1. PROJECT DESCRIPTION

The study area, located in the City of Tampa, Hillsborough County, Florida comprises approximately 11 miles of interstate facilities on I-275 and I-4, an approximate 4.4-mile segment of the Lee Roy Selmon Expressway, and an approximate 0.8-mile segment of the I-4/Selmon Expressway Connector (previously known as the Crosstown Connector). The proposed improvements would involve reconstruction of I-275 from east of the Howard Frankland Bridge (HFB) to north of SR 574 (Dr. Martin Luther King [MLK] Jr. Boulevard), and I-4 from I-275 to east of 50th Street. The proposed improvements are located in the 1996 Tampa Interstate Study (TIS) Final Environmental Impact Statement (FEIS) Segments 1A, 2A, 2B, 3A, 3B, and 3C (see **Figure 1-1**). The TIS Segment 3C, the I-4/Selmon Expressway Connector, was constructed and is not being evaluated as part of this Supplemental Environmental Impact Statement (SEIS).

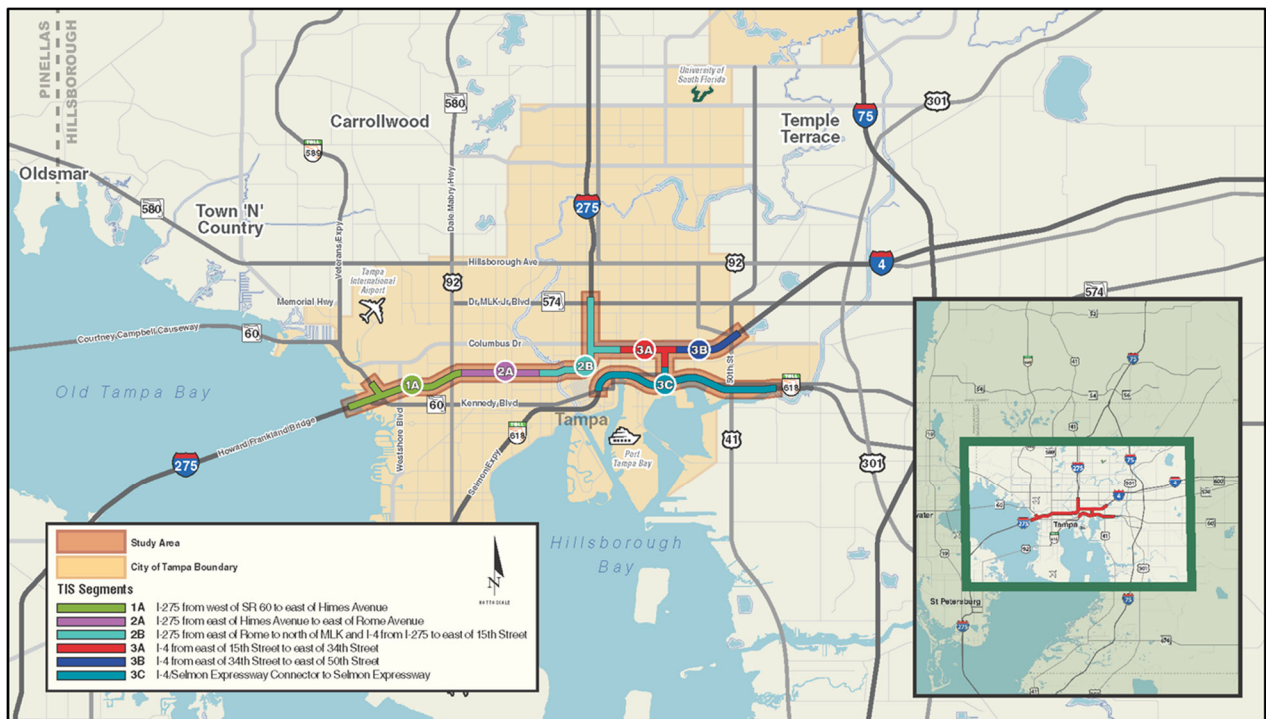

Figure 1-1 Tampa Interstate Study SEIS Project Study Area

The SEIS evaluated environmental impacts of three alternatives: No Further Action, 1996 TIS FEIS Long-Term Preferred Alternative (Non-Tolled), and the 2018 Express Lanes Alternative (Tolled) with five Design Options. A description of each of the alternatives evaluated is provided in the TIS SEIS Project Engineering Reports and the SEIS.

1.1 Purpose of Report

The FDOT recognizes that the success of any transportation improvement is dependent upon a comprehensive public outreach effort. As such, FDOT has engaged the community in this project since the 1980s. Throughout the past three decades, FDOT has evolved from traditional public meetings to on-line forums, social media, and truly interactive engagement. A Project Coordination and Public Involvement Plan (PCPIP) was prepared in 2017 to identify actions needed for obtaining meaningful agency and public

Comments and Coordination Report

participation. As such, this PCPIP was focused on soliciting community participation regarding local issues and concerns throughout the project development process. A copy of the PCPIP is located at tampainterstatestudy.com. The purpose of this report is to document the public and agency participation accomplished throughout the SEIS study process. These consultation and coordination efforts were designed to satisfy the requirements of the National Environmental Policy Act (NEPA) of 1969, as amended, Section 106 of the National Historic Preservation Act (NHPA), and other regulations.

2. SEIS HISTORY

2.1 Tampa Interstate Study (TIS)

The TIS Project has been under consideration for many years. The TIS SEIS is part of FDOT's plan to modernize Tampa Bay's transportation infrastructure and prepare for the future. The Tampa Interstate System is the cornerstone of the Tampa Bay Region's surface transportation system and improvements to the system have been a priority to FDOT since the 1980s. The need for improvements to the interstate system was established in the Hillsborough MPO *2010 Long Range Transportation Plan for Hillsborough County* (LRTP), which was published in 1989.

2.1.1 TIS Master Plan

In 1983, FDOT began to identify potential improvements to the Tampa Interstate System, which was originally constructed in the early 1960s. These improvements included potential short-term safety solutions and design changes, and long-term express lanes and high-occupancy vehicle (HOV)/transit related improvements to accommodate growing traffic volumes and address congestion. The 1983 study considered all transportation needs within the study area, including concurrent highway, rail, and/or transit improvements.

Using the 1983 study as a documented base, FDOT began Phase I of the TIS in 1987. The purpose of the Phase I study was to produce a Master Plan to identify alternatives and make recommendations regarding the preferred type and location of multi-lane improvements, potential HOV facilities, transit facilities, traffic management techniques, and traffic surveillance and control systems. FDOT engaged the community in traditional public workshops, small group meetings, newsletters, citizens advisory committee, agency task force, and media outreach. Based on the work performed, FDOT published the *TIS Master Plan Report* and Federal Highway Administration (FHWA) approved the Plan in 1989. The Hillsborough MPO adopted the Tampa Interstate Master Plan Concept into the 2010 LRTP in November 1989.

2.1.2 TIS FEIS

Following completion of the *TIS Master Plan Report*, FHWA, in cooperation with FDOT, began the preparation of an EIS in 1991 and the supporting documentation necessary for state and federal approvals and subsequent funding of the *TIS Master Plan Report* concepts. The EIS evaluated impacts associated with a Selected Alternative, a Long-Term Preferred Alternative, and a No-Action Alternative, addressed agency and citizen concerns, and identified ways to minimize impacts. FDOT continued to engage the community through traditional public workshops, hearings, newsletters, citizens advisory committee, agency task force, and media outreach. In addition, FDOT established the Cultural Resources Committee (CRC), relocation task force, and design review committees, as well as hosted urban design community workshops and historic resources public meetings. Public involvement summaries for the master plan and FEIS are available at: <http://tampainterstatestudy.com/project-documents/>.

FDOT held a public hearing in January 1996 and FHWA approved the TIS FEIS in November 1996, issued the ROD in 1997, and an amended ROD in June 1999. The 1997 and the 1999 RODs are the documents that have governed the development of all improvements to I-275 and I-4 providing a roadway system that includes general use lanes and separated express lanes in each direction, as well as a future transit

corridor. The intent of the FHWA and FDOT has been to ultimately construct the 1996 TIS FEIS Long-Term Preferred Alternative updated by re-evaluations over the years and as funding becomes available.

2.2 TIS Implementation

Since issuance of the 1997 ROD and the amended 1999 ROD, FDOT has taken several major steps to build the 1996 TIS FEIS Long-Term Preferred Alternative. FDOT reevaluates the TIS prior to advancing to the next phase (e.g. right of way or construction). Thus, the TIS has been re-evaluated numerous times to advance various segments of the project. Portions of TIS Segments 1A, 2A, 3A, 3B, and 3C in Westshore Business District, West Tampa, Downtown Tampa, and East Tampa have been constructed throughout the past 20 years. **Figure 2-1** illustrates the timeline for the TIS. FDOT continued to engage the community throughout design, right of way, and construction of these segments in design and right of way open houses, small group meetings, special presentations, newsletters, and media outreach. FDOT continued to host the cultural resource committee and design review committee meetings.

Figure 2-1 TIS Timeline

2.3 Tampa Bay Express Master Plan (TBX)

In July 2012, President Obama approved Moving Ahead for Progress in the 21st Century (MAP-21), codified in Title 23 U.S.C. Section 129, which included provisions for improving urban air quality by reducing traffic congestion and granted authority for new interstate lanes to be tolled. Later in 2012, Florida Statute 338.151 gave FDOT authority to implement tolls on the State Highway System (SHS) such as on new limited-access facilities, lanes added to existing limited-access facilities, new major bridges over waterways, and replacements of existing major bridges over waterways.

In 2013, FDOT District 7 initiated a master plan to determine if express lanes would be feasible in the Tampa Bay area to achieve two primary objectives: provide drivers with a new mobility choice and improve regional mobility by reducing congestion on the Tampa Bay Region interstate system. The evaluation of interstate express lanes identified projects that can provide new driver choices that will improve driver mobility on the interstate system in the Tampa Bay Region and reduce the time and monetary losses associated with traffic congestion. The master plan determined that tolled express lanes should be implemented on I-275, I-4, and I-75, shown in **Figure 2-2**. The master plan was published in September 2016, which includes a summary of public engagement including the public workshop scrapbook.

From 2013 to 2016, FDOT increased engagement activities project by conducting a series of focus groups to explore the community's perspective on tolling, two public workshops, and over 300 small group presentations speaking engagements, and one-on-one meetings with community members. In addition, FDOT hosted two rounds of library tours, which included 27 sessions in 17 different libraries throughout the region, listed in **Table 2-1**. In addition to in-person meetings, a dedicated public website (www.tampabayexpress.com) was created along with postings on the FDOT District Seven Facebook page and Twitter account. FDOT also established a local office (Ybor area) with staffing five to six days a week, including some weekend sessions, to provide the local community access to a knowledgeable FDOT staffer that can answer questions specific to TBX.

In late 2015, FDOT hired University of South Florida's Florida Center for Community Design and Research (USF FCCD+R) to conduct three rounds of design charrettes within Downtown Tampa's neighborhoods. This approach provided FDOT the opportunity to bring up-to-date community visions and goals to be further developed since the last project update and receive valuable comments. The results of these workshops were not intended to represent the final outcome or the final design solution for mitigation, but rather were to be used as suggestions to illustrate the desires of the community and inform the design-build process and identify areas or elements of the on-going mitigation that may need to be updated. Five themes emerged through the discussion: transit options, connectivity, street corridor design, public realm enhancements, and mitigation first.

The charrette activities included:

- Site visits and bus tours
- 21 collaborative workshops
- 2 children's workshops
- 6 public presentations
- Multi-agency participation

The full list of charrette meetings is listed below in **Table 2-2**.

The *2015-2016 Tampa Bay Express Community Engagement Final Report* for the Downtown Tampa Interchange can be found on the TIS website, tampainterstatestudy.com.

2.4 Project Reset and Tampa Bay Next

In late 2016, FDOT decided to expand the outreach program, both at the community and regional levels. This new approach provided an opportunity for FDOT to engage the community in a broader conversation about regional transportation solutions. As a result, FDOT committed to research, reevaluate, and respond to the community.

Research – FHWA provided a grant for FDOT to take a group, consisting of residents, business representatives, and elected officials, to St. Louis, Missouri in April 2017. The purpose of the trip was to meet with the Missouri DOT (MoDOT) and learn about the “Missouri Model” for community engagement and workforce development,

Reevaluate – FHWA and FDOT decided to prepare an SEIS to better document the potential environmental and socioeconomic impacts of the TIS.

Respond – FDOT developed Tampa Bay Next (TB Next) to establish a regional dialogue on transportation inclusive of more than just interstate modernization, but also transit, bicycle/pedestrians, freight mobility, and smart technology.

TB Next was launched in May 2017 as a comprehensive approach to transportation planning and development in the region. This regional engagement provided an opportunity for FDOT to better understand what the community’s concerns were and to provide clear and accurate information on projects. The priority was creating meaningful opportunities for public input and balancing regional needs with community concerns for a study with regional significance. FDOT developed an approach that incorporated elements of the “Missouri Model” to engage neighborhoods and incorporate feedback received into design plans. The approach was an iterative process that then allowed communities to also see how their feedback was incorporated by sharing the refined plan.

The program created opportunities for collaboration with partner agencies on an unprecedented level by bringing agencies and stakeholders together at meetings and open houses to address concerns, needs, and potential solutions to the region’s transportation issues. FDOT invited agency partners including the City of Tampa, Hillsborough County, transit agencies, metropolitan planning organizations, Pinellas County to participate in and share information at meetings and open houses. This provided the community the opportunity to ask questions about transportation planning and projects in their neighborhood and agency partners could answer questions relative to their projects on site. Outreach activities included: regional community working groups, Citizens’ Transportation Academy (webinar series), community events, regular newsletters, and a program website: www.TampaBayNext.com.

FDOT participated in community outreach events and presentations to groups throughout the region, providing updates on the SEIS and other program projects. Since 2017, FDOT presented to 96 times to neighborhoods, businesses and agencies on the SEIS and 244 times to neighborhoods, business and agencies on TB Next program updates. Additionally, FDOT participated in 113 community outreach events throughout the region and hosted 42 meetings that included Community Working Groups, public workshops and public hearings for program projects. Information on the TIS SEIS was included at all presentations and community outreach events program wide. A complete listing of community outreach events and small group meetings is located in **Appendix A**.

3. PROJECT COORDINATION AND PUBLIC INVOLVEMENT PLAN

In September 2017, FDOT prepared a *Project Coordination and Public Involvement Plan (PCPIP)* to implement an agency coordination and public involvement program for the TIS. The Plan describes the overall approach and coordination methods that FDOT used to obtain agency insights and satisfy Federal coordination requirements of 23 Code of Federal Regulations (CFR) § 139 during the environmental review process.

FDOT also utilized the PCPIP to obtain input and involvement from the community at-large, key stakeholder groups, and others who could be affected by, benefit from and/or had an interest in the proposed project. Most of the public involvement resources have been directed toward communicating with people who live, work, or have an interest in the TIS area. One of the primary goals is to provide affected communities with clear, consistent, accurate, and current information about the project throughout the NEPA process, including the alternatives being examined in the SEIS, and the process followed to identify the Locally Preferred Alternative (LPA).

The PCPIP was developed and implemented in accordance with NEPA requirements for public participation, as well as the FDOT Project Development and Environment Manual, Part 1, Chapter 11 Public Involvement; Florida Statute Section 339.155 Transportation Planning; and 23 CFR § 139, Efficient Environmental Reviews for Project Decision-Making. The PCPIP is available on the TIS website at tampainterstatestudy.com.

3.1 Project Website

A project website, tampainterstatestudy.com was developed and FDOT posted all pertinent study information on the site including concept plans, handouts, meeting materials, and study documents. The project website also included contact information including a contact email and phone number. FDOT also posted information on social media regarding outreach events and FDOT hosted meetings on Facebook at /TampaBayNext and on Twitter at: @TampaBayNext.

3.2 Florida Administrative Registrar

FDOT published notices for all FDOT hosted meetings and workshops in the Florida Administrative Register at least 7 calendar days prior to the event in accordance as required in Section 120.52, F.S. These FDOT meetings included public workshops, Community Working Groups, Cultural Resources meetings, Citizen Transportation Academy webinars and public hearings. Notices included the date, time, location, general subject matter, contact information, and language describing the Americans with Disabilities Act (ADA) language, environmental review and non-discrimination language. Notices for public workshops and hearings are in meeting scrapbooks. Notices for other meetings are in project files.

4. INTERAGENCY COORDINATION EFFORTS

4.1 Notice of Intent (NOI)

The SEIS process for the TIS commenced with the publication of the NOI in the Federal Register (FR) on January 17, 2017. A copy of the NOI can be found in on the project website at tampainterstatestudy.com. **Figure 4-1** identifies the major public involvement opportunities during the TIS SEIS process.

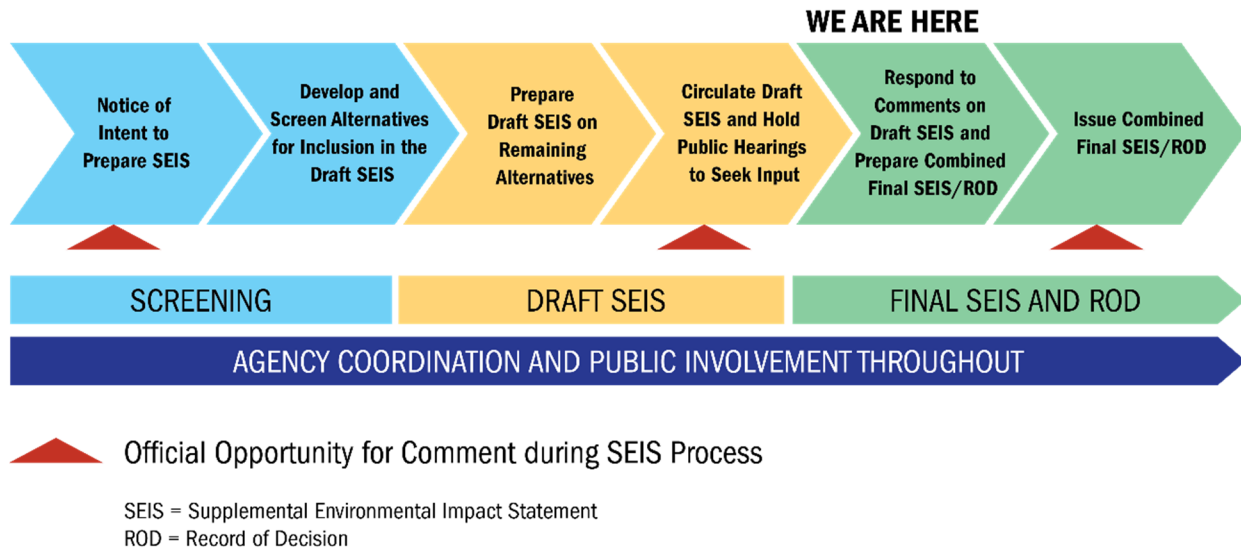

Figure 4-1 Agency Coordination and Public Involvement

4.2 Notification Process

In March 2017, the FHWA sent formal letters of invitation to resource and regulatory agencies as well as local agencies and government officials. FHWA invited two agencies, the U.S. Coast Guard (USCG) and the U.S. Army Corps of Engineers (USACE) to serve as a Cooperating Agency. The USCG accepted the invitation on April 5, 2017. On April 12, 2017, the USACE declined to serve as a Cooperating Agency and instead serve as a Participating Agency. Additionally, FHWA also invited the agencies listed in **Table 4-1** to serve as a Participating Agency. Of those, six more accepted the invitation. The Federal Transit Administration (FTA) declined to participate. Copies of the invitation letters and agency responses are included in the PCPIP (September 2017), which is available online at tampainterstatestudy.com.

4.3 Agency Coordination and Consultation

Council on Environmental Quality (CEQ) guidance identifies the need for effective interagency coordination and cooperation in 40 CFR § 1501.6. Per this guidance, other federal agencies with regulatory or permitting authority related to the project are invited to become “Cooperating Agencies” or “Participating Agencies” in the development of the EIS. The involvement of various state and federal agencies is essential since there are several federal and state regulations that must be addressed over the course of a project’s development. If the project is approved for implementation, various federal and state agencies have the responsibility for ensuring compliance.

According to 23 USC § 139(d)(1), a “**Cooperating Agency**” is any federal agency, other than a lead agency, that has jurisdiction, by law or special expertise, with respect to any environmental impact involved in a proposed Project or Project Alternative.

Participating Agencies are federal, state, tribal, regional, and local government agencies that may have an interest in the project. Nongovernmental organizations and private entities cannot serve as participating agencies.

Table 4-1 Cooperating and Participating Agencies

Agency	Response to Invitation
Cooperating	
United States Coast Guard (USCG)	Accept
United States Army Corps of Engineers (USACE)	Decline
Participating	
Federal Aviation Administration (FAA)	Accept
Federal Railroad Administration (FRA)	Accept
Federal Transit Administration (FTA), Region IV	Decline
National Marine Fisheries Services (NMFS), Southeast Regional Office	Accept
National Park Service (NPS), Southeast Region	Accept
U.S. Environmental Protection Agency (USEPA), Region IV	Accept
United States Army Corps of Engineers (USACE)	Accept
U.S. Department of Interior (USDOI) – US Fish and Wildlife Service (USFWS)	Accept

4.4 Cooperating and Participating Agencies

From December 2017 to January 2018, the Cooperating and Participating Agencies were able to review and provide input on the TIS SEIS PCPIP, Purpose and Need, project schedule, and Alternatives Screening Technical Report through FDOT’s Environmental Screening Tool (EST) as part of Florida’s Efficient Transportation Decision Making (ETDM) process. The ETDM process enables consideration of the environment in transportation planning as well as agencies and other stakeholders the opportunity to provide early input on potential project impacts to environmental and community resources. The key issues raised as a result of the coordination were:

- USCG bridge permitting procedures
- Pedestrian and landscape improvements
- Potential impacts to the Hillsborough River paddling trail
- Potential effects to historic districts

During the SEIS study, FDOT provided agencies opportunities to review the PCPIP, Purpose and Need, and TIS SEIS technical reports and provide input.

FHWA approved the Draft SEIS on January 27, 2020 and published the Notice of Public Availability in the National Register on February 7, 2020 inviting the agencies and the public to comment on the Draft SEIS and technical support documents. The 45-day comment period ran from February 7, 2020 to March 23, 2020. A summary of the agency comments and the FDOT responses are provided in the following sections.

4.4.1 Cooperating Agency – United States Coast Guard (USCG)

The USCG submitted the following comment:

Agency Comment

Thank you for the opportunity to review the Draft Supplemental Environmental Impact Statement (SEIS) for the Tampa Interstate Study.

As part of our initial review of the Draft SEIS and our telephone conference on 19 November 2019, the Coast Guard has made a preliminary determination that the project, as proposed, will meet the reasonable needs of present and reasonably foreseeable navigation on this stretch of the Hillsborough River. This determination was based on the fact that the existing minimum navigational clearances over the Hillsborough River would be maintained and not further encumbered.

Please note that this preliminary determination does not constitute an approval or final agency action. The Coast Guard can only make a final determination after processing a complete bridge permit application.

The Coast Guard Bridge Permit Application Guide (BPAG) (Section 3.B) contains a comprehensive list/outline of NEPA requirements for Coast Guard bridge permitting (the project will be reviewed for the applicable environmental constituents – some of those in the BPAG will not be applicable). The Coast Guard BPAG is available at: <https://go.usa.gov/xRFk2> (the URL is case sensitive, please use link of type URL exactly as shown).

FDOT Response

FDOT will follow the Coast Guard Bridge Permit Application Guide at the time of permitting.

4.4.2 Participating Agencies

This section provides the comments that FDOT received from the Participating Agencies and FDOT's response to each.

Federal Aviation Administration (FAA)

Agency Comment

The Federal Aviation Administration appreciates receiving the Notice of Availability of the Draft Supplemental Environmental Impact Statement. The project does not appear to affect public-use airports and we have no comments on the project.

FDOT Response

Comment noted.

Federal Railroad Administration (FRA)

Agency Comment

FRA's main concern is allowing room for intercity rail expansion, as envisioned in the FRA Tampa to Orlando Tier 1 EIS from several years ago. Virgin Railways has expressed an interest in providing privately-developed service mostly within the corridor FRA analyzed. As the scope of this particular project is presented, it appears there are no immediate concerns regarding the right-of-way and room for intercity rail service. Please note any comments you may receive from rail providers in response to this EIS- FRA is unaware of any conflicts at this time. Thanks for considering intercity rail operations in your project.

FDOT Response

FDOT is committed to coordinating with the FRA on a future reevaluation of the FRA Florida High-Speed Rail FEIS.

National Marine Fisheries Service (NMFS)

Agency Comment

NMFS staff has reviewed the Draft Supplemental Environmental Impact Statement for the Tampa Interstate Study, but has no additional comments to provide other than those previously submitted.

FDOT Response

FDOT appreciates NMFS review and concurrence on the Natural Resources Evaluation on June 5, 2018 and confirmation of reasonable assurance that the Section 7 consultation can be completed as an informal consultation as the project moves forward and project details and commitments are finalized (letter dated November 20, 2019).

Southwest Florida Water Management District (SWFWMD)

Agency Comment

Section 4.1.5, Pages 4-4, Paragraph 3 - Last sentence states that 13.17 functional gain units are anticipated in the first quarter of 2020; however, ERP 43000920.017 has a credit release schedule based upon certain criteria for Location and Landscape values (5.73 units), Water Environmental values (13.17 units), and Community Structure values (1.01 units).

Sections 4.1.2, Pages 4-2, Paragraph 1 - "Unclear why FDOT is using a 15 foot buffer in wetland areas and 30 feet in seagrass areas. SWFWMD requires a 15 foot minimum and 25 foot average wetland buffer unless the applicant addresses secondary impacts to the systems."

Section 4.2.2, Paragraph 8 - Section 4.2.4, Pages 4-6, Paragraph 3 - Eighth sentence - Replace "(SWFWMD Permit No. 4300920) with (SWFWMD Permit No.4300920.017)".

Section 4.2.5, Pages 4-8, Paragraph 1 - Fourth sentence - Replace "meeting with SWFWMD on August 28, 2019" with "telephone record with SWFWMD on May 20, 2014". Sixth sentence - Replace "(SWFWMD Permit No. 4300920)" with "(SWFWMD Permit No.4300920.017)" and replace "telephone record with SWFWMD on May 20, 2014" with "meeting with SWFWMD on August 28, 2019". Last sentence indicates agreement documentation is provided in the *Pond Siting Reports*. Only the telephone record with SWFWMD on May 20, 2014 is included in the *Pond Siting Reports*.

Section 4.3.4, Pages 4-10, Paragraph 6 - Replace "The potential impacts to tidally influenced floodplains would require no floodplain storage compensation as required by the SWFWMD or local water

management district." with "The potential impacts to tidally influenced floodplains would require no floodplain storage compensation as required by the SWFWMD or local water management district unless a hydraulic restriction exists between the area of impact and the receiving tidal water. If a hydraulic restriction exists between the area of floodplain impact and the receiving tidal water body, compensation for the loss of storage will be required between the lowest elevation of impact up to the overtopping elevation to the tidal water body." Last sentence - Delete "Therefore, it has been determined that this encroachment would not be significant."

Section 4.3.5, Pages 4-10, Paragraph 1 - Replace "The impacts to a tidally influenced floodplains would require no floodplain storage compensation as required by the SWFWMD or local water management district." with "The impacts to tidally influenced floodplains would require no floodplain storage compensation as required by the SWFWMD or local water management district unless a hydraulic restriction exists between the area of impact and the receiving tidal water. If a hydraulic restriction exists between the area of floodplain impact and the receiving tidal water body, compensation for the loss of storage will be required between the lowest elevation of impact up to the overtopping elevation to the tidal water body." Last two sentences - Delete these sentences as they are duplicates of the previous two sentences.

Section 4.5.1, Pages 4-12, Paragraph 2 - If are pipes extending below the mean high-water line for Tampa Bay or the Hillsborough River then the pipes need to meet the design criteria for the FWC *Grates and Other Manatee Exclusion Devices for Culvert and Pipes (October 2015)*

Chapter 12 - Replace "Southwest Florida Water Management District (SWFWMD) Jack Moore, Senior Professional Engineer" with "Southwest Florida Water Management District (SWFWMD) Rob McDaniel, ERP Evaluation Manager"

Sources and References Cited - Replace "SWFWMD. 2013. *Environmental Resource Permit Applicant's Handbook*" with "SWFWMD. 2018. *Environmental Resource Permit Applicant's Handbook*."

FDOT Response

Section 4.1.5, Pages 4-4, Paragraph 3

Since the issuance of the permit, FDOT has been working with Southwest Florida Water Management District (SWFWMD) staff, providing monitoring reports and a credit ledger for review and approval. The credit release schedule is based on certain criteria as indicated in your comment. The SEIS provided this summary statement to indicate the anticipated release of credits that would suffice to mitigate for the project based on current coordination. At this time, the Location and Landscape value of 5.73 credits was approved for release and use by the NB Howard Frankland Bridge Replacement (FPID 422904-2 and 422904-4 (required 4.39 credits), leaving 1.34 credits available. The monitoring results provided in November 2019 indicated that criteria for the Water Environment values (13.17 credits) were met and those credits are anticipated to be available and used for this project. The FDOT continues to work with the SWFWMD to determine appropriate release of credits. For the purpose of the SEIS, the statement provided seems appropriate to convey that what is anticipated as mitigation and that adequate credits are anticipated to be available.

Sections 4.1.2, Pages 4-2, Paragraph 1

The buffers being referenced are not secondary impact buffers. They were study areas established to estimate possible direct impacts in the absence of detailed design plans and cross sections at early planning and design stages of the project. During permitting, when direct impacts are determined from design level cross-sections, we will also establish a secondary impact buffer as applicable that will follow

the 25' average width normally observed. The “buffers” in this case are to provide an estimate of direct impacts as slopes, riprap work zone, and other details were not yet established – thus, a width of 15 ft (wetlands) and 30 ft (seagrass) was used from the known edge of pavement to allow for those unknown design features.

As stated in the document “The FDOT estimated the study area for the wetlands and surface water evaluation as a 15-foot buffer in wetland areas and a 30-foot buffer in seagrass areas from the outermost edge of construction currently proposed. Because the limits of construction have not been determined, the buffer is to account for slopes, riprap, construction work zones, turbidity zones or other impacts that would extend beyond the designed edge of alignment.”

Section 4.2.2, Paragraph 8 - Section 4.2.4, Pages 4-6, Paragraph 3 and Section 4.2.4, Pages 4-6, Paragraph 3

The permit number will be modified to 4300920.017 as indicated.

Section 4.2.5, Pages 4-8, Paragraph 1

The dates for the telephone record will be corrected as indicated.

Section 4.3.4, Pages 4-10, Paragraph 6

Sentence regarding tidally influenced floodplains will be modified as indicated. Duplicate sentences will be removed.

Section 4.5.1, Pages 4-12, Paragraph 2

Regulations and requirements regarding manatee grates and exclusionary devices will be followed and implemented for pipes within Tampa Bay or the Hillsborough River. The federal and state regulations listed in 4.5.1 are not inclusive of all protected species regulations but provide the overarching regulations that guide the evaluation of protected species. However, the potential need for manatee exclusion devices is noted and will be evaluated as the project proceeds into permitting.

Chapter 12 and Sources and References Cited

SFWMD acronym, contact name, and citation will be updated as indicated.

U.S. Army Corps of Engineers (USACE)

Agency Comment

Section 4.1, pg. 4-1 - 4-4: The USACE concurs with the Wetlands and Other Surface Water assessments including the USACE authorities, resource estimation methodology, wetland or surface water communities, avoidance and minimization measures, mitigation strategies for wetlands and surface waters and also the permittee responsible mitigation for seagrass impacts and requirement for a Section 404 dredge/fill Permit.

Section 5.8, pg. 5-44 - 5-45: The USACE concurs with the Navigable Waters assessments with an additional comment for Section 5.8.1, pg. 5-44 and Section 5.85, pg. 5-45: Although no alterations are projected at this time for the Hillsborough River which is a federal navigation channel, there could be the possibility that a Section 408 (33 USC 408) permission review conducted by the USACE. The USACE would evaluate information provided at the time the applicant submits an application, or prior to an application submittal, for a USACE Section 404/Section 10 Permit to determine the requirement, if any, for a Section 408 review. This review evaluates any proposed alteration either in, under, or over a USACE navigation project to

determine that such alteration will not impair the usefulness of the project and will not be injurious to the public interest.

FDOT Response

FDOT will coordinate with the USACE prior to applying for a permit prior for construction.

U.S. Environmental Protection Agency (USEPA)

Agency Comment

Wetlands and Surface Waters

Recommendation: The EPA recommends conducting pre- and post-construction SAV surveys to quantify these (SAV) impacts.

Stormwater Management

The EPA recommends using linear stormwater best management practices in the existing right-of-way, such as bioswales, infiltration trenches, or vegetated filter strips. Also, please provide a more detailed explanation in the SFEIS regarding how the SMFs accommodate major storm events and changes in rainfall within each segment.

Environmental Justice

The EPA recommends that the SFEIS further discuss how impacts to potential EJ communities will be addressed. The EPA supports FDOT's ongoing coordination with potentially affected communities, and we encourage efforts to further minimize and/or mitigate unavoidable impacts.

FDOT Response

Wetlands and Surface Waters

Impacts must be quantified and approved in order to achieve the needed permits prior to construction. SAV boundaries for permitting applications are to be re-surveyed in June 2020. FDOT anticipates that the SWFWMD will also review and verify those boundaries during permitting. The contractor will also establish SAV boundaries prior to construction as well as place sediment control devices (turbidity barriers) at the Limit of Disturbance (LOD) prior to construction commencement. In addition to these design and pre-construction surveys, the FDOT will provide a post-construction survey and coordinate the results with the appropriate agencies as required by permits.

Stormwater Management

FDOT will fulfill the requirements of the permit in coordination with the SWFWMD prior to construction.

Environmental Justice

FDOT has conducted extensive outreach throughout the study area and particularly in low-income and minority communities. This outreach not only included traditional public meetings, special presentations, and small group meetings, but FDOT also participated in community bus tours, neighborhood safety checks, door-to-door visits, and staffing an accessible neighborhood office (Historic Ybor) since 2016. FDOT has adjusted their plans throughout the project to reflect community preferences.

The acquisitions and relocations noted for TIS Segments 2A, 3A, 3B, and 3C have already been purchased by FDOT since the 1996 TIS FEIS was released. FDOT has worked with the community to greatly reduce the potential property impacts, particularly in the Downtown Tampa area (Segment 2B) and will continue

to do so through construction. Previous Design Options A-D in Segment 2B would have required as many as 369 additional parcels. The recommended LPA requires fewer than 10 parcels in Segment 2B.

As stated in Section 3.3.5 of the SEIS, In order to minimize the unavoidable effects of ROW acquisition and displacement of people, FDOT would carry out a and Relocation Assistance Program in accordance with F.S. 421.55, Relocation of displaced persons, and the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Public Law 91-646 as amended by Public Law 100-17). Relocations would be accomplished by providing advisory and monetary assistance to eligible displacees to relocate to available housing or business properties elsewhere. This assistance also would include moving expenses. Every effort would be made to help property owners relocate in the same area, rather than other areas. In addition, displaced owner or tenant occupants of acquired residences would be provided financial assistance for increased costs they may encounter buying or renting replacement housing. See the FDOT Residential Relocation Under the Florida Relocation Assistance Program (FDOT, 2015, d) and Relocation Assistance Businesses, Farms, and Non-Profit Organizations brochures (FDOT, 2014, c) on the FDOT website at: <https://www.fdot.gov/rightofway/documents.shtm>.

According to the Conceptual Stage Relocation Plans, there are an adequate number of residential properties for sale and for lease currently available as potential replacement sites (see the TIS website for copies of the plans: <http://tampainterstatestudy.com/project-documents/>). The Westshore Business District, in TIS Segment 1A, includes over 12.5 million square feet of office space with a vacancy rate of approximately 9.8 percent. Within the immediate Tampa area there is over 32.3 million square feet of office space with a vacancy rate of 12.4 percent. According to the Conceptual Stage Relocation Plans, there were 597 properties with available office space for lease in buildings located in the Westshore Business District, City of Tampa and Hillsborough County. In TIS Segment 2B, none of the business displacements are considered major employers. Numerous replacement sites are available in the area for each business to rent or purchase. It is not expected that any businesses would have to move from the community in order to locate replacement sites.

FDOT will expand the discussion to include a description of Relocation Assistance to include the following: Relocation Assistance is an entitlement program designed to assist persons who are displaced from their homes by a transportation project. Provisions of the program include making comparable replacement housing affordable and reimbursing moving expenses. Eligibility to receive a replacement housing payment or be reimbursed for moving expenses is determined by each displacee's need in accordance with the specific state and federal guidelines.

There are no known impacts to subsidized-public housing within the LPA footprint.

In addition, as stated in Section 3.3.5 of the SEIS, FDOT has committed to incorporating the *TIS Urban Design Guidelines* to serve as mitigation measures and aesthetic design requirements. The *TIS Urban Design Guidelines* emphasize addressing the surrounding communities or the "neighbors" to the interstate. The objective of the *TIS Urban Design Guidelines* is to provide the design team guidance on specific aesthetic requirements contained in approved environmental documents prepared for the TIS Project. They are intended to minimize adverse indirect impacts to historic resources and parks and recreational areas. They specify that, due to the small size of parcels in many locations in the TIS study area, ROW that FDOT acquires would be by parcel. The remainder parcels will be available for aesthetic treatments. No partial parcels will be left that would be unusable by the property owner due to code or setback requirements. The *TIS Urban Design Guidelines* address specific performance standards for neighborhoods in the TIS SEIS study area, including West Tampa, Ybor City, Seminole Heights, Tampa Heights, Downtown Tampa, and Westshore. The FHWA and FDOT Central Office approved the *TIS Urban Design Guidelines* in February 1995.

During the conceptual design phase, FDOT will work closely with the City of Tampa on the interstate connections to local roadways; potential bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations, and MPO committees to receive input and provide updates.

These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions, such as along Reo, Occident, and Trask Streets, Westshore Boulevard, and Himes Avenue in Westshore/West Tampa. FDOT is also working with the City on how to improve access and traffic flow on the northwest side of Downtown Tampa at Ashley Drive, Tampa Street/Florida Avenue, and Scott Street and better align with the City's development plans for the area. In addition, FDOT is working with the City on the 14th/15th Street access to Ybor City/East Tampa to determine potential traffic calming, speed control, and bicycle/pedestrian amenities improve safety along 14th/15th Streets and Nuccio Parkway. There are several opportunities to reconnect communities in Westshore by constructing new north-south connections under the interstate at Reo, Occident, and Trask Streets. In Downtown Tampa, Ybor, and East Tampa, although FDOT is not reconstructing the interstate, there are still opportunities to enhance existing connections such as the area north of Julian B. Lane Park, downtown Tampa viaduct, and 14th/15th Streets. In addition, FDOT is looking to expand trail connectivity throughout the study area, including minor enhancements to the Tampa Heights Greenway in Tampa Heights and the extension of the Green Spine through Historic Ybor, VM Ybor, and East Tampa.

As FDOT's toll policy evolves, we will continue to provide updates to the public. FDOT intends to collect tolls electronically through its SunPass System. SunPass transponders are available for purchase at over 3,100 retail locations in Florida as well as all Turnpike service plazas, Turnpike gas stations, SunPass Service Centers, select Florida Welcome Centers, Visitor Centers, Rest Areas, and select County Tax Collector's Offices. They can also be purchased online at the SunPass website and at local Publix with a credit/rebate essentially equal to the purchase price.

Travelers will still be able to travel toll-free on the existing general use lanes that would be parallel to the proposed express lanes. Registered public transit, public school, and private buses are exempt from paying tolls on express lanes but must have a Sunpass and valid license plate. Persons with disabilities are exempt from paying tolls, if they are registered, have a Sunpass, and have valid license plate.

To further mitigate impacts to EJ communities, FDOT has initiated a workforce development program to connect the communities with construction-related jobs. FDOT's Economic and Fiscal Analysis indicated that the interstate modernization program has the potential to employ thousands of new jobs throughout the next decade. This is a great opportunity for West, East, and Downtown Tampa, where there are higher percentages of people that are not working. FDOT has partnered with community organizations to supplement existing mentoring efforts and is working with contractors to provide additional training opportunities.

US Fish and Wildlife Service (USFWS)

Agency Comment

The USFWS previously provided technical assistance for the wood stork, and the eastern indigo snake. USFWS determined that based on the commitments and the information provided in the previous Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement (SEIS) dated November 2017 that the project may affect, but not likely to adversely affect, these species.

West Indian (Florida) Manatee (*Trichechus manatus*)

The manatee was not previously addressed in the TIS SEIS; however, the species is now addressed due to Updated 1996 TIS FEIS Long –Term Preferred Alternative review. It has been determined that West Indian (Florida) manatee exist within the TIS SEIS study area at the Hillsborough River location.

The FDOT made a determination of ‘may affect, but not likely to adversely affect’ for the manatee. Based on the document the project footprint for this alternative will remain the same and no Critical Habitat has been designated in the study area, the USFWS concurs with a determination of ‘may affect, but not likely to adversely affect’ the manatee.

Gulf Sturgeon (Acipenser oxyrinchus desotoi)

The Gulf sturgeon was not previously addressed in the TIS SEIS; however, the species is now addressed due to Updated 1996 TIS FEIS Long –Term Preferred Alternative review. It has been determined that Gulf sturgeon exist within the TIS SEIS study area at the Hillsborough River location.

The FDOT made a determination of ‘may affect, but not likely to adversely affect’ for the Gulf sturgeon. Based on the document the project footprint for this alternative will remain the same and no Critical Habitat has been designated in the study area, the USFWS concurs with a determination of ‘may affect, but not likely to adversely affect’ the Gulf sturgeon.

FDOT Response

FDOT appreciates USFWS review and concurrence on the Natural Resources Evaluation on June 17, 2018 and will continue coordination through the environmental permitting process.

National Park Service (NPS)

FDOT did not receive comments from National Park Service (NPS).

4.5 Other Agency Coordination

FDOT invited the following agencies to review the Draft SEIS and responded that they had no comment:

- Florida Department of Economic Opportunity (DEO)
- Florida Department of Environmental Protection (DEP)
- Florida Fish and Wildlife Conservation Commission (FFWCC)
- Florida State Historic Preservation Office (SHPO)
- Florida Department of Agriculture and Consumer Services (FDAC)

FDOT also invited the following agencies to comment on the Draft SEIS, but did not receive a response:

- US Department of Health and Human Services (USHHS), National Center for Environmental Health Centers for Disease Control and Prevention
- US Department of Interior (USDOI), US Geological Survey (USGS)
- USDOI, Division of Natural Resources, Office of Trust Services, Bureau of Indian Affairs
- USDOI, Bureau of Land Management, Southeastern States Field Office
- Federal Emergency Management Agency (FEMA)
- US Department of Housing and Urban Development (USHUD)

4.6 Consultation Pursuant to Section 106 of the National Historic Preservation Act (NHPA)

Coordination activities required under the regulations to promulgate Section 106 of the National Historic Preservation Act (54 USC § 306108) were also implemented during the course of the TIS Project. Section 106 of the NHPA requires the FHWA and FDOT to consider the effects of the Project on historic properties, as well as to seek comments from Consulting Parties based on their special knowledge of, concern for, or mandated regulatory role relative to historic properties (36 CFR Part 800). The FHWA and FDOT initiated the Section 106 process with Florida's State Historic Preservation Officer (SHPO), tribal governments, and other Consulting parties concurrent with the NEPA environmental review process.

The study is a supplement to the 1996 TIS Final Environmental Impact Statement (FEIS) of which there is an existing three-party Section 106 Memorandum of Agreement (MOA), (October 1996) that is still in effect. As part of the FEIS process and in an effort to better coordinate the Section 106 efforts, in September 1990 a Cultural Resources Committee (CRC) was established to address federal, state and local interests in historic and archaeological resources potentially affected by TIS improvements. The CRC has worked together on avoidance alternatives, measures to minimize harm, mitigation and implementation of the stipulations included in the 1996 MOA. To date, 96 CRC meetings have been held. Agencies and organizations on the committee include: FHWA, FDOT – District 7 and Central Office, SHPO, Advisory Council on Historic Preservation (ACHP), National Park Service (NPS), City of Tampa and Tampa Preservation Inc. Over the years during implementation of the MOA other organizations have attended, such as the Ybor City State Museum, the Ybor City Development Corporation and the City of Tampa Community Redevelopment Agency (CRA).

The FHWA and FDOT initiated the Section 106 process with the SHPO, tribal governments, and other Consulting Parties concurrent with the NEPA environmental review process. As part of the Section 106 process of identifying historic properties within the Project's Area of Potential Effects (APE), a field visit by the Cultural Resource Management (CRM) Team on May 19, 2017, followed by a field visit that included FDOT District 7, FDOT Office Environmental Management (OEM), and members of the CRM team took place on June 6, 2017. The methodology and survey areas were also reviewed and discussed at that time. Another field visit also took place on October 10, 2017, and included FDOT District 7, SHPO, FDOT OEM, FHWA, and members of the CRM team. The methodology and survey areas were reviewed and discussed once again. A Historic Resources Information Meeting #1 (rescheduled from September 2017 due to a hurricane and held in separate room adjacent to the project Public Workshop) was held on October 10, 2017.

The preliminary historic resources survey methodology was presented for review and accepted by the CRC members at the October 11, 2017 CRC meeting #92. Invitees to this meeting included representatives from FDOT OEM, FDOT District 7, FHWA, SHPO, NPS, ACHP, City of Tampa, and Tampa Preservation, Inc. The meeting was also advertised to the general public and to others who requested to be added to the CRC mailing list. The meeting minutes for the October 11, 2017 CRC Meeting are included in the Appendix D of the SEIS.

Subsequent to the survey methodology being approved, a *Cultural Resources Assessment Survey (CRAS) Update* (FDOT, 2018, j) was prepared. The results were displayed at the Historic Resources Information Meeting #2 held on October 25, 2018 and presented the following day at the CRC meeting #93 to discuss any outstanding issues or address any questions. Methodology for evaluating potential adverse effects was also presented for discussion and comment at the Information Meeting and CRC meeting. The FHWA and the SHPO have concurred with the findings of FDOT's survey of cultural resources documented within

the TIS SEIS CRAS Update and a copy of the letter approved on November 26, 2018 concurring with the eligibility of the structures within the APE is included in the Appendix D of the SEIS. In addition, the Seminole Tribe of Florida reviewed the document and sent a letter that they agree with the findings. The letter dated February 25, 2019 is included in the Appendix D of the SEIS. In April 2020, a *CRAS Update Addendum* was also prepared to identify and evaluate historic resources within the APE that were constructed between 1969 to 1974. The *CRAS Update Addendum* also included an archaeological field survey for proposed ROW that was not previously surveyed, including Stormwater Management Facility (SMF) sites.

The *CRAS Update Addendum* was submitted to the FHWA and SHPO; FHWA approved the document on May 15, 2020 and SHPO concurred with the findings on May 15, 2020. The *CRAS Update Addendum* resulted in the identification of 22 historic resources; none of which were considered NRHP-eligible either individually or contributing to a historic district. The Seminole Tribe of Florida was also sent the *CRAS Update Addendum* for review and responded on June 4, 2020 that they concur consultant's and FDOTs recommendations. They requested that if a Phase II archaeological investigation is conducted for 8HI14932 that they be sent a copy of the report to review. The *CRAS Update Addendum and Additional Investigations at 8HI14932* (June 2020) document was submitted to the FHWA, SHPO, and Native American Tribes (Miccosukee, Muscogee, Poarch Band of Creek Indians, and the Seminole Nation of Oklahoma) on June 12, 2020 for review. The *CRAS Update Addendum and Additional Investigations at 8HI14932* (June 2020) was approved by the FHWA on July 1, 2020 and the SHPO concurred with the findings on July 7, 2020 (see Appendix D of the SEIS). The Poarch Band of Creek Indians indicated that they did not have an interest in the project area (see Appendix D of the SEIS). The Seminole Tribe of Florida responded in a letter dated June 17, 2020, that they had no objection to the project at this time (see Appendix D of the SEIS).

A preliminary assessment of potential adverse effects was displayed at the Alternatives Public Workshops held on May 21 and 23, 2019 and discussed at the CRC meeting #94 held on May 22, 2019 and #95 held on January 15, 2020. Information from the Working Draft Effects Analysis Report and CRC meetings were on display at the public hearing sessions held on February 25 and 27, 2020 in the form of photo simulations (photosims) and graphics. The Preferred Alternative was identified in May 2020. The potential adverse effects are documented in this Section 106 Effects Analysis Report (May 2020) and was the topic of discussion at the #96 CRC meeting scheduled for mid-June.

The Recommended LPA was identified in September 2019. Two public hearing sessions were held on February 25 and 27, 2020 to present the Recommended LPA for public review and comment. Photosims and materials presented at the CRC meetings were on display for public comment. Subsequent to the public hearing and in coordination with the City of Tampa, minor refinements related to adjacent local roads were incorporated to become the Preferred Alternative. None of the refinements are near cultural resources.

The potential adverse effects are documented in the *Section 106 Effects Analysis Report* and were discussed at CRC meeting #96 held on June 17, 2020 to provide the CRC members and other local interested parties the opportunity to comment. At the CRC meeting, there were no newly identified adverse effects that are not being addressed and mitigated in the existing, on-going TIS FEIS MOA. The Draft Section 106 Effects Analysis Case Study Report (CSR) (May 2020) was submitted on May 29, 2020, for review by the CRC members and the Seminole Tribe of Florida. The Seminole Tribe of Florida was also sent the *Section 106 Effects Analysis Case Study Report Update* for review and responded on June 12, 2020 that they concur with the findings.

In addition to the public involvement opportunities provided at the Historic Resource Information Meetings and CRC meetings, interested parties have been provided the opportunity to comment about historic properties and the Section 106 process through the project and/or program website, neighborhood meetings, Community Working Group Meetings, small group meetings, community events, the Ybor City Public Involvement Office or by phone. A complete list of community events, meetings, and presentations is included in the *Comments and Coordination Report* located on the project website at tampainterstatestudy.com.

4.7 Consultation Pursuant to Section 7 of the Endangered Species Act

Under Section 7, Federal agencies must consult with the UUSFWS when any action the agency carries out, funds, or authorizes (such as through a permit) *may affect* a listed endangered or threatened species. FDOT conducted agency coordination through the EST. The USFWS provided comments on August 25, 2017, regarding Fish and Wildlife Habitat and Wetlands, both of which were assigned a Degree of Effect of Minimal. The NMFS and USFWS also reviewed the *TIS SEIS Natural Resources Evaluation Technical Reports* (FDOT, 2018, b) in December 2018. Each of the agencies concurred with the findings of the analyses. Comments received from the agencies are provided in *Natural Resources Evaluation Reports* (FDOT, 2018, b).

The USFWS determined that the project alternatives would have minimal effect on wildlife or protected species and commented specifically on two federally-listed species, the Eastern indigo snake and the wood stork. Although the USFWS determined it was unlikely for the Eastern indigo snake to be within the TIS SEIS study area, they recommended the use of standard construction conditions and special provisions to assure the protection of the species. They also recommended complete gopher tortoise surveys to facilitate the use of the USACE *Eastern Indigo Snake Programmatic Effect Determination Key* (2010, amended 2013). Finally, the USFWS stated that the TIS SEIS project is within the core foraging area of at least one nesting wood stork colony and impacts to suitable foraging habitat should be avoided, or at least minimized, to the extent possible; that mitigation for unavoidable impacts should be coordinated with the USFWS. Formal consultation would occur during permitting, if needed.

4.8 Hillsborough MPO

As part of the continuous engagement, updates were provided on a regular basis to the Hillsborough MPO board and committees, including the Citizens Advisory Committee, Technical Advisory Committee, Livable Roadways Committee and Bicycle and Pedestrian Committee. FDOT staff were present at each monthly board and committee meeting to answer questions that may arise. In addition, FDOT staff hold monthly calls with MPO staff and TIS SEIS Project updates are often included in the discussion.

4.8.1 Hillsborough MPO Special Open Houses

FDOT participated in three open houses hosted by the Hillsborough MPO that focused on the TIS SEIS Project. The purpose of the open houses was to address various motions that the MPO Board had made throughout the past five years, along with concerns expressed by the MPO committees, and to simplify the SEIS information into topical discussions for the MPO Board and committees. The open houses were informal style with board displays and a handout describing the information available and layout of the room. A scripted video played continuously to describe the meeting content and format. Attendees could speak to several FDOT representatives and provide comments at the comment station. The open houses were publicly noticed by the MPO, and were attended by MPO staff, board members, committee

members and the general public. The open house materials are available on the public involvement section of the project website. The focus areas for these special open houses are listed below:

- # 1 Social and Community Impacts
- # 2 Natural Environment
- # 3 Traffic and Safety

The topics of the first briefing were related to motions from the MPO board regarding community, or human impacts. Materials shared by FDOT included:

- Problem statement, SEIS update, and TIS/SEIS commitments;
- Public engagement efforts;
- Sociocultural elements;
- Economic impacts:
- Transit;
- Parks/4(f) use;
- Historic resources;
- Bicycle/pedestrian facilities;
- SEIS roadway segments;
- Right of Way impacts/relocations, and
- Roll plots illustrating proposed improvements for each SEIS project segment.

A total of 45 people signed in at the registration table. Included in on the Sign-In sheet were a County Commissioner, 3 members from Hillsborough County, 2 members from the Westshore Alliance, and 1 member of the Hillsborough County MPO board.

A total of 18 comments were received, however, several were from the same individual. Outlined below is a general summary of the comments:

- Most supported improvements to the Westshore Interchange;
- Many requested additional information that will be addressed in future MPO briefings;
- Many comments didn't want express lanes, toll facilities, or any interstate expansion – either elevated or on ground.

The second briefing focused on motions from the MPO board regarding potential impacts to the natural environment including health, air quality, noise, and water management.

A handout described the format of the meeting, and explained how the exhibits were organized, by topic, in the room. Materials shared by FDOT included:

- Project Overview including the purpose and need, process, alternatives being considered and how MPO motions and comments have/will be addressed;
- Transportation and Health including an explanation of the “Health in All Policies Approach” for making all transportation policies, and how study addresses this approach through active living, improving bicycle/pedestrian safety, enhancing connectivity, and incorporating landscaping into the project;
- Environmental Exposures including water quality, stormwater, air quality and noise.
- Sustainability and Complete Streets and opportunities to incorporate the FDOT’s Complete Streets policy in concepts; and
- Next Steps including upcoming public outreach activities for the TIS SEIS project.

The third briefing focused on motions from the MPO board regarding traffic and safety. A handout described the format of the meeting, and explained how the exhibits were organized, by topic, in the room. Materials shared by FDOT included:

- Introduction and overview of previous briefings and MPO board motions;
- Project Overview including the study process, problems FDOT is trying to resolve, and the range of alternatives;
- Traffic Projections including future traffic operations, volumes, and travel times;
- Westshore Interchange concept, proposed access, connectivity, and safety considerations;
- Downtown Tampa Interchange concepts, proposed access, connectivity, and safety considerations; and
- Overview of the MPO LRTP and early survey results.

A total of 17 people signed in at the registration table. Included in on the Sign-In sheet were 5 members from Hillsborough County MPO and its’ associated committees, and 2 from the FDOT.

While directional signage for the briefing was provided, another community meeting was being conducted in the room next door, leading to several signees accidentally registering for the MPO briefing, therefore an accurate account of attendees is difficult to determine.

Four 4 written comments were received and summarized in the following:

- Do not want the project;
- One wants TB Next to be eliminated from consideration;
- Like express lanes, but do not want to pay for them.

4.8.2 MPO Comments on SEIS and Previous Motions by MPO Board

FDOT presented to the MPO Board in October 2019 on the LPA. At this meeting, the MPO provided FDOT a letter that included comments regarding eight previous motions made by the MPO Board regarding the SEIS and additional comments. The letter included the MPO’s comments regarding motions made and is located in **Appendix B**.

4.9 City of Tampa

FDOT coordinated with the City of Tampa throughout the study. The City and various departments provided feedback on build alternatives that were under evaluation. FDOT and the City of Tampa staff have been coordinating throughout the study, especially in regard to the build alternatives and potential connections to the local street network. In addition to 10 quarterly meetings with a cross section of City departments, including transportation, smart mobility, planning, CRA Management, and parks and recreation, FDOT has also engaged the transportation, CRA, and parks and recreation staff in nearly 20 technical meetings throughout the study.

A list of meetings with City of Tampa staff is located in **Appendix C**. Meetings minutes are in the project files.

4.10 City of Tampa Community Redevelopment Agency (CRA)

Since 2016, the City of Tampa CRA Board requested that FDOT provide quarterly updates on the TIS SEIS and work with the CRA advisory committees regarding potential impacts of the proposed improvements. The concerns identified by the CRA included potential impacts with the full reconstruction of the Downtown Tampa Interchange. The impacts included access to community amenities including Water Works Park, parking impacts, specifically on street that may impact businesses, vacancy rates, property values and TIF revenues for the CRAs. To address these concerns, the FDOT prepared an Economic and Fiscal Analysis Study (September 2018) for the TIS SEIS in partnership with the Tampa Bay Regional Planning Council. The study focused on three scenarios that were no further action, construction and non-tolled express lanes and construction and tolled express lanes and addressed the economic and community impacts for each scenario. The economic study is available on the project website and is summarized in the SEIS.

In addition, the economic analysis, FDOT provided seven updates to the City of Tampa CRA Board and 33 updates to individual community redevelopment areas and committees, shown in **Table 4-2**. **Figure 4-2** shows the community development areas for the City of Tampa.

Table 4-2 City of Tampa CRA Board and Committee Presentations

5. PUBLIC OUTREACH

From the onset of the study, public involvement has had an essential role. The study has provided various opportunities for the public to become engaged through a number of outreach strategies. Public outreach activities focused on providing open dialogue and two-way conversations with the public. The engagement activities ranged from traditional public meetings/workshops/ open houses, newsletters/ email blasts, and small group presentations to website, telephone hotline, and social media activities. FDOT have engaged the public door to door, in their homes, on neighborhood tours and safety walk-throughs, at coffee houses, and other local gathering places. In addition, FDOT established a local office in the Ybor community from March 2016 to present. The following subsections provide a summary of the major public involvement efforts and events held to date. A complete listing of community outreach events is located in **Appendix A**.

