Disclaimer

The information in this guide is subject to change without notice.

Acer Incorporated makes no representations or warranties, either expressed or implied, with respect to the contents hereof and specifically disclaims any warranties of merchantability or fitness for any particular purpose. Any Acer Incorporated software described in this manual is sold or licensed "as is". Should the programs prove defective following their purchase, the buyer (and not Acer Incorporated, its distributor, or its dealer) assumes the entire cost of all necessary servicing, repair, and any incidental or consequential damages resulting from any defect in the software.

Conventions

The following conventions are used in this manual:

SCREEN MESSAGES	Denotes actual messages that appear on screen.
NOTE	Gives bits and pieces of additional information related to the current topic.
WARNING	Alerts you to any damage that might result from doing or not doing specific actions.
CAUTION	Gives precautionary measures to avoid possible hardware or software problems.
IMPORTANT	Reminds you to do specific actions relevant to the accomplishment of procedures.

Preface

Before using this information and the product it supports, please read the following general information.

1. This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's "global" product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

System Specifications

Features

Below is a brief summary of the computer's many feature:

Platform and memory

- Intel® Centrino® Duo mobile processor technology, featuring: (for selected models)
  - Intel® Core™2 Duo Mobile Processor T7300/T7500/T7700 (4 MB L2 cache, 2/2.2/2.4 GHz, 800 MHz FSB), or T7100 (2 MB L2 cache, 1.8 GHz, 800 MHz FSB), or higher, supporting Intel® 64 architecture (for selected models)
  - Mobile Intel® PM965/GM965/GL960 Express Chipset (for selected models)
  - Intel® Wireless WiFi Link 4965AGN (dual-band quad-mode 802.11a/b/g/Draft-N) Wi-Fi CERTIFIED® network connection, supporting Acer SignalUp™ with InviLink™ Nplify™ wireless technology (for selected models)
  - Intel® PRO/Wireless 3945ABG (dual-band tri-mode 802.11a/b/g) Wi-Fi CERTIFIED® network connection, supporting Acer SignalUp™ wireless technology (for selected models)
- Intel® Celeron® processor 530/540/550 (1 MB L2 cache, 1.73/1.86/2.0 GHz, 533 MHz FSB) or higher, supporting Intel® 64 architecture (for selected models)
- Acer InviLink™ 802.11b/g Wi-Fi CERTIFIED® solution, supporting Acer SignalUp™ wireless technology (for selected models)
- Acer InviLink™ 802.11a/b/g/Draft-N Wi-Fi CERTIFIED® solution, supporting Acer SignalUp™ with Nplify™ wireless technology (for selected models)
- Up to 2 GB of DDR2 667 MHz memory (for TM7320), upgradeable to 4 GB using two soDIMM modules (dual-channel support)

Display and graphics

- 17" WXGA+ TFT LCD, 1400 x 900 pixel resolution, supporting simultaneous multi-window viewing via Acer GridVista™
- Mobile Intel® GM965/GL960 Express Chipset with integrated 3D graphics, featuring Intel® Graphic Media Accelerator (GMA) X3100 with up to 358 MB of Intel® Dynamic Video Memory Technology 4.0 (8MB of dedicated system memory, up to 350MB of shared system memory), supporting Microsoft® DirectX® 9 and DirectX® 10 (for selected models)
- ATI Mobility™ Radeon® HD 2600/HD 2400 XT with up to 1024MB of HyperMemory™ (512/256 MB of dedicated GDDR2 VRAM, up to 768 MB of shared system memory) supporting Microsoft® DirectX® 9 and DirectX® 10 and PCI Express® (for selected models)
- Dual independent display support
- 16.7 million colors
- MPEG-2/DVD hardware-assisted capability
- S-video/TV-out (NTSC/PAL) support
- DVI-D (true digital video interface) support (for selected models)

Storage subsystem

- One or two 80/120/160 GB or larger hard disk drive with enhanced Acer DASP (Disk Anti-Shock Protection) (for selected models)
- Optical drive options:
  - DVD-Super Multi double-layer drive

- DVD/CD-RW combo drive

- 5-in-1 card reader supporting Secure Digital™ (SD), MultiMediaCard (MMC), Memory Stick® (MS), Memory Stick PRO™ (MS PRO), xD-Picture Card™ (xD)

Input devices

- 105-/106-key keyboard with inverted "T" cursor layout, 2.5 mm (minimum) key travel
- Seamless touchpad pointing device with Acer Bio-Protection fingerprint reader supporting Acer FingerNav 4-way control function (manufacturing option)
- Seamless touchpad pointing device with 4-way scroll button (manufacturing option)
- 12 function keys, four cursor keys, two Windows® keys, hotkey controls, embedded numeric keypad, international language support, independent Euro and US dollar sign keys
- Easy-launch buttons: Acer Empowering Key, Internet, email, user-progammable
- Productivity keys: Lock, Presentation, Sync
- Front-access communication switches: WLAN and Bluetooth®

Audio

- Two built-in Acer 3DSonic stereo speakers
- Intel® High Definition Audio support
- Built-in microphone
- MS-Sound compatible

Communication

- Acer Video Conference featuring:
  - Integrated Acer CrystalEye webcam supporting enhanced Acer PrimaLite™ technology
  - Optional Acer Xpress VoIP phone
- WLAN: Intel® Wireless WiFi Link 4965AGN (dual-band quad-mode 802.11a/b/g/Draft-N) network connection, supporting Acer SignalUp™ with InviLink™ Nplify™ wireless technology (for selected models), or Intel® PRO/Wireless 3945ABG (dual-band tri-mode 802.11a/b/g) Wi-Fi CERTIFIED® network connection, supporting Acer SignalUp™ wireless technology (for selected models), or Acer InviLink 802.11b/g Wi-Fi CERTIFIED® solution, supporting Acer SingalUp™ wireless technology (for selected models)
- WPAN: Bluetooth® 2.0+EDR (Enhanced Data Rate)
- LAN: Gigabit Ethernet; Wake-on-LAN ready
- Modem: 56K ITU V.92 with PTT approval; Wake-on-Ring ready

I/O Ports

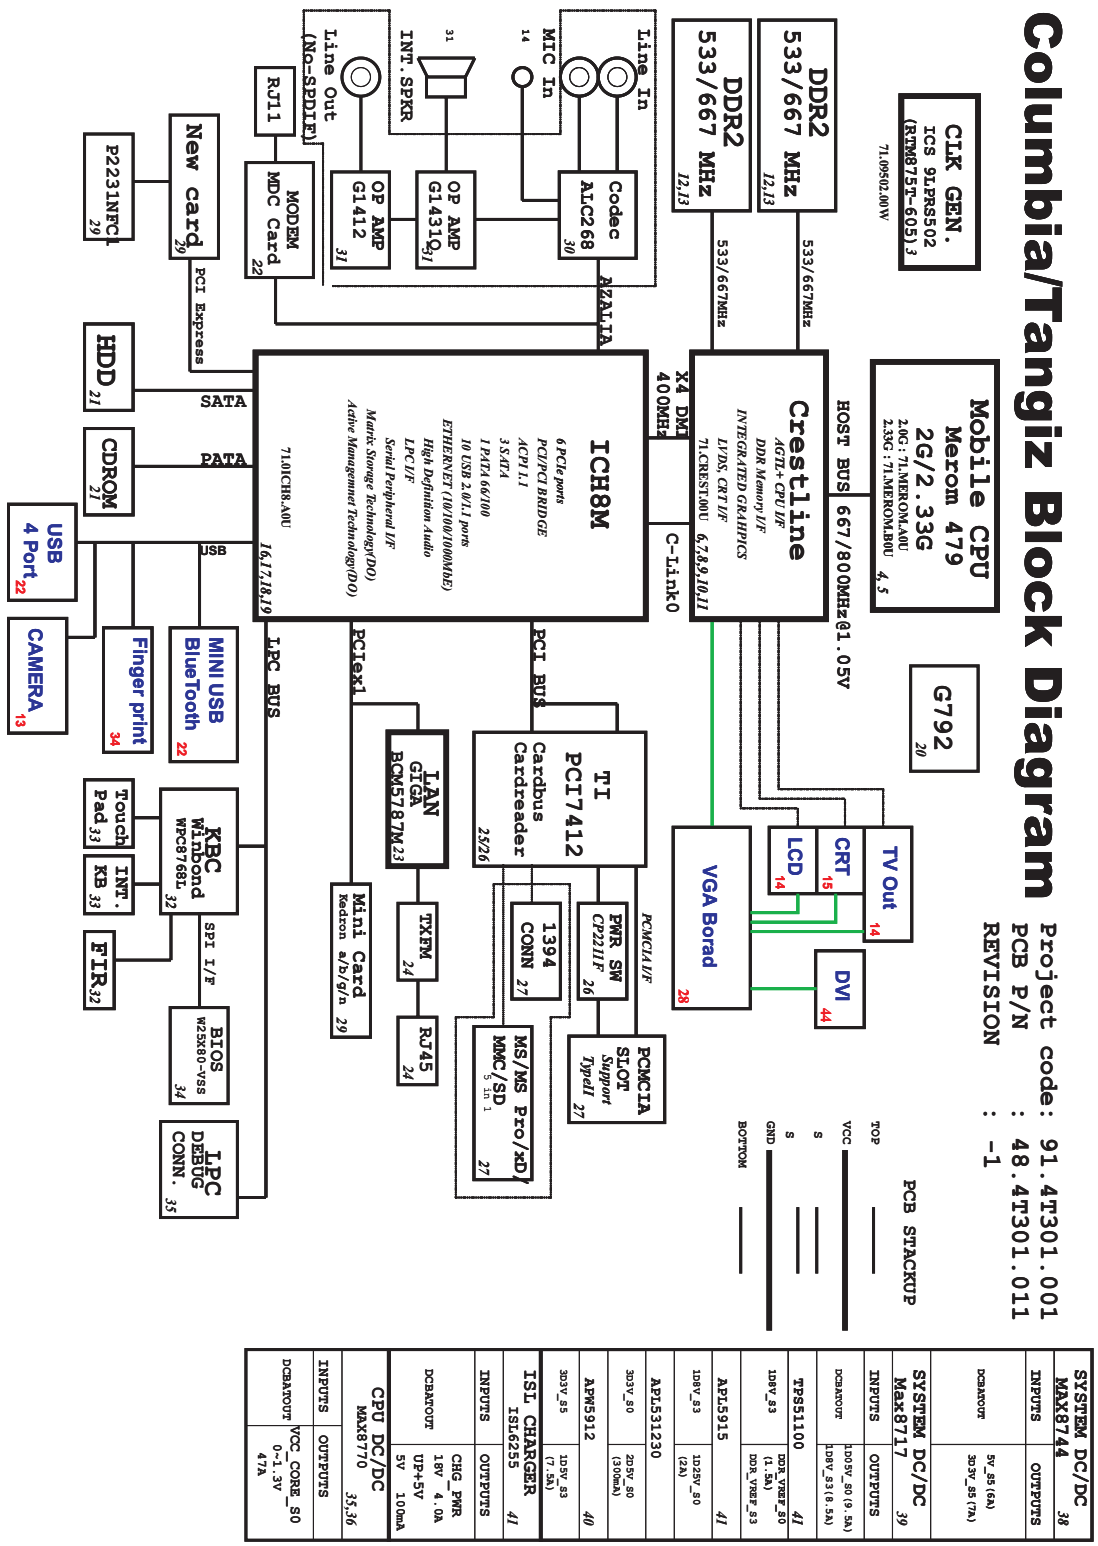
- ExpressCard™/54 slot
- PC Card slot (one Type II)
- 5-in-1 card reader (MS/MS PRO/MMC/SD/xD)
- Four USB 2.0 ports
- DVI-D port (for selected models)
- IEEE 1394 port
- Fast Infrared (FIR) port (for selected models)
- External display (VGA) port
- S-video/TV-out (NTSC/PAL) port
- Headphones/speaker/line-out jack
- Line-in jack

- Microphone jack
- Ethernet (RJ-45) port
- Modem (RJ-11) port
- DC-in jack for AC adaptor

Environment

- Temperature:
  - Operating: 5 °C to 35 °C
  - Non-operating: -20 °C to 65 °C
- Humidity (non-condensing):
  - Operating: 20% to 80%
  - Non-operating: 20% to 80%

System Block Diagram



Your Acer Notebook tour

After knowing your computer features, let us show you around your new TravelMate computer.

Front View

	Icon	Item	Description
1		Acer CrystalEye	0.3 megapixel web camera for video communication.
2		Microphone	Internal microphone for sound recording.
3		Display screen	Also called Liquid-Crystal Display (LCD), displays computer output.
4		Easy-launch buttons	Buttons for launching frequently used programs.
5		Palmrest	Comfortable support area for your hands when you use the computer.

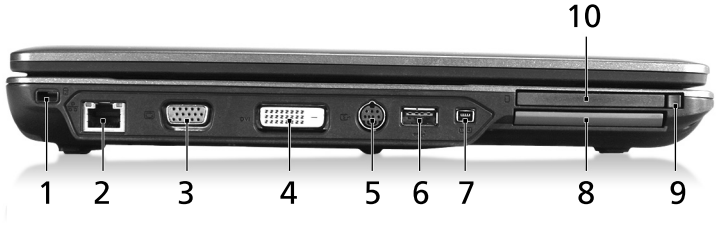
	Icon	Item	Description
6		Click buttons (left, center* and right)	The left and right buttons function like the left and right mouse buttons. *The center button serves as Acer BioProtect fingerprint reader supporting Acer FingerNav 4-way control function (manufacturing option) or a 4-way scroll button (manufacturing option).
7		Status indicators	Light-Emitting Diodes (LEDs) that light up to show the status of the computer's functions and components.
8		Touchpad	Touch-sensitive pointing device which functions like a computer mouse.
9		Keyboard	For entering data into your computer.
10		Power button	Turns the computer on and off.
11		Status indicators	Light-Emitting Diodes (LEDs) that light up to show the status of the computer's functions and components.

Closed Front View

	Icon	Item	Description
1		Latch	Locks and releases the lid.
2		Speakers	Left and right speakers deliver stereo audio output.
3		5-in-1 card reader	Accepts Secure Digital (SD, MultiMediaCard (MMC), Memory Stick (MS), Memory Stick Pro (MS PRO), and xD-Picture Card. **Note:** Only one card can operate at any given time.
4		Line-in jack	Accepts audio line-in devices (e.g., audio CD player, stereo walkman, mp3 player)
5		Microphone jack	Accepts inputs from external microphones.
6		Headphones/ speaker/line-out jack	Connects to audio line-out devices (e.g., speakers, headphones).
7		Infrared port	Interfaces with infrared devices (e.g., infrared printer and IR-aware computer).
8		Bluetooth communication switch	Enable/disable the Bluetooth function. Indicates the status of Bluetooth communication (manufacturing option).

	Icon	Item	Description
9		Wireless communication switch	Enable/disable the wireless function. Indicates the status of wireless LAN communication (manufacturing option).

Left View



#	Icon	Item	Description
1		Kensington lock slot	Connects to a Kensington-compatible computer security lock.
2		Ethernet (RJ-45) port	Connects to an Ethernet 10/100/1000-based network.
3		External display (VGA) port	Connects to a display device (e.g., external monitor, LCD projector).
4	DVI-D	DVI-D port	Supports digital video connections.
5		S-Video/TV-out (NTSC/PAL) port	Connects to a television or display device with S-video input.
6		USB 2.0 port	Connects to USB 2.0 devices (e.g., USB mouse, USB camera).
7	1394	IEEE 1394 port	Connects to IEEE 1394 devices.
8	EXPRESS CARD	ExpressCard/54 slot	Accepts one ExpressCard/54 module.
9		PC Card slot eject button	Ejects the PC Card from the slot.
10		PC Card slot	Accepts one Type II PC Card.

Right View

	Icon	Item	Description
1		Optical drive	Internal optical drive; accepts CDs or DVDs
2		Optical disk access indicator	Lights up when the optical drive is active.
3		Optical drive eject button	Ejects the optical disk from the drive.
4		Emergency eject hole	Ejects the optical drive tray when the computer is turned off.

Rear Panel

#	Icon	Item	Description
1		Three USB 2.0 ports	Connect to USB 2.0 devices (e.g., USB mouse, USB camera).
2		Modem (RJ-11) port	Connects to a phone line.
3		DC-in jack	Connects to an AC adapter.
4		Ventilation slots	Enable the computer to stay cool, even after prolonged use.

Bottom Panel

	Icon	Item	Description
1		Second Hard disk bay	Houses the computer’s optional second hard disk. (Secured with a screw).
2		Memory compartment	Houses the computer's main memory.
3		Battery lock	Locks the battery in position.
4		Battery release latch	Releases the battery to remove the battery pack.
5		Battery bay	Houses the computer's battery pack.
6		Ventilation slots	Enable the computer to stay cool, even after prolonged use.
7		Hard disk bay	Houses the computer’s hard disk (secured with screws)

Indicators

The computer has several easy-to-read status indicators:

The front panel indicators are visible even when the computer cover is closed.

Icon	Function	Description
	Power	Indicates the computer's power status.
	Battery	Indicates the computer's battery status.
	Bluetooth	Indicates the status of Bluetooth communication.
	Wireless LAN	Indicates the status of wireless LAN communication.
	HDD	Indicates when the hard disk drive is active.
	Num Lock	Lights up when Num Lock is activated.
	Caps Lock	Lights up when Caps Lock is activated.

NOTE: 1. **Charging:** The light shows amber when the battery is charging. 2. **Fully charged:** The light shows green when in AC mode.

Easy-Launch Buttons

There are several conveniently located easy-launch buttons. They are: mail Web browser, Empowering Key "e "and one user-programmable button.

Press "e "to run the Acer Empowering Technology. The mail and Web browser buttons are pre-set to email and Internet programs, but can be reset by users. To set the Web browser, mail and programmable buttons, run the Acer Launch Manager.

Launch key	Default application
e	Acer Empowering Technology (user-programmable)
✉	Email application (user-programmable)

Launch key	Default application
	Internet browser (user-programmable)
P	User-programmable

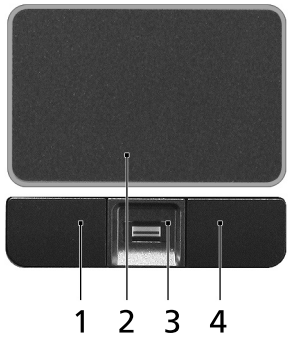
Three productivity keys give users one-touch access to protection and manageability features for a more secure, smarter and easier way to work.

- Lock key - runs the Windows® lock function to lock the notebook when you step out. If the laptop is equipped with Acer BioProtect, you only need to swipe your finger to log into Windows® again.
- Presentation key - minimizes open application windows and prepares the display for impressive presentations.
- Sync key - instantly synchronizes your computer system to an external storage device, for convenient and secure backup.

Icon	Productivity key	Default application
	Lock	Launch Windows Lock function
	Presentation	Minimizes your open windows and prepares your display for presenting
	Sync	Launch NTI Shadow

Touchpad Basics

The following teaches you how to use the touchpad:



- Move your finger across the touchpad (2) to move the cursor.
- Press the left (1) and right (4) buttons located beneath the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad is the same as clicking the left button.
- Use the 4-way scroll (3) button to scroll up or down and move left or right a page. This button mimics your cursor pressing on the right scroll bar of Windows applications.

Function	Left Button (1)	Right Button (4)	Main touchpad (2)	Center button (3)
Execute	Click twice quickly		Tap twice (at the same speed as double-clicking the mouse button)	
Select	Click once		Tap once	
Drag	Click and hold, then use finger to drag the cursor on the touchpad		Tap twice (at the same speed as double-clicking a mouse button) then hold finger to the touchpad on the second tap to drag the cursor.	
Access context menu		Click once		
Scroll				Click and hold to move up/down/left/right.

NOTE: When using the touchpad, keep it - and your fingers - dry and clean. The touchpad is sensitive to finger movement; hence, the lighter the touch, the better the response. Tapping too hard will not increase the touchpad's responsiveness.

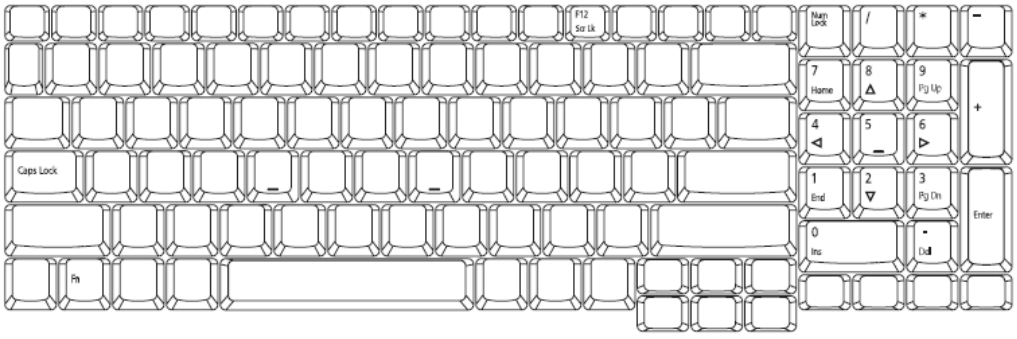
NOTE: By default, vertical and horizontal scrolling is enabled on your touchpad. It can be disabled under Mouse settings in Windows Control Panel.

Using the Keyboard

The keyboard has full-sized keys and an embedded numeric keypad, separate cursor, lock, Windows, function and special keys.

Lock Keys and embedded numeric keypad

The keyboard has three lock keys which you can toggle on and off.



Lock key	Description
Caps Lock	When Caps Lock is on, all alphabetic characters typed are in uppercase.
Num Lock **<Fn> + <F11>**	When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad.
Scroll Lock **<Fn> + <F12>**	When Scroll Lock is on, the screen moves one line up or down when you press the up or down arrow keys respectively. Scroll Lock does not work with some applications.

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

Desired access	Num Lock on	Num Lock off
Number keys on embedded keypad	Type numbers in a normal manner.	
Cursor-control keys on embedded keypad	Hold **<Shift>** while using cursor-control keys.	Hold **<Fn>** while using cursor-control keys.
Main keyboard keys	Hold **<Fn>** while typing letters on embedded keypad.	Type the letters in a normal manner.

