

CINERGY HTC STICK HD

The small, lightweight universal receiver for the HD experience on your PC or Notebook

DVB-T / DVB-C / receiver for PC and Notebook

- USB receiver for digital TV and radio
- Includes HDTV support
- Reception via cable and aerial (DVB-T, DVB-C)
- Analogue inputs to digitalise videos
- Including remote control and DTT antenna

The CINERGY HTC STICK HD is the modern universal TV tuner for your PC. Plugged into a USB port the stick receives digital terrestrial television (DVB-T, Freeview) via an outdoor or indoor antenna as well as digital cable TV. And thanks to the remote control included in the package, you won't have to get off your couch.

The TV-software provided turns television on the computer into an experience. You can easily record the program that is in progress to your computer's hard drive, and can later burn all episodes of your favourite series to a DVD. Time shifting is very useful indeed. If your Sunday mystery has already begun and the pizza delivery man rings the doorbell, simply pause the program that is in progress at the touch of a button – and, after the interruption, pick up right where you left off! The built-in electronic program guide (EPG) and the familiar teletext make personal TV planning easier than ever.

The CINERGY HTC STICK HD offers unlimited TV freedom: Simply plug the stick into a USB slot and you can receive digital terrestrial (DVB-T) television via the external or room antenna or cable TV (DVB-C) via an existing cable TV box connection. The remote control supplied gives you all the comfort of the living room. The TV-software makes watching television on the computer a real experience. Simply record the programmes you want to the hard drive of your computer. You can even burn them onto a DVD. Timeshift television: If you're watching a whodunnit on a Sunday afternoon when your pizza delivery arrives, you can simply pause the programme you are watching by pressing a button and carry on watching the film afterwards! The built-in electronic programme guide (EPG) and video text service make planning your television viewing easier than ever before.

Analogue Inputs

Besides watching TV on computer, you can also digitalize and edit your analogue videos with this product and save them to your hard drive, Mediaplayer or network drive (NAS).