5.1 Newsletters

Newsletters were distributed at major milestones during the studies. FDOT published six newsletters between 2010 and 2016. From May 2017 to February 2020, FDOT published three newsletters for the TIS SEIS Public Workshops and Public Hearing. Additionally, four general newsletters on the TB Next program were distributed. In Fall 2020, the newsletter announcing acceptance of the Local Design and Concept Acceptance by FHWA was distributed. The TIS SEIS newsletters were sent to all addresses in the TIS SEIS study area, and to others who requested to be on the mailing list, totaling more than 9,000 addresses. Mailing lists are found located in **Appendix D**. Additionally, the most recent newsletters for the Public Workshops and Public Hearing were sent electronically to more than 4,500 email addresses. Newsletters are located in **Appendix E** and can be found on the project website, tampainterstatestudy.com.

5.2 Public Meetings and Workshops

FDOT hosted public meetings, project workshops and a public hearing on the study. All meetings were noticed as required on the Florida Administrative Register (FAR) and project websites. In addition, meeting invites were emailed to contacts and posted online and on social media. FDOT hosted Community Working Groups (CWG) to provide the public an opportunity to learn about the study and provide feedback. The format for CWGs was both open house and round table discussion based. FDOT hosted 20 CWGs throughout the region. A regional kickoff meeting was held in May 2017 and from June 2017 through November 2018, FDOT hosted ten CWGs in the SEIS study area listed in **Table 5-1**.

Table 5-1 Community Working Group Meetings

Date	Community Working Group
5/24/2017	Regional Community Working Group Kick Off Meeting
6/8/2017	Downtown Tampa/Urban Core Area Community Working Group Meeting
6/21/2017	Westshore/West Tampa Community Working Group

6/25/2018	Downtown Tampa/Urban Core Area Community Working Group
9/25/2018	East Tampa Community Working Group
11/15/2018	Westshore/West Tampa Community Working Group

TIS SEIS public workshops took place in October 2017 and May 2019. The workshops also included information about the Design Change Reevaluation for improvements to SR60/Memorial Highway from north of Cypress Street to Memorial Highway, a portion of the Northwest Hillsborough Expressway (NWE) now known as the Veterans Expressway. The meetings were held to involve the public in the preparation of the SEIS for the TIS, and the Design Change Reevaluation for the NWE and were held within the SEIS study area.

5.2.1 Public Workshop #1 – October 2017

On October 9 and 10, 2017, FDOT held two workshops at two different locations to maximize public participation. The materials presented at each meeting were identical. The purpose of these meetings was to provide information to residents, local public officials, and interested persons and organizations relative to the study history, SEIS process, design concepts and provide information about the significant public outreach and engagement and how to be involved in the process. A Spanish translator was present at these meetings to accommodate the needs of the local Spanish-speaking population.

A separate Historic Resources Meeting was held in conjunction with the workshops at the same locations in a separate room. The purpose of this meeting was to provide information to residents, local public officials, and interested persons and organizations relative to the process and schedule for identifying and evaluating historic resources, determining significant historic properties, and eventually evaluating potential impacts to significant historic properties.

Some 232 individuals in total attended the October 2017 workshops, and 81 public written comments were submitted during the workshop or following. Both workshops were held in an informal open house format. There was no formal presentation. During the workshops, representatives of the FDOT were available to discuss the NEPA/Project Development and Environment (PD&E) Study process, answer questions, and receive comments specific to these studies. The workshop scrapbook and all the workshop materials are available at tampainterstatestudy.com. The October 2017 workshops took place at the following locations:

TIS SEIS Public Workshop #1		October 2017	
October 9, 2017	October 10, 2017	October 9, 2017	October 10, 2017
Tampa Marriott Westshore	Hilton Tampa Downtown	Tampa Marriott Westshore	Hilton Tampa Downtown
1001 N. West Shore Boulevard, Tampa, FL 33607	211 N. Tampa Street, Tampa, FL 33602	1001 N. West Shore Boulevard, Tampa, FL 33607	211 N. Tampa Street, Tampa, FL 33602
4:00 p.m. – 7:00 p.m.	4:00 p.m. – 7:00 p.m.	4:00 p.m. – 7:00 p.m.	4:00 p.m. – 7:00 p.m.
122 attendees	110 attendees	122 attendees	110 attendees
36 written comments	35 written comments	36 written comments	35 written comments
* Additional 10 comments were received via mail or emailed to the department			

The most common subjects of these comments were:

- Support from the business community and commuters for capacity improvements along the interstate and new local street connections at Trask, Occident and Reo Streets in the Westshore area;
- Limited opposition to the express lanes concept;
- Concern regarding construction and ROW impacts to properties;
- Strong support for including mass transit options with an emphasis on rail, although questions remain about the feasibility of the transit envelope concept and practicality of regional rail;
- Support for traffic management opportunities to ease congestion;
- Preserve communities.

5.2.2 Alternatives Public Workshop – May 2019

A second series of public workshop meetings were held on May 21 and 23, 2019 at two different locations to maximize public participation. The materials presented at each meeting were identical. The purpose of these meetings was to present the design alternatives for the study to the public and to provide members of the public an opportunity to ask questions, discuss the study, and gather input regarding the location, conceptual design, and social, environmental, and economic effects of the proposed improvements.

In addition, FDOT presented 3D fly-through videos that presented the build alternatives as well as and before-after photo renderings. The inclusion of these visualizations was in response to community feedback asking for better 3-D renderings and graphics that illustrated the build alternatives. The before-after photo renderings included key areas along the study area and showed how the viewpoint would vary between the existing and the build alternatives.

A Spanish translator was present at these workshop meetings to accommodate the needs of the local Spanish-speaking population. The workshop scrapbook and all the workshop materials are available at tampainterstatestudy.com. The May 2019 workshops took place at the following locations:

TIS SEIS Public Workshop #2	May 2019
May 21, 2019 The Cuban Club 2010 N. Avenida Republica de Cuba (14th Street) Tampa, FL 33605 5:30 p.m. – 7:30 p.m. 116 attendees 19 written comments	May 23, 2019 Tampa Marriott Westshore 1001 N. West Shore Boulevard Tampa, FL 33607 5:30 p.m. – 7:30 p.m. 97 attendees 11 written comments
*An additional 49 comments were received via mail or emailed to the department	

Approximately 213 individuals attended the May 2019 meetings and 79 comments were received during or following these meetings. The main subjects of these comments were:

- Opposition to any additional road construction, with many supporting the “no build” option
- Support for increasing mass transit options
- Continuing concerns about how construction and ROW needs will impact properties
- There was moderate interest in additional sound and visual barriers

Comments received at the TIS SEIS workshops were documented and provided on TIS SEIS Project website at tampainterstatestudy.com. Workshops were noticed per the FDOT 2019 *PD&E Manual* requirements. Documents displayed at the public workshops were posted on the TIS SEIS Project website.

5.3 Small Group Meetings

FDOT participated in several rounds of small group meetings, listed in **Table 5-2**, with neighborhood associations, business groups, public interest groups, and other concerned people who were interested in the proposed transportation improvements. These meetings were organized by the interested party or group and FDOT was invited to present. The content included a PowerPoint presentation and question/answer period. Some included display boards and round table discussions. Visualizations were used in small group meetings following the May 2019 workshop to illustrate build alternatives with 3-D graphics and fly through video visualizations. Comments were documented and are part of the official study record. Since 2017, 45 small group meetings were held. Communities adjacent to and within the SEIS study area the FDOT engaged with are shown in **Figure 5-1**.

Westshore Area

- Support from community and businesses for the reconnection of Trask, Occident and Reo Streets and improved circulation for local traffic.
- Concerns for increased traffic on local streets and cut through traffic, especially along Trask Street.
- Access points to express lanes and Himes Avenue express lane access.
- Changes and enhancements in access north of interchange.

Downtown Tampa Area

- Concern regarding construction and rights-of-way impacts to properties
- Access, Floribraska Avenue closure (Access maintained under LPA)
- Concern of Noise
- Access 14th and 15th Street
- Transit opportunities
- Options A and C - Concerned about construction vibration, noise, and visual impacts along MacDill Avenue.
- Option A and C - Concerned about traffic increases on MacDill Avenue, especially around schools, park, ball parks, and community center.
- Option A - Fits with West Tampa CRA vision for Main Street businesses
- Option B - Better proximity to the Westshore District and commercial development
- All Options - Preference for walkability and better bike/pedestrian amenities
- All Options – Neighborhoods in this area were affected by the original construction and were not expecting additional ROW/environmental impacts.
- The City of Tampa prefers Option B due to the proximity to the Westshore District and planned commercial redevelopment.

5.4 Community Events and Outreach

To further communicate with stakeholders, the FDOT routinely attended and staffed community outreach booths at neighborhood, city-wide, and regional special events. The intent was to share study information and information on adjacent projects with members of the public that may not be able to participate public meetings. FDOT picked a diverse cross section of special events to allow for greater engagement with the broader community. FDOT participated in 52 outreach events, listed in **Appendix A**.

5.5 EJ Outreach

Executive Order 12898, *Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations*, defines environmental justice as the fair treatment and meaningful involvement of all people – regardless of race, ethnicity, income, or education level – in transportation decision-making. Environmental justice programs promote the protection of human health and the environment, empowerment via public participation, and the dissemination of relevant information to inform and educate affected communities. Environmental justice outreach activities for this project were done in accordance with Executive Order 12898; United States Department of Transportation (USDOT) *Updated Final Order on Environmental Justice*, 5610.2(a); and FHWA EJ Order 6640.23A, *FHWA Actions to Address Environmental Justice in Minority Populations and Low-Income Populations*.

FDOT has had a project office established for the community to stop in and ask questions or provide project feedback at different locations in the communities in the TIS SEIS study area. Prior to the issuance of the NOI, a project office was located at 2105 North Nebraska Avenue on weekdays from 10 a.m. to 6 p.m. and on weekends at the Robert West Saunders Sr., Public Library located at 1505 North Nebraska Avenue.

After the NOI was issued, FDOT opened a new project office at the Hillsborough County's Entrepreneur Collaborative Center in Ybor City. Project staff were present on site each Wednesday from 8 a.m. to 1 p.m. from November 2017 through early March 2020. Community members could meet with staff to address concerns, ask questions about the project or provide feedback.

The strategies FDOT used to build and sustain meaningful participation for all stakeholders included the tasks listed below to achieve the goals of the Executive Order as it applies to the TIS SEIS Project.

- Coordinated with area organizations that represent the interests of environmental justice populations of concern.
- Distributed project information via minority publications, faith organizations, schools, social and community organizations.
- Translated materials and provided Spanish speakers at workshops, community working groups and the public hearing to ensure suitable communication.
- Provided accessible formats to ensure appropriate communication media for the disabled and those with limited access to electronic media.
- Ensured that meeting venues were accessible to public transit and ADA-compliant.
- Published multiple advertisements in minority-owned newspapers to invite persons to attend the community working groups, public workshops, public hearings, and other FDOT meetings.
- Hosted community working groups and small group meetings in minority communities.
- Participated in community outreach events in minority communities.
- Participated in community leader led Listening and Learning Tours in minority communities.
- Conducted safety checks near FDOT-owned structures in Historic Ybor, VM Ybor, and Tampa Heights.
- Conducted neighborhood walk-throughs and ride-alongs with local residents to better understand residents' concerns in Seminole Heights, Tampa Heights, Historic Ybor, West Tampa, North Bon Air, and Downtown Tampa.
- Conducted door knocking campaign in VM Ybor and Historic Ybor to identify residents' and businesses' concerns regarding the proposed improvements along 14th and 15th Streets.
- Worked with Tampa Housing Authority to inform residents of Encore development (Downtown Tampa) about potential impacts of the proposed improvements.
- Coordinated with Collective Empowerment Group of Tampa Bay, Tampa Coalition of Clergy, and Pastors on Patrol.
- Collaborated with local community representatives to distribute neighborhood flyers for upcoming meetings and events.
- Established a local project office in Ybor City where individuals interested in the project can visit to receive information, ask questions or provide comments.
- Provided quarterly updates to the City of Tampa CRA Board and ongoing updates to individual Community Redevelopment Area Community Advisory Committees.

A list of outreach activities targeted to EJ communities is provided in **Table 5-3**. Meeting summaries are available in the project files.

5.6 Letters of Support

FDOT received letters of support in response to the proposed reconstruction of the Westshore Area (I-275/SR60) Interchange that would include both general purpose and express lanes. The department received 31 letters of support from local business groups, individual businesses, local agencies and commissions. A list of agencies that provided letters of support is located in **Table 5-4**.

The FDOT also received letters of support for the proposed improvements to the Downtown Tampa (I-275/I-4) Interchange. One letter was provided by Reverend Dr. Glenn B. Dames, Jr., on behalf of the Allen Temple African Methodist Episcopal (AME) Church. The letter identified the support for the proposed improvements to the relocated exit to 14th/15th Streets as part of the interchange improvements. Another letter in support of the I-275/I-4 interchange was provided by NAIOP. The letters of support for the reconstruction of the Westshore Area (I-275/SR 60) Interchange and improvements to the Downtown Tampa (I-275/I-4) Interchange are located in **Appendix F**.

5.7 Public Hearing

FDOT hosted a public hearing for the TIS SEIS on February 25 and 27, 2020 at two different locations in the TIS SEIS study area to maximize public participation. The hearings provided information on the LPA for the Westshore Interchange (I-275/SR 60) and Downtown Tampa Interchange (I-275/I-4) and areas in between. The materials presented at each meeting were identical. The purpose of these meetings was to provide information to residents, local public officials, and interested persons and organizations relative to the Draft SEIS document including the study history, SEIS process, design concepts and the LPA.

In addition, FDOT presented 3D fly-through videos that presented the LPA as well as and before-after photo renderings. The inclusion of these visualizations was in response to community feedback asking for better 3-D renderings and graphics that illustrated the LPA. The before-after photo renderings included key areas along the study area and showed how the viewpoint would vary between the exiting and the build alternatives. A Spanish translator was present at these meetings to accommodate the needs of the Spanish-speaking population.

Some 143 individuals attended the public hearings, in total, and 117 people submitted comments during the public hearing comment period or following. Both meetings were held in two parts with an informal open house format for the first hour followed by a formal presentation, during which oral comments were received. A court reporter was also available to receive oral comments. During the hearings, representatives of the FDOT were available to discuss the process, answer questions, and receive comments specific to the TIS SEIS. The public hearing scrapbook and all the hearing materials are available on the project website: tampainterstatestudy.com. A summary of the public comments is provided in **Appendix G**. The official public hearing transcript is provided in **Appendix H**.

TIS SEIS Public Hearings		February 2020
February 25, 2020 Hillsborough Community College Dale Mabry Campus – Student Services Building 4001 W Tampa Bay Boulevard, Tampa, FL 33614 5:00 p.m. – 7:30 p.m. 78 attendees 6 written comments 4 oral comments	February 27, 2020 Port Tampa Bay Cruise Terminal #6 1331 McKay Street Tampa, FL 33602 5:00 p.m. – 7:30 p.m. 65 attendees 5 written comments 18 oral comments	
* Additional 125 comments were received via mail or emailed to the department		

Major topics addressed by the comments received included the following:

- General support over the proposed express lanes and interchange improvements
- Recommendations that additional transit should be included as part of the proposed transportation improvements or provided in place of the proposed project with particular support expressed for future rail transit
- Requests for clarification about the engineering design (horizontal or vertical alignment)
- Concern over the proposed tolling of the express lanes
- Concerns over increases in traffic congestion on the interstate
- Concerns about safety on the interstate as well as on local roads particularly for pedestrians and bicyclists
- Site-specific concerns about potential construction-related congestion on local streets
- Specific concerns about potential noise impacts at individual properties
- Concerns about potential adverse environmental impacts and the effects on property values
- Concerns over the potential effects of stormwater runoff on the Hillsborough River
- Changes in access at the 14th/15th Streets and 21st/22nd Streets exits

All comments received from the public and response to them can be found in **Appendix G**.

5.8 Local Design and Concept Acceptance

On September 15, 2020, FHWA granted the Location and Design Concept Acceptance (LDCA) for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation. This action was published in the Federal Register on September 25, 2020.

FDOT notified elected officials in the Tampa Bay region via email on September 16, 2020. FDOT also notified the appropriate cooperating and participating agencies via FDOT's Environmental Screening Tool (EST) on September 16, 2020, and some agencies via hard copy letters. FHWA completed the tribal coordination by sending letters on September 21, 2020. FDOT also sent 10,605 newsletters to property owners and residents within 300 feet of the project the week of September 21, 2020. In addition, FDOT published newspaper ads in the Tampa Bay Times (September 23, 2020), La Gaceta (September 25, 2020), and Florida-Sentinel Bulletin (September 25, 2020). Notices announcing the LDCA are located in Appendix I.

6. CONCLUSION

Throughout the life of the TIS, FDOT has incorporated a variety of public outreach techniques to reach the diverse communities within the Westshore, West Tampa, Downtown, and East Tampa areas. FDOT seeks to balance input from the local residents and businesses with regional input received from commuters, freight distributors, and other users of the interstate system.

FDOT has incorporated feedback from communities, stakeholders and elected officials into concept plans that have been refined throughout the study to address community concerns and the study purpose and need. FDOT selected the express lane access in Westshore/West Tampa following community feedback and is proposing the access be located at Himes Avenue. This was selected from two additional points in the area. Additionally, FDOT developed the LPA to balance community concerns in the downtown area with the regional support to fully reconstruct the Westshore Area Interchange. The design for the Downtown Tampa Interchange addresses concerns from the community regarding a large project footprint and inclusion of express lanes. The LPA has a small ROW impact and addresses traffic operations and safety, both of which were raised as issues by local neighborhoods.

In response to feedback from the community, FDOT developed expansive materials to inform the community about build alternatives. This included 3D visualizations and fly through videos for build alternatives that showed what the build alternatives would look like compared to existing conditions. FDOT continued to refine concepts that incorporated community input and then shared them again with the community to ensure their needs were met. The LPA provides a balance of regional traffic demand with addressing local concerns and impacts.

7. APPENDICES

A. Outreach Activities (meetings, events, presentations)

Moving Forward Together

Community Engagement and Outreach

May 2017 through March 2020

What is Tampa Bay Next?

Tampa Bay Next is a program to modernize Tampa Bay’s transportation infrastructure and a process for engaging the public. Within sections of the program area, the addition of express lanes is being considered to provide additional capacity, relieve congestion and provide a more reliable travel time option for passenger and transit vehicles. In addition, improvements address safety and traffic operations on the interstates. Interstate modernization projects incorporate additional elements such as opportunities to add bicycle and pedestrian facilities, aesthetic treatments, transit accommodations, and reconnecting streets where possible.

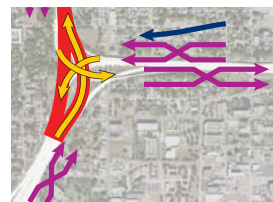

What Problems Are We Trying to Solve?

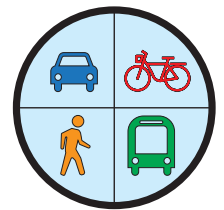

SAFETY

CONGESTION

TRAFFIC OPERATIONS

CHOICE

Our goal is to improve safety and mobility through innovation, collaboration, and community engagement.

How are we engaging the Community?

In May 2017, the Florida Department of Transportation (FDOT) District Seven launched Tampa Bay Next and committed to a new approach to transportation planning.

We are engaging in two-way dialogue, listening to the community, and collaborating with partner agencies on an unprecedented level.

Mr. David Gwynn, P.E., Secretary
Florida Department of Transportation District Seven
11201 N. McKinley Drive
Tampa, FL 33607

Re: Tampa Interstate Study, Supplemental Environmental Impact Statement (SEIS)

Dear Secretary Gwynn:

Thank you for all the efforts you and your staff have exerted to provide information and obtain the community's input on the SEIS. We particularly appreciate the three open houses arranged by the District for the benefit of the MPO and its advisory committee members, as well as numerous staff-to-staff coordination meetings and briefings.

In adopting the Transportation Improvement Programs over the past three years, the MPO passed motions asking that the District address impacts related to the Tampa Interstate Study, Tampa Bay Express and Tampa Bay Next. The attached comments are based on the requests made in these motions and other concerns articulated by the community as well as our review of available documents.

We look forward to continued coordination with you and other stakeholders as the Department works to finalize the SEIS over the coming months. We appreciate your regular updates to and discussion with the MPO board.

Sincerely,

Lesley "Les" Miller, Jr.
Chairman

Attachment: Comments on SEIS Sections 4-6

Tampa, FL, 33602

1. *MPO Motion: A finalized study and report on human impact, that would delineate the total number of all homes and multifamily dwelling complexes and business, displayed in a map and showing individual parcels, including impacts on affordable housing and how to pay for replacing them. A final neighborhood mitigation plan for displaced residents and businesses, including design elements.*

Summary of documentation provided by FDOT:

- The attached Right-of-Way and Relocations table shows the impact in terms of parcels, and remaining business and residential relocations for TB Next Sections 4, 5 and 6. Maps showing parcels to be relocated based on the conceptual designs for four “Build” options A through D for the Downtown Interchange are available at <http://tampainterstatestudy.com/hillsborough-mpo-special-briefing-1/>
- The Economic and Fiscal Impact Analysis also contains a detailed analysis of the existence of low-income populations along the corridor, stating that affordable housing and vacant apartment rentals are available.
- The SEIS refers to the Uniform Relocation Assistance and Real Property Acquisition Policies of 1970 as amended. Relocation assistance is an entitlement program provided by FDOT that is designed to assist persons who are displaced from their homes by a transportation project. Provisions of the program include assistance finding a comparable dwelling, purchase price subsidies or multi-year rent subsidies to make the comparable replacement housing affordable, and reimbursement of moving expenses.
- Although the Economic and Fiscal Impact Analysis prepared for the SEIS discusses the fact that seven out of the City’s eight Community Redevelopment Areas (CRAs) are adjacent to the Interstate Highways, MPO staff has not found any documentation of the impacts to affordable housing supply and how to pay for the replacement of affordable housing units that may be removed.

MPO response:

The removal of Presbyterian Village had a significant impact on the lives of many people who have limited resources. Even relocation assistance does not necessarily compensate for the disruption of social networks which may provide access to child care or health care, or for the reduced access to public transit that can result from being relocated away from the center of the city. The removal of Mobley Park would further extend these impacts. To better understand the potential impacts, we would like to see where residents displaced by the Interstate expansion have been relocated so far, and what support has been provided to them. **We reiterate our request to document the removal of affordable housing units.**

2. *Motion: Completed environmental impact studies for each segment.*

Summary of documentation provided by FDOT (available [online](#)):

- TB Next Sections 4 & 5 (Howard Frankland Bridge to Rome Ave)
 - Alternate Stormwater Management

- Contamination Screening Evaluation
 - Location Hydraulics
 - Natural Resources Evaluation
 - Water Quality Impact Evaluation
- TB Next Section 6 (Downtown Interchange including I-275 from Rome Ave to MLK Jr. Blvd and I-4 from I-275 to 50th St)
 - Contamination Screening Evaluation
 - Pond Siting
 - Natural Resources Evaluation
 - Location Hydraulics
- TIS SEIS All Segments
 - Economic and Fiscal Impact Analysis
 - Section 4(f) Parks and Recreational Resources Update
 - Project Traffic Analysis
 - Sociocultural Effects Evaluation
 - Air Quality
 - Cultural Resource Assessment Survey Update
- The Sociocultural Effects Evaluation acknowledges in an overall statement that there will be construction impacts from noise, dust, fumes, etc. and that these impacts will be minimized by applicable regulations. In FHWA's original Tampa Interstate Study Record of Decision (1997), FDOT committed to construction impact mitigation measures such as: the use of static rollers for compaction; restricting pile driving to the hours of 7 AM to 9 PM; minimizing heavy equipment back-up alarms; and restrictions on lighting of construction areas.

MPO Response:

We encourage FDOT to utilize Smart Work Zones to minimize delays, increase safety and avoid undue disruption to traffic flow during construction.

The documentation regarding noise impacts could be clarified. For example, a specific impact for the Carver City/Lincoln Gardens neighborhood is discussed in the Preliminary Engineering Report, stating that noise barriers are not financially feasible or will not be effective. However, an overall statement that noise barriers will be constructed to mitigate noise is included in the Sociocultural Effects Evaluation. **We request that the SEIS clearly identify desired noise barrier locations for evaluation during the final design phase, and the criteria that will be used to determine whether the noise barriers are feasible. Where they are feasible, we further request that the construction of noise barriers occur first to mitigate construction impacts.**

The latest forecast from the Tampa Bay Climate Science Advisory Panel identifies the potential for up to 8.5 feet of sea level rise by 2100. We request consideration of the sea level rise forecast during the design phase, especially as it affects Section 4. **Because this is an essential route for people and goods, we request consideration of hardening the I-275/SR 60 interchange and its connection to the east end of the Howard Frankland Bridge, making it less vulnerable to inundation and/or less likely to be damaged when inundated.**

3. *Motion: Traffic and revenue studies providing justification for the toll lanes.*

Summary of documentation provided by FDOT

- The *Tampa Bay Express Planning Level Traffic & Revenue Study Report* addresses express toll lane utilization. It forecasts traffic using the toll lanes in the range of 9% to 31% of total volumes in the PM peak period (excluding I-275 north of Downtown Tampa, which has since been dropped as a potential toll lane location).
- The Traffic and Revenue Study states that toll rates will fluctuate to manage Express Lane demand, to ensure typical speeds of at least 45 MPH at all times, providing a higher level of travel-time reliability. FDOT predicts that average speeds in the express toll lanes in the AM and PM peak will range from 53 to 58 MPH, versus 35 to 52 MPH in the general-use lanes. The “No Further Action” option is predicted to result in average speeds in the range of 30 to 38 MPH during the AM and PM peak.
- FDOT predicts that the four “Build” options for the Downtown Interchange would reduce delay per vehicle mile in 2045. Compared to the “No Further Action” option, Options A and B (full rebuild) would reduce delay per vehicle mile in the 46 to 68% range, and Options C and D (express lane flyovers) would reduce delay per vehicle mile in the 22 to 39% range. In terms of the predicted minutes of delay in the AM and PM peaks, Options A and B result in 24 to 36 seconds of delay per vehicle mile, and Options C and D both result in 48 seconds, as compared to No Further Action, which is predicted to result in 90-114 seconds of delay per vehicle mile.
- The Sociocultural Effects Evaluation prepared by FDOT cites several case studies of the equity impacts of toll lanes, stating:

Evaluations of the variably priced 91 express lanes in California report that low-income drivers use the express lanes and are as likely to approve of the lanes as drivers with higher incomes. In the study, over half of commuters with household incomes under \$25,000 a year approved of providing toll lanes. In a 2006 survey of users of the I-394 high occupancy toll (HOT) lanes in Minnesota, usage was reported across all income levels, including by 79 percent of higher income respondents, 70 percent of middle-income respondents, and 55 percent of lower-income respondents. Support for the managed lanes was also found to be high across income levels with 71 percent of higher income respondents, 61 percent of middle-income respondents, and 64 percent of lower-income respondents.

- However, the Evaluation indicates that lower-income populations may not have financial resources such as credit cards and bank accounts to establish electronic tolling accounts. It references mitigation measures such as one-time setup fee waivers, options for rate discounts and payment methods (e.g., pay-by-mail), toll waivers for transit vehicles and registered carpools/van-pools, and reinvestment of excess toll revenues back into the community, particularly for low-income populations who rely on transit.

MPO Response:

The experience of other cities with variable toll rates has been surprising to consumers in some cases, with rates sometimes becoming quite high at peak hour. **We request consideration of the mitigation measures and policies identified above to ensure equitable implementation of express toll lanes, and request to be informed during the design phase of the proposed toll rate policy, even if it is preliminary.**

4. *MPO Motion: Follow-up report on the premium transit study, to include consideration of the CSX-owned rail corridors.*

Summary of documentation provided by FDOT:

- The Regional Transit Feasibility Plan was presented to the MPO in May 2018. The study identified a “catalyst” project that would compete well for FTA funding. The two top-ranked corridors were:
 - I-275 between Wesley Chapel, Tampa, Gateway and St. Petersburg, and
 - the CSX-owned freight rail track between downtown Tampa and USF.The study recommended BRT-style shoulder-running buses in the I-275 corridor; TBARTA is now conducting a follow up PD&E focused on that corridor.
- The SEIS “build” options A and B for the Downtown interchange reserve a median “envelope” for premium transit. Options C and D do not.

MPO response:

- The MPO has raised concerns about and has not approved the project currently being studied by TBARTA, which uses I-275 through the center of Tampa. **The MPO requests more robust consideration of the other top-ranked transit “catalyst” project identified in the Regional Transit Feasibility Plan, reusing the CSX-owned freight rail track. We have continued to include this project in our Long Range Transportation Plan and are working with HART to advance it.**

5. *Motion: Status report on Federal Civil Rights investigation*

Summary of documentation provided by FDOT:

- In the attached letter dated July 8, 2018, the FHWA’s Office of Civil Rights dismissed a complaint filed by Matthew Suarez alleging that the MPO and FDOT violated Title VI of the Civil Rights Act of 1964.

6. *Motion: That FDOT report to the MPO Board on the cost of ad valorem tax revenue lost to the City of Tampa as a result of the TBX project, using FDOT’s most recent right-of-way acquisition map.*

Summary of documentation provided by FDOT:

- Right-of-way cost estimates compiled by FDOT range from \$25 million for Option C to \$131 million for Option A. FDOT estimates a loss to the City of \$491,422 in ad valorem revenue, and a loss of \$1,347,018 to Hillsborough County; most of the parcels needed are in the Westshore District and have already by purchased by FDOT.

- The Economic and Fiscal Impact Analysis prepared by TBRPC for the SEIS indicates that the loss in assessed property values in CRA districts will be offset later by a construction stimulus and economic growth, projecting annual net TIF losses of \$14,000 due to ROW purchases and construction impacts in the first four years, followed by annual net gains of \$348,000 climbing to \$788,000 over the next four years.
- The Sociocultural Effects Evaluation reaches a similar conclusion, stating that the express lane alternative results in:

... potential conversion of residential and non-residential sites into public property for transportation purposes. This conversion would initially decrease property tax income for the City of Tampa. However, ... the impact could be positive as properties near the facility and throughout the TIS SEIS study area may experience an increase in value, with possible attendant increases in tax revenues if greater accessibility makes the properties more attractive for development. This would be particularly true for development opportunities on vacant land and non-residential uses near major interstate interchanges.

MPO Response:

- The MPO requests that an estimate of the current value of ad valorem tax revenue lost to the City of Tampa, CRA and the County for the SEIS final preferred alternative be provided to the MPO board during the design phase.

7. *Motion: Cost to the City for operation and maintenance of any community impact mitigation*

Summary of documentation provided by FDOT:

- FDOT anticipates providing this information following the SEIS public hearing next year.

MPO Response:

- The MPO requests that FDOT update the MPO with cost estimates for any proposed landscaping or design features requiring local upkeep during the design phase, as these arrangements are worked out with the City of Tampa.

8. *Motion: The impact to air quality in Tampa*

Summary of documentation provided by FDOT:

- The draft Air Quality Technical Memorandum documents the results of air quality modeling for the SEIS for carbon monoxide (CO) and Mobile Source Air Toxic emissions (MSAT). MSAT includes nine different toxins such as ethyl benzene, formaldehyde, and diesel particulates.
- Regarding CO, future concentrations were predicted at five different interchanges for the No Further Action and the four "build" options. The model results were compared against the National Ambient Air Quality Standards (NAAQS) for CO set by the federal government. The

model predicts that CO concentrations at none of the five interchanges will exceed the NAAQS under the No Further Action and the four “build” scenarios.

- Again, regarding CO, there were no significant differences between the four “build” options. However, compared to the No Further Action option, the model predicts that the “build” options will increase CO levels at the I-275/MLK Jr. Blvd and I-4/50th St interchanges.
- Regarding MSAT, the draft Air Quality Technical Memorandum states that emission levels decrease as travel speed increases. In addition, emissions would likely be lower in future years than present levels in the current year because national standards for new vehicles are projected to reduce annual MSAT emissions by over 90 percent between 2010 and 2050. As a result, the 2045 No Further Action Alternative is forecast to result in an average decrease in all toxins combined by approximately 60 percent from 2018 Existing Conditions.
- Again, regarding MSAT, a comparison of the four “build” Options (A, B, C & D) to the 2045 No Further Action option forecasts that the “build” options would have lower MSAT emissions by an average of approximately 50 percent.
- At the macro (overall project) level, there was little difference between the “build” options, however, at the micro (segment) level, the model predicts that Options A and B result in lower MSAT emissions than Options C and D.
- The Air Quality Technical Memorandum further states that:

Improvements proposed under the [“Build” Options] may have the effect of moving some traffic closer to nearby populated areas; therefore, under each alternative there may be localized areas where ambient concentrations of MSAT could be higher under certain Design Options than the No Further Action Alternative. However, the magnitude and the duration of these potential increases compared to the No-Further Action Alternative cannot be reliably quantified due to incomplete or unavailable information in forecasting project-specific MSAT health effects.

MPO Response:

- The predicted air quality outcomes depend greatly on assumptions and parameters embedded in the MOVES model. These relate to vehicle technology, alternative fuels, and emissions standards assumed to be enforced by the federal government. We request that these be more clearly identified and tested with sensitivity analyses.
- We also suggest that Transportation Demand Management and Transportation Systems Management and Operations strategies be considered in all options to reduce vehicular travel and delay.
- The MPO has adopted a Health in All Policies approach to transportation planning as well as compiling data in a Health Atlas. The Atlas demonstrates that chronic diseases such as asthma, high blood pressure and heart disease are prevalent along Interstate Highway corridors. These chronic diseases particularly affect communities of color, lower income individuals, older adults, persons with disabilities and children.
- Recent reports by the EPA (airnow.gov) identify moderate concentrations of regulated air pollutants in our community. Taking Particulate Matter as an example, sensitive populations are cautioned to watch for symptoms such as coughing or shortness of breath. Particle

pollution is linked to several health problems, including coughing, wheezing, reduced lung function, asthma attacks, heart attacks and strokes.

- A recent analysis by the USF College of Public Health (see [September 11, 2019 WUSF News](#) article) finds that people of color are more exposed to air pollutants from traffic on heavily travelled roads in Hillsborough County. Looking at where they live, exposure rates for Low Income Individuals, African Americans, and Hispanics were up to 8 times higher than average. The highest emissions in Hillsborough County were observed along the major freeway corridors including I-75, I-275, and I-4, with elevated emissions also observed along the Veterans Expressway and the road network near Brandon and Town 'N' Country.
- Studies and peer-reviewed articles suggest causal links between exposure to traffic-related air pollution and chronic diseases including cancer, asthma, dementia, and cardiovascular disease. Two examples are found at:
 - <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3855107/>
 - <https://www.news.gatech.edu/2017/08/25/brake-dust-may-cause-more-problems-blackened-wheel-covers>
- Positive health outcomes are a local community concern and an MPO priority. **Therefore, the MPO requests that the design phase proactively address quality of life/health outcomes including mitigation of air quality impacts. Mitigation should address both the short-term construction-related and long-term health impacts. These may include designs such as green noise walls, greater landscaping and other techniques.**

9. *Other concerns*

- New, modified, and closed ramps, as well as new underpasses proposed in the “build” options will fundamentally change local traffic patterns in the Westshore and Downtown vicinity. Changes in traffic volumes and speeds could pose significant challenges to local plans to create more walk and bicycle-friendly communities. As a general comment, we are concerned about potential conflicts between bicyclists and walkers and high-speed traffic (40+ mph) exiting from these ramps. As we’re all aware through our partnership toward zero traffic deaths, the chance of death for a pedestrian hit at 40 mph is greater than 80%. The communities surrounding TB Next Sections 4-6 are some of the most walk/bike/transit focused in Florida and are becoming more so through redevelopment. **We request that the new and reconfigured ramps be presented so that the MPO board has an opportunity to review and comment on them.**
- We suggest that a comprehensive land use and transportation (including transit) circulation study be conducted for all local roadways, neighborhoods/parks affected, especially in the vicinity of the Trask Ave, 14th/15th and 21st and 22nd Streets exits. Such a study should also address how the acreage under the Interstate structures could be used for recreational and neighborhood enhancements.
- **Further, we request that the design phase proactively consider strategies such as road geometric/design techniques, signage, RRFBs and rumble strips to slow drivers down; high-visibility markings for all areas where pedestrians cross off-ramps today or in the future;**

and eschew wide turning radii and turns that do not require a full stop; particularly at the locations noted below. We further request that regular updates concerning these steps be provided to the Bicycle/Pedestrian Advisory Committee.

- In the Westshore district:
 - New ramps are proposed at Reo and Trask Streets, and new express lane ramps will be added to the Himes Ave exit. The proposed diverging diamond underpass on Reo Street does not clearly show how bicycle and pedestrian connections will function in this location. Previous discussions have indicated that FDOT is proposing shared lane markings on Reo between I-275 and connections to the north (Cypress Point Park). Given the access this will provide to the nearby U Path/Courtney Campbell Causeway Trail and future Howard Frankland Bridge Trail, we are concerned about potential conflicts with the increased traffic volume on Reo St as a result of the new ramps and underpass to the south side of I-275. The volumes and speed will be too high to accommodate cyclists using shared lane markings, and proposed pedestrian facilities are unclear on renderings and plans. **We request that the design phase clarify the proposed facilities and connections.**
 - Lemon Street and East Frontage Road both currently use shared lane markings for cyclists. Based on the proposed plans, these roads will both have new configurations that may result in higher volumes and speeds, potentially making them unsafe for non-motorists. **We request that the design phase clarify the proposed walk/bike facilities on these roadways.**
 - We are also concerned with potential conflicts between vehicles and pedestrians in the vicinity of Westshore Mall. Redevelopment is planned in and around the mall and will likely attract walkers and cyclists attempting to cross SR 60 and W Kennedy Blvd. High speed traffic exiting I-275 potentially poses pedestrian risks at SR 60 at W Kennedy Blvd and at the ramp from the Howard Frankland Bridge at Hoover Blvd.
- In Downtown Tampa, the “build” Options propose new or reconfigured ramps providing express lane access at Ashley, Tampa and Morgan Streets.
 - We understand that the City is considering a new hotel and student housing proposed between Ashley and Tampa Streets. Special attention is needed to mitigate the risks to walkers, cyclists and scooters trying to cross Ashley and Tampa Streets from traffic coming off and getting on the Interstate ramps. **We request that the design phase address traffic impacts and clarify the proposed walk/bike facilities on these roadways.**
- In the Ybor City area
 - The closure of ramps on 21st/22nd Streets and opening of new ramps at 14th/15th Street will fundamentally alter traffic circulation and specifically cause traffic volumes to double on 14th and 15th Streets, reinforcing the need for a comprehensive land use and circulation study in this vicinity.

- The City plans to extend the Green Spine Cycle Track through Ybor on Nuccio Parkway and northward on 15th St to Cuscaden Park. Cyclists will face higher traffic volumes moving at fast speeds as they cross the new ramps and frontage roads.
- Likewise, 13th Ave is proposed to become a frontage road between 14th/15th and 21st/22nd Streets and should be considered for safety strategies. **We request that the design phase clarify the proposed walk/bike facilities on these roadways.**
- In the East Tampa area
 - The East Tampa Community Revitalization Partnership has gone on record to express concern over the Floribraska Ave ramp closure's "potential to negatively and significantly impact the economic development in East Tampa without careful design considerations." We understand that this closure is no longer being considered but as outlined in the attached letter, the Partnership requests improved signalization, crosswalks, sidewalks, landscaping, lighting along the Nebraska Ave, Floribraska and 21st Ave corridors, gateway treatments and other improvements to support the East Tampa Strategic Action Plan. FDOT's response is also included as an attachment.
 - We understand that FDOT has met with the Partnership, and therefore **request that the Department brief the MPO on subsequent discussions, particularly to resolve issues pertaining to removal of several of the above improvements from the scope of the original Nebraska Avenue project (FPID 255853-1-52-01) due to cost reductions.**
- In the Tampa Heights area
 - **We would like to see the timeline for all community enhancements proposed in the Heights Mobility Study for Tampa St/Florida Avenue and Nebraska Avenue.**

- Trail and Greenway Gaps

To complete the Florida SUNTrail system, several gaps in the existing trail system within the SEIS study area need to be closed. These include segments identified as the West Tampa and I-275 Greenways along the south side of I-275 between Westshore and Downtown Tampa, for example from Westshore to Trask and from Cypress to Himes, including the Dale Mabry overpass . An extension of the Tampa Heights Greenway to connect to the Florida SUNTrail corridor would also be beneficial in supporting positive health outcomes. **We request that the SEIS identify these gaps, and the criteria that will be used during the design phase to determine the feasibility of closing them. As noted above, there are several locations in which greenways are proposed to intersect ramps where trail users are likely to encounter high speed traffic exiting from the Interstate. Treatments to maximize the safety of cyclists and walkers should be identified as part of the design phase.**

- Induced Demand

In discussing indirect effects on Environmental Justice, the Sociocultural Effects Evaluation states that "Secondary land use development could induce growth and travel within EJ

communities. This could put a strain on community facilities within those neighborhoods.”

Numerous studies have found that building additional highway capacity does little to alleviate congestion over time. See for example:

- o <http://www.daclarke.org/AltTrans/analysis.html#f1>
- o <https://www.growthopportunity.org/archives/2019/urban-traffic-congestion.pdf>

We request a more robust analysis of induced traffic, expanded to consider growth and traffic originating beyond the SEIS study area, and taking into consideration the effect of express toll lanes on regional land use patterns.

Right of Way (ROW) and Relocations

Tampa Interstate Study (TIS) Section	1A I-275 from Howard Frankland Bridge to east of Himes Ave.	2A I-275 from east of Himes Ave. to east of Norm Ave.	2B I-275 from east of Norm Ave. to north of HIX Jr Blvd. and I-4 from I-275 to east of 14th St.				3A I-4 from east of 14th St. to east 34th St.	3B I-4 from east 34th St. to east of 50th St.	
	4	5	6						
Tampa Bay (TB) Next Section	4	5	6						
Alternative and Design Option	No Further Action (Includes outer roadway approved under 1997 & 1999 RODs)	2018 Express Lane	No Further Action (No Build)	2018 Express Lane				2018 Express Lane	No Further Action (No Build)
				A	B	C	D		
ROW Impacts	Number of Parcel Impacted/Already Purchased/Remaining to Purchase	41/26/15	41/26/15	369/160/209	338/156/182	162/106/56	200/133/67	270/270/0	108/108/0
	Business Relocations Remaining	21	21	52	47	8	17	0	0
	Residential Relocations Remaining	0	0	336	321	28	96	0	0

Note: These are preliminary estimates based on the current design concept as of January 2019. Numbers may change as the design progresses. A Conceptual Stage Relocation Plan will be prepared in Summer 2019.

Definitions:

Number of Parcels Impacted – Total number of parcels either partially or fully within the concept footprint.

Already Purchased – Number of parcels within the footprint that FDOT already owns.

Remaining to Purchase – Number of parcels within the footprint FDOT will need to purchase.

Business Relocations – Number of individual businesses that may need to be relocated.

Residential Relocations – Number of residences that may need to be relocated. Assumes one residence per dwelling unit.

Matthew Suarez
402 S. Armenia Ave, Unit 139A
Tampa, FL 33609

Subject: Dismissal of Complaint DOT# 2016-0217

Dear Mr. Suarez:

This letter acknowledges that the Federal Highway Administration's (FHWA) Office of Civil Rights is in receipt of your complaint, originally sent by email on October 15, 2015, alleging that the Hillsborough County Metropolitan Planning Organization (MPO) and the Florida Department of Transportation (FDOT) violated Title VI of the Civil Rights Act of 1964 (Title VI) and USDOT's implementation regulations at 49 C.F.R. Part 21 and 23 C.F.R. Part 200. To be accepted for investigation, a complaint must meet the jurisdictional requirements described in FHWA's Investigations Manual, which conforms to the U.S. Department of Justice's procedures and standards for investigating complaints of discrimination. First, the complaint must be in writing. Second, it must describe an alleged discriminatory act that, if true, would violate FHWA's nondiscrimination regulations (i.e., an alleged discriminatory act based on race, color, national origin, sex, age, or disability). Third, it must be filed within 180 calendar days of the alleged discriminatory act. Finally, complaints must be filed against a recipient of financial assistance from the FHWA. In your complaint, you allege the MPO and FDOT violated Title VI when the MPO voted to include the Tampa Bay Express (TBX) projects into the MPO's Transportation Improvement Program (TIP) and did not adequately consult with the potentially affected community. In addition, you allege that minorities would disproportionately and adversely bear the effects of the TBX projects.

After careful consideration, the FHWA has concluded it will dismiss this complaint because (1) the alleged discriminatory effects related to Title VI do not bear a close enough causal connection to FDOT's and the MPO's actions to date and (2) the TBX projects are still in the early stages of the project development process. FHWA will continue to monitor and engage with the Florida Department of Transportation and the MPO closely to ensure compliance with Title VI and other federal laws. FHWA notes that nothing in this letter precludes you or another complainant from filing a Title VI complaint related to the TBX projects at a later date or for FHWA to initiate an investigation in the future based on new information it obtains.

Please note that you may file a private suit at any time pursuant to section 601 of Title VI. If you have any questions about this complaint with FHWA, please contact Kevin Resler at 202-985-8963 or kevin.resler@dot.gov.

East Tampa Community Revitalization Partnership
(ETCRP)
3808 N. 22nd Street
Tampa, FL 33610

January 28, 2019

Secretary David Gwynn, P.E.
FDOT District 7
Planning and Environmental Management Office
11201 N. McKinley Drive
Tampa, FL 33612

Dear Secretary Gwynn,

I am contacting you today on behalf of the East Tampa Community Advisory Committee (CAC) and the East Tampa Community Revitalization Partnership (ETCRP). Our community organization and members have participated in several recent Tampa Bay Next Workshops hosted in East Tampa and have discussed the I-275 / I-4 options presented in depth.

Several members of the East Tampa Community do not support the closure of the Floribraska exit and the future development of properties adjacent to an expanded I-275 and I-4 Interchange based on past, historic experience during the closure of the 34th Street and 40th Street exits. Our community believes that this project has the potential to negatively and significantly impact economic development in East Tampa without careful design considerations. To mitigate this potential negative impact, the ETCRP / CAC would like to request that several key items be incorporated in the TB Next plan and implemented moving forward. Requests include:

- Pedestrian safety improvements inclusive of added / improved crosswalks and consistent sidewalks along the Nebraska Avenue corridor (From Hillsborough Avenue to I-4),
- Landscape improvements including landscaped medians and bulb-outs where appropriate along the Nebraska Avenue corridor,
- Improved, aesthetically pleasing street lighting along the Nebraska Avenue corridor and the Floribraska / 21st Avenue corridor,
- Funded "road diet" with associated landscaping for Floribraska / 21st Avenue,
- Funded signalization changes and improvements to modify both Columbus Drive and 17th Avenue to two-way streets,
- Funded landscape improvements adjacent to I-275 and I-4. This should include the incorporation of significant landscaping proven to effectively provide air filtration near transportation corridors. This may also include the incorporation of linear parks in the East Tampa community in coordination with the City of Tampa.
- Funded gateway improvements in support of the East Tampa Strategic Action Plan.

Many of these requested items were included in the original FDOT-funded Nebraska Avenue project (FPID 255853-1-52-01) in March 2007. However, these improvements were subsequently removed from the project to reduce cost and never implemented. These requests support the East Tampa Strategic Action Plan (Nov 12, 2009) and will help mitigate the significant negative impacts of interstate expansion and the closure of the Floribraska exit.

Sincerely,

Natasha Goodley

Natasha Goodley, Chair
East Tampa Community Advisory Committee
East Tampa Community Revitalization Partnership

SECRETARY

March 21, 2019

Ms. Natasha Goodley, Chair
East Tampa Community Advisory Committee
East Tampa Community Revitalization Partnership
3808 North 22nd Street
Tampa, Florida 33610

Dear Ms. Goodley,

I received your letter dated January 28, 2019 regarding your organization's position on the proposed closure of the I-275 ramps at Floribraska Avenue (Ave.) and desired mitigation requests. As you know, the Florida Department of Transportation (FDOT) has spent a great deal of time in your community discussing future plans for the interstate and we appreciate you taking the time to understand the issues and provide thorough feedback.

As you know, the proposed closure of the I-275 entrance and exit ramps at Floribraska Ave. is being studied as a part of the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), which will not be completed until late 2020. It is important to note that funding for improvements to the Downtown Tampa Interchange has not been identified and construction of a long-term solution will likely fall outside of the next ten years. FDOT will continue to coordinate with your community and local agency partners on long-term solutions; however, there are several projects in the pipeline that may address some of your concerns in the short-term.

- **Pedestrian safety improvements inclusive of added/improved crosswalks and consistent sidewalks along the Nebraska Avenue corridor (from Hillsborough Avenue to I-4)**

FDOT completed Phase 1 of the Heights Mobility Study, which identified short-term safety improvements along N. Tampa Street (St.)/Florida Avenue (Ave.), and N. Nebraska Ave. in the East Tampa area. As a result, FDOT has programmed a project on Nebraska Ave. from Kennedy Boulevard (Blvd.) to Busch Blvd. (FPN: 443492-1) that will add crosswalks, fill sidewalk gaps, improve medians, and other safety-related elements. Design is scheduled to begin in 2022 with construction in 2024.

- **Landscape improvements including landscaped medians and bulb outs where appropriate along the Nebraska Avenue corridor**

Referring to our response to the previous concern, FDOT will review the corridor and identify landscaping opportunities, where appropriate, during the preliminary engineering phase in FPN: 443492-1. Coordination with the City of Tampa will be needed. In the next few months, we will reach out to East Tampa Community Revitalization Partnership (ETCRP) and the City of Tampa to discuss further.

- **Improved, aesthetically pleasing street lighting along the Nebraska Ave. corridor and the Floribraska / 21st Ave. corridor**

As a part of our traffic safety program, FDOT has completed or has planned, lighting enhancements within the East Tampa community. In partnership with the Tampa Electric Company (TECO) and the City of Tampa, FDOT upgraded to LED street lighting along Hillsborough Ave. from 15th St. to 40th St. FDOT also upgraded the lighting at the intersection at Hillsborough Ave./Nebraska Ave. to LED lighting.

FDOT identified additional corridors for lighting upgrades, including Nebraska Ave. from East Washington St. to Hillsborough Ave. and North 22nd St. from I-4 to East Cayuga St. We are actively seeking funding for both of these corridors.

LED lighting provides an overall higher visibility and uniformity compared to traditional lights, resulting in enhanced safety for bicycles, pedestrians, and motor vehicles, while reducing energy consumption and maintenance costs.

- **Funded road diet with associated landscaping for Floribraska / 21st Ave.**

Floribraska Ave./21st Ave. is owned and maintained by the City of Tampa. The City is designing improvements to Floribraska Ave. from Tampa St. to 9th St. (FPN: 436640-1). This project includes a road diet and improvements to sidewalks, bike lanes, crosswalks, and raised medians. Plans are nearly 60 percent complete and construction is scheduled for 2021.

The City is also considering an additional phase along 21st Ave. from Nebraska Ave. to 15th St. and potential future phases from 15th St. to Melburne Blvd. The plans would include a combination of cycle track, trail, and bike lane connections.

- **Funded signalization changes and improvements to modify both Columbus Drive and 17th Ave. to two-way streets.**

Columbus Dr./17th Ave. is under the jurisdiction of Hillsborough County. The Hillsborough MPO studied two-way improvements to Columbus Dr. and 17th St., but the project has not progressed. This is MPO Priority #59, and the latest construction cost estimate is \$1.6M. The County did agree to revisit the Columbus Dr./17th Ave. plans when funding becomes available.

- **Funded landscape improvements adjacent to I-275 and I-4. This should include the incorporation of significant landscaping proven to effectively provide air filtration near transportation corridors. This may also include incorporation of linear parks in the East Tampa community in coordination with the City of Tampa.**

Once a recommended alternative is identified in the TIS SEIS, FDOT will work with the community and the local maintaining agency (e.g. the City of Tampa) to identify additional landscape opportunity areas. It is anticipated that there will be landscape opportunities at potential pond sites and remainder parcels.

FDOT is also looking at a bicycle/pedestrian connection from Tampa Heights to the future Green Spine (14th/15th St.). This connection could be along Columbus Dr. or 14th Ave. Coordination with the City and County is underway.

- **Funded Gateway improvements in support of the East Tampa Strategic Action Plan.**

In review of the East Tampa Strategic Action Plan, it appears that there is one "major gateway" at I-4/ 50th St. and four "areas of interest" at I-275/Hillsborough Ave., I-275/Dr. Martin Luther King Jr. Blvd., I-275/Columbus Dr., and I-4/22nd St. In 2008, FDOT completed improvements to I-4, which included underpass improvements at 14th St./15th St., 21st St./22nd St., 26th St., 34th St., 39th St., and 50th St. Special aesthetics were incorporated within the boundaries of Ybor City National Register Historic District, including the 21st St./22nd St. fountains.

As a part of the TIS SEIS, FDOT is looking at potential improvements to the underpasses along I-275, including at Dr. Martin Luther King Jr. Blvd. and Columbus Dr. FDOT is also looking at underpass improvements to I-275 from north of Dr. Martin Luther King Jr. Blvd. to Bearss Ave., including Hillsborough Ave. as a part of a separate study (FPN# 431821-1). These improvements may include: wider sidewalks, enhanced lighting, painted bridge substructure, cut-back walls for improved bicycle/pedestrian experience, and public art and landscape opportunities. Our specific recommendations for these improvements will be determined at the end of the study and finalized in the design phase in coordination with the City of Tampa and ETCRP.

We would like to establish a chain of communication to follow up on these issues. While we recently participated in a bus tour of East Tampa, we could set-up a field visit specific to Nebraska Ave. to better understand your concerns. In addition, the City suggested that we may want to set-up a workshop with ETCRP to discuss these issues further.

Ms. Goodley

RE: Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS):
I-275 from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Blvd. and
I-4 from I-275 to east of 50th Street
Work Program Item Segment Number: 258337-2

Commissioner Miller:

The Florida Department of Transportation (FDOT) District 7 is has received your letter dated October 2, 2019 in regards to the Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement (SEIS) for I-275 from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Blvd. and I-4 from I-275 to east of 50th Street. The Federal Highway Administration (FHWA) approved the Draft SEIS for public availability on January 27, 2020 and FDOT hosted public hearing sessions on February 25 and 27, 2020. The public hearing materials, including the Draft SEIS and all the technical support documents, are posted on our website: www.tampainterstatestudy.com.

Draft SEIS Locally Preferred Alternative (LPA)

The Draft SEIS recommended a Locally Preferred Alternative (LPA). The recommended LPA was presented to your board in October 2019 and again in February 2020. The LPA consists of the reconstruction of the I-275/SR 60 interchange with the addition of two tolled express lanes in each direction along I-275 connecting the Howard Frankland Bridge to the Veterans Expressway, Tampa International Airport, the Westshore Business District, and Downtown Tampa (at Ashley Street). The recommended LPA for the I-275/I-4 interchange consists of safety and operational improvements, which is consistent with the feedback received during the MPO's recent Long-Range Transportation Plan (LRTP) survey in late 2019. We also refer to the LPA as Option E.

At the time your letter was written, the Draft SEIS had not been published. Therefore, many of the concerns in your letter refer to Options A-D, rather than the recommended LPA, or

Option E. Keep in mind that FDOT has received numerous comments on the LPA from residents, businesses, and government agencies. The public comments will be summarized in the Final SEIS and the Comments and Coordination Report. FDOT will continue to work with the MPO, City of Tampa, and Hillsborough County to refine the LPA throughout this study and beyond through the conceptual design phase.

FDOT Response to MPO Motion #1

Relocation Assistance is an entitlement program designed to assist persons who are displaced from their homes by a transportation project. Provisions of the program include making comparable replacement housing affordable and reimbursing moving expenses. Eligibility to receive a replacement housing payment or be reimbursed for moving expenses is determined by each displacee’s need in accordance with the specific state and federal guidelines.

FDOT prepared a Conceptual Stage Relocation Plan (CSRP, January 2020) to evaluate the number and type of relocations resulting from the proposed project and to identify any socio-economic impacts to the surrounding neighborhoods that might occur as a result of implementing the LPA. Table 1 depicts the anticipated right of way impacts associated with the recommended LPA. The CSRP indicates that the 6 residential relocations (including 4 tenants) and 0 business relations are in Census Tract 32 in the VM Ybor neighborhood in the vicinity of Downtown Tampa. The study also indicates that over 65 percent of the residences are renter occupied.

Sufficient comparable replacement sites are available or will be made available for residences and businesses alike. The CSRP identifies potential comparable housing within the community. None of the businesses proposed for acquisition are considered to be major employers and do not appear to present any unusual relocation issues. This project does not appear to have any business displacements that provide services to the elderly, handicapped, non-driver, transit-dependent, or to minority groups.

FDOT has worked with the community to greatly reduce the potential property impacts, particularly in the Downtown Tampa area. Mobley Park Apartments will not be impacted. There are no known impacts to subsidized-public housing within the LPA footprint. We do not know the status of individual property-owners or renters or the potential utilization of housing subsidies at this time.

The CSRP and the Draft SEIS are available on the study website at:
www.tampainterstatestudy.com.

Table 1

TIS SEIS Segment	Business Relocations	Residential Relocations
I-275/SR 60 (TIS Segment 1A)	21	0
I-275 through West Tampa (Segment 2A)	0	0
I-275/I-4 (TIS Segments 2B and 3A)	0	6

FDOT wants to ensure that people receive fair treatment when they are required to move from their homes to accommodate a transportation facility. Every resident will be afforded relocation benefits and we work with the displacee to relocate them to the location they desire whether in the same community or elsewhere. Some may even be able to become homeowners instead of renters. Presbyterian Village had 140 displacees, 13 became homeowners, and 6 moved out of the Tampa area. This link is a story the Tampa Bay Times published in 2015 on Presbyterian Village relocations:

<https://www.tampabay.com/news/humaninterest/in-the-path-of-a-bigger-i-275-tampa-renters-move-out-on-and-up/2259235/>.