Windows Keys

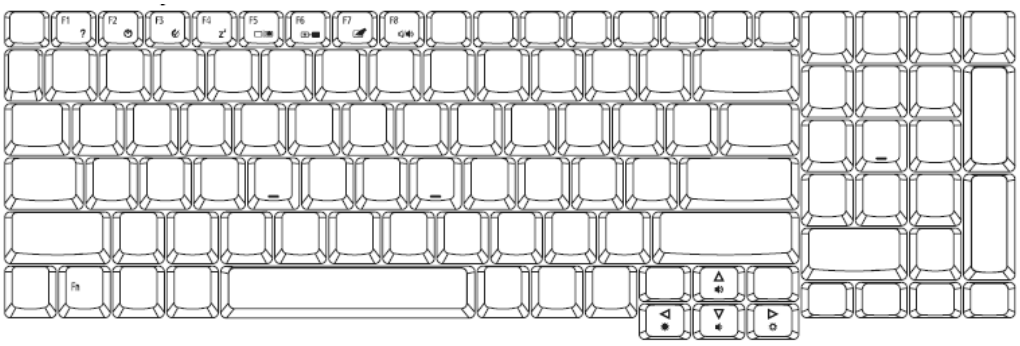
The keyboard has two keys that perform Windows-specific functions.

Key	Description	Key
Windows key	Pressed alone, this key has the same effect as clicking on the Windows Start button; it launches the Start menu. It can also be used with other keys to provide a variety of functions: <(⊞)>: Open or close the Start menu **<(⊞)> + <D>:** Display the desktop **<(⊞)> + <E>:** Open Windows Explore <(⊞)> + <F>: Search for a file or folder <(⊞)> + <G>: Cycle through Sidebar gadgets <(⊞)> + <L>: Lock your computer (if you are connected to a network domain), or switch users (if you're not connected to a network domain) <(⊞)> + <M>: Minimizes all windows **<(⊞)> + <R>:** Open the Run dialog box <(⊞)> + <T>: Cycle through programs on the taskbar **<(⊞)> + <U>:** Open Ease of Access Center <(⊞)> + <X>: Open Windows Mobility Center <(⊞)> + <BREAK>: Display the System Properties dialog box **<(⊞)> + <SHIFT+M>:** Restore minimized windows to the desktop **<(⊞)> + <TAB>:** Cycle through programs on the taskbar by using Windows Flip 3-D **<(⊞)> + <SPACEBAR>:** Bring all gadgets to the front and select Windows Sidebar **<CTRL> + <(⊞)> + <F>:** Search for computers (if you are on a network) **<CTRL> + <(⊞)> + <TAB>:** Use the arrow keys to cycle through programs on the taskbar by using Windows Flip 3-D **Note:** Depending on your edition of Windows Vista, some shortcuts may not function as described.	Windows key
Application key	This key has the same effect as clicking the right mouse button; it opens the application's context menu.	Application key

Hot Keys

The computer employs hotkeys or key combinations to access most of the computer's controls like screen brightness, volume output and the BIOS utility.

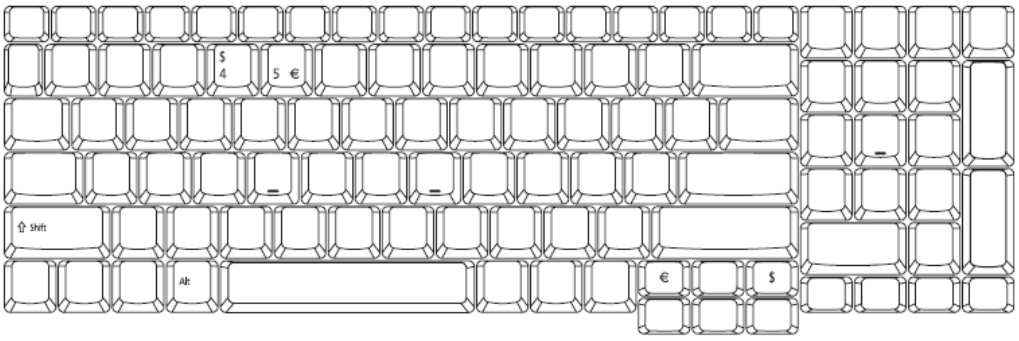
To activate hot keys, press and hold the <**Fn>** key before pressing the other key in the hotkey combination.



Hotkey	Icon	Function	Description
<Fn> + <F1>	?	Hotkey help	Displays help on hotkeys.
<Fn> + <F2>		Acer eSettings	Launches Acer eSettings in Acer Empowering Technology.
<Fn> + <F3>		Acer ePower Management	Launches Acer ePower Management in Acer Empowering Technology.
<Fn> + <F4>	z z	Sleep	Puts the computer in Sleep mode.
<Fn> + <F5>		Display toggle	Switches display output between the display screen, external monitor (if connected) and both.
<Fn> + <F6>		Screen blank	Turns the display screen backlight off to save power. Press any key to return.
<Fn> + <F7>		Touchpad toggle	Turns the internal touchpad on and off.
<Fn> + <F8>		Speaker toggle	Turns the speakers on and off.
<Fn> + <↑>		Volume up	Increases the sound volume.
<Fn> + <↓>		Volume down	Decreases the sound volume.
<Fn> + <→>		Brightness up	Increases the screen brightness.
<Fn> + <←>		Brightness down	Decreases the screen brightness.

Special Key

You can locate the Euro symbol and the US dollar sign at the upper-center and/or bottom-right of your keyboard.



The Euro symbol

1. Open a text editor or word processor.
2. Either press < € > at the bottom-right of the keyboard, or hold <Alt Gr> and then press the <5> key at the upper-center of the keyboard.

The US dollar sign

1. Open a text editor or word processor.
2. Either directly press the **< $ >** key at the bottom-right of the keyboard, or hold **<Shift>** and then press the **<4>** key at the upper-center of the keyboard.

NOTE: This function varies by the operating system version.

NOTE: Some fonts and software do not support the Euro symbol. Please refer to www.microsoft.com/typography/faq/faq12.htm for more information.

Acer Empowering Technology

The Empowering Technology toolbar makes it easy for you to access frequently used functions and manage your new Acer system. Displayed by default in the upper half of your screen, it provides access to the following utilities:

- **Acer eNet Management** hooks up to location-based networks intelligently.
- **Acer ePower Management** optimizes battery usage via customizable power plans.
- **Acer ePresentation Management** connects to a projector and adjusts display settings.
- **Acer eDataSecurity Management** protects data with passwords and encryption.
- **Acer eLock Management** limits access to external storage media.
- **Acer eRecovery Management** backs up and recovers data flexibly, reliably and completely.
- **Acer eSettings Management** accesses system information and adjusts settings easily.

For more information, right click on the Empowering Technology toolbar, then select the **"Help"** or "**Tutorial"** function.

Empowering Technology password

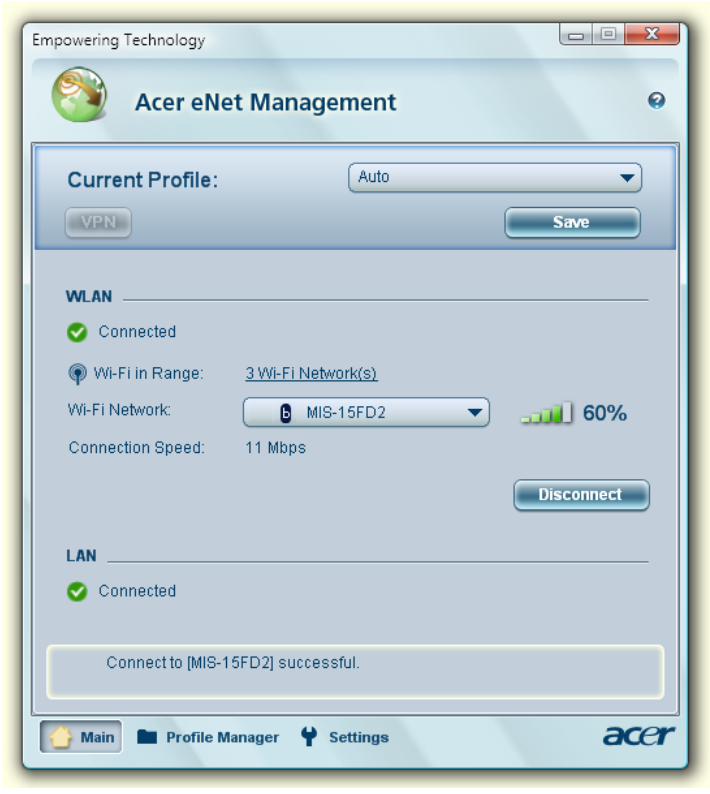
Before using Acer eLock Management and Acer eRecovery Management, you must initialize the Empowering Technology password. Right-click on the Empowering Technology toolbar and select **"Password Setup"** to do so. If you have not initialized the Empowering Technology password and run Acer eLock Management or Acer eRecovery Management, you will be asked to create it.

NOTE: If you lose the Empowering Technology password, there is no way to reset it except by reformatting your system. Make sure to remember or write down your password!

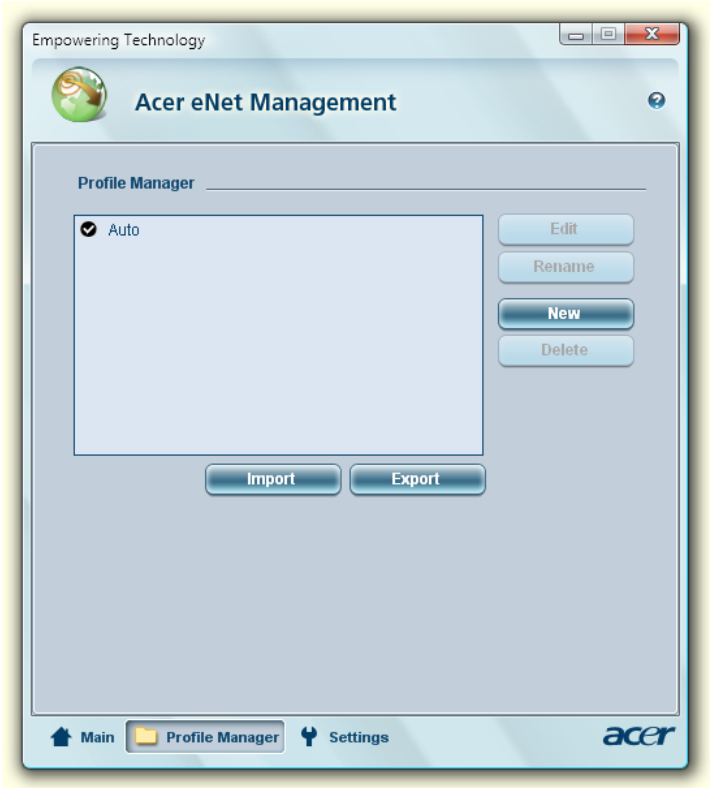
Acer eNet Management

Acer eNet Management helps you quickly connect to both wired and wireless networks in a variety of locations. To access this utility, select **"Acer eNet Management"** from the Empowering Technology toolbar or run the program from the Acer Empowering Technology program group in Start menu. You can also set Acer eNet Management to start automatically when you boot up your PC.

Acer eNet Management automatically detects the best settings for a new location, while offering you the option to manually adjust the settings to match your needs.



Acer eNet Management can save network settings for a location to a profile, and automatically switch to the appropriate profile when you move from one location to another. Settings stored include network connection settings (IP and DNS settings, wireless AP details, etc.), as well as default printer settings. Security and safety concerns mean that Acer eNet Management does not store username and password information.



Acer ePower Management

Acer ePower Management features a straightforward user interface for configuring your power management options. To access this utility, select **"Acer ePower Management"** from the Empowering Technology toolbar, run the program from the Acer Empowering Technology program group in Start menu, or right-click the Windows power icon in the system tray and select **"Acer ePower Management"**.

Using power plans

Acer ePower Management comes with three predefined power plans: Balanced, High performance and Power saver. You can also create customized power plans. You can create, switch between, edit, delete and restore power plans, as described below.

View and adjust settings for On Battery and Plugged In modes by clicking the appropriate tabs. You can open Windows power options by clicking **"More Power Options"**.

NOTE: You cannot delete the predefined power plans.

To create a new power plan:

Creating customized power plans allows you to save and quickly switch to a personalized set of power options.

1. Click the Create Power Plan icon.
2. Enter a name for your new power plan.
3. Choose a predefined power plan to base your customized plan on.
4. If necessary, change the display and sleep settings you want your computer to use.
5. Click **"OK"** to save your new power plan.

To switch between power plans:

1. Select the power plan you wish to switch to from the drop-down list.
2. Click **"Apply"**.

To edit a power plan:

Editing a power plan allows you to adjust system settings like LCD brightness and CPU speed. You can also turn on/off system components to extend battery life.

1. Switch to the power plan you wish to edit
2. Adjust settings as required.
3. Click **"Apply"** to save your new settings.

To delete a power plan:

You cannot delete the power plan you are currently using. If you want to delete the active power plan, switch to another one first.

1. Select the power plan you wish to delete from the drop-down list.
2. Click the Delete Power Plan icon.

Battery status

For real-time battery life estimates based on current usage, refer to the panel in the upper half of the window.

Click the to view estimated battery life in sleep and hibernate modes.

Acer ePresentation Management

Acer ePresentation Management lets you project your computer's display to an external display device or projector using the hotkey: **<Fn> + <F5>**. If auto-detection hardware is implemented in the system and the external display supports it, your system display will be automatically switched out when an external display is

connected to the system. For projectors and external devices that are not auto-detected, launch Acer ePresentation Management to choose an appropriate display setting.

NOTE: If the restored resolution is not correct after disconnecting a projector, or you need to use an external resolution that is not supported by Acer ePresentation Management, adjust your display settings using Display Properties or the utility provided by the graphics vendor.

Acer eDataSecurity Management

Acer eDataSecurity Management is an encryption utility that protects your files from being accessed by unauthorized persons. It is conveniently integrated with Windows Explorer as a shell extension for quick data encryption/decryption and also supports on-the-fly file encryption for Lotus Notes and Microsoft Outlook.

The Acer eDataSecurity Management setup wizard will prompt you for a supervisor password and default encryption password. This password will be used to encrypt files by default, or you can choose to enter your own password when encrypting a file.

NOTE: The password used to encrypt a file is the unique key that the system needs to decrypt it. If you lose the password, the supervisor password is the only other key capable of decrypting the file. If you lose both passwords, there will be no way to decrypt your encrypted file! **Be sure to safeguard all related passwords!**

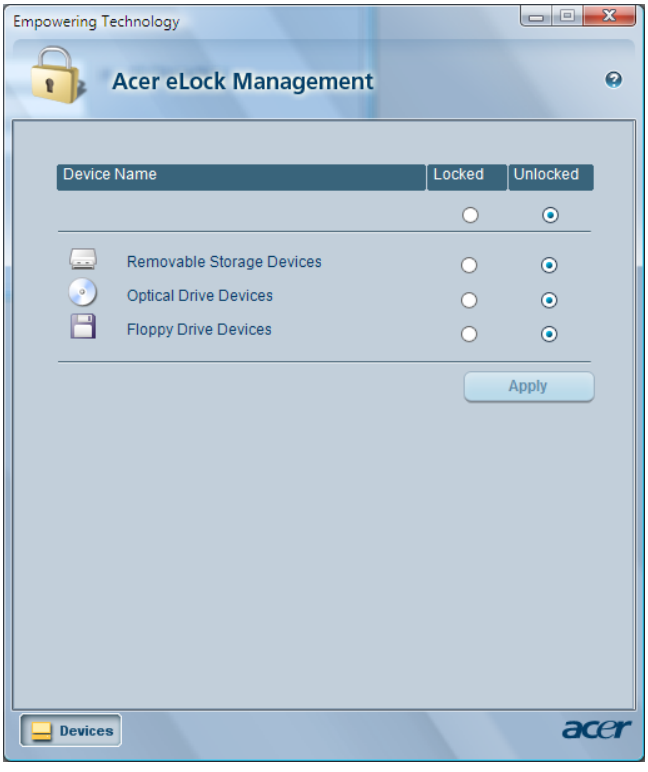
Acer eLock Management

Acer eLock Management is simple yet effective utility that allows you to lock removable storage, optical and floppy drive devices to ensure that data can't be stolen while your system is unattended.

- Removable Storage Devices — includes USB disk drives, USB pen drives, USB flash drives, USB MP3 drives, USB memory card readers, IEEE 1394 disk drives, and any other removable storage devices that can be mounted as a file system when plugged into the system.
- Optical Drive Devices — includes any kind of CD-ROM, DVD-ROM, HD-DVD or Blu-ray drive devices.
- Floppy Drive Devices — 3.5-inch floppy drives only.

To use Acer eLock Management, the Empowering Technology password must be set first. Once set, you can apply locks to any of the devices types. Lock(s) will immediately be set without any reboot necessary, and will remain after rebooting, until removed.

NOTE: If you lose the Empowering Technology password, there is no method to reset it except by reformatting your system. Make sure to remember or write down your password.

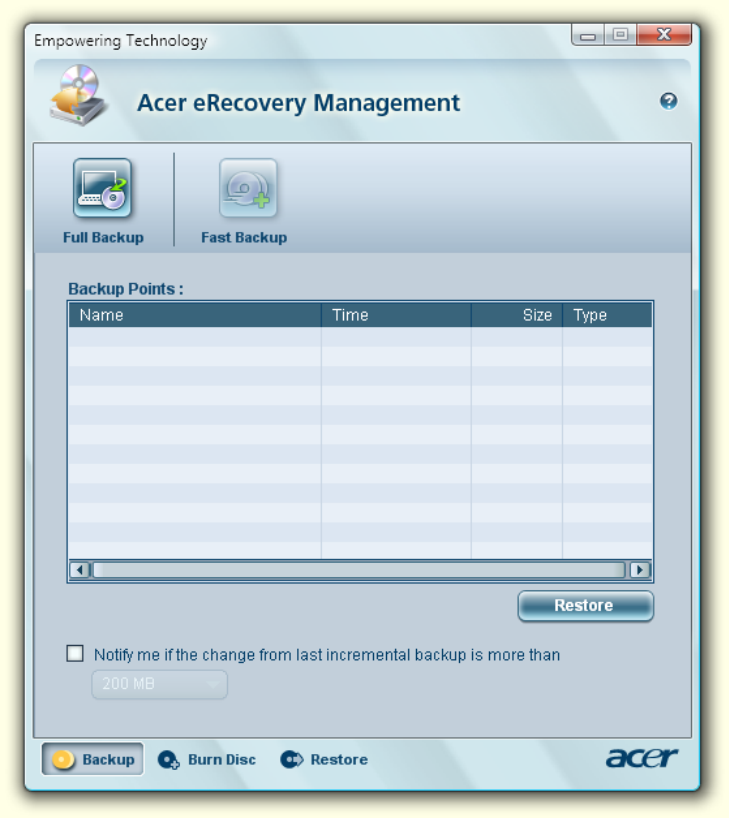


Acer eRecovery Management

Acer eRecovery Management is a versatile backup utility. It allows you to create full or incremental backups, burn the factory default image to optical disc, and restore from previously created backups or reinstall applications and drivers. By default, user-created backups are stored to the D:\ drive.

Acer eRecovery Management provides you with:

- Password protection (Empowering Technology password)
- Full and incremental backups to hard disk or optical disc
- Creation of backups:
  - Factory default image
  - User backup image
  - Current system configuration
  - Application backup
- Restore and recovery:
  - Factory default image
  - User backup image
  - From previously-created CD/DVD
  - Reinstall applications/drivers



For more information, please refer to **"Acer eRecovery Management" on page 61** in the **AcerSystem User's Guide**.

NOTE: If your computer did not come with a Recovery CD or System CD, please use Acer eRecovery Management's "System backup to optical disc" feature to burn a backup image to CD or DVD. To ensure the best results when recovering your system using a CD or Acer eRecovery Management, detach all peripherals (except the external Acer ODD, if your computer has one), including your Acer ezDock.

Acer eSettings Management

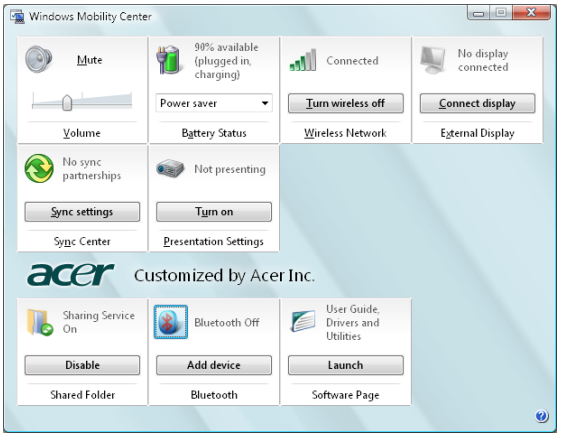
Acer eSettings Management allows you to inspect hardware specifications, set BIOS passwords and modify boot options.

Acer eSettings Management also:

- Provides a simple graphical user interface for navigation.
- Prints and saves hardware specifications.

- Lets you set an asset tag for your system.

Windows Mobility Center



The Windows Mobility Center collects key mobile-related system settings in one easy-to-find place, so you can quickly configure your Acer system to fit the situation as you change locations, networks or activities. Settings include display brightness, power plan, volume, wireless networking on/off, external display settings, display orientation and synchronization status.

Windows Mobility Center also includes Acer-specific settings like Bluetooth Add Device (if applicable), sharing folders overview/sharing service on or off, and a shortcut to the Acer user guide, drivers and utilities.

To launch Windows Mobility Center:

- Use the shortcut key <**> + <X>**
- Start Windows Mobility Center from the Control panel
- Start Windows Mobility Center from the Accessories program group in the Start menu.

Using the System Utilities

Acer Bio-Protection (for selected models)

Acer Bio-Protection Fingerprint Solution is a multi-purpose fingerprint software package integrated with the Microsoft® Windows® operating system. Utilizing the uniqueness of one's fingerprint features, Acer Bio-Protection Fingerprint Solution has incorporated protection against unauthorized access to your computer with Pre-Boot Authentication (PBA), centralized password management with Password Bank, and fast application/website launching and login with Acer FingerLaunch.

Acer Bio-Protection Fingerprint Solution also allows you to navigate through web browsers and documents using Acer FingerNav. With Acer Bio-Protection Fingerprint Solution, you can now enjoy an extra layer of protection for your personal computer, as well as the convenience of accessing your daily tasks with a simple swipe of your finger!

