

## OVENS

By using state of the art technology and materials, SMEG OVENS ARE ABLE TO RESPOND TO THE MOST WIDELY VARYING REQUIREMENTS IN TERMS OF PERFORMANCE, RELIABILITY, SAFETY, STYLING AND DIMENSIONS.

### Evolution

The beautiful sleek lines of the highly polished stainless steel finish add a bright new dimension to kitchen design, and an elegant alternative to the satin finish. The Evolution range of products incorporate a distinctive analogue LED electronic clock/timer which combines an attractively modern analogue clock face with the latest electronic technology, and is exclusive to Smeg. All the functions are extremely easy to set very quickly, and are immediately visible on the facia panel.

### Linea Series

The Linea series is conceived with balance in mind. Each oven has a glass front made without a frame, sleek backlit controls and a robust handle that reflects the precise symmetry of the overall appearance of the series. The Linea Series includes not just matching hobs, hoods and sinks but also a range of 45cm compact combination ovens and co-ordinating lift-up doors with a hydraulic hinge lifting system – see pages 38-55.

### **Classic style**

The original Smeg Classic style, a leader in the popularity of stainless steel in the kitchen, has undergone subtle changes to create even cleaner lines and incorporate the elegant clock that already features in the Evolution range. The range has also incorporated the frameless oven door design and some models include finger friendly stainless steel, further extending the aesthetics of the style.

The style is offered in different sizes and heights, including double and single ovens with many options and combinations of features. Two series of co-ordinating compact ovens, 38cm and 45cm in height, complete the Classic range, and lift up doors and stainless steel drawers offer even further versatility within the Classic style - see pages 38-55.

### **Compact Ovens**

Smeg offer two different styles and size of compact ovens, both of which complement the modern kitchen. In addition to these, two different sizes of warming drawers are also available for further versatility.

### **Coffee Machines**

New for 2009, Smeg are pleased to introduce a range of coffee machines, available in both Linea and Classic design to coordinate well with many existing products.

### A Class Pyrolytic Ovens

The pyrolytic cleaning process reaches temperatures close to 500°C; these ovens are produced with special enamel interiors, specified to withstand such heat. The process can be set from 1.5 hours to 3 hours, depending on the degree of dirt built up inside the oven. The latest models reach the high temperatures very quickly, but at much reduced energy consumption, allowing them to achieve the A class energy rating. All the pyrolytic ovens have a sophisticated cooling system, quadruple glazed doors and an automatic door lock, giving total confidence to the consumer.

All pyrolytic ovens in this brochure show this symbol, which indicates that during the pyrolytic cleaning cycle the outer door glass will become no hotter than 55° C.

### All glass inner door

Many of the ovens included in this brochure feature the all glass inner door, using a flat sheet of glass to eliminate the possibility of food particles collecting in corners, and which can be simply removed for cleaning, even between the glass layers. The construction of the door ensures a lower exterior door surface temperature, making it cooler to the touch.

### Energy labelling

Ovens and cookers are included in the European Union energy labelling project. Appliances are awarded an overall energy rating from A to G for each oven cavity. All Smeg cooking products are designed to operate at the optimum levels with the least energy, to be as environmentally friendly as possible.

### Pizza function

Both the Linea and Classic ranges offer an oven with the pizza cooking facility. In these ovens the lower element is circular, with an enamel cover that can be removed to allow the refractory pizza stone to be placed directly over the element. The stone heats up very quickly and efficiently, and a pizza can be stone baked to perfection in 3-5 minutes. The wooden handled shovel provided with the ovens allows items to be moved on and off the stone safely and easily.

### Linea Oven Displays

The innovative control panel is equipped with a digital LED, which shows the time, the cook time, and preset temperatures based on the function selected. According to the model there is a choice between 10 and 13 cook functions that will satisfy even the most discerning chef. The preset temperature can be adjusted in steps of 5°C to enable selection of the correct temperature required for the cooking task. They also have a programming facility to enable the correct function and temperature to be automatically selected to optimise the cooking of specific types of food. The facia panel and controls of the Linea series are backlit with an exquisite violet light that harmonizes perfectly with its modern design.

### **Analogue LED clock/timer**

The distinctive Smeg analogue LED clock/timer combines an attractive modern analogue clock face with up to date electronic technology. The

functions are extremely easy to set very quickly, and are immediately visible on the clock face.

### **Full size steam oven**

The S302X is a full size Classic electric multifunction oven with 8 functions, three of which can be combined with steam, to provide a truly versatile oven.

Steam cooking saves time while preserving the food's quality, nutritional value, flavour and aroma. Great care has been taken over the design of the water reservoir, which is easy to inspect and clean. The internal water tank avoids the usual problem of scale inside the oven and tiresome cleaning procedures; the water reservoir is quickly drained and rinsed at the touch of a button.

### **Full size combination oven with microwave**

The Classic combination oven S201X has seven standard oven functions and a microwave function. The oven

can be used for both normal cooking, and microwave cooking in the usual way, and three of the oven functions can also be combined with microwave cooking to add further options for a busy cook. There are other smaller combination ovens in the Smeg range, but this one offers a full size 50 litre capacity multifunction oven with the addition of a microwave facility.

The SE995XT-7 is part of the Classic range of appliances providing clean lines to give a sleek and elegant finish to their appearance. This electric multifunction oven has a rotisserie kit that works in combination with the grill element; useful for cooking chicken, sausages and anything else requiring uniformed cooking over all to perfection. It also has an integrated panini toaster facility with timer to allow the perfect panini to be made.

### **Telescopic shelf support**

These accessories are suitable for 60cm ovens with chrome shelf supports, and they replace the standard ones supplied. The addition of telescopic guide rails allows the shelves to be extracted extremely smoothly and safely, and add an extra dimension to the quality of the oven furniture.

## SCP171X

60CM PYROLITIC MULTIFUNCTION OVEN,  
POLISHED ST/STEEL  
ENERGY RATING A

10 functions

Polished stainless steel finish  
Analogue LED electronic clock/timer  
Door and oven exterior fan cooled  
Removable inner door glasses  
Quadruple glazed removable cooler door  
**Pyrolytic cleaning**

STANDARD ACCESSORIES:

Roasting/grill pan  
Grill mesh  
Enamelled tray  
Chrome shelf  
Grill pan handle  
Roof liner  
Rotisserie kit

Nominal power: 3kW  
Conventional: 0.88kW/h  
Forced air convection: 0.79kW/h  
Oven capacity: 54 litres  
13 Amp power supply required

OPTIONAL EXTRAS:

Universal Pizza Stone **PPR1**  
Pizza Shovel **PAL**

## SC170

60CM ELECTRIC MULTIFUNCTION OVEN,  
POLISHED ST/STEEL  
ENERGY RATING A

10 functions

Polished stainless steel finish  
Analogue LED electronic clock/timer  
Door and oven exterior fan cooled  
Removable inner door glasses  
Triple glazed removable cooler door

STANDARD ACCESSORIES:

Roasting/grill pan  
Grill mesh  
Enamelled tray  
Chrome shelf  
Grill pan handle  
Roof liner  
Stay clean liners

Nominal power: 3.0kW  
Conventional: 0.91kW/h  
Forced air convection: 0.79kW/h  
Oven capacity: 51 litres  
13 Amp power supply required