FDOT Response to MPO Motion #2

FDOT is developing a comprehensive Transportation Management Plan (TMP) for the reconstruction of the I-275/SR 60 interchange called **Safe TRIP**. The **Safe TRIP** initiative will ensure safety and mobility through successful Traffic Management, Regional Demand Management strategies, Innovation, and Public Engagement. **Safe TRIP** will promote transportation demand management (TDM) strategies, encourage public transit use, incorporate smart work zones, and identify proactive communication platform to provide real-time information to travelers, local community, and agency partners. FDOT will invite the MPO and other local entities to participate in the **Safe TRIP** Community Advisory Taskforce.

FDOT has prepared a Noise Study Report Update (November 2019), which documents the noise wall analysis and proposed locations. The proposed noise walls were shown on the exhibits at the February 2020 public hearings. This report and the public hearing exhibits are available on the project website: www.tampainterstatestudy.com. As the project progresses to design, the noise study will be updated again to better reflect horizontal and vertical geometry of the project and the final location of the noise walls. FDOT is willing to construct the noise walls first to buffer construction, where possible, if the noise wall is proposed within the community (along the right of way edge) versus on the shoulder or barrier walls along of the roadway.

FDOT uses the ADCIRC Prediction System (APS) to predict the storm surges, flooding, wind and wave interactions, and speed of tides and currents. APS uses modeling technology with a 30-year track record of providing accurate representations of coastal water movement, flooding, and storm impacts. The system was developed and is operated by the Coastal Resilience Center, a Department of Homeland Security Center of Excellence.

The model analyzes the predicted higher levels of water. For Tampa Bay, the appropriate historical Sea Level Rise (SLR) trend was calculated at 2.71 mm/yr. This average was linearly extrapolated out for 75yrs, which is the standard design life for highway bridges, to produce an estimate of 0.666 ft (203 mm) of SLR. As a result, in the model the initial water elevation was set to 0.702 feet-NAVD88 to account for SLR and the local mean sea level during hurricane season. The minimum height for the Howard Frankland Bridge to be built is 8 ft. higher than

the current northbound bridge. The I-275/SR 60 would align with the geometry of the Howard Frankland Bridge.

In addition, the Florida Design Manual has been updated to reflect best practices in designing for resiliency and climate change throughout the past several years. More details on the resiliency features of the interchange will be available during the conceptual design phase.

FDOT Response to MPO Motion #3

As FDOT's toll policy evolves, we will continue to provide updates to the MPO. FDOT intends to collect tolls electronically through its SunPass System. SunPass transponders are available for purchase at over 3,100 retail locations in Florida as well as all Turnpike service plazas, Turnpike gas stations, SunPass Service Centers, select Florida Welcome Centers, Visitor Centers, Rest Areas, and select County Tax Collector's Offices. They can also be purchased online at the SunPass website: <https://www.sunpass.com/en/home/index.shtml> and at local Publix with a credit/rebate essentially equal to the purchase price.

Travelers will still be able to travel toll-free on the existing general use lanes that would be parallel to the proposed express lanes. Registered public transit, public school, and private buses are exempt from paying tolls on express lanes, but must have a Sunpass and valid license plate. Persons with disabilities are exempt from paying tolls, if they are registered, have a Sunpass, and have valid license plate.

FDOT Response to MPO Motion #4

It is important to differentiate the TIS SEIS from the Regional Bus Rapid Transit Study and other transit studies. The TIS, as the name would indicate, is a plan for the interstate modernization within Tampa's urban core. Within the TIS, FDOT has accommodated transit in several ways, such as providing a transit envelope and multimodal centers, and allowing public buses to utilize the express lanes toll-free. FDOT is also looking at ways to accommodate bus on shoulder, transit signal priority on adjacent state roads, and incentivizing transit, particularly during construction.

FDOT understands the roads are only one part of the equation. Outside of these interstate/roadway-related transit opportunities, FDOT has funded \$214 million in transit projects in the past 5 years, including \$32 million in the City of Tampa, such as:

- Tampa Streetcar Modernization and Extension Studies (City of Tampa)
- Arterial BRT Study (HART)
- Streetcar Fare Subsidies (HART)
- Downtowner (HART/Tampa Downtown Partnership)
- Regional Multimodal Center Studies (FDOT)
- Route 275LX and Block Grants for Transit Operations (HART)

- Regional Rapid Transit PD&E (TBARTA)

FDOT is more than willing to partner with the local agencies on any viable transit projects, including utilization of the CSX rail lines for premium transit service, if the project is deemed feasible under federal and state funding guidelines and it is supported by the MPO as a top priority. FDOT encourages the MPO to work with local agencies to establish a locally recommended alternative and a financial plan for the capital costs, as well as all of the on-going operations and maintenance of the system.

FDOT Response to MPO Motion #5

No response needed. Claim was dismissed by FHWA.

FDOT Response to MPO Motion #6

FDOT cross-referenced the proposed property acquisitions for the Draft SEIS LPA shown in Table 1 with the current Hillsborough County tax rolls to determine the total ad valorem taxes that would be lost, if FDOT acquires these properties. The parcels to be acquired in Westshore totaled around \$135,000 in City of Tampa ad valorem taxes and \$345,000 in Hillsborough County ad valorem taxes. The parcels to be acquired in Downtown Tampa totaled around \$6,100 in City of Tampa ad valorem taxes. Property acquisition is subject to change as the project progresses. FDOT can provide updates during the design phase, as requested.

Note: FDOT did not assess the ad valorem taxes from properties we already own, as this exercise would be very complex and is irrelevant to Draft SEIS LPA.

FDOT Response to MPO Motion #7

While there is no funding for the I-275/I-4 improvements, there is funding for the reconstruction of the I-275/SR 60 and express lane connections to west side of Downtown Tampa. The next phase of the project is the conceptual design phase. During this phase, FDOT is working closely with the City of Tampa on the interstate connections to local roadways; potential bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide updates. Cost estimates will be developed as concepts evolve. Typically, FDOT and the maintaining agency will develop a maintenance agreement that identifies roles, responsibilities, costs, etc. FDOT can provide updates on these conversations throughout the conceptual design phase, including the projected costs.

FDOT Response to MPO Motion #8

The U.S. Environmental Protection Agency (USEPA) has promulgated, and routinely reviews, National Ambient Air Quality Standards (NAAQS) for six air pollutants that harm both health and the environment. For the purpose of monitoring ambient (i.e., outdoor) levels of the pollutants, the USEPA, in cooperation with state and local agencies, operates a network of air monitoring stations. The locations of, and data from the stations are available on USEPA's website (www.epa.gov/outdoor-air-quality-data).

The USEPA designates all areas of the country with respect to the levels of measured pollutants and the standards. Areas designated nonattainment are areas in which a standard or standards have been exceeded. Within District 7 there is a small area in Hillsborough County just west of the Mosaic phosphate fertilizer plant in Polk County that is designated nonattainment for the air pollutant sulfur dioxide. Within all other areas of Florida, air pollutant levels are below, and in most cases well below, the health and environment standards.

The FDOT evaluates the air quality effects of improvements to the transportation network at the project level. For the Draft SEIS, FDOT performed a carbon monoxide screening and Mobile Source Air Toxics (MSATs) analysis, as these compounds have the potential to result in adverse health effects. Based on the results from the screening model, the highest CO one-hour and eight-hour levels are not predicted to meet or exceed the one-hour nor eight-hour NAAQS for this pollutant with either the No Further Action or 2018 Express Lane Alternative. As such, in all locations tested, the project "pass" the screening model, meaning the one-hour concentrations do not exceed 35 parts per million of CO (ppm) and the eight-hour concentrations do not exceed 9ppm. All of the Design Options (A, B, C, D & E) for the 2018 Express Lane Alternative showed an improvement in MSAT emissions when compared to the 2045 No Further Action Alternative by an average decrease of approximately 50 percent. There is a decrease in emission levels for each of the nine MSAT toxins.

In addition, FDOT provided information at the second MPO Open House on April 30, 2019 regarding how the TIS SEIS can address health in transportation. We focused on encouraging active transportation, improving bicycle and pedestrian safety, enhancing community connectivity, and incorporating landscape and other community features. We also presented our approach to addressing air quality, water quality, and noise abatement. We are currently working with MPO staff to identify opportunities for more environmentally-friendly noise walls. Also, we presented sustainability opportunities that the TIS SEIS could take advantage of during design and construction. Materials from this open house can be accessed at: <http://tampainterstatestudy.com/hillsborough-mpo-special-briefing-2/>. We are also working with the local community on opportunities to activate FDOT-owned parcels for community use and landscaping. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide updates. Cost estimates will be developed as concepts evolve. Typically, FDOT and the

maintaining agency will develop a maintenance agreement that identifies roles, responsibilities, costs, etc.

FDOT already invests heavily in TDM (supporting TBARTA) and public transit, as suggested in our response to Motion #4. However, as mentioned in our response to Motion #1, FDOT is developing a comprehensive Transportation Management Plan (TMP) for the reconstruction of the I-275/SR 60 interchange called **Safe TRIP**. **Safe TRIP** will promote transportation demand management (TDM) strategies, encourage public transit use during construction, and utilize smart work zones. The MPO will be invited to participate in the planning process.

FDOT Response to #9 Other Concerns

Interaction between Interstate and Local Roadways - Throughout the SEIS process, FDOT has listened to the community and integrated public comments into the concept plans, such as keeping the Floribraska Ave. ramps open. The latest concept plans were presented at the public hearing in February 2020 and are available on-line.

As suggested in our response to MPO Motion #7, the next phase of the project is the conceptual design phase. During this phase, FDOT is working closely with the City of Tampa on the interstate connections to local roadways; potential bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. The conceptual design phase will reveal more details on:

- Reo St., Lemon St., Westshore Blvd., Occident St., and Trask St. in the Westshore Business District
- Road network along north side of Julian B. Lane Park connecting under I-275 to Main St.
- Ashley St., Scott St., and Jefferson/Orange St. in Downtown Tampa
- 14th/15th St. and 21st/22nd St. in Ybor City, including accommodation of the Green Spine and improvements to 13th Ave.
- Trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City, including enhanced safety measures within the corridor for bikes and pedestrians.

At the MPO Special Open House #1 and #3, as well as the February 2020 public hearings, FDOT presented a graphic that depicted the bicycle/pedestrian connectivity adjacent to the interstate throughout the Draft SEIS project limits. Where possible, FDOT will include these connections within FDOT right of way. However, FDOT is working with the City of Tampa on areas where right of way is constrained and gaps may need to be filled with sidewalks, sharrows, or other elements. Some of these connections will be cleared outside of the Draft SEIS, such as the Dale

Mabry Overpass. FDOT can provide regular updates to the MPO and committees, as requested, on this coordination throughout the conceptual design phase.

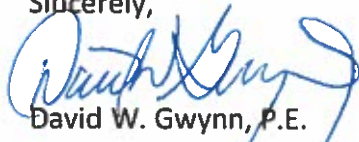

East Tampa and Tampa Heights Projects - Outside of the SEIS process, FDOT has been working with the communities of East Tampa and Tampa Heights on improvements to various state roads within their respective communities. We understand that the MPO has prioritized many of these projects and FDOT has funded several of the improvements. We will continue to work with these communities and can provide briefings to the MPO and committees, as requested.

Induced Demand - FDOT's decision to introduce tolled express lanes in the Tampa Bay area as a congestion management tool has evolved throughout the past 10 years and tolled express lanes have been a part of the Hillsborough MPO's LRTP for the past 10 years, as well as the Regional Transportation Management Area's (TMA) and TBARTA's regional priority lists. While the Draft SEIS LPA does not include capacity improvements in the Downtown Tampa area, the LPA does include tolled express lanes that will connect the express lanes from the Howard Frankland Bridge and the Veterans Expressway. The Tampa Bay Regional Planning Model reflects the MPO's LRTP, including express lanes, as well as the anticipated land uses shown in the City of Tampa, City of Plant City, City of Temple Terrace, and unincorporated Hillsborough County. Currently, those plans are predicting that our population will almost double and employment will more than double by 2045. As the comprehensive plans are updated, FDOT is willing to partner with the Planning Commission, the MPO, and the local agencies to determine what transportation solutions best meet the needs of this growing region.

Conclusion

FDOT is approaching the final steps in the SEIS process. Over the next few months, we will prepare the Final SEIS for FHWA review and approval and we will further vet the details of the concept plans in the conceptual design phase in coordination with our local agency partners. FDOT is very thankful for our partnership with the Hillsborough MPO Board and we are committed to continued coordination with the Board and staff. In the meantime, if you have any additional questions, please let me know.

Sincerely,

David W. Gwynn, P.E.
District Seven Secretary

What is Tampa Bay Next?

Tampa Bay Next is a program to modernize Tampa Bay's transportation infrastructure and prepare for the future.

The Program Includes:

- Interstate Modernization
- Transit
- Bike/Pedestrian Facilities
- Complete Streets
- Transportation Innovation
- Freight Mobility

Tampa Bay Next Priorities:

- Move people and goods safely and efficiently
- Build a comprehensive regional transportation system
- Create meaningful opportunities for public input
- Balance regional needs with community concerns
- Commit to sustainable infrastructure decisions

Modernize infrastructure | Prepare for the future | Embrace collaboration and innovation

FDOT Launches Tampa Bay Next

FDOT is launching Tampa Bay Next, a program to modernize Tampa Bay's transportation infrastructure and prepare for the future.

District Seven has taken a comprehensive approach to transportation planning and development for a truly integrated, multimodal regional transportation system.

"Tampa Bay Next breaks down silos and allows for greater public involvement in determining the best solutions for Tampa Bay's complex transportation challenges," said Bill Jones, District Seven Director of Transportation Development.

FDOT is engaging Tampa Bay in open and transparent dialogue about the community's transportation needs and core values. Public input matters to FDOT and will help inform our decisions as an agency. If you would like FDOT to participate in your community event or provide an update to your organization, please email TampaBayNext@dot.state.fl.us.

Upcoming Events

Wednesday, May 24:

Community Working Groups
Regional Kickoff (5:30-8:30 p.m.)
**Bryan Glazer Family Jewish
Community Center**
522 N. Howard Avenue
Tampa FL 33606

Thursday, June 8:

Downtown Tampa Community
Working Group Meeting (5:30-7:30 p.m.)
**Children's Board of
Hillsborough County**
1002 East Palm Avenue
Tampa, FL 33605

FDOT in the Community

We want to make it easy for you to interact with FDOT, so we'll be participating in community-based events around Tampa Bay. For a list of where we'll be, please visit TampaBayNext.com. To recommend additional engagement opportunities, please contact TampaBayNext@dot.state.fl.us.

FDOT will host local and regional opportunities to participate in developing meaningful transportation solutions.

For more project specific information and to get involved:

TampaBayNext.com | TampaBayNext@dot.state.fl.us | (813) 975-NEXT | [f TampaBayNext](https://www.facebook.com/TampaBayNext) | [@TampaBayNext](https://twitter.com/TampaBayNext)

Note: Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Chris Speese, Public Involvement Coordinator, at (813) 975-6405, (800) 226-7220 or email: christopher.speese@dot.state.fl.us at least seven (7) days prior to a meeting.

Comuníquese con nosotros: os importa mucho la opinión del público sobre el proyecto. Si tiene preguntas o comentarios, o simplemente desea más información, por favor comuníquese con nosotros. Nuestra representante en español es: Sandra González, (813) 975-6096, sandra.gonzalez@dot.state.fl.us, Departamento de Transporte de la Florida – Distrito 7 11201 N. McKinley Dr., Tampa, FL. 33612

Community Working Groups Update

Thank you to the more than 180 people from throughout Tampa Bay that attended the Tampa Bay Next Community Working Groups Regional Kickoff on May 24. The Real Time Record and other documents provided by Collaborative Labs from this event are available by visiting www.TampaBayNext.com/Get-Involved/Community-Working-Groups.

An integral part of this program's public engagement includes Community Working Groups being held throughout the region by Collaborative Labs, a Tampa Bay-based, third party, independent facilitator. Their role is to focus group discussions on producing actionable results that balance regional level goals with community level concerns.

FDOT's goals for the Community Working Groups are to:

- Engage the Tampa Bay region in the transportation planning process
- Enhance cross-agency collaboration and technical excellence coordination
- Provide a forum for the public to influence transportation decisions

The community is invited to participate in these roundtable discussions with local and regional agency partners. To learn more about the Community Working Group representing where you live or work, please contact us at TampaBayNext@dot.state.fl.us.

Upcoming Events

June 8, 5:30 p.m. to 7:30 p.m.

Downtown Tampa Area Community Working Group
Location: **Centro Asturiano de Tampa**,
1913 N Nebraska Ave, Tampa, FL 33602

June 21, 5:30 p.m. – 7:30 p.m.

Westshore Community Working Group
Location: **Hillsborough Community College**
Dale Mabry Campus, Building,
4001 W. Tampa Bay Boulevard, Tampa, FL 33614

July 13, 5:30 p.m. – 7:30 p.m.

Pinellas Community Working Group
Location: **Collaborative Labs**
St. Petersburg College
13805 58th Street North, Clearwater, FL 33760

FDOT will host local and regional opportunities to participate in developing meaningful transportation solutions.

Comuníquese con nosotros: nos importa mucho la opinión del público sobre el proyecto. Si tiene preguntas o comentarios, o simplemente desea más información, por favor comuníquese con nosotros. Nuestra representante en español es: Megan Olivera, (407) 709-9840, Megan.Olivera@QCAusa.com.

Community Engagement

Tampa Bay Next is a program to modernize Tampa Bay's transportation infrastructure and prepare for the future. FDOT has launched the program by engaging communities across the Tampa Bay region to learn shared values and determine consensus points for moving forward.

In addition to the Community Working Groups, the Tampa Bay Next team is coming to you! Look for us at neighborhood markets, public parks and community events. A complete list of scheduled community outreach events can be found at: www.tampabaynext.com/get-involved/outreach-calendar/

Upcoming Dates

June 10 - North Tampa Market

10 a.m. – 2 p.m.
Carrollwood Cultural Center
4537 Lowell Road, Tampa

June 11- Seminole Heights Sunday Morning Market

11 a.m. – 3 p.m.
Southern Brewing and Winemaking
4500 N. Nebraska Avenue, Tampa

June 13 – Hillsborough Metropolitan Planning Organization (MPO)

Transportation Improvement Program Hearing
6:00 pm – 8:30 pm
Board of County Commission Chambers, 2nd Floor
601 E Kennedy Blvd, Tampa

If you would like to participate in a Community Working Group, or to schedule a presentation by Tampa Bay Next for your organization, contact us:

TampaBayNext@dot.state.fl.us or 813-975-NEXT

Modernize infrastructure | Prepare for the future | Embrace collaboration and innovation

FDOT Hosts Series of Community Working Groups

Tampa Bay Next is a program to modernize Tampa Bay's transportation infrastructure and prepare for the future. Tampa Bay Next is also a process of Florida Department of Transportation (FDOT) working with the community to determine the right set of transportation solutions.

In May, FDOT launched the Community Working Groups program with a kickoff event at the Bryan Glazer Family Jewish Community Center. Moderated by Collaborative Labs, the event was a major step in a new direction as we seek community-based input to guide us through decisions in the planning process. At the meeting, the community discussed the ideal future of regional transportation which included ideas related to safety, multi-modal opportunities, technology and funding sources.

Since that meeting, the Community Working Groups have initiated their quarterly sessions. See the upcoming events for a list of meeting dates and times.

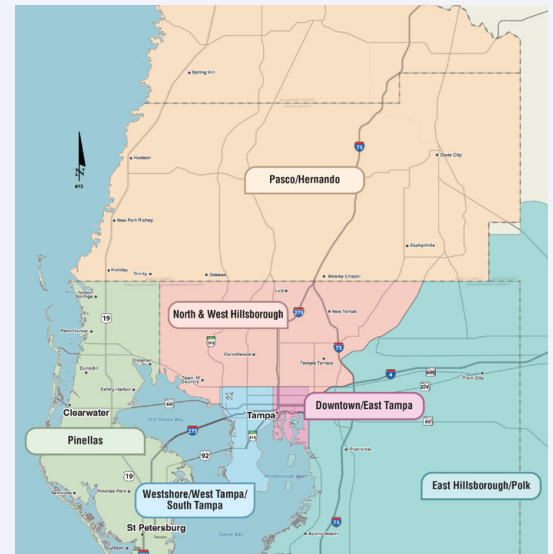

In addition to the working groups, FDOT is going into the community, meeting people in locations where they gather, places like weekend markets, public parks, food truck events and more.

"We hope the community feels encouraged by our new direction. We are serious about gathering input as we develop a plan that will reflect the values of our community while solving our interstate congestion problems." – Ed McKinney, Planning and Environmental Administrator, FDOT District Seven

For more information on the Community Working Groups, please continue to check the website: TampaBayNext.com/get-involved/

If you are unable to attend a working group meeting, please consider visiting the website to share your input:

TampaBayNext.com/contact-us/

FDOT will host local and regional opportunities to participate in developing meaningful transportation solutions.

Upcoming Events

Thursday, July 13:

Pinellas County Community Working Group (5:30-7:30 p.m.),
Collaborative Labs – St. Petersburg College – The EpiCenter,
13805 58th Street N, Clearwater, FL 33760

Saturday, July 15:

Hillsborough County Neighborhoods Conference
(8:00 a.m.-2:30 p.m.), **Sheraton East Hotel**,
10221 Princess Palm Avenue, Tampa, FL 33610

Thursday, July 20:

North and West Hillsborough Community Working Group
(5:30-7:30 p.m.), **University Area Community Development
Corporation**, 14013 N 22nd St, Tampa, FL 33613

Saturday, July 22:

St. Petersburg Saturday Market (9:00 a.m.-1:00 p.m.), **Williams Park**,
350 2nd Ave N, St. Petersburg, FL 33701

Please visit the website for up to date event information: TampaBayNext.com/get-involved/

Would you like FDOT to present information at your community or neighborhood event? Please email us at

TampaBayNext@dot.state.fl.us

Thursday, August 3:

Pasco/Hernando Community Working Group (5:30-7:30 p.m.),
Myrtle Lake Baptist Church, 2017 Reigler Road,
Land O' Lakes, FL 34639

Tuesday, August 15:

East/South Hillsborough/Polk County Community
Working Group (5:30-7:30 p.m.), **Sheraton East Hotel**,
10221 Princess Palm Avenue, Tampa, FL 33610.

Saturday, August 19:

Tampa Bay Youth League Football opening day (1:00-9:00 p.m.),
Skyway Park, 4840 Independence Parkway, Tampa, FL 33634

What's Going to Happen with Community Initiated Concepts?

Participation at Community Working Groups, public workshops, and feedback through the website are great ways to share your ideas with the Florida Department of Transportation (FDOT). As ideas are generated by the public, FDOT will begin to evaluate those ideas and report back to the public. FDOT wants this to be a collaborative process, working with agency partners, stakeholders, and the community to find the right set of transportation solutions.

The National Environmental Policy Act (NEPA) is the federal process to assess environmental effects of proposed alternatives prior to making decisions. Some elements considered during the process include the ability to handle travel demand, aesthetics, air quality, economic development, environmental justice, historical properties and districts, neighborhoods, noise, parks and recreation, safety, and more. FDOT and the Federal Highway Administration (FHWA) will work together to provide opportunities for public involvement to review the proposed alternatives and their potential environmental effects.

Preparing a Supplemental Environmental Impact Statement (SEIS) is a rigorous evaluation process. FDOT plans to spend at least two years on this SEIS. The first public workshops will be held in October 2017, and we have ongoing community events and online opportunities to provide input into the process. If you would like to know more about the SEIS process and how to contribute ideas, please contact TampaBayNext@dot.state.fl.us.

Citizens Transportation Academy

Interested in learning more about how transportation is planned, developed, funded, and implemented? Join the Florida Department of Transportation's *Citizens Transportation Academy!* You talk. We listen. This webinar series is a direct response to the questions and comments we heard at our Community Working Groups and public outreach events.

WEBINAR COURSES

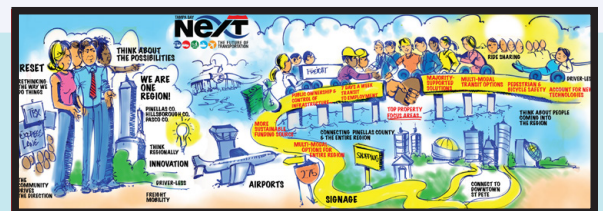

Note: There will be no session on Sept. 29 due to the TMA Leadership Meeting

October 6	Metropolitan Planning Process
October 13	Introduction to Transportation Project Development
October 20	Introduction to Transit: Transit Modes and How They Work
October 27	How Transportation Projects are Funded
November 2	Congestion Management Strategies

The online series is free and open to the public. For more information on how to participate, please visit: TampaBayNext.com/CitizensTransportationAcademy. If you do not have computer access or prefer to participate in person, please join us at FDOT District Seven Headquarters, 11201 N McKinley Dr., Tampa, FL 33612.

Questions? Contact TampaBayNext@dot.state.fl.us or call (813) 975-NEXT (6398)

Community Working Groups: Top Focus Areas

Downtown: Prioritizing transportation solutions like rail, bus, biking, and walking to align with the many values of the community.

Westshore: Use data/impact driven decision making, cost/benefit analysis vs. "whoever screams the loudest."

Pinellas: Account for new technologies, including automated vehicles, mass transit, maximize access to airports, and multimodal centers.

North and West Hillsborough: Connecting transportation hubs of Tampa Bay with affordable, flexible transit options.

Pasco/Hernando: Adding light rail to the transportation system, possibly in the Hwy 301/SR 56, for travel to the airport and other activity hubs, and more bus service focused on long distance and high traffic areas with Wi-Fi.

East and South Hillsborough County/Polk County Create a master plan for regional hubs and in/out movements. Include in the conversation the Regional Transit Feasibility Study

The next round of meetings will start in September. For more information, please visit: TampaBayNext.com/get-involved/community-working-groups. We hope you will get involved!

FDOT will host local and regional opportunities to participate in developing meaningful transportation solutions.

Upcoming Events

Thursday, September 7:

Historic Resources Information Meeting, 5:00 p.m. – 7:00 p.m.
Centro Asturiano, Ballroom, 1913 N. Nebraska Avenue,
Tampa, FL 33602

Every Friday, September 15 to October 20:

Citizens Transportation Academy webinar series,
12:00-1:00 p.m., **Webinar online:**
TampaBayNext.com/CitizensTransportationAcademy
or Florida Dept. of Transportation, 11201 N. McKinley Dr.,
Tampa, FL 33612

Please visit the website for up to date event information: **TampaBayNext.com/get-involved/**.

Would you like The Florida Department of Transportation to present information at your community or neighborhood event? Please call email us at TampaBayNext@dot.state.fl.us.

Tuesday, September 19:

Community Working Group for Westshore/West Tampa/South Tampa,
5:30 p.m. – 7:30 p.m., **Centre Club at the Urban Center**,
123 S. Westshore Boulevard (8th Floor), Tampa, FL 33609

Monday, September 25:

Community Working Group for Downtown Tampa,
6:30 p.m. – 8:30 p.m., **The Barrymore Hotel**, 111 Fortune Street,
Tampa, FL 33602

Back to School Traffic Safety Tips

August is back to school month! School buses have returned to their rounds, hurried parents are dropping off their kids, and some children are navigating their route to school by bicycle or foot. As we continue adjusting to the new normal of school traffic, please consider these safety tips:

Give yourself time. Plan for a few extra minutes in your commute.

You don't want your kids to be late to school and you don't want to be late to work. Give yourself the time to not feel rushed.

Avoid school zones, if possible. There is a higher volume of young pedestrians in these zones. Avoid adding to the traffic in that area by going around it altogether if you can find a good, alternative route.

Eliminate driving distractions. Research shows that taking your eyes off the road for just two seconds doubles your chances of crashing. Children can be quick, darting into the street unexpectedly or emerging from an area of parked cars. In neighborhoods and near schools especially, consider pausing your conversations, putting your phone down, and turning your radio down in volume.

Be careful to watch for students who walk and bike to school. Children on bikes are often inexperienced and unpredictable. Slow down and allow for at least three feet between your vehicle and a bicyclist. Do not startle pedestrians or cyclists by honking even if you think you have the right of way.

Be cautious around bus stops. Slow down when approaching school bus stops with students present. Never pass a bus from behind, or from either direction if you are on an undivided road, if it is stopped to load or unload children.

Respect the school zones. Decrease your speed at the Begin School Zone sign and maintain reduced speed until the End School Zone sign. Anticipate that children will be riding bicycles and walking in these areas.

By planning a little better and exercising caution, we can all have a safe and punctual school year.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation services (free of charge) should contact Christopher Speese, by phone at 813-975-6405, or via email at Christopher.Speese@dot.state.fl.us at least seven (7) days prior to the meeting. If you are hearing or speech impaired, please contact us by using the Florida Relay Service, 1-800-955-8771 (TDD) or 1-800-955-8770 (Voice).

The environmental review, consultation, and other actions required by applicable federal environmental laws for this project are being, or have been, carried out by the Florida Department of Transportation (FDOT) pursuant to 23 U.S.C. §327 and a Memorandum of Understanding dated December 14, 2016 and executed by the Federal Highway Administration and FDOT.

Comuníquese Con Nosotros

Nos importa mucho la royeet del público sobre el royeecto. Si usted tiene preguntas o comentarios, o si simplemente desea más información, por favor comuníquese con nuestra representante, Lilliam Escalera, 813-975-6403, Departamento de Transportación de Florida, 11201 N. McKinley Dr., Tampa, FL 33612, lilliam.escalera@dot.state.fl.us

Citizens Transportation Academy
Congestion Management Strategies
Online Webinar (or attend at FDOT)
11201 N. McKinley Drive, Tampa, FL 33612

Wednesday, November 29,
5:30 p.m. - 7:30 p.m.
Minority Transportation Forum with
Representative Shaw
Children's Board of Hillsborough County
1002 E. Palm Ave, Tampa, FL 33605

Interested in learning more about how transportation is planned, developed, funded, and implemented? The Citizens Transportation Academy online series is free and open to the public. For more information on how to participate or view previous sessions, please visit: TampaBayNext.com/CitizensTransportationAcademy.

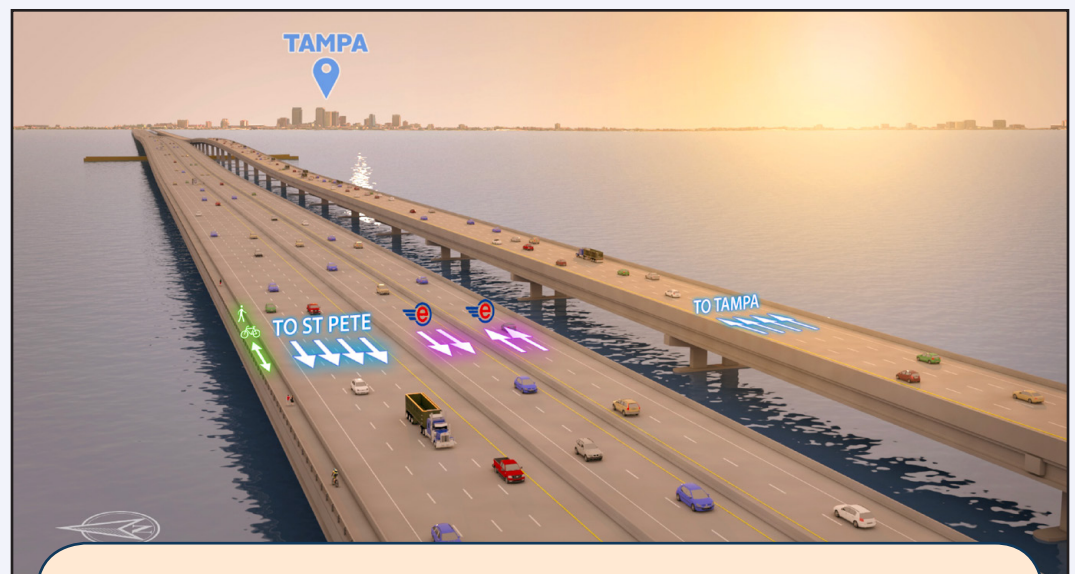

- If you would like Tampa Bay Next to come to your meeting or event, please contact us at TampaBayNext@dot.state.fl.us.
- Be sure to check our website for the latest list of events: TampaBayNext.com

You Talked. We Listened.

The Florida Department of Transportation (FDOT) has been working with the community to take a fresh look at transportation planning. We are in the community, gathering input and sharing information with citizens as we design solutions for how to improve our transportation system.

Howard Frankland Bridge Improvements

FDOT is rebuilding the existing northbound bridge, and adding capacity to alleviate traffic congestion. The most recent plan for the Howard Frankland Bridge was announced in early 2017. Since that time, FDOT conducted public outreach as part of the Tampa Bay Next process and gathered valuable input to enhance the project.

The community has made it clear that they want:

- ◆ **infrastructure that can accommodate transit**, with flexibility across modes
- ◆ **safety to be a top priority**, including **incident management** and **evacuation preparedness**
- ◆ **transportation improvements** that **anticipate future demand** and are **cost effective**
- ◆ **more bicycle and pedestrian options** across the entire region

HOWARD FRANKLAND BRIDGE PUBLIC HEARING

The dates and locations are as follows:

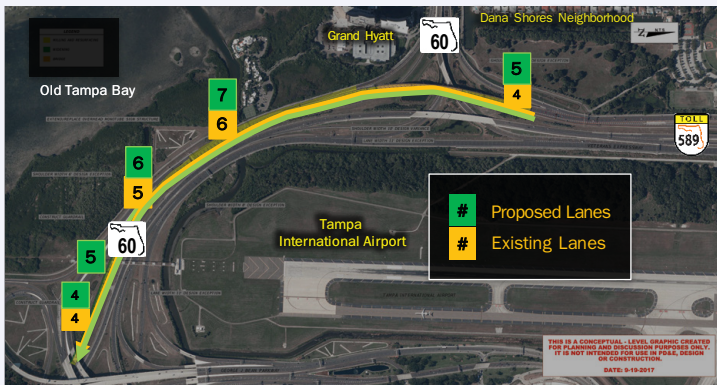

Tuesday, November 14
5:30 p.m. - 7:30 p.m.
Tampa Marriott Westshore
1001 N. Westshore Blvd.
Tampa, FL 33607

Thursday, November 16
5:30 p.m. - 7:30 p.m.
Hilton-St. Pete Carillon Park
950 Lake Carillon Drive
St. Petersburg, FL 33716

You Talked. We Listened.

What we've heard from the community is that while long-term planning is good and necessary, some improvements need to be made to provide congestion relief in the interim. We will be implementing some operational improvements along SR 60/Veterans Expressway, and along I-275 at the Westshore Interchange. These improvements will help to reduce traffic congestion in the short-term while we complete long-range planning for an overhaul of the interchange.

SR 60 Operational Improvements

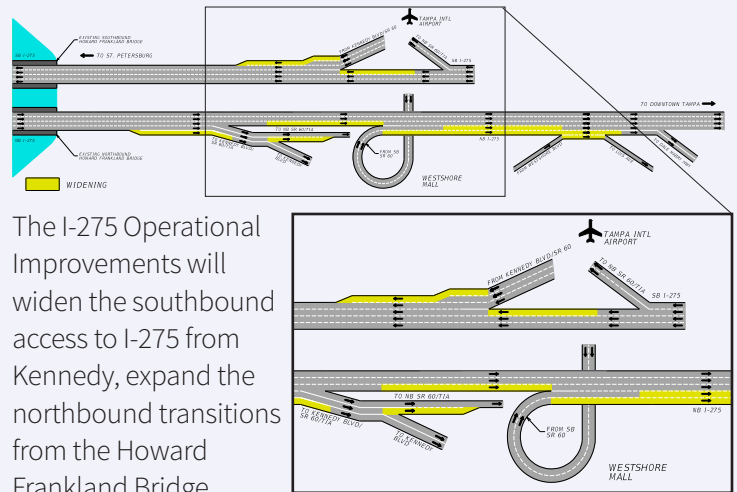

The SR 60/Veterans Expressway operational improvements will expand the transition from Veterans Expressway to SR 60 and the Tampa Airport Interchange. Lanes will be added with a minor shoulder widening to improve the flow of traffic through that corridor.

SR 60 Operational Improvements

Cost estimate	Anticipated start date
\$3 million	2018

I-275 Operational Improvements

The I-275 Operational Improvements will widen the southbound access to I-275 from Kennedy, expand the northbound transitions from the Howard Frankland Bridge, and expand the northbound transitions from SR 60 all the way through Lois Avenue. These improvements will reduce congestion at this regional connection point of I-275.

I-275 Operational Improvements

Cost estimate	Design/Build Notice To Proceed
\$25 million	2019

Tampa Interstate Study Supplemental Environmental Impact Statement (TIS SEIS)

On October 9 and 10, the Florida Department of Transportation held a Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) Public Workshop to review and discuss Downtown Tampa Interchange concepts, Westshore Interchange concepts and Northwest (Veterans) Expressway design changes.

If you were unable to join us for these SEIS public workshops, you can view the display boards and other documents online at TampaBayNext.com.

Written or emailed comments not received at the meeting must be postmarked or emailed by October 31, 2017 to be included in the official meeting record. Written comments can be mailed to: Ashley Henzel, P.E., PD&E Senior Project Manager, Florida Department of Transportation, MS 7-500, 11201 N. McKinley Drive, Tampa, FL, 33612, or emailed to: Ashley.Henzel@dot.state.fl.us

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. Persons who require special accommodations under the Americans with Disabilities Act to participate in this informational meeting, or persons who require translation services (free of charge) are asked to notify the agency at least seven (7) days prior to the meeting by contacting: Christopher Speese, Public Involvement Coordinator, at Christopher.Speese@dot.state.fl.us, 1 (800) 226-7220 or (813) 975-6405.

The environmental review, consultation, and other actions required by applicable federal environmental laws for this project are being, or have been, carried out by the Florida Department of Transportation (FDOT) pursuant to 23 U.S.C. §327 and a Memorandum of Understanding dated December 14, 2016 and executed by the Federal Highway Administration and FDOT.

If you are hearing or speech impaired, please contact the agency using the Florida Relay Service, 1 (800) 955-8771 (TDD) or 1 (800) 955-8770 (Voice).

Comuníquese con nosotros: Nos importa mucho la opinión del público sobre el proyecto. Si tiene preguntas o comentarios, o simplemente desea más información, por favor comuníquese con nosotros. Nuestra representante en español es: Lilliam Escalera, (813) 975-6445, Lilliam.Escalera@dot.state.fl.us.

Hillsborough County, Florida
Alternatives Public Workshop & Section 106 Historic Resources Information Meeting

Dear Property Owners, Business Owners, and Interested Persons:

The Florida Department of Transportation (FDOT), District Seven, invites you to attend and participate in a public workshop for the above referenced studies. FDOT is holding this public workshop on two separate dates and locations to allow for maximum participation. The information at each workshop will be identical. The dates and locations are as follows:

Date:	October 9, 2017	October 10, 2017
Place:	Tampa Marriott Westshore 1001 N. Westshore Blvd. Tampa, FL 33607	Hilton Tampa Downtown 211 N. Tampa St. Tampa, FL 33602
Time:	4 p.m. – 7 p.m.	4 p.m. – 7 p.m.

Hilton Tampa Downtown Parking: Fort Brooke Garage, 107 North Franklin Street, Tampa, FL 33607. Whiting Street entrance. From the parking garage take the elevator to the third floor and use the walk over bridge to One City Center and the Hilton Hotel. Parking voucher will be provided at workshop sign-in table.

RESCHEDULED

Historic Resources Information Meeting

I-275 from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Blvd. and I-4 from I-275 to east of 50th Street
WPI Segment Number: 258337-2

The purpose of this meeting is to provide information to residents, local public officials, and interested persons and organizations relative to the process and schedule for identifying and evaluating historic resources, determining significant historic properties, and eventually evaluating potential impacts to significant historic properties.

The purpose of this workshop is to involve the public in the preparation of the Supplemental Environmental Impact Statement (SEIS) that will be prepared for the Tampa Interstate Study (TIS). The SEIS will focus on the downtown Tampa and Westshore interchanges, and the section of I-275 between those areas. The SEIS is a fresh look at the long-standing plan to improve and modernize Tampa's interstate system, originally called the TIS. The workshop will also serve as an opportunity for the public to provide comments on the design changes to the Northwest Expressway as part of the Northwest (Veterans) Expressway Design Change Reevaluation.

Please understand this is an informal meeting, not a public hearing, and the first of several to be included throughout the process. The meetings will be held in an informal open house format. There will be no formal presentation. During the meeting, representatives of the FDOT will be available to discuss the process, answer questions, and receive comments specific to these studies. Written or emailed comments not received at the meeting must be postmarked or emailed by October 31, 2017 to be included in the official meeting record. Written comments can be mailed to: Ashley Henzel, P.E., PD&E Senior Project Manager, Florida Department of Transportation, MS 7-500, 11201 N. McKinley Drive, Tampa, FL, 33612, or emailed to: Ashley.Henzel@dot.state.fl.us. See the map on the first page showing the meeting locations.

A Historic Resources Meeting will be held in conjunction with the Alternatives Workshop. This meeting was rescheduled due to hurricane Irma. The purpose of this meeting is to provide information to residents, local public officials, and interested persons and organizations relative to the process and schedule for identifying and evaluating historic resources, determining significant historic properties, and eventually evaluating potential impacts to significant historic properties.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. Persons who require special accommodations under the Americans with Disabilities Act to participate in this informational meeting, or persons who require translation services (free of charge) are asked to notify the agency at least seven (7) days prior to the meeting by contacting: Chris Speese, at Christopher.Speese@dot.state.fl.us, (800) 226-7220 or (813) 975-6405.

The environmental review, consultation, and other actions required by applicable federal environmental laws for this project are being, or have been, carried out by the FDOT pursuant to 23 U.S.C. §327 and a Memorandum of Understanding dated December 14, 2016 and executed by the Federal Highway Administration and FDOT.

Comuníquese con nosotros: Nos importa mucho la opinión del público sobre el proyecto. Si tiene preguntas o comentarios, o simplemente desea más información, por favor comuníquese con nosotros. Nuestra representante en español es: Lilliam Escalera, Lilliam.Escalera@dot.state.fl.us or (813) 975-6445.

If you are hearing or speech impaired, please contact the agency using the Florida Relay Service, (800) 955-8771 (TDD) or (800) 955-8770 (Voice).

Sincerely,

Kirk Bogen, P.E.

District Seven Environmental Management Engineer

You're Invited:

The Florida Department of Transportation invites you to attend and participate in the Florida Department of Transportation (FDOT) District Seven, Alternatives Public Workshop to learn more about the Westshore Area and Downtown Tampa Interchanges, and the I-275 corridor between these two areas. The workshop will cover the Northwest (Veterans) Expressway, and Tampa Interstate Study Segments 1A, 2A, 2B, 3A, and 3B (also referred to as Tampa Bay Next Sections 4, 5, and 6) as displayed on the map below. The Florida Department of Transportation is holding this public workshop on two separate dates and locations to allow for maximum participation. The format of each workshop will be identical, and the same information will be shown at each including material on the Northwest (Veterans) Expressway Design Change Re-evaluation. The first workshop will be held on Tuesday, May 21, 2019 from 5:30 p.m. to 7:30 p.m. at the Cuban Club, 2010 N. Avenida Republica de Cuba (14th St.), Tampa, FL. Parking is available at the Fernando Noriega Jr./Palm Avenue Parking Garage, located at 2010 N. 13th Street, Tampa, FL, located behind the Cuban Club (see map on back of page). A free parking voucher will be provided at the workshop sign-in table. Handicap parking will be available at the Cuban Club and can be accessed from E. 9th Avenue. The second workshop will be held on Thursday, May 23, 2019 from 5:30 p.m. to 7:30 p.m. at the Tampa Marriott Westshore, 1001 N. Westshore Blvd., Tampa, FL in the Grand Ballroom. Exhibits on display will show project alternatives and related information. FDOT representatives will be in attendance to answer questions and receive your comments. This letter serves as notice to property owners (pursuant to Florida Statutes 339.155(6), that all or a portion of their property is within 300 feet of the centerline of the proposed project. However, this does not mean that all properties will be directly affected.

Alternatives Public Workshop 1

Date: Tuesday, May 21, 2019
Place: The Cuban Club
2010 N. Avenida Republica de Cuba (14th St.)
Tampa, FL 33605
Time: 5:30 p.m. - 7:30 p.m.

Alternatives Public Workshop 2

Date: Thursday, May 23, 2019
Place: Tampa Marriott Westshore
1001 N. Westshore Boulevard
Tampa, FL 33607
Time: 5:30 p.m. - 7:30 p.m.

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation service (free of charge) should contact Alex Henry, Public Involvement Coordinator, at (813) 975-6405 or by email at: Alex.Henry@dot.state.fl.us at least seven (7) days in advance of the workshop date.

You may provide written comments by completing the enclosed comment form and mailing it to the address on the back of the form or you can drop it in one of the comment boxes at the Alternatives Public Workshop. You may also provide your comments on the "Send Us Your Comments" page on the study website below. Written comments will be accepted throughout the project. To become part of the official public workshop record, comments should be submitted or post-marked by June 6, 2019.

The environmental review, consultation, and other actions required by applicable federal environmental laws for the Northwest (Veterans) Expressway Design Change Re-evaluation project are being, or have been, carried out by the Florida Department of Transportation (FDOT) pursuant to 23 U.S.C. §327 and a Memorandum of Understanding dated December 14, 2016 and executed by the Federal Highway Administration and FDOT.

FDOT welcomes and appreciates everyone's participation. If you have questions about the project or the workshop, please contact **Alice Price, AICP, PD&E Project Manager**, at (813) 975-6482, or by email at: alice.price@dot.state.fl.us. Visit the study website at: www.tampainterstatestudy.com. All materials displayed at the workshops will be placed on the project website following the meetings.

Sincerely,

Kirk Bogen, P.E.
Environmental Management Engineer

Right-of-Way Acquisition Procedure

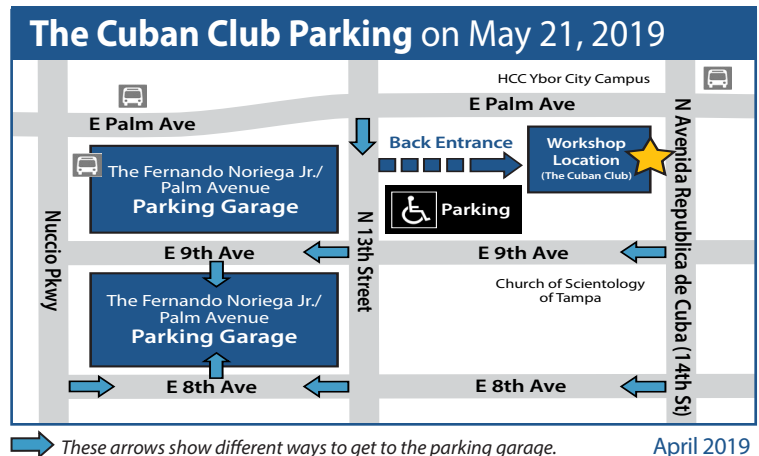

When a transportation project proposes the acquisition of private property, you may have questions and concerns. To better educate and inform you about the right-of-way acquisition process and your rights, the FDOT has created real estate acquisition and relocation brochures. These brochures and other education material will be available at the public workshop. Copies of the brochures may also be found on our website at: www.dot.state.fl.us/rightofway/documents.shtm.

We are interested in hearing your concerns and answering your questions. We also encourage you to speak with the FDOT's Project Manager or a Right-of-Way Representative at your convenience either at the workshop or by phone at 1-800-226-7220.

TIS SEIS PD&E Study Schedule

The Study is anticipated to be completed by Fall 2020. Right of Way acquisition is partially funded. Construction is not currently funded.

Project Kick Off	January 2017
Concept Development	Spring/Summer 2017
First Public Workshop	October 2017
Concept Refinement	Winter 2017/2018
Environmental Technical Analysis	2018 through Spring 2019
Second Public Workshop	May 2019
Finalize Engineering & Environmental Analysis	July 2019
Prepare Draft SEIS	September 2019
Public Hearing	February 2020
Finalize SEIS and ROD Documents	May 2020
NEPA Complete	Fall 2020

 Tampa, Florida 33612-6456

TAMPA INTERSTATE STUDY | SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT

PUBLIC HEARING

NOTICE

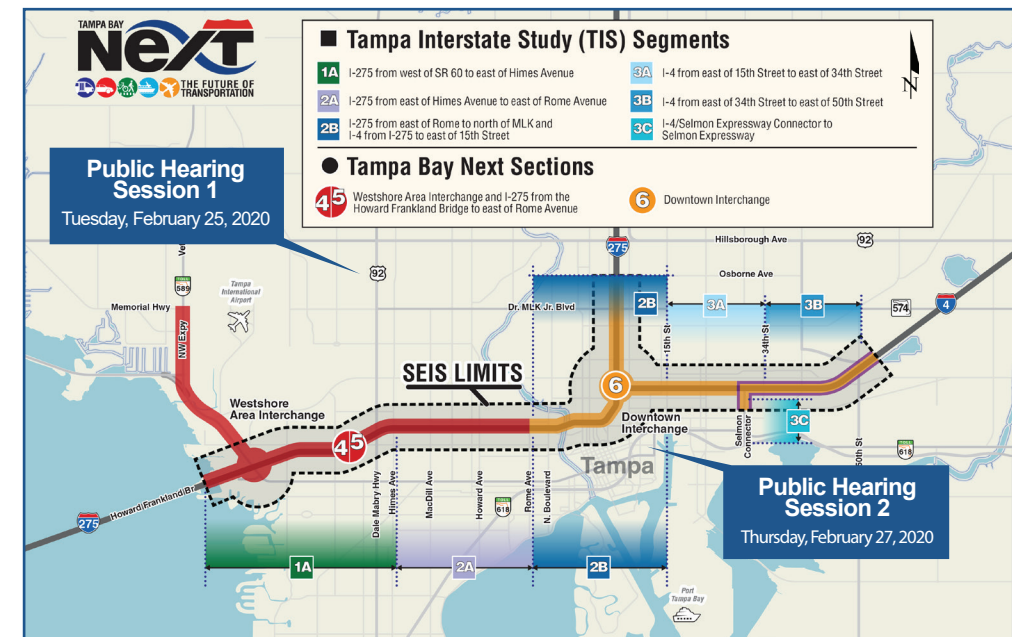

Work Program Item Segment Number: 258337-2

February 2020

Dear Property Owner and/or Interested Citizen:

You are invited to attend and participate in the Florida Department of Transportation (FDOT) District Seven public hearing regarding the Project Development and Environment (PD&E) Study for I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Boulevard (SR 574) and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) in Hillsborough County, Florida. This project is known as the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) and involves improvements to the Westshore Area Interchange (I-275/SR 60), the Downtown Tampa Interchange (I-275/I-4), as well as the I-275 corridor that connects these two areas. On January 27, 2020, the Federal Highway Administration approved the Draft TIS SEIS.

This hearing allows those interested in the study the opportunity to provide comments and express views concerning the location; conceptual design; and social, economic, cultural, and environmental effects of the proposed project. The hearing will cover TIS Segments 1A, 2A, 2B, 3A, and 3B (also referred to as Tampa Bay Next Sections 4, 5, and 6) as displayed on the map below. The FDOT is holding this public hearing on two separate dates and locations to allow for maximum participation. The format of each hearing session and the information presented will be identical. This letter serves as notice to property owners (pursuant to Florida Statute 339.155) that all or a portion of their property is within at least 300 feet on either side of the proposed project. However, this does not mean that all properties will be directly affected.

Public Hearing Session 1
Date: Tuesday, February 25, 2020
Place: Hillsborough Community College
 Dale Mabry Campus
 Student Services Building
 4001 W Tampa Bay Boulevard
 Tampa, FL 33614
Time: 5:00 p.m. - 7:30 p.m. (Open House)
 Formal Portion begins at 6:00 p.m.
Complimentary on-site parking is available. Designated handicap parking is available.

Public Hearing Session 2
Date: Thursday, February 27, 2020
Place: Port Tampa Bay Cruise Terminal #6
 1331 McKay Street
 Tampa, FL 33602
Time: 5:00 p.m. - 7:30 p.m. (Open House)
 Formal Portion begins at 6:00 p.m.
Complimentary on-site parking is available in front of Cruise Terminal #6 and in the surface parking lots adjacent to the terminal. Designated handicap parking is available directly in front of Cruise Terminal #6.

Non-Discrimination

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. Persons who require special accommodations under the Americans with Disabilities Act or persons who require translation service (free of charge) should contact Alex Henry, Public Involvement Coordinator, at (813) 975-6405 or alex.henry@dot.state.fl.us at least seven (7) days in advance of each hearing session date.

En Español

Si usted tiene preguntas o comentarios o si simplemente desea más información sobre este proyecto, por favor ponerse en contacto con el señor Manuel Flores al teléfono (813) 975-4248 o correo electrónico manuel.flores@dot.state.fl.us.

We Want Your Input!

A successful project depends on the public's participation. Comments can be submitted: verbally during the formal portion of the hearing or to a court reporter before and after the formal portion of the hearing, as well as in written format during the hearing, by mail to the address pre-printed on the back of the enclosed comment form, or on the project website. All comments must be postmarked or emailed by Thursday, March 12, 2020 to become part of the official public hearing record. To ask questions about the project, contact:

Alice Price, AICP PD&E Project Manager (813) 975-6482 alice.price@dot.state.fl.us
 or **Kristen Carson (Media Contact)** Public Information Officer (813) 975-6202 kristen.carson@dot.state.fl.us

For more information on this study, please visit the project website at: www.tampainterstatestudy.com

February 2020

Tampa Interstate Study Supplemental Environmental Impact Statement Schedule

The Study is anticipated to be completed by Fall 2020.

Phase	Anticipated Completion
Project Kick Off/Notice of Intent to Prepare SEIS	January 2017
Concept Development	Spring/Summer 2017
1 st Public Workshop	October 2017
Concept Refinement	Winter 2017/2018
2 nd Public Workshop	May 2019
FHWA Approves Draft SEIS/ Notice of Public Availability	January 27, 2020
Public Hearing	February 25 & 27, 2020
Finalize SEIS Documents	Spring/Summer 2020
NEPA Complete (Final SEIS/ Record of Decision)	Fall 2020

Beginning at 5:00 p.m., FDOT representatives will be available to answer questions and discuss the project. Project materials and exhibits showing the proposed improvements will be available. A PowerPoint presentation will run continuously during the open house. The formal portion of the public hearing will begin at 6:00 p.m. and will provide the opportunity for oral public comments.

A court reporter will be available to receive comments in a one-on-one setting before and after the formal portion of the hearing. You may submit written comments at the hearing, mail your written comments to the address pre-printed on the back of the enclosed comment form (also provided at the hearing), or enter them on the project website at www.tampainterstatestudy.com. All comments must be postmarked or emailed by Thursday, March 12, 2020 to become part of the official public hearing record.

Draft study documents and other pertinent information depicting the project's recommendation will be available for review on the project website beginning Tuesday, February 4, 2020 and at the following locations from Tuesday, February 4, 2020 to Thursday, March 12, 2020:

FDOT District Seven 11201 N McKinley Drive Tampa, FL 33612 (813) 975-6000 Business Hours: Mon-Fri 8:00 a.m. – 5:00 p.m. Sat-Sun Closed	Robert W. ---	---	---	--

FDOT welcomes and appreciates everyone's participation. If you have questions about the project or the hearing, please contact Alice Price, AICP, PD&E Project Manager, at (813) 975-6482 or D7-TIS@dot.state.fl.us. You may also visit the project website at www.tampainterstatestudy.com.

Sincerely,

 Kirk Bogen, P.E.
 Environmental Management Engineer

Study Purpose

A PD&E Study is a comprehensive evaluation of social, cultural, economic, and environmental effects associated with proposed transportation improvements. The objective of this PD&E Study is to assist the FDOT and the Federal Highway Administration (FHWA) in deciding the type, location, and conceptual design of the proposed improvements for the Westshore Area Interchange, the Downtown Tampa Interchange, and the section of I-275 between those interchanges. The PD&E Study satisfies all applicable requirements, including the National Environmental Policy Act (NEPA), for this project to qualify for federal-aid funding of subsequent development phases (right of way, design, and construction).

The purpose of the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) is to upgrade the safety and efficiency of the existing I-275 and I-4 corridors that service the Tampa Bay region while maintaining access to the surrounding community. The project also intends to provide congestion relief that improves accessibility, mobility, travel times, system linkages, and multimodal connections, while supporting regional economic development goals and enhancing the quality of life for residents and visitors.

Project History

The Tampa Bay region interstate system was originally constructed in the early 1960s. In 1983, FDOT began to study and identify potential improvements to the interstates within the area, including I-275 and I-4. In 1987, FDOT began Phase I of the TIS. The TIS limits include approximately 15 miles of I-275 and I-4 and begin at I-275 from the Howard Frankland Bridge/Kennedy Boulevard ramps north to Dr. Martin Luther King Jr. Boulevard, I-4 from I-275 to east of 50th Street, the proposed Selmon Connector from I-4 southward to the existing Selmon Expressway, and approximately 4.4 miles of the Selmon Expressway from the Kennedy Boulevard overpass east to Maydell Drive in Hillsborough County.

In 1983, FDOT began to identify potential improvements to the Tampa Interstate System, which was originally constructed in the early 1960s. These improvements included potential short-term safety solutions, design changes, and long-term high-occupancy vehicle (HOV) related improvements to accommodate growing traffic volumes and address congestion. The 1983 study considered all transportation needs within the study area, including concurrent highway, rail, and/or transit improvements.