For more information refer to the Acer Bio-Protection help files.

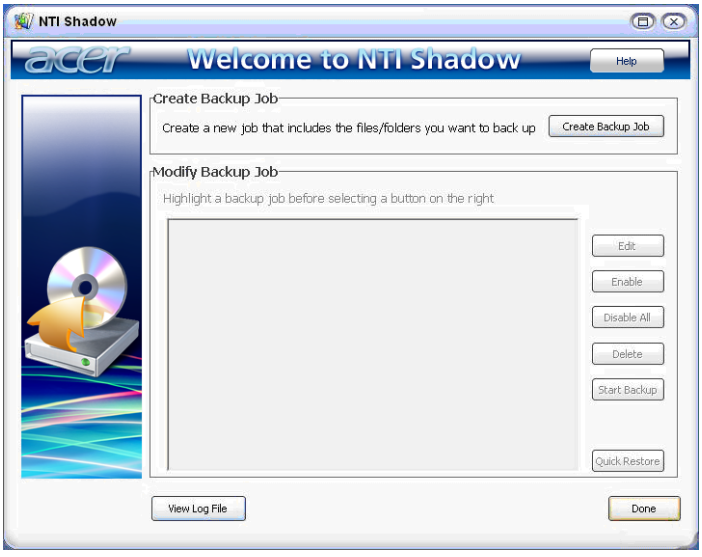
NTI Shadow

NTI Shadow allows users to schedule continuous backup jobs that copy the contents of one or more folders (the "backup source") to another location (the "backup destination"). The backup jobs are continuous because they are scheduled to regularly update the data in the backup folder either continuously or in user-defined intervals. You can schedule a job to run every certain number of minutes, on certain days at a specified time, or whenever any data in the backup source are modified.

Shadow can also be configured to archive file versions. If this option is enabled, then any file that is saved or overwritten will trigger Shadow to archive the previous version of the file. The file versions are stored in a Revisions folder in the backup destination. Users can configure how many versions of a file to maintain.

Shadow supports backups on local hard drives, USB/FireWire external hard drives, USB pen drives, NAS devices, and any drive with drive letter access.

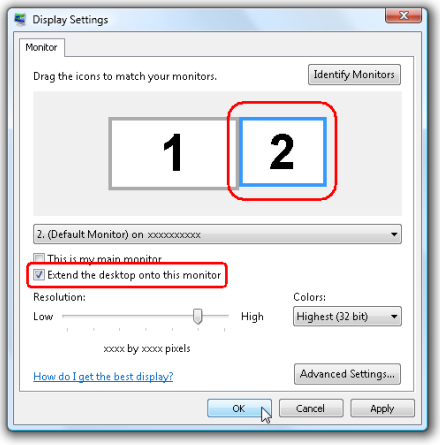
Launching the utility is as easy as pressing one buttons. For more information refer to the NTI Shadow help files.



Acer GridVista (dual-display compatible)

NOTE: This feature is only available on certain models.

To enable the dual monitor feature of the notebook, first ensure that the second monitor is connected, then select **Start, Control Panel, Display** and click on **Settings**. Select the secondary monitor **(2)** icon in the display box and then click the check box **Extend my windows desktop onto this monitor**. Finally, click **Apply** to confirm the new settings and click **OK** to complete the process.



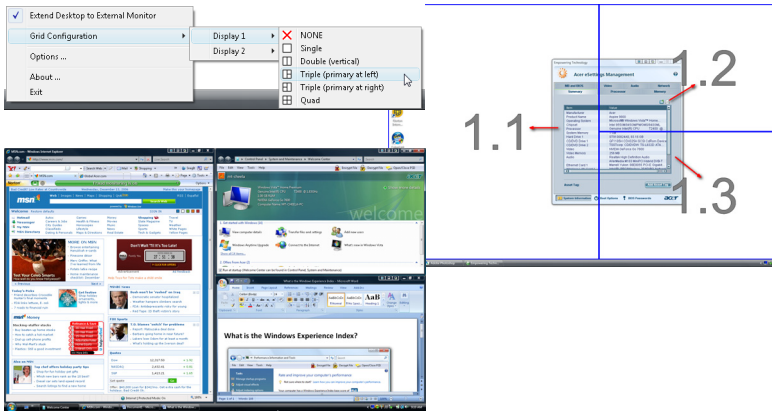
Acer GridVista is a handy utility that offers four pre-defined display settings so you can view multiple windows on the same screen. To access this function, please go to **Start>All Programs** and click on **Acer GridVista**. You may choose any one of the four display settings indicated below:

Double (verticle), Triple (primary at left), Triple (primary at right), or Quad Acer Gridvista is dual-display compatible, allowing two displays to be partitioned independently.

Acer Gridvista is dual-display compatible, allowing two displays to be partitioned independently.

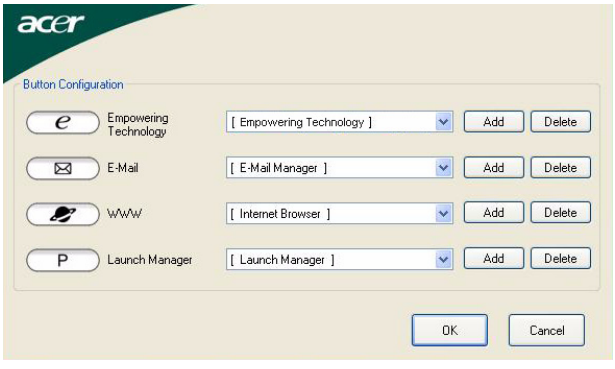
AcerGridVista is simple to set up:

1. Run Acer GridVista and select your preferred screen configuration for each display from the task bar.
2. Drag and drop each window into the appropriate grid.
3. Enjoy the convenience of a well-organized desktop.



NOTE: Please ensure that the resolution setting of the second monitor is set to the manufacturer's recommended value.

Launch Manager



Launch Manager allows you to set the four easy-launch buttons located above the keyboard. You can access the Launch Manager by clicking on Start > All Programs > Launch Manager to start the application.

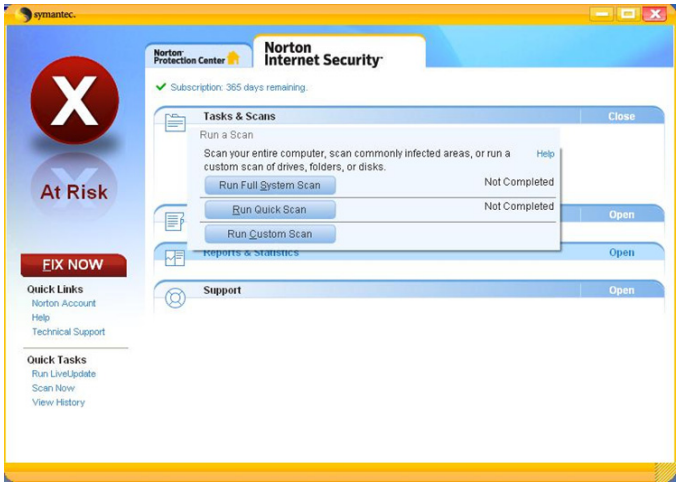
Norton Internet Security

Norton Internet Security is an anti-virus utility that can protect against viruses, keeping your data safe and secure.

How do I check for viruses?

1. Double-click the **Norton Internet Security** icon on the Windows desktop.
2. Select **Tasks & Scans.**

3. Select **Run Scan** to scan your system.



4. When the scan is complete, review the results of the scan.

NOTE: For optimal security, run a Full System Scan when scanning your computer for the first time.

You can schedule customized virus scans that run unattended on specific dates and times or at periodic intervals. If you are using the computer when the scheduled scan begins, it runs in the background so that you do not have to stop working.

For more information refer to the Norton Internet Security help files.

Hardware Specifications and Configurations

Processor

Item	Specification
CPU type	Intel® Core™2 Duo Mobile Processor T7300/T7500/T7700 (4 MB L2 cache, 2/2.2/2.4 GHz, 800 MHz FSB), or T7100 (2 MB L2 cache, 1.8 GHz, 800 MHz FSB) Intel® Core™2 Duo Mobile Processor T7200/T7400/T7600 (4 MB L2 cache, 2/2.16/2.33 GHz, 667 MHz FSB), T5500/T5600 (2 MB L2 cache, 1.66/1.83 GHz, 667 MHz FSB) or T5200/T5300 (2 MB L2 cache, 1.60/1.73 GHz, 533 MHz FSB) Intel® Core™ Duo Mobile Processor T2250/T2350/T2450 (2 MB L2 cache, 1.73/1.86/2 GHz, 533 MHz FSB) Intel® Celeron® M processor 520/530 (1 MB L2 cache, 1.6/1.73 GHz, 533 MHz FSB) Intel® Celeron® M processor 440 (1 MB L2 cache, 1.86 GHz, 533 MHz FSB)
Core logic	Mobile Intel® PM965/GM965 + ICH8M Express Chipset
CPU package	Socket M (FCPGA6)
CPU core voltage	1.0375V to 1.3V

CPU Fan True Value Table

DTS(degree C)	Fan Speed (rpm)	Acoustic Level (dBA)
45-50	0-3000	29
55-66	0-3300	33
68-74	3300-3800	38
78-83	3800-4100	40
86-91	4100-4800	40

Throttling 50%: On= 99° C; OFF=93° C

OS shut down at 105° C; H/W shot down at 110° .C

BIOS

Item	Specification
BIOS vendor	Phoenix
BIOS Version	1.02 (MP version)
BIOS ROM type	SST/AMD 1MB CMOS Boot Block Flash Memory
BIOS ROM size	1M byte FLASH ROM SST
BIOS package	10-lead TSOP (10mmx20mm)
Supported protocols	ACPI 1.0b/2.0/3.0 compliance, PCI 2.2, System/HDD Password Security Control, INT 13H Extensions, PnP BIOS 1.0a SMBIOS 2.4, BIOS Boot Specification, Simple Boot Flag 1.0, Boot Block, PCI Bus Power Management Interface Specification, USB Specification 1.1/2.0, IEEE 1394 1.0, USB/1394 CD-ROM Boot Up support, PC Card Standard 1995 (PCMCIA 3.0 Compliant Device), IrDA 1.0, Intel AC97 CNR Specification, WfM 2.0, PXE 2.1, Boot Integrity Service Application Program Interface (BIS) 1.0, PC99a and Mobile PC2001 Compliant
BIOS password control	Set by setup manual

Item	Specification
Cache controller	Built-in CPU
Cache size	512 KB to 1MB (See CPU type)

System Memory

Item	Specification
Memory controller	Built-in
Memory size	0MB (no on-board memory)
DIMM socket number	2 sockets
Supports memory size per socket	2048MB
Supports maximum memory size	4G for 64bit OS (with two 2GB SODIMM)
Supports DIMM type	DDR 2 Synchronous DRAM
Supports DIMM Speed	533/677 MHz
Supports DIMM voltage	1.8V and 0.9V
Supports DIMM package	200-pin soDIMM
Memory module combinations	You can install memory modules in any combinations as long as they match the above specifications.

Memory Combinations

Slot 1	Slot 2	Total Memory
0MB	256MB	256MB
0MB	512MB	512MB

2048MB	512MB	2560MB
2048MB	1024MB	3072MB
2048MB	2048MB	4096MB

NOTE: Above table lists some system memory configurations. You may combine DIMMs with various capacities to form other combinations. On above table, the configuration of slot 1 and slot 2 could be reversed.

Item	Specification
LAN Chipset	Broadcom 5787M
Supports LAN protocol	10/100/1000 Mbps
LAN connector type	RJ45
LAN connector location	Left side
Features	Integrated 10/100 BASE-T transceiver Wake on LAN support compliant with ACPI 2.0 PCI v2.2

Bluetooth Interface

Item	Specification
Chipset	Foxconn T60H928.01
Data throughput	723 bps (full speed data rate)
Protocol	Bluetooth 1.1 (Upgradeable to Bluetooth 1.2 when SIG specification is ratified).
Interface	USB 1.1

Bluetooth Interface

Item	Specification
Connector type	USB

Wireless Module 802.11b/g

Item	Specification
Chipset	Intel® Wireless WiFi Link 4965AGN (dual-band quad-mode 802.11a/b/g/Draft-N) network connection, supporting Acer SignalUp™ with InviLink™ Nplify™ wireless technology Intel® PRO/Wireless 3945ABG (dual-band tri-mode 802.11a/b/g) Wi-Fi CERTIFIED® network connection, supporting Acer SignalUp™ wireless technology
Data throughput	11~54 Mbps, up to 270 Mbps for Draft-N
Protocol	802.11b+g, Draft-N
Interface	PCI bus (mini PCI socket for wireless module)

Hard Disk Drive Interface

Audio Interface

Item	Specification
Audio Controller	Realtek ALC883 Azalia and Amplifier Maxim MAX9710 & MAX4411
Audio onboard or optional	Built-in
Mono or Stereo	Stereo
Resolution	18 bit stereo full duplex
Compatibility	HD audio Interface; S/PDIF output for PCM or AC-3 content
Sampling rate	1Hz resolution VSR (Variable Sampling Rate)
Internal microphone	Yes
Internal speaker / Quantity	Yes/2 (1.5W speakers)

Video Interface

Item	Specification
Chipset	ATI M66/M74/M76 MXM
Package	Daughter Board
Interface	PCIE
Supports ZV (Zoomed Video) port	Yes

Video Memory

Item	Specification
Chipset	ATI M66/M74/M76 MXM
Memory size	up to 256MB
Interface	GDDR2

Item	Specification
Chipset	ICH8M
USB Compliancy Level	2.0
OHCI	USB 1.1 and USB 2.0 Host controller
Number of USB port	4
Location	One on the left side/three on the rear side
Serial port function control	Enable/Disable by BIOS Setup

PCMCIA Port

Item	Specification
PCMCIA controller	ENE CB714/1410
Supports card type	Type-II
Number of slots	One type-II
Access location	Left panel
Supports ZV (Zoomed Video) port	No ZV support
Supports 32 bit CardBus	Yes

System Board Major Chips

Item	Controller
Core logic	Mobile Intel® PM965/GM965 + ICH8M Express Chipset
VGA	ATI M66/M74/M76 MXM
LAN	Realtek 8100SBL/CL

Suspend to RAM (S3)	CPU set power down VGA Suspend PCMCIA Suspend Audio Power Down Hard Disk Power Down CD-ROM Power Down Super I/O Low Power mode
Save to Disk (S4)	Also called Hibernation Mode. System saves all system states and data onto the disc prior to power off the whole system.

System Utilities

BIOS Setup Utility

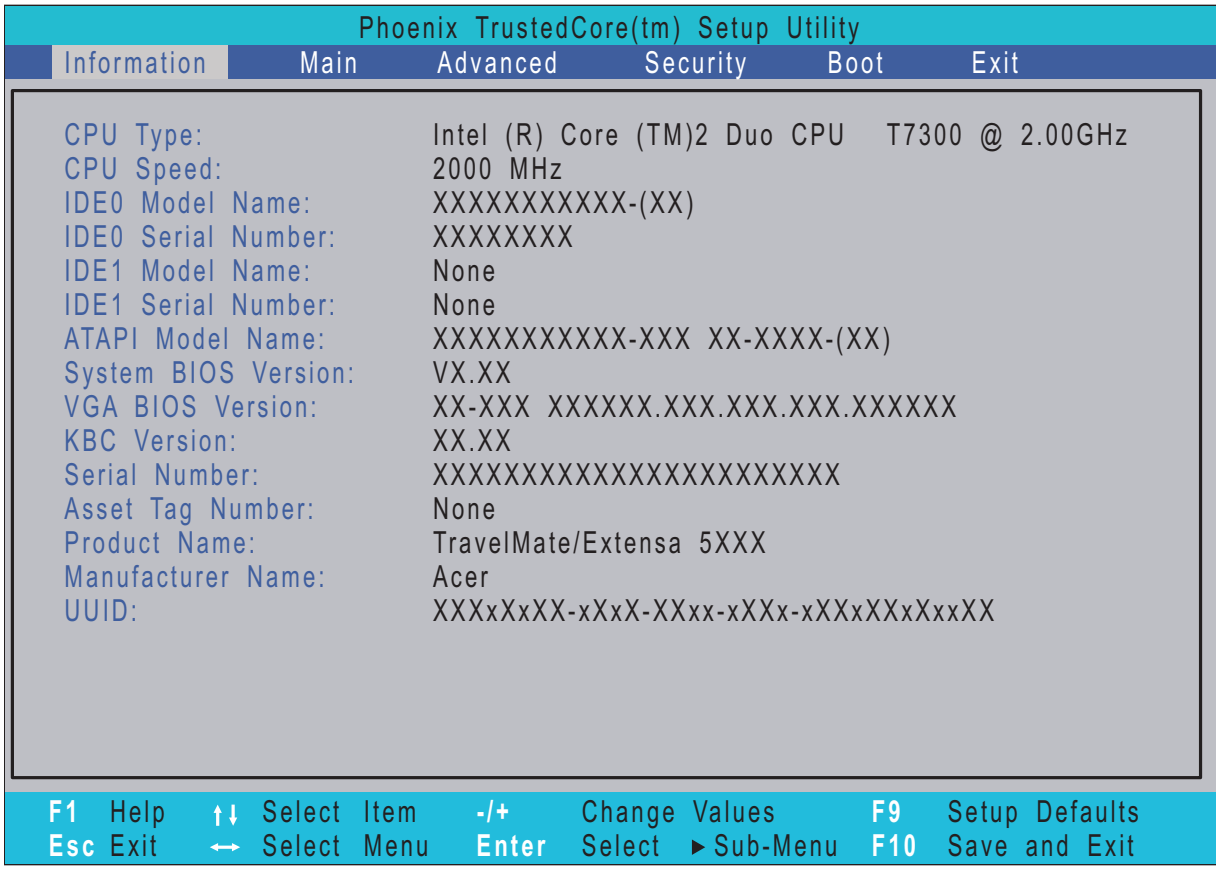
The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/ Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press **F2** during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Press **F2** to enter setup. The default parameter of F12 Boot Menu is set to "disabled". If you want to change boot device without entering BIOS Setup Utility, please set the parameter to "enabled".

Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.



Navigating the BIOS Utility

There are six menu options: Information, Main, Advanced, Security, Boot, and Exit.

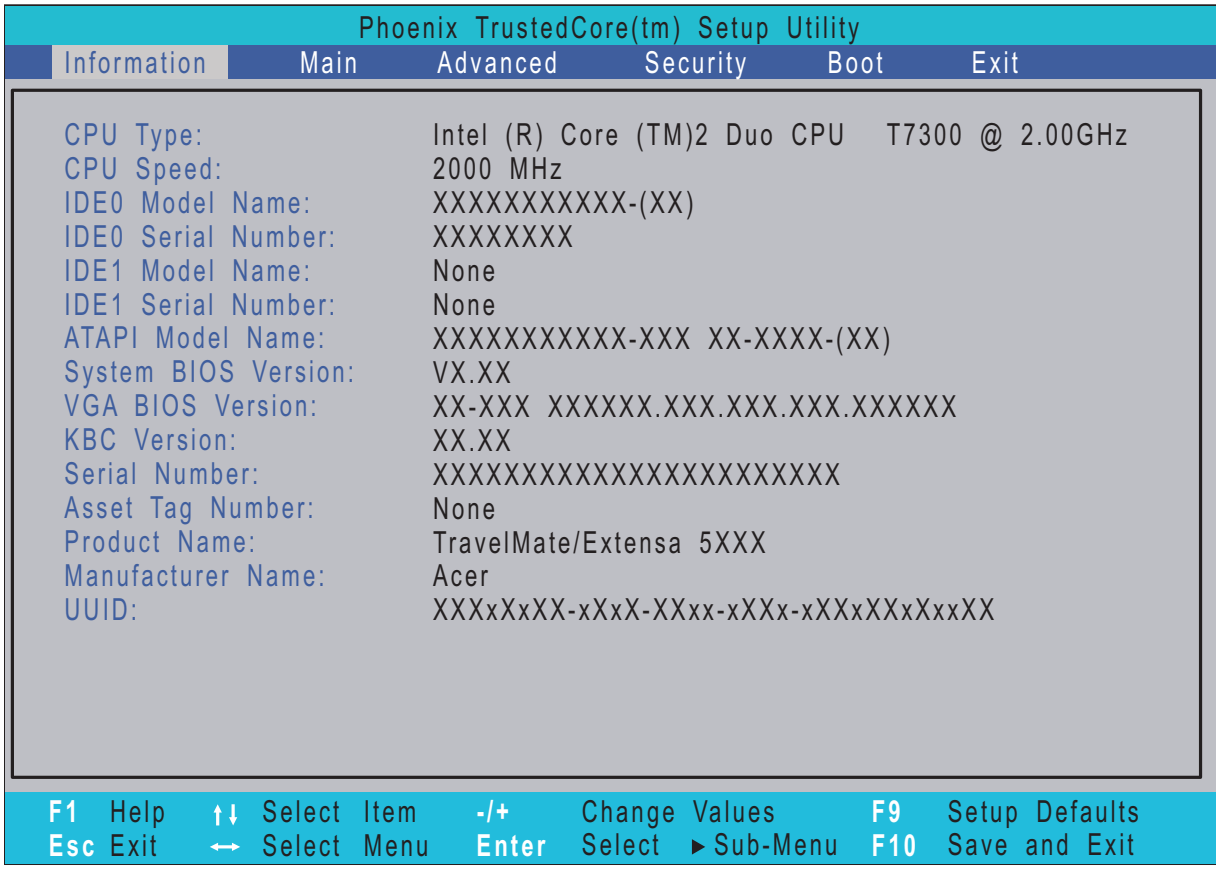
Follow these instructions:

- To choose a menu, use the left and right arrow keys.
- To choose an item, use the up and down arrow keys.
- To change the value of a parameter, press **F5** or **F6**.
- A plus sign (+) indicates the item has sub-items. Press **Enter** to expand this item.
- Press **Esc** while you are in any of the menu options to go to the Exit menu.
- In any menu, you can load default settings by pressing **F9**. You can also press **F10** to save any changes made and exit the BIOS Setup Utility.

NOTE: You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. **Please note that system information is subject to different models**.

Information

The Information screen displays a summary of your computer hardware information.

