglecta neglecta</i>	A	Luzon
		Bonin Petrel	<i>Pterodroma hypoleuca</i>	A	Luzon
		Bulwer's Petrel	<i>Bulweria bulwerii</i>	A	Palawan
		Wedge-tailed Shearwater	<i>Puffinus pacificus</i>	A	Catanduanes, Leyte, Luzon, Mindanao, and Samar
		Streaked Shearwater	<i>Calonectris leucomelas</i>	M	Basilan, Batan, Luzon, Mindanao, Negros, Pamilacan, East of Samar, and Sulu
Pelecaniformes	Phaethontidae	Red-tailed Tropicbird	<i>Phaethon rubricauda melanorhynchos</i>	A	Bucas Grande and Luzon
		White-tailed Tropicbird	<i>Phaethon lepturus dorotheae</i>	A	Negros and Sarangani
	Pelecanidae	Spot-billed Pelican	<i>Pelecanus philippensis philippensis</i>	R?/M?	Luzon and Mindanao
	Phalacrocoracidae	Great Cormorant	<i>Phalacrocorax carbo sinensis</i>	M	Batan, Calayan, Luzon, and Ticao
	Anhingidae	Darter	<i>Anhinga melanogaster melanogaster</i>	R	Luzon, Mindanao, Mindoro, Negros, and Palawan
	Sulidae	Masked Booby	<i>Sula dactylatra personata</i>	R	North Islet of Tubbataha Reefs
		Red-footed Booby	<i>Sula sula rubripes</i>	R	Bancoran, Cagayancillo, Cavilli, Kalusa, Luzon, Maender Reef, Manuc Manukan, Mindanao, Negros, Panay, Palawan, South Islet of Tubbataha Reefs, and throughout Sulu Sea
		Brown Booby	<i>Sula leucogaster plotus</i>	R	Arena, Bancoran, Batan, Calayan, Corregidor, Didicas Rocks, Dinagat, Jessie Beazley Reef, Kanipan Bank, Luzon, Manuc Manukan, Mindanao, Maender Reef, Negros, Samar, the North and South Islets of Tubbataha Reefs, and widespread in the Sulu Archipelago
	Fregatidae	Great Frigatebird	<i>Fregata minor minor</i>	R	Arena, Bancoran, Batbatan, Cagayancillo, Cavilli, Luzon, Maender Reef, Manuc Manukan, Panay, Pamilacan, Negros, Sanga Sanga, Simunul, Tawi-tawi, North and South Islets of Tubbataha Reefs, and Ursula.