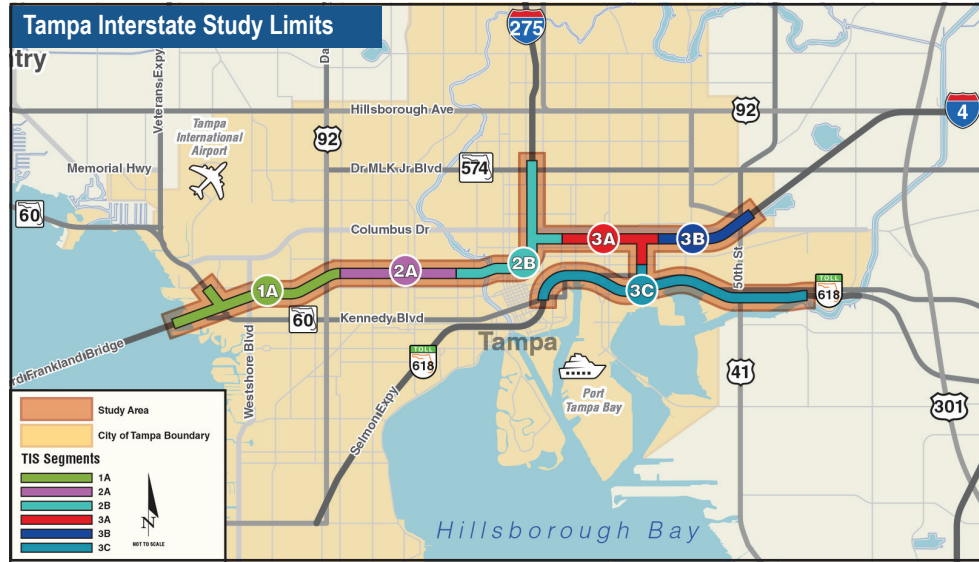

Using the 1983 study as a base, FDOT began Phase I of the TIS in 1987. The purpose of the Phase I study was to produce a Master Plan to identify alternatives and make recommendations regarding the preferred type and location of multi-lane improvements, potential HOV facilities, transit facilities, traffic management techniques, and traffic surveillance and control systems. FDOT published the TIS Master Plan Report, and the Federal Highway Administration (FHWA) approved the Plan in 1989.

Following completion of the TIS Master Plan Report, FHWA, in cooperation with FDOT, began the preparation of an Environmental Impact Statement (EIS) in 1991 and the supporting documentation necessary for state and federal approvals and subsequent funding of the TIS Master Plan Report concepts. The EIS evaluated impacts associated with various alternatives, addressed agency and citizen concerns, and identified ways to minimize impacts.

FHWA approved the TIS Final Environmental Impact Statement (FEIS) in November 1996, issued the Record of Decision (ROD) in 1997, and an amended ROD in June 1999. The 1997 and the 1999 RODs are the documents that have governed the development of all improvements to I-275 and I-4 and provide a roadway system that includes general use lanes, separated express lanes in each direction, as well as a future transit corridor. The intent of the FHWA and FDOT has been to construct the 1996 TIS FEIS Long-Term Preferred Alternative as funding becomes available. Since issuance of the 1997 ROD and the amended 1999 ROD, FDOT has taken several major steps to advance the project to full implementation. The TIS has been re-evaluated several times to advance various elements of the project, many of which have been constructed, including portions of TIS Segments 1A, 2A, 3A, 3B, and 3C (see map).

In 2012, with the release of the Florida Transportation Vision for the 21st Century, FDOT initiated a master plan study which included the TIS limits to determine the feasibility of dynamically tolling the express lanes on the interstate system as the 1996 TIS FEIS did not consider tolling at the time. The Tampa Bay Express (TBX) Master Plan, completed in 2015, established a system-wide framework for implementation of dynamically-tolled express lanes on interstates within the Tampa Bay region.

Realizing the community's desire for a more collaborative and transparent conversation about transportation at the community and regional levels, FDOT reset their focus and launched Tampa Bay Next in 2017 to better engage the public and expand the consideration of improvements to include transit accommodations, bicycle and pedestrian facilities, and smart technology. FHWA published the Notice of Intent for the TIS SEIS for the 1996 TIS FEIS to address and update traffic data; consider regional growth; and evaluate changes along the corridor, including potential environmental and human impacts, since the approved 1996 FEIS and subsequent re-evaluations.

Right-Of-Way Procedure

When a transportation project proposes the acquisition of private property, you may have questions and concerns. To better educate and inform you about the right-of-way acquisition process and your rights, the FDOT has created real estate acquisition and relocation informational brochures. These brochures and other education materials will be available during the public hearing. Copies of the brochures are available on our website at: <https://www.fdot.gov/rightofway/documents.shtm>. We would like to hear your concerns and answer your questions. We also encourage you to speak with the FDOT Right-of-Way Representative at your convenience either at the hearing or at 800-226-7220.

Funding

Project Phase	FDOT Tentative Five-Year Work Program (FY 2020/2021 - FY 2024/2025)		
	I-275 from Howard Frankland Bridge to North of Hillsborough River	Downtown Tampa Interchange (I-275/I-4) Operational Improvements	I-4 from East of 22nd Street to East of 50th Street
Design	Included in Construction	Not Currently Funded	No Further Improvements Included In LPA*
Right-of-Way	Funded (2020/2021 – 2023/2024)	Not Currently Funded	No Further Improvements Included In LPA*
Construction Start	Funded (2023/2024)	Not Currently Funded	No Further Improvements Included In LPA*

LPA = Locally Preferred Alternative

* A portion of TIS Segment 3B overlaps with partially funded improvements of Tampa Bay Next Section 8, (Financial Project Identification Number 431746-3-52-01), including the beginning of the express lane system heading east on I-4.

Evaluation Matrix

The evaluation matrix compares the potential social, economic, cultural, and environmental effects of the No Further Action Alternative and the Locally Preferred Alternative.

Alternatives

Since the TIS SEIS kicked off, FDOT engaged with numerous neighborhoods, coordinated with local agencies, participated in community events, and held Community Working Groups within and outside of the SEIS study area. FDOT also hosted public workshops in October 2017 and May 2019 and had a Public Involvement Office in Ybor City. These outreach activities have presented opportunities for the public to learn more about the project and provide feedback on proposed alternatives and design options. Following the evaluation of potential effects of proposed alternatives and input from the community and stakeholders, a Locally Preferred Alternative has been identified and recommended to the FHWA for approval. The No Further Action Alternative will continue to remain a viable alternative throughout the PD&E Study process. Descriptions of these alternatives are provided below.

No Further Action Alternative

The No Further Action Alternative is defined as the existing transportation system plus the improvements approved in the 1997 and 1999 RODs. These improvements include the construction of the general use lanes (outer roadways) and associated ramps within the I-275/ SR 60 Interchange (Westshore Area Interchange) in TIS Segment 1A, which were approved under the 1997 ROD. Within the TIS SEIS study area, all other improvements approved in the 1997 and 1999 RODs have already been built.

Locally Preferred Alternative (LPA)

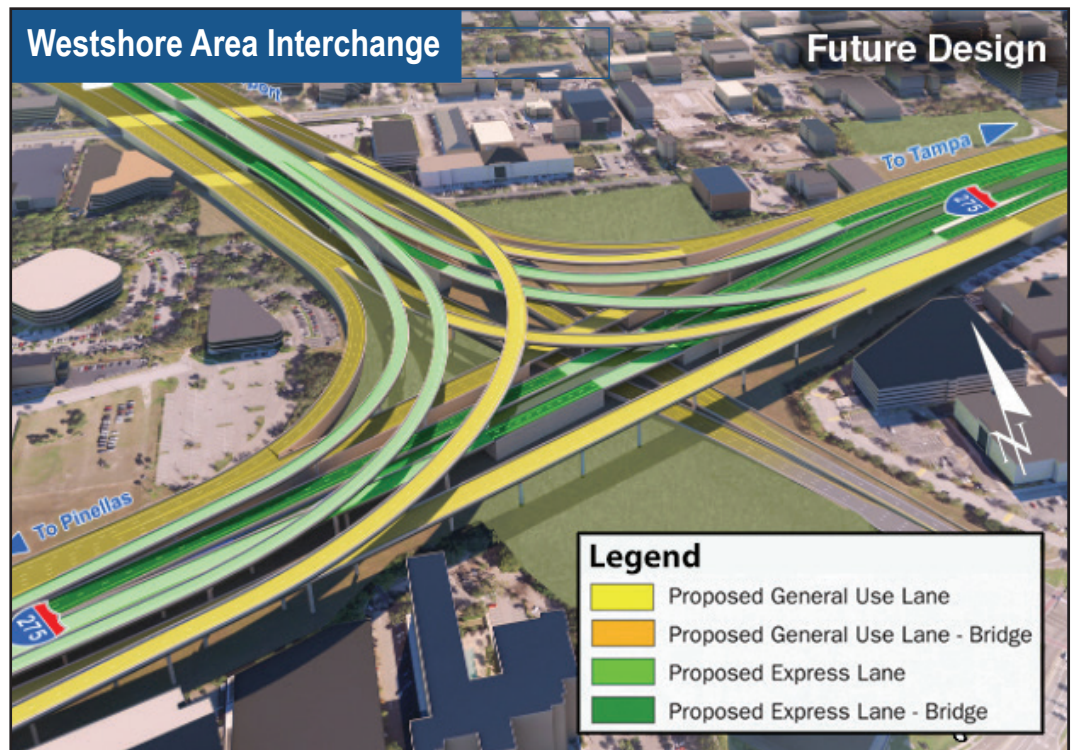

The LPA includes the following specific proposed improvements.

TIS Segments 1A and 2A – The full reconstruction of the Westshore Area Interchange would include three general purpose lanes and two new tolled express lanes in each direction, connecting the Howard Frankland Bridge and Westshore area to Downtown Tampa along I-275. The tolled express lanes would be constructed to the inside of the roadway. A transit corridor in the median would be preserved to accommodate future transit.

The tolled express lanes would also provide direct connections from I-275 to the Veterans Expressway, Independence Parkway, Courtney Campbell Causeway, Tampa International Airport via the I-275/ SR 60 Interchange, Reo Street, and Himes Avenue. Himes Avenue would be an express lanes interchange with direct express lane ramps constructed to the south side, providing drivers from northbound I-275 access to Himes Avenue and drivers on Himes Avenue access to southbound I-275.

Local street improvements to enhance mobility would include the reconnection of Reo Street, Occident Street, and Trask Street under I-275 providing additional north-south connectivity. A new on-ramp from Reo Street to southbound I-275 would provide direct express lane access. A diverging diamond interchange at Reo Street will provide new connections between Kennedy Boulevard and Cypress Street.

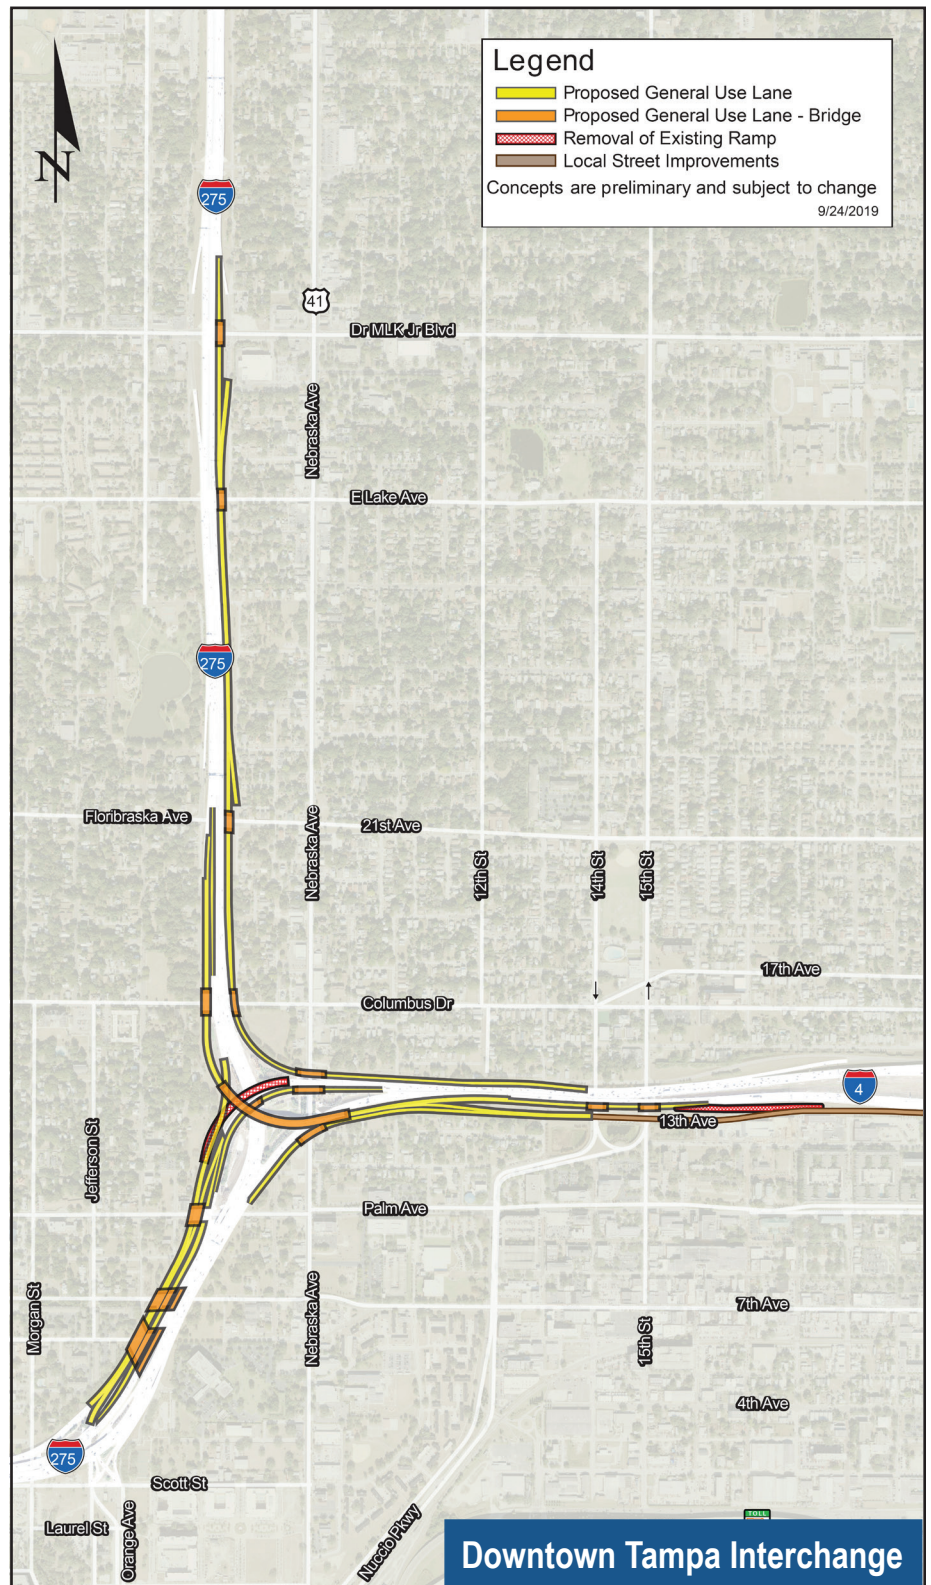

TIS Segments 2B and 3A – Improvements to TIS Segment 2B include tolled express lanes that are a continuation from the Westshore area (TIS Segments 1A and 2A). Tolled express lanes would extend to Ashley Drive/Tampa Street via direct connect ramps, providing drivers direct access from northbound I-275 to Downtown Tampa via Ashley Drive only and to southbound I-275 from Downtown Tampa via Tampa Street and Ashley Drive. Improvements in this segment would also enhance safety and traffic operations within the I-275/I-4 interchange by addressing the existing bottlenecks that occur. Improvements do not include tolled express lanes. In addition, access to Floribraska Avenue would be maintained. No interstate access at North Boulevard is proposed.

Additional details are below:

- **Southbound I-275 to Eastbound I-4** – The southbound I-275 to eastbound I-4 improvements would include widening the existing one lane flyover ramp to two lanes. Access to the local community would be provided via the existing exit ramp to Floribraska Avenue and a relocated ramp to 14th/15th Streets from 21st/22nd Streets, for both northbound and southbound traffic on I-275. This new exit location would allow drivers access from I-275 meaning they will not need to merge onto I-4 to exit to Ybor City and East Tampa. Access to 21st/22nd Streets will be maintained from the relocated 14th/15th Street exits via E13th Avenue (frontage road), which will be widened to two lanes towards the inside.
- **Westbound I-4 to Northbound I-275** – The westbound I-4 to northbound I-275 improvements would include widening the existing one lane exit to northbound I-275 to two lanes. Additional merge lanes on northbound I-275 would be provided and the existing one lane exit ramp to Dr. Martin Luther King Jr., Boulevard would be widened to two lanes.
- **Westbound I-4 to Southbound I-275** – The westbound I-4 to southbound I-275 improvements would include widening the southbound I-275 ramp from two lanes to three lanes through the interchange. The three lanes would join the two lanes from southbound I-275 to provide five lanes for traffic to combine onto southbound I-275 before merging back to the existing four lanes at Jefferson Street. The exit to downtown would be relocated to improve the spacing of decision points between the split between northbound and southbound I-275 and the exit to downtown. Shoulders would be widened on southbound I-275 between Palm Avenue and Jefferson Street to improve safety.

TIS Segment 3B – There are no improvements proposed within TIS Segment 3B as part of the LPA.

ANNOUNCEMENT OF LOCATION AND DESIGN CONCEPT ACCEPTANCE

Tampa Interstate Study (TIS)

Supplemental Environmental Impact Statement (SEIS)

Record of Decision (ROD) / Section 4(F) Evaluation

I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Boulevard (SR 574) and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41)
 Hillsborough County, Florida
 WPI Segment Number: 258337-2

On September 15, 2020, the Federal Highway Administration (FHWA) granted Location and Design Concept Acceptance for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation for the study area of I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King, Jr. Boulevard and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) as shown in Figure 1. The improvements are necessary to accommodate future traffic demands along this corridor and within the interchanges in the study area.

The study was accomplished by working in cooperation with federal and state agencies as well as local governments. This coordination allowed the Florida Department of Transportation (FDOT) and FHWA to better determine the comprehensive effects that the project will have on the social, cultural, and environmental effects associated with this project. This project is now eligible to move to the next phase of project development.

The Final SEIS/ROD is anticipated to be published in the Federal Register on September 25, 2020 and is available at www.federalregister.gov. It is also available on the project website at www.tampainterstatestudy.com.

Per 23 U.S.C. § 139, FHWA has issued a single FEIS and ROD. Therefore, the 30-day wait/review period under NEPA does not apply to this action.

Right-of-Way Acquisition Procedure

When a transportation project proposes acquiring private property, you may have questions and concerns. To better inform you about the right-of-way acquisition process and your rights, FDOT created real estate acquisition and relocation informational brochures. These brochures and other education materials are available on our website: www.fdot.gov/rightofway/documents.shtm or call 813.975.6000 for information.

Project Website

For more information on the TIS SEIS please visit www.tampainterstatestudy.com.

Public Involvement

A public hearing was held on February 25, 2020 and February 27, 2020. The hearing provided information about the Preferred Alternative and allowed for residents, business owners, tenants and those interested, to submit comments and express views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed project. The hearing included an open house and formal presentation. The public was given the opportunity to provide comment by mail, in writing or verbally at a microphone during the formal presentation, or to a court reporter at the hearing.

One hundred and forty-three (143) members of the public signed in at the public hearing. Eleven (11) comments were collected at the meeting; 22 persons spoke during the formal session and 125 additional comments were received by mail, email, and through the website during the official comment period which ended March 12, 2020. A transcript of the public hearing is provided in the Comments and Coordination Report, available on the project website, www.tampainterstatestudy.com.

Preferred Alternative

The project's purpose is to upgrade the safety and efficiency of the existing I-275 and I-4 corridors, while maintaining access to the surrounding community. It is also to provide congestion relief and accessibility to improve mobility, travel times, system linkages and multimodal connections, while supporting regional economic development goals and enhancing the quality of life for residents and visitors. The Preferred Alternative includes the full reconstruction of the Westshore Area Interchange (SR 60/ I-275) and will include general purpose lanes and tolled express lanes. Tolled express lanes will also be added along the I-275 corridor connecting the Howard Frankland Bridge and Westshore Area to Downtown Tampa. Operational improvements within the Downtown Tampa Interchange (I-275/I-4) will enhance safety and traffic operations. Improvements within the study corridor are divided into Segments as seen in Figure 1. Improvements are proposed in Segments 1A, 2A, 2B, and 3A. There are no improvements proposed in Segments 3B or 3C under the Preferred Alternative.

I-275 from the Howard Frankland Bridge to North of the Hillsborough River

The proposed improvements on I-275 from the Howard Frankland Bridge to Rome Avenue include the existing four general purpose lanes and two new express lanes in each direction, auxiliary lanes in between ramps, and full reconstruction of the Westshore Area Interchange (I-275/SR 60). The interchange will include new general purpose "flyover" ramps and the addition of tolled express lanes and ramps. The express lane improvements will provide direct connections from I-275 to/from the Veterans Expressway, Independence Parkway, Courtney Campbell Causeway, Tampa International Airport, and Himes Avenue. An express lane entrance ramp to southbound I-275 will be added at Reo Street. The median of I-275 will be preserved for future fixed-guideway transit.

Figure 2 – I-275/SR60 Interchange Proposed Improvements Conceptual Rendering

At a local level, the improvements will provide a benefit to the walk/bike network and traffic circulation in the Westshore Business District by reconnecting Reo Street, Occident Street, and Trask Street beneath the interstate. Reconnecting these streets will relieve traffic bottlenecks on West Shore Boulevard and improve access and connectivity. A shared use path will be constructed along the west side of Reo Street, providing connectivity from the shared use path across the Howard Frankland Bridge to Cypress Point Park. Lighting improvements and other minor enhancements will be added to existing underpasses.

From Rome Avenue to north of the Hillsborough River, improvements include the addition of express lanes along I-275 that will terminate into Downtown Tampa. As part of the new configuration, drivers accessing Downtown Tampa from the northbound I-275 general purpose lanes will exit exclusively to Tampa Street. Northbound express lane traffic will exit via a direct connect ramp to Ashley Drive. Southbound I-275 on-ramps for both general purpose and express lanes will remain at Tampa Street. Access to northbound

I-275 will remain at Ashley Street and the ramp bridge will be reconstructed to accommodate future demand. In Downtown Tampa, improvements will be made along Scott Street to provide enhanced access to northbound I-275 and I-4.

Operational Improvements within the Downtown Tampa Interchange (I-275/I-4)

The proposed operational improvements will address most of the existing bottlenecks and high crash rates drivers experience. Some of the existing bridges in the Downtown Tampa Interchange will be removed, replaced, or widened. Bridges that are widened will be brought up to current standards.

Southbound I-275 to Eastbound I-4

The improvements from southbound I-275 to eastbound I-4 consist of widening the existing flyover ramp to two lanes and extending the existing southbound auxiliary lane from Dr. Martin Luther King Jr. Boulevard. The existing southbound exit ramp to Floribraska Avenue will remain open. The improvements include relocating the exit ramp to Ybor City and East Tampa from the existing location at 21st/22nd Streets to 14th/15th Streets and widening East 13th Avenue to better facilitate access to 21st/22nd Streets.

Westbound I-4 to Northbound I-275

The improvements from westbound I-4 to northbound I-275 consist of widening the existing one lane exit ramp to northbound I-275 to two lanes. The additional lane will continue along northbound I-275 to the Dr. Martin Luther King Jr. Boulevard exit ramp. The Dr. Martin Luther King Jr. Boulevard exit ramp will be widened to two lanes.

Westbound I-4 to Southbound I-275

The improvements from westbound I-4 to southbound I-275 consist of widening the two-lane ramp to southbound I-275 to three lanes. The exit ramps to Downtown Tampa will be adjusted to improve spacing so drivers can more efficiently exit to downtown. Exits will provide the same access as today to Orange Avenue, Jefferson Street, Ashley Drive, and Doyle Carlton Drive. Along southbound I-275, full shoulder widths will be provided from Palm Avenue to Jefferson Street.

I-4 from West of the Selmon Expressway Connector to East of 50th Street

There are no improvements in this area as part of the TIS SEIS.

The table below outlines the timing and funding for the improvements associated with the Preferred Alternative

FDOT Adopted 5-Year Work Program Fiscal Year 2020/2021—Fiscal Year 2024/2025		
I-275 from Howard Frankland Bridge to North of Hillsborough River		
Design	ROW Acquisition	Construction
Included in Design Build Construction Funded (2023/2024)	Funded (2020/2021 – Ongoing)	Funded (2023/2024)
Downtown Tampa Interchange (I-275/I-4) Operational Improvements		
Design	ROW Acquisition	Construction
Not Currently Funded	Not Currently Funded	Not Currently Funded
I-4 from East of 22nd Street to East of 50th Street*		
Design	ROW Acquisition	Construction
No Further Improvements	N/A	N/A

*A portion of TIS Segment 3B overlaps with partially funded improvements of Tampa Bay Next Section 8, (Financial Project Identification Number 431746-3-52-01), including the beginning of the express lane system heading east on I-4.

FDOT has conducted extensive public engagement throughout this study and will continue to engage the public and coordinate with local agencies throughout future project phases.

F. Letters of Support

January 7, 2019

Erik R. Fenniman
Interim Secretary, Florida Department of Transportation
605 Suwannee Street
Tallahassee, FL 32399-0450

RE: Westshore SR 60/I-275 Interchange project

Dear Interim Secretary Fenniman:

I am writing in support of the Florida Department of Transportation's (FDOT) plans to reconstruct the Westshore Interchange in order to improve the safety and traffic operations on this important roadway.

The Westshore Interchange is the center of the transit hub in our region. Sections 4 and 5 of the Tampa Bay NEXT Interstate Modernization Project are currently our region's number one priority for funding at this time. The area which includes I-275 from the Howard Frankland Bridge to N Boulevard, SR60 from I-275 to the Veterans Expressway, and the Veterans Expressway to Hillsborough Avenue, is an area identified as a severe crash corridor in Hillsborough MPO's Vision Zero Action Plan. With 993 total crashes in 2016, the reconstruction of the Interchange will alleviate weave, merge, and congestion issues which have contributed to the transportation difficulties of the immediate Interchange area as well as the cities and counties in its proximity.

Having the Region's only Level II and Pediatric Trauma Center located near the Westshore Business District at St. Joseph's Hospital and St. Joseph's Children's Hospital, we understand that too often the individuals injured as a result of traffic crashes in this area come through the doors of our Emergency Department. Providing urgently-needed improvements to this thoroughfare will not only assist with traffic improvements, but it will also help facilitate safer travel for our patients, their families, and our hospital team members.

I thank you for your consideration of this critical reconstruction project and urge your support.

Kimberly Guy

President, St. Joseph's Hospital
Senior Vice President, Market Leader – East Region
BayCare Health System

Tampa, FL 33612
Re: Westshore Area Interchange (I-275/SR-60)

JAN 2 19 9:14 AM

Dear Secretary Gwynn:

On behalf of Caspers Company, I wish to commend FDOT District Seven's leadership and community engagement in the planning and implementation of road improvements aimed at improving safety and efficiency of our roadways. The PD&E focused on I-275 between Martin Luther King Jr. Boulevard and Bearss Avenue, the north Tampa Intermodal Study, and the East Fowler Multimodal Feasibility Study all have the potential to enhance the development of the areas where our businesses had been negatively impacted.

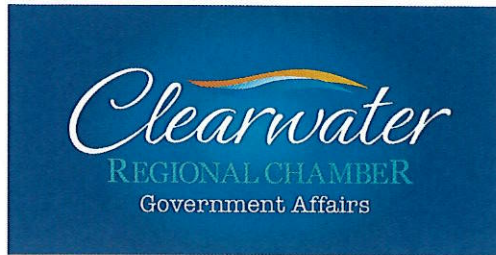

While these projects affect roadways within the Tampa area, the functioning of the Interstate 275 and State Road 60 interchange in the Westshore area near Tampa International Airport is also crucial to our region's competitiveness in the global innovation economy. The unavoidable interstate sclerosis of reducing 4 lanes to 2 both coming and going into the Westshore/FL 60/TIA section of the roadway causes immeasurable drive-time distress and delays. The Long Range Cost Feasible Plan for Florida's Strategic Intermodal System shows construction for this project funded in the 2029 - 2045 time frame. We believe that is too long to wait as our region's population and passenger traffic at TIA are projected to grow significantly and make this disaster worse.

Caspers considers the I-275/SR-60/TIA interchange to be a top priority at this time and we hope that FDOT will be successful in securing the state and federal funding necessary to begin construction on an interchange that will meet our current and future needs as soon as possible.

Sincerely,

A handwritten signature in black ink, appearing to read "Bob Conigliaro".

Re: Westshore Area (SR 60/I-275) Interchange

Dear Secretary Gwynn,

The Clearwater Regional Chamber of Commerce respectfully submits this letter in support of advancing the Westshore Interchange (SR 60/I-275) Reconstruction Project.

The State Road 60 connection between Tampa International Airport and America's Number One beach is critical to the continued success of Clearwater's business and tourism stakeholders. More than half the businesses in the Clearwater Regional Chamber are tourism related, and tourism makes up the lions share of overall revenue in Pinellas County. Reconstructing this interchange will enable visitors to reach Clearwater and Clearwater Beach by improving public health and safety, enable regional transit connectivity, and reduce pressure on the regional roadway network.

As we move forward with plans for multimodal transit options in the region, the Clearwater business community and the Clearwater Regional Chamber of Commerce understand the importance that this interchange will have in the coming years. Completion of this project will mark it as a signature project for the Tampa Bay Region and for the State of Florida. We request that FDOT provide full funding to address this critical priority as soon as possible.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mike Sutton". The signature is stylized and enclosed within a circular flourish.

CITY COUNCIL

February 7, 2019

Secretary David Gwynn
Florida Department of Transportation, District Seven
11201 N Malcom McKinley Drive
Tampa, Florida 33612-6403

Dear Secretary Gwynn:

On behalf of the City of Clearwater, I write in support of an advancing the prioritization of the Westshore Interchange (I-275/SR60) Reconstruction project to an earlier implementation schedule. FDOT District Seven progress on planning and implementing road improvements throughout the Tampa Bay region is commendable. The construction of the Courtney Campbell multiuse trail, the reconstruction of the Howard Frankland Bridge, the proposed Westshore Intermodal Center, and the State Road 60 Multimodal study will bring major improvements to transportation congestion and access for city residents, visitors, and businesses. The city is actively exploring various transportation options for all modes to improve access from Tampa International Airport to its businesses and beaches.

Addressing the bottleneck at the Westshore Interchange is a fundamental component of these projects' goals. The Westshore District on the east side of the bridge combined with the Pinellas County Gateway on the west end form one of the largest employment areas in the Southeast and serve a rapidly growing regional population. The city does not believe that delaying construction funding for ten years is wise and in the best interest of the Tampa Bay region. In that timeframe, traffic volumes will increase significantly, and the full utilization of other improvements may be hampered.

Until resolved, the interchange will continue to be a bottleneck in Florida's Strategic Intermodal System within Tampa Bay and diminish the effectiveness of other major infrastructure investments such as the Howard Frankland Bridge. In addition to relieving pressure on the regional roadway network, reconstructing the interchange will also enable local street connectivity in the Westshore District to strengthen local access and to reduce congestion on SR 60 and I-275. The City of Clearwater also believes that this project will improve the travel time reliability, safety and personal mobility in the Tampa Bay Region.

George N. Cretekos, Mayor

"Equal Employment and Affirmative Action Employer"

Secretary David Gwynn
February 7, 2019
Page 2

The City of Clearwater strongly supports regional transportation connectivity and mobility as critical to its preeminent position as an international tourist destination and fundamental to the success of our economic and livability goals. This critical link in our regional system should not undermine all the other valuable work being done. Therefore, the City of Clearwater supports the advancement of this project timeframe and looks forward to continued collaboration with FDOT on this priority project as well as other projects within District Seven.

With best wishes and warm, personal regards, I am

Sincerely,

George N. Cretekos
Mayor
City of Clearwater

OFFICE OF THE MAYOR

CITY OF ST. PETERSBURG

RICK KRISEMAN, MAYOR

December 5, 2018

Secretary David Gwynn
FDOT District Seven Secretary of Transportation
Florida Department of Transportation District Seven
11201 McKinley Drive
Tampa, FL, 33612

Re: Westshore Area (I-275/SR 60) Interchange

Dear Secretary Gwynn:

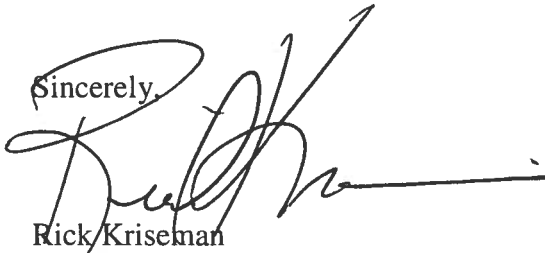

As the Mayor of the City of St. Petersburg, I commend the FDOT District Seven's leadership in the planning and implementation of limited access road improvements across and on both sides of Tampa Bay. The Gateway Expressway project and express lanes on I-275 in northern St. Petersburg are under construction. We greatly appreciate that FDOT has placed a design build project for additional capacity on I-275 from Roosevelt Boulevard to 54th Avenue South in the Tentative Five-Year Work Program. Construction of the new span of the Howard Frankland Bridge, which will include two express lanes in each direction, is expected to begin a year from now. On the Hillsborough County side, the operational improvements that will add one lane in each direction of I-275 from the Westshore area (I-275/SR 60) interchange to Dale Mabry Highway will help improve traffic flow in this heavily congested area.

While these enhancements will improve traffic flow through the areas they traverse, I am very concerned about the schedule for the reconstruction of the Westshore interchange. The Westshore District and Pinellas County's Gateway area at the western end of the bridge comprise one of the largest employment areas in the Southeast, serving a rapidly growing regional population of more than 2.5 million residents. In the Long Range Cost Feasible Plan for Florida's Strategic Intermodal System, construction funding for the interchange is listed in the FY 2029 to FY 2045 period of the plan. We do not believe that the Tampa Bay region can wait ten or more years to see the reconstruction of this critical interchange to begin. It has been a regional bottleneck for decades, and will likely experience even higher traffic volumes over the next ten years as the rapid growth of the Tampa Bay region's population and economy continues to occur.

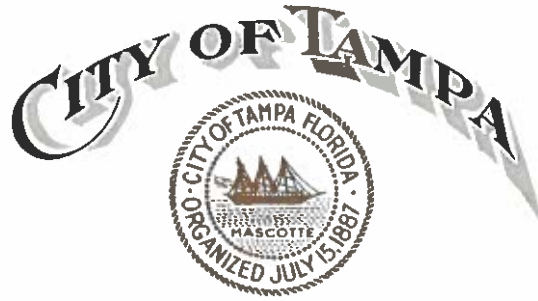

The Hillsborough County MPO, Tampa Bay Area Transportation Management Area Leadership Group, and Forward Pinellas all agree that the reconstruction of the I-275/SR 60 interchange is the top transportation project priority for the Tampa Bay region - and I concur. **The City of St. Petersburg considers the Westshore interchange (Segments 4 and 5 of the Tampa Bay Next Program) to be the region's number one priority for SIS funding at this time.**

With such strong support for the Westshore interchange reconstruction project on both sides of Tampa Bay, we hope that the FDOT will be able to obtain the necessary state and federal funding for construction sooner than originally anticipated.

Sincerely,

A handwritten signature in black ink, appearing to read "Rick Kriseman", written over the word "Sincerely,".

RE: Westshore Interchange (I-275/SR 60) Reconstruction Project Letter of Support

Dear Secretary Gwynn,

The City of Tampa respectfully submits this letter in support of advancing the Westshore Interchange (I-275/SR 60) Reconstruction Project.

The Westshore Interchange is a critical link to our Westshore and West Tampa communities. The Westshore area, which includes Tampa International Airport and Raymond James Stadium, is the largest employment center in the Tampa Bay region and one of Florida's largest economic centers. Motorists within the city face increased safety risks, traffic congestion and delays as demand from our region's sustained growth continues to place pressure on the existing transportation network. Reconstruction of the Westshore Interchange will substantially address these effects by providing and accommodating improved multi-modal transportation alternatives.

The reconstruction project will enable completion of important North/South roadway connections such as Reo, Occident and Trask Streets, beneath the Interstate and reconstruction of West Shore Boulevard, which will improve distribution of traffic among the surface streets while enabling opportunities for other complete streets and multi-modal mobility options including transit, and bike and pedestrian improvements. Reconstruction will also provide the groundwork for implementation of future regional and local transit projects.

This Westshore Interchange Project is prioritized in our Hillsborough Metropolitan Planning Organization's (MPO) Long Range Transportation Plan and Transportation Improvement Program. The Tampa Bay Area Regional Transportation Authority MPO Chair's Coordinating Committee and the Tampa Bay Transportation Management Area Leadership Group also recognize this project as a regional priority.

The City is committed to continued collaboration with your District Seven team to provide an efficient and safe transportation experience for our community and visitors. We request that FDOT advance the funding for the Westshore Interchange Project to address this critical priority. Thank you for your consideration.

Sincerely,

Bob Buckhorn

January 3, 2019

Secretary David Gwynn
FDOT District Seven Secretary of Transportation
Florida Department of Transportation District Seven
11201 McKinley Drive
Tampa, FL 33612

Dear Secretary Gwynn:

We are writing to express **support for the reconstruction of the I-275/SR-60 (Westshore Area) Interchange** and to respectfully request that funding for this critical roadway infrastructure project be prioritized to address long-standing and significant traffic congestion in this key part of the region. We join with local elected officials, transportation agencies, the Port of Tampa Bay, Tampa International Airport and large and small employers in advocating for this initiative, which is essential to improving the transit network serving the local community and state.

As you may know, DTCC employs nearly 1,200 people in two offices northeast of downtown. As one of the largest employers in Hillsborough County, we are aware that commuting via the I-275/SR-60 Interchange has become increasingly challenging for residents, workers and visitors to the area. The daily congestion and traffic delays impose an economic cost on our business and create unnecessary burdens on our employees. It is our understanding that funding for the reconstruction of the Westshore Interchange will not be available until, at the soonest, Fiscal Year 2029 in the Strategic Intermodal 2045 Cost Feasible Plan. While we recognize the intense competition for limited transportation resources, delaying this critical initiative for a decade or longer could negatively impact the renaissance that is occurring across Tampa Bay and hinder the region's potential as an economic hub for the state. The reconstruction and modernization of the I-275/SR-60 Interchange is essential to enabling smart and sustainable job growth as well as serving as a springboard for other key transit initiatives in the years ahead.

We applaud the Florida Department of Transportation District Seven's leadership for your commitment to advancing transportation projects that improve traffic flow, enhance safety, reduce pollution and support a vibrant future for Tampa Bay. We look forward to working in partnership with you, along with our elected officials, local organizations and the community to address the critical transit needs of the region.

Sincerely,

FORWARD PINELLAS

RE: I-275 Westshore Interchange Reconstruction

Dear Secretary Gwynn:

The Howard Frankland Bridge between Pinellas and Hillsborough Counties is essential to Florida's Strategic Intermodal System in the Tampa Bay region. Traffic using the I-275 bridge across Tampa Bay must interact with the State Road 60 interchange that connects the Westshore District and Tampa International Airport. With four lanes coming from the east and the west along I-275, and the Veterans Expressway and SR 60 coming into the interchange from the north and south, the SR 60/I-275 interchange is the most significant traffic bottleneck in the Tampa Bay region. The Howard Frankland Bridge is four lanes wide coming into the interchange and, with exit ramps for SR 60, narrows to just two through lanes, creating daily recurring traffic congestion for traffic within and moving through Tampa.

Tampa's Westshore District and Pinellas County's Gateway area at the western end of the bridge comprise one of the largest employment areas in the Southeast, serving a rapidly growing regional population of more than 2.5 million residents. Despite that, the Florida Department of Transportation currently shows no construction funding for the interchange within the next five years. Reconstructing this interchange will enable local street connectivity in the Westshore District to strengthen local access, improve public health and safety, enable regional transit connectivity, and reduce pressure on the regional roadway network.

When the Forward Pinellas Board adopted its regional priorities in September, it also took action, in its role as the metropolitan planning organization, to specifically identify the I-275/SR 60 interchange as the top regional transportation priority in the Tampa Bay area. This is because the board strongly believes that providing construction funding to reconstruct and modernize this interchange will have a significant economic benefit for the entire region, while improving travel time reliability, safety and personal mobility.

It is imperative that FDOT allocate funds for reconstruction of this critical interchange at the earliest opportunity. We look forward to working with you and our other regional transportation partners on this important priority within District Seven. Thank you for your support and leadership.

Sincerely,

Whit Blanton, FAICP
Executive Director

Re: Westshore Area Interchange (I-275/SR-60)

Dear Secretary Gwynn:

On behalf of AJI Holdings, LLC, a family owned developer, owner, and operator of restaurants throughout Central Florida, I would like to express full support for the Westshore Interchange reconstruction project.

A major part of our business is to evaluate real estate all over Central Florida. Before we decide to build a unit we look for great fundamentals and outstanding prospects for growth. In a mature market such as the Westshore Business District it is vital that our infrastructure keep pace with the growth in our commercial and residential communities. Assuming the Westshore Area Interchange project moves forward we will continue to love the Westshore Business District for one of our units in the next few years.

We sincerely hope you reinvest in this unbelievably important corridor. Our fear is that if you do not businesses and residents (all potential customers of our establishments) will be lured away to a bevy of new high density zones with brand new residential, office, and retail opportunities. Please reinvest in the Westshore Area Interchange (I-275/SR-60) to ensure the Westshore CBD remains one of the most important commercial districts in the State of Florida.

All My Best,

A handwritten signature in black ink, appearing to read "Ian Lieberman", written over a long horizontal line that extends across the page.

December 3, 2018

Secretary David Gwynn
Florida Department of Transportation, District Seven
11201 N. Malcolm McKinley Drive
Tampa, Florida 33612-6403

Dear Secretary Gwynn,

Please accept this letter of support from the Hillsborough Area Regional Transit Authority (HART) for the Florida Department of Transportation's (FDOT) reconstruction of the I-275/SR 60 (Westshore Area) Interchange in the Westshore Area of Tampa.

Reconstruction of the Westshore Area Interchange will vastly improve safety and mobility for commuters and tourists and facilitate more efficient freight movement and hurricane evacuation routes. The Westshore area is the largest employment district in the Tampa Bay region, and it is a regional draw for destinations such as the Tampa International Airport, Raymond James Stadium, and two major shopping malls, making this project a top regional transportation priority for Hillsborough County.

At a local level, the project has the opportunity to help the District achieve its vision of making it easier for residents and visitors to walk and bike provide an enormous benefit to traffic circulation in the Westshore Business District, improve access and connectivity, and facilitate economic development.

Recently, the FDOT released its Strategic Intermodal System 2045 Cost Feasible Plan, which indicates that the interchange is likely to be funded for reconstruction in the next 10 years or more. The Westshore Area interchange in its current configuration could become a problematic bottleneck, intensified by the reconstruction of the Howard Frankland Bridge scheduled to begin next year, and the addition of express lanes on the new bridge. The reconstruction project has been planned and envisioned for over 20 years, and our community cannot delay its construction any longer.

HART is requesting that the I-275/SR 60 Interchange reconstruction be advanced as soon as possible. We are committed to serving as a partner to FDOT to make this happen.

Respectfully,

Lesley "Les" Miller, Commissioner
HART Board Chair

Office of the President | Dr. Ken Atwater

RE: Westshore Interchange (I-275/SR 60) Reconstruction Project Letter of Support

Dear Secretary Gwynn,

Hillsborough Community College respectfully submits this letter in support of advancing the Westshore Interchange (I-275/SR 60) Reconstruction Project.

The PD&E focused on I-275 between Martin Luther King Jr. Boulevard and Bears Avenue, the north Tampa Intermodal Study, and the East Fowler Multimodal Feasibility Study all have the potential to enhance the development of the Tampa Bay area and specifically improve access to our largest campus on Dale Mabry.

While these projects affect roadways surrounding our Dale Mabry campus, the functioning of the Interstate 275 and State Road 60 interchange in the Westshore area near Tampa International Airport is also crucial to our region's competitiveness in the global innovation economy. The Long Range Cost Feasible Plan for Florida's Strategic Intermodal System shows construction for this project funded in the 2029 - 2045 period. We believe that is too long to wait as HCC's student and staff population are projected to grow and the interchange already creates a regional bottleneck.

Hillsborough Community College considers the I-275/SR-60 interchange to be a top priority at this time and we hope that FDOT will be successful in securing the state and federal funding necessary to begin construction on an interchange that will meet our current and future needs as soon as possible.

Sincerely,

Ken Atwater, Ph.D.

RE: Westshore Interchange (I-275/SR 60) Reconstruction

Dear Interim Secretary Fenniman:

This letter expresses our full support for the Westshore Interchange (I-275/SR 60) reconstruction project, which is part of a long-standing plan to improve and modernize Tampa's interstate system.

The proposed reconstruction is prioritized for funding in the *Imagine 2040 Long Range Transportation Plan* and in the shorter-term priority list for the *Hillsborough MPO Transportation Improvement Program*. It is also an important priority for the greater region, prioritized by the TBARTA MPO Chairs' Coordinating Committee and the Tampa Bay Transportation Management Area Leadership Group.

The Westshore Business District, where the project is located, is one of Florida's largest economic centers, and the location of Tampa International Airport. Traffic from around the region converges at Westshore's I-275/SR60 interchange. With the recent I-275 widening between Westshore and Downtown Tampa, the expansion of the Veterans Expressway, and the upcoming reconstruction of the Howard Frankland Bridge, traffic demand through this lynchpin interchange is continuing to grow.

Improving the interchange is essential to our city's and region's continued economic vitality. Lacking the reconstruction, the escalating traffic on both I-275 and the Veterans Expressway has resulted in daily bottlenecks at the interchange and dangerous back-ups on the Howard Frankland Bridge. The proposed improvements will both improve travel time reliability and increase safety.

Further development of the project design will provide the detailed information necessary to mark this as a signature project for the region and state. We request that FDOT provide full funding to address this critical priority as soon as possible.

Sincerely,

Commissioner Lesley "Les" Miller, Jr.

Mr. Kevin Thibault, P.E.
Secretary of Florida Department of Transportation
605 Suwanee Street, Mail Stop 59
Tallahassee, FL 32399

Dear Secretary Thibault,

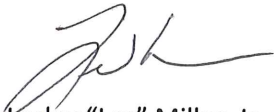

The Hillsborough County Board of County Commissioners would like to thank the Florida Department of Transportation (FDOT) for its ongoing commitment to safety and mobility in our region. The purpose of this letter is to express our support for the reconstruction of the I-275/SR 60 Interchange in the Westshore Area of Tampa.

This project is a top regional transportation priority for Hillsborough County. Reconstruction of the Westshore Area Interchange will vastly improve safety and mobility for commuters and tourists and facilitate more efficient freight movement and hurricane evacuation routes. While the interchange is located in the City of Tampa, it serves as a vital component of our County's transportation network and the transportation network of the entire Tampa Bay region. The Westshore area is the largest employment district in the Tampa Bay region, and it is a regional draw for destinations such as the Tampa International Airport, Raymond James Stadium, and two major shopping malls.

At a local level, the project has the opportunity to provide an enormous benefit to the walk/bike network and traffic circulation in the Westshore Business District. The project would also allow for the reconnection of Reo Street, Occident Street, and Trask Street beneath the interstate – three local streets that were bifurcated when the interstate was originally constructed nearly 50 years ago. Reconnecting these streets will relieve traffic bottlenecks on Westshore Boulevard, improve access and connectivity, facilitate economic development, and help the District achieve its vision of making it easier for residents and visitors to walk and bike.

As you know, this project has been planned and envisioned for over 20 years. Recently, the FDOT released its Strategic Intermodal System 2045 Cost Feasible Plan, which indicates that the interchange is likely to be funded for reconstruction in the next 10 years or more. This time frame is not acceptable to the residents and visitors of Hillsborough County. With almost 60,000 people moving to the Tampa Bay region each year, we simply cannot delay the construction of this project any longer. We are requesting that the I-275/SR 60 Interchange reconstruction be advanced as soon as possible. We are committed to serving as a partner to FDOT to make this happen.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lesley Miller, Jr.', written in a cursive style.

Re: Westshore Area Interchange (I-275/SR-60)

Dear Secretary Gwynn:

On behalf of H. Lee Moffitt Cancer Center I wish to commend FDOT District Seven's leadership and community engagement in the planning and implementation of road improvements aimed at improving safety and efficiency of our roadways. The PD&E focused on I-275 between Martin Luther King Jr. Boulevard and Bearss Avenue, the north Tampa Intermodal Study, and the East Fowler Multimodal Feasibility Study are all important projects that could benefit our patients and staff greatly.

While these projects directly affect roadways surrounding Moffitt, the functioning of the Interstate 275 and State Road 60 interchange in the Westshore area near Tampa International Airport is also crucial to our mission of contributing to the prevention and cure of cancer as Moffitt is a treatment destination for patients driving from Pinellas County and the airport. The Long Range Cost Feasible Plan for Florida's Strategic Intermodal System shows construction for this project funded in the 2029 - 2045 time frame. We believe that is too long to wait as our region's population and passenger traffic at TIA are projected to grow significantly while the interchange already creates a regional bottleneck.

H. Lee Moffitt Cancer Center considers the I-275/SR-60 interchange to be a high priority at this time and we hope that FDOT will be successful in securing the state and federal funding necessary to begin construction on an interchange that will meet our current and future needs as soon as possible.

Tampa, FL 33612

Dear Secretary Gwynn:

This letter is to express the Pasco County Board of County Commissioners' unanimous support to expedite the reconstruction of the I-275/SR60 interchange. We see this project as a key system improvement that will benefit communities throughout the Tampa Bay region.

Reconstruction of the Westshore area interchange will significantly improve safety, mobility, freight movement and hurricane evacuation. While the interchange is in Tampa, it is a vital facility in the region's transportation network. The Westshore district is the Tampa Bay area's largest employment center and includes major destinations such as Tampa International Airport and the Raymond James Stadium, all of which serve Pasco County residents and visitors alike.

As the reconstruction of the Howard Frankland Bridge commences next year, that project's addition of express lanes could create a regional bottleneck at the I-275/SR60 interchange. While improvements to the interchange have been planned for more than 20 years, FDOT's recently released Strategic Intermodal System 2045 Cost Feasible Plan indicates that reconstruction funding may be postponed for 10 years or more. The Pasco County Board of County Commissioners and the citizens we represent find this timeframe unacceptable. As Pasco County and the rest of the Bay Area continue to grow with 60,000 new residents annually, interchange reconstruction must not be delayed. We are requesting that the I-275/SR60 project be funded for construction as soon as possible.

Sincerely,

Ronald E. Oakley, Chairman
Board of County Commissioners of Pasco County, Florida

Re: Westshore Area Interchange (I-275/SR 60)

Dear Secretary Gwynn:

As a member of the Innovation Partnership Business Advisory Group I wish to acknowledge the district's leadership efforts on behalf the community in pursuing needed improvements in safe and effective movement of people and vehicles throughout the Tampa Bay area. In particular, planned changes in the Innovation Partnership area align with the area's vision for economic development that will impact the entire region.

That is the point though isn't it? This is an interconnected region and for it to meet its potential in attracting the underpinnings of a strong economy with all of the accompanying quality of life attributes of such an economy, leadership has to view the region as a whole.

It is my understanding that the Long Range Cost Feasibility Plan for Florida's Intermodal System does not address needed improvements in a vital part of the regions commercial activity, the I-275/SR 60 interchange in Westshore, until 2029-2045. With projected population growth in Tampa and forecasted increases in traffic volume from TIA, we believe this is a priority that cannot wait. This is an important time for leadership to lead.

I hope that FDOT will doggedly pursue all available state and federal funding to accelerate the current timetable for construction to one that is more closely aligned with our actual needs.

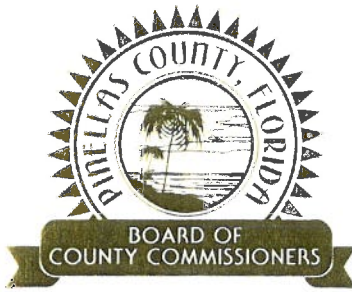

Thank you for your diligence in this endeavor.

Sincerely,

A handwritten signature in blue ink, appearing to read "John P. Foster".

David Gwynn
FDOT District Seven Secretary of Transportation
Florida Department of Transportation District Seven
11201 McKinley Drive
Tampa, FL, 33612

Dear Secretary Gwynn:

Each day, more than 170,000 vehicles cross the Howard Frankland Bridge between Pinellas and Hillsborough Counties, a linchpin of Florida's Strategic Intermodal System in Tampa Bay. That traffic must interact with the State Road 60 interchange that connects the Westshore District and Tampa International Airport. With four lanes of traffic coming from the east and the west along I-275, and the Veterans Expressway and SR 60 coming into the interchange from the north and south, the SR 60/I-275 interchange is the most significant transportation bottleneck in the Tampa Bay region. The Howard Frankland Bridge is four lanes wide coming into the interchange and, with exit ramps for SR 60, narrows to just two through lanes, creating daily recurring traffic congestion for traffic within and moving through Tampa.

The Westshore District and Pinellas County's Gateway area at the western end of the bridge comprise one of the largest employment areas in the Southeast, serving a rapidly growing regional population of more than 2.5 million residents. Despite this situation, the Florida Department of Transportation currently shows no construction funding for the interchange within the next five years. Planned improvements will include local street connectivity in the Westshore District to strengthen local access, improve public health and safety, and reduce pressure on the regional roadway network.

Resolving this critical transportation bottleneck will have a significant economic benefit for the entire Tampa Bay region. To improve travel time reliability, safety, and personal mobility, it is imperative that FDOT allocate funds for reconstruction of this critical interchange at the earliest opportunity.

The Pinellas County Board of County Commissioners supports making the reconstruction of the I-275/SR 60 interchange the top transportation project priority for the Tampa Bay region.

We look forward to continued collaboration on this priority as well as other projects within District Seven.

Sincerely,

A handwritten signature in black ink that reads "Kenneth T. Welch".

KENNETH T. WELCH, Chairman
Pinellas Board of County Commissioners

December 5, 2018

Dear Secretary Gwynn,

Port Tampa Bay would like to thank the Florida Department of Transportation (FDOT) for its ongoing commitment to safety and mobility in our region. The purpose of this letter is to express our support for the reconstruction of the I-275/SR 60 (Westshore Area) Interchange in the Westshore Area of Tampa.

We understand and support this project as one of the top regional transportation priority for Hillsborough County. There are enormous benefits; improving safety, economically and relieving congestion making it easier for residents and visitors to walk and bike.

This project has been planned for over 20 years. Recently, the FDOT released its Strategic Intermodal System 2045 Cost Feasible Plan, which indicates that the interchange is likely to be funded for reconstruction in the next 10 years or more. We feel the time for this project is now. There are significant projects going on within the Westshore area. Our view is, with all the construction going on, the Westshore Area interchange currently could become a hindrance to mobility frustrating our citizens and choking economic development.

We are requesting that the I-275/SR 60 Interchange reconstruction be advanced as soon as possible. We are committed to serving as a partner to FDOT to make this happen.

Sincerely,

A handwritten signature in black ink that reads 'A. Paul Anderson'.

August 22, 2019

Secretary David Gwynn
FDOT District Seven Secretary of Transportation
Florida Department of Transportation, District Seven
11201 McKinley Drive
Tampa, Florida 33612

Dear Secretary Gwynn,

On behalf of the constituents of Senate District 19 who traverse through one of Tampa's main transportation arteries, I am writing to express strong support for the reconstruction of the I-275/SR-60 interchange in the Westshore area. I would also ask that you prioritize this critical roadway infrastructure project in order to alleviate the traffic congestion that increases in this area on an annual basis.

Tampa's Westshore Interchange is a vital transportation artery that serves a growing regional population of over 2.5 million residents. This interchange operates as a lynchpin for those traveling to Tampa International Airport, Hillsborough Community College, Raymond James Stadium, the Veteran's Expressway to north Hillsborough, and serving as one of the entry points to downtown Tampa via Kennedy Boulevard (SR 60).

Improving this interchange is not just a city or county issue, it is a regional issue that will impact economic development and stability. The timeline for this project needs to be advanced with the goal of its completion coinciding with the expansion and improvements being made to the Howard Franklin Bridge. The Gateway Express Project on I-275 is currently under construction and will ultimately impact the traffic flow onto the Howard Franklin Bridge and into the Westshore Business District. It cannot be overstated the importance of making the Westshore Interchange a priority.

Thank you for your continued leadership and service to District Seven and for your consideration of this request.

Sincerely,

A handwritten signature in green ink that reads "Darryl E. Rouson".

RE: Westshore Area (I-275/SR 60) Interchange

Dear Secretary Gwynn,

As President and CEO of the St. Petersburg Area Chamber of Commerce, I want to first thank you for your leadership of District 7 and the forward thinking you have brought to the office. Your planning and implementation of projects throughout our region have been incredibly successful and we look forward to the plans to come.

While the I-275/SR 60 Interchange is on the other side of the Bay from St. Petersburg, the Chamber joins the City of St. Petersburg, the Pinellas Board of County Commissioners, Forward Pinellas, and other area leaders in considering this project to be the number one priority to improve congestion in Tampa Bay.

The recently released FDOT Strategic Intermodal System 2045 Cost Feasibility Plan indicates the interchange is likely to be funded for improvements in the next 10 years. That is simply too long a timeframe. The bottlenecks and congestion in that area are already intolerable and 10 more years of growth in our region will only exacerbate the problem.

The St. Petersburg Area Chamber of Commerce requests that the I-275/SR 60 Interchange reconstruction be funded at the earliest opportunity and look forward to working with FDOT on other improvements in the future.

Sincerely,

Chris Steinocher
President and CEO

The St. Petersburg Area Chamber of Commerce shall be the preeminent leader of business in order to ensure the economic growth and vitality of our community.

