

REFERENCES FOR THE FLORA DATABASE OF HIGHER NAMIBIAN PLANTS

Patricia Craven and Herta Kolberg

Updated 15 May 2020

References are indicated by numbers in [] in the database and arranged numerically here to find them easier. The list is not yet complete and errors in citation need to be corrected.

Please note that only publications of taxonomic nature have been included here.

Local publications:

Prodromus einer Flora von Südwestafrika was the starting point for a checklist of Namibian plants that has been expanded and updated by Craven and Kolberg since the 1980s and continued in our BRAHMS database