## **Comparison of Government Revenues from Wildlife Export: 1995 – 2004 (CITES and Non-CITES)**

## GLOSSARY

<b>AMPHIBIANS</b>	A group of vertebrate animals which include toads, frogs, caecilians and salamanders. They are characterized by having smooth, moist, scaleless skin. The young breathe through the gills while the adults breathe through the lungs.
<b>AREA</b>	Refers to the total area applied/titled under one particular public land application
<b>AVES</b>	A class of vertebrate whose members are characterized by having feathers as a body covering, forelimbs modified into wings and unique respiratory system.
<b>BIRDS</b>	Group of animals representing class aves (see AVES).
<b>BY-PRODUCT or DERIVATIVES</b>	Any part taken or substance extracted from wildlife, in raw or in processed form. This includes stuffed animals and herbarium specimens
<b>CAVES</b>	Any naturally occurring void, cavity, recess or system of interconnected passages beneath the surface of the earth or within a cliff or ledge which is large enough to permit an individual to enter, whether or not the entrance, located either in private or public land, is naturally formed or man made. It shall include any natural pit, sinkhole or other feature which is an extension of the entrance. The term also includes cave resources therein, but not any vug, mine tunnel, aqueduct or other man-made excavation
<b>CITES</b>	An acronym for the Convention on International Trade in Endangered Species of Wild Fauna and Flora. It is an international treaty ratified by the Philippine Government purposely to regulate, control and prohibit the trade of wildlife.
<b>CITES APPENDIX I</b>	Trade species and sub-species of wildlife listed under this Appendix is strictly prohibited except for educational, scientific or research and study purposes
<b>CITES APPENDIX II</b>	Trade species and subspecies of wildlife listed under this Appendix is strictly regulated
<b>COMMON NAME</b>	Vernacular name of animal or plant species
<b>CONSERVATION DEPENDENT</b>	Taxa which are the focus of a continuing taxon-specific or habitat-specific conservation programme targeted towards the taxon in question, the cessation of which would result in the taxon qualifying for one of the threatened categories within a period of five years
<b>CONSERVATION STATUS</b>	The sum of the influences acting on species that affect its long-term distribution and abundance.
<b>CRITICALLY ENDANGERED</b>	A taxon that is facing an extremely high risk of extinction in the wild in the immediate future
<b>DATA DEFICIENT</b>	Taxon where there is inadequate information to make a direct, or indirect, assessment of its risk of extinction based on its distribution and/or population status
<b>DONATION</b>	Refers to act of liberality whereby a party disposes an animal or animals in favor of another party who accepts it
<b>ENDANGERED</b>	A taxon that is not Critically Endangered but is facing a very high risk of extinction in the wild in the near future
<b>ENDEMIC</b>	Native to and restricted to a specific geographic area.
<b>ENTRANCE FEES</b>	A fee or amount to be imposed upon entrance to any place national park and other protected area
<b>EXTINCT</b>	A taxon where there is no reasonable doubt that its last individual has died.

<b>GAME REFUGE AND BIRD SANCTUARY</b>	Refers to a forest land designated for the protection of game animals and fish, and closed to hunting and fishing in order that the excess population may flow and restock surrounding areas
<b>INSECTS</b>	These are segmented, bilaterally symmetrical animals possessing a hard, chitinous exoskeleton and pairs of jointed appendages. They are distinguished from their relatives by the presence of three body divisions – head, thorax, abdomen; the thorax being three pairs of legs and usually two pairs of wings in the adult stage
<b>INDETERMINATE</b>	Species and subspecies of wildlife whose populations are suspected of belonging to either one of the E, V and R categories but for which insufficient information is currently available to determine definite status
<b>LEAST CONCERN</b>	Taxa which do not qualify for Conservation Dependent or Near Threatened
<b>LOCATION</b>	Refers to the name of barangay/municipality/city and province where the activity is being implemented
<b>LOWER RISK</b>	A taxon when evaluated does not satisfy the criteria for any of the categories Critically Endangered, Endangered or Vulnerable.
<b>MAMMALS</b>	A group of vertebrate animals which possesses mammary glands that produce milk to feed the young. Other distinguishing characteristics of mammals are the possession of hairs. Majority bears their young alive
<b>MANGROVE</b>	It is a term applied to the type of forest occurring on flats along the sea coast, extending along streams where the water is brackish
<b>MARINE PARK</b>	Any off-shore area inhabited by rare, unique species of marine flora and fauna
<b>MIGRANT</b>	Species that winter in the Philippines on a seasonal basis or those that cross transboundaries on several states.
<b>NATIONAL PARK</b>	Refers to a forest reservation essentially of natural wilderness character which has been withdrawn from settlement or occupancy and set aside as such exclusively to preserve the scenery, the natural and historic objects and the wild animals or plants therein, and to provide enjoyment of these features in such a manner as will leave them unimpaired for future generations
<b>NATIONAL INTEGRATED PROTECTED AREAS SYSTEM (NIPAS)</b>	The classification and administration of all designated protected areas to maintain essential ecological processes and life-support systems, to preserve genetic diversity, to ensure sustainable use of resources found therein, and to maintain their natural conditions to the greatest extent possible
<b>NATURAL BIOTIC AREA</b>	An area set aside to allow the way of life societies living in harmony with the environment to adapt modern technology at their pace
<b>NATURAL MONUMENT/ LANDMARK</b>	A relatively small area focused on protection of small features to protect or reserve nationally significant natural features on account of their special interest or unique characteristics
<b>NATURAL PARK</b>	A relatively large area not materially altered by human activity where extractive resource uses are not allowed and maintained to protect outstanding natural and scenic areas of national or international significance for scientific, educational and recreational use
<b>NEAR THREATENED</b>	Taxa which do not qualify for Conservation Dependent, but which are close to qualifying for Vulnerable
<b>ORCHIDS</b>	Either epiphytic, terrestrial or saprophytic perennial herbs with unique floral arrangements and peculiar floral growth