December 18, 2018

Secretary David W. Gwynn
Florida Department of Transportation
District #7
11201 North McKinley Drive
Tampa, FL 33612

Dear Secretary Gwynn,

I am writing you today on behalf of the leaders of many of the largest companies in Tampa Bay, to encourage FDOT to expedite the funding and reconstruction of the I-275/SR 60 (Westshore Area) interchange, which is a critical connection point for regional transportation.

We join organizations from throughout the region in making this important request, including: the Tampa Bay Area Regional Transit Authority, Hillsborough MPO, Forward Pinellas, Hillsborough Area Regional Transit Authority, the cities of Tampa and St. Petersburg, Pinellas County, Port Tampa Bay and Tampa International Airport. In addition, the TBARTA MPO Chairs' Coordinating Committee and the Tampa Bay Transportation Management Area Leadership group have prioritized this project.

Our collective goal is to have FDOT advance this project into the region's five-year work plan, so its completion can coincide as closely as possible with the opening of the new and expanded general purpose and express lanes of the Howard Frankland Bridge.

Underscoring the need for the project is the rapid population growth in District 7. As many as 646,000 new residents will move to the area by 2025, making it one of the fastest growing regions in the United States. To ensure regional connectivity for residents, and access to jobs, events and activities, we have to make sure we maintain our transportation infrastructure and relieve key bottlenecks such as the Westshore Interchange. The interchange also provides critical access to Tampa International Airport and the Westshore Business District, and serves the expanded Veterans Expressway and the widened freeway between Downtown Tampa and Westshore.

We thank you for all of your efforts on behalf of the region. We hope that FDOT will positively respond to our request to advance this important project in its work plan and consider it the region's top priority for funding in its Strategic Intermodal System plan.

Sincerely,

David Pizzo
Chair, Tampa Bay Partnership

RE: Westshore Interchange (I-275/SR 60) Reconstruction Project Letter of Support

Dear Secretary Gwynn,

The Tampa Hillsborough Economic Development Corporation (EDC) respectfully requests that the Florida Department of Transportation advance funding for the reconstruction of the I-275/SR 60 interchange in the Westshore Business District.

As the lead designated economic development organization for Hillsborough County, the EDC is committed to supporting initiatives that will improve the region's transportation network and relieve traffic congestion. Reconstructing the interchange will benefit all users and support all types of modes, ensuring that Hillsborough County will remain a desirable destination for expanding local businesses as well as those interested in relocating here.

The Westshore Interchange reconstruction is one of the top regional transportation priorities for Hillsborough County, yet the project is not scheduled to commence for several more years. With the planned expansion of the Howard Frankland bridge, ever-increasing numbers of tourists visiting and tens of thousands of new residents moving here each year, the upgrades proposed in this project are needed sooner rather than later. We urge you to accelerate the timeline for funding and starting this project.

Thank you for all that you do to help make our community a better place in which to live and work.

Respectfully,

A handwritten signature in black ink, appearing to read "C. Richard", is written over a light gray circular stamp.

Craig J. Richard
President and CEO

Resolution to Request Prioritization of the I-275/SR 60 Interchange in the FDOT Strategic Intermodal System 2045 Cost Feasible Plan

Resolution No. 2018-12

WHEREAS, the Tampa Bay Area Regional Transit Authority (“TBARTA”) is an agency of the State of Florida created to plan, implement, develop, finance, construct, own, operate, maintain and manage multimodal systems in Hernando, Hillsborough, Manatee, Pasco, and Pinellas Counties, hereinafter “five-county region”; and

WHEREAS, the Florida Department of Transportation (FDOT) is the agency responsible for the designation, implementation, and management of the Strategic Intermodal System (SIS), an intermodal network of transportation facilities and services of statewide, interregional and regional significance; and

WHEREAS, the I-275 & State Road 60/Memorial Hwy Interchange, hereinafter “Interchange”, is a part of the SIS; and

WHEREAS, Section 339.64 Florida Statutes requires FDOT to coordinate with metropolitan planning organizations (MPOs), regional planning councils, local governments, and other transportation providers to update the Florida Transportation Plan (FTP), which provides guidance into investments on and off the SIS; and

WHEREAS, TBARTA, in conjunction with the MPOs and other partners in the region, have identified the reconstruction of the Interchange as a top regional priority and essential to improving mobility on the interstate system, managing congestion, accommodating premium transit service, and being integral to the overall continued economic vitality of the Tampa Bay region; and

WHEREAS, TBARTA is the agency responsible for the development and implementation of a regional transit system that would benefit from the median transit envelope created by the proposed interchange improvements.

NOW, THEREFORE BE IT RESOLVED BY THE TBARTA GOVERNING BOARD THAT:

- 1. TBARTA recognizes that delays in the reconstruction of the Interchange will exacerbate congestion on I-275 and in the Westshore District, and will be problematic for the timely implementation of a regional transit system.**
- 2. TBARTA formally requests that FDOT advance reconstruction of the Interchange in the Strategic Intermodal System 2045 Cost-Feasible Plan be the number-one priority for Strategic Intermodal System (SIS) funding.**

David Gwynn, FDOT District Seven Secretary of Transportation
Florida Department of Transportation District 7
11201 McKinley Drive
Tampa, FL 33612

Dear Secretary Gwynn,

Tampa International Airport is an economic engine for the region, serving a record number of passengers and growing as an employment center. Today, the airport serves nearly 60,000 travelers every day and more than 11,000 people work on the airport campus. In addition, hundreds of people travel daily to the airport to conduct business. Our projections call for doubling the number of passengers we serve, in the coming years, as we continue to fulfill our mandate to support the economic development of the Tampa Bay region.

To support us in accomplishing that mission, we request that the Florida Department of Transportation advance funding for the reconstruction of the I-275/SR60 interchange in the Westshore Business District.

A large percentage of our customers, employees and business partners interact with that interchange every day as they travel from Hillsborough, Pinellas and Pasco counties. Regional traffic from I-275, the Veteran's Expressway and SR60 passes through that interchange, and more than 170,000 vehicles cross the Howard Frankland bridge from Pinellas County using four lanes and exit to just two through lanes, creating daily congestion. The planned expansion of the Howard Frankland Bridge, projected population growth and growth of the airport will cause further congestion at this critical juncture.

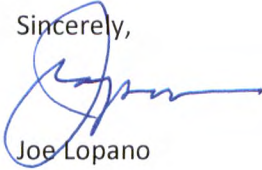

Improvements to the interchange are essential to adequately serve commuters and visitors, as well as for the efficient operation of the airport, efficient freight movement and evacuation in an emergency. In addition, the proposed project calls for upgrades to the street grid in the Westshore business district to improve traffic circulation locally and provide an enormous benefit to the walk/bike network.

Reconstructing the I-275/SR60 interchange is a top priority for the region and has been envisioned for more than 20 years. Yet recently, FDOT released its Strategic Intermodal System 2045 Cost Feasible Plan, which indicates the interchange reconstruction will likely not be funded for at least the next 10 years. This timeframe is not reasonable considering the Howard Frankland improvements, population

growth projections and anticipated airport growth. I am requesting that funding for the reconstruction of the I-275/SR60 interchange be accelerated as much as possible.

Thank you for your attention to this matter.

Sincerely,

Joe Lopano

Re: Westshore Area Interchange (I-275/SR-60)

Dear Secretary Gwynn:

On behalf of the University of South Florida, I want to commend FDOT District Seven's leadership and community engagement in the planning and implementation of improvements designed to enhance the safety and efficiency of our roadways. The PD&E focused on I-275 between Martin Luther King Jr. Boulevard and Bearss Avenue, the north Tampa Intermodal Study, and the East Fowler Multimodal Feasibility Study are all important projects that should benefit our students, faculty and staff.

While these projects directly affect roadways immediately surrounding the Tampa campus, the functioning of the Interstate 275 and State Road 60 interchange in the Westshore area near Tampa International Airport is also important to us. Many of our daily visitors traverse this corridor regularly and visitors from outside the area utilize the interchange to get to our campus. The Long Range Cost Feasible Plan for Florida's Strategic Intermodal System shows construction for this project funded in the 2029 - 2045 time frame. We believe that is too long to wait as Tampa Bay's population and passenger traffic at TIA are projected to grow significantly while the interchange already creates a regional bottleneck.

The University of South Florida considers the I-275/SR-60 interchange to be a top priority at this time. We hope that FDOT will be successful in securing the state and federal funding necessary to begin construction on an interchange that will meet our current and future needs as soon as possible.

Sincerely,

Judy Genshaft

David Gwyn
District 7 Secretary
Florida Department of Transportation
11201 N Malcolm McKinley Dr
Tampa, FL 33612

Dear Secretary Gwyn:

I write today to express my strong support of the Westshore Interchange (I-275/SR 60) reconstruction project. This interchange is a critical economic gateway in our region and into District 62, and alleviating the current chokepoint caused by this interchange is critical to the economic future of our region.

Reconstruction of this interchange will improve the lives of residents all across the Tampa Bay region by better connecting the economic centers of the area, saving drivers' time commuting to and from work, and improve safety and security by making hurricane evacuations easier and more efficient.

This interchange serves as a direct conduit to major centers of economic activity in our area, including the Tampa International Airport and significant retail and office spaces. It is my belief that this project should be prioritized as the impact will be among the most significant and far reaching in impact. As our region continues the rapid population growth that we are currently seeing, it is paramount that we take action to ensure our infrastructure is prepared to handle the increased capacity.

I urge that the I-275/SR60 Westshore Interchange project be funded and constructed as soon as possible.

Sincerely –

A handwritten signature in blue ink that reads "Susan L. Valdés".

February 18, 2019

The Honorable Kevin J. Thibault
Secretary, Florida Department of Transportation
605 Suwannee Street
Tallahassee, FL 32399-0450

Dear Secretary Thibault,

The Westshore Alliance supports advancing funding for the reconstruction of the Westshore Interchange and establishing it as Tampa Bay's top transportation priority. Since our founding in 1983, improving the transportation system in Tampa's Westshore District has been the goal for our nearly 400 member companies. Advancing funding for the Westshore Interchange is needed for our members, District businesses, their employees, and Westshore residents.

As home to nearly 4,000 businesses with more than 97,000 employees, 15,000 residents, 10,000 nightly visitors and significant regional institutions including Tampa International Airport, Raymond James Stadium and Hillsborough Community College, the Westshore District relies on an efficient transportation network to prosper. However, the current Westshore Interchange stands in the way of economic growth opportunities and congestion relief.

Highway segments leading into the Westshore Interchange – the Howard Frankland Bridge, Veterans Expressway, and Interstate 275 from Downtown Tampa – have all been expanded, but the interchange has not been upgraded to accommodate these changes. Operational improvements slated for the next two years will only provide short-term relief. Regional growth will further overwhelm a strained interchange.

The full interchange reconstruction will reconnect streets, allowing for better circulation for drivers, pedestrians, and transit. The connections will facilitate economic development in the state's largest business district and support the future Westshore Intermodal Center.

3109 W. Dr. MLK Jr. Blvd. • Suite 140

December 14, 2018

Commissioner Vanessa Baugh
Sarasota/Manatee MPO Chair
C/O TBARTA MPO CCC
4350 W. Cypress Street, Suite 700
Tampa, FL 33607

Dear Commissioner Baugh,

The Westshore Alliance would like to express our support for the Regional Transportation Priority Projects, including fully funding the I-275 and State Road 60 Westshore Interchange. This project is a critical piece of the region's transportation network. Reconstructing the interchange will benefit all users and support all types of modes.

Westshore is a major regional activity center. About 97,000 people work in Westshore, 50,000 travelers pass through Tampa International Airport daily, 26,000 students attend Hillsborough Community College, 10,000 guests stay daily in Westshore hotels and 15,000 people call Westshore home. The transportation challenges of accommodating those users require all modes of transportation. The current configuration of the Westshore Interchange creates a dangerous bottleneck and does not accommodate additional mode use. The operational improvements programmed for I-275 and State Road 60 in the next two years are a band-aid that does not meet the long-term needs of the Tampa Bay region.

In addition to alleviating a major bottleneck, full reconstruction of the I-275/SR 60 interchange will provide:

- Express connections between Tampa International Airport, I-275 and the Veterans Expressway
- A 44-foot transit envelope to accommodate regional transit
- Improved circulation on local roads that will facilitate transit and pedestrian access to the planned Westshore Intermodal Center
- Opportunities for new real estate development at transit supportive densities and encourage economic development of underutilized land.

In our 2017 survey of Westshore employees, about 1/3 are coming from outside of Hillsborough County. Most workers are spending at least an hour commuting daily to and from Westshore. The interchange won't end congestion, but it will reduce traffic, allow for regional transit, and restore the local street network that will benefit all users. Westshore serves all of Tampa Bay as home to Tampa International Airport and one of the largest business districts in the Southeast. The Westshore Interchange should be a regional priority.

Thank you for your support of the 2019 Regional Transportation Priority Projects, including the Westshore Interchange.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ann Kulig".

December 18, 2018

Secretary Mike Dew
Florida Department of Transportation
605 Suwannee Street
Tallahassee, FL 32399-0450

Dear Secretary Dew,

On behalf of the Westshore Alliance, I am writing to express our support for funding for the reconstruction of the Westshore Interchange and establishing it as the Tampa Bay region's top transportation priority. Since our founding in 1983, improving the transportation system in Westshore has been the number one priority for our nearly 400 member companies.

As home to nearly 4,000 businesses with more than 95,000 employees, 15,000 residents, 10,000 nightly visitors and significant regional institutions including Tampa International Airport, Raymond James Stadium and Hillsborough Community College, the Westshore district relies on an efficient transportation network to prosper.

With the recent completion of the I-275 widening from downtown Tampa to Westshore, the Veterans Expressway expansion, the soon to be widened Howard Frankland Bridge and a thriving airport, the Westshore interchange reconstruction is more critical now than ever. It is vital that we move forward with this project that will enhance regional mobility, support economic development and enhance the quality life for those that live and work in Westshore.

The reconstruction of this interchange has received support from government officials, business leaders and residents from throughout the Tampa Bay region. We encourage you to advance funding for this interchange and make this the number-one priority for Strategic Intermodal System Funding in Tampa Bay.

Thank you for your thoughtful consideration and leadership in developing transportation solutions that will provide economic prosperity for all who live in the Tampa Bay Region and our state.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jay Botsch".

Jay Botsch

COMMERCIAL REAL ESTATE
DEVELOPMENT ASSOCIATION

TAMPA BAY CHAPTER

June 5, 2019

Alice Price, AICP, PD&E Project Manager
Florida Department of Transportation, District 7
11201 N. McKinley Drive MS 7-500
Tampa, FL 33612

Dear Ms. Price,

NAIOP Tampa Bay, the commercial real estate trade association, strongly supports full reconstruction of the I-275/I-4 interchange (Options A and B) as FDOT interchange rebuild options for the I-275/I-4 interchange.

Our 200-plus members from across the Tampa Bay region rely on efficient and effective transportation resources to serve as regional economic drivers. None of these transportation resources are more critical than the I-275/I-4 interchange.

Tampa's downtown and urban core is rapidly growing. The I-275/I-4 interchange is a critical component of Tampa Bay's interstate system providing both freight and passenger mobility. An effective I-275/I-4 interchange will best facilitate commuter routes to suburban and urban communities in the Tampa Bay metropolitan area providing access to jobs, medical facilities, universities and cultural resources. Failure to move traffic through this critical interchange equates to loss of jobs and economic opportunity for residents throughout the region, and for this reason, NAIOP Tampa Bay believes that Option C, D and a no-build option would be detrimental to our region.

NAIOP Tampa Bay urges the Department to select Option A or Option B for the I-275/I-4 interchange rebuild.

Thank you,

Graham Mavar, President

March 4, 2020

Mr. David Gwynn, P.E.
District Seven Secretary
Florida Department of Transportation
11201 N. McKinley Drive
Tampa, Florida 33612

Dear Secretary Gwynn,

The Allen Temple African Methodist Episcopal (AME) Church is located at 2101 North Lowe Street in Historic Ybor, just southwest of where 14th/15th Streets intersects I-275. Our congregation is comprised of 1,581 members from throughout the Tampa Bay region and we have served in the Tampa area since 1902 and the present Ybor City location for more than 20+ years.

We understand that the Florida Department of Transportation (FDOT) is working with the Federal Highway Administration (FHWA) on a plan to improve the I-275 at I-4 interchange. We recently met with Mr. Kirk Bogen in your Planning and Environmental Management Office and he explained the safety and operational benefits of the improvements.

We are particularly interested in the modified access at 14th/15th Streets. We believe that improvement will be a benefit to our congregation by providing more convenient access for our members and visitors. Currently, our members have to exit the interstate at Floribruska Avenue or in downtown Tampa and weave through neighborhoods to access the church, or they exit at 21st/22nd Street and back-track through Ybor City. If the proposed improvements are built, our congregation and visitors will have more direct access from 14th Street/Nuccio Parkway near 12th Avenue to Palm Avenue and to Lowe Street.

We understand that there will be additional traffic in the area, particularly on Nuccio Parkway. It is important for the church to be accessible to pedestrians, as well as personal vehicles. Please consider traffic calming to encourage safe travel speeds and protect bicyclists and pedestrians along Nuccio Parkway and Palm Avenue.

We appreciate your time and look forward to working with you in the future.

Sincerely,

A handwritten signature in black ink, appearing to read "Glenn B. Dames, Jr." with a stylized flourish at the end.

Rev. Dr. Glenn B. Dames, Jr.
Senior Pastor

G. Public Comments

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
Christine	Acosta	Public Hearing Formal Speaker	<p>Good evening. I'm Christine Acosta, 2402 West Morrison Avenue, Tampa, Florida. I'm here to urge the Florida Department of Transportation when deciding safety improvements in this plan to consider safety improvements are needed by all people in our community and not just those on the interstate, but those who are engaged in active transportation, especially in the heavy pedestrian, bicycle and scooter areas of our urban environment.</p> <p>In particular, I request consideration of safety improvements on Franklin Street as it passes under 275. Presently, this is an extremely dangerous and inhospitable space for anyone not in a vehicle, and I fear it will become much more so with this plan unfolding. It is an economic barrier to development on both the south side of Franklin Street and the north end of Franklin Street where we have lots of small businesses evolving and has some really great parks of our urban environment that needs to stay connected in a better way. I invite all Florida Department of Transportation stakeholders to tour this space with me and other advocates by bike and on foot. Thank you.</p>	<p>Imagine 2040, Tampa Comprehensive Plan (2016) includes land use policies to redevelop and enhance Franklin Street, which would include pedestrian reflective uses along Franklin Street. The Plan can be found on the Hillsborough Metropolitan Planning Organization's (MPO) website. Most local road improvements are outside the scope of this interstate project; however, DOT is working with the City of Tampa to evaluate possible safety improvements in adjacent areas such as intersections along Scott Street, with the Franklin intersection being one of the intersections being reviewed.</p> <p>The next phase of the project is the conceptual design phase. During this phase, FDOT is working closely with the City of Tampa on the interstate connections to local roadways; potential bicycle, pedestrian, and trail connections; interstate underpasses; and landscape, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. The conceptual design phase will reveal more details on:</p> <ul style="list-style-type: none"> • Reo St., Westshore Blvd., Occident St., and Trask St. in the Westshore Business District • Road network on the north side of Julian B. Lane Park connecting under I-275 to Main St. • Ashley St., Scott St., and Jefferson/Orange St. in Downtown Tampa • 14th/15th St. and 21st/22nd St. in Ybor City, including accommodation of the Green Spine and improvements to 13th Ave. <p>Trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City</p>

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
Jackie	Appel	Public Hearing Written	Perhaps a cul-de-sac at Gray would discourage the use of Trask St. as a north/south corridor on ramps. As Westshore becomes more crowded traffic will seek and find an alternative. Trask St. is narrow and bordered by residences on each side. Increased traffic will compound a situation that is already peaking in the area.	<p>The FDOT’s mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of our environment and communities. The FDOT works to provide a transportation network that is well planned, supports economic growth, and has the goal of being congestion and fatality free.</p> <p>As a result of public comment, the right turn lane from the Westshore on-ramp to Trask Street (eastbound to southbound movement) has now been eliminated which will reduce unnecessary traffic on Trask Street. This modification is now part of the Locally Preferred Alternative (LPA). A description of the LPA can be found in Section 2.4 of the SEIS. FDOT will continue to work with the City of Tampa to achieve better traffic circulation on local streets while maximizing safety enhancements.</p>
Betty	Arnold	Email	If Tampa is to be a world class city, we must provide fast and modern transportation, which are not reflected in the next plans by FDOT. Please go back to the drawing board and find a long term solution which will accommodate Tampa's future growth.	<p>Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. Throughout the SEIS process, FDOT has listened to the DTI community and integrated public comments into the concept plans, such as keeping the Floribaska Ave. ramps open and reducing the footprint of the interstate to minimize right-of-way impacts to the adjacent community. The LPA improvements in the Downtown interchange improve safety by reducing weave movements and provide more access to communities better dispersing traffic.</p> <p>The Tampa Interstate Study (TIS), as the name would indicate, is a plan for the interstate modernization within Tampa’s urban core. Within the TIS, FDOT has accommodated transit in several ways, such as providing a transit envelope and multimodal centers, and allowing public buses to utilize the express lanes toll-free. FDOT is also looking at ways to accommodate bus on shoulder, transit signal priority on adjacent state roads, and incentivizing transit, particularly during construction.</p>

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
				<p>FDOT understands the roads are only one part of the question. Outside of these interstate/roadway-related transit opportunities, FDOT has funded \$214 million in transit projects in the past 5 years, including \$32 million in the City of Tampa, such as:</p> <ul style="list-style-type: none"> - Tampa Streetcar Modernization and Extension Studies - HART Arterial BRT Study - HART Streetcar Fare Subsidies - Downtowner - Regional Multimodal Center Studies - HART 275LX Route and Block Grants for Transit Operations - Regional Rapid Transit Project Development & Environment Study <p>FDOT is more than willing to partner with the local agencies on any transit project, including a study of the utilization of the CSX rail line for premium transit service, if it is supported by the Hillsborough Metropolitan Planning Organization (MPO) as a top priority. FDOT encourages the local agencies to unite behind a plan and secure a long-term financial commitment for their portion of the capital costs, as well as all of the on-going operations and maintenance of the system. Local commitment is required to compete for federal transit funding.</p>
Ronae	Baker	Public Hearing Written and Email	As a concerned citizen of Hillsborough county and specifically the VM Ybor neighborhood I am submitting my comments for public record. I live within Census tract 32 which will be impacted by all of the FOOT Tampa Interstate changes and specifically the 2B and 3A portions. In this community there are many historic structures which we work hard to preserve and restore as they serve as residences, businesses, schools and communal gathering spaces. These structures have social and cultural history as well as the potential to be developed for local economic benefit. This history and	FDOT provided information at the second MPO Open House on April 30, 2019 regarding how the TIS SEIS can address health in transportation. We focused on encouraging active transportation, improving bicycle and pedestrian safety, enhancing community connectivity, and incorporating landscape and other community features. We also presented our approach to addressing air quality, water quality, and noise abatement. We are currently working with MPO staff to identify opportunities for more environmentally-friendly noise walls. Also, we presented sustainability opportunities that the TIS SEIS could take advantage of during design and construction.

			<p>development is threatened by a multitude of issues that increased traffic and interstate expansion bring. Regardless of the sex, race, gender, ability and SES of residents now or in the future, every individual that dwells in and frequents Ybor and the bordering neighborhoods has a need for clean air and water (well water) as well as safe and accessible streets. This includes the community in which I currently live.</p> <p>First, I am concerned about the rise in toxins that will be emitted into the air and water sources (including wells) via construction, run-off and the number of vehicles on 1-275 that will enter/exit at 14th and 151h Avenue. In between 14th and 15th Ave just north of Columbus Drive is Cuscadcn park, a City of Tampa park where public safety and accessibility will be impacted by the traffic increase. The park also provides an above ground, open air pool which will be directly impacted by the increase in toxins emitted into the air as well as a community center, playground and field where clean air and water for consumption and recreational use are vital to the wellbeing of all who use these facilities.</p> <p>Phase 3 of the East-West Green Spine will provide more mobility options in the immediate area, however if the Green Spine ends in the Cuscadcn park area and does not continue into East Tampa in a functional manner there arc potential safety problems where the Green Spine and interstate traffic meet. There is a need for clear signage, crosswalks and lighting for the area especially for those who use the local streets get to school and work and those not familiar with the area. I want to know that all individuals at the city, county and state level work together to support the connectedness safety of the neighborhoods. It is important that bordering neighborhoods are not</p>	<p>Materials from this open house can be accessed at: http://tampainterstatestudy.com/hillsborough-mpo-special-briefing-2/. We are also working with the local community on opportunities to activate FDOT-owned parcels for community use and landscaping. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide updates.</p> <p>Specific to VM Ybor, the FDOT often attends the neighborhood meetings and has been working with the neighborhood to complete requests of the association that were expressed in the December 2017 letter. In part, the letter addresses both historic properties and FDOT vacant land. The FDOT has completed several large-scale inventories and documentation of historic resources within the Ybor area. In addition, as part of the TIS Historic Mitigation Plan, over the past decade,, FDOT relocated 55 historic buildings within the Ybor City community of which_28 were rehabilitated and transferred to the City and sold back to private property owners, infilling vacant land and five were rehabilitated as part of the Ybor City Museum/ Centennial Park complex.</p> <p>The City of Tampa and the FDOT have been coordinating and will continue to coordinate on the Greenspine, how it interacts with traffic coming off the interstate and additional extensions of designated paths for the Ybor and East Tampa communities. The details of enhanced connectivity adjacent to the interstate are one aspect of the next step in the process, the conceptual design phase, that FDOT will be working on with both the City and the community. One example of coordination and support is that FDOT is providing funding to the City for the Greenspine segments from Nebraska Ave to 13thth Avenue. enabling the project to be advanced sooner than anticipated.</p>

			<p>divided by future interstate changes any more than they already are and have been in the past. Please consult the community for input.</p> <p>Second, I am concerned with the hidden costs that residents and property owners may incur. One of them being the impact that noise from the interstate will have on historic structures. Barriers for sound, efficient insulation from noise and pollution, foundational stability, and the overall sustainability and protection of property value and its natural resources (well water) are of great concern to home and business owners. These issues will increase with construction and traffic and affect property value. I do not want to see nor hear thousands of cars nor heavy vehicles barreling through the neighborhood, especially with the 14th/15th Ave exit as a potential alternative route. My home is over 100 years old and needs continuous and significant upkeep. It is important that homeowners in the area, have the ability to upkeep their homes and the financial means to do so. Should a landowner develop/improve their property, these issues must be considered. The interstate improvements may reduce traffic for a few years, but the expansion only makes more room for more traffic in the future. Please consider smart growth, which includes economical and environmentally conscious traveling options such as mass transit, that serve all of the residents of Tampa and the surrounding area-not just a few. Please continue to listen to the comments and opinions of concerned citizens who care about their immediate surroundings but also the wellbeing of the environment around them now and in the future. Thank you.</p>	<p>FDOT evaluates the air quality effects of improvements to the transportation network at the project level. For the Draft SEIS, FDOT performed a carbon monoxide screening and Mobile Source Air Toxics (MSATs) analysis, as these compounds have the potential to result in adverse health effects. Based on the results from the screening model, the highest carbon monoxide (CO) one-hour and eight-hour levels are not predicted to meet or exceed the one-hour nor eight-hour National Ambient Air Quality Standards (NAAQS) for this pollutant with either the No Further Action or 2018 Express Lane Alternative. As such, in all locations tested, the project “pass” the screening model, meaning the one-hour concentrations do not exceed 35 parts per million of CO (ppm) and the eight-hour concentrations do not exceed 9ppm. All of the Design Options (A, B, C, D, & E) for the 2018 Express Lane Alternative showed an improvement in MSAT emissions when compared to the 2045 No Further Action Alternative by an average decrease of approximately 50 percent. There would be a decrease in emission levels for each of the nine MSAT toxins. See Section 5.2 of the SEIS for more information on the air quality analysis</p>

Joshua	Barber	Email	I do not support the new exits on 14th and 15th St. in Ybor City. These will contribute to increased pollution, increased VMT on local roadways, and safety hazards. I strongly encourage and request these exits be removed from the Locally Preferred Alternative - they are unacceptable and have not been supported by any local organization, community group, or neighborhood association.	<p>Throughout the SEIS process, FDOT has listened to the community and integrated public comments into the concept plans, such as keeping the Floribraska Ave. ramps open and reducing the footprint of the interstate to minimize right-of-way impacts. The latest concept plans were presented at the public hearing in February 2020 and are available on-line.</p> <p>The next phase of the project is the conceptual design phase. During this phase, FDOT will continue working closely with the City of Tampa on the interstate connections to local roadways; potential bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. The conceptual design phase will reveal more details on 14th/15th St. and 21st/22nd St. in Ybor City, including accommodation of the Green Spine and improvements to 13th Ave.</p> <p>Further, FDOT is developing a comprehensive Transportation Management Plan (TMP) for the reconstruction of the I-275/SR 60 interchange called Safe TRIP. The Safe TRIP initiative will ensure safety and mobility through successful Traffic Management, Regional Demand Management strategies, Innovation, and Public Engagement. Safe TRIP will promote transportation demand management (TDM) strategies, encourage public transit use, incorporate smart work zones, and identify proactive communication platform to provide real-time information to travelers, local community, and agency partners.</p>
Ricki	Bauman	Email	There is a need for mass transit, reconnected neighborhoods as well as the realization that it's not all about through traffic but livable cities and safe streets.	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. Throughout the SEIS process, FDOT has listened to the DTI community and integrated public comments into the concept plans, such as keeping the Floribraska Ave. ramps open

				operations and maintenance of the system. Local commitment is required to compete for federal transit funding.
Barbara	Bird	Public Hearing Written	The DOT's mission is the free flow of traffic and not the quality of life in the neighborhood. However, the Westshore Palms neighborhood has increased in density so the plan for Trask and Gray will be detrimental to the neighborhood.	<p>The FDOT's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of our environment and communities. The FDOT works to provide a transportation network that is well planned, supports economic growth, and has the goal of being congestion and fatality free.</p> <p>Tampa Bay is growing rapidly. The Westshore area has two major projects, Westshore Mall redevelopment and Midtown planned to open in 2021 and several new smaller projects. In addition, Westshore Palms and North Bon Air have seen a substantial increase in condo and multifamily complexes. With limited north-south roads, east-west roads will become more backed up, as Gray onto Lois Ave does today. FDOT is working in coordination with the City of Tampa on improvements to local streets in the Westshore Area. Reconnecting Reo Street, Occident Street and Trask Street under I-275 will allow for better traffic circulation in the Westshore area. Coordination with the City will continue through the next phase of the project, the conceptual design phase, focusing on local road connections, bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. Where feasible, the project aims to provide trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City, including enhanced safety measures within the corridor for bikes and pedestrians.</p> <p>As a result of public comment, the right turn lane from the Westshore on-ramp to Trask Street (eastbound to southbound movement) has now been eliminated which will reduce</p>

				unnecessary traffic on Trask Street. This modification is now part of the Locally Preferred Alternative (LPA). A description of the LPA can be found in Section 2.4 of the SEIS. FDOT will continue to work with the City of Tampa to achieve better traffic circulation on local streets while maximizing safety enhancements.
Kevin	Brantmyer	Email	I am for the DOT plan to expand the westbound I-4 to northbound improvements It is a nightmare getting on and off 275 and I-4. Something seriously needs to be done immediately. Especially with Super Bowl next year.	Thank you for your comment
Amanda	Brown	Email	Can you please provide me a link to the documents and boards that were shown at the recent public hearings? I cannot find them anywhere on the Tampa Bay Next website.	The project documents are here: http://tampainterstatestudy.com/project-documents/ The public hearing boards are here: http://tampainterstatestudy.com/public-hearing/
		Public Hearing Formal Speaker	Amanda Brown, Tampa, Florida, 33610. I will continue to state my continued opposition to the TIS TBS Tampa Bay Next Project as it is presented. Today, I specifically want to speak to my opposition to the 14th and 15th Street exit. If you do drive on this corridor, as I do everyday, you should be familiar with how terrible the design of the roadway is. This exit will increase traffic into the Ybor and surrounding neighborhoods. It will be ten-fold. If this exit is built, the surrounding neighborhoods will be negatively impacted and the City and County can kiss any chance of reaching its vision of zero safety goals goodbye. This exit doesn't seem worth the money, construction time and future accidents that we will experience. Myself and so many in this community continue to ask for new creative thinking from FDOT, something that will get many of us out of our cars so that others, many of who have spoken today, can enjoy a less congested highway, the one that FDOT has been told this project will provide.	Throughout the SEIS process, FDOT has listened to the community and integrated public comments into the concept plans, such as keeping the Floribaska Avenue ramps open and reducing the footprint of the interstate to minimize right-of-way impacts. The latest concept plans were presented at the public hearing in February 2020 and are available on-line. The next phase of the project is the conceptual design phase. During this phase, FDOT will continue working closely with the City of Tampa on the interstate connections to local roadways; potential bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. The conceptual design phase will reveal more details on 14 th /15 th St. and 21 st /22 nd St. in Ybor City, including accommodation of the Green Spine and improvements to 13 th Ave; and Trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through

			<p>The community has worked on studies for years. Projects such as alternatives for the CSX bus routes and bike and pedestrians and we are continually told that we don't have projects. We needed FDOT to help us with our transit and walk/bike projects, which are considered transportation, and we do not need a push back.</p> <p>I will continue to state that expanding the interstate will only induce demand, much like it did in Houston, and that the supporters here will be back to complain about how this project didn't fix anything in the future. More cars will only increase our air pollution, and we're starting to see emerging particulates from tires and fluids that run off from our roads into our bay. Until I see the 14th and 15th Street exit removed and FDOT helping us to get our preferred transit and bike projects up and running, I will continue to request the no-build alternative for this project.</p> <p>Thanks.</p>	<p>Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City, including enhanced safety measures within the corridor for bikes and pedestrians.</p> <p>At the MPO Special Open House #1 and #3, as well as the February 2020 public hearings, FDOT presented a graphic that depicted the bicycle/pedestrian connectivity adjacent to the interstate throughout the Draft SEIS project limits. Where possible, FDOT will include these connections within FDOT right-of-way.</p>
Cynthia	Callahan	Email	<p>Good morning Alice. We had an email exchange about a year ago when hearings were held about the Tampa Interstate Study. I doubt you remember, but I tried to include the email string below. We still live in the Florida Keys and are unable to attend the workshops...my house, where my daughter lives, is at E 12th AV close to the interchange. You had previously told me that the proposals did not affect our property. Can you tell me if anything has changed in the past year? The evaluation matrix shows 6 residential relocations for segment 2B (if I'm reading it right)...just wanted to double check with you if there were any concerns I should follow up on.</p>	<p>Yes, I remember our conversation. Thank you for your continued interest. FDOT recently recommended what we call our locally preferred alternative (LPA) to the Federal Highway Administration (FHWA) for the environmental study. Previously, we were looking at adding express lanes through the Downtown Tampa Interchange (larger footprint), now we are considering safety and operational improvements for the Downtown Tampa Interchange (much smaller footprint). That is what will be presented at the Public Hearings on February 25 and 27, 2020. You must have received a newsletter/invitation to the public hearing, which contains the evaluation matrix. There are actually 7 parcels to be acquired and 6 of them are considered residential and 1 is considered business. There is only one in your neighborhood and it is a vacant parcel on the north side of</p>

			Thanks for your help, I look forward to hearing from you.	<p>12th Ave. FDOT is not planning to acquire your parcel at this time.</p> <p>After the public hearing, FDOT will present all the final documentation and public comments for FHWA to make a final decision on the project (late 2020). All the project documents are on our website at: www.tampainterstatestudy.com. Also, keep in mind also, that the improvements to the Downtown Tampa Interchange are not funded at this time.</p> <p>Please let me know if you have any more questions or concerns.</p>
Sharon	Calvert	Public Hearing Formal Speaker	<p>While I would prefer that the corridor -- that the managed express lanes would have been a locally preferred alternative, I do support the Locally Preferred Alternative for all segments as we see here tonight. Added capacity and improved safety is key and we've -- I've lived in Hillsborough County since 1977 and we've always been told that Malfunction Junction was going to get fixed. And, yes, there has been some improvements, but it's actually gotten more dangerous with some of the weaving that has to occur if you're trying to weave across to get to the Selmon Connector one way and then come back and head north on 275 another way. That asset is used by not just those who reside in Hillsborough County, but is a critical transportation asset that's used by people in surrounding counties as well as tourists. And for me who lives in Pinellas County, I have used it and it is a major evacuation route for me if I do need to evacuate. And I do like to come over to the Port and take a cruise as well. So I believe that there's been survey after survey after survey that's reflected that improvements and expansion of the interstates is needed and is wanted, and I support the Locally Preferred Alternative for all segments. Thank you.</p>	<p>Thank you for your comment. In addition to the safety and operational improvements proposed for the LPA, FDOT is developing a comprehensive Transportation Management Plan (TMP) for the reconstruction of the I-275/SR 60 interchange called Safe TRIP. The Safe TRIP initiative will ensure safety and mobility through successful <u>T</u>raffic Management, <u>R</u>egional Demand Management strategies, <u>I</u>nnovation, and <u>P</u>ublic Engagement. Safe TRIP will promote transportation demand management (TDM) strategies, encourage public transit use, incorporate smart work zones, and identify proactive communication platform to provide real-time information to travelers, local community, and agency partners. FDOT will invite the MPO and other local entities to participate in the Safe TRIP Community Advisory Taskforce.</p>

Michelle	Carmen	Email	<p>I am amazed that the city is going ahead with this project, with no information given to the residents of Westshore Palms and no opportunity for the residents to have input on this. The FDOT man who gave a presentation about the interstate expansion project stated that FDOT had nothing to do with repurposing Trask. He told the audience that was decided from a study done in the 80s. That was 30-40 years ago! This is ridiculous! Trask is a narrow two lane street with residences on both sides of the road and should not be used as an entrance or exit from I 275. This will also result in a huge increase in traffic on the other streets of the Westshore Palms area. Please reconsider this plan.</p>	<p>The FDOT’s mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of our environment and communities. The FDOT works to provide a transportation network that is well planned, supports economic growth, and has the goal of being congestion and fatality free.</p> <p>Public involvement has been an essential role from the initiation of the TIS SEIS project and TBNext program. The TIS SEIS included various opportunities for the public to become engaged with the study through a number of methods. To facilitate public outreach activities, FDOT used various public involvement techniques to reach the public. Public outreach techniques included: public meetings/workshops, Community Working Group meetings, webinars, participation in community events, distribution of project newsletters/email blasts, presentations to Metropolitan Planning Organizations boards and committees, presentations to Community Redevelopment Areas (boards and committees), maintenance of a project website, telephone hotline, and meetings with small groups such as homeowner associations, business and stakeholder groups and community organizations. Chapter 9 of the SEIS and the TIS SEIS Comments and Coordination Reports describes the main public involvement efforts and events that have been held to date and the public outreach elements that are ongoing for the study. The documents can be found on the TIS Project website at: http://tampainterstatestudy.com/project-documents/</p> <p>Specific to Westshore Palms, the DOT has been attending Westshore Palms Neighborhood Association meetings throughout the years at project major milestones to receive input and provide project updates. Most recently, the DOT has attended meetings to share information on 10/6/2016, 5/3/2018, and 3/5/2020.</p> <p>Tampa Bay is growing rapidly. The Westshore area has two major projects, Westshore Mall redevelopment and Midtown</p>

			<p>transition. For the record, I'm here yet again to provide public comment on opposition to inland interstate expansion. Always push to have it, as the local community clearly, consistently stated, priority of building high capacity mass transit and our desired investment in that infrastructure rather than interstate expansion. I and my neighbors turned out in numbers of several hundreds at the last year's public hearing for project segment six and seven. The majority expressed our preferred alternative of no further action/no-build, and those results and comments were promptly ignored. This endless perpetuation of induced demand increasing capacity to serve only single occupancy vehicle travel and the expansion of continued harm to the environment and human health remains the worst possible polluting scenario and the most wasteful. It will also negatively impact our capacity to more efficiently meet our locally identified and prioritized transportation projects and our goals for greater density, quality of life and wise economic investment as we address growth.</p> <p>We can't pay our way out of that and it comes down to what is FDOT doing to remove cars off the road, not increase -- but get cars off the road and support transit and connecting human empowered mobility options. This SEIS reflects a plan that perpetuates a cycle of failure and harm.</p>	<p>concept plans, such as keeping the Floribaska Ave. ramps open and reducing the footprint of the interstate to minimize right-of-way impacts to the adjacent community. 			<p>OPPOSE this plan. FDOT already plowed through this HISTORIC DISTRICT once by cutting it in half and people not wanting to live NORTH of the Interstate. You need to research OTHER ALTERNATIVES and leave HISTORIC "EAST" YBOR CITY ALONE. There are many projects planned for East Ybor City and this plan will kill them!</p> <p>I have been to Tampa City Council and asked them to do whatever they can to STOP this project. Just because the FDOT has "deep pockets" there should be limits to what they can do to a neighborhood. We do not need Toll and Express lanes - people should leave 20 minutes earlier or find other ways of transportation other than a car. We need mass transit - not more ways to move commuters FASTER especially affecting a NATIONAL HISTORIC LANDMARK DISTRICT like our beloved YBOR CITY! Submitted by Fran Costantino a resident - business and property in HISTORIC EAST YBOR CITY!</p>	<p>construction. The location of this exit will allow traffic to be distributed along local roadways and provide greater access into local communities. FDOT has been coordinating with the City of Tampa on these improvements. Additionally, the improvements to the Downtown Tampa Interchange (I-275/I-4) do not include tolled express lanes.</p> <p>The tolled express lanes that are being proposed will be constructed to the inside of the existing general-purpose lanes on I-275 in the Westshore area, connecting the Howard Frankland Bridge to Downtown Tampa at Ashley Drive and Tampa Street. The express lanes will provide drivers with a new travel choice and the prices will change based on the demand. As demand increases during peak travel times, the price will also increase to ensure drivers have a minimum of 45 miles per hour travel speed. This helps provide drivers in the express lanes with a reliable travel time. The existing general-purpose lanes will remain free to use.</p> <p>FDOT is committed to multimodal options and funds transit studies and projects in local communities. While FDOT funds transit studies and projects, it would be the local transit agency such as HART, PSTA or TBARTA to lead the planning efforts for future mass transit such as light rail. FDOT would be a funding partner for future mass transit projects. Currently TBARTA is conducting a Regional Rapid Transit study and a comprehensive Regional Transit Development Plan called Envision 2030. Both studies focus on comprehensive regional transit and may be of interest to you.</p>
Darryl	Creighton, Esq	Public Hearing Written	<p>My impression of this project is that parts of it are going to be woefully inadequate, especially the downtown interchange. The improved capacity of the plan will not even solve today's needs, much less the needs that will be present upon completion in 10+ years, and certainly not capacity needs in 20+ years. To</p>	<p>Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. Balancing transportation needs and community impacts is a complicated task. Throughout the SEIS process, FDOT has listened to the downtown community and integrated public comments into the concept plans, such as keeping the</p>

			<p>do all of the planning and spend a lot of money on doing something that will be totally inadequate upon completion do not make much sense, considering the decades of planning required to make any changes.</p> <p>I look at the wasteful use of \$27M (from my memory) for re-building the 1 lane bridge for Southbound I-275 to I-4 a few years ago. That bridge should have been built for at least 2 lanes if it was going to be re-built at all. I think the same thing is going to happen again. That bridge is going to be built for 2 lanes under the current design proposal, but by the time the bridge is re-built, it will need to be at least 3 lanes to accommodate the traffic without severe bottlenecks. Tampa is a fast growing area and city leaders have done a great job of making it one of the fastest growing areas in the Southeast.</p> <p>We have huge new projects already in the works in downtown Tampa (Waterside and along the I-275 corridor (Midtown)). I understand some of the local resident politics that have pervaded the situation for that interchange, but it essentially comes down to local residents who prefer not to have any expansion vs. regional needs. That intersection will truly be a bottleneck for Tampa and the region because Northbound traffic on I-275 all the way from Howard Frankland is always backed up to a virtual standstill for miles in the afternoon, and of course traffic on Southbound I-275 is snarled at that interchange due to the 1 lane bridge going to I-4. I just don't want to see us going through decades of planning and years worth of construction for something that would barely be adequate if already built. As for the rest of the project, it is made more complicated by the subsequent addition of segregated toll lanes. I understand that this</p>	<p>Floribaska Avenue ramps open and reducing the footprint of the interstate to minimize right-of-way impacts to the adjacent community. Although the LPA does not provide the greatest capacity improvement for the downtown interchange, it does provide many benefits while minimizing impacts.</p> <p>FDOT performed a planning-level model exercise to predict the level of service of the proposed express lanes. The exercise provided volumes, speed, volume/capacity, density, and level of service (LOS) predictions at 10 screen-line locations along I-275 and I-4 within the TIS SEIS limits. The express lane system would operate better with tolling. The 2018 Express Lanes Alternative (Tolled) would provide better express lane LOS, because volumes would be lower. Having fewer access points under the 2018 Express Lanes Alternative (Tolled) would have marginally less volume and better LOS than the Updated 1996 TIS FEIS Long-Term Preferred Alternative (Non-Tolled) with the same access points as the 2018 Express Lanes Alternative (Tolled) by 2045. On average the 2018 Express Lanes Alternative (Tolled) would have improved to higher LOS when compared to the Updated 1996 TIS FEIS Long-Term Preferred Alternative (Non-Tolled). For example, if the Updated 1996 TIS FEIS Long-Term Preferred Alternative (Non-Tolled) has an average LOS F in the AM peak hour for the system, the 2018 Express Lanes Alternative (Tolled) would operate at a LOS E or at a higher LOS. However, removing toll lane access, especially to Downtown Tampa, is not desired. The general purpose system would operate the same or slightly better when express lane tolls are not collected, because the project would expand free roadway capacity.</p>

			is a funding mechanism, but it sure makes the design a lot more complicated than it otherwise would have been. And it really doesn't make much sense to dump the express lanes at downtown Tampa. The real need is for the express lanes to at least allow traffic to get onto the other side of the downtown interchange, even if they can't continue much beyond it. So I really don't have much of a positive feeling for the end result of the project at this point.	
Patricia	Cuerno	Public Hearing Written	The issue is more tolls, more money for the state and more money we have to pay to travel on the interstate. Plus taxpayers money in your pockets. Very inconvenient for the taxpayer and very inconvenient for the residents of West Tampa. We love our community and we don't need more burdens or expenses.	As FDOT's toll policy evolves, we will continue to provide updates to the MPO. FDOT intends to collect tolls electronically through its SunPass System. SunPass transponders are available for purchase at over 3,100 retail locations in Florida as well as all Turnpike service plazas, Turnpike gas stations, SunPass Service Centers, select Florida Welcome Centers, Visitor Centers, Rest Areas, and select County Tax Collector's Offices. They can also be purchased online at the SunPass website: https://www.sunpass.com/en/home/index.shtml and at local Publix with a credit/rebate essentially equal to the purchase price. Travelers will still be able to travel toll-free on the existing general use lanes that would be parallel to the proposed express lanes. Registered public transit, public school, and private buses are exempt from paying tolls on express lanes but must have a Sunpass and valid license plate. Persons with disabilities are exempt from paying tolls, if they are registered, have a Sunpass, and have valid license plate.
Glenn	Dames	Letter	Dear Secretary Gwynn, The Allen Temple African Methodist Episcopal (AME) Church is located at 2101 North Lowe Street in Historic Ybor, just southwest of where 14th/15th Streets intersects 1-275, Our congregation is comprised of 1,581 members from throughout the Tampa Bay region and we have served in the Tampa area since 1902 and	Thank you for your comment.

			<p>the present Ybor City location for more than 20+ years, We understand that the Florida Department of Transportation (FDOT) is working with the Federal Highway Administration (FHWA) on a plan to improve the 1-275 at 1-4 interchange, We recently met with Mr, Kirk Bogen in your Planning and Environmental Management Office and he explained the safety and operational benefits of the improvements.</p> <p>We are particularly interested in the modified access at 14th/15th Streets. We believe that improvement will be a benefit to our congregation by providing more convenient access for our members and visitors. Currently, our members have to exit the interstate at Floribraska Avenue or in downtown Tampa and weave through neighborhoods to access the church, or they exit at 21st/22nd Street and back-track through Ybor City. If the proposed improvements are built, our congregation and visitors will have more direct access from 14th Street/Nuccio Parkway near 12th Avenue to Palm Avenue and to Lowe Street.</p> <p>We understand that there will be additional traffic in the area, particularly on Nuccio Parkway. It is important for the church to be accessible to pedestrians, as well as personal vehicles. Please consider traffic calming to encourage safe travel speeds and protect bicyclists and pedestrians along Nuccio Parkway and Palm Avenue. We appreciate your time and look forward to working with you in the future.</p>

				portion of the capital costs, as well as all of the on-going operations and maintenance of the system. Local commitment is required to compete for federal transit funding.
Jane	DiMisn	Email	Question - Will 7th Avenue be closed to through traffic at anytime during this construction phase?	7 th Avenue will remain open during construction, with the exception of when the proposed overhead bridge is being constructed. Construction activities would be limited to nighttime or, at most, a weekend closure. During those times, FDOT would utilize detours, most probably re-routing to Palm Avenue. As the design progresses, FDOT will have a detailed construction staging plan. Also, keep in mind, that the improvements to the Downtown Tampa Interchange are not funded at this time.
Michelle	Eceiza	Public Hearing Written	I think we need to focus on alternative modes of transportation besides widening the interstate. We need to focus on not only providing bike lanes, but we need to provide safe bike lanes. Bike lanes need to have a physical barrier between the bike lanes and car lanes. In Europe they have metal posts that divide the lanes and don't take up much space (as do a median). Posts can also be lit at night to add visibility and help the biker or cyclist feel safe. We need better connectivity between the neighborhoods: VM Ybor to Central Ybor, Tampa Heights, Seminole Heights, Etc... As long as people don't feel safe in bike lanes, they will not be utilized by the majority and the opportunity will be lost. Make them safe! We should make great use of the train tracks for pedestrians. We should be able to use/convert the train tracks for pedestrians to get around town.	FDOT is working closely with the City of Tampa on the interstate connections to local roadways; potential bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide updates.
Robert	Farabee	Email	Concerning the proposed improvements to the Westshore Area Interchange, while we understand that the reconnection of Reo, Occident and Trask Streets, may reduce some congestion, the combined affect of the limited access to the direct express lanes from Reo and Occident streets and the narrowness of the	The FDOT's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of our environment and communities. The FDOT works to provide a transportation network that is well planned, supports economic growth, and has the goal of being congestion and fatality free.