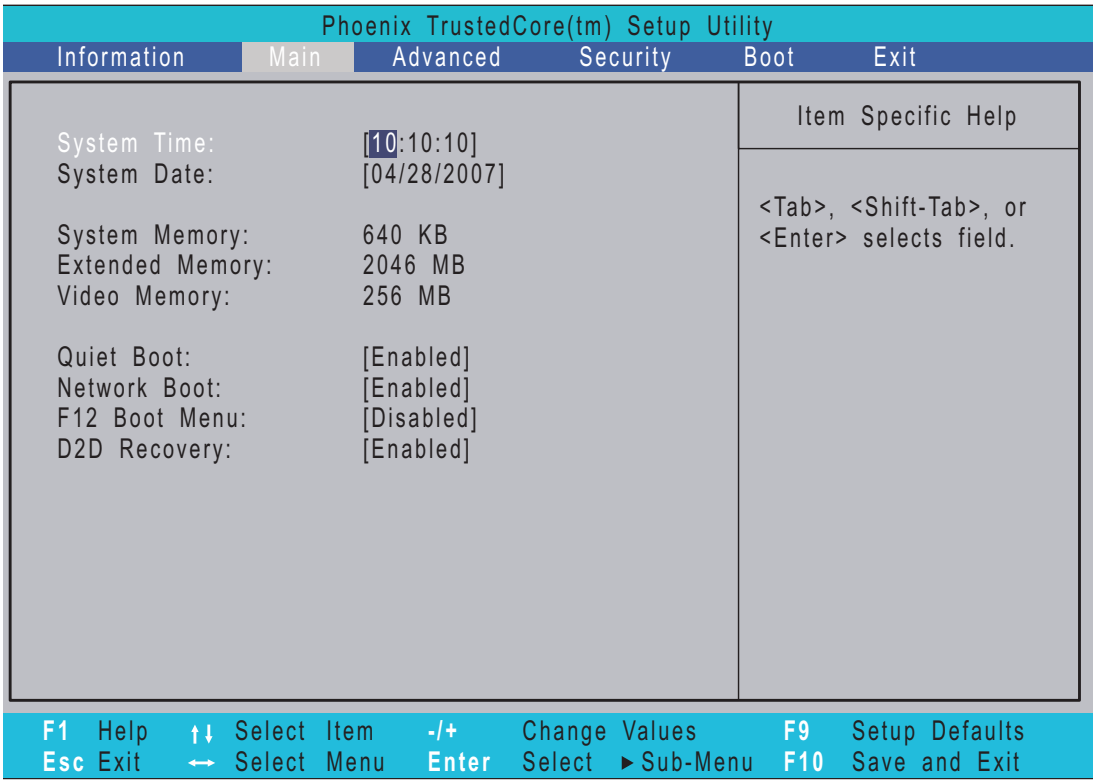


NOTE: The system information is subject to different models.

Parameter	Description
CPU Type	This field shows the CPU type and speed of the system.
CPU Speed	This field shows the speed of the CPU.
IDE0 Model Name	This field shows the model name of HDD installed on primary IDE master.
IDE0 Serial Number	This field displays the serial number of HDD installed on primary IDE master.
IDE1 Model Name	This field displays the model name of devices installed on secondary IDE master. The hard disk drive or optical drive model name is automatically detected by the system.
IDE1 Serial Number	This field shows the serial number of devices installed on secondary IDE master.
ATAPI Model Name	This field shows the model name of the Optical device installed in the system.
System BIOS Version	Displays system BIOS version.
VGA BIOS Version	This field displays the VGA firmware version of the system.
KBC Ver	This field shows the keyboard
Serial Number	This field displays the serial number of this unit.
Asset Tag Number	This field displays the asset tag number of the system.
Product Name	This field shows product name of the system.
Manufacturer Name	This field displays the manufacturer of this system.
UUID Number	Universally Unique Identifier (UUID) is an identifier standard used in software construction, standardized by the Open Software Foundation (OSF) as part of the Distributed Computing Environment (DCE).

Main

The Main screen allows the user to set the system time and date as well as enable and disable boot option and recovery.



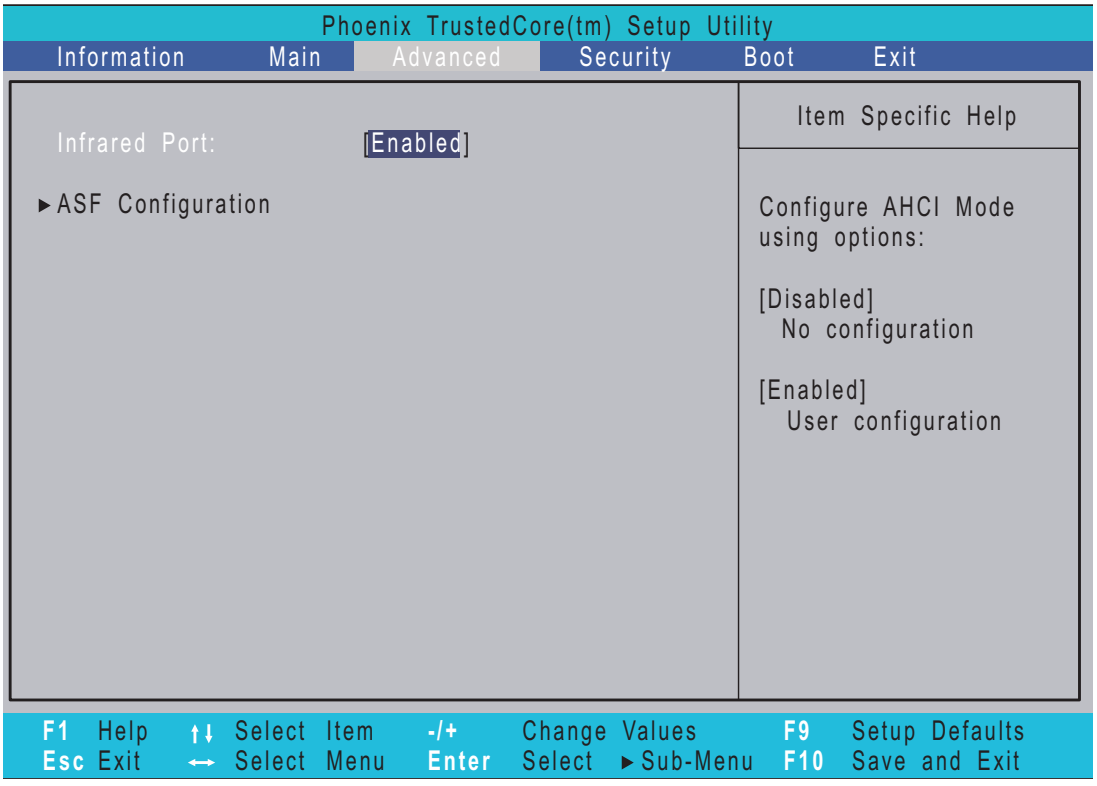
NOTE: The screen above is for your reference only. Actual values may differ.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Format/Option
System Time	Sets the system time. The hours are displayed with 24-hour format.	Format: HH:MM:SS (hour:minute:second) System Time
System Date	Sets the system date.	Format MM/DD/YYYY (month/day/ year) System Date
System Memory	This field reports the memory size of the system. Memory size is fixed to 640MB	
Extended Memory	This field reports the memory size of the extended memory in the system. Extended Memory size=Total memory size-1MB	
VGA Memory	Shows the VGA memory size. VGA Memory size=128/256 MB	
Quiet Boot	Determines if Customer Logo will be displayed or not; shows Summary Screen is disabled or enabled. Enabled: Customer Logo is displayed, and Summary Screen is disabled. Disabled: Customer Logo is not displayed, and Summary Screen is enabled.	Option: **Enabled** or Disabled
Power on Display	Set the display output device on boot up.	Option: **Auto** or Both
Network Boot	Enables, disables the system boot from LAN (remote server).	Option: **Enabled** or Disabled
F12 Boot Menu	Enables, disables Boot Menu during POST.	Option: **Disabled** or Enabled
D2D Recovery	Enables, disables D2D Recovery function. The function allows the user to create a hidden partition on hard disc drive to store operation system and restore the system to factory defaults.	Option: **Enabled** or Disabled

NOTE: The sub-items under each device will not be shown if the device control is set to disable or auto. This is because the user is not allowed to control the settings in these cases.

Advanced

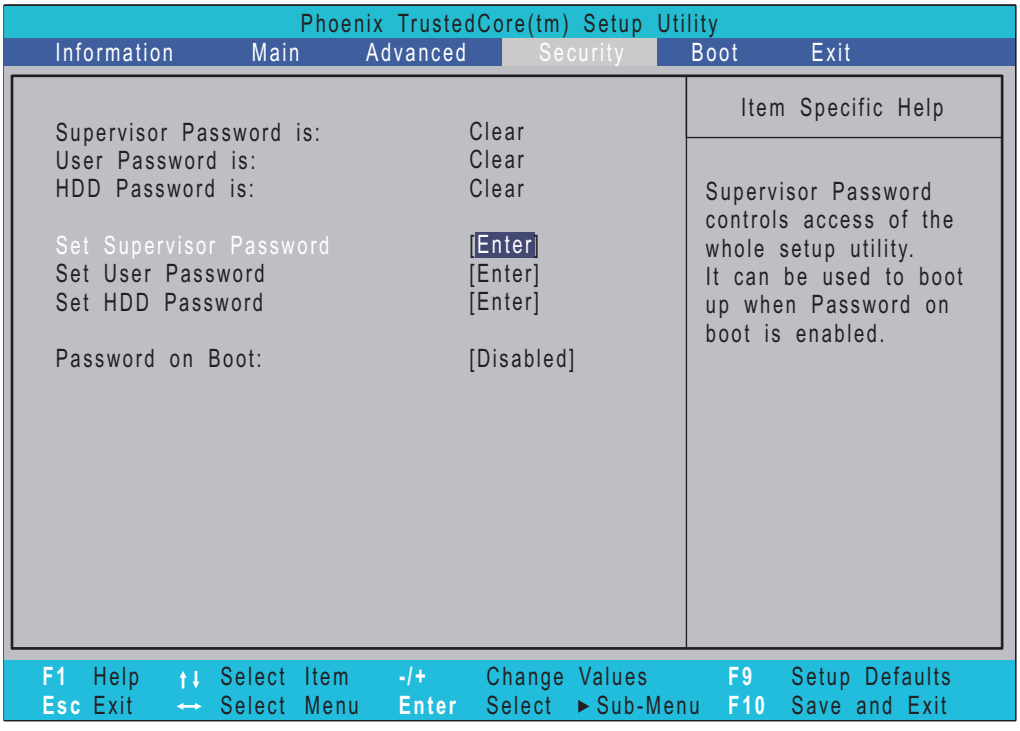


The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

Parameter	Description	Format/Option
Infrared Port	Enable or Disable the infrared port	Option: **Enabled** or Disabled
ASF Configuration	Configure Alert Standard Format (ASF) parameters. A standard for how alerting and remote-control capabilities on network controllers work Options: Minimum WatchDog Timeout: [ ] BIOS Boot Timeout: [ ] OS Boot Timeout: [ ] Power-on wait time: [ ]	

Security

The Security screen contains parameters that help safeguard and protect your computer from unauthorized use.



NOTE: Please refer to “Remove HDD/BIOS Password” section if you need to know how to remove HDD/BIOS Password.

The table below describes the parameters in this screen. Settings in **boldface** are the default and suggested parameter settings.

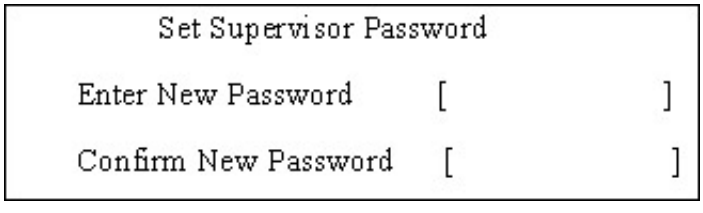
Parameter	Description	Option
Supervisor Password is	Shows the setting of the Supervisor password	**Clear** or Set
User Password is	Shows the setting of the user password.	**Clear** or Set
HDD Password is	Shows the setting of the hard disk drive password	**Clear** or Set
Set Supervisor Password	Press Enter to set the supervisor password. When set, this password protects the BIOS Setup Utility from unauthorized access. The user can not either enter the Setup menu nor change the value of parameters.	
Set User Password	Press Enter to set the user password. When user password is set, this password protects the BIOS Setup Utility from unauthorized access. The user can enter Setup menu only and does not have right to change the value of parameters.	
Set HDD Password	Press Enter to set the HDD password.	
Password on Boot	Defines whether a password is required or not while the events defined in this group happened. The following sub-options are all requires the Supervisor password for changes and should be grayed out if the user password was used to enter setup.	**Disabled** or Enabled

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

Setting a Password

Follow these steps as you set the user or the supervisor password:

1. Use the w and y keys to highlight the Set Supervisor Password parameter and press the e key. The Set Supervisor Password box appears:



2. Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

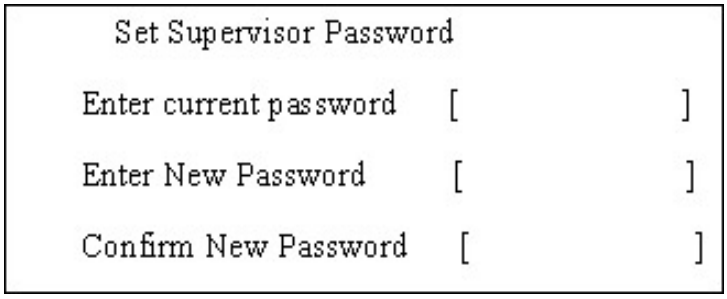
IMPORTANT: Be very careful when typing your password because the characters do not appear on the screen.

3. Press e.
   After setting the password, the computer sets the User Password parameter to "Set".
4. If desired, you can opt to enable the Password on boot parameter.
5. When you are done, press u to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

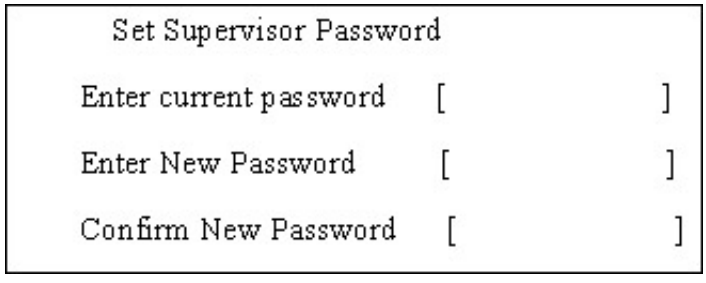
1. Use the w and y keys to highlight the Set Supervisor Password parameter and press the e key. The Set Password box appears:



2. Type the current password in the Enter Current Password field and press e.
3. Press e twice **without** typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to “Clear”.
4. When you have changed the settings, press u to save the changes and exit the BIOS Setup Utility.

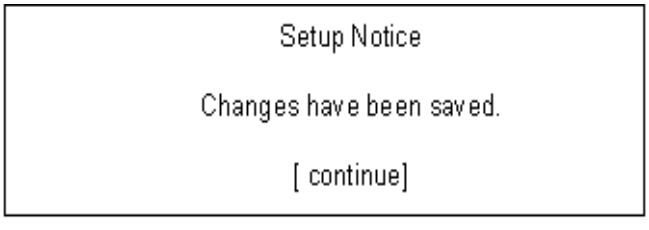
Changing a Password

1. Use the w and y keys to highlight the Set Supervisor Password parameter and press the e key. The Set Password box appears:



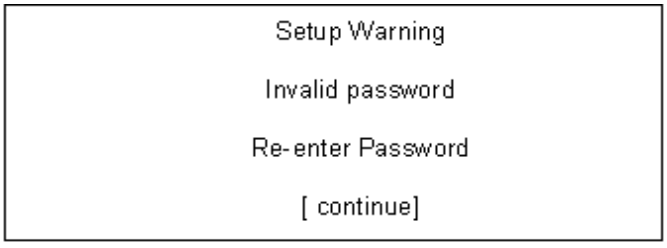
2. Type the current password in the Enter Current Password field and press e.
3. Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
4. Press e. After setting the password, the computer sets the User Password parameter to “Set”.
5. If desired, you can enable the Password on boot parameter.
6. When you are done, press u to save the changes and exit the BIOS Setup Utility.

If the verification is OK, the screen will display as following.



The password setting is complete after the user presses u.

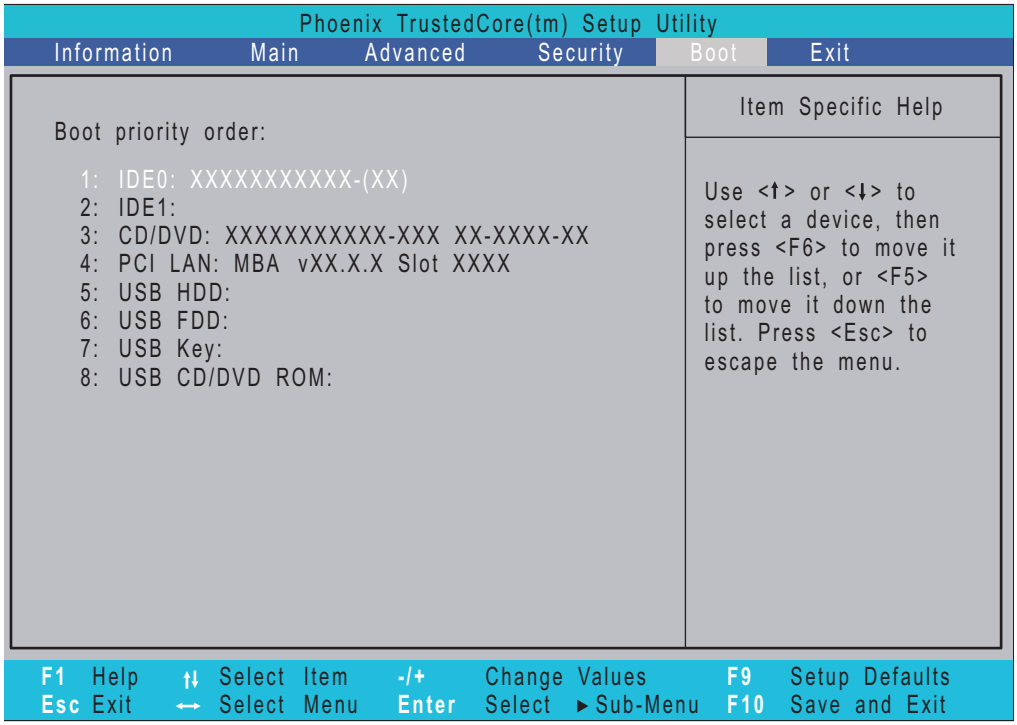
If the current password entered does not match the actual current password, the screen will show you the Setup Warning.



If the new password and confirm new password strings do not match, the screen will display the following message.

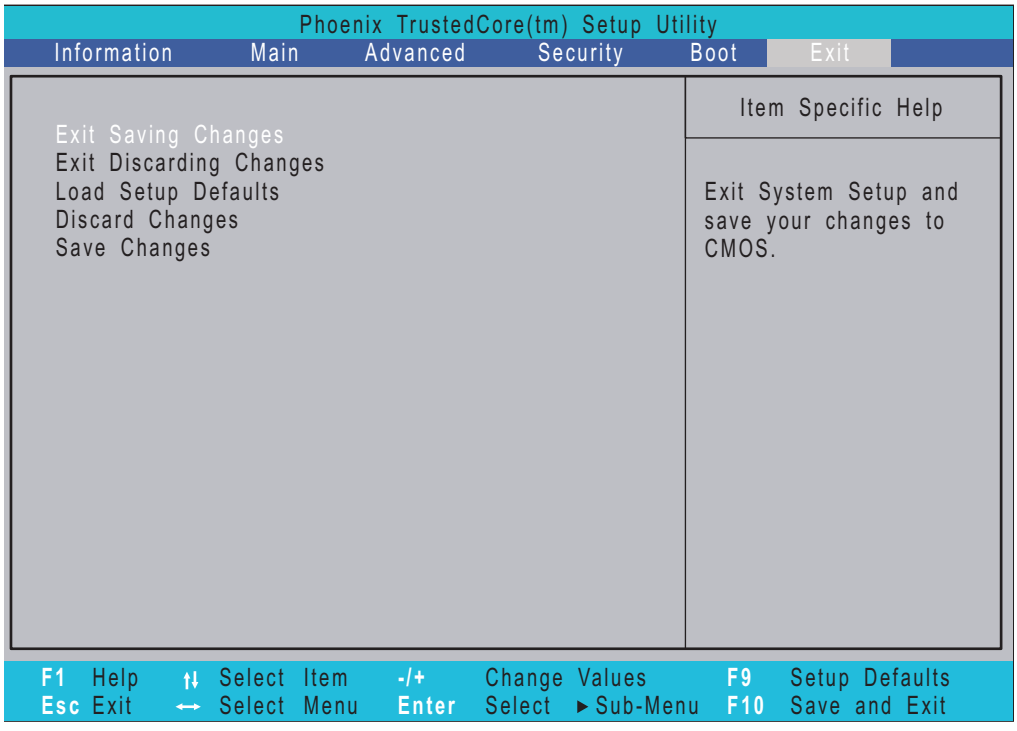
Boot

This menu allows the user to decide the order of boot devices to load the operating system. Bootable devices includes the diskette drive in module bay, the onboard hard disk drive and the CD-ROM in module bay.



Exit

The Exit screen contains parameters that help safeguard and protect your computer from unauthorized use.



The table below describes the parameters in this screen.

Parameter	Description
Exit Saving Changes	Exit System Setup and save your changes to CMOS.
Exit Discarding Changes	Exit utility without saving setup data to CMOS.
Load Setup Default	Load default values for all SETUP item.
Discard Changes	Load previous values from CMOS for all SETUP items.
Save Changes	Save Setup Data to CMOS.

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- ❑ New versions of system programs
- ❑ New features or options
- ❑ Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

NOTE: If you do not have a crisis recovery diskette at hand, then you should create a **Crisis Recovery Diskette** before you use the Phlash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Phlash.

NOTE: Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, you may not boot the system because the BIOS is not completely loaded.

Fellow the steps below to run the Phlash.

