

# 2024 Spring Catalog

River Valley Orchids is a small hobby greenhouse. I specialize in mostly Maxillarias and Phragmipediums, but grow a variety of other orchids as well. I have been growing for over 30 years and I provide orchids to other growers that I personally enjoy growing and are excited to have in my collection. I can only provide a few of each type, so I recommend ordering early to ensure plants are still in stock for your own collection!

Everything offered grows in intermediate temperatures and can be grown on the windowsill, under lights or in the greenhouse. These orchids all like to have bright light and be kept evenly moist or wet in the case of most of the Phrags! I am happy to talk more about culture and help you pick a plant that will do well in your growing conditions. It is always important to ensure that the plant will enjoy your particular conditions so that they will thrive and bloom well!

All of the plants offered are large mature plants or divisions unless noted otherwise and will bloom in season.

I can take checks, credit cards, PayPal and of course old fashioned cash!

Please feel free to call or email me to hold an order for you, ask questions, to help you pick out a plant or two, or three that will fit your growing area..... or just talk orchids!

I hope you are excited about the plants I have to offer!