			<p>already dangerous Trask Street, which is residential and overbuilt will negatively impact traffic and any perceived safety benefits. We've also heard that Westshore lanes between Kennedy Boulevard and Cypress will be reduced to two lanes each way to improve traffic flow. That has to be a false statement; it is too ridiculous to believe. Further upsetting residents of the area is the fact that almost nobody knows of these proposed changes, including anyone who works for the City of Tampa, a number of whom we have spoken with. Just to be sure I am making my comments clear, any further planned increase in the use of Trask Street specifically, increasing traffic or access to the Interstate from that street would be dangerous and foolhardy. I have owned a nearby house since 1978, and I think I can speak from experience, if you are planning increased use of this already dangerous residential road, it will be a disaster. While we have already been chastised because this information has been made public, I suggest that if most in my area are unaware of the proposed changes, and the City of Tampa is likewise in the dark, perhaps improvements can be made in your efforts in the public notice area.</p>	<p>Public involvement has been an essential role from the initiation of the TIS SEIS project and TBNext program. The TIS SEIS included various opportunities for the public to become engaged with the study through a number of methods. To facilitate public outreach activities, FDOT used various public involvement techniques to reach the public. Public outreach techniques included: public meetings/workshops, Community Working Group meetings, webinars, participation in community events, distribution of project newsletters/email blasts, presentations to Metropolitan Planning Organizations boards and committees, presentations to Community Redevelopment Areas (boards and committees), maintenance of a project website, telephone hotline, and meetings with small groups such as homeowner associations, business and stakeholder groups and community organizations. Chapter 9 of the SEIS and the TIS SEIS Comments and Coordination Reports describes the main public involvement efforts and events that have been held to date and the public outreach elements that are ongoing for the study. The documents can be found on the TIS Project website at: http://tampainterstatestudy.com/project-documents/</p> <p>Specific to Westshore Palms, the DOT has been attending Westshore Palms Neighborhood Association meetings throughout the years at project major milestones to receive input and provide project updates. Most recently, the DOT has attended meetings to share information on 10/6/2016, 5/3/2018, and 3/5/2020.</p> <p>Tampa Bay is growing rapidly. The Westshore area has two major projects, Westshore Mall redevelopment and Midtown planned to open in 2021 and several new smaller projects. In addition, Westshore Palms and North Bon Air have seen a substantial increase in condo and multifamily complexes. With limited north-south roads, east-west roads will become more backed up, as Gray onto Lois Ave does today. FDOT is working in coordination with the City of Tampa on improvements to local</p>

				<p>streets in the Westshore Area. Reconnecting Reo Street, Occident Street and Trask Street under I-275 will allow for better traffic circulation in the Westshore area. Coordination with the City will continue through the next phase of the project, the conceptual design phase, focusing on local road connections, bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. Where feasible, the project aims to provide trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City, including enhanced safety measures within the corridor for bikes and pedestrians.</p> <p>As a result of public comment, the right turn lane from the Westshore on-ramp to Trask Street (eastbound to southbound movement) has now been eliminated which will reduce unnecessary traffic on Trask Street. This modification is now part of the Locally Preferred Alternative (LPA). A description of the LPA can be found in Section 2.4 of the SEIS. FDOT will continue to work with the City of Tampa to achieve better traffic circulation on local streets while maximizing safety enhancements.</p>
Stephanie	Ferrell	Community Event Written	<p>Would like to know potential impacts to the Art Center Lofts on Doyle Carlton Dr. Mr. Snyder, Ms. Ferrell understands that the property will not be acquired but would like to know specifics as to how close the road will reach to their lofts.</p>	<p>Thank you for your interest in the subject topic. I got your information from our teammates that participated in the Riverwalk Sweet and Spicy Festival at Water Works Park. 			<p>president. And for anyone here who's not familiar with Tampa Heights, aside from being the oldest neighborhood in the City we're also bordered to the east and to the south by Interstate 275. I quite literally live in the shadow of Interstate 275 in the downtown interchange.</p> <p>I stand here on my own personal behalf and to represent the Civic Association in opposition to the preferred alternative being proposed by the Department of Transportation with large referencing the entire footprint of the SEIS envelope, but more specifically with relation to the operational improvements that are being suggested for the downtown interchange including, but not limited to, the capacity increase to the flyover for southbound 275 onto eastbound I-4 and the addition of exits into the Ybor City community.</p> <p>We do support the no-build option for the downtown interchange because, frankly, it is the only option that has ever been presented to us for consideration that did not involve any further harm to the community. We also support what we consider to be commonsensical approaches such as lowering speed limits in the area of the downtown interchange, ramp metering, better lane markings, better signage, and above all transit alternatives first and foremost to remove cars from the interstate and other roads, because that is the only way we're going to dig ourselves out of the pit that we're currently in. Having said that, I want to shift gears, no pun intended, to environmental and health impacts, which are particularly personal to me.</p>	<p>SEIS, FDOT performed a carbon monoxide (CO) screening and a Mobile Source Air Toxics (MSATs) analysis, as these compounds have the potential to result in adverse health effects. Based on the results from the screening model, the highest CO one-hour and eight-hour levels are not predicted to meet or exceed the one-hour nor eight-hour National Ambient Air Quality Standards (NAAQS) for this pollutant with either the No Further Action or 2018 Express Lanes Alternative. As such, in all locations tested, the project "pass" the screening model, meaning the one-hour concentrations would not exceed 35 parts per million (ppm) of CO and the eight-hour concentrations do not exceed 9 ppm. All the Design Options (A, B, C, D, &E) for the 2018 Express Lanes Alternatives showed an improvement in MSAT emissions when compared to the 2045 No Further Action Alternative by an average decrease of approximately 50 percent. There would be a decrease in emission levels for each of the nine MSAT toxins. See Section 5.2 of the SEIS for more information on the air quality analysis that FDOT conducted.</p> <p>FDOT provided information at the second MPO Open House on April 30, 2019 regarding how the TIS SEIS can address health in transportation. 			<p>The FDOT has evidenced a disregard for the health and safety of this community for decades. We know there are adverse health impacts associated with living in proximity to high traffic corridors such as 275 and I-4. We know that these impacts are manifest in such conditions as child asthma and in the infirm and aging population we also know there are issues regarding cardiopulmonary health and cancer.</p> <p>In short, your interstate is a pollution factory which is harming my friends and neighbors. And your answer, remarkably enough, is to make the factory larger, more cars, more pollution. I find this incogitable and in breach of your fiduciary obligations to this community. this plan is an insult. It is not welcomed. It never has been and never will be. I've exceeded my time.</p>	<p>organizations and MPO committees to receive input and provide updates.</p>
Kristopher	Gallagher	Public Hearing Formal Speaker	<p>I would like to see a little bit more public transit options that work in conjunction with the already existing interstate. I don't think it needs to be widened. I do agree with the fact that cars need to be removed and other options need to be provided for the citizens that make theirs trips. In addition, I live near Robles Park, which is a beautiful park with a lake, and I spend some time there and the park is about four blocks west or, excuse me, it expands four blocks just to the west of the I-275 southbound lane and it's nearly at grade with the interstate. So if changes are going to be made, a visual or a sound barrier up against that park I think would benefit. Thank you.</p>	<p>Within the Tampa Interstate Study, FDOT has accommodated transit in several ways, such as providing a transit envelope and multimodal centers, and allowing public buses to utilize the express lanes toll-free. Kelly	Grimsdale	Public Hearing Formal Speaker	<p>I think I've attended all these meetings from the beginning and hear all the comments. One of the things that I don't think that the Locally Preferred Alternative addresses, like Mit mentioned, is the connectivity between the neighborhoods, or actually it was Chris Vela. You know, our neighborhoods were split up years ago with the highways going through it and it's great to have the connectivity and I don't see that in the plans. I also have concerns about pollution. We live very, very close to Malfunction Junction right now and even sometimes walking my dogs -- there's a back-up even on Columbus that sometimes bothers me walking my dogs along that corridor. I have major concerns about the increased traffic coming into the</p>	<p>New local street connections in the western section of the TIS SEIS study area would be created at Reo Street, Occident Street and Trask Street. Throughout the SEIS process, FDOT has listened to the DTI community and integrated public comments into the concept plans, such as keeping the Floribraska Avenue ramps open and reducing the footprint of the interstate to minimize right-of-way impacts to the adjacent community. To achieve the minimization of right-of-way, additional connectivity under the interstate is not feasible. However, as part of the conceptual design phase FDOT will continue working closely with the City of Tampa on the interstate connections to local roadways; potential bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance</p>

			<p>neighborhood if the exits are moved to 14th and 15th Streets.</p> <p>I understand the traffic weave and it can possibly relieve some of the back-up if you make more exits available, but I'm afraid if it's only going to be promoted as 14th and 15th Streets instead of -- and 21st and 22nd Streets, I'm afraid about how that's going to impact our neighborhood.</p> <p>It just seems like more modern solutions could be sought. I hear about other municipalities, other countries and other states in the United States, they're looking at different options and I don't know why -- it doesn't seem like anything's, like, modern that's being proposed. It's just let's keep building wider and wider. And I also believe after being at all of these meetings, and I know our neighborhood -- I think we just -- we have so many things to fight in our neighborhood. So I think, like, Ybor doesn't -- we just have a lot of things to fight that are more top of mind for us and we've had so many properties already taken by FDOT so we've already been impacted in the last expansion.</p> <p>I really don't think we are being heard by FDOT, because there are always a lot of people attending these meetings and it's, like, it's still the same plan, still the same expansion. There's just nothing new. So I would say personally with how it's presented I would like to say that I'm opposed to it and I'd like to see some better solutions.</p> <p>Thank you.</p>	<p>safety and bicycle/pedestrian/vehicle interactions. The conceptual design phase will reveal more details on 14th/15th St. and 21st/22nd St. in Ybor City, including accommodation of the Green Spine and improvements to 13th Ave; and Trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City, including enhanced safety measures within the corridor for bikes and pedestrians.</p> <p>We are also working with the local community on opportunities to activate FDOT-owned parcels for community use and landscaping. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide updates.</p>
Theodore	Hoffman	Email	email list	Thank you. FDOT added you to the project email list for future communications.
Shane	Holman	Email	Stop trying to keep widening our interstates. We have told you we don't want it, and we have said and voted	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS)

				priority. FDOT encourages the local agencies to unite behind a plan and secure a long-term financial commitment for their portion of the capital costs, as well as all of the on-going operations and maintenance of the system. Local commitment is required to compete for federal transit funding.
Rick	Homans	Email	<p>On behalf of the more than 40 member companies of the Tampa Bay Partnership, I am writing to voice our support for the locally preferred alternative (LPA) proposed by the Florida Department of Transportation, District Seven, and the improvements identified for segments 1A, 2A, 2B, and 3A of the Tampa Interstate Study. Tampa Bay is one of the fastest growing metro areas in the country, and we must make strategic multi-modal transportation investments to provide mobility options for this rapidly expanding population. The improvements identified in the LPA aim to relieve major bottlenecks – and provide operational and safety solutions – at both the Westshore and Downtown interchanges. These interchanges are the transportation linchpins for our region, as they connect people and commerce to and through the Tampa Bay region. The proposed infrastructure investments may also enable the development of innovative premium transit options for the Tampa Bay region.</p> <p>Additionally, we believe FDOT has actively listened and responded to the wishes of the region, and concerns that have been raised throughout the development of the Supplemental Environmental Impact Statement (SEIS). The proposed alternative reflects the many changes that FDOT has made, based on extensive input from residents, business leaders and elected officials in the Tampa Bay region.</p>	Thank you for your comment

		Speaker	<p>I currently live less than 100 feet from the existing 275 Westshore interchange construction that has already started. I also have watched the congestion increase repeatedly now in both directions at rush hour at that time backing up all the way from Malfunction Junction, all the way to Westshore every afternoon. I also gave up owning a car five years ago and take public transit and bike to work in downtown Tampa. You would think that would make me against any improvements to the highway. I've got to tell you; I gave up my car because of Malfunction Junction and driving in Tampa. I think the traffic needs to move faster. I was surprised that FDOT reduced so much of the improvements they were going to make. And it is, in my opinion, has come from more than two years of listening to the people in the</p>	<p>Thank you for your comment</p>

			<p>neighborhoods, you know. I guess the last point is, I sit on the Rural Roadway Committee for the PMO as a transit user, as the only transit user. I also attend the Downtown Partnership Transportation meetings. I take transit 365 days a year. I listen to people in Tampa say, oh, I'll take transit. You are not going to walk from your home to a transit place in June. The people who do that are the people who have to or who have made a choice. That is not the comfort in the air-conditioned life of Tampa. There's no way to make it comfortable from your front door to a transit site. There's no way to make it comfortable for you to stand in a transit stop in the sun in Florida in the summer. The only way to get people moving is to expand the highway and add transit, high speed transit that reaches into the neighborhoods. So, I support the locally recommended option increasing the on ramps and off ramps from I-4 to 275 and getting the traffic to move faster through the Westshore interchange where I live. Thank you.</p>	
Karen	Jaroch	Public Hearing Formal Speaker	<p>Hello. My name is Karen Jaroch and I live in Tampa. And my work has me frequently in Pinellas and Brandon. I live in the northwest part of the County. I'm a regular user of I-275. I get on at Bearss Avenue to access I-4 and to get usually to the Selmon Connector as well. I also travel down Veterans Expressway so I travel down segments 2B, 3A, 3B and 1A. I propose that the changes proposed today will decrease the travel time making it more efficient and make my trips much safer for me and my family. I'm in favor of the Locally Preferred Alternative for all segments in the study. The changes to 2B, a/k/a Malfunction Junction, will help alleviate the crash-prone standstill that we encounter when we get to the on ramp to I-4 from southbound I-275. I especially like the off ramp from I-4 at the 14th Street exit as it will reduce the number of</p>	Thank you for your comment

			<p>cars I have to compete with when I need to weave over to the Selmon Connector that gives me about 60 seconds to weave over three lanes and it's very dangerous in the congested traffic. On my return I'll see ease in the difficulty weaving from one side of the westbound I-4 to westbound I-4 as I enter from the Selmon Connector and have to quickly maneuver to get to the northbound I-275 ramp. The length and approach will be very helpful. I travel south on Veteran's Expressway often as well, which is my route to Pinellas, and it empties right into I-275 southbound direction, and the transition near the airport will be very helpful here. The return trip is frequently bogged down by a limited capacity of a single lane on ramp so I'm very please that the Locally Preferred Alternative will add a lane there. I fully endorse the Locally preferred Alternative for all segments as presented today at this hearing. Thank you.</p>	
Doug	Jesseph	Public Hearing Formal Speaker	<p>Hello. Doug Jesseph, J-E-S-S-E-P-H, 6007 Suwannee Avenue, Tampa, representing the Old Seminole Heights Neighborhood Association. I'm here to object to the economic impact analysis and the SEIS, in particular. I take issue with its incoherent prosthetic accounting and its preposterous projections for economic benefit. The most obvious shortcoming in its approach is that the only cost it considers is the dollar price of expanding interstates. No mention is made of the well-known economic down sides associated with urban interstates. They turn otherwise useful property into concrete moonscapes. Study after study has shown quite conclusively that urban interstates yield no net economic gain because they impose gigantic economic burdens. But this study conveniently overlooks these well-established facts and proceeds as if the only cost to be recovered is the money spent on construction.</p>	<p>The Tampa Bay Regional Planning Council (TBRPC) conducted the economic and fiscal impact analysis in 2018 with the data and information that were available at the time of the analysis. The study was requested by the City of Tampa Community Redevelopment Agency (CRA) board to better understand the overall impacts of construction, particularly to the CRAs. The study focused on the economic effects of construction of the TIS Project, operations of the proposed tolled express lanes, indirect effects on land use, and the potential economic effects of congestion and travel times as compared to the No Further Action Alternative.</p> <p>According to the TBRPC study, "Transportation costs represents the offset between shorter travel times and additional miles traveled, both of which are consequences of an upgraded transportation network. Cost savings come from the increase in average travel speeds, which reduces the effective distance</p>

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response									
			<p>Furthermore, the study makes no provision for the delays to construction imposed. The authors confidently assert "Congestion most directly affects the count of productivity," and that the relief of congestion is the principal economic benefit to be derived from the planned expansion. But apparently by magic the construction process with its orange cones, lane closings and traffic diversions is assumed to have zero impact on time spent in congestion. Worse still, the study falsely assumes that expanding the interstate will improve traffic flow and will thereby generate economic benefits.</p> <p>However, we already know that adding lanes to heavily traveled interstates does nothing to ease congestion or reduce accidents. In the history of pavement, no such scheme has succeeded. Again, the literature on this point is voluminous, but FDOT ignores it. There model factors in imaginary increases in average freeway speed to yield to the conclusion that the misnamed "operational improvements" will enhance the local economy, but there is no reason to believe that the project will ease congestion and an excellent reason to believe that it will fail. In case you do not share my skepticism on this point, I remind you that from 2002 to 2006 FDOT spent over \$100 million dollars on operational improvements to now malfunction Junction. In the words of FDOT spokesman John McCaffrey, the project would, "put more function into that junction." The result was the infamous flyover ramp linking I-275 southbound traffic onto I-4 east. As we know, every nickle of that expenditure was wasted and no traffic improvements followed.</p> <p>Nevertheless, the clown posse is back using the same</p>	<p>between sellers and their markets." The findings of both the TBRPC Economic Impact Analysis and FDOT's Project Traffic Analysis Report (PTAR) found that there would be an improvement in average travel speed (see comparison in table below). The improvements in average speed would provide better system performance and self-sustain operations and maintenance through toll revenue, which would add employment to Hillsborough County because the Tolled Express Lanes would provide.</p> <table border="1" data-bbox="1299 586 1892 753"> <thead> <tr> <th data-bbox="1299 586 1486 656">Avg. Speed</th> <th data-bbox="1486 586 1688 656">No Further Action</th> <th data-bbox="1688 586 1892 656">2018 Express Lanes - LPA</th> </tr> </thead> <tbody> <tr> <td data-bbox="1299 656 1486 691">2035 - TBRPC</td> <td data-bbox="1486 656 1688 691">26</td> <td data-bbox="1688 656 1892 691">27</td> </tr> <tr> <td data-bbox="1299 691 1486 753">2045 PTAR</td> <td data-bbox="1486 691 1688 753">AM: 22 PM: 24</td> <td data-bbox="1688 691 1892 753">AM: 33 PM: 35</td> </tr> </tbody> </table> <p>As conditions worsen under the No Further Action Alternative, businesses would have to increase safety stocks and add more delivery trips to compensate for the increased unreliability of the transportation system. Adding more delivery trips as compensation for existing congestion perpetuates even more congestion. Commuters would find that more of their time away from home goes uncompensated.</p> <p>There are also land use impacts to the loss of jobs. Congestion may contribute to business relocations outside of the area. Vacancies would increase, there would be fewer new employment opportunities and a concurrent drop in aggregate personal income, while consumer costs would increase even as the value of total capital stock experiences small decreases. Generally speaking, these impacts affect the purchasing power and assets of residents, depressing local consumption.</p> <p>On the other hand, reducing transportation costs through transportation investment would increase the region's economic productivity, raising personal income and creating new jobs.</p>	Avg. 			failed economic model and the same false assumptions promising that this time for sure something good will come from expanding the local interstate contrary to all available evidence. I am a professor by trade. I hand out grades for a living. The economic analysis here rates an F. Thank you.	While improved access to local and proximate markets would sustain the region’s competitiveness, improved highway speeds may prevent the need for businesses to invest in various solutions to increased congestion.
Alan	Johnson	Email	Roads need to be opened up and available to use. We live in a city not the suburbs. Roads should not be closed. Open up Trask. Make Cypress a better through street. Create another through street from Westshore to Downtown Tampa.	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. As part of the Westshore Interchange reconstruction, FDOT is proposing to reconnect Reo Street, Occident Street and Trask Street under I-275 to improve local traffic circulation.
		Public Hearing Written	Roads need to be opened up and available to use. We live in a city not the suburbs. Roads should not be closed. Open up Trask. Make Cypress a better through street. Create another through street from Westshore to Downtown Tampa.	
Jared	Jones	Email	<p>This project will encourage car use and harm future public transportation in Tampa and Hillsborough County. It will encourage suburban sprawl and the destruction of greenfield sites. Regardless of any congestion relief, this project will cause immeasurable damage to our local and global environment. Not to mention the further social damage this will cause to our urban neighborhoods. And the hundreds of pedestrians and cyclist it will kill over the life of the projects.</p> <p>Shame on the State of Florida for pushing this unwanted project on our communities while simultaneously blocking our public transportation funding. TBnext should be cancelled completely and no new lanes or ramps should be added.</p>	FDOT provided information at the second MPO Open House on April 30, 2019 regarding how the TIS SEIS can address health in transportation. We focused on encouraging active transportation, improving bicycle and pedestrian safety, enhancing community connectivity, and incorporating landscape and other community features. We also presented our approach to addressing air quality, water quality, and noise abatement. We are currently working with MPO staff to identify opportunities for more environmentally-friendly noise walls. Also, we presented sustainability opportunities that the TIS SEIS could take advantage of during design and construction. Materials from this open house can be accessed at: http://tampainterstatestudy.com/hillsborough-mpo-special-briefing-2/ . We are also working with the local community on opportunities to activate FDOT-owned parcels for community use and landscaping. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide updates.

Patrick	Kelly	Email	I first move to Tampa in 1976. I have moved in and out 5 times over the years. I have lived in Atlanta, Denver and Dallas. All three Cities have experienced significant population growth which in all three cases they proactively encouraged. Given this mind set all three have been quite proactive in constantly addressing their Transportation needs. Their respective transportation systems have undergone multiple re-configurations in an attempt to deal with the growth. Each of the five times I returned to Tampa I came back to the same transportation issues with little construction activity to address the broken system. It is time for FDOT to take a stand and drown out the vocal minority that are attempting to derail our future. This is FDOT's Road System. Be Bold. Take charge and Fix it. It is what's best for the Majority of the Citizens of Tampa Bay not to mention our Tourism sector that is one of the "life Bloods" of our Economy Thanks	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. Your comment has been included in the official public meeting record for the study's public hearing.
Alexandra	Khalel	Email	As a Tampa worker and driver, please oppose all tolls throughout the city. This would be an atrocity to our lower income citizens.	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. The tolled express lanes will be constructed to the inside of the existing general-purpose lanes on I-275 and not closer to the neighborhoods. The express lanes will provide drivers with a new travel choice and the prices will change based on the demand. As demand increases during peak travel times, the price will also increase to ensure drivers have a minimum of 45 miles per hour travel speed. This helps provide drivers in the express lanes with a reliable travel time. The existing general-purpose lanes will remain free to use. You will be able to travel in the general-purpose lanes on I-275 like you do today.
Terra	Kinsey	Email	I think these are excellent ideas to improve our transit system. I've been wondering how long until someone decided to make improvements Tampa needs more lanes as soon as possible. It's too crowded in these areas especially "Malfunction junction (I-4 & I-275)	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. The FDOT's top priority with any proposed improvements is safety for all motorists, pedestrians and bicyclists. FDOT is developing a comprehensive Transportation

			<p>state's investment in both the Howard Frankland Bridge and the State Route 60 Westshore interchange.</p> <p>We understand that there is not currently funding for the downtown interchange beyond the proposed funding for the downtown interchange beyond the proposed option E operational and safety improvements. It's important to continue the conversation and explore modal options. The Partnership supports the need to include a regional fixed route system with a dedicated right-of-way. We will continue to work with FDOT and the City of Tampa on impacts through our downtown neighborhoods and to preserve Ashley Drive as downtown's grand boulevard. This can be accomplished in part through design and signage to encourage more use of the downtown east exit. In addition, we would recommend that the signage for the Scott Street exit also contain a reference to Tampa Street so that people not destined for the western edge of our downtown know that they have an option to proceed on Tampa Street which has better capacity than Ashley Drive to handle traffic.</p> <p>During construction and beyond, compliance of transportation demand management measures should be put into place supporting bicycle, pedestrian and transit improvements for Tampa downtown. Thank you.</p>	<p>FDOT is preparing a comprehensive Transportation Management Plan, branded Safe TRIP. The Safe TRIP initiative will ensure safety and mobility through successful <u>T</u>raffic Management, <u>R</u>egional Demand Management strategies, <u>I</u>nnovation, and <u>P</u>ublic Engagement. Safe TRIP will promote transportation demand management (TDM) strategies, encourage public transit use, incorporate smart work zones, and identify proactive communication platform to provide real-time information to travelers, local community, and agency partners. that will address <u>T</u>raffic Management, <u>R</u>egional Demand, <u>I</u>nnovation: Smart Work Zone, <u>P</u>ublic Engagement. This initiative is intended to alleviate negative safety and mobility impacts related to construction.</p>
Laura	Lawson	Public Hearing Formal Speaker	<p>I'm a former chair of the Hillsborough County MPO Citizen Advisory Committee. I've been following this project now since it was first announced down at the Pepin Center many years ago and I'm disappointed to see that we have not -- what's in this study -- I've been waiting for this study to come out for, like, five years and I finally got a chance to read it today, and I'm</p>	<p>Chapter 10 in the Draft SEIS lists the commitments from the original TIS FEIS and the preliminary commitments for the SEIS. They reflect what the FDOT will do to minimize and mitigate impacts on the natural and built environment during the design, construction, and operation of the LPA. Since the project is proposed in the Draft SEIS, "would" was used to state what FDOT would do should the project move forward.</p>

			<p>disappointed to see that all of the effort that residents have put in showing up at so many meetings asking for so many things we get this list of commitments that's barely -- they're not commitments, they're just references to things.</p> <p>And I really -- we did a study several years ago about CSX. That's an option. That's what they did. In Orlando, they converted the CSX tracks and created Sun Rail as part of their interstate project and the state paid for it, including operations for seven years. People have been asking for this. Residents have been asking for rail. It also parallels the infrastructure of 275 going north towards the University. It's such an incredible opportunity, but I did a word search and I couldn't find anything about it in here at all.</p> <p>I'm really disappointed that we're not considering more about our climate. A study just came out recently from the Southern Environmental Law Center and they say that the four things that you need to do to try to achieve climate justice through transportation are reduce vehicle miles traveled. I searched in here for "vehicle miles traveled." Nothing, only a reference to it in terms of -- no concept that it will reduce that, this will increase that.</p> <p>Number two, transit adoption. Again, we don't have details and the transit that we have that's referenced in here is just illusory. We don't have any commitments. Electric vehicles. That's the third thing. Of course, that's coming, but we're not there yet. And even if we were, there's still particulate matter, there's still pollution associated with having all of these single occupancy vehicles on the road from tires, brakes, from the roadway, from all of it. And then fuel</p>	<p>Now that the LPA has been approved by FDOT and the FHWA, the list of commitments will be updated. The next step of the project is the preparation of the Final SEIS and Record of Decision (ROD). During this time, the list of commitments will be updated to state what FDOT "will" do and refined to reflect community concerns and appropriate project mitigation.</p> <p>FDOT is more than willing to partner with the local agencies on any transit project, including a study of the utilization of the CSX rail line for premium transit service, if it is supported by the Hillsborough Metropolitan Planning Organization (MPO) as a top priority. FDOT encourages the local agencies to unite behind a plan and secure a long-term financial commitment for their portion of the capital costs, as well as all of the on-going operations and maintenance of the system. Local commitment is required to compete for federal transit funding.</p> <p>FDOT is also preparing a comprehensive Transportation Management Plan, branded Safe TRIP. The Safe TRIP initiative will ensure safety and mobility through successful <u>T</u>raffic Management, <u>R</u>egional Demand Management strategies, <u>I</u>nnovation, and <u>P</u>ublic Engagement. 			<p>number of concerns. It needs to be understood that this is an update to the 1996 study. Twenty-four years have gone by, and many of us can probably remember that time, perhaps not all the well, but during that time there were a lot of things that we didn't know that we know now. We know a lot more about climate change. It was ten years later that Al Gore debuted the movie called "Inconvenient Truth." We know a lot more about how transit works. We probably wouldn't be even having a suggestion of putting buses in the middle of a highway if we were coming up with such a plan now.</p> <p>We know a lot more about transportation impacts from pollution and the impacts and where they come from. They don't just come from the exhaust pipe of cars. They come from tires, I believe that someone else previously mentioned. They come from the road itself. They come from brake dust, and these are all significant and will not be removed by electrification. Also, when one looks back at the project commitments that are made in chapter ten of the study, you can look back, there are a number of commitments made in 1996. There's very, very few and very, very unclear commitments made as far as at this time.</p> <p>And one of them is interesting. One that they do say that has been completed and fulfilled is the Hart north transit terminal and maintenance facility on 21st. I don't know if any of you all have been there or are familiar with it, but when Hurricane Irma came through the director of HART at this time was concerned that it wouldn't survive the storm because it's in such bad shape, and everybody knows that it needs to be replaced. Also, it recommended a multimodal terminal parking garage in downtown Tampa. Commission</p>	<p>FDOT understands the roads are only one part of the question. Outside of these interstate/roadway-related transit opportunities, FDOT has funded \$214 million in transit projects in the past 5 years, including \$32 million in the City of Tampa, such as:</p> <ul style="list-style-type: none"> - Tampa Streetcar Modernization and Extension Studies - HART Arterial BRT Study - HART Streetcar Fare Subsidies - Downtowner - Regional Multimodal Center Studies - HART 275LX Route and Block Grants for Transit Operations - Regional Rapid Transit Project Development & Environment Study <p>FDOT is more than willing to partner with the local agencies on any transit project, including a study of the utilization of the CSX rail line for premium transit service, if it is supported by the Hillsborough Metropolitan Planning Organization (MPO) as a top priority. 			<p>Kemp doesn't believe that downtown Tampa is the place to build another parking garage.</p> <p>When you look at the commitments that we've made -- now, you can read them in less than half a minute -- they are one sentence apiece, 11, commitment to transit is FDOT would -- I don't know why the "would" - - coordinate with transit agencies to address transit during the construction phase. This has been going on for years. The community has been demanding transit. That's not the kind of commitment that Commissioner Kemp was hoping to see. Commissioner Kemp is also concerned that the study does not address a number of social, public health and environmental impacts of the project, including affordable housing, including the health impacts of cancer and asthma. Well, thank you very much, and that's it.</p>	<p>itself. Circulation modifications were identified within the property site at that time.</p> <p>Finally, the location of the Downtown Multi-modal Terminal/Parking Garage that was identified in the TIS FEIS was based upon available information at the time in accordance with planned public transit operational improvements including, but not limited to: HARTs Transit Development Plan, MPO rail transit component, input from the Multi-Modal Consensus Committee, the Tampa/Ybor City Street Railway that was under development and the potential for the Florida High Speed Rail project. The FEIS stated that this commitment was dependent upon the outcome of many on-going transit studies at the time.</p> <p>FDOT evaluates the air quality effects of improvements to the transportation network at the project level. For the Draft SEIS, FDOT performed a carbon monoxide (CO) screening and a Mobile Source Air Toxics (MSATs) analysis, as these compounds have the potential to result to result in adverse health effects. Based on the results from the screening model, the highest CO one-hour and eight-hour levels are not predicted to meet or exceed the one-hour nor eight-hour National Ambient Air Quality Standards (NAAQS) for this pollutant with either the No Further Action or 2018 Express Lanes Alternative. As such, in all locations tested, the project "pass" the screening model, meaning the one-hour concentrations would not exceed 35 parts per million (ppm) of CO and the eight-hour concentrations do not exceed 9 ppm. All the Design Options (A, B, C, D, &E) for the 2018 Express Lanes Alternatives showed an improvement in MSAT emissions when compared to the 2045 No Further Action Alternative by an average decrease of approximately 50 percent. There would be a de a decrease in emission levels for each of the nine MSAT toxins. See Section 5.2 of the SEIS for more information on the air quality analysis that FDOT conducted.</p>

				<p>FDOT has worked with the community to greatly reduce the potential property impacts, particularly in the Downtown Tampa area. Mobley Park Apartments will not be impacted. There are no known impacts to subsidized-public housing within the LPA footprint. We do not know the status of individual property-owners or renters or the potential utilization of housing subsidies at this time. FDOT wants to ensure that people receive fair treatment when they are required to move from their homes to accommodate a transportation facility. No person is expected to bear an unequal share of the burden for a transportation project designed for the good of everyone. Every resident will be afforded relocation benefits and we work with the displacee to relocate them to the location they desire whether in the same community or elsewhere. Some may even be able to become homeowners instead of renters. Presbyterian Village had 140 displacees, 13 became homeowners, and 6 moved out of the Tampa area.</p> <p>FDOT provided information at the second MPO Open House on April 30, 2019 regarding how the TIS SEIS can address health in transportation. We focused on encouraging active transportation, improving bicycle and pedestrian safety, enhancing community connectivity, and incorporating landscape and other community features. We also presented our approach to addressing air quality, water quality, and noise abatement. We are currently working with MPO staff to identify opportunities for more environmentally-friendly noise walls. Also, we presented sustainability opportunities that the TIS SEIS could take advantage of during design and construction. Materials from this open house can be accessed at: http://tampainterstatestudy.com/hillsborough-mpo-special-briefing-2/. We are also working with the local community on opportunities to activate FDOT-owned parcels for community use and landscaping. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide</p>

				updates. The commitments will be updated in the Final SEIS/Record of Decision (ROD).
Dayna	Lazarus	Public Hearing Formal Speaker	<p>Yeah, so I just bought a house right in this area where - - not too far north of I-4. It's my first house and I chose it very carefully for its location. It's pretty close to where I work. It's -- well, it's about four miles from where I work. The exit that currently exists, an on ramp to I-4 onto 21st and 22nd, whether I'm heading east on I-4 or north on 275, I've never had a problem even at rush hour. Like, it kind of frees up right in that area actually and it takes me -- again, four miles from work, I get onto the I-4 ramp at 22nd -- I'm sorry -- 21st and I go east. It literally takes me five minutes to get to work at 8:00 a.m., and coming back at -- between 5:00 and 6:00, I usually get off and, again, there's no traffic and I get off on exit one. And I do see traffic, like, ahead of me, I understand that, trying to get around the corner, but I don't understand why those exits have to change because they were fine from my perspective and for my use. And actually just because I enjoy bike riding I now commute by bike five days a week, Monday through Friday, from again 8:00 to between 5:00 and 6:00, and I go -- I take 26th Avenue to 40th Street. I go north on 40th Street and then I go east on Lake Avenue and then I cross 56th on MLK and I go down MLK, and it is terrifying. I feel like I'm going to die every time I do it, but I do it because it's fun and it's savings gas and it, you know, doesn't put carbon in the atmosphere, et cetera. And so I would much prefer to see FDOT invest our money into bicycle -- specifically bicycle improvements, because it's such an untapped way to commute, but -- so, yeah, and then I left the comment form.</p> <p>Thank you.</p>	<p>You will still be able to get on at 22nd and go east to work and get off at 22nd Street when traveling westbound. The only change is for people traveling from south and north I-275. They will now exit at 14th Street and take 13th Ave, the existing frontage road, to 21st Street.</p> <p>Bicycle improvements adjacent to the interstate will be incorporated as part of the project where right-of-way allows.</p>

Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
		Email	<p>Personally, I and my boyfriend Jason Carey who lives with me at my home literally LOVE our existing Exits 1 on and offramps at 21st and 22nd Sts. My boyfriend travels peak hours M-F to and from his job in St. Petersburg to Exit 1 east, while I travel peak hours M-F from my job on MLK and Corporex Dr to Exit 1 west, so we have full coverage of the specific location of the proposed changes. It is absolutely wrong for FDOT to spend millions of dollars to reconfigure ramps that already work flawlessly. Traffic is not bad enough eastbound nor westbound at the specific exits on the existing 21st and 22nd street to warrant this expensive reconfiguration. Additionally, most people using the interchange heading south on I-275 are NOT trying to exit at Exit 1. If they were, they'd likely take the MLK or Floribraska exit to get to where they're going instead (that's what I always do). Please go with the No-Build option regarding the proposed on/off ramps at 14th and 15th streets.</p>	<p>The commute will be similar just in a dedicated lane from Northbound to Eastbound to get off in Ybor and the frontage road instead of interstate to 21st St.</p>
		Public Hearing Written	<p>I support the No Build Option. Please use dollars for this project on projects that take cars off the road. We need multimodal options. Badly. I actually really like the way our current exit 1 is situated on 21st/22nd. This is my exit to get to/from work from my house. I actually bicycle commute along Lake and MLK 9 to 5, M-F. Please invest my money in bicycle lanes (Protected!) on Lake & MLK between 22nd St and Corporate park Drive!!!</p>	<p>Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. FDOT is planning to shift the eastbound I-4 exit from 21st/22nd Streets to 14th/15th Streets, which would prevent drivers from having to weave into I-4 traffic to access Ybor/East Tampa. Drivers can use 13th Avenue (the existing frontage road) connecting to 21st/22nd Streets. The 14th/15th Street exit would enhance access to East Tampa and Ybor City by providing additional connectivity to the local communities and redistributing traffic from the recently improved 21st/22nd Streets. All the other interstate access to and from 21st/22nd Streets would remain the same. Additionally, FDOT funds transit and multimodal studies and projects within the local community.</p>

			<p>additional/more transparent plan is to reduce traffic lanes/increase sidewalk widths on Westshore which a commercial street (as well reducing lanes on Lois I understand) to make them more pedestrian friendly by moving traffic to Trask where we currently don't even have sidewalks in certain blocks North of Kennedy. I imagine that the intended traffic shift to N Trask Street will accommodate all the planned development at Westshore Plaza that will replace the Sears store/entire East property boundary with condos/apartments/ offices/retail etc. right up to the newly suggested 10' sidewalks. I also imagine reducing lanes on Lois Avenue to make it more pedestrian friendly will be beneficial for the overall connection to the Midtown project but could create more traffic through Westshore Palms.</p> <p>There has been no direct outreach to residents impacted by this proposal to alert them to these changes other than the general FDOT print media notifications which were so generic that the detail would not resonate with those impacted. Plus, the DOT meetings I have attended from the start including the most recent 3/5/20 do not address any detail/impact to the real Trask Street changes nor the additional impacts to the Westshore Palms Neighborhood in general above or below Gray Street.</p> <p>The North Trask Street planned extension under 275 (that includes having Trask Street serve as a connection to enter 275 northbound and possibly southbound as well as having direct access to the planned Intermodal Station on Cypress) will have serious safety implications for residents. This FL DOT/City of Tampa project clearly states in various published documents that it is the intent to repurpose Trask a current,</p>	<p>included: public meetings/workshops, Community Working Group meetings, webinars, participation in community events, distribution of project newsletters/email blasts, presentations to Metropolitan Planning Organizations boards and committees, presentations to Community Redevelopment Areas (boards and committees), maintenance of a project website, telephone hotline, and meetings with small groups such as homeowner associations, business and stakeholder groups and community organizations. Chapter 9 of the SEIS and the TIS SEIS Comments and Coordination Reports describes the main public involvement efforts and events that have been held to date and the public outreach elements that are ongoing for the study. The documents can be found on the TIS Project website at: http://tampainterstatestudy.com/project-documents/</p> <p>Specific to Westshore Palms, the DOT has been attending Westshore Palms Neighborhood Association meetings throughout the years at project major milestones to receive input and provide project updates. Most recently, the DOT has attended meetings to share information on 10/6/2016, 5/3/2018, and 3/5/2020.</p> <p>Tampa Bay is growing rapidly. The Westshore area has two major projects, Westshore Mall redevelopment and Midtown planned to open in 2021 and several new smaller projects. In addition, Westshore Palms and North Bon Air have seen a substantial increase in condo and multifamily complexes. With limited north-south roads, east-west roads will become more backed up, as Gray onto Lois Ave does today. FDOT is working in coordination with the City of Tampa on improvements to local streets in the Westshore Area. Reconnecting Reo Street, Occident Street and Trask Street under I-275 will allow for better traffic circulation in the Westshore area. Coordination with the City will continue through the next phase of the project, the conceptual design phase, focusing on local road connections, bicycle, pedestrian, and trail connections; interstate</p>

First Name	Last Name	Comment Type	Comment	Response
			<p>narrow 2 lane completely residential street (with the exception of the 1st block north of Kennedy which is commercial) to become an alternative main thoroughfare to draw traffic away from Westshore Blvd and be used to access the interstate and the proposed Intermodal station planned north of 275 where Trask Street abuts the project. Again, various DOT/Tampa Bay Next, Westshore Alliance documents clearly state this as the purpose. Trask Street is only 1 block East of Westshore Boulevard and the INTENTIONAL increased traffic will be unmanageable, degrade our neighborhood as well as create severe safety hazards and property devaluation.</p> <p>All Community outreach/information meetings have only been held by the DOT during which they repeatedly state they cannot discuss any issues that will impact the current residential Trask Street residents other than to state “the DOT is creating the overpass for the new Trask extension to accommodate the city request to do so and any impact on the residential neighborhood surrounding the Trask extension is something that the community needs to take up with the city”. NO details have been provided about the impact or plan for Trask Street.</p> <p>The City of Tampa has never noticed or asked for input from the Westshore Palms residents/owners of the planned changes to Trask. Not even the residents living directly on or adjacent to Trask that would be most impacted. This is a critical point since the DOT consistently states that is not their jurisdiction, but it is the City of Tampa’s. There is a complete disconnect between the City of Tampa, Westshore Alliance, and the Dot regarding what should be complete</p>	<p>underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. Where feasible, the project aims to provide trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City, including enhanced safety measures within the corridor for bikes and pedestrians.</p> <p>As a result of public comment, the right turn lane from the Westshore on-ramp to Trask Street (eastbound to southbound movement) has now been eliminated which will reduce unnecessary traffic on Trask Street. This modification is now part of the Locally Preferred Alternative (LPA). A description of the LPA can be found in Section 2.4 of the SEIS. FDOT will continue to work with the City of Tampa to achieve better traffic circulation on local streets while maximizing safety enhancements.</p>

			<p>communication on the project that impacts Trask Street/Westshore Palms.</p> <ul style="list-style-type: none"> · Any traffic volume studies of this area that are listed for public view are out of date. 23 townhomes have been constructed just on Trask Street between North A and Gray Street since then. That does not take into consideration the multitude of other townhomes (and resulting traffic) that have been constructed in Westshore Palms in the past 2 years due the current code allowing in general 4 new townhomes to replace 1 previous home and more are actively under construction · This project will not only affect those directly on or adjacent to Trask. It will create substantially more traffic on all streets in Westshore Palms as people will cut through any street they can find to get to the planned Trask access. They already use North A, North B and Gray Street as an alternative to Kennedy Blvd and if you would do any speed studies you would show that 80% of cars are currently speeding well above the posted limits. · PLEASE NOTE: The 4500 block of Fig Street is a dead-end road running directly off Trask street to the East. This block dead ends at the Bretton Woods Community of 10 homes 4509-4510 W Fig Street (which is a private drive and not maintained by the City). There are a total of 18 homes in this dead-end block that have no alternative ingress/egress except for Trask Street. If the “new” residential Trask Street configuration is executed making it the main/preferred alternative to reduce traffic on Westshore (which is the stated intention per various documents as previously stated) and the traffic backs up on a 2 lane residential road like

			<p>it does on a commercial road like Westshore- how will 1st responders reach this block with only one access point?</p> <p>· The other two streets in addition to Trask, Reo Street and Occident Street, that are being repurposed/connected to 275 under this project ARE NOT RESIDENTIAL streets- they are commercial areas. Trask is being treated as a commercial street equal to Reo and Occident which it is not.</p> <p>The most egregious issue I want to point out is that the City of Tampa/FDOT/Westshore Alliance has done nothing to directly inform/address or communicate this major proposed change to the residents directly impacted by the “new” plan for Trask/Westshore Palms to get their input and yes- objections- since as per the DOT, the DOT is not in control of this part of the project. The City and Westshore Alliance are both aware that the DOT does not address the impact or plan for Trask Street in any of their documents or presentations other than north of Gray Street. Even then the information available from the DOT makes it difficult to really ascertain the true nature of this project. This is a life/safety issue as well as a quality of life and potentially a property devaluation problem that unfortunately most residents are still not aware of due to the lack of direct outreach which should be required with specifics by the City of Tampa since the DOT says it is not in their scope of work.</p>	
Susan	Lebeau	Email	<p>Will the public comments sent to FDOT on the TIS SEIS Westshore Area Exchange be available for public review? I realize the comment period ends today 3/12/20.</p>	<p>All public comments and responses to comments are contained in the appendix of the TIS SEIS Comments and Coordination Report that is available on the TIS SEIS Project website when the Final SEIS and Record of Decision are issued http://tampainterstatestudy.com/project-documents/</p>

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
Michael	Maurino	Email	<p>Dear Mr. Bogen, The Westshore Alliance supports the Tampa Interstate Study Supplemental Environmental Impact Statement and the Locally Proposed Alternative for the proposed improvements to Interstate 275 and Westshore Interchange. Since our founding in 1983, improving the transportation system in Tampa's Westshore District has been the goal in order to serve the 102,000 workers and 15,000 residents in Westshore. The reconstruction of the Westshore Interchange as part of the project will serve local and regional travel in a way that is not currently possible in Westshore.</p> <p>Many of the comments included in our previous letters (see attached) have been addressed by FOOT staff or have been part of ongoing discussions between the Westshore Alliance, FOOT, Hillsborough County, Hillsborough Area Regional Transit, and the City of Tampa. Those comments remain part of our statement regarding the SEIS. We appreciate FDOT's willingness to communicate with our organization and local governments in order to achieve the best possible version of this project. However, we do have ongoing concerns that we look forward to addressing with FDOT as the project moves toward groundbreaking.</p> <p>1. Reo Street, Occident Street, and Trask Street extensions a. We maintain our support for these projects to be completed in the early stages of the project to facilitate traffic circulation and management during construction. b. We were pleased that each of these projects would provide pedestrian connections that are similar to the standards of the Westshore Overlay District.</p>	<p>Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. The FDOT's top priority with any proposed improvement is safety for all motorists, pedestrians and bicyclists. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations, including the Westshore Alliance, and MPO committees to receive input and provide updates.</p> <p>1. Coordination with the City will continue through the next phase of the project, the conceptual design phase, focusing on local road connections, bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. Where feasible, the project aims to provide trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City, including enhanced safety measures within the corridor for bikes and pedestrians.</p> <p>Specifically, FDOT continues to work with the City on the Reo and Trask connections to enhance safety and improve the experience of all users while minimizing impacts to adjacent property owners. For example, as a result of public comment, the right turn lane from the Westshore on-ramp to Trask Street (eastbound to southbound movement) has now been eliminated which will reduce unnecessary traffic on Trask Street. This modification is now part of the Locally Preferred Alternative (LPA). A description of the LPA can be found in Section 2.4 of the SEIS.</p>

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
			<p>c. We expect to work with FDOT, Hillsborough County, and the City of Tampa to mitigate the impact of interstate traffic, especially Reo Street at Cypress Street, and Trask Street south of Interstate 275.</p> <p>i. Reo Street: The addition of the Reo interchange will provide a significant benefit to the Westshore District. However, it will also add thousands of cars to the Rea/Cypress intersection. It is reasonable that FDOT works with the City of Tampa to address any intersection improvements at Cypress/Rea that occur due to reconstructing the interstate. Reo Street should be a safe pedestrian corridor that connects the Howard Frankland Bridge Trail and the Courtney Campbell Causeway Trail. FOOT and the City need to address bicycle access on Reo. ii. Trask Street: Connecting the two ends of Trask is a critical need in order to make West Shore Blvd. and Lois Ave. viable for Complete Streets improvements planned by Hillsborough County, and the City of Tampa. However, FDOT should work with the City of Tampa to limit access to Trask south of 275 and make the street pedestrian friendly. Items such as roundabouts, four-way stops, and directional turns could keep Trask open as a reliever for West Shore Blvd. but make West Shore the more viable entry to northbound 275.</p> <p>2. Construction staging and aesthetics a. The Westshore Alliance expects that construction is done in a manner consistent with the mixed-used development of Westshore. Staging and timing should be sensitive to residents and workers in the District. We expect for construction to be done safely, with sensitivity to interruptions for those in Westshore. In addition, we plan to work with FDOT to secure</p>	<p>2. The FDOT through the concept design phase will continue to work with the Westshore Alliance to minimize potential visual impacts during construction as construction staging, hardscape and landscape opportunities are evaluated.</p> <p>3. In 2016, FDOT purchased land for the proposed Westshore Regional Multimodal Center (WRMC) and has funded a study to evaluate the site configuration and potential plan. The “Westshore Multimodal Study and Strategic Transportation Plan”, completed in February 2012, identified four viable site locations (A, C, D, and S) – please see the project location map. FDOT’s Project Development and Environment (PD&E) Study has identified Site C, the redevelopment of a strip of parcels north of I-275 between Trask Street and Manhattan Avenue, as the recommended site for the WRMC. The study will determine the configuration, benefits, costs, and impacts of developing and operating a regional multimodal center at this location. More information about the project can be found here: https://archived.fdotd7studies.com/westshore/multimodal/</p> <p>4. FDOT is also preparing a comprehensive Transportation Management Plan, branded Safe TRIP. The Safe TRIP initiative will ensure safety and mobility through successful <u>T</u>raffic Management, <u>R</u>egional Demand Management strategies, <u>I</u>nnovation, and <u>P</u>ublic Engagement. Safe TRIP will promote transportation demand management (TDM) strategies, encourage public transit use, incorporate smart work zones, and identify proactive communication platform to provide real-time information to travelers, local community, and agency partners that will address <u>T</u>raffic Management, <u>R</u>egional Demand, <u>I</u>nnovation: Smart Work Zone, <u>P</u>ublic Engagement. This initiative is intended to alleviate negative safety and mobility impacts related to construction. The Final SEIS and ROD will update the list of</p>

			<p>aesthetic concepts that would complement development in Westshore as part of the project. It is also important for FOOT to work with the Westshore Alliance to minimize visual impacts during construction and understand concerns of the district.</p> <p>3. Multimodal Center development a. FDOT should keep working with TBARTA and HART on transit access to the median of 275 and the Westshore Multimodal Center off Cypress and Trask Streets. Considerations should be made about how to connect the Multimodal Center to Tampa International Airport.</p> <p>4. Maintenance of Traffic and Transportation Demand Management a. It is critical that commuters have alternative options and transportation demand management strategies available in order to maintain traffic patterns into and within Westshore. We look forward to working with FDOT, HART, TBARTA, and employers in the District to determine the best methods to ensure that commuters can get to work in a safe and timely manner before, during, and after the construction period.</p> <p>b. Previous interstate construction projects led to additional traffic on local streets in Westshore. Part of FDOT's MOT plans should include working with the Westshore Alliance and City of Tampa to identify preferred detour routes that direct traffic onto arterial and collector streets, and away from single-family residential neighborhoods. This could include reprogramming or replacing traffic signals on preferred roads and installing traffic calming measures on local streets. We understand the Traffic Management Plan is under development and we look forward to providing</p>	<p>commitments to reflect the outcomes of the additional outreach FDOT will be conducting.</p> <p>5. As a part of the SafeTRIP process, we are looking at ways to proactively communicate during construction. We are developing our MOT plans now in an effort to minimize disruptions to the local community and traveling public. FDOT is planning to convene a Community Advisory Taskforce that would convene through the planning, design, and construction phases. FDOT will invite the Alliance to participate on the taskforce.</p>

			<p>input into that plan that will become part of the Request for Proposals.</p> <p>5. Business continuity a. Westshore is a dynamic district featuring new commercial, hospitality, and residential properties with redeveloping properties catering to a new generation of employees and residents. But, nearly 10 years of construction starting with the Howard Frankland Bridge and ending with the completion of the Westshore Interchange will certainly impact the viability of many small businesses in the District. We want to work with FOOT to mitigate these impacts and ensure that the short-term impact of construction does not lead to a long-term loss of shops and restaurants that have been attracted to Westshore.</p> <p>The SEIS and the Locally Proposed Alternative must go forward. It will have a transformative impact on Westshore, including a new interchange, and pedestrian friendly streets that will serve an expanded transit network. This project moves us towards a vision of Westshore that is served by transportation projects that support economic development and enhance quality of life. We look forward to working with you and FDOT to see this project through to completion. Sincerely, Don Skelton</p>	
Mit	Patel	Public Hearing Formal Speaker	<p>Okay. My name is Mit Patel. I live in Tampa. Zip code is 33609. I've been at this project for about five years -- probably, yeah, close to five years now. And it's gotten prettier as far as presentation, but as far as substance it's pretty much the same, if not worse. The demographic changes that's happening with downtown, I speak specifically towards the urban area,</p>	<p>Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. Throughout the SEIS process, FDOT has listened to the DTI community and integrated public comments into the concept plans, such as keeping the Floribaska Ave. ramps open and reducing the footprint of the interstate to minimize right-of-way impacts to the adjacent community. The LPA</p>

Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
			<p>all of the stats -- all of the studies show that we should be talking about removing the highway and not expanding the highway in that area. And I'm a car guy. I love cars. I've got three cars of my own. I love driving them. I'm not saying that people have to stop driving their cars, but some forms of transportation are just for some areas. In downtown and the area that will become, will become evermore metropolitan and we have to start looking at the residents that live there of what is the medium to get around sufficiently, economically that it's going to make sense, and the way to do that is through transit, go to mass transit.</p>	<p>improvements in the Downtown interchange improve safety by reducing weave movements and provide more access to communities better dispersing traffic.</p>
			<p>Expanding the highway in any form or fashion whether it's toll roads, whether it's free roads, whether it's adding a lane here and there is not going to solve the purpose of congestion. It's not going to add economic value.</p> <p>And if this Department is really serious about traffic or transportation as it is in their title and if we don't sit down and have that conversation, all of this is just a farce. You look at it and you don't get any respect from me, me personally, from the citizens that live here, I doubt they will ever have that respect. I see the effort. I'm not trying to demean anybody that works -- I've actually started liking some of you folks over the last few years. That hasn't always been the case and I know you're trying to do your job. But whether the policy is or whoever the policymakers are, they keep running the same thing down our throats and expect us to come here and sit down and just take it on no matter how pretty it's starting to look. I think that's just not fair to us. So, you know, even this, this whole stage right here when I get up here and we talk about this, it's just checking the check box for the DOT. It's not going to change anything. And that's -- we, as citizens,</p>	<p>The Tampa Interstate Study (TIS), as the name would indicate, is a plan for the interstate modernization within Tampa's urban core. Within the TIS, FDOT has accommodated transit in several ways, such as providing a transit envelope and multimodal centers, and allowing public buses to utilize the express lanes toll-free. FDOT is also looking at ways to accommodate bus on shoulder, transit signal priority on adjacent state roads, and incentivizing transit, particularly during construction.</p>
				<p>FDOT understands the roads are only one part of the question. Outside of these interstate/roadway-related transit opportunities, FDOT has funded \$214 million in transit projects in the past 5 years, including \$32 million in the City of Tampa, such as:</p> <ul style="list-style-type: none"> - Tampa Streetcar Modernization and Extension Studies - HART Arterial BRT Study - HART Streetcar Fare Subsidies - Downtowner - Regional Multimodal Center Studies - HART 275LX Route and Block Grants for Transit Operations - Regional Rapid Transit Project Development & Environment Study <p>FDOT is more than willing to partner with the local agencies on any transit project, including a study of the utilization of the CSX rail line for premium transit service, if it is supported by the Hillsborough Metropolitan Planning Organization (MPO) as a top priority. FDOT encourages the local agencies to unite behind a plan and secure a long-term financial commitment for their portion of the capital costs, as well as all of the on-going operations and maintenance of the system. Local commitment is required to compete for federal transit funding.</p>

		Email	<p>designated an impaired river. FDOT has had no stormwater retention since at least 19673 along the 8 miles north of I-4. The river is greatly environmentally impacted by the proposal under the current TIS SEIS project of improvements to I-275 North of I-4. I am opposed to the SEIS covering WPI 443770-1 and demand it not be finalized after the public hearings of February 25th and 27th. There has been no count of the microscopic organisms at the bottom of the river since 1963. There has been no scientific testing of Hillsborough River to determine why after 20 years ban on gill netting in Tampa Bay the fish life remains dangerously low. The river is already impaired. It is time to stop this killing of the river by adding billions of polluted and contaminated storm water to it over the next 50 years. There needs to be a pond site for every mile of I-275. Stop adding harm to the environmentally sensitive Hillsborough River. Please add my comments to the SEIS public record for meeting February 25, 2020.</p>	<p>treatment of stormwater runoff from I-275 before entering the Hillsborough River.</p> <p>As you know, regulations on water quality and pollution discharge have evolved since the original construction in the 1960s. While there was a Federal Water Pollution Control Act of 1948, the Clean Water Act (CWA) was reorganized and expanded in 1972. Under CWA, many programs, such as the National Pollutant Discharge Elimination System (NPDES) permit program (overseen by the Southwest Florida Water Management District (SWFWMD)) requires compliance with the CWA.</p> <p>FDOT has complied with CWA and coordinated with the appropriate permitting agencies since before the beginning of the TIS in the 1980s. The size and complexity of the project dictates the level of coordination and permit type and FDOT has completed numerous projects within the Hillsborough River Basin. These projects provide stormwater Best Management Practices (BMPs) conforming to the regulatory requirements of the SWFWMD when permits are approved. In some instances, the projects BMPs provided additional water quality benefits beyond the regulatory requirements.</p> <ul style="list-style-type: none"> • DTI Safety and Operational Improvement Project (ERP 20690.004 issued in 2005) - The project constructed 4 stormwater ponds (Pond 1A and Pond 1C both wet, and Pond 1G and Pond 1H both dry) to provide treatment for 39.91 acres of interstate pavement; providing 64 percent more treatment than required by SWFWMD. • Bridge widening of I-275 at Floribraska Ave, Lake Ave, MLK Jr. Blvd, Chelsea Ave, and Osborne Ave (Exemption Application 645906 issued 2011) - The project proposed to remove the existing concrete ditch pavement within the roadside swales to allow for greater water quality capacity.
			<p>The Tampa Interstate Study since at least 1985, 35 years ago, has included my property among those to be acquisition for a storm water pond at MLK and Marguerite Street. My property has been blacklisted for 35 years and I could not sell it. This pond site was needed to minimize toxic storm water to the environmental impact of Hillsborough River. The SEIS otherwise called the Supplemental Environmental Impact Statement, being presented this evening does not contain protection for Hillsborough River. The pond site was identified in Option A-ALT-1 and Option B-ALT-1. Now you have slipped in Preferred Alternative "E" which I need time to study. On May 6, 2019 in an email from FDOT Kristen Carson, she said: "We have conceptual pond design and we are awaiting approval</p>	

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
			<p>of the SEIS currently scheduled for Late 2020.” I was recently informed by FDOT that the pond site after 35 years has been removed from the Supplemental Environmental Impact Statement. It will not be built, sending another 50 years of toxic storm water into the river. Hillsborough River has already been designated an “environmentally impaired” river by the Florida EPA and SWWMD. This means the river is suffering a slow environmental death where thousands of fish and wild-life are impacted, caused jointly by the City of Tampa and FDOT dumping poison storm water into it. Since 1966 FDOT has been diverting millions of gallons of toxic storm water from I-275 into Hillsborough River through large concrete pipes. They have not built a single storm water pond from I-4 north on I-275 to Hillsborough River. As a citizen of the Seminole Heights neighborhood since 1966, and believing in protecting the environment, I am demanding that this SEIS/FEIS be rejected until it includes adequate pond sites from I-4 north to Bearss Avenue. I am demanding EPA and SWWMD not grant any permits for the current proposed construction until this environmental impact to Hillsborough River is addressed.</p>	<ul style="list-style-type: none"> I-275 Himes Avenue to the Hillsborough River (ERP 5619.005 issued in 2013) - The project constructed 2 stormwater ponds (Pond 5L and Pond 5R) that provided 10 percent more water quality treatment than was required by SWFWMD. <p>As you mentioned in your complaint, the 1996 Tampa Interstate Study (TIS) Final Environmental Impact Statement recommended a long-term preferred alternation that would fully reconstruct the Downtown Tampa Interchange (I-275/I-4). Full reconstruction would have required several pond sites, including the one that was shown on your property. FDOT continued with that plan until we started the SEIS process in 2017. Working closely with the community and our local agencies, and because of some other unknowns in the corridor, we have altered our current plans for the interchange. As you know, the recommended Locally Preferred Alternative (LPA) for the Downtown Tampa Interchange now consists of safety and operational improvements. The safety and operational improvements still have to meet stormwater requirements; however, because we are no longer looking at a full reconstruction and we are adding less pavement, the stormwater requirements are significantly less. The LPA was presented in the Draft SEIS, which was approved by FHWA on January 27, 2020, and was presented at the public hearing in February 2020. As shown in Attachment 1, In summary:</p>
		Public Hearing Formal Speaker	<p>I have lived here since 1989. The interstate study plan has been ongoing since at lease 1985, 35 years ago, and has included my property among those to be acquisitioned for a storm water pond, and this has been in the TIS for all of these years, 35 years. and because of that, my property's been blacklisted I have not been able to sell it all because everyone who does the research on it says it's going to be take so we don't want to buy it, the pond site was needed to minimize the environmental impact of Hillsborough River. The SEIS, otherwise called the Supplemental Environmental</p>	<ul style="list-style-type: none"> The LPA has less impervious area compared to the original TIS FEIS recommended alternative. As a result, the stormwater management need for the LPA is reduced and ponds can now be located within the existing FDOT-owned right of way. The stormwater evaluation for LPA found in the November 2019 Pond Siting Report (PSR) that was made available prior to the Public Hearing and can be found on the study website at www.tampainterstatestudy.com.