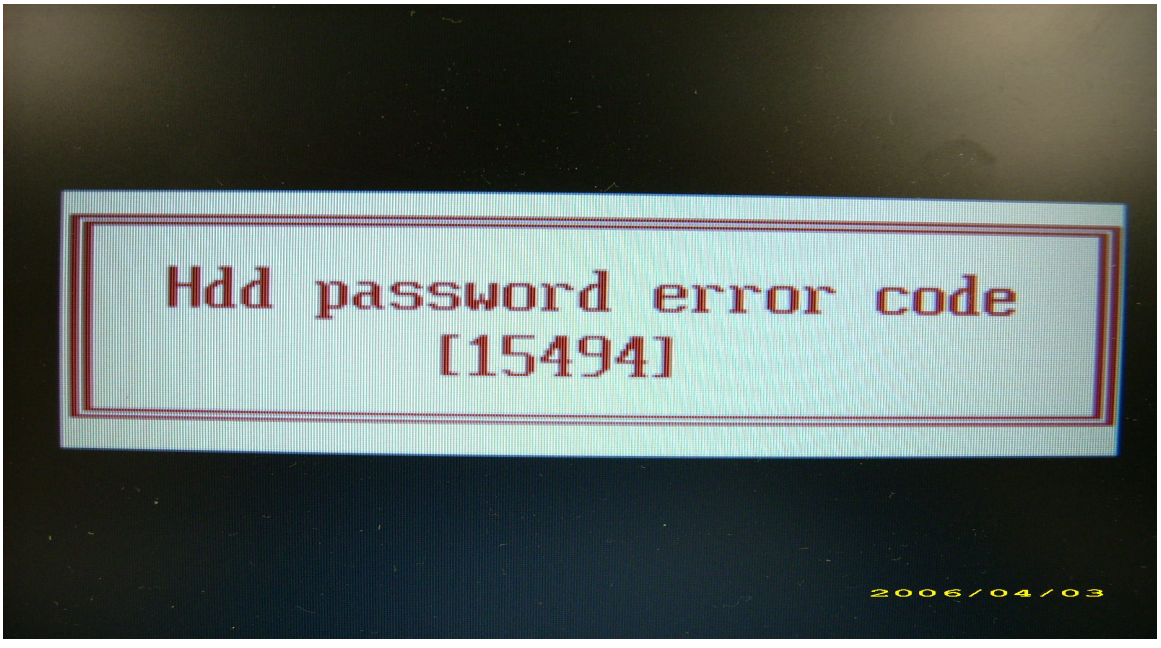
1. Prepare a bootable diskette.
2. Copy the flash utilities to the bootable diskette.
3. Then boot the system from the bootable diskette. The flash utility has auto-execution function.

Remove HDD/BIOS Utility

This section provide you with removing HDD/BIOS method:

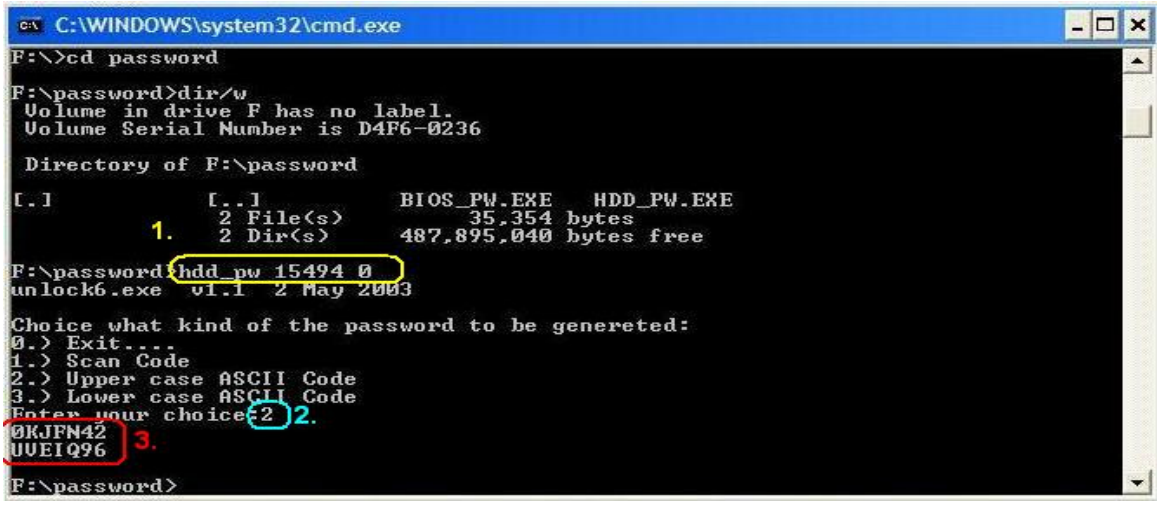
Remove HDD Password:

- ❑ If you key in wrong HDD password for three time, “HDD password error code” would display on the screen. See the image below.

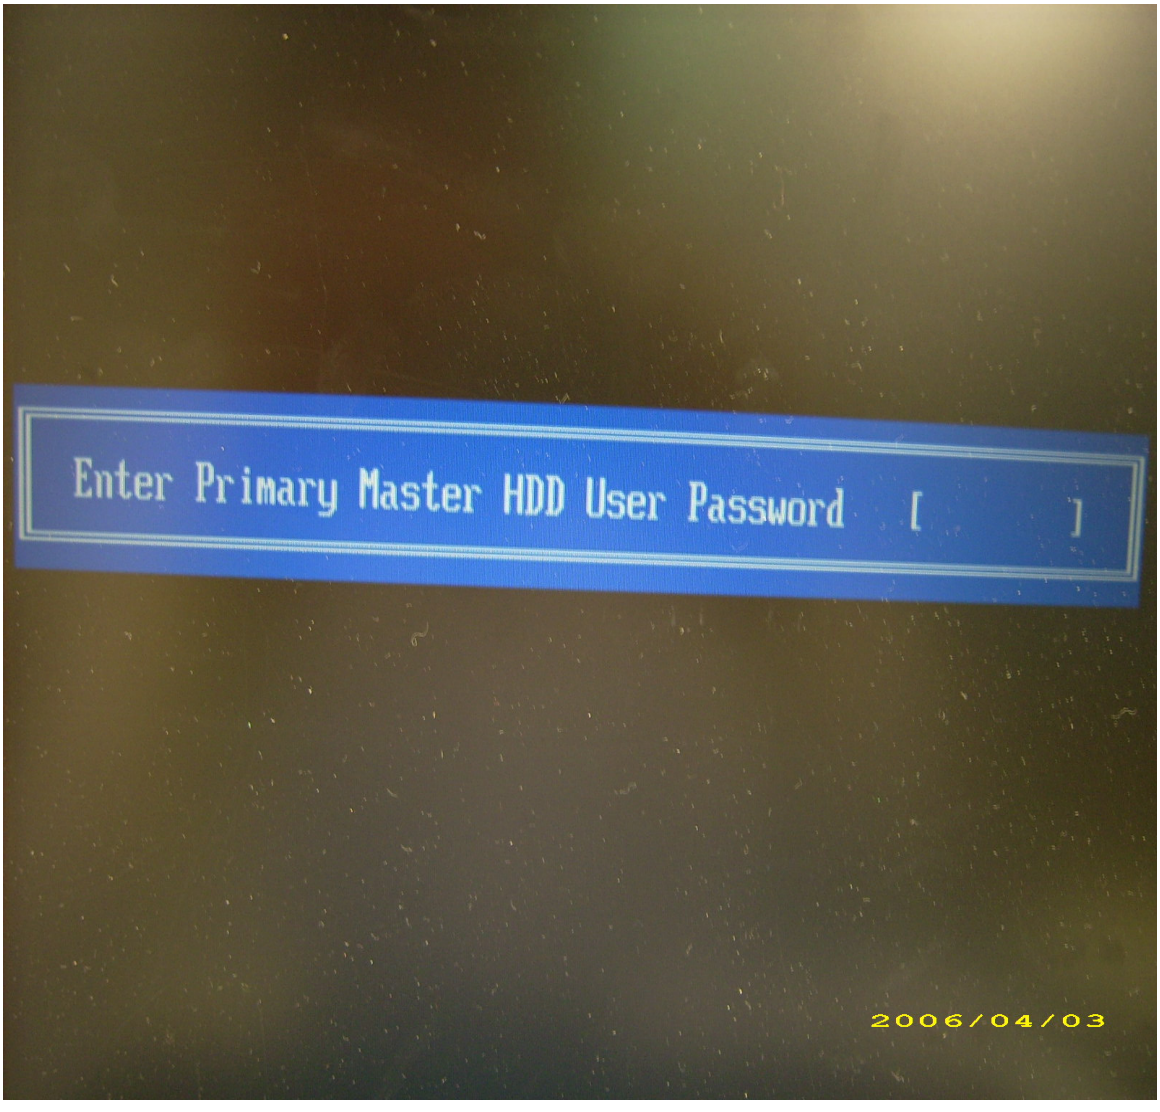


- ❑ If you need to solve HDD password locked problem, you can run HDD_PW.EXE

1. Key in “hdd_pw 15494 0”
2. Select “2”
3. Choose one upper-case string

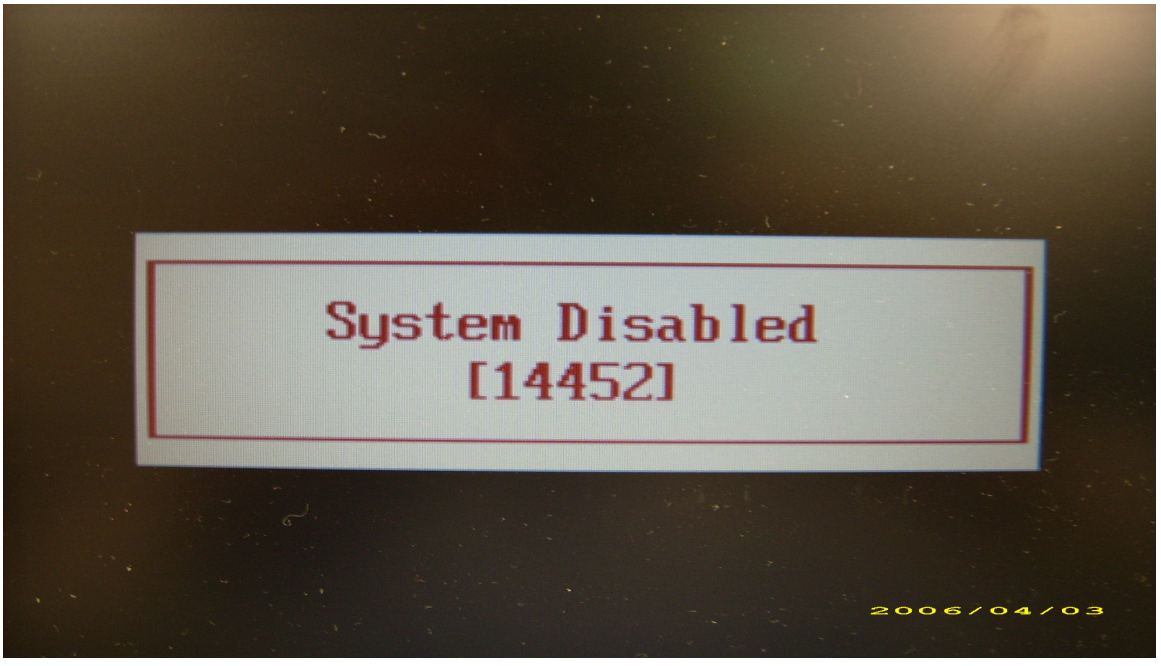


- ❑ Reboot system and key in “0KJFN42” or “UVEIQ96” to HDD user password.



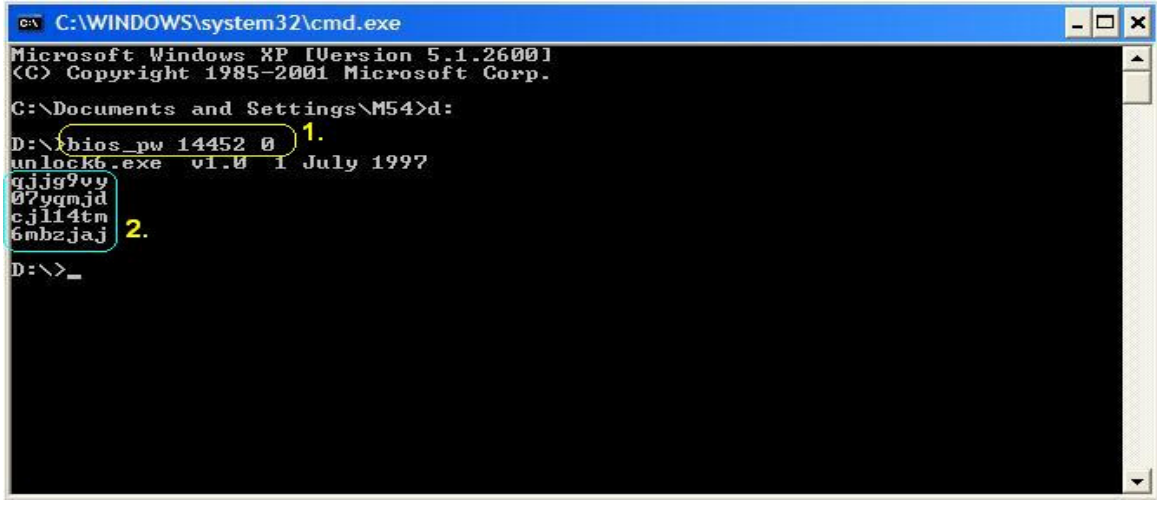
Remove BIOS Password:

- If you key in wrong Supervisor Password for three time, “System Disabled” would display on the screen. See the image below.



- If you need to solve BIOS password locked problem, you can run BIOS_PW.EXE

1. Key in “bios_pw 14452 0”
2. Choose one upper-case string



- Reboot the system and key in “qjjg9vy” or “07yqmjd” to BIOS user password.

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

Disassembly Requirements

To disassemble the computer, you need the following tools:

- Wrist grounding strap and conductive mat for preventing electrostatic discharge
- Flat screwdriver
- Philips screwdriver
- Hex screwdriver
- Plastic flat screwdriver
- Plastic tweezers

NOTE: The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components.

General Information

Pre-disassembly Instructions

Before proceeding with the disassembly procedure, make sure that you do the following:

1. Turn off the power to the system and all peripherals.
2. Unplug the AC adapter and all power and signal cables from the system.

3. Place the system on a flat, stable surface.
4. Remove the battery pack.

Disassembly Process

The disassembly process is divided into the following stages:

- External module disassembly
- Main unit disassembly
- LCD module disassembly

The flowcharts provided in the succeeding disassembly sections illustrate the entire disassembly sequence. Observe the order of the sequence to avoid damage to any of the hardware components. For example, if you want to remove the main board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Main Screw List

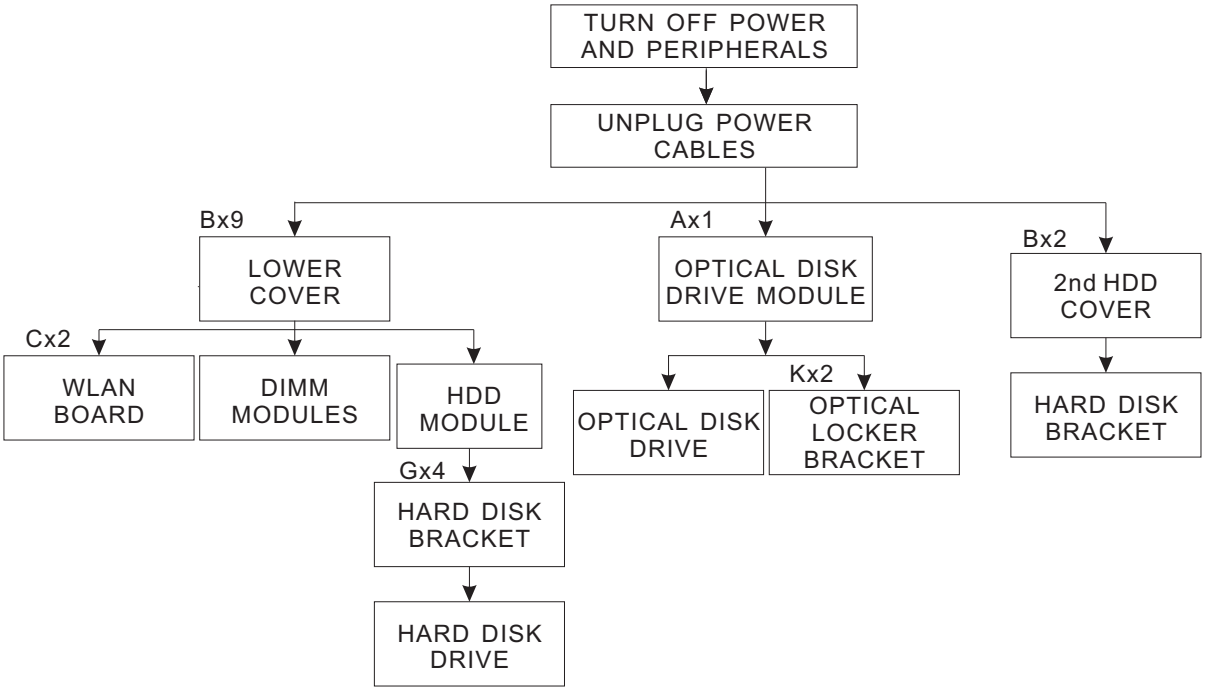
Item	Screw	Color	Part No.
A	M2.5 x L6	Black	86.00E33.736
B	M2 x L4	Black	86.00A02.140
C	M2 x L4	Silver	86.9A552.4R0
D	M2.5 x L5	Silver	86.00E74.335
E	M2.5 x L5	Black	86.00F19.735
F	M2 x L3	Silver	86.00C07.220
G	M3 x L4	Silver	86.9A544.4R0
H	M2.5 x L8	Black	86.00E34.738
I	M2 x L6	Silver	86.9A552.6R0
J	M2 x L4	Black	86.00F24.724
K	M2 x L3	Black	86.00E94.723

External Module Disassembly Process

External Modules Disassembly Flowchart

The flowchart below gives you a graphic representation on the entire disassembly sequence and instructs you on the components that need to be removed during servicing. For example, if you want to remove the main board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

EXTERNAL MODULE DISASSEMBLY



Screw List

	Screw	Part No.
A	M2.5 x L6	86.00E33.736
B	M2 x L4	86.00A02.140
C	M2 x L4	86.9A552.4R0
G	M3 x L4	86.9A544.4R0
K	M3 x L3	86.00E94.723

Removing the Battery Pack

1. Turn base unit over.
2. Slide the battery lock/unlock latch to the unlock position.

3. Slide and hold the battery release latch to the release position, then remove the battery from the main unit.

Removing the SD dummy card

1. Push the SD dummy card all the way in to eject it (1, 2).

2. Pull it out from the slot (2).

Removing the PC and ExpressCard dummy cards

1. Press the eject button to pop out the button.

2. Press it again (1) to pop out the PC dummy card (2). Remove the PC dummy card from the slot.

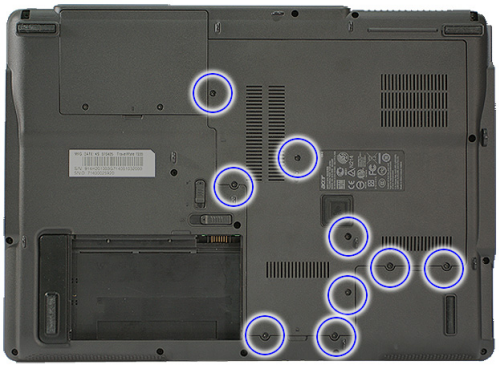
3. Push the ExpressCard dummy card all the way in to eject it.

4. Pull it out from the slot.

Removing the Lower Cover

1. See “Removing the Battery Pack” on page 62.

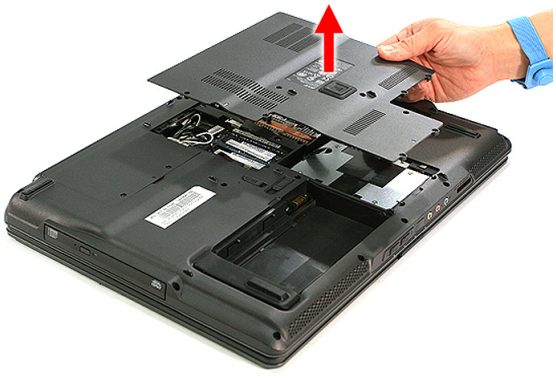
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. Loosen the nine screws (B) on the lower cover.



Step	Size (Quantity)	Color	Torque
1~9	M2 x L4 (9)	Black	1.6 kgf-cm

5. Use a plastic screw driver to carefully pry open the lower cover.

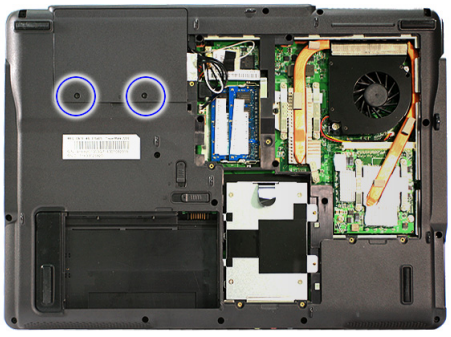
6. Remove the lower cover from the lower case.



Removing the Secondary HDD Cover

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.

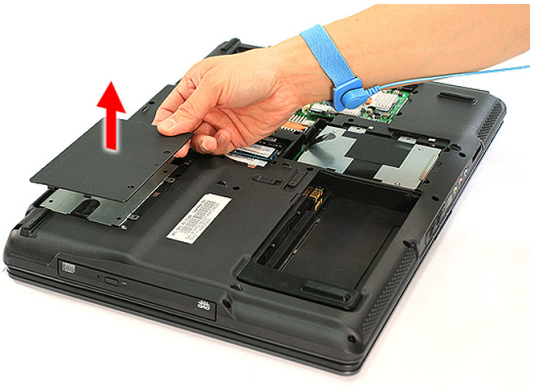
5. Loosen the two screws (B) from the secondary HDD cover.



