Nitrofurazone Cream

Anti-bacterial cream for horses

SCHEDULED PRODUCT VET ONLY

ANTI-BACTERIAL CREAM FOR HORSES.

ACTIVE CONSTITUENTS (PER g)

Nitrofurazone 2mg

Features

- Anti-bacterial preparation for use as a topical aid for the treatment of a wide spectrum of skin associated bacterial pathologies.
- Potent bactericidal action against a wide range of pathogens including *Streptococcus spp.*, *Escherichia coli*, *Clostridium perfringens*, *Enterobacter spp.*, and *Proteus spp.* organisms.

Benefits

- Ideal for the broad spectrum anti-bacterial treatment of skin abrasions, rope burns, girth galls, greasy heel, cuts and surgical sites.
- May be applied to open wounds and may be bandaged onto lesions.
- Ideal as a post-operative dressing.

DIRECTIONS FOR USE/CONTRAINDICATIONS

Clean dirt and/or dried discharge from the affected area prior to application, using a mild disinfectant. Apply Nitrofurazone cream in direct contact with the skin lesion for at least 24 hours. The dressing may be changed up to 3 times daily.

SAFETY NOTE

Use gloves when applying and wash hands thoroughly after use.

WITHHOLDING PERIOD

Do not use on horses which may be slaughtered for human consumption.

PACK SIZE(S)

500g tub.