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
			<p>Impact Statement, tonight as being presented does not contain protection for Hillsborough River with the storm water runoff. The pond site was identified in Option A-ALT-1 and Option B-ALT-1, and now you've slipped in an alternative E and A, B, C and D don't exist anymore and I've only learned of this just, like, a month ago. So the conceptual plan, according to Kristen Carson, last May she said to me in an email: "We have a consent pond design, but we're waiting on the final approval of the SEIS by late 2020" I recently have been informed by the FDOT that the pond site for 35 years has been removed from the project an the Supplemental Environmental Impact Statement is being revised, and now you're slipping in an alternative E, and all we've been dealing with for the last three years is A, B, C and D. And so I'm confused about that. I'm confused about that it's going to take -- Hillsborough River has already been designated as an environmentally impaired river by Florida EPA and SWFWMD. This means the river is suffering a slow environmental death where thousands of fish and wildlife are impacted, caused jointly by the City of Tampa and FDOT dumping poison storm water into it. Since 1966, FDOT has been diverting millions of gallons of toxic storm water from I-275 into Hillsborough River through large concrete pipes. They have not built a single storm water pond from I-4 north on I-275 to Hillsborough River.</p> <p>As a citizen of Seminole Heights for the last -- since 1966, and believing in protecting the environment, I am demanding that this SEIS be rejected until it includes pond sites every mile from I-4 north to Bearss Avenue, and I demand that the EPA and SWFWMD not grant any permits until this problem has been addressed.</p>	<ul style="list-style-type: none"> - Basin 6 refers to the area where your property is located. - The requirements within this basin can now be accommodated in SMF 6A within the existing FDOT right of way. - SMF 6A will provide treatment and attenuation prior to discharging to the storm drain system along Emma Street. <p>To accommodate the phased construction of the project between the DTI and the I-275 portion north of Martin Luther King Blvd, there is a transition area between these limits. This project is along I-275 between the I-4 flyover ramp and Osborne Ave and requires 2 proposed pond sites, shown in Attachment 2. These are noted as Swale -1A and Swale 0B.</p> <p>The portion of I-275 north of Martin Luther King Jr. Blvd. is outside of the TIS and is a part of a separate environmental study with a separate, but coordinated, stormwater management plan. To accommodate the I-275 widening between Osborne Ave to north of Fowler Avenue and to provide treatment and attenuation of the stormwater runoff, there are 4 existing ponds and 12 proposed ponds (Swale 1A, Pond 2, Swale 2, Swale 3A, Swale 3B, Swale 4/5, Swale 6/7, Pond 8, Swale 9, Swale 9-1, Swale 10 and Swale 11) within the FDOT right of way. These are all within the Hillsborough River Basin. To accommodate the I-275 widening between Fowler Avenue and Bearss Avenue, there are 4 additional proposed ponds (Swale 12, SMF 13, SMF 14B and SMF 15B) that and discharge to Curiosity Creek and Cypress Creek. These ponds are shown in Attachment 3.</p> <p>As part of the current SWFWMD permitting regulations, a pollutant loading analysis is required for discharges to impaired surface waters. Per the FDEP Comprehensive Verified List</p>

**Tampa Interstate Study (TIS) Draft Supplemental Environmental Impact Statement
Public Hearing Comments (February 4 – March 12, 2020)**

First Name	Last Name	Comment Type	Comment	Response
				<p>Update of October 2019, the Hillsborough River Water Body Identification (WBID) 1443E within the I-275 Downtown Interchange is not currently listed as impaired within the project area. Even though it is not currently listed as impaired, FDOT projects that discharge to this waterbody has/will complete the pollutant loading analysis to ensure both the presumptive water quality and net improvement criteria are met should this classification change in the future.</p> <p>Since FDOT’s formation in 1969, we have continued to try to improve our environmental processes to balance the need for good mobility with the need to preserve the quality of our environment and communities. We will continue to work with all permitting agencies to develop the best solutions. We appreciate your common desire to improve the environment and your interest in the TIS SEIS.</p>
Beau	Robichaux	Email	I do not want the interstates expanded. I want streetcars and buses and trains.	<p>Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. Throughout the SEIS process, FDOT has listened to the DTI community and integrated public comments into the concept plans, such as keeping the Floribraska Ave. ramps open and reducing the footprint of the interstate to minimize right-of-way impacts to the adjacent community. The LPA improvements in the Downtown interchange improve safety by reducing weave movements and provide more access to communities better dispersing traffic.</p> <p>The Tampa Interstate Study (TIS), as the name would indicate, is a plan for the interstate modernization within Tampa’s urban core. Within the TIS, FDOT has accommodated transit in several ways, such as providing a transit envelope and multimodal centers, and allowing public buses to utilize the express lanes toll-free. FDOT is also looking at ways to accommodate bus on shoulder, transit signal priority on adjacent state roads, and incentivizing transit, particularly during construction.</p>

			bottleneck at the same time. I'm not an engineer so I don't have a solution. Thanks for asking.	as stated in Section 2.4.1 of the Draft SEIS, FDOT developed Design Option E, the Locally Preferred Alternative (LPA), to enhance traffic operations and safety in TIS Segments 2B and 3A. These improvements would address the existing bottlenecks and high crash rates experienced within the I-275/I-4 interchange. The LPA would include the beginning and the end of the proposed express lanes that are a continuation from the Westshore area extending to Ashley Drive and three safety and operational improvements within the I-275/I-4 interchange. There would be no interstate access to North Boulevard. In addition, the LPA would remove, replace, and widen existing bridges within the Downtown Interchange of I-275 and I-4.

				edge) versus on the shoulder or barrier walls along of the roadway.
		Public Hearing Informal Speaker	Hello, this is Neal Suarez. My complaint is a noise barrier wall. You can see the semi trucks right out the front door. The address is West La Salle Street. I was told that the section from MacDill west to Himes was cut off from funds. Would like also an improvement, and maybe putting up a nice wall where the gate is. Basically, if we can get the barrier wall for the noise ten feet higher, that'd be the cat's meow. Thank you for your time and your consideration.	<p>Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. There will be no modifications to the interstate lanes and noise barrier that is currently located across from your home. Additional travel lanes will be constructed within the grass median area that exists today. As part of the conceptual development phase (CDP), additional landscaping and a trail is planned across the street from your house from Himes to Matanzas Avenue. The gate is currently used to access the pond for maintenance. During CDP the fencing and gate will be reviewed for possible aesthetic enhancements.</p> <p>FDOT prepared a Noise Study Report Update (November 2019) that documents the noise wall analysis and proposed locations. The proposed noise walls were shown on the exhibits at the February 2020 public hearings. This report and the public hearing exhibits are available on the project website: www.tampainterstatestudy.com. As the project progresses to design, the noise study will be updated again to better reflect horizontal and vertical geometry of the project and the final location of the noise walls. FDOT is willing to construct the noise walls first to buffer construction, where possible, if the noise wall is proposed within the community (along the right-of-way edge) versus on the shoulder or barrier walls along of the roadway. FDOT is currently working with Hillsborough MPO staff to identify opportunities for more environmentally-friendly noise walls.</p>

			<p>of lanes to I-275 encroach upon the rear property line? If so, will there be a change to any access easements as a result of this.</p> <p>2. What is the economic impact to the properties located in segment 2A. Will the property values be adversely affected due to this construction and expansion?</p> <p>3. I noted the expansion may occur inside what is existing in segment 2A. Please confirm if this is accurate.</p> <p>4. What is the expected increase of noise/decibel level during construction and subsequent increase in decibel levels of increased traffic from the expansion. Will they exceed the local noise ordinance?</p> <p>5. Segment 2A lists no relocation's required. Please confirm this is correct.</p> <p>6. Has there been any consideration given to the increase in auto insurance rates for residents in this area. Insurance rates are based on certain factors. Segment 2A is already considered to be in an unfavorable area as far as rates are concerned. This will most likely increase due to the increased traffic flow in segment 2A.</p>	<p>not encroach upon the rear property line or change any access easements. See Chapter 2 of the SEIS for a description of the proposed improvements and Appendix A of the Draft SEIS for the Design Concepts for the TIS http://tampainterstatestudy.com/project-documents/.</p> <p>According to the Economic and Fiscal Impact Analysis Report conducted by the Tampa Bay Regional Planning Council (TBRPC 2018), the project may impact property values in several different ways. First, property values may increase due to the increase in greenbelts, increased pedestrian accessibility and bicycle routes, which FDOT would invest in as part of the project. Second, the economic activity of construction influence area property values. A third way is the proximity of a property to the highway. That is, some single-family properties immediately adjacent to the highway right-of-way may face negative impacts from proximity but most see property value advantages, premiums, over properties further away because of the amenity value of proximity to transportation access. In other words, accessibility is capitalized into the value of single-family homes and the further a house is away from highway access the less amenity value it has relative to properties closer to access points. The TBRPC study can be found at: http://tampainterstatestudy.com/project-documents/</p> <p>FDOT prepared a Noise Study Report to evaluate the potential noise impact of the LPA. According to the report, an estimated 270 residences and 9 special land uses are predicted to experience traffic noise levels that would approach, meet, or exceed the FHWA noise abatement criteria (NAC). The special land use sites that would be affected for exterior traffic noise include Julian B. Lane Riverfront Park, Hillsborough River paddling trail, Tampa Riverwalk Trail, Borrell Park/Nebraska Avenue Park, Robles Park, and Perry Harvey Sr. Park), the playground of the Faith Temple Missionary Baptist Church/Community Center, a community garden, and the Art</p>

				Center Lofts Apartment outside use area (hot tub). The remainder of the impacted sites are residential. Potentially impacted sites are generally located within first and second-row structures. See Noise Study Report and/or Chapter 5 of the Draft SEIS for more information. As the project progresses to design, the noise study will be updated again to better reflect horizontal and vertical geometry of the project and the final location of the noise walls. FDOT is willing to construct the noise walls first to buffer construction, where possible; if the noise wall is proposed within the community (along the right of way edge) versus on the shoulder or barrier walls along of the roadway. Insurance rates were not evaluated as part of the TIS.
Nina	Tatlock	Email	I want to protect the city and prevent the variable toll lanes. Please do not tear up the city of Tampa for toll lanes.	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. Your comment has been included as part of the official public hearing record.
Rosemarie	Torres	Public Hearing Written	The only thing I have an issue with is the adding of toll roads going close to my home. I live right of Himes and have lived here from childhood. I am on disability and this would put a financial burden on people that have lived in the neighborhood for years and now have to pay tolls to travel the interstate. This will impact the residents of West Tampa having to travel the interstate and pay tills. they should have some sort of exceptions for the residents of the community having to pay tolls for traveling short distances on the interstate. Residents of the nearby neighborhoods should not be impacted by more tolls. Some exceptions should be made for the disabled living close to the interstate	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. The existing general-purpose lanes will remain free to use. You will be able to travel in the general-purpose lanes on I-275 like you do today. In addition, FDOT is proposing access from Himes Avenue to the southbound I-275 express lanes and from northbound I-275 express lanes to Himes Avenue. The tolled express lanes will be constructed to the inside of the existing general-purpose lanes on I-275 and not closer to the neighborhoods. The express lanes will provide drivers with a new travel choice and the prices will change based on the demand. As demand increases during peak travel times, the price will also increase to ensure drivers have a minimum of 45 miles per hour travel speed. This helps provide drivers in the express lanes with a reliable travel time. Travelers will still be able to travel toll-free on the existing general use lanes that would be parallel to the proposed express lanes. Registered

				public transit, public school, and private buses are exempt from paying tolls on express lanes; buses must have a Sunpass and valid license plate. Persons with disabilities are also exempt from paying tolls, if they are registered, have a Sunpass, and have valid license plate. All users will be able to commute short distances in the general-use lanes on I-275 like they do today.
Pamela	Valentine	Public Hearing Written	Perhaps a cul-de-sac at Gray would discourage the use of Trask St. as a north/south corridor on ramps. As Westshore becomes more crowded traffic will seek and find an alternative. Trask St. is narrow and bordered by residences on each side. Increased traffic will compound a situation that is already peaking in the area.	<p>The FDOT’s mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of our environment and communities. The FDOT works to provide a transportation network that is well planned, supports economic growth, and has the goal of being congestion and fatality free.</p> <p>As a result of public comment, the right turn lane from the Westshore on-ramp to Trask Street (eastbound to southbound movement) has now been eliminated which will reduce unnecessary traffic on Trask Street. This modification is now part of the Locally Preferred Alternative (LPA). A description of the LPA can be found in Section 2.4 of the SEIS. FDOT will continue to work with the City of Tampa to achieve better traffic circulation on local streets while maximizing safety enhancements.</p>
Chris	Vela	Community Event Written	I absolutely oppose TBNext. I oppose option E and any options that includes 14th 15th Street exit. TBNext is the wrong plan for our CRA and will lower our quality of life with noise, [unreadable] and unsafe roads. The supporting TBNext documents do not and cannot determine local impacts to our CRA's. These studies do point out our properties. Farther away will benefit those using interstates. I oppose all lanes; they are repressive and only show 1-5 mph difference compare to general use lane. Remove section 6. No work on the downtown interstates.	<p>FDOT provided information at the second MPO Open House on April 30, 2019 regarding how the TIS SEIS can address health in transportation. We focused on encouraging active transportation, improving bicycle and pedestrian safety, enhancing community connectivity, and incorporating landscape and other community features. We also presented our approach to addressing air quality, water quality, and noise abatement. We are currently working with MPO staff to identify opportunities for more environmentally-friendly noise walls. Also, we presented sustainability opportunities that the TIS SEIS could take advantage of during design and construction. Materials from this open house can be accessed at: http://tampainterstatestudy.com/hillsborough-mpo-special-briefing-2/. We are also working with the local community on</p>

				opportunities to activate FDOT-owned parcels for community use and landscaping. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide updates.
		Public Hearing Formal Speaker	Absolutely. Hey, everybody. My name is Chris Vela. I'm in the area of potential effect. That's 33605 in Tampa. I'm going to start off with a statement. In the actual report, in the analysis that justified this project, TB Next quotes, "It is unlikely to effect children or older adults or the disabled once it opens if they do not use the interstate." So right off the bat this project is being unfair and discriminatory towards anybody that has issues with driving. Folks, this is a federal facility. So the government is basically shutting you down having any access to it, but let's just kind of step back here. Now, in all of these reports it was stated in there in black-and-white that Transit, the program that was used to determine the impacts in my neighborhood, in Ybor City, in all of our CRAs, that program can't determine the local impacts. FDOT has no clue what's going to happen economically in our communities. What we have seen since the 1960s is a ton of properties have lost value. We've seen a lot of our streets become a servicing highway system. We've seen a lot of vision zero issues, especially on streets that are serving the interstate system and it's completely uncalled for. We were promised to get high speed rail and now we're not going to get that anymore. Everything that FDOT is trying to offer, and even the feds are trying to offer us, is concessions. It's just putting up walls in the neighborhood, sound walls. In my community, we are well-connected. We run on a grid and so what we got in the 1960s were grassy berms, right? And then as we saw more streets become servicing the interstate, we	<p>FDOT intends to collect tolls electronically through its SunPass System. SunPass transponders are available for purchase at over 3,100 retail locations in Florida as well as all Turnpike service plazas, Turnpike gas stations, SunPass Service Centers, select Florida Welcome Centers, Visitor Centers, Rest Areas, and select County Tax Collector's Offices. They can also be purchased online at the SunPass website: https://www.sunpass.com/en/home/index.shtml and at local Publix with a credit/rebate essentially equal to the purchase price. Further, reducing transportation costs through transportation investment would increase the region's economic productivity, raising personal income and creating new jobs. While improved access to local and proximate markets would sustain the region's competitiveness, improved highway speeds may prevent the need for businesses to invest in various solutions to increased congestion. See the TBRPC TIS SEIS Economic and Fiscal Impact Analysis Report for information. It is available at http://tampainterstatestudy.com/project-documents/</p> <p>Travelers will still be able to travel toll- free on the existing general use lanes that would be parallel to the proposed express lanes. Registered public transit, public school, and private buses are exempt from paying tolls on express lanes; buses must have a Sunpass and valid license plate. Persons with disabilities are exempt from paying tolls, if they are registered, have a Sunpass, and have valid license plate.</p> <p>In addition, FDOT understands the roads are only one part of the equation. Outside of these interstate/roadway-related transit opportunities, FDOT has funded \$214 million in transit projects</p>

			<p>had sound walls or interstate walls that are put up and divided our neighborhoods.</p> <p>Westshore is getting reconnected. They are not in a CRA. They are actually getting connections on service roads. FDOT has not even remotely, like, offered that to us. And so here is an area that has higher demographics that is predominantly white versus an area like mine where we have a lot of cultural Europeans, blacks, Hispanics, everyone, and we're not getting any connection at all. We're actually just getting more expansion of the interchange system itself. We are dealing with an inordinate amount of lights, air pollution. And if you can go on our County maps you will see that we're getting rained on with cancer risks, poor air quality, brake dust.</p> <p>FDOT says, well, if we move cars faster and faster you're going to reduce those air quality impacts. But guess what, folks, they want to put up stop lights and more stop lights on these exits and cars will slow down and I will be impacted and my life will be shortened by this project.</p> <p>I don't want this project to happen, and I say no to the entire bit of Tampa Bay Next.</p>	<p>in the past 5 years, including \$32 million in the City of Tampa, such as:</p> <ul style="list-style-type: none"> • Tampa Streetcar Modernization and Extension Studies • HART Arterial BRT Study • HART Streetcar Fare Subsidies • Downtowner • Regional Multimodal Center Studies • HART 275LX Route and Block Grants for Transit Operations • Regional Rapid Transit PD&E <p>FDOT is more than willing to partner with the local agencies on any transit project, including a study of the utilization of the CSX rail lines for premium transit service, if it is supported by the MPO as a top priority. FDOT encourages the local agencies to unite behind a plan and secure a long-term financial commitment for their portion of the capital, as well as all of the on-going operations and maintenance of the system. The local commitment is necessary to compete for federal transit funding.</p> <p>In addition, FDOT provided information at the second MPO Open House on April 30, 2019 regarding how the TIS SEIS can address health in transportation. We focused on encouraging active transportation, improving bicycle and pedestrian safety, enhancing community connectivity, and incorporating landscape and other community features. We also presented our approach to addressing air quality, water quality, and noise abatement. We are currently working with MPO staff to identify opportunities for more environmentally-friendly noise walls. Also, we presented sustainability opportunities that the TIS SEIS could take advantage of during design and construction. Materials from this open house can be accessed at: http://tampainterstatestudy.com/hillsborough-mpo-special-briefing-2/. We are also working with the local community on opportunities to activate FDOT-owned parcels for community</p>

				use and landscaping. As part of the conceptual design phase, FDOT will continue meeting with adjacent neighborhoods, organizations and MPO committees to receive input and provide updates.
Deborah	VonCannon	Public Hearing Written	As a commuter from the downtown St. Pete area to the Tampa Fairgrounds area for employment, I have driven I-275 N to I-4 E between 6 AM & 7 AM M-F and sometimes Saturdays w/wrong-way drivers on the H.F. Bridge during my commute. I would like to know these changes include safety measures to help ease or eliminate these scary and dangerous commutes.	<p>Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. The FDOT's top priority with any proposed improvements is safety. FDOT has installed wrong way driver detections that alert FDOT and law enforcement when a wrong way driver enters the Howard Frankland Bridge. The improvements being proposed as part of the SEIS will include safety measures and sufficient roadway signage to ensure drivers are aware of any new traffic patterns. The safety analysis that was conducted as part of the Draft SEIS indicated that the Locally Preferred Alternative would have fewer crashes on I-275, SR 60, and I-4 (see Section 5.5).</p> <p>FDOT is also preparing a comprehensive Transportation Management Plan, branded Safe TRIP. The Safe TRIP initiative will ensure safety and mobility through successful <u>T</u>raffic Management, <u>R</u>egional Demand Management strategies, <u>I</u>nnovation, and <u>P</u>ublic Engagement. Safe TRIP will promote transportation demand management (TDM) strategies, encourage public transit use, incorporate smart work zones, and identify proactive communication platform to provide real-time information to travelers, local community, and agency partners. that will address <u>T</u>raffic Management, <u>R</u>egional Demand, <u>I</u>nnovation: Smart Work Zone, <u>P</u>ublic Engagement. This initiative is intended to alleviate negative safety and mobility impacts related to construction.</p>
Ron	Weaver	Public Hearing Formal Speaker	Thank you very much, Kirk. And I thank your entire team for letting the public speak tonight. I rise on the occasion of two different interchanges. I think Charles Dickens wrote "A Tale of Two Cities." I rise on the occasion of two interchanges. And the first, I live here	Thank you for your comment on the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) project. The FDOT's top priority with any proposed improvements is safety for all motorists, pedestrians and bicyclists. Coordination with the City will continue through the

			<p>become a Facilitation Junction instead of a Malfunction Junction. And look on page 22 of your air pollution study where it mentions that air pollution could be reduced by the increased speeds and reduced congestion of these kinds of improvements in order to actually improve air quality in and around the downtown interchange, for which I compliment you, and your page 22 of the air pollution study and the materials we just all reviewed for the last hour.</p> <p>And finally, I rise on the occasion of making sure that those that live and work and play in the Tampa Bay region continue to have the benefit of your courage with respect to the \$1.4 billion of funding that you've obtained for the Westshore interchange, and that as you continue the funding and improvements to the downtown interchange that you'll continue to be mindful of the prevention of impacts upon additional properties, for which I commend you. Thank you. My time is up.</p>	
C.W.	Whitehead	Email	I support the recommended build alternative. Additional capacity is needed on I-275 between the downtown interchange and Bearss Ave. I do not support the Boulevard Concept.	Thank you for your comment
		Email	I support adding roadway capacity to all of the limited access roadways in Hillsborough County and the maximum Build Out design for the I-275/I-4 Interchange.	Thank you for your comment
Alexandra	Wolfe	Email	Although the information I am getting is not clear, I live in the Westshore Palms neighborhood and do not think rerouting traffic onto Trask is a safe or viable solution to the traffic problems. Westshore Palms is a RESIDENTIAL neighborhood with lots of pedestrian traffic. The project will almost certainly result in casualties. I also have serious concerns about the lack	The FDOT's mission is to provide a safe transportation system that ensures the mobility of people and goods, enhances economic prosperity, and preserves the quality of our environment and communities. The FDOT works to provide a transportation network that is well planned, supports economic growth, and has the goal of being congestion and fatality free.

			<p>of communication to the neighborhood and lack of information available that shows what the plans are. In addition, the expansion of the highway all the way up to Carmen is going to create such a volume of noise from the highway traffic that another solution needs to be found.</p>	<p>Public involvement has been an essential role from the initiation of the TIS SEIS project and TBNext program. The TIS SEIS included various opportunities for the public to become engaged with the study through a number of methods. To facilitate public outreach activities, FDOT used various public involvement techniques to reach the public. Public outreach techniques included: public meetings/workshops, Community Working Group meetings, webinars, participation in community events, distribution of project newsletters/email blasts, presentations to Metropolitan Planning Organizations boards and committees, presentations to Community Redevelopment Areas (boards and committees), maintenance of a project website, telephone hotline, and meetings with small groups such as homeowner associations, business and stakeholder groups and community organizations. Chapter 9 of the SEIS and the TIS SEIS Comments and Coordination Reports describes the main public involvement efforts and events that have been held to date and the public outreach elements that are ongoing for the study. The documents can be found on the TIS Project website at: http://tampainterstatestudy.com/project-documents/</p> <p>Specific to Westshore Palms, the DOT has been attending Westshore Palms Neighborhood Association meetings throughout the years at project major milestones to receive input and provide project updates. Most recently, the DOT has attended meetings to share information on 10/6/2016, 5/3/2018, and 3/5/2020.</p> <p>Tampa Bay is growing rapidly. The Westshore area has two major projects, Westshore Mall redevelopment and Midtown planned to open in 2021 and several new smaller projects. In addition, Westshore Palms and North Bon Air have seen a substantial increase in condo and multifamily complexes. With limited north-south roads, east-west roads will become more backed up, as Gray onto Lois Ave does today. FDOT is working in coordination with the City of Tampa on improvements to local</p>

				<p>streets in the Westshore Area. Reconnecting Reo Street, Occident Street and Trask Street under I-275 will allow for better traffic circulation in the Westshore area. Coordination with the City will continue through the next phase of the project, the conceptual design phase, focusing on local road connections, bicycle, pedestrian, and trail connections; interstate underpasses; and landscape/irrigation, hardscape, and public art opportunities. These conversations include consideration of traffic calming and other techniques to enhance safety and bicycle/pedestrian/vehicle interactions. Where feasible, the project aims to provide trail connectivity throughout the interstate corridor from the Howard Frankland Bridge through Westshore/West Tampa to Downtown Tampa/Riverwalk/Tampa Heights Greenway and beyond to Ybor City, including enhanced safety measures within the corridor for bikes and pedestrians.</p> <p>As a result of public comment, the right turn lane from the Westshore on-ramp to Trask Street (eastbound to southbound movement) has now been eliminated which will reduce unnecessary traffic on Trask Street. This modification is now part of the Locally Preferred Alternative (LPA). A description of the LPA can be found in Section 2.4 of the SEIS. FDOT will continue to work with the City of Tampa to achieve better traffic circulation on local streets while maximizing safety enhancements.</p>
Roger	Wood	Email	Tolled express lanes are critical to the success of this project. Tolled express lanes enable FDOT to fund this project and other important District 7 projects.	Thank you for your comment
Dan	Woodward	Email	We appreciate the outreach and opportunity for comment provided by FDOT on this critical infrastructure project for Tampa. My primary concern is the planned construction staging area to be located on the current Doubletree Hotel site at the SE corner of Trask and W. Cypress St. As the owner and manager of four buildings totaling 650,000 square feet of office space in immediate proximity to this property,	To date, no decisions have been made concerning the construction staging areas and the Design-Build Contractor ultimately is responsible for identifying feasible sites. Throughout the concept design phase, FDOT will be evaluating potential constructability issues and how to address them. Your request for consideration of alternative locations for construction staging has been noted.

			Highwoods remains concerned about the long-term impacts to our 80+ companies' ability to operate effectively during the staging of this project. In addition, given the loss of the current revenue stream provided to FDOT by the ongoing operations of the Doubletree, as well as the primary intended use of this site for the Westshore Intermodal Center as opposed to a construction staging area, I respectfully request you consider alternate locations for construction staging of this important project.	
Lauren Deborah Michelle Michael Emily Elizabeth Gregory Susan Jennifer Marcea Jose Nilesh Kelly Debbie Melanie Jennifer Steve Ashleigh Deborah Luis Fernando Cynthia Elinor Lynne Glenn	Adriaansen Anderson Barron Bonassar Burleson Corwin Gall Greenbaum Hart Hennecke Hernandez Kapadia Karman King Lachs Leon McFarland McGuire Melendez Pabon Perez Peters Price Price Reihing	Email	I live in Tampa Bay, and I object to FDOT's Tampa Bay Next plans (TIS Segments 1A, 2A, 2B, 3A, and 3B - also referred to as Tampa Bay Next Sections 4, 5, and 6) to widen the interstate and add exits that dump more single occupancy vehicle traffic on to our urban core street grid. Instead of perpetuating the same expansion of I-275 & I-4, we need a plan that tackles the real reasons behind the terrible traffic in our area. We have insufficient public transit, unsafe bike lanes and sidewalks. Your solution will only increase air pollution in nearby neighborhoods, overwhelm Ybor City with traffic and prevent this community from improving safety and achieving Vision Zero goals. FDOT should listen to the public, which has said our locally preferred alternative is "No Build/No Further Action" and reject this plan for the I-275 & I-4 interchange. Instead, create a real comprehensive approach, including high capacity mass transit, that the residents of the Tampa Bay area deserve.	The Tampa Interstate Study (TIS), as the name would indicate, is a plan for the interstate modernization within Tampa's urban core. Within the TIS, FDOT has accommodated transit in several ways, such as providing a transit envelope and multimodal centers, and allowing public buses to utilize the express lanes toll-free. FDOT is also looking at ways to accommodate bus on shoulder, transit signal priority on adjacent state roads, and incentivizing transit, particularly during construction. FDOT understands the roads are only one part of the question. Outside of these interstate/roadway-related transit opportunities, FDOT has funded \$214 million in transit projects in the past 5 years, including \$32 million in the City of Tampa, such as: - Tampa Streetcar Modernization and Extension Studies - HART Arterial BRT Study - HART Streetcar Fare Subsidies - Downtowner - Regional Multimodal Center Studies - HART 275LX Route and Block Grants for Transit Operations - Regional Rapid Transit Project Development & Environment Study FDOT is more than willing to partner with the local agencies on any transit project, including a study of the utilization of the CSX

1 MR. BOGEN: Good evening. Welcome to the Public
2 Hearing for the Tampa Interstate Study, or TIS,
3 Supplemental Environmental Impact Statement, or SEIS.
4 This Project Development & Environment Study, or
5 PD&E Study, encompasses improvements to Interstate 275,
6 or I-275, from the Howard Frankland Bridge to north of
7 Dr. Martin Luther King Junior Boulevard and Interstate 4,
8 or I-4, from I-275 to east of 50th Street. The Work
9 Program Item, or WPI, Segment Number is 258337-2.

10 My name is Kirk Bogen and I am the Environmental
11 Management Engineer for District 7 of the Florida
12 Department of Transportation, or FDOT.

13 Today is Tuesday, February 25, 2020, and it is
14 approximately 6:00 p.m. We are assembled at the Dale
15 Mabry Campus of Hillsborough Community College in the
16 Student Services Building located at 4001 West Tampa Bay
17 Boulevard in Tampa, Florida.

18 FDOT District 7 is conducting the hearing this
19 evening to provide you with an opportunity to discuss the
20 project and to submit comments on this PD&E Study.
21 Public participation is encouraged and solicited without
22 regard to race, color, religion, sex, age, national
23 origin, disability, or family status.

24 This Public Hearing is being held and was
25 advertised in accordance with applicable Federal and

1 State requirements as shown on the citation board
2 located next to the sign-in table and is being conducted
3 in accordance with the Americans With Disabilities Act
4 of 1990. This information is also provided in the
5 project brochure you may have received in the mail or can
6 be found at the sign-in table.

7 This Public Hearing is being conducted on two
8 separate dates this week to allow for maximum
9 participation. The format of each of the two hearing
10 sessions and the information presented are identical.
11 Both sessions will be combined into a single Public
12 Hearing record for the PD&E Study.

13 The first session is tonight, the 25th day of
14 February 2020, from 5:00 p.m. to 7:30 p.m. at the Dale
15 Mabry Campus of Hillsborough Community College in Tampa,
16 Florida.

17 The second session will be held on Thursday,
18 February 27th, 2020 from 5:00 p.m. to 7:30 p.m. at the
19 Port Tampa Bay Cruise Terminal #6 located at 1331 McKay
20 Street in Tampa, Florida.

21 This is your opportunity to receive information on
22 the Recommended Locally Preferred Alternative of the
23 Tampa Interstate Study Supplemental Environmental Impact
24 Statement PD&E Study and officially provide your comments
25 to be included in the Public Hearing record. The

1 proposed improvements of the Locally Preferred
2 Alternative are based on environmental and engineering
3 analyses completed to date, as well as public comments
4 that have been received throughout the study. Results
5 of the social, cultural, natural, and physical
6 environmental analyses, documenting potential impacts,
7 are contained in the documents on display here tonight
8 and are available on the project website. Staff are
9 available to answer questions regarding these reports.

10 The proposed project would include full
11 reconstruction of the Westshore area Interchange to
12 encompass three general purpose lanes and two new tolled
13 express lanes in each direction, connecting the Howard
14 Frankland Bridge and Westshore area to downtown Tampa
15 along I-275. The tolled express lanes would be
16 constructed to the inside of the roadway. Additionally,
17 a transit corridor in the median would be preserved to
18 accommodate future transit.

19 The tolled express lanes would provide direct
20 connections from I-275 to other major transportation
21 facilities and extend to Ashley Drive/Tampa Street via
22 direct connect ramps, providing drivers direct access to
23 and from downtown Tampa. These express lanes do not
24 continue through the I-275/I-4 interchange. In the
25 I-275/I-4 interchange area, the proposed improvements

1 would enhance safety and traffic operations by widening
2 the ramps and eliminating the existing weaving condition.
3 Access to Floribraska Avenue would be maintained.

4 Overall, the proposed project would upgrade the
5 safety and efficiency of the existing I-275 and I-4
6 corridors that service the Tampa Bay region while
7 maintaining access to the surrounding community.

8 Now I am going to give you some information about
9 right-of-way acquisition and how you can make comments
10 on the project. On projects such as this, one of the
11 unavoidable consequences is the necessary acquisition
12 of properties and the relocation of families and
13 businesses.

14 As shown on the concept plans on display at today's
15 hearing, additional right-of-way will be needed for the
16 Locally Preferred Alternative. For this project, we
17 anticipate the relocation of 6 residences and 22
18 businesses. All right-of-way acquisition will be
19 conducted in accordance with Florida Statute 339.09 and
20 the federal Uniform Relocation Assistance and Real
21 Property Acquisition Policies Act of 1970, commonly
22 known as the Uniform Act.

23 If you are required to make any type of move as a
24 result of a Department of Transportation project, you can
25 expect to be treated in a fair and helpful manner and in

1 compliance with the Uniform Relocation Assistance Act.
2 If a move is required, you will be contacted by an
3 appraiser who will inspect your property. We encourage
4 you to be present during the inspection and provide
5 information about the value of your property.

6 You may also be eligible for relocation advisory
7 services and payment benefits. If you are being moved
8 and you are unsatisfied with the Department's
9 determination of your eligibility for payment or the
10 amount of that payment, you may appeal that
11 determination.

12 You will be promptly furnished necessary forms
13 and notified of the procedures to be followed in making
14 that appeal.

15 A special word of caution: If you move before you
16 receive notification of the relocation benefits that you
17 might be entitled to, your benefits may be jeopardized.

18 The acquisition and relocation specialists who are
19 supervising this program are Paul Maddox and Susan
20 Cooper. They will be happy to answer your questions and
21 will also furnish you with copies of relocation
22 assistance brochures.

23 Paul and Susan, please stand so that anyone who is
24 involved in acquisition and relocation on this project
25 will know who they need to see regarding their property.

1 Thank you.

2 When you arrived this evening, you should have
3 received a copy of the project brochure. If you were not
4 able to sign in or did not receive the brochure, please
5 stop by our sign-in table before leaving this evening.
6 If you have not already done so, please feel free to
7 watch the presentation that is running continuously at
8 the Public Hearing tonight in the adjacent room. It
9 describes the Recommended Locally Preferred Alternative
10 of the Tampa Interstate Study Supplemental Environmental
11 Impact Statement PD&E Study in greater detail.

12 Before I continue, I would like to recognize any
13 elected officials or their representatives who are here
14 tonight. Please stand and introduce yourself for the
15 record.

16 Anyone desiring to make a statement or present
17 written views and/or exhibits regarding the location;
18 conceptual design; or social, economic, and/or
19 environmental effects of the project will now have an
20 opportunity to do so.

21 You may also make a statement at the Public
22 Hearing's second session scheduled for Thursday,
23 February 27, 2020 at Port Tampa Bay Cruise Terminal #6
24 in Tampa, Florida.

25 Those who wish to provide comments during this

1 formal portion of the Public Hearing should complete a
2 speaker's card and submit it to a Department
3 representative.

4 If you did not receive a speaker's card and would
5 like to make a public comment, please raise your hand
6 and an FDOT representative will be happy to provide you
7 with one.

8 In addition to making an oral statement during this
9 portion of the hearing, you can also make a comment to
10 the court reporters here tonight after this formal
11 portion of the Public Hearing. You may also submit your
12 comments to FDOT in writing. Comment forms can be placed
13 in one of the comment boxes this evening, or you can
14 complete the form at a later time and mail it to us at
15 the preprinted address on the back of the form. You may
16 also submit comments to us electronically either by
17 email or from the project website at the addresses found
18 on the front of the project brochure. Please keep in
19 mind that comments must be postmarked or emailed no later
20 than Thursday, March 12, 2020 to be included in the
21 official Public Hearing record.

22 At this time, we will begin taking public comments.
23 I will call each speaker in the order in which the
24 speaker card was received. Please limit your comments to
25 the Tampa Interstate Study Supplemental Environmental

1 Impact Statement PD&E Study and keep them to three
2 minutes in order to allow everyone an opportunity to
3 speak.

4 Those who wish to provide additional comments may
5 return to the microphone following the last speaker, if
6 time permits, or you may present additional comments
7 directly to the court reporters at the end of the formal
8 portion of tonight's hearing.

9 As I call your name, please step to the microphone
10 and state your name and address clearly into the
11 microphone before making your comment so the court
12 reporter can capture that information.

13 If you represent an organization, municipality, or
14 other public agency, please provide that information as
15 well. If you have questions, please see one of the FDOT
16 representatives following this portion of the hearing.

17 The first speaker is Ron Weaver. Please come to
18 the microphone.

19 MR. WEAVER: Thank you very much, Kirk. And I
20 thank your entire team for letting the public speak
21 tonight.

22 I rise on the occasion of two different
23 interchanges. I think Charles Dickens wrote "*A Tale of*
24 *Two Cities*." I rise on the occasion of two interchanges.
25 And the first, I live here in Westshore here; and the

1 second, I work downtown. And therefore, I've watched
2 these interchanges since the 1989 interstate study,
3 and I would respectfully hope that you would continue to
4 please save us from the very dangerous weaving that
5 occurs in the downtown interchange and that we change
6 the name of that Malfunction Junction to an Invitation
7 Junction and to a Facilitation Junction to connect our
8 region as we must with work and play and every other way
9 that this region needs its connectivity for 126 million
10 in tourism and each one of us.

11 And I therefore encourage you to continue with
12 your preferred alternative, but be mindful please of the
13 14th Street concerns, with respect to the concerns
14 expressed by neighbors, with respect to the dangers of
15 cut-through traffic in order to facilitate that much
16 needed safety of having that additional connection with
17 14th Street, but to please consider aesthetics and
18 safety, any kind of amelioration that can be made with
19 respect to cut-through traffic wherever possible.

20 But the same concern about the second of this tale
21 of two interchanges, which is the Westshore interchange,
22 that not only connectivity be a change in Westshore for
23 which I thank you wholeheartedly, and thank you -- again,
24 I lived in South Westshore North Beach Park -- I thank
25 you for the connectivity of Westshore. It's long needed,

1 desperately needed, but please be sensitive to the
2 aesthetics and the safety and the prevention of
3 cut-through traffic with respect to not just the DOT
4 properties, but properties nearby and the funding sources
5 to enable the aesthetics and the safety and the
6 prevention of cut-through traffic wherever possible
7 with respect to Reo, Trask and Occident, with respect
8 to the second interchange, with respect to Westshore
9 before us.

10 I then turn to the downtown interchange, that it
11 might become a Facilitation Junction instead of a
12 Malfunction Junction. And look on page 22 of your air
13 pollution study where it mentions that air pollution
14 could be reduced by the increased speeds and reduced
15 congestion of these kinds of improvements in order to
16 actually improve air quality in and around the downtown
17 interchange, for which I compliment you, and your page
18 22 of the air pollution study and the materials we just
19 all reviewed for the last hour.

20 And finally, I rise on the occasion of making sure
21 that those that live and work and play in the Tampa Bay
22 region continue to have the benefit of your courage with
23 respect to the \$1.4 billion of funding that you've
24 obtained for the Westshore interchange, and that as you
25 continue the funding and improvements to the downtown

1 interchange that you'll continue to be mindful of the
2 prevention of impacts upon additional properties, for
3 which I commend you.

4 Thank you. My time is up.

5 MR. BOGEN: Thank you, Mr. Weaver, for your
6 comment.

7 The next speaker is Gary Reckart.

8 MR. RECKART: My name is Gary Reckart, and I live
9 at 4006 North Marguerite Street in Tampa. I have lived
10 here since 1989.

11 The interstate study plan has been ongoing since at
12 least 1985, 35 years ago, and has included my property
13 among those to be acquisitioned for a storm water pond,
14 and this has been in the TIS for all of these years, 35
15 years. And because of that, my property's been
16 blacklisted and I have not been able to sell it at all
17 because everyone who does the research on it says it's
18 going to be taken so we don't want to buy it. The pond
19 site was needed to minimize the environmental impact of
20 Hillsborough River.

21 The SEIS, otherwise called the Supplemental
22 Environmental Impact Statement, tonight as being
23 presented does not contain protection for Hillsborough
24 River with the storm water runoff. The pond site was
25 identified in Option A-ALT-1 and Option B-ALT-1, and now

1 you've slipped in an alternative E and A, B, C and D
2 don't exist anymore and I've only learned of this just,
3 like, a month ago.

4 So the conceptual plan, according to Kristen
5 Carson, last May she said to me in an email:

6 *"We have a conceptual pond design, but we're*
7 *waiting on the final approval of the SEIS by late 2020."*

8 I recently have been informed by the FDOT that
9 the pond site for 35 years has been removed from the
10 project and the Supplemental Environmental Impact
11 Statement is being revised, and now you're slipping in
12 an alternative E, and all we've been dealing with for
13 the last three years is A, B, C and D. And so I'm
14 confused about that. I'm confused about that it's going
15 to take -- Hillsborough River has already been designated
16 as an environmentally impaired river by Florida EPA and
17 SWFWMD. This means the river is suffering a slow
18 environmental death where thousands of fish and wildlife
19 are impacted, caused jointly by the City of Tampa and
20 FDOT dumping poisonous storm water into it.

21 Since 1966, FDOT has been diverting millions of
22 gallons of toxic storm water from I-275 into Hillsborough
23 River through large concrete pipes. They have not built
24 a single storm water pond from I-4 north on I-275 to
25 Hillsborough River.

1 As a citizen of Seminole Heights for the last --
2 since 1966, and believing in protecting the environment,
3 I am demanding that this SEIS be rejected until it
4 includes pond sites every mile from I-4 north to Bearss
5 Avenue, and I demand that the EPA and SWFWMD not grant
6 any permits until this problem has been addressed.

7 MR. BOGEN: Thank you, Mr. Reckart, for your
8 comment.

9 Is there anyone else who would like to make a
10 statement?

11 The Public Hearing transcript, written statements,
12 exhibits and reference materials will be available for
13 public inspection within three weeks at the FDOT
14 District 7 office located at 11201 North McKinley Drive,
15 Tampa, Florida.

16 It is approximately 6:21 p.m. I hereby officially
17 suspend the formal portion of the Public Hearing for the
18 Tampa Interstate Study Supplemental Environmental Impact
19 Statement PD&E Study.

20 This hearing will be continued at the second
21 session on Thursday, February 27, 2020, from 5:00 p.m.
22 to 7:30 p.m. at the Port Tampa Bay Cruise Terminal #6 in
23 Tampa, Florida.

24 You may continue to view the materials on display
25 and speak with our project staff.

1 On behalf of the Florida Department of
2 Transportation, thank you for attending.

3 Remember to be alert today, alive tomorrow.
4 Safety doesn't happen by accident.

5 Good night and thank you for your time.

1
2 Neal Suarez
3 3210 West La Salle Street
4 Tampa, Florida 33607

5 MR. SUAREZ: Hello, this is Neal Suarez.

6 I live at 3210 West La Salle Street. My complaint is a
7 noise barrier wall. You can see the semi trucks right
8 out the front door. The address is 3210 West La Salle
9 Street.

10 I was told that the section from MacDill west to
11 Himes was cut off from funds. Would like also an
12 improvement, and maybe putting up a nice wall where the
13 gate is.

14 Basically, if we can get the barrier wall for the
15 noise ten feet higher, that'd be the cat's meow.

16 Thank you for your time and your
17 consideration.

1 Beatrix Rahms
2025 Edgewater Drive, #9
2 Clearwater, Florida 33755

3
4 MS. RAHMS: My name is Beatrix Rahms.
5 2025 Edgewater Drive, Clearwater, Florida.

6 I have a property on Memorial Highway, commercial
7 building, and I just want to -- I was suggested to come
8 here to ask for a formal statement to receive a letter
9 saying that my building is not affected by the
10 improvements of the roadways, because we're also
11 currently trying to sell the building. So I'd like to
12 put the information on the building so people don't get
13 upset, just in case.

14 Thank you.

1 Neal Suarez
2 3210 West La Salle Street
3 Tampa, Florida 33607

4 MR. SUAREZ: This is Neal Suarez. My address is
5 3210 West La Salle Street, Tampa, Florida, 33607. I'm
6 located between MacDill and Himes Avenue.

7 I'm requesting a noise study, especially between
8 Matanzas and Lincoln Avenue. There is noise between
9 MacDill west to Himes Avenue. Especially, my house,
10 because I see the big 18-wheeler trucks above the wall.

11 Thank you for your time. You can email me at
12 nfsuarez@gmail.com.

1 * * * * *

2 MR. BOGEN: Good evening. Welcome to the Public
3 Hearing for the Tampa Interstate Study, or TIS,
4 Supplemental Environmental Impact Statement, or SEIS.
5 This Project Development & Environment Study, or PD&E
6 Study, encompasses improvements to Interstate 275, or
7 I-275, from the Howard Frankland Bridge to north of
8 Dr. Martin Luther King Junior Boulevard and Interstate 4,
9 or I-4, from I-275 to east of 50th Street. The Work
10 Program Item, or WPI, Segment Number is 258337-2.

11 My name is Kirk Bogen and I am the Environmental
12 Management Engineer for District 7 of the Florida
13 Department of Transportation, or FDOT.

14 Today is Thursday, February 27, 2020, and it is
15 approximately 6:00 p.m. We are assembled at Port Tampa
16 Bay Cruise Terminal #6 at 1331 McKay Street in Tampa,
17 Florida.

18 FDOT District 7 is conducting the hearing this
19 evening to provide you with an opportunity to discuss the
20 project and to submit comments on this PD&E Study.
21 Public participation is encouraged and solicited without
22 regard to race, color, religion, sex, age, national
23 origin, disability, or family status.

24 This Public Hearing is being held and was
25 advertised in accordance with applicable Federal and

1 State requirements as shown on the citation board
2 located next to the sign-in table and is being conducted
3 in accordance with the Americans With Disabilities Act of
4 1990. This information is also provided in the project
5 brochure you may have received in the mail or can be
6 found at the sign-in table.

7 This Public Hearing is being conducted on two
8 separate dates this week to allow for maximum
9 participation. The format of each of the two hearing
10 sessions and the information presented are identical.
11 Both sessions will be combined into a single Public
12 Hearing record for the PD&E Study.

13 The first session was held on Tuesday, February
14 25th, 2020 from 5:00 p.m. to 7:30 p.m. at the Dale Mabry
15 Campus of Hillsborough Community College in the Student
16 Services Building located at 4001 East Tampa Bay
17 Boulevard in Tampa, Florida.

18 The second session is being conducted tonight,
19 Thursday, February 27th, 2020, from 5:00 p.m. to
20 7:30 p.m. at the Port Tampa Bay Cruise Terminal #6
21 located in Tampa, Florida.

22 This is your opportunity to receive information on
23 the Recommended Locally Preferred Alternative of the
24 Tampa Interstate Study Supplemental Environmental Impact
25 Statement PD&E Study and officially provide your comments

1 to be included in the Public Hearing record. The
2 proposed improvements of the Locally Preferred
3 Alternative are based on environmental and engineering
4 analyses completed to date, as well as public comments
5 that have been received throughout the study. Results
6 of the social, cultural, natural, and physical
7 environmental analyses, documenting potential impacts,
8 are contained in the documents on display here tonight
9 and are available on the project website. Staff are
10 available to answer questions regarding these reports.

11 The proposed project would include full
12 reconstruction of the Westshore area Interchange to
13 encompass three general purpose lanes and two new tolled
14 express lanes in each direction, connecting the Howard
15 Frankland Bridge and Westshore area to downtown Tampa
16 along I-275. The tolled express lanes would be
17 constructed to the inside of the roadway. Additionally,
18 a transit corridor in the median would be preserved to
19 accommodate future transit.

20 The tolled express lanes would provide direct
21 connections from I-275 to other major transportation
22 facilities and extend to Ashley Drive/Tampa Street via
23 direct connect ramps, providing drivers direct access to
24 and from downtown Tampa. These express lanes do not
25 continue through the I-275/I-4 interchange. In the

1 I-275/I-4 interchange area, the proposed improvements
2 would enhance safety and traffic operations by widening
3 the ramps and eliminating the existing weaving condition.
4 Access to Floribraska Avenue would be maintained.

5 Overall, the proposed project would upgrade the
6 safety and efficiency of the existing I-275 and I-4
7 corridors that service the Tampa Bay region while
8 maintaining access to the surrounding community.

9 Now I am going to give you some information about
10 right-of-way acquisition and how you can make comments
11 on the project. On projects such as this, one of the
12 unavoidable consequences is the necessary acquisition
13 of properties and the relocation of families and
14 businesses.

15 As shown on the concept plans on display at today's
16 hearing, additional right-of-way will be needed for the
17 Locally Preferred Alternative. For this project, we
18 anticipate the relocation of 6 residences and 22
19 businesses. All right-of-way acquisition will be
20 conducted in accordance with Florida Statute 339.09 and
21 the federal Uniform Relocation Assistance and Real
22 Property Acquisition Policies Act of 1970, commonly
23 known as the Uniform Act.

24 If you are required to make any type of move as a
25 result of a Department of Transportation project, you can

1 expect to be treated in a fair and helpful manner and in
2 compliance with the Uniform Relocation Assistance Act.
3 If a move is required, you will be contacted by an
4 appraiser who will inspect your property. We encourage
5 you to be present during the inspection and provide
6 information about the value of your property.

7 You may also be eligible for relocation advisory
8 services and payment benefits. If you are being moved
9 and you are unsatisfied with the Department's
10 determination of your eligibility for payment or the
11 amount of that payment, you may appeal that
12 determination.

13 You will be promptly furnished necessary forms
14 and notified of the procedures to be followed in making
15 that appeal.

16 A special word of caution: If you move before you
17 receive notification of the relocation benefits that you
18 might be entitled to, your benefits may be jeopardized.

19 The acquisition and relocation specialists who are
20 supervising this program are Paul Maddox and Yemile
21 Hernandez. They will be happy to answer your questions
22 and will also furnish you with copies of relocation
23 assistance brochures.

24 Paul and Yemile, please stand so that anyone who is
25 involved in acquisition and relocation on this project

1 will know who they need to see regarding their property.
2 Thank you.

3 When you arrived this evening, you should have
4 received a copy of the project brochure. If you are not
5 able to sign in or did not receive the brochure, please
6 stop by our sign-in table before leaving this evening.
7 If you have not already done so, please feel free to
8 watch the presentation that is running continuously at
9 the Public Hearing tonight in the adjacent room. It
10 describes the Recommended Locally Preferred Alternative
11 of the Tampa Interstate Study Supplemental Environmental
12 Impact Statement PD&E Study in greater detail.

13 Before I continue, I would like to recognize any
14 elected officials or their representatives who are here
15 tonight. Please stand and introduce yourself for the
16 record.

17 Anyone desiring to make a statement or present
18 written views and/or exhibits regarding the location;
19 conceptual design; or social, economic, and/or
20 environmental effects of the project will now have an
21 opportunity to do so.

22 Those who wish to provide comments during this
23 formal portion of the Public Hearing should complete a
24 speaker's card and submit it to a Department
25 representative.

1 If you did not receive a speaker's card and would
2 like to make a public comment, please raise your hand
3 and an FDOT representative will be happy to provide you
4 with one.

5 In addition to making an oral statement during this
6 portion of the hearing, you can also make a comment to
7 the court reporters here tonight after this formal
8 portion of the Public Hearing. You may also submit your
9 comments to FDOT in writing. Comment forms can be placed
10 in one of the comment boxes this evening, or you can
11 complete the form at a later time and mail it to us at
12 the preprinted address on the back of the form. You may
13 also submit comments to us electronically either by
14 email or from the project website at the addresses found
15 on the front of the project brochure. Please keep in
16 mind that comments must be postmarked or emailed no later
17 than Thursday, March 12, 2020 to be included in the
18 official Public Hearing record.

19 At this time, we will begin taking public comments.
20 I will call each speaker in the order in which the
21 speaker card was received. Please limit your comments to
22 the Tampa Interstate Study Supplemental Environmental
23 Impact Statement PD&E Study and keep them to three
24 minutes in order to allow everyone an opportunity to
25 speak.

1 Those who wish to provide additional comments may
2 return to the microphone following the last speaker, if
3 time permits, or you may present additional comments
4 directly to the court reporters at the end of the formal
5 portion of tonight's hearing.

6 As I call your name, please step to the microphone
7 and state your name and address clearly into the
8 microphone before making your comment so the court
9 reporter can capture that information.

10 If you represent an organization, municipality or
11 other public agency, please provide that information as
12 well. If you have questions, please see one of the FDOT
13 representatives following this portion of the hearing.

14 The first speaker is Karen Jaroch. Please come to
15 the microphone.

16 MS. JAROCH: Hello. My name is Karen Jaroch and I
17 live at 16501 East Course Drive in Tampa. And my work
18 has me frequently in Pinellas and Brandon. I live in the
19 northwest part of the County. I'm a regular user of
20 I-275. I get on at Bearss Avenue to access I-4 and to
21 get usually to the Selmon Connector as well. I also
22 travel down Veterans Expressway so I travel down segments
23 2B, 3A, 3B and 1A.

24 I propose that the changes proposed today will
25 decrease the travel time making it more efficient and

1 make my trips much safer for me and my family.

2 I'm in favor of the Locally Preferred Alternative
3 for all segments in the study. The changes to 2B, a/k/a
4 Malfunction Junction, will help alleviate the crash-prone
5 standstill that we encounter when we get to the on ramp
6 to I-4 from southbound I-275.

7 I especially like the off ramp from I-4 at the 14th
8 Street exit as it will reduce the number of cars I have
9 to compete with when I need to weave over to the Selmon
10 Connector that gives me about 60 seconds to weave over
11 three lanes and it's very dangerous in the congested
12 traffic.

13 On my return I'll see ease in the difficulty of
14 weaving from one side of westbound I-4 to the other side
15 of westbound I-4 as I enter from the Selmon Connector and
16 have to quickly maneuver to get to the northbound I-275
17 ramp. The length and approach will be very helpful.

18 I travel south on Veterans's Expressway often as
19 well, which is my route to Pinellas, and it empties right
20 into I-275 southbound direction, and the transition near
21 the airport will be very helpful here.

22 The return trip is frequently bogged down by a
23 limited capacity of a single lane on ramp so I'm very
24 pleased that the Locally Preferred Alternative will add a
25 lane there.

1 I fully endorse the Locally Preferred Alternative
2 for all segments as presented today at this hearing.

3 Thank you.

4 MR. BOGEN: Thank you for your comment.

5 Our next speaker is Doug Jesseph.

6 MR. JESSEPH: Hello. Doug Jesseph, J-E-S-S-E-P-H,
7 6007 Suwanee Avenue, Tampa, representing the Old Seminole
8 Heights Neighborhood Association.

9 I'm here to object to the economic impact analysis
10 and the SEIS, in particular. I take issue with its
11 incoherent prosthetic accounting and its preposterous
12 projections for economic benefit. The most obvious
13 shortcoming in its approach is that the only cost it
14 considers is the dollar price of expanding interstates.
15 No mention is made of the well-known economic down sides
16 associated with urban interstates. They turn otherwise
17 useful property into concrete monoscapes.

18 Study after study has shown quite conclusively
19 that urban interstates yield no net economic gain because
20 they impose gigantic economic burdens. But this study
21 conveniently overlooks these well-established facts and
22 proceeds as if the only cost to be recovered is the money
23 spent on construction.

24 Furthermore, the study makes no provision for the
25 delays to construction imposed. The authors confidently

1 assert "Congestion most directly affects the count of
2 productivity," and that the relief of congestion is the
3 principal economic benefit to be derived from the planned
4 expansion.

5 But apparently by magic the construction process
6 with its orange cones, lane closings and traffic
7 diversions is assumed to have zero impact on time spent
8 in congestion.

9 Worse still, the study falsely assumes that
10 expanding the interstate will improve traffic flow and
11 will thereby generate economic benefits.

12 However, we already know that adding lanes to
13 heavily traveled interstates does nothing to ease
14 congestion or reduce accidents. In the history of
15 pavement, no such scheme has succeeded.

16 Again, the literature on this point is voluminous,
17 but FDOT ignores it. Their model factors in imaginary
18 increases in average freeway speed to yield to the
19 conclusion that the misnamed "operational improvements"
20 will enhance the local economy, but there is no reason to
21 believe that the project will ease congestion and an
22 excellent reason to believe that it will fail.

23 In case you do not share my skepticism on this
24 point, I remind you that from 2002 to 2006, FDOT spent
25 over \$100 million dollars on operational improvements to

1 now Malfunction Junction. In the words of FDOT spokesman
2 John McCaffrey, the project would, "put more function
3 into that junction."

4 The result was the infamous flyover ramp linking
5 I-275 southbound traffic onto I-4 east. As we know,
6 every nickle of that expenditure was wasted and no
7 traffic improvements followed.

8 Nevertheless, the clown posse is back using the
9 same failed economic model and the same false assumptions
10 promising that this time for sure something good will
11 come from expanding the local interstate contrary to all
12 available evidence.

13 I am a professor by trade. I hand out grades for a
14 living. The economic analysis here rates an F.

15 Thank you.

16 MR. BOGEN: Thank you for your comment.

17 Our next speaker is Dave Sobush.

18 MR. SOBUSH: Good evening. Dave Sobush, 4300 West
19 Cypress Street, Tampa. On behalf of the more than 40
20 member companies of the Tampa Bay Partnership, I rise to
21 voice support for the Locally Preferred Alternative
22 proposed by the Florida Department of Transportation
23 District 7 and the improvements identified for segments
24 1A, 2A, 2B, 3A and 3B of the Tampa Interstate Study.

25 Tampa Bay is one of the fastest growing metro areas

1 in the country and we must make strategic multimodal
2 transportation investments to provide mobility options
3 for this rapidly expanding population.

4 The improvements identified in the LPA aim to
5 relieve major bottlenecks and provide operational and
6 safety solutions at both the Westshore and downtown
7 interchanges. These interchanges are the transportation
8 linchpins for our region as they connect people and
9 commerce to and through the Tampa Bay region. The
10 proposed infrastructure investments may also enable the
11 development of innovative transit options for the Tampa
12 Bay region.

13 Additionally, we believe FDOT has actively listened
14 and responded to the wishes of the region and concerns
15 that have been raised throughout development of the
16 Supplemental Environmental Impact Statement.

17 The proposed alternative reflects the many changes
18 that FDOT has made based on extensive input from
19 residents, business leaders and elected officials in
20 the Tampa Bay region.

21 Thank you for your consideration and the
22 opportunity to weigh in favorably on this recommended
23 option.

24 MR. BOGEN: Thank you for your comment.

25 Our next speaker is Sharon Calvert.

1 MS. CALVERT: Good evening. I'm Sharon Calvert
2 and I live at 340 Pinellas Bayway South in Tierra Verde.
3 While I would prefer that the corridor -- that the
4 managed express lanes would have been a locally preferred
5 alternative, I do support the Locally Preferred
6 Alternative for all segments as we see here tonight.

7 Added capacity and improved safety is key and
8 we've -- I've lived in Hillsborough County since 1977
9 and we've always been told that Malfunction Junction was
10 going to get fixed. And, yes, there has been some
11 improvements, but it's actually gotten more dangerous
12 with some of the weaving that has to occur if you're
13 trying to weave across to get to the Selmon Connector
14 one way and then come back and head north on 275 another
15 way.

16 That asset is used by not just those who reside in
17 Hillsborough County, but is a critical transportation
18 asset that's used by people in surrounding counties as
19 well as tourists.

20 And for me who lives in Pinellas County, I have
21 used it and it is a major evacuation route for me if I
22 do need to evacuate. And I do like to come over to the
23 Port and take a cruise as well.

24 So I believe that there's been survey after survey
25 after survey that reflects that improvements and

1 expansion of the interstates is needed and is wanted, and
2 I support the Locally Preferred Alternative for all
3 segments.

4 Thank you.

5 MR. BOGEN: Thank you for your comment.

6 Our next speaker is Rick Fernandez.

7 MR. FERNANDEZ: I wonder if the timekeeper could be
8 over there. Yeah, there you go. My peripheral is not
9 that great.

10 For the record, Rick Fernandez 2906 North Elmore
11 Avenue in Tampa, 33602. That's in Tampa Heights. I am
12 the chair of the Transportation Committee for Tampa
13 Heights Civic Association and former president.

14 And for anyone here who's not familiar with Tampa
15 Heights, aside from being the oldest neighborhood in the
16 City, we're also bordered to the east and to the south by
17 Interstate 275. I quite literally live in the shadow of
18 Interstate 275 in the downtown interchange.

19 I stand here on my own personal behalf and to
20 represent the Civic Association in opposition to the
21 preferred alternative being proposed by the Department
22 of Transportation, largely referencing the entire
23 footprint of the SEIS envelope, but more specifically
24 with relation to the operational improvements that are
25 being suggested for the downtown interchange including,

1 but not limited to, the capacity increase to the flyover
2 for southbound 275 onto eastbound I-4 and the addition of
3 exits into the Ybor City community.

4 We do support the no-build option for the downtown
5 interchange because, frankly, it is the only option that
6 has ever been presented to us for consideration that did
7 not involve any further harm to the community.

8 We also support what we consider to be
9 commonsensical approaches such as lowering speed limits
10 in the area of the downtown interchange, ramp metering,
11 better lane markings, better signage, and above all
12 transit alternatives first and foremost to remove cars
13 from the interstate and other roads, because that is the
14 only way we're going to dig ourselves out of the pit that
15 we're currently in.

16 Having said that, I want to shift gears, no pun
17 intended, to environmental and health impacts, which are
18 particularly personal to me.

19 The FDOT has evidenced a disregard for the health
20 and safety of this community for decades. We know there
21 are adverse health impacts associated with living in
22 proximity to high traffic corridors such as 275 and I-4.

23 We know that these impacts are manifest in such
24 conditions as child asthma and in the infirm and aging
25 population. We also know there are issues regarding

1 cardiopulmonary health and cancer.

2 In short, your interstate is a pollution factory
3 which is harming my friends and neighbors. And your
4 answer, remarkably enough, is to make the factory larger,
5 more cars, more pollution.