<b>PERMIT</b>	A short term privilege or authority granted by the state to a person to utilize any limited forest resources or undertaken a limited activity within forest land without any right of occupation and possession therein.
<b>PROTECTED AREAS</b>	Refers to identified portions of land and water set aside by reason of their unique physical and biological significance, managed to enhance biological diversity and protected against destructive human exploitation
<b>PROTECTED LANDSCAPE/ SEASCAPE</b>	Areas of national significance which are characterized by the harmonious interaction of man and land while providing opportunities for public enjoyment through recreation and tourism within the normal lifestyle and economic activity
<b>RARE</b>	Species and subspecies of wildlife found only in one particular area or only in a few areas in very highly specialized habitat types but occur only in very small numbers and are therefore, seldom met with, even within their preferred habitat types. Their populations are not at present endangered or vulnerable but are at risk
<b>REPTILES</b>	These are vertebrate animals with tough skin usually covered with scales in contrast to amphibians which has smooth, delicate skin.
<b>RESIDENT</b>	Breed or are suspected of breeding in the Philippines normally living there throughout the year
<b>RESOURCE RESERVE</b>	An extensive and relatively isolated and uninhabited area normally with difficult access designated as such to protect natural resources of the area for future use and prevent or contain development activities that could affect the resources pending the establishment of objectives which are based upon appropriate knowledge and planning.
<b>REVENUES</b>	Any fees and charges shall be collected for entry into and use of certain facilities inside national parks and other protected areas.
<b>SALE</b>	Refer to the act of selling animals/for an agreed price.
<b>SCIENTIFIC NAME</b>	Refers to the formal nomenclature/name of specific plants and animals.
<b>SPECIES</b>	A group of organisms capable of interbreeding freely of each other but with members of other species.
<b>THREATENED</b>	A general term to denote species or subspecies considered as critically endangered, endangered, vulnerable or other accepted categories of wildlife whose population is at risk of extinction
<b>TRANSPORT PERMIT</b>	Permit issued authorizing an individual to bring wildlife from one place to another within the territorial jurisdiction of the Philippines
<b>TRADE</b>	The act of engaging in the exchange, exportation or importation, purchase or sale of wildlife, their derivatives or by-products, locally or internationally
<b>VISITOR</b>	Any Filipino or foreign individual or parties interested to visit a national park and other protected area.
<b>VULNERABLE</b>	Taxon that is not Critically Endangered or Endangered but is facing a high risk of extinction in the wild in the medium-term future
<b>WATERSHED FOREST RESERVE</b>	It is a land area drained by a stream or fixed body of water and its tributaries having a common outlet for surface run-off.
<b>WILDERNESS AREA</b>	Refers to land of public domain which has been reserved as such by law to preserve its natural conditions, maintain its hydrologic quality and restrict public use in the interest of national welfare and security. This include foreshore protection forests, mossy forests and mangrove forests essentially needed for foreshore protection and maintenance of estuarine and marine life including critical watershed reservations and special forest which are the exclusive habitat of rare and endangered Philippine Flora and Fauna.

<b>WILDLIFE</b>	Wild forms and varieties of flora and fauna, in all developmental stages, including those which are in captivity or are being bred or propagated
<b>WILDLIFE EXPORT</b>	The conveyance of wildlife and its by products from any place within the territorial jurisdiction of the Philippines to another country.
<b>WILDLIFE SANCTUARY</b>	Comprises an area which assures the natural conditions necessary to protect nationally significant species, group of species, biotic communities or physical features of the environment where these may require specific human manipulation for their perpetuation.