Step	Size (Quantity)	Color	Torque
1~2	M2 x L4 (2)	Black	1.6 kgf-cm

6. Use a plastic screw driver to pry open the secondary HDD cover.

7. Remove the secondary HDD cover from the lower case.

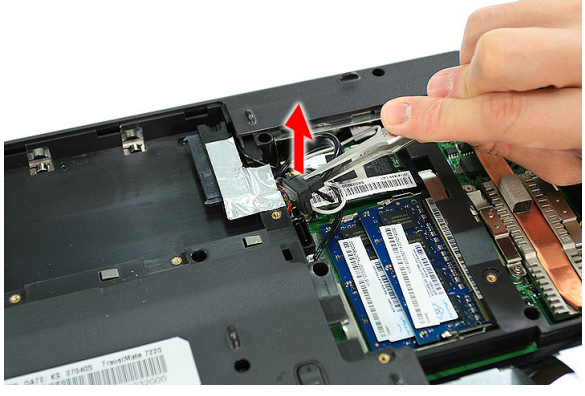


Removing the Secondary HDD Bracket and Connector

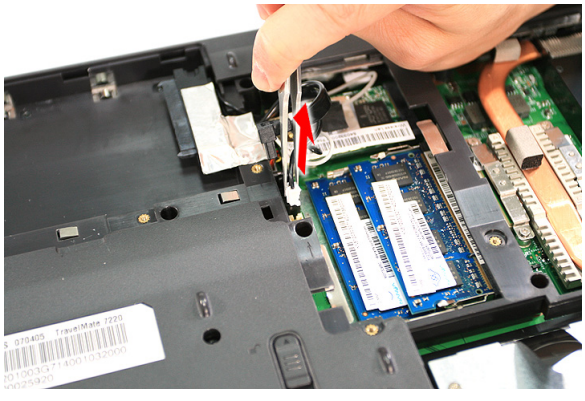
1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Secondary HDD Cover” on page 65.

3. Remove the HDD Bracket from the slot.

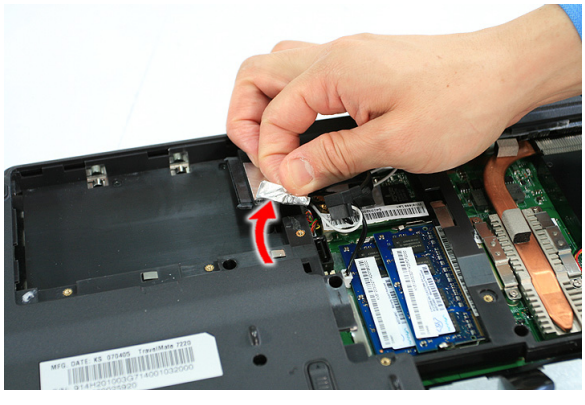
4. Disconnect the SATA power connector.



5. Disconnect the SATA connector.

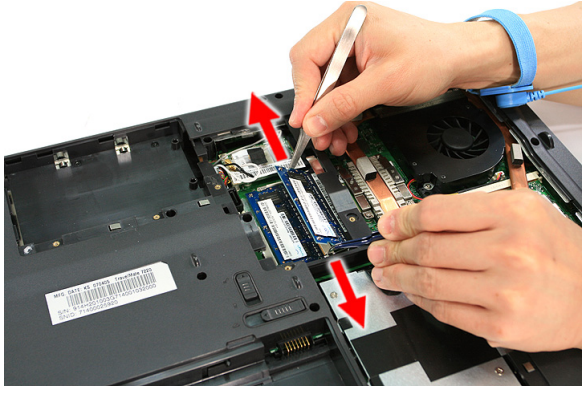


6. Remove the aluminium tape together with the connector.

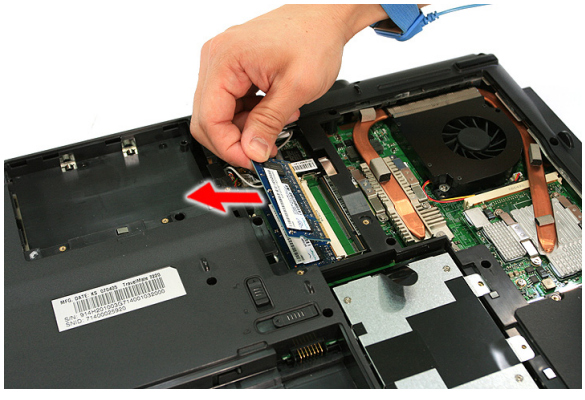


Removing the DIMM

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. See “Removing the Secondary HDD Cover” on page 65.
6. Push out the latches on both sides of the DIMM socket to release the DIMM.

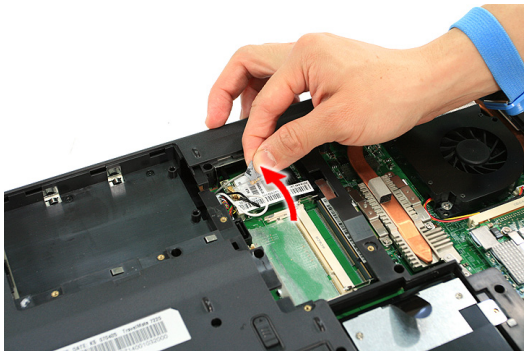


7. Remove the DIMM module.



Removing the WLAN Board Modules

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. Remove the tape holding the gray antenna.



6. Disconnect the antenna cables from the WLAN board.

7. Move the antenna away from the WLAN board and remove the two screws (C) on the WLAN board to release the WLAN board.

Step	Size (Quantity)	Color	Torque
1~2	M2 x L4 (2)	Silver	1.6 kgf-cm

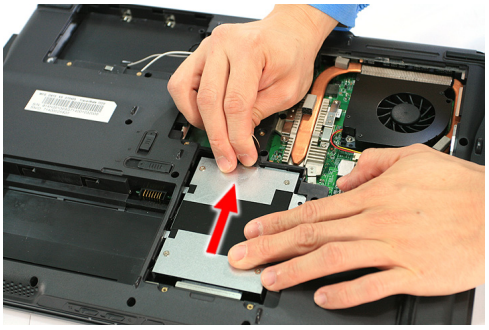
8. Detach the WLAN board from the WLAN socket.

NOTE: When attaching the antenna back to the WLAN board, make sure the cable are arranged properly.

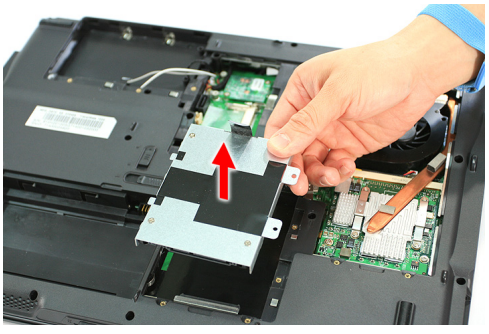
Removing the Hard Disk Drive Module

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.

5. Disconnect the hard disk module from the connector by pulling on the mylar tab on the hard disk module.

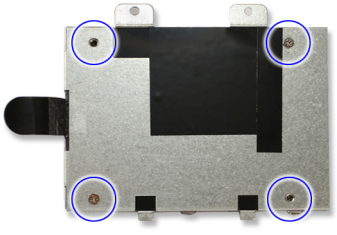


6. Remove the hard disk module.



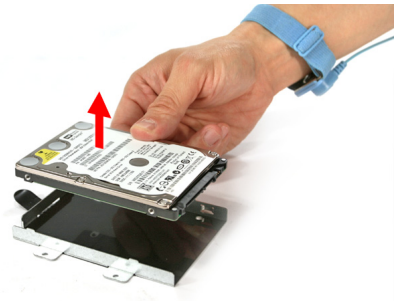
NOTE: To prevent damage to device, avoid pressing down on it or placing heavy objects on top of it.

7. Remove the four screws (G) as shown.



Step	Size (Quantity)	Color	Torque
1~4	M3 x L4 (4)	Silver	1.8 kgf-cm

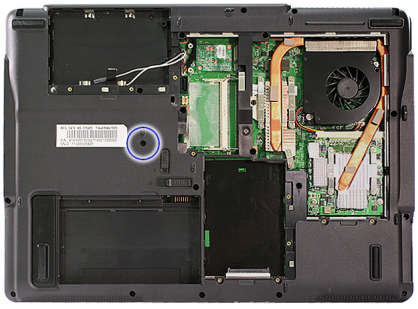
8. Remove the hard disk drive from the bracket.



Removing the Optical Drive Module

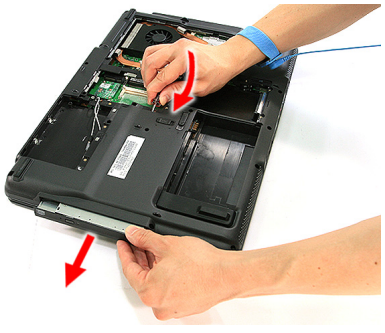
1. See “Removing the Battery Pack” on page 62.

2. Turn the base unit over, then remove the one screw (A) on the bottom side of the unit.

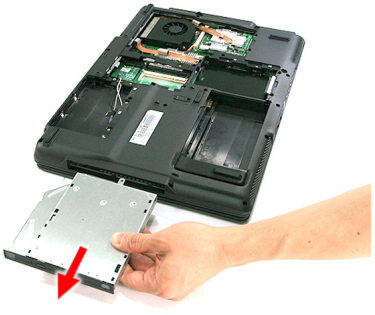


Step	Size (Quantity)	Color	Torque
1	M2.5 x L6 (1)	Black	3.0 kgf-cm

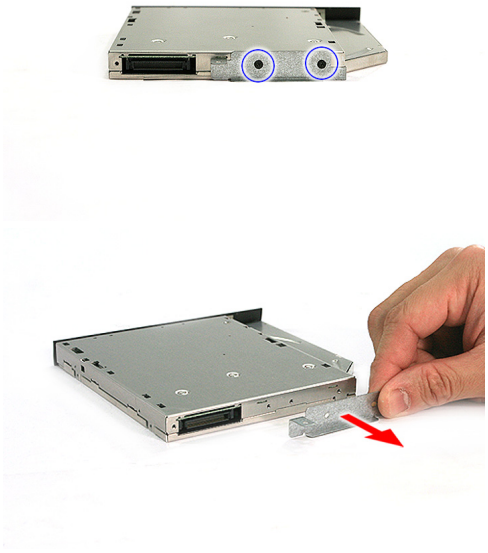
3. Carefully use a plastic screw driver to eject the optical drive tray.



4. Pull the optical drive module out from the main unit.



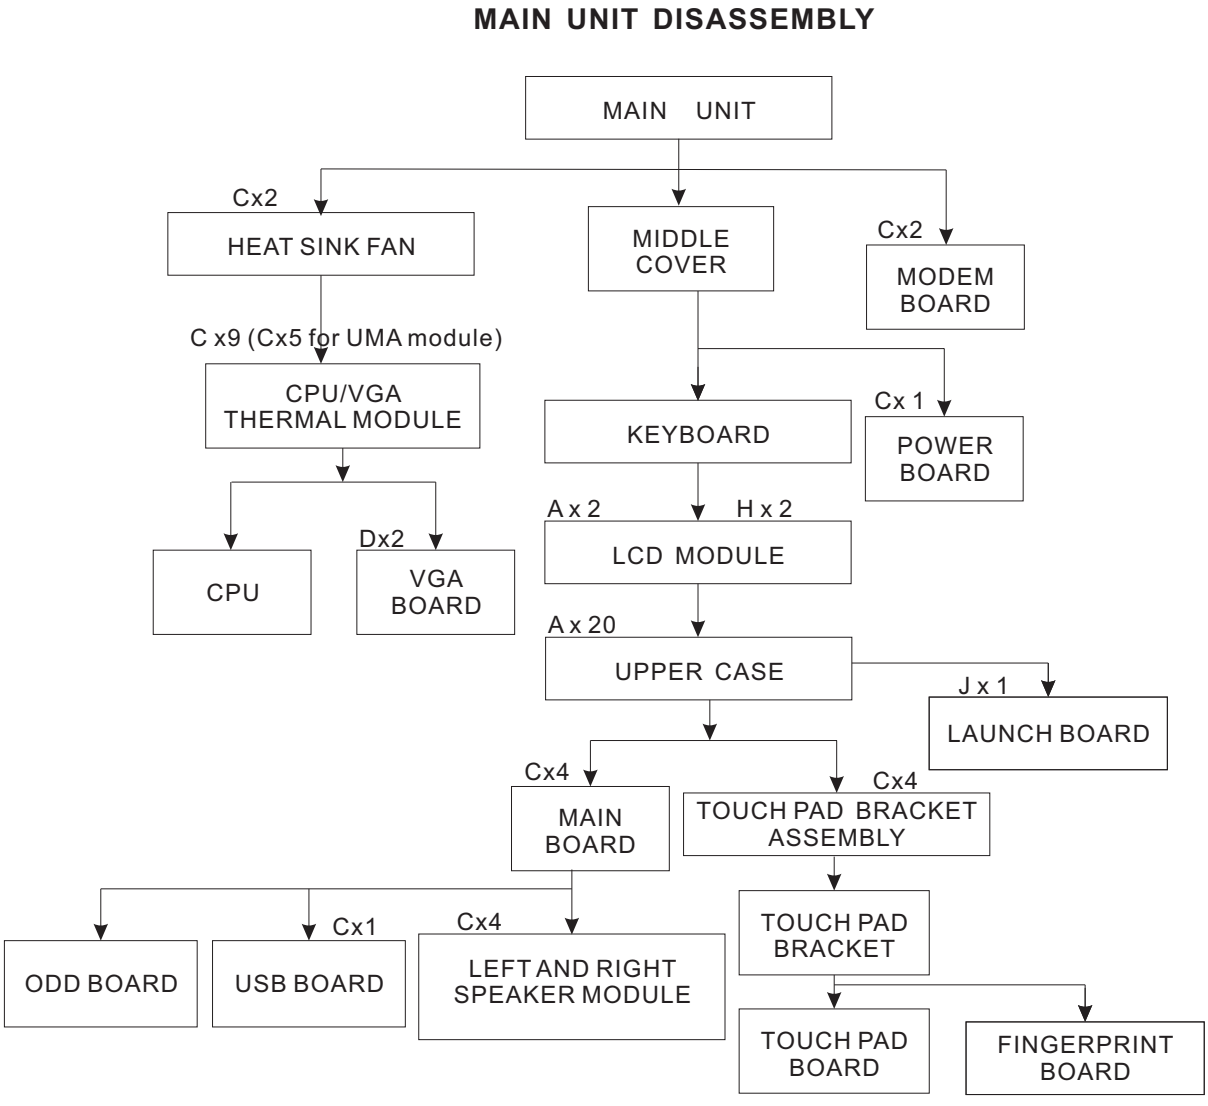
5. Remove the two screws (K) securing the locker bracket and remove the locker bracket from the optical disk drive module.



Step	Size (Quantity)	Color	Torque
1~2	M2 x L3 (2)	Black	1.6 kgf-cm

Main Unit Disassembly Process

Main Unit Disassembly Flowchart



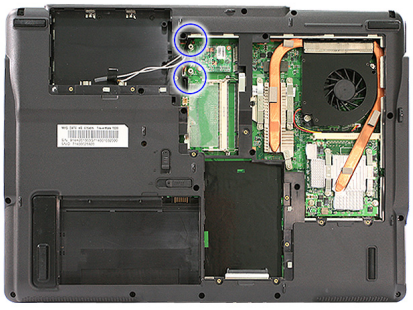
Screw List

	Screw	Part No.
A	M2.5 x L6	86.00E33.736
C	M2 x L4	86.9A552.4R0
D	M2.5 x L5	86.00E74.335
H	M2.5 x L8	86.00E34.738
J	M2 x L4	86.00F24.724

Removing the Modem Board

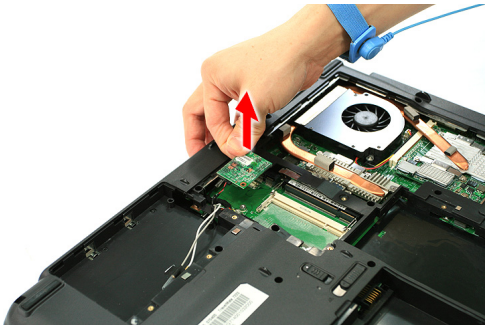
1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.

3. See “Removing the DIMM” on page 68.
4. See “Removing the WLAN Board Modules” on page 68.
5. Remove the 2 screws (C) securing the modem card.



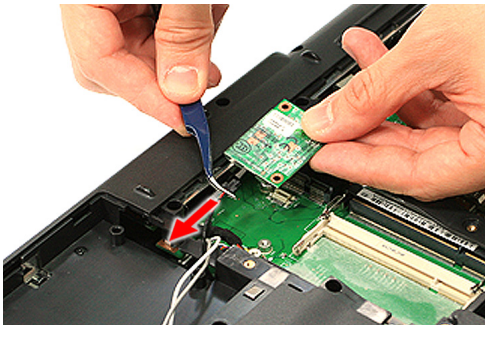
Step	Size (Quantity)	Color	Torque
1~2	M2 x L4 (2)	Silver	1.8 kgf-cm

6. Lift partially to detach the modem board from the main board.



NOTE: The modem cable is still attached to the modem board.

7. Disconnect the modem cable from the modem board.

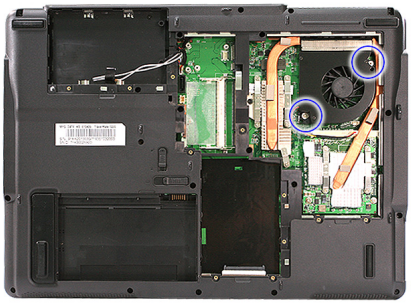


Removing the Heatsink Fan Module

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.

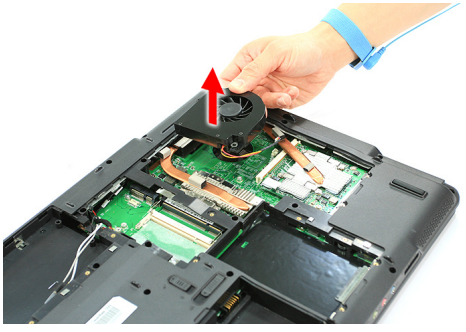
3. Disconnect the heatsink fan connector from FAN1 on the main board.

4. Remove the two screws (C) securing the heatsink fan module.



Step	Size (Quantity)	Color	Torque
1~2	M2 x L4 (2)	Silver	1.6 kgf-cm

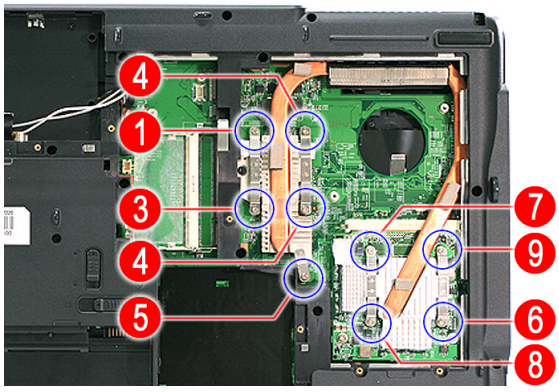
5. Remove the heatsink fan module from the main board.



Removing the CPU and VGA Heatsink Module

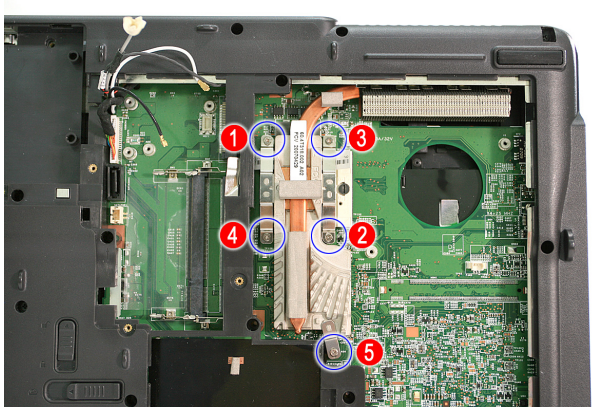
1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.

3. Remove the nine screws (C) securing the CPU and VGA heatsink module in place.

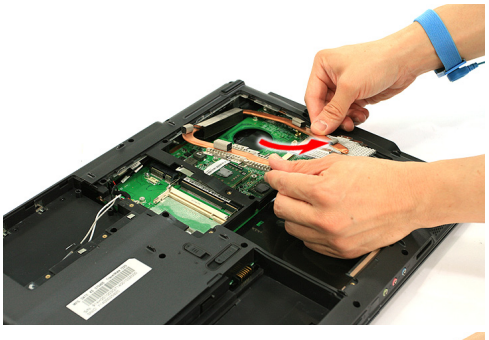


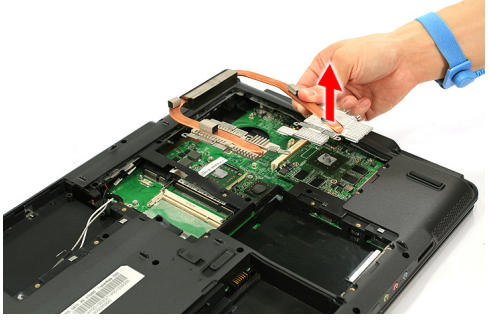
Step	Size (Quantity)	Color	Torque
1~9	M2 x L4 (9)	Silver	3.0 kgf-cm

a. For system without the discrete graphic card, there are only 5 screws holding the heatsink.



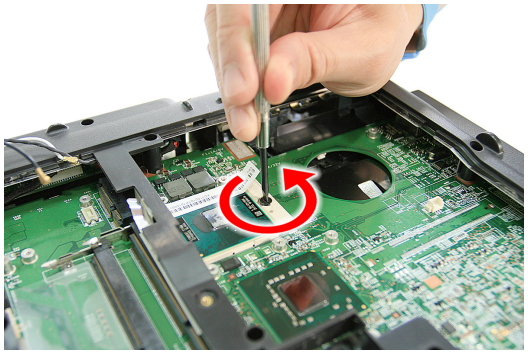
4. Slide out and remove the heatsink module.

