

Handling Risk and Uncertainty in Petroleum Exploration and Asset Management

AAPG Bulletin Special Edition

Volume 92, Number 10, October 2008

TABLE OF CONTENTS

1. Handling risk and uncertainty in petroleum exploration and asset management: An overview, by P. Craig Smalley, Stephen H. Begg, Michael Naylor, Sigrunn Johnsen, and Antonella Godi
2. Toward consistency in petroleum exploration: A systematic way of constraining uncertainty in prospect volumetrics, by David G. Quirk and Richard G. Ruthrauff
3. A method to estimate block values through competitive bidding, by Ricardo Furtado, Saul B. Suslick, and Monica R. Rodriguez
4. A Bayesian belief network approach for assessing the impact of exploration prospect interdependency: An application to predict gas discoveries in the Netherlands, by John-Diederik Van Wees, Harmen Mijnlief, Jan Lutgert, Jaap Breunese, Christian Bos, Peter Rosenkranz, and Filip Neele
5. Managing trade-offs between conflicting goals through a portfolio visualization process, by Stephen M. Rasey
6. The effect of methodology on volumetric uncertainty estimation in static reservoir models, by H el ene Beucher, Didier Renard, Brigitte Doligez, Marco Pontiggia, and Giuseppe Bellentani
7. I would rather be vaguely right than precisely wrong: A new approach to decision making in the petroleum exploration and production industry, by Reidar B. Bratvold and Steve H. Begg
8. Using the value of information to determine optimal well order in a sequential drilling program, by Peter Cunningham and Steve Begg
9. Studies of United Kingdom Continental Shelf fields after a decade of production: How does production data affect the estimation of subsurface uncertainty? By Pete Smith
10. Uncertainty in prospect evaluation: Lessons from the movie industry, by Pierre Delfiner
11. Responsible reporting of uncertain petroleum reserves, by Mark McLane, James Gouveia, Gary P. Citron, James MacKay, and Peter R. Rose