6 I find this incogitable and in breach of your
7 fiduciary obligations to this community. This plan is
8 an insult. It is not welcomed. It never has been and
9 never will be. I've exceeded my time.

10 MR. BOGEN: Thank you for your comment.

11 Our next speaker is Laura Lawson on behalf of
12 Commissioner Pat Kemp.

13 MS. LAWSON: Good evening. I'm Laura Lawson. I'm
14 senior legislative aide to Pat Kemp. She's a county-wide
15 commissioner, District 6, and she's also the vice chair
16 of the Metropolitan Planning Organization here in
17 Hillsborough County.

18 Commissioner Kemp reviewed the study and she has a
19 number of concerns. It needs to be understood that this
20 is an update to a 1996 study. Twenty-four years have
21 gone by, and many of us can probably remember that time,
22 perhaps not all that well, but during that time there
23 were a lot of things that we didn't know that we know
24 now.

25 We know a lot more about climate change. It was

1 ten years later that Al Gore debuted the movie called
2 "Inconvenient Truth."

3 We know a lot more about how transit works. We
4 probably wouldn't be even having a suggestion of putting
5 buses in the middle of a highway if we were coming up
6 with such a plan now.

7 We know a lot more about transportation impacts
8 from pollution and the impacts and where they come from.
9 They don't just come from the exhaust pipe of cars.
10 They come from tires, I believe that someone else
11 previously mentioned. They come from the road itself.
12 They come from brake dust, and these are all significant
13 and will not be removed by electrification.

14 Also, when one looks back at the project
15 commitments that are made in chapter ten of the study,
16 you can look back, there are a number of commitments made
17 in 1996. There's very, very few and very, very unclear
18 commitments made as far as -- at this time.

19 And one of them is interesting. One that they do
20 say that has been completed and fulfilled is the Hart
21 north transit terminal and maintenance facility on 21st.
22 I don't know if any of you all have been there or are
23 familiar with it, but when Hurricane Irma came through
24 the director of Hart at this time was concerned that it
25 wouldn't survive the storm because it's in such bad

1 shape, and everybody knows that it needs to be replaced.

2 Also, it recommended a multimodal terminal parking
3 garage in downtown Tampa. Commissioner Kemp doesn't
4 believe that downtown Tampa is the place to build another
5 parking garage.

6 When you look at the commitments that we've made --
7 now, you can read them in less than half a minute -- they
8 are one sentence apiece, 11. The commitment to transit
9 is FDOT would -- I don't know why the "would" --
10 coordinate with transit agencies to address transit
11 during the construction phase.

12 This has been going on for years. The community
13 has been demanding transit. That's not the kind of
14 commitment that Commissioner Kemp was hoping to see.

15 Commissioner Kemp is also concerned that the study
16 does not address a number of social, public health and
17 environmental impacts of the project, including
18 affordable housing, including the health impacts of
19 cancer and asthma.

20 Well, thank you very much, and that's it.

21 MR. BOGEN: Thank you for your comment.

22 Our next speaker is Karen Kress.

23 MS. KRESS: Good evening. Karen Kress. I'm here
24 representing the Tampa Downtown Partnership. The Tampa
25 Downtown Partnership serves as a steward of downtown

1 Tampa cultivating public and private collaborations and
2 encouraging downtown's economic development.

3 As a proactive leadership organization, we act as
4 an advocate for the downtown community, including over
5 240 member companies, 14,000 residents and 58,000
6 employees.

7 Our organization has a long history of support
8 for multimodal options of transportation. This includes
9 micro mobility services such as the Downtowner, Bike
10 Share, Zip Car, Cross Bay Ferry and the TECO Line
11 street car.

12 As a regional hub with massive population growth
13 projections, our organization also understands the value
14 of investment in our current interstate system;
15 therefore, we support the proposed enhancements of the
16 Tampa Bay Next SEIS.

17 The interstate envelope is key to connect
18 Westshore, downtown to the University of South Florida
19 area. The Partnership is encouraged by the state's
20 investment in both the Howard Frankland Bridge and the
21 State Route 60 Westshore interchange.

22 We understand that there is not currently
23 funding for the downtown interchange beyond the proposed
24 option E operational and safety improvements.

25 It's important to continue the conversation and

1 explore modal options. The Partnership supports the
2 need to include a regional fixed route system with a
3 dedicated right-of-way.

4 We will continue to work with FDOT and the City of
5 Tampa on impacts through our downtown neighborhoods and
6 to preserve Ashley Drive as downtown's grand boulevard.
7 This can be accomplished in part through design and
8 signage to encourage more use of the downtown east exit.

9 In addition, we would recommend that the signage
10 for the Scott Street exit also contain a reference to
11 Tampa Street so that people not destined for the western
12 edge of our downtown know that they have an option to
13 proceed on Tampa Street which has better capacity than
14 Ashley Drive to handle traffic.

15 During construction and beyond, compliance of
16 transportation demand management measures should be put
17 into place supporting bicycle, pedestrian and transit
18 improvements for Tampa downtown.

19 Thank you.

20 MR. BOGEN: Thank you for your comment.

21 Our next speaker is Michelle Cookson.

22 MS. COOKSON: Good evening. Michelle Cookson,
23 6002 North Suwanee Avenue, Tampa. I'm here speaking on
24 behalf of myself, a citizen of Tampa for 24 years now,
25 also a member of -- on behalf of my nonprofit, Sunshine

1 Citizens, which represents thousands of citizens fighting
2 for transit and better transition.

3 For the record, I'm here yet again to provide
4 public comment on opposition to inland interstate
5 expansion, always pushing ahead. The local community
6 clearly and consistently has stated priority of building
7 high capacity mass transit and our desired investment in
8 that infrastructure rather than interstate expansion.

9 I and my neighbors turned out in numbers of several
10 hundreds at the last year's public hearing for project
11 segments six and seven. The majority expressed our
12 preferred alternative of no further action/no-build, and
13 those results and comments were promptly ignored.

14 This endless perpetuation of induced demand,
15 increasing capacity to serve only single occupancy
16 vehicle travel and the expansion of continued harm to
17 the environment and human health remains the worst
18 possible polluting scenario and the most wasteful.

19 It will also negatively impact our capacity to
20 more efficiently meet our locally identified and
21 prioritized transportation projects and our goals for
22 greater density, quality of life and wise economic
23 investment as we address growth.

24 We can't pay our way out of that and it comes down
25 to what is FDOT doing to remove cars off the road, not

1 increase -- but get cars off the road and support transit
2 and connecting human empowered mobility options.

3 This SEIS reflects a plan that perpetuates a cycle
4 of failure and harm.

5 MR. BOGEN: Thank you for your comment.

6 Our next speaker is Kristopher Gallagher.

7 MR. GALLAGHER: Hi, Kristopher Gallagher,
8 709 East Lake Avenue, Tampa, Florida, 33603. I would
9 like to see a little bit more public transit options
10 that work in conjunction with the already existing
11 interstate. I don't think it needs to be widened. I
12 do agree with the fact that cars need to be removed
13 and other options need to be provided for the citizens
14 that make theirs trips.

15 In addition, I live near Robles Park, which is a
16 beautiful park with a lake, and I spend some time there
17 and the park is about four blocks west or, excuse me, it
18 expands four blocks just to the west of the I-275
19 southbound lane and it's nearly at grade with the
20 interstate.

21 So if changes are going to be made, a visual or a
22 sound barrier up against that park I think would be
23 beneficial.

24 Thank you.

25 MR. BOGEN: Thank you for your comment.

1 Our next speaker is Christine Acosta.

2 MS. ACOSTA: Good evening. I'm Christine Acosta,
3 2402 West Morrison Avenue, Tampa, Florida. I'm here to
4 urge the Florida Department of Transportation when
5 deciding safety improvements in this plan to consider
6 safety improvements that are needed by all people in our
7 community and not just those on the interstate, but those
8 who are engaged in active transportation, especially in
9 the heavy pedestrian, bicycle and scooter areas of our
10 urban environment.

11 In particular, I request consideration of safety
12 improvements on Franklin Street as it passes under 275.
13 Presently, this is an extremely dangerous and
14 inhospitable space for anyone not in a vehicle, and I
15 fear it will become much more so with this plan
16 unfolding.

17 It is an economic barrier to development on both
18 the south side of Franklin Street and the north end of
19 Franklin Street where we have lots of small businesses
20 evolving and has some really great parks of our urban
21 environment that need to stay connected in a better way.

22 I invite all Florida Department of Transportation
23 stakeholders to tour this space with me and other
24 advocates by bike and on foot.

25 Thank you.

1 MR. BOGEN: Thank you for your comment.

2 Our next speaker is Amanda Brown.

3 MS. BROWN: Amanda Brown, Tampa, Florida, 33610.

4 I will continue to state my continued opposition to the
5 TIS TBN Tampa Bay Next Project as it is presented.

6 Today, I specifically want to speak to my opposition to
7 the 14th and 15th Street exit.

8 If you do drive on this corridor, as I do everyday,
9 you should be familiar with how terrible the design of
10 the roadway is. This exit will increase traffic into
11 the Ybor and surrounding neighborhoods. It will be
12 ten-fold.

13 If this exit is built, the surrounding
14 neighborhoods will be negatively impacted and the City
15 and County can kiss any chance of reaching its vision of
16 zero safety goals goodbye. This exit doesn't seem worth
17 the money, construction time and future accidents that we
18 will experience.

19 Myself and so many in this community continue to
20 ask for new creative thinking from FDOT, something that
21 will get many of us out of our cars so that others, many
22 of who have spoken today, can enjoy a less congested
23 highway, the one that FDOT has been told this project
24 will provide.

25 The community has worked on studies for years.

1 Projects such as alternatives for the CSX bus routes and
2 bikes and pedestrians and we are continually told that we
3 don't have projects.

4 We need FDOT to help us with our transit and
5 walk/bike projects, which are considered transportation,
6 and we do not need push back.

7 I will continue to state that expanding the
8 interstate will only induce demand, much like it did in
9 Houston, and that the supporters here will be back to
10 complain about how this project didn't fix anything in
11 the future. More cars will only increase our air
12 pollution, and we're starting to see emerging
13 particulates from tires and fluids that run off from our
14 roads into our bay.

15 Until I see the 14th and 15th Street exit removed
16 and FDOT helping us to get our preferred transit and bike
17 projects up and running, I will continue to request the
18 no-build alternative for this project.

19 Thanks.

20 MR. BOGEN: Thank you for your comment.

21 The next speaker is Matthew Suarez.

22 MR. SUAREZ: Hey, Kirk. So I just wanted to go
23 ahead and say that I oppose the proposal as far as the
24 exits go. This looks like basically taking the 21st and
25 22nd Street interchange exit and backing it up for the

1 third time, because I see it where the current exit
2 getting off at 22nd and 21st Streets off of I-4 has been
3 removed and then we're backing it up prior to Nuccio
4 Parkway, so I don't know.

5 Y'all are just always, you know, just trying to
6 figure out something different than what the community
7 actually wants, but anyway I hope that rail will become
8 more of a serious consideration.

9 I looked through the planning documents of the
10 SEIS and that was something that was never mentioned as
11 far as when it came to serious consideration for how the
12 CSX -- conversion of the CSX tracks to commuter rail
13 would positively or what would be the outcome of that
14 transportation intervention playing out in mitigating,
15 you know, impacts on the interstate.

16 So as far as, like, with ridership and whatnot, you
17 know, why wasn't CSX looked at as far as an alternative
18 prior to any other further inner city expansion in seeing
19 what that result through a study would actually, you
20 know, how those metrics would actually happen or what
21 they would do.

22 And then, again, the boulevard was another thing
23 that the community wanted and that was shelved off to
24 the side through a 10-page memo and y'all got rid of that
25 one pretty early on in the process.

1 So I just think that there was a lot of, you know,
2 desire to not go with the hard -- or go to what the
3 community wanted and rather goes to what the DOT wants.

4 MR. BOGEN: Thank you for your comment.

5 Our next speaker is Dayna Lazarus.

6 MS. LAZARUS: Hello. So I --

7 MR. BOGEN: State your name.

8 MS. LAZARUS: I'm sorry. I got here late. I
9 don't feel good. Dayna Lazarus, 2603 East 26th Avenue,
10 33605.

11 Yeah, so I just bought a house right in this area
12 where -- not too far north of I-4. It's my first house
13 and I chose it very carefully for its location. It's
14 pretty close to where I work. It's -- well, it's about
15 four miles from where I work.

16 The exit that currently exists, an on ramp to I-4
17 onto 21st and 22nd, whether I'm heading east on I-4 or
18 north on 275, I've never had a problem even at rush hour.
19 Like, it kind of frees up right in that area actually and
20 it takes me -- again, four miles from work, I get onto
21 the I-4 ramp at 22nd -- I'm sorry -- 21st and I go east.
22 It literally takes me five minutes to get to work at
23 8:00 a.m., and coming back at -- between 5:00 and 6:00,
24 I usually get off and, again, there's no traffic and I
25 get off on exit one.

1 And I do see traffic, like, ahead of me, I
2 understand that, trying to get around the corner, but I
3 don't understand why those exits have to change because
4 they were fine from my perspective and for my use.

5 And actually just because I enjoy bike riding I now
6 commute by bike five days a week, Monday through Friday,
7 from again 8:00 to between 5:00 and 6:00, and I go -- I
8 take 26th Avenue to 40th Street. I go north on 40th
9 Street and then I go east on Lake Avenue and then I
10 cross 56th on MLK and I go down MLK, and it is
11 terrifying. I feel like I'm going to die every time I
12 do it, but I do it because it's fun and it's savings
13 gas and it, you know, doesn't put carbon in the
14 atmosphere, et cetera.

15 And so I would much prefer to see FDOT invest our
16 money into bicycle -- specifically bicycle improvements,
17 because it's such an untapped way to commute, but --
18 so, yeah, and then I left the comment form.

19 Thank you.

20 MR. BOGEN: Thank you for your comment.

21 That was the last card that I have. Is there
22 anyone else that would like to make a statement?

23 MR. BOGEN: Laura Lawson.

24 MS. LAWSON: Yes, this is me, Laura Lawson, 304
25 West Hilda Street in South Seminole Heights in Tampa.

1 I'm also a former chair of the Hillsborough County MPO
2 Citizen Advisory Committee.

3 I've been following this project now since it was
4 first announced down at the Pepin Center many years ago
5 and I'm disappointed to see that we have not -- what's
6 in this study -- I've been waiting for this study to come
7 out for, like, five years and I finally got a chance to
8 read it today, and I'm disappointed to see that all of
9 the effort that residents have put in showing up at so
10 many meetings asking for so many things we get this list
11 of commitments that's barely -- they're not commitments,
12 they're just references to things.

13 And I really -- we did a study several years ago
14 about CSX. That's an option. That's what they did.
15 In Orlando, they converted the CSX tracks and created Sun
16 Rail as part of their interstate project and the state
17 paid for it, including operations for seven years.

18 People have been asking for this. Residents have
19 been asking for rail. It also parallels the
20 infrastructure of 275 going north towards the University.
21 It's such an incredible opportunity, but I did a word
22 search and I couldn't find anything about it in here at
23 all.

24 I'm really disappointed that we're not considering
25 more about our climate. A study just came out recently

1 from the Southern Environmental Law Center and they say
2 that the four things that you need to do to try to
3 achieve climate justice through transportation are
4 reduce vehicle miles traveled. I searched in here for
5 "vehicle miles traveled." Nothing, only a reference to
6 it in terms of -- no concept that it will reduce that,
7 this will increase that.

8 Number two, transit adoption. Again, we don't
9 have details and the transit that we have that's
10 referenced in here is just illusory. We don't have any
11 commitments.

12 Electric vehicles. That's the third thing. Of
13 course, that's coming, but we're not there yet. And even
14 if we were, there's still particulate matter, there's
15 still pollution associated with having all of these
16 single occupancy vehicles on the road from tires, brakes,
17 from the roadway, from all of it.

18 And then fuel economy is the last one. I also
19 think it's important -- we're talking about with all of
20 these exits, I live near Hillsborough Avenue, it's like
21 crossing a Rubicon trying to get across there because
22 it's impacted by the interstate. It intersects the
23 neighborhood. It stops traffic.

24 Everywhere we put a new exit, a new ramp, there is
25 going to be impacts and they need to be considered and

1 addressed, and this study doesn't do that.

2 Thank you.

3 MR. BOGEN: Thank you for your comment.

4 Is there anyone else that would like to make a
5 statement?

6 Okay. Make a statement and fill out the card
7 after you make your statement.

8 MR. VELA: Absolutely. Hey, everybody. My name
9 is Chris Vela. I live at 924 1/2 East 11th Avenue, just
10 due south of the interchange. I'm in the area of
11 potential effect. That's 33605 in Tampa.

12 I'm going to start off with a statement. In the
13 actual report, in the analysis that justified this
14 project, TB Next quotes, "It is unlikely to effect
15 children or older adults or the disabled once it opens
16 if they do not use the interstate." So right off the bat
17 this project is being unfair and discriminatory towards
18 anybody that has issues with driving.

19 Folks, this is a federal facility. So the
20 government is basically shutting you down having any
21 access to it, but let's just kind of step back here.

22 Now, in all of these reports it was stated in there
23 in black-and-white that TB Next, the program that was
24 used to determine the impacts in my neighborhood, in Ybor
25 City, in all of our CRAs, that program can't determine

1 the local impacts. FDOT has no clue what's going to
2 happen economically in our communities.

3 What we have seen since the 1960s is a ton of
4 properties have lost value. We've seen a lot of our
5 streets become a servicing highway system. We've seen a
6 lot of vision zero issues, especially on streets that
7 are serving the interstate system and it's completely
8 uncalled for.

9 We were promised to get high speed rail and now
10 we're not going to get that anymore. Everything that
11 FDOT is trying to offer, and even the feds are trying to
12 offer us, is concessions. It's just putting up walls in
13 the neighborhood, sound walls.

14 In my community, we are well-connected. We run
15 on a grid and so what we got in the 1960s were grassy
16 berms, right? And then as we saw more streets become
17 servicing the interstate, we had sound walls or
18 interstate walls that are put up and divided our
19 neighborhoods.

20 Westshore is getting reconnected. They are not
21 in a CRA. They are actually getting connections on
22 service roads. FDOT has not even remotely, like,
23 offered that to us.

24 And so here is an area that has higher demographics
25 that is predominantly white versus an area like mine

1 where we have a lot of cultural Europeans, blacks,
2 Hispanics, everyone, and we're not getting any connection
3 at all. We're actually just getting more expansion of
4 the interchange system itself.

5 We are dealing with an inordinate amount of lights,
6 air pollution. And if you can go on our County maps you
7 will see that we're getting rained on with cancer risks,
8 poor air quality, brake dust.

9 FDOT says, well, if we move cars faster and faster
10 you're going to reduce those air quality impacts. But
11 guess what, folks, they want to put up stop lights and
12 more stop lights on these exits and cars will slow down
13 and I will be impacted and my life will be shortened by
14 this project.

15 I don't want this project to happen, and I say no
16 to the entire bit of Tampa Bay Next.

17 MR. BOGEN: Thank you for your comment.

18 Anyone else? Make sure we get them speaker cards
19 to fill out.

20 MR. PATEL: Okay. My name is Mit Patel. I live
21 in Tampa. Zip code is 33609. I've been at this project
22 for about five years -- probably, yeah, close to five
23 years now. And it's gotten prettier as far as
24 presentation, but as far as substance it's pretty much
25 the same, if not worse.

1 The demographic changes that's happening with
2 downtown, I speak specifically towards the urban area,
3 all of the stats -- all of the studies show that we
4 should be talking about removing the highway and not
5 expanding the highway in that area. And I'm a car guy.
6 I love cars. I've got three cars of my own. I love
7 driving them. I'm not saying that people have to stop
8 driving their cars, but some forms of transportation are
9 just for some areas.

10 In downtown and the area that will become, will
11 become even more metropolitan and we have to start
12 looking at the residents that live there and what is the
13 medium to get around sufficiently, economically that it's
14 going to make sense, and the way to do that is through
15 transit, go to mass transit.

16 Expanding the highway in any form or fashion
17 whether it's toll roads, whether it's free roads, whether
18 it's adding a lane here and there is not going to solve
19 the purpose of congestion. It's not going to add
20 economic value.

21 And if this Department is really serious about
22 traffic or transportation as it is in their title and if
23 we don't sit down and have that conversation, all of this
24 is just a farce.

25 You look at it and you don't get any respect from

1 me, me personally, from the citizens that live here, I
2 doubt they will ever have that respect. I see the
3 effort. I'm not trying to demean anybody that works --
4 I've actually started liking some of you folks over the
5 last few years. That hasn't always been the case and I
6 know you're trying to do your job. But whether the
7 policy is or whoever the policymakers are, they keep
8 running the same thing down our throats and expect us to
9 come here and sit down and just take it on no matter how
10 pretty it's starting to look. I think that's just not
11 fair to us.

12 So, you know, even this, this whole stage right
13 here when I get up here and we talk about this, it's just
14 checking the check box for the DOT. It's not going to
15 change anything. And that's -- we, as citizens, we feel
16 that. We know that.

17 We've come out here for five years and no matter
18 what we say, even if it goes into that little court
19 reporter's laptop, it ain't going to change nothing. It
20 ain't going to change nothing until the direction from
21 the State and this Department has an honest conversation
22 about what we're going to do.

23 Thank you.

24 MR. BOGEN: Thank you for your comment. Is there
25 anyone else that would like to make a statement?

1 MR. IGNAS: My name is Gus Ignas. I live at
2 516 North Trask Street in Tampa, Florida, 336009.

3 I currently live less than 100 feet from the
4 existing 275 Westshore interchange construction that has
5 already started. I also have watched the congestion
6 increase repeatedly now in both directions at rush hour
7 at that time backing up all the way from Malfunction
8 Junction, all the way to Westshore every afternoon.

9 I also gave up owning a car five years ago and
10 take public transit and bike to work in downtown Tampa.
11 You would think that would make me against any
12 improvements to the highway.

13 I've got to tell you, I gave up my car because of
14 Malfunction Junction and driving in Tampa. I think the
15 traffic needs to move faster. I was surprised that FDOT
16 reduced so much of the improvements they were going to
17 make. And it is, in my opinion, has come from more than
18 two years of listening to the people in the
19 neighborhoods, you know.

20 I guess the last point is, I sit on the Livable
21 Roadway Committee for the MPO as a transit user, as the
22 only transit user. I also attend the Downtown
23 Partnership Transportation meetings.

24 I take transit 365 days a year. I listen to
25 people in Tampa say, oh, I'll take transit. You are not

1 going to walk from your home to a transit place in June.
2 The people who do that are the people who have to or who
3 have made a choice. That is not the comfort in the
4 air-conditioned life of Tampa. There's no way to make it
5 comfortable from your front door to a transit site.
6 There's no way to make it comfortable for you to stand
7 in a transit stop in the sun in Florida in the summer.
8 The only way to get people moving is to expand the
9 highway and add transit, high speed transit that reaches
10 into the neighborhoods.

11 So I support the locally recommended option
12 increasing the on ramps and off ramps from I-4 to 275
13 and getting the traffic to move faster through the
14 Westshore interchange where I live.

15 Thank you.

16 MR. BOGEN: Thank you for your comment.

17 MS. GRIMSDALE: Hi. Kelly Grimsdale, 2701 North
18 9th Street.

19 I think I've attended all these meetings from the
20 beginning and hear all the comments. One of the things
21 that I don't think that the Locally Preferred Alternative
22 addresses, like Mit mentioned, is the connectivity
23 between the neighborhoods, or actually it was Chris
24 Vela.

25 You know, our neighborhoods were split up years ago

1 with the highways going through it and it's great to have
2 the connectivity and I don't see that in the plans.

3 I also have concerns about pollution. We live
4 very, very close to Malfunction Junction right now and
5 even sometimes walking my dogs -- there's a back-up even
6 on Columbus that sometimes bothers me walking my dogs
7 along that corridor.

8 I have major concerns about the increased traffic
9 coming into the neighborhood if the exits are moved to
10 14th and 15th Streets.

11 I understand the traffic weave and it can possibly
12 relieve some of the back-up if you make more exits
13 available, but I'm afraid if it's only going to be
14 promoted as 14th and 15th Streets instead of -- and 21st
15 and 22nd Streets, I'm afraid about how that's going to
16 impact our neighborhood.

17 It just seems like more modern solutions could be
18 sought. I hear about other municipalities, other
19 countries and other states in the United States, they're
20 looking at different options and I don't know why -- it
21 doesn't seem like anything's, like, modern that's being
22 proposed. It's just let's keep building wider and wider.

23 And I also believe after being at all of these
24 meetings, and I know our neighborhood -- I think we
25 just -- we have so many things to fight in our

1 neighborhood. So I think, like, Ybor doesn't -- we just
2 have a lot of things to fight that are more top of mind
3 for us and we've had so many properties already taken by
4 FDOT so we've already been impacted in the last
5 expansion.

6 I really don't think we are being heard by FDOT,
7 because there are always a lot of people attending these
8 meetings and it's, like, it's still the same plan, still
9 the same expansion. There's just nothing new.

10 So I would say personally with how it's presented
11 I would like to say that I'm opposed to it and I'd like
12 to see some better solutions.

13 Thank you.

14 MR. BOGEN: Thank you for your comment.

15 Is there anyone else that would like to make a
16 statement?

17 Seeing none, the Public Hearing transcript, written
18 statements, exhibits and reference materials will be
19 available for public inspection within three weeks at
20 the FDOT's District 7 Office located at 11201 North
21 McKinley Drive, Tampa, Florida.

22 It is approximately 7:02 p.m. I hereby officially
23 close the formal portion of the Public Hearing for the
24 Tampa Interstate Study Supplemental and Environmental
25 Impact Statement PD&E Study. You may continue to view

1 the materials on display and speak with our project
2 staff.

3 On behalf of the Florida Department of
4 Transportation, thank you for attending.

5 Remember to be alert today, alive tomorrow.
6 Safety doesn't happen by accident.

7 Good night and thank you for your time.

I. Local Design and Concept Acceptance Notices

ANNOUNCEMENT OF LOCATION AND DESIGN CONCEPT ACCEPTANCE

Tampa Interstate Study (TIS)

Supplemental Environmental Impact Statement (SEIS)

Record of Decision (ROD) / Section 4(F) Evaluation

I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Boulevard (SR 574) and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41)
 Hillsborough County, Florida
 WPI Segment Number: 258337-2

On September 15, 2020, the Federal Highway Administration (FHWA) granted Location and Design Concept Acceptance for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation for the study area of I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King, Jr. Boulevard and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) as shown in Figure 1. The improvements are necessary to accommodate future traffic demands along this corridor and within the interchanges in the study area.

The study was accomplished by working in cooperation with federal and state agencies as well as local governments. This coordination allowed the Florida Department of Transportation (FDOT) and FHWA to better determine the comprehensive effects that the project will have on the social, cultural, and environmental effects associated with this project. This project is now eligible to move to the next phase of project development.

The Final SEIS/ROD is anticipated to be published in the Federal Register on September 25, 2020 and is available at www.federalregister.gov. It is also available on the project website at www.tampainterstatestudy.com.

Per 23 U.S.C. § 139, FHWA has issued a single FEIS and ROD. Therefore, the 30-day wait/review period under NEPA does not apply to this action.

En Español

Si usted tiene preguntas o comentarios o si simplemente desea más información sobre este Proyecto, favor de ponerse en contacto con el señor Manuel Flores, al teléfono 813.975.4248 o correo electrónico manuel.flores@dot.state.fl.us.

Non-Discrimination

Public participation is solicited without regard to race, color, national origin, age, sex, religion, disability or family status. Persons who need special accommodations under the Americans with Disabilities Act or persons who require translation service (free of charge), please contact Alex Henry, Public Involvement Coordinator, 813.975.6405 or alex.henry@dot.state.fl.us.

Right-of-Way Acquisition Procedure

When a transportation project proposes acquiring private property, you may have questions and concerns. To better inform you about the right-of-way acquisition process and your rights, FDOT created real estate acquisition and relocation informational brochures. These brochures and other education materials are available on our website: www.fdot.gov/rightofway/documents.shtm or call 813.975.6000 for information.

Project Website

For more information on the TIS SEIS please visit www.tampainterstatestudy.com.

Public Involvement

A public hearing was held on February 25, 2020 and February 27, 2020. The hearing provided information about the Preferred Alternative and allowed for residents, business owners, tenants and those interested, to submit comments and express views concerning the location, conceptual design, and social, economic, and environmental effects of the proposed project. The hearing included an open house and formal presentation. The public was given the opportunity to provide comment by mail, in writing or verbally at a microphone during the formal presentation, or to a court reporter at the hearing.

One hundred and forty-three (143) members of the public signed in at the public hearing. Eleven (11) comments were collected at the meeting; 22 persons spoke during the formal session and 125 additional comments were received by mail, email, and through the website during the official comment period which ended March 12, 2020. A transcript of the public hearing is provided in the Comments and Coordination Report, available on the project website, www.tampainterstatestudy.com.

Preferred Alternative

The project's purpose is to upgrade the safety and efficiency of the existing I-275 and I-4 corridors, while maintaining access to the surrounding community. It is also to provide congestion relief and accessibility to improve mobility, travel times, system linkages and multimodal connections, while supporting regional economic development goals and enhancing the quality of life for residents and visitors. The Preferred Alternative includes the full reconstruction of the Westshore Area Interchange (SR 60/ I-275) and will include general purpose lanes and tolled express lanes. Tolled express lanes will also be added along the I-275 corridor connecting the Howard Frankland Bridge and Westshore Area to Downtown Tampa. Operational improvements within the Downtown Tampa Interchange (I-275/I-4) will enhance safety and traffic operations. Improvements within the study corridor are divided into Segments as seen in Figure 1. Improvements are proposed in Segments 1A, 2A, 2B, and 3A. There are no improvements proposed in Segments 3B or 3C under the Preferred Alternative.

I-275 from the Howard Frankland Bridge to North of the Hillsborough River

The proposed improvements on I-275 from the Howard Frankland Bridge to Rome Avenue include the existing four general purpose lanes and two new express lanes in each direction, auxiliary lanes in between ramps, and full reconstruction of the Westshore Area Interchange (I-275/SR 60). The interchange will include new general purpose “flyover” ramps and the addition of tolled express lanes and ramps. The express lane improvements will provide direct connections from I-275 to/from the Veterans Expressway, Independence Parkway, Courtney Campbell Causeway, Tampa International Airport, and Himes Avenue. An express lane entrance ramp to southbound I-275 will be added at Reo Street. The median of I-275 will be preserved for future fixed-guideway transit.

Figure 2 – I-275/SR60 Interchange Proposed Improvements Conceptual Rendering

At a local level, the improvements will provide a benefit to the walk/bike network and traffic circulation in the Westshore Business District by reconnecting Reo Street, Occident Street, and Trask Street beneath the interstate. Reconnecting these streets will relieve traffic bottlenecks on West Shore Boulevard and improve access and connectivity. A shared use path will be constructed along the west side of Reo Street, providing connectivity from the shared use path across the Howard Frankland Bridge to Cypress Point Park. Lighting improvements and other minor enhancements will be added to existing underpasses.

From Rome Avenue to north of the Hillsborough River, improvements include the addition of express lanes along I-275 that will terminate into Downtown Tampa. As part of the new configuration, drivers accessing Downtown Tampa from the northbound I-275 general purpose lanes will exit exclusively to Tampa Street. Northbound express lane traffic will exit via a direct connect ramp to Ashley Drive. Southbound I-275 on-ramps for both general purpose and express lanes will remain at Tampa Street. Access to northbound

I-275 will remain at Ashley Street and the ramp bridge will be reconstructed to accommodate future demand. In Downtown Tampa, improvements will be made along Scott Street to provide enhanced access to northbound I-275 and I-4.

Operational Improvements within the Downtown Tampa Interchange (I-275/I-4)

The proposed operational improvements will address most of the existing bottlenecks and high crash rates drivers experience. Some of the existing bridges in the Downtown Tampa Interchange will be removed, replaced, or widened. Bridges that are widened will be brought up to current standards.

Southbound I-275 to Eastbound I-4

The improvements from southbound I-275 to eastbound I-4 consist of widening the existing flyover ramp to two lanes and extending the existing southbound auxiliary lane from Dr. Martin Luther King Jr. Boulevard. The existing southbound exit ramp to Floribraska Avenue will remain open. The improvements include relocating the exit ramp to Ybor City and East Tampa from the existing location at 21st/22nd Streets to 14th/15th Streets and widening East 13th Avenue to better facilitate access to 21st/22nd Streets.

Westbound I-4 to Northbound I-275

The improvements from westbound I-4 to northbound I-275 consist of widening the existing one lane exit ramp to northbound I-275 to two lanes. The additional lane will continue along northbound I-275 to the Dr. Martin Luther King Jr. Boulevard exit ramp. The Dr. Martin Luther King Jr. Boulevard exit ramp will be widened to two lanes.

Westbound I-4 to Southbound I-275

The improvements from westbound I-4 to southbound I-275 consist of widening the two-lane ramp to southbound I-275 to three lanes. The exit ramps to Downtown Tampa will be adjusted to improve spacing so drivers can more efficiently exit to downtown. Exits will provide the same access as today to Orange Avenue, Jefferson Street, Ashley Drive, and Doyle Carlton Drive. Along southbound I-275, full shoulder widths will be provided from Palm Avenue to Jefferson Street.

I-4 from West of the Selmon Expressway Connector to East of 50th Street

There are no improvements in this area as part of the TIS SEIS.

The table below outlines the timing and funding for the improvements associated with the Preferred Alternative

FDOT Adopted 5-Year Work Program Fiscal Year 2020/2021—Fiscal Year 2024/2025		
I-275 from Howard Frankland Bridge to North of Hillsborough River		
Design	ROW Acquisition	Construction
Included in Design Build Construction Funded (2023/2024)	Funded (2020/2021 – Ongoing)	Funded (2023/2024)
Downtown Tampa Interchange (I-275/I-4) Operational Improvements		
Design	ROW Acquisition	Construction
Not Currently Funded	Not Currently Funded	Not Currently Funded
I-4 from East of 22nd Street to East of 50th Street*		
Design	ROW Acquisition	Construction
No Further Improvements	N/A	N/A

*A portion of TIS Segment 3B overlaps with partially funded improvements of Tampa Bay Next Section 8, (Financial Project Identification Number 431746-3-52-01), including the beginning of the express lane system heading east on I-4.

FDOT has conducted extensive public engagement throughout this study and will continue to engage the public and coordinate with local agencies throughout future project phases.

any quantity. Companies have the ability to import the chemical in low volumes below the CDR reporting threshold.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2020–0390; FRL–10014–21]

Ortho-Phthalaldehyde; Receipt of Application for Emergency Exemption, Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the National Aeronautics and Space Administration (NASA) to use the pesticide ortho-phthalaldehyde (OPA, CAS No. 643–79–8) to treat the coolant fluid of the internal active thermal control system of the International Space Station to control aerobic/microaerophilic bacteria in the aqueous coolant. The applicant proposes the use of a new chemical which has not been registered by EPA. Therefore, in accordance with the Code of Federal Regulations (CFR), EPA is soliciting public comment before making the decision whether to grant the exemption.

DATES: Comments must be received on or before October 13, 2020.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPP–2020–0390, by one of the following methods:

- **Federal eRulemaking Portal:** <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

- **Mail:** OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.

- **Hand Delivery:** To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>.

Due to the public health concerns related to COVID–19, the EPA Docket Center (EPA/DC) and Reading Room is closed to visitors with limited exceptions. The staff continues to provide remote customer service via email, phone, and webform. For the latest status information on EPA/DC services and docket access, visit <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT:

Marietta Echeverria, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: RDFRNotices@epa.gov.

SUPPLEMENTARY INFORMATION:

In accordance with the regulations at 40 CFR 166.24(a)(1), EPA is soliciting public comment before making the decision whether to grant the exemption.

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are a pesticide manufacturer (North American Industrial Classification System (NAICS) (Code 32532) or involved with the International Space Station. This listing is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Other types of entities not listed could also be affected.

B. What should I consider as I prepare my comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through www.regulations.gov or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI

Subject: Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) Announcement of Approval

**Tampa Interstate Study (TIS)
Supplemental Environmental Impact Statement (SEIS)**

Florida Department of Transportation

**ANNOUNCEMENT OF LOCATION AND DESIGN CONCEPT ACCEPTANCE
Tampa Interstate Study (TIS)
Supplemental Environment Impact Statement (SEIS)
Record of Decision (ROD) / Section 4(f) Evaluation**

I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Boulevard (SR 574) and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) Hillsborough County, Florida

Work Program Item Segment Number: 258337-2

On September 15, 2020, the Federal Highway Administration (FHWA) granted Location and Design Concept Acceptance for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation for the study area of I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King, Jr. Boulevard and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41).

The Preferred Alternative includes the proposed improvements on I-275 from the Howard Frankland Bridge to Rome Avenue including the existing four general purpose lanes and two new express lanes in each direction, auxiliary lanes in between ramps, and full reconstruction of the Westshore Area Interchange (I-275/SR 60). At a local level, the improvements include reconnecting Reo Street, Occident Street, and Trask Street beneath the interstate. This will enhance the walk/bike network and traffic circulation in the Westshore Business District by addressing traffic bottlenecks on West Shore Boulevard and improving access and connectivity. From Rome Avenue to north of the Hillsborough River, proposed improvements include the addition of express lanes along I-275 that will terminate into Downtown Tampa. In addition, operational improvements are proposed within the Downtown Tampa Interchange (I-275/I-4) to enhance safety and traffic operations by addressing most of the existing bottlenecks and high crash rates drivers experience.

This project is now eligible to move to the next phase of project development.

The Final SEIS/ROD is anticipated to be published in the Federal Register on September 25, 2020 and is available at www.federalregister.gov. It is also available on the project website at www.tampainterstatestudy.com.

Per 23 U.S.C. § 139, FHWA has issued a single FEIS and ROD. Therefore, the 30-day wait/review period under NEPA does not apply to this action.

EXTERNAL SENDER: Use caution with links and attachments.

Dear Agency Partners,

On September 15, 2020, the Federal Highway Administration (FHWA) granted Location and Design Concept Acceptance for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation for the study area of I-275 (SR 93) from the Howard Frankland Bridge to North of Dr. Martin Luther King, Jr. Boulevard and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) in Hillsborough County. This action is scheduled to publish in the Federal Register on September 25, 2020 (www.federalregister.gov).

The Preferred Alternative includes the full reconstruction of the Westshore Area Interchange (SR 60/ I-275) and will include improvements to the existing four general purpose lanes and 2 new tolled express lanes in each direction, plus auxiliary lanes between the access ramps. Tolled express lanes will be added along the I-275 corridor connecting the Howard Frankland Bridge and Westshore Area to Downtown Tampa. At a local level, the improvements include reconnecting Reo Street, Occident Street, and Trask Street beneath the interstate. This will enhance the walk/bike network and traffic circulation in the Westshore Business District by addressing traffic bottlenecks on West Shore Boulevard and improving access and connectivity. Operational improvements within the Downtown Tampa Interchange (I-275/I-4) will enhance safety and traffic operations by addressing most of the existing bottlenecks and high crash rates drivers experience. All project documents are available on the project website at: www.tampainterstatestudy.com.

This project is now eligible to move to the next phase of development. FDOT will continue to work with the public and our agency partners during future project phases.

A copy of the notice is attached for your reference. This notice is being mailed to all property owners and tenants located within at least 300 feet on either side of the project and to other public officials, regulatory agencies, organizations, and individuals interested in the project. Advertisements announcing the approval will also be placed in local newspapers. If you have any questions on this action, please contact Alice Price, FDOT Project Manager at: 813-975-6482 or alice.price@dot.state.fl.us.

(SEIS)/Record of Decision (ROD) Location and Design Concept Acceptance
Notification
WPI Segment No.: 258337-2

Dear District Manager:

On September 15, 2020, the Federal Highway Administration (FHWA) granted Location and Design Concept Acceptance for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation for the study area of I-275 (SR 93) from the Howard Frankland Bridge to North of Dr. Martin Luther King, Jr. Boulevard and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) in Hillsborough County. This action is scheduled to publish in the Federal Register on September 25, 2020 (www.federalregister.gov).

The Preferred Alternative includes the full reconstruction of the Westshore Area Interchange (SR 60/ I-275) and will include improvements to the existing four general purpose lanes and two new tolled express lanes in each direction, plus auxiliary lanes between the access ramps. Tolled express lanes will be added along the I-275 corridor connecting the Howard Frankland Bridge and Westshore Area to Downtown Tampa. At a local level, the improvements include reconnecting Reo Street, Occident Street, and Trask Street beneath the interstate. This will enhance the walk/bike network and traffic circulation in the Westshore Business District by addressing traffic bottlenecks on West Shore Boulevard and improving access and connectivity. Operational improvements within the Downtown Tampa Interchange (I-275/I-4) will enhance safety and traffic operations by addressing most of the existing bottlenecks and high crash rates drivers experience. All project documents are available on the project website at: www.tampainterstatestudy.com.

This project is now eligible to move to the next phase of development. FDOT will continue to work with the public and our agency partners during future project phases.

Federal Aid Project Number: 990007-1

Dear Mr. Haikey:

On September 15, 2020, the Federal Highway Administration (FHWA) granted Location and Design Concept Acceptance for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation for the study area of I-275 (SR 93) from the Howard Frankland Bridge to North of Dr. Martin Luther King, Jr. Boulevard and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) in Hillsborough County. This action is scheduled to be published in the Federal Register (www.federalregister.gov) on September 25, 2020.

The Preferred Alternative includes the proposed improvements on I-275 from the Howard Frankland Bridge to Rome Avenue including the existing four general purpose lanes and two new express lanes in each direction, auxiliary lanes in between ramps, and full reconstruction of the Westshore Area Interchange (I-275/SR 60). At a local level, the improvements include reconnecting Reo Street, Occident Street, and Trask Street beneath the interstate. This will enhance the walk/bike network and traffic circulation in the Westshore Business District by addressing traffic bottlenecks on West Shore Boulevard and improving access and connectivity. From Rome Avenue to north of the Hillsborough River, proposed improvements include the addition of express lanes along I-275 that will terminate into Downtown Tampa. In addition, operational improvements are proposed within the Downtown Tampa Interchange (I-275/I-4) to enhance safety and traffic operations by addressing most of the existing bottlenecks and high crash rates drivers experience. All project documents are available on the project website at: www.tampainterstatestudy.com.

This project is now eligible to move to the next phase of development. FDOT will continue to work with the public and our agency partners during future project phases.

NOTICE OF SPECIAL WORKSHOP PARK PLACE COMMUNITY DEVELOPMENT DISTRICT
NOTICE IS HEREBY GIVEN that the Board of Supervisors of the Park Place Community Development District will hold a Special Workshop to address any and all business which may properly come before them on Wednesday, September 30, 2020 at 6:30 p.m., at The Lake House located at 11740 Casa Lago Lane, Tampa, FL 33626. This workshop is open to the public and will be conducted in accordance with the provisions of Florida Law for Community Development Districts.
There may be occasions when one or more Supervisors will participate by telephone. At the above location there will be a speaker telephone present, so that any person can attend the meeting and be fully informed of the discussions taking place either in person or by telephone communication.
Pursuant to provisions of the Americans with Disabilities Act, any person requiring special accommodations to participate in these meetings is asked to advise the District Management Office at (813) 873-7300, at least 48 hours before the meeting. If you are hearing or speech impaired, please contact the Florida Relay Service at 7-1-1, who can aid you in contacting the District Office.
If any person decides to appeal any decision made by the Board with respect to any matter considered at these meetings, such person will need a record of the proceedings and such person may need to ensure that a verbatim record of the proceedings is made, at his or her own expense, and which record includes the testimony and evidence on which the appeal is based.

Aviso de Talleres Públicos para la Parte 150 de la Actualización del Mapa de Exposición al Ruido Aeropuerto Internacional de Tampa

La Autoridad del Aeropuerto del Condado de Hillsborough (HCAA) recientemente comenzó un estudio para evaluar la compatibilidad del Aeropuerto Internacional de Tampa con las comunidades circundantes. Este estudio, una "Actualización del Mapa de Exposición al Ruido (NEM)", seguirá el proceso descrito en el Título 14 del Código de Regulaciones Federales (CFR) Parte 150, Planificación de Compatibilidad de Ruido en el Aeropuerto.
La HCAA le invita a asistir a uno de los tres talleres públicos que brindarán información sobre la Actualización NEM.
Debido a las preocupaciones actuales de salud y seguridad relacionadas con COVID-19, dos de estos talleres se llevarán a cabo virtualmente a través de una plataforma de reuniones basada en la nube, incluyendo una opción de teleconferencia. Para aquellos que tienen acceso limitado a la Internet, una opción de reunión en persona se llevará a cabo solo con cita previa y cumplirá con todas las pautas de seguridad de la CDC. Para todos los talleres públicos, habrá una presentación de 20 minutos sobre el proceso del estudio, el cronograma del proyecto, una introducción al ruido e información sobre el modelado de la exposición al ruido de las aeronaves. Una sesión de preguntas y respuestas seguirá a la presentación para brindar a la comunidad la oportunidad de hacer preguntas y recibir respuestas del Equipo del Estudio en tiempo real.
Para registrarse en los talleres virtuales y obtener información actualizada sobre la reunión, visite <http://bit.ly/tpaworkshop>. Se grabarán los talleres virtuales y se publicarán los videos en www.tampairport.com/part-150-study para permitir que los miembros de la comunidad vean en cualquier momento.
Los miembros de la comunidad también pueden llamar (sin cargo) para escuchar los talleres virtuales programados al 833-548-0282 o al 877-853-5247.
El número de identificación de la conferencia es 865 9411 6939.
Los talleres se realizarán en las siguientes fechas y horarios:

- FECHA:** lunes, 5 de octubre de 2020 (Virtual)
HORA: 10:00 a.m. – 12:00 p.m.
REGISTRARSE: <http://bit.ly/tpaworkshop>
- FECHA:** martes, 6 de octubre de 2020 (Virtual)
HORA: 5:30 p.m. – 7:30 p.m.
REGISTRARSE: <http://bit.ly/tpaworkshop>
- FECHA:** jueves, 8 de octubre de 2020 (Por cita solamente)
HORA: 9:00 a.m. – 7:00 p.m.
LUGAR: Sala de juntas de la Autoridad de Aviación en el Aeropuerto Internacional de Tampa
RSVP: Se requieren reservaciones para la reunión en persona. Para reservar un asiento para esta reunión, por favor envíe un mensaje por correo electrónico a AirportMeeting@causa.com o llame al 813-397-8005 y un miembro del equipo de estudio responderá con una confirmación e instrucciones para la reunión.

Además del proceso informal de preguntas y respuestas durante cada taller, se anima a todas las partes interesadas a enviar comentarios formales por escrito. Para maximizar la oportunidad de recibir comentarios, el período de comentarios formales comenzará el 6 de septiembre de 2020 y finalizará a las 5:00 p.m. el 16 de octubre de 2020. Envíe sus comentarios por correo (con matasellos del 16 de octubre de 2020) a:
ESA, c/o TPA Part 150 Study, 4200 West Cypress St., Suite 450, Tampa, FL 33607
En los puntos clave durante el proyecto, las actualizaciones sobre el progreso del estudio se publicarán en el sitio web del proyecto en www.tampairport.com/part-150-study. La HCAA también organizará actividades de divulgación adicionales para brindar más oportunidades para el aporte público en el futuro, incluyendo otra serie de talleres públicos a principios de 2021 para presentar el NEM. Además, la HCAA alienta a todas las personas interesadas a monitorear el sitio web del proyecto para obtener la información y anuncios más recientes del proyecto.

LEGAL NOTICE

Hillsborough County Florida

ANNOUNCEMENT OF LOCATION AND DESIGN CONCEPT ACCEPTANCE Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS) Record of Decision (ROD) / Section 4(F) Evaluation

I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Boulevard (SR 574) and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) Hillsborough County, Florida. Work Program Identification Segment: 258337-2

On September 15, 2020, the Federal Highway Administration (FHWA) granted Location and Design Concept Acceptance for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation for the area of I-275 (SR 93) from the Howard Frankland Bridge to North of Dr. Martin Luther King, Jr. Boulevard and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41). This action is scheduled to be published in the Federal Register (www.federalregister.gov) on September 25, 2020.
The Preferred Alternative includes the proposed improvements on I-275 from the Howard Frankland Bridge to Rome Avenue including the existing four general purpose lanes and two new express lanes in each direction, auxiliary lanes in between ramps, and full reconstruction of the Westshore Area Interchange (I-275/SR 60). At a local level, the improvements include reconnecting Leo Street, Occident Street, and Trask Street beneath the interstate. This will enhance the walk/bike network and traffic circulation in the Westshore Business District by addressing traffic bottlenecks on West Shore Boulevard and improving access and connectivity. From Rome Avenue to north of the Hillsborough River, proposed improvements include the addition of express lanes along I-275 that will terminate into Downtown Tampa. In addition, operational improvements are proposed within the Downtown Tampa Interchange (I-275/I-4) to enhance safety and traffic operations by addressing most of the existing bottlenecks and high crash rates drivers experience. All project documents are available on the project website at: www.tampainterstatestudy.com.
This project is now eligible to move to the next phase of development. FDOT will continue to work with the public and our agency partners during future project phases.
For design phase questions, contact: Mary Lou Godfrey, P.E., Senior Project Manager at MaryLou.Godfrey@dot.state.fl.us or 813.975.6621 | 800.226.7220
For environmental phase questions, contact: Kirk Bogen, P.E., Environmental Management Engineer at Kirk.Bogen@dot.state.fl.us or 813.975.6448 | 800.226.7220

There may be occasions when one or more Supervisors will participate by telephone. At the above location there will be present a speaker telephone so that interested persons can attend the meeting at the above location and be fully informed of the discussions taking place either in person or by telephone communication.
Pursuant to provisions of the Americans with Disabilities Act, any person requiring special accommodations to participate in these meetings is asked to advise the District Office at (813) 873-7300, at least 48 hours before the meetings. If you are hearing or speech impaired, please contact the Florida Relay Service at 7-1-1, who can aid you in contacting the District Office.
If any person decides to appeal any decision made by the Board with respect to any matter considered at these meetings, such person will need a record of the proceedings and such person may need to ensure that a verbatim record of the proceedings is made, at his or her own expense, and which record includes the testimony and evidence on which the appeal is based.
***Please note that because of the COVID-19 public health emergency and to protect the public and follow the CDC guidance regarding social distancing, such meetings may be held telephonically, virtually, or at another location in the event the above location is not available. Please check the District's website for the latest information: <https://summitfernhillcdd.com/>**

LEGAL NOTICE

IN THE CIRCUIT COURT OF THE
13th JUDICIAL CIRCUIT, IN AND FOR
HILLSBOROUGH COUNTY, FLORIDA

Case No.: 20-DR-009661
Division: AP

Michael Monger,
Plaintiff/Petitioner
and
Melissa Monger,
Defendant/Respondent

**NOTICE OF ACTION FOR
DISSOLUTION OF MARRIAGE
(NO CHILD OR FINANCIAL SUPPORT)**

TO: Melissa Monger
Address Unknown

YOU ARE NOTIFIED that an action for Divorce has been filed against you and that you are required to serve a copy of written defenses, if any, to it on **Michael Monger**, whose address is **3130 West Lambricht Street, Tampa, FL 33614**, on or before **September 15, 2020**, and file the original with Clerk of this Court, at 800 East Twiggs Street, Tampa, FL 33602 or, before service on Petitioner or immediately thereafter.

If you fail to do so, a default may be entered against you for the relief demanded in the Petition.

The action is asking the court to decide how the following real or personal property should be divided: **NONE**

Copies of all court documents in this case, including orders, are available at the Clerk of the Circuit Court's Office. You may review these documents upon request.

You must keep the Clerk of the Circuit Court's Office notified of your current address. (You may file Designation of Current Mailing and E-Mail Address, Florida Supreme Court Approved Family Law Form 12.915). Future papers in this lawsuit will be mailed to the address on record at the clerk's office.

WARNING: Rule 12.285, Florida Family Law Rules of Procedure, requires certain automatic disclosure of documents and information. Failure to comply can result in sanctions, including dismissal or striking of pleadings.

Dated: **August 6, 2020**

PAT FRANK
CLERK OF THE CIRCUIT COURT

By: **/s/ PAULA DIXON**
DEPUTY CLERK

**ANNOUNCEMENT OF LOCATION AND DESIGN CONCEPT ACCEPTANCE
Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS)
Record of Decision (ROD) / Section 4(F) Evaluation**

I-275 (SR 93) from the Howard Frankland Bridge to north of Dr. Martin Luther King Jr. Boulevard (SR 574) and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41) Hillsborough County, Florida. Work Program Identification Segment: 258337-2

On September 15, 2020, the Federal Highway Administration (FHWA) granted Location and Design Concept Acceptance for the Tampa Interstate Study (TIS) Supplemental Environmental Impact Statement (SEIS), Record of Decision (ROD), and Section 4(f) Evaluation for the area of I-275 (SR 93) from the Howard Frankland Bridge to North of Dr. Martin Luther King, Jr. Boulevard and I-4 (SR 400) from I-275 (SR 93) to east of 50th Street (US 41). This action is scheduled to be published in the Federal Register (www.federalregister.gov) on September 25, 2020.

The Preferred Alternative includes the proposed improvements on I-275 from the Howard Frankland Bridge to Rome Avenue including the existing four general purpose lanes and two new express lanes in each direction, auxiliary lanes in between ramps, and full reconstruction of the Westshore Area Interchange (I-275/SR 60). At a local level, the improvements include reconnecting Peo Street, Occident Street, and Trask Street beneath the interstate. This will enhance the walk/bike network and traffic circulation in the Westshore Business District by addressing traffic bottlenecks on West Shore Boulevard and improving access and connectivity. From Rome Avenue to north of the Hillsborough River, proposed improvements include the addition of express lanes along I-275 that will terminate into Downtown Tampa. In addition, operational improvements are proposed within the Downtown Tampa Interchange (I-275/I-4) to enhance safety and traffic operations by addressing most of the existing bottlenecks and high crash rates drivers experience. All project documents are available on the project website at: www.tampainterstatestudy.com.

This project is now eligible to move to the next phase of development. FDOT will continue to work with the public and our agency partners during future project phases.

For design phase questions contact: Mary Lou Godfrey, P.E., Senior Project Manager at MaryLou.Godfrey@dot.state.fl.us or 813.975.6621 | 800.226.7220

For environmental phase questions contact: Kirk Bogen, P.E., Environmental Management Engineer at Kirk.Bogen@dot.state.fl.us or 813.975.6448 | 800.226.7220

personally known sworn to and subscribed before me
on this 25TH day of SEPTEMBER, A.D. 2020

ANUNCIO DE UBICACIÓN Y ACEPTACIÓN DEL CONCEPTO DE DISEÑO

Estudio Interestatal de Tampa (TIS) Declaración de Impacto Ambiental Suplementario (SEIS) Registro de Decisión (ROD) / Sección 4(F) Evaluación

I-275 (SR 93) desde el puente Howard Frankland hasta el norte de Dr. Martin Luther King Jr. Boulevard (SR 574) e I-4 (SR 400) de I-275 (SR 93) al este de la calle 50 (US 41)
Condado de Hillsborough, Segmento de Identificación del Programa de Trabajo No.: 258337-2

El 15 de septiembre del 2020, la Administración Federal de Carreteras (FHWA) otorgó la Aceptación del Concepto de Ubicación y Diseño para el Estudio Interestatal Suplementario de Tampa (TIS) Declaración de Impacto Ambiental Suplementario (SEIS), Registro de Decisión (ROD), y Sección 4(f) Evaluación para el área de la I-275 (SR 93) desde el puente Howard Frankland hasta el norte de Dr. Martin Luther King, Jr. Boulevard e I-4 (SR 400) de I-275 (SR 93) al este de la calle 50 (US 41). Está previsto que esta acción se publicará en el Registro Federal (www.federalregister.gov) el 25 de septiembre del 2020.

La alternativa preferida incluye las mejoras propuestas en la I-275 desde el puente Howard Frankland hasta la avenida Roma, incluyendo los cuatro carriles de propósito general existentes y dos carriles nuevos expresos en cada dirección, carriles auxiliares entre rampas y reconstrucción completa del Intercambiador en Westshore (I-275/SR 60). A nivel local, las mejoras incluyen volver a conectar la calle Reo, la calle Occident y la calle Trask debajo de la interestatal. Esto mejorará la red de caminar/andar en bicicletas y la circulación de tráfico en el distrito financiero de Westshore al abordar los embotellamientos de tráfico en Westshore Boulevard y mejorar el acceso y la conectividad. Desde la avenida de Roma hacia el norte del río Hillsborough, las mejoras propuestas incluyen la adición de carriles expresos a lo largo de la I-275 que terminará en el centro de Tampa. Además, se proponen mejoras operacionales dentro del Intercambiador en Downtown Tampa (I-275/I-4) para mejorar las operaciones de seguridad y tráfico al abordar la mayoría de los embotellamientos existentes y la alta experiencia de los conductores de tasas de accidentes. Todos los documentos del proyecto están disponibles en el sitio web del proyecto en: www.tampainterstatestudy.com.

Este proyecto es ahora elegible para pasar a la siguiente fase de desarrollo. FDOT continuará trabajando con el público y nuestros socios de agencia durante futuras fases del proyecto.

Para obtener más información, póngase en contacto con: Kirk Bogen, P.E., Departamento de Transporte de Florida, Ingeniero de Gestión Ambiental, 813.975.6448, 800.226.7220, Kirk.Bogen@dot.state.fl.us

Para obtener más información sobre la fase de diseño, póngase en contacto con: Mary Lou Godfrey, P.E., Departamento de Transporte de Florida, Ingeniero de Proyecto, 813.975.6621, 800.226.7220, MaryLou.Godfrey@dot.state.fl.us

La participación pública se solicita sin tener en cuenta la raza, el color, el origen nacional, la edad, el sexo, la religión, la discapacidad o el estado familiar.

Comuníquese con nosotros: Nos importa mucho la opinión del público sobre el proyecto. Si tiene preguntas o comentarios, o simplemente desea más información, por favor comuníquese con nosotros.