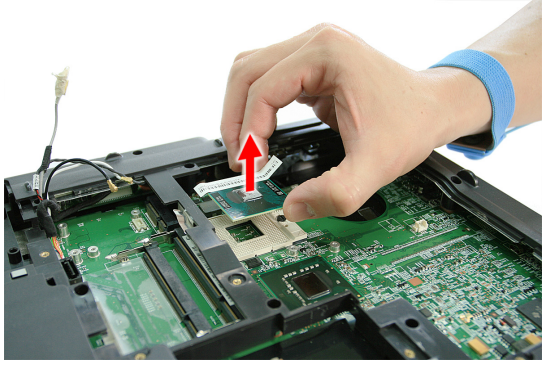




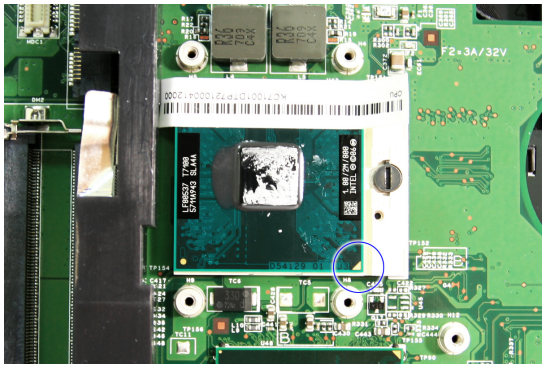
Removing the CPU

1. See “Removing the Battery Pack” on page 62..
2. See “Removing the Lower Cover” on page 64..
3. See “Removing the Heatsink Fan Module” on page 74.
4. See “Removing the CPU and VGA Heatsink Module” on page 75.
5. Using a flat screwdriver, turn the CPU socket latch counter-clockwise to release the CPU, then remove the CPU.





NOTE: When installing the CPU, make sure to install the CPU with PIN 1 at the corner as shown.



Removing the VGA board (for Discrete model only)

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the Heatsink Fan Module” on page 74.
4. See “Removing the CPU and VGA Heatsink Module” on page 75.

5. Remove the two screws (D) securing the VGA board.

Step	Size (Quantity)	Color	Torque
1~2	M2.5 x L5 (2)	Silver	1.6 kgf-cm

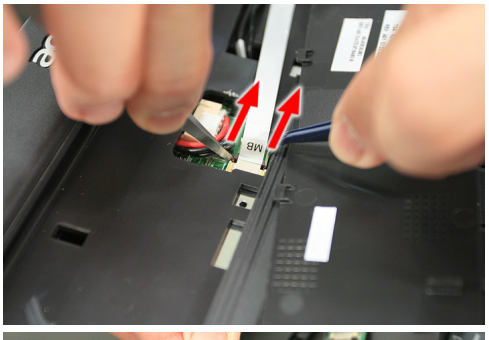
6. Carefully remove the VGA board from the main board.

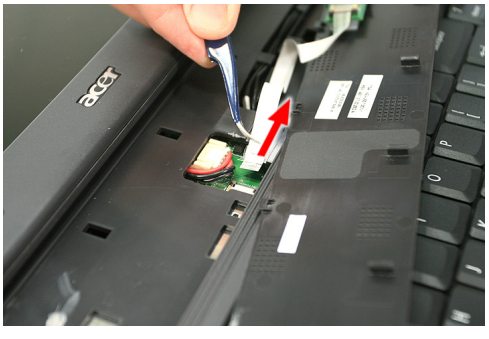
Removing the Middle Cover and the Power Board

1. See “Removing the Battery Pack” on page 62.
2. Open the LCD screen all the way to facilitate the easy removal of the middle cover.
3. To remove the Middle Cover, carefully insert the plastic flat screwdriver under the side of the middle cover and gently pry up the middle cover. Continue prying on the other side until you could detach the Middle Cover.

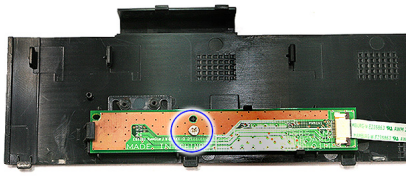
4. Detach the cover and turn it over on the keyboard.

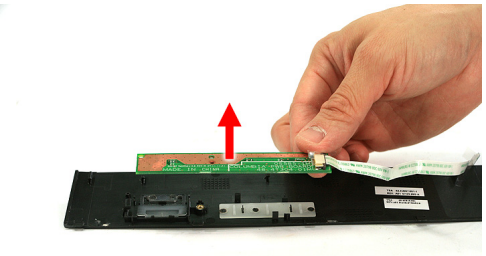
5. Disconnect the Power board cable from the main board and disconnect the Power board cable.





6. Remove the one screw (C) securing the Power board to the middle cover, and remove the Power board from the middle cover.

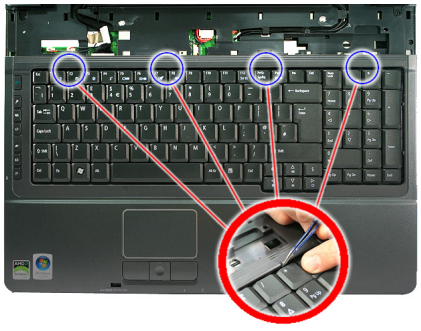




Step	Size (Quantity)	Color	Torque
1	M2 x L4 (1)	Silver	1.6 kgf-cm

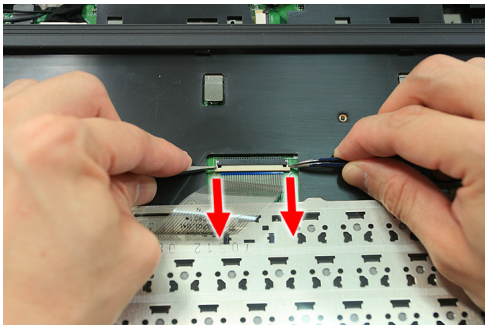
Removing the Keyboard

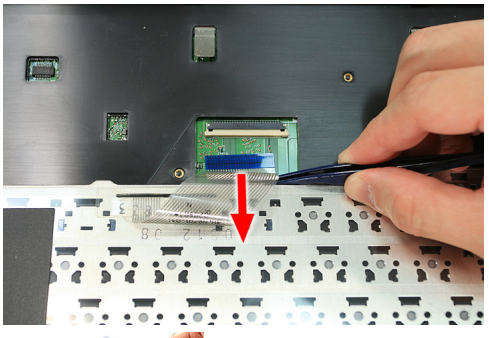
1. See “Removing the Battery Pack” on page 62..
2. See “Removing the Middle Cover and the Power Board” on page 78.
3. Release the top latches securing the keyboard in place.



4. Carefully pry the keyboard out of the side latches and slide it out; then turn it over on the touchpad area.

5. Disconnect the keyboard cable from the main board to remove the keyboard.

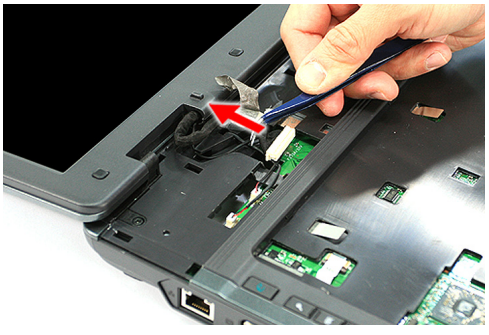




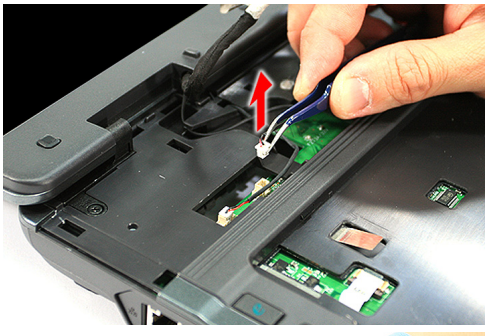
Removing the LCD Module

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the WLAN Board Modules” on page 68.
4. See “Removing the Middle Cover and the Power Board” on page 78.
5. See “Removing the Keyboard” on page 80.

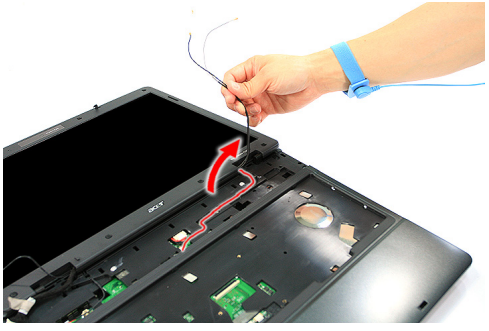
6. Remove the acetic tape and disconnect the LCD coaxial cable from the LCD1 connector on the main board.



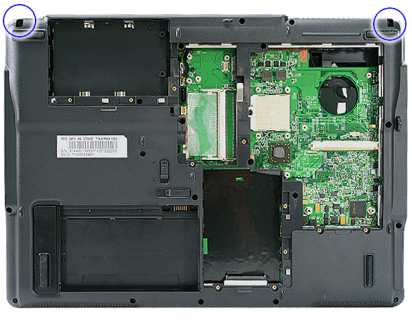
7. Remove the internal microphone cable from the INTMIC1 connector on the main board and release the cables from the latches.



8. Release the wireless LAN antenna cables from the hole and latches as shown.

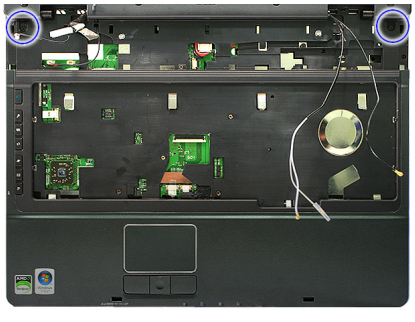


9. Remove the two screws (A) from the base of the unit.



Step	Size (Quantity)	Color	Torque
1~2	M2.5 x L6 (2)	Black	4.0 kgf-cm

10. Remove the two screws (H) from the left and right hinge of the LCD module.



Step	Size (Quantity)	Color	Torque
1~2	M2.5 x L8 (2)	Black	4.0 kgf-cm

11. Carefully remove the LCD module from the base unit.

NOTE: When connecting the cable back to the unit, please note that the cable should be routed well.

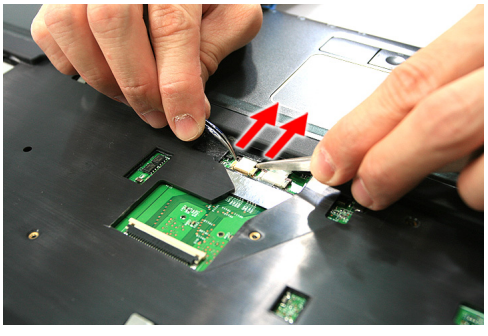
Separating the Upper Case from the Lower Case

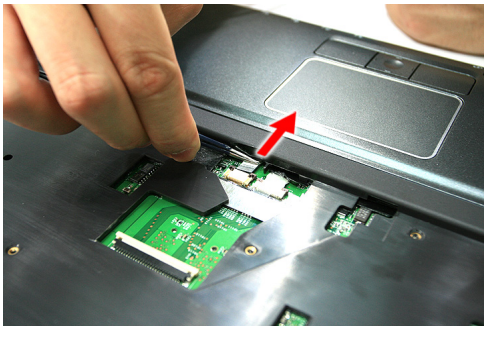
1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. See “Removing the Secondary HDD Cover” on page 65.
6. See “Removing the Secondary HDD Bracket and Connector” on page 66.
7. See “Removing the DIMM” on page 68.
8. See “Removing the WLAN Board Modules” on page 68.
9. See “Removing the Hard Disk Drive Module” on page 69.
10. See “Removing the Optical Drive Module” on page 70.
11. See “Removing the Modem Board” on page 73.
12. See “Removing the Heatsink Fan Module” on page 74.
13. See “Removing the CPU and VGA Heatsink Module” on page 75.
14. See “Removing the CPU” on page 77.
15. See “Removing the VGA board (for Discrete model only)” on page 77.
16. See “Removing the Middle Cover and the Power Board” on page 78.
17. See “Removing the Keyboard” on page 80.
18. See “Removing the LCD Module” on page 81.
19. Disconnect the cover switch cable from LID1 on the main board.

20. Disconnect the DC in cable from the main board.

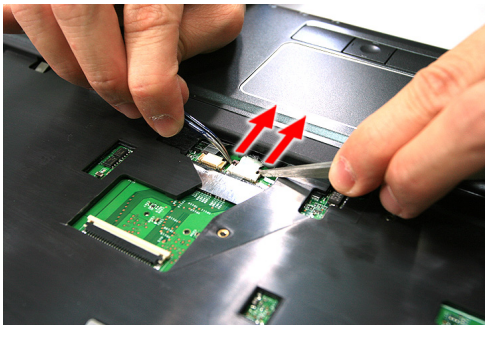
21. Disconnect the Launch board cable from the SWITCHCN1 from the main board.

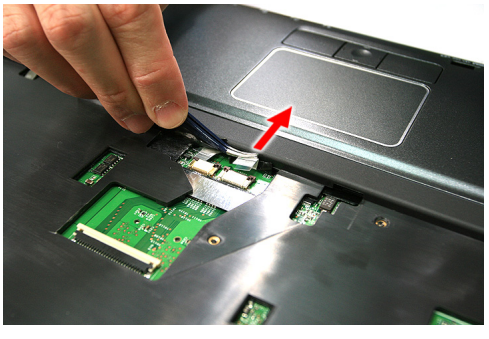
22. Disconnect the fingerprint cable (select model only) from the FPCN1 connector on the main board.



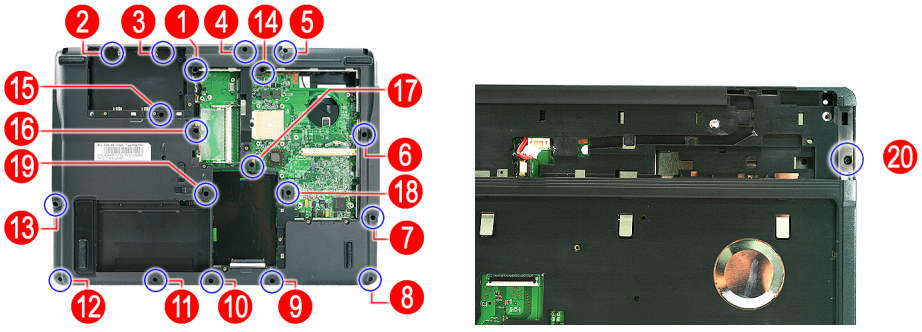


23. Disconnect the touchpad cable from the TOUCHPAD1 on the main board.



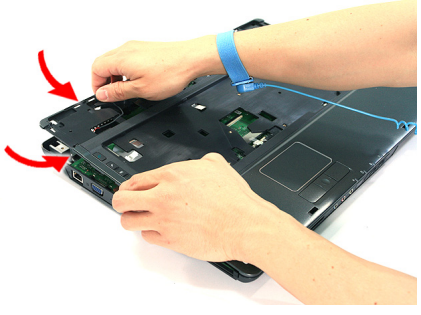


24. Remove the twenty screws (A) on the bottom and top panel.

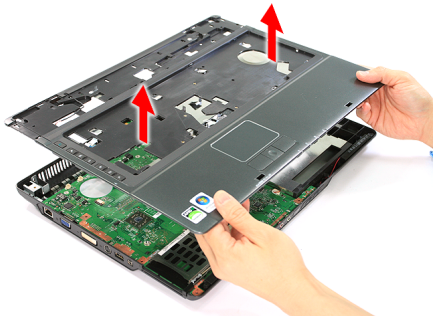


Step	Size (Quantity)	Color	Torque
1~20	M2.5 x L6 (20)	Black	3.0 kgf-cm

25. Gently pry the upper case from the main unit.



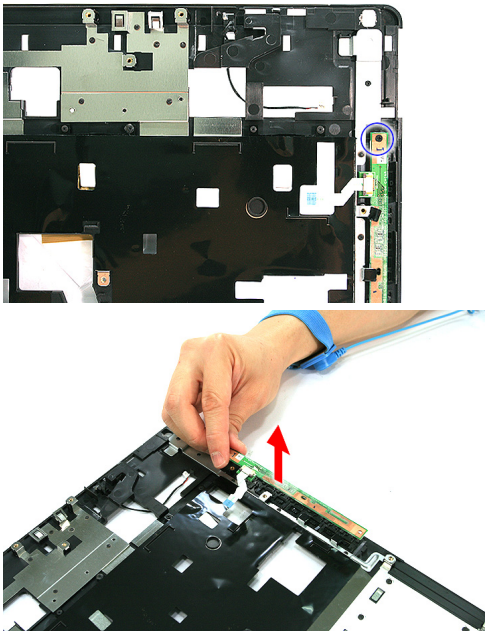
26. Remove the upper case from the main unit.



Removing the Launch Board

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. See “Removing the Secondary HDD Cover” on page 65.
6. See “Removing the Secondary HDD Bracket and Connector” on page 66.
7. See “Removing the DIMM” on page 68.
8. See “Removing the WLAN Board Modules” on page 68.
9. See “Removing the Hard Disk Drive Module” on page 69.
10. See “Removing the Optical Drive Module” on page 70.
11. See “Removing the Modem Board” on page 73.

12. See “Removing the Heatsink Fan Module” on page 74.
13. See “Removing the CPU and VGA Heatsink Module” on page 75.
14. See “Removing the CPU” on page 77.
15. See “Removing the VGA board (for Discrete model only)” on page 77.
16. See “Removing the Middle Cover and the Power Board” on page 78.
17. See “Removing the Keyboard” on page 80.
18. See “Removing the LCD Module” on page 81.
19. See “Separating the Upper Case from the Lower Case” on page 84.
20. Remove the one screw (J) holding the launch board and remove the launch board from the upper cover.

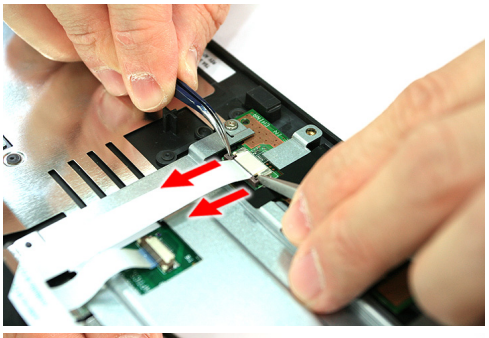


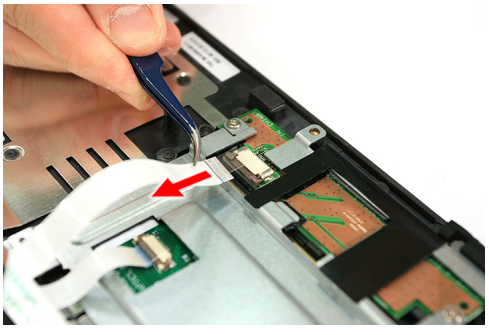
Step	Size (Quantity)	Color	Torque
1	M2 x L4 (1)	Black	1.6 kgf-cm

Removing the Touch Pad Board Module

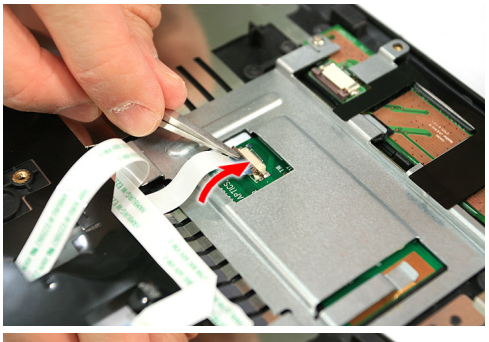
1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. See “Removing the Secondary HDD Cover” on page 65.
6. See “Removing the Secondary HDD Bracket and Connector” on page 66.
7. See “Removing the DIMM” on page 68.
8. See “Removing the WLAN Board Modules” on page 68.
9. See “Removing the Hard Disk Drive Module” on page 69.
10. See “Removing the Optical Drive Module” on page 70.
11. See “Removing the Modem Board” on page 73.
12. See “Removing the Heatsink Fan Module” on page 74.
13. See “Removing the CPU and VGA Heatsink Module” on page 75.

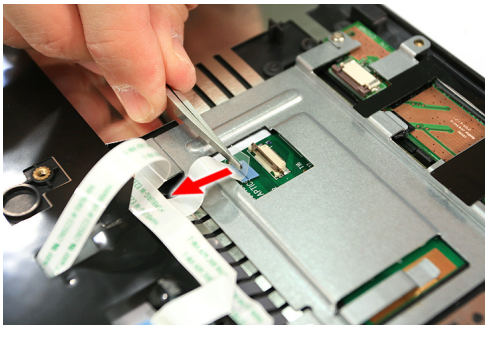
14. See “Removing the CPU” on page 77.
15. See “Removing the VGA board (for Discrete model only)” on page 77.
16. See “Removing the Middle Cover and the Power Board” on page 78.
17. See “Removing the Keyboard” on page 80.
18. See “Removing the LCD Module” on page 81.
19. See “Separating the Upper Case from the Lower Case” on page 84.
20. Remove the fingerprint cable from the fingerprint board.



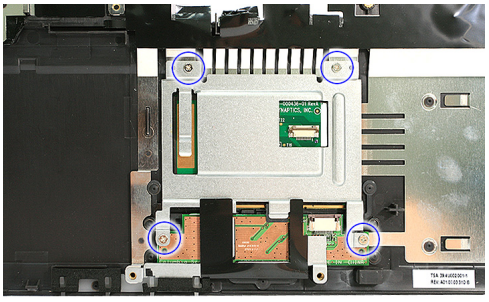


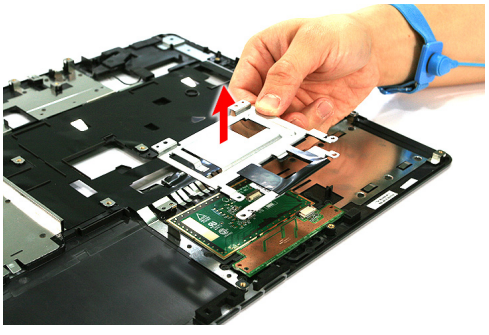
21. Remove the touch pad cable from the touch pad board.





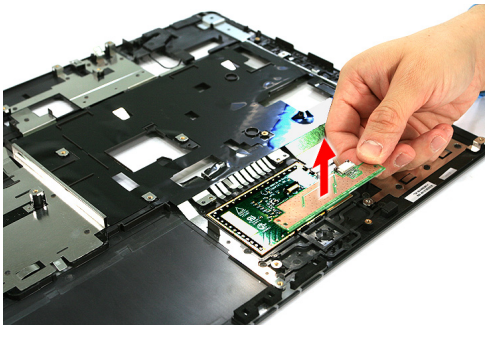
22. Remove the four screws (C) on the touch pad bracket and remove the touch pad bracket from the upper case.



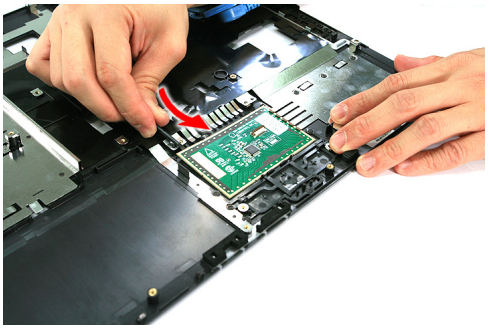


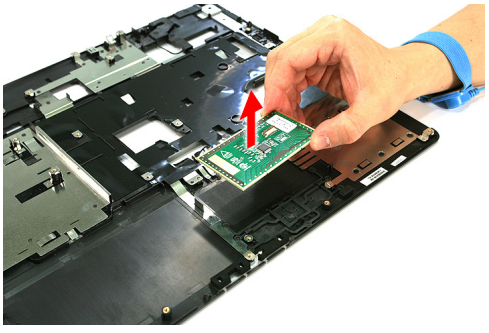
Step	Size (Quantity)	Color	Torque
1~4	M2 x L4 (4)	Silver	1.6 kgf-cm

23. Remove the fingerprint board from the upper case.



24. Carefully pry loose and remove the touch pad board.





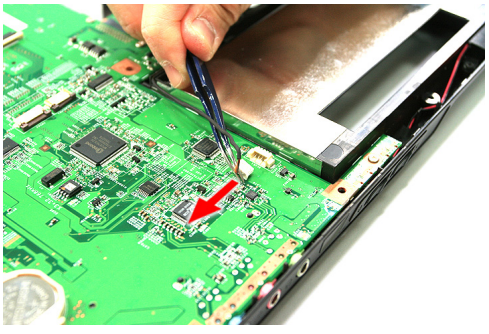
WARNING: The touchpad board is glued to the upper case, only remove the touchpad board if it is defective.

Removing the Main Board

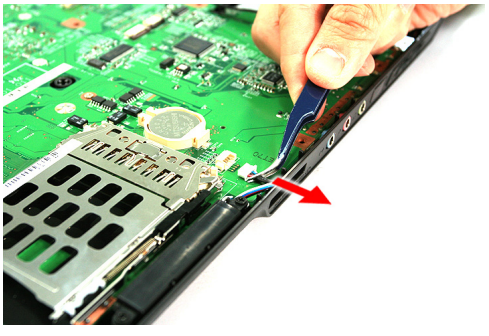
1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. See “Removing the Secondary HDD Cover” on page 65.
6. See “Removing the Secondary HDD Bracket and Connector” on page 66.
7. See “Removing the DIMM” on page 68.
8. See “Removing the WLAN Board Modules” on page 68.
9. See “Removing the Hard Disk Drive Module” on page 69.
10. See “Removing the Optical Drive Module” on page 70.
11. See “Removing the Modem Board” on page 73.
12. See “Removing the Heatsink Fan Module” on page 74.
13. See “Removing the CPU and VGA Heatsink Module” on page 75.
14. See “Removing the CPU” on page 77.
15. See “Removing the VGA board (for Discrete model only)” on page 77.
16. See “Removing the Middle Cover and the Power Board” on page 78.
17. See “Removing the Keyboard” on page 80.
18. See “Removing the LCD Module” on page 81.
19. See “Separating the Upper Case from the Lower Case” on page 84.

20. Disconnect the USB cable from the main board.

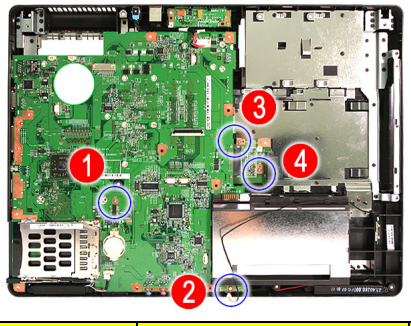
21. Disconnect the Bluetooth cable from the BLUE1 connector on the main board.



22. Disconnect the speaker cable from the SPKR1 on the main board.

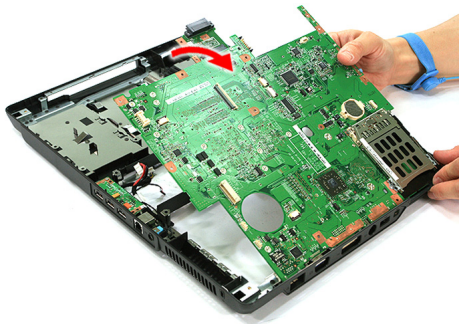


23. Remove the four screws (C) holding the main board.



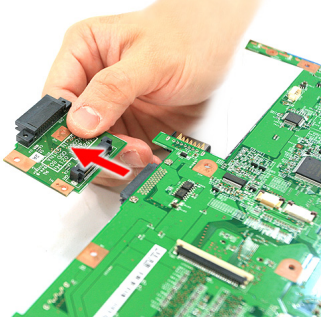
Step	Size (Quantity)	Color	Torque
1~4	M2 x L4 (4)	Silver	1.6 kgf-cm

24. Carefully remove the main board from the bottom panel.



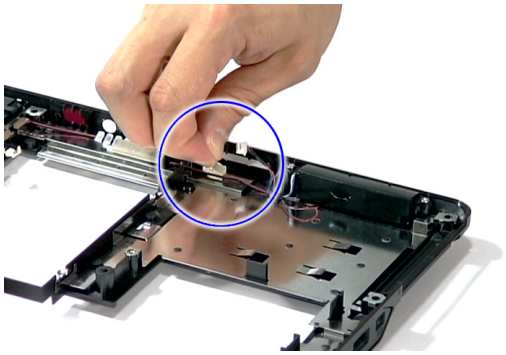
Removing the ODD Board Module

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. See “Removing the Secondary HDD Cover” on page 65.
6. See “Removing the Secondary HDD Bracket and Connector” on page 66.
7. See “Removing the DIMM” on page 68.
8. See “Removing the WLAN Board Modules” on page 68.
9. See “Removing the Hard Disk Drive Module” on page 69.
10. See “Removing the Optical Drive Module” on page 70.
11. See “Removing the Modem Board” on page 73.
12. See “Removing the Heatsink Fan Module” on page 74.
13. See “Removing the CPU and VGA Heatsink Module” on page 75.
14. See “Removing the CPU” on page 77.
15. See “Removing the VGA board (for Discrete model only)” on page 77.
16. See “Removing the Middle Cover and the Power Board” on page 78.
17. See “Removing the Keyboard” on page 80.
18. See “Removing the LCD Module” on page 81.
19. See “Separating the Upper Case from the Lower Case” on page 84.
20. See “Removing the Main Board” on page 90.
21. Detach the ODD board module from the main board.

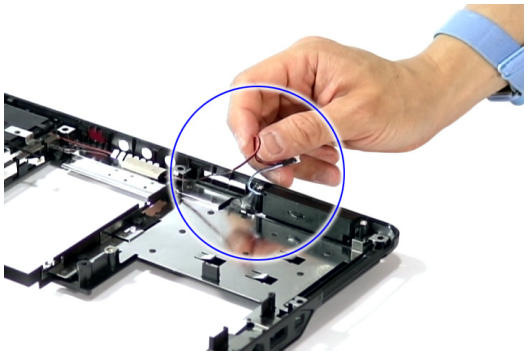


Removing the Speaker Modules

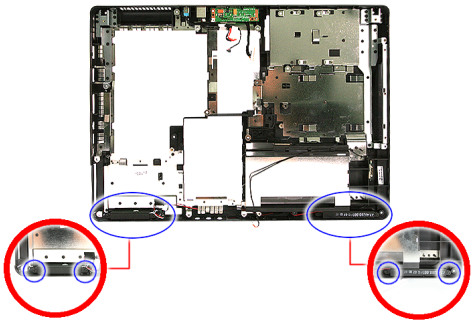
1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. See “Removing the Secondary HDD Cover” on page 65.
6. See “Removing the Secondary HDD Bracket and Connector” on page 66.
7. See “Removing the DIMM” on page 68.
8. See “Removing the WLAN Board Modules” on page 68.
9. See “Removing the Hard Disk Drive Module” on page 69.
10. See “Removing the Optical Drive Module” on page 70.
11. See “Removing the Modem Board” on page 73.
12. See “Removing the Heatsink Fan Module” on page 74.
13. See “Removing the CPU and VGA Heatsink Module” on page 75.
14. See “Removing the CPU” on page 77.
15. See “Removing the VGA board (for Discrete model only)” on page 77.
16. See “Removing the Middle Cover and the Power Board” on page 78.
17. See “Removing the Keyboard” on page 80.
18. See “Removing the LCD Module” on page 81.
19. See “Separating the Upper Case from the Lower Case” on page 84.
20. See “Removing the Main Board” on page 90.
21. Remove the tape securing the speaker cables in place.



22. Release the speaker cables from the latches.

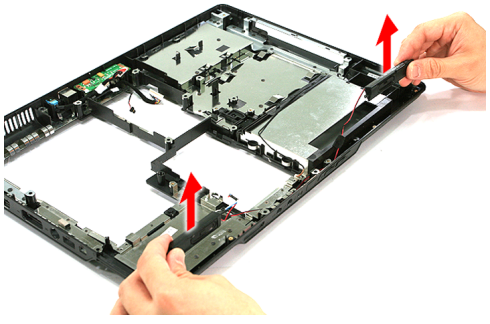


23. Remove the four screws (C) holding the left and right speakers.



Step	Size (Quantity)	Color	Torque
1~4	M2 x L4 (4)	Silver	1.6 kgf-cm

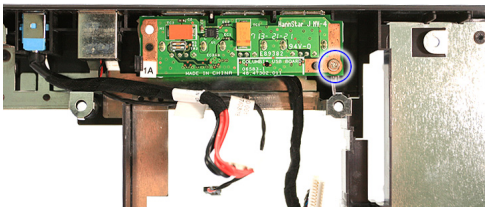
24. Remove the left and right speakers from the upper case.



Removing the USB Board

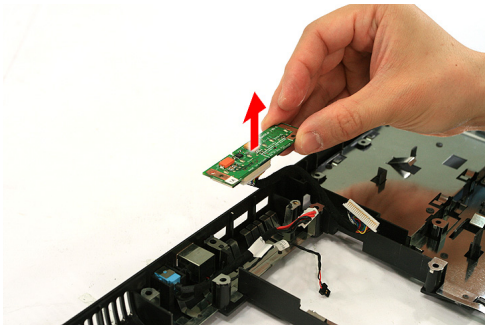
1. See “Removing the Battery Pack” on page 62.
2. See “Removing the SD dummy card” on page 63.
3. See “Removing the PC and ExpressCard dummy cards” on page 63.
4. See “Removing the Lower Cover” on page 64.
5. See “Removing the Secondary HDD Cover” on page 65.
6. See “Removing the Secondary HDD Bracket and Connector” on page 66.
7. See “Removing the DIMM” on page 68.
8. See “Removing the WLAN Board Modules” on page 68.
9. See “Removing the Hard Disk Drive Module” on page 69.
10. See “Removing the Optical Drive Module” on page 70.
11. See “Removing the Modem Board” on page 73.
12. See “Removing the Heatsink Fan Module” on page 74.
13. See “Removing the CPU and VGA Heatsink Module” on page 75.
14. See “Removing the CPU” on page 77.
15. See “Removing the VGA board (for Discrete model only)” on page 77.
16. See “Removing the Middle Cover and the Power Board” on page 78.
17. See “Removing the Keyboard” on page 80.
18. See “Removing the LCD Module” on page 81.
19. See “Separating the Upper Case from the Lower Case” on page 84.
20. See “Removing the Main Board” on page 90.

21. Remove the one screw (C) securing the USB board to the lower case.



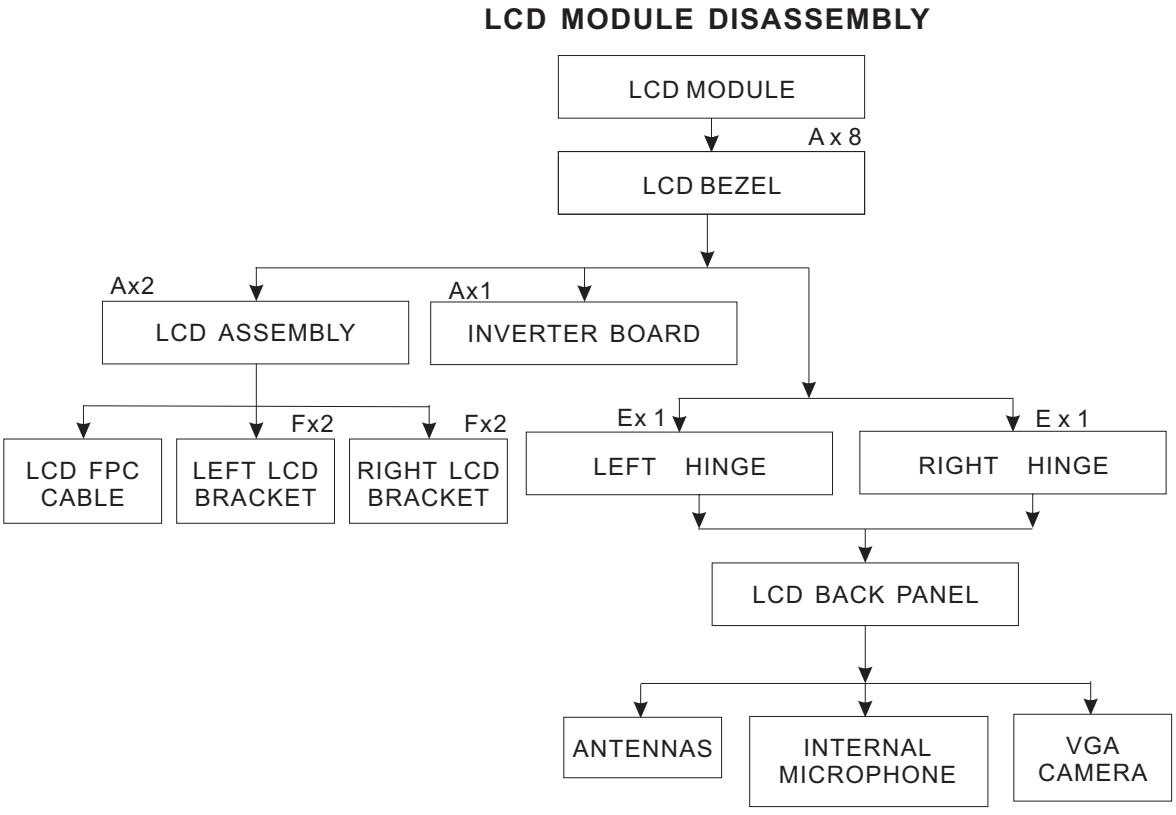
Step	Size (Quantity)	Color	Torque
1	M2 x L4 (1)	Silver	1.6 kgf-cm

22. Remove the USB Board from the lower case.



LCD Module Disassembly Process

LCD Module Disassembly Flowchart



Main Screw List

Item	Screw	Part No.
A	M2.5 x L6	86.00E33.736
E	M2.5 x L5	86.00F19.735
F	M2 x L3	86.00C07.220

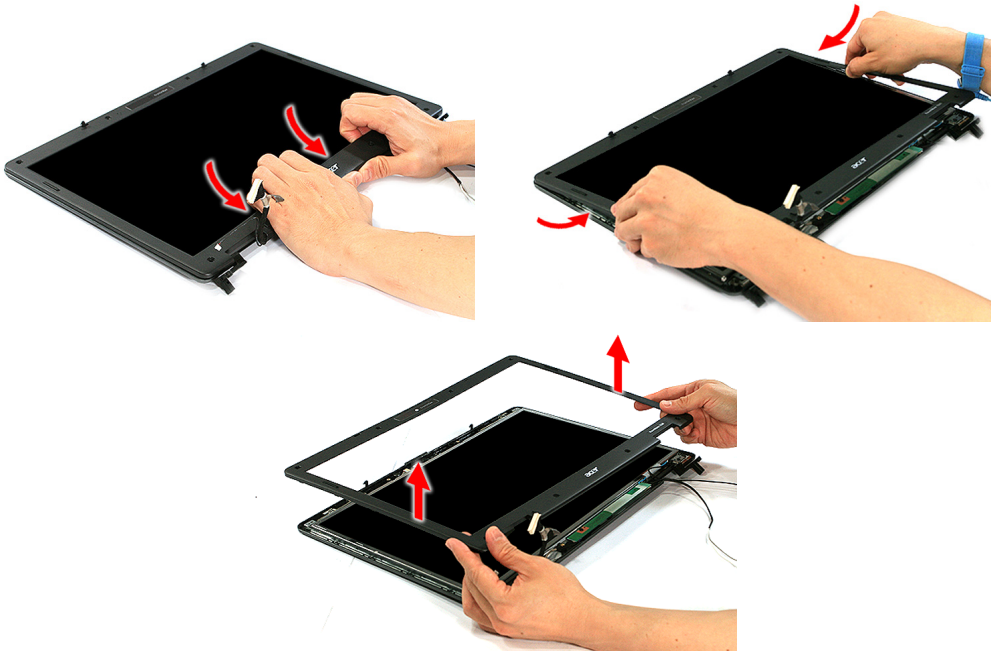
Removing the LCD Bezel

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the WLAN Board Modules” on page 68.
4. See “Removing the Middle Cover and the Power Board” on page 78.
5. See “Removing the LCD Module” on page 81.
6. Remove the four upper bezel screw caps and the four lower bezel caps.

7. Remove the eight screws (A) on the LCD module in the order as shown.

Step	Size (Quantity)	Color	Torque
1~8	M2.5 x L6 (8)	Black	3.0 kgf-cm

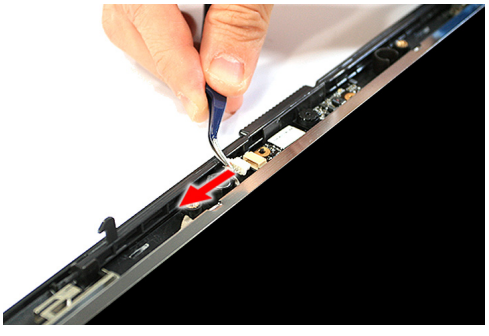
8. Carefully pry open the LCD bezel and remove the bezel from the LCD module.



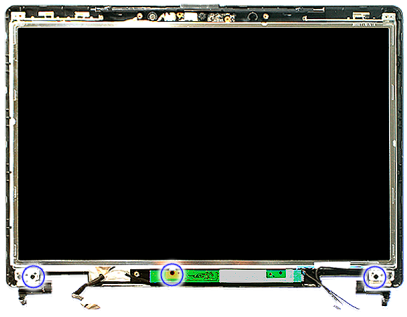
NOTE: The bottom side of the bezel is glued to the lcd panel, be careful when trying to remove the bezel.

Removing the LCD module with the Brackets

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the WLAN Board Modules” on page 68.
4. See “Removing the Middle Cover and the Power Board” on page 78.
5. See “Removing the LCD Module” on page 81.
6. See “Removing the LCD Bezel” on page 97.
7. Disconnect the cable from the camera board.

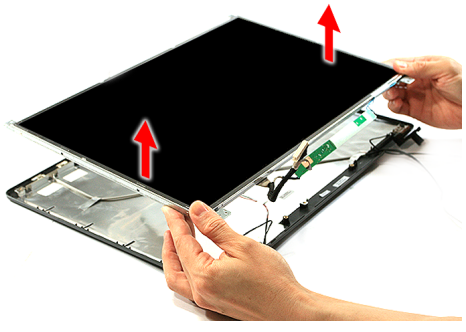


8. Remove the three screws (A) securing the LCD module and the Inverter panel.



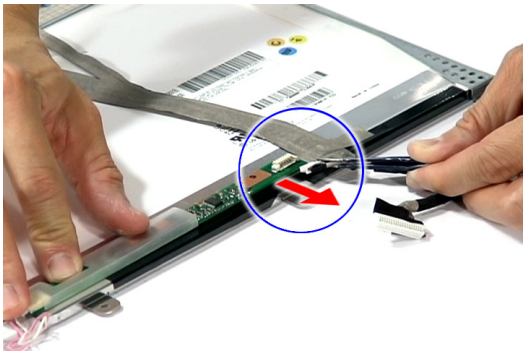
Step	Size (Quantity)	Color	Torque
1~3	M2.5 x L6 (3)	Black	3.0 kgf-cm

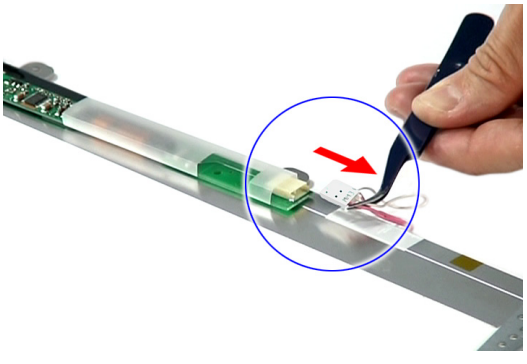
9. Detach the LCD with the brackets from the back cover.



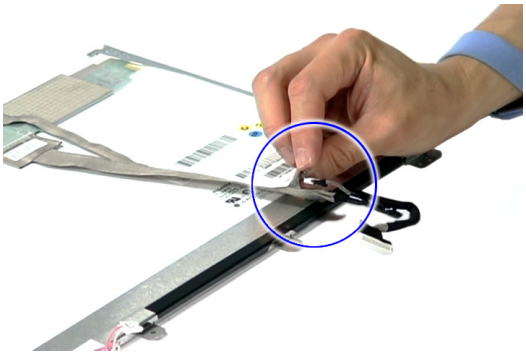
Removing the Inverter Board and FPC Cable

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the WLAN Board Modules” on page 68.
4. See “Removing the Middle Cover and the Power Board” on page 78.
5. See “Removing the LCD Module” on page 81.
6. See “Removing the LCD Bezel” on page 97.
7. See “Removing the LCD module with the Brackets” on page 98.
8. Disconnect the inverter board cable from its connector, then disconnect the 2P cable on the inverter board to remove it.

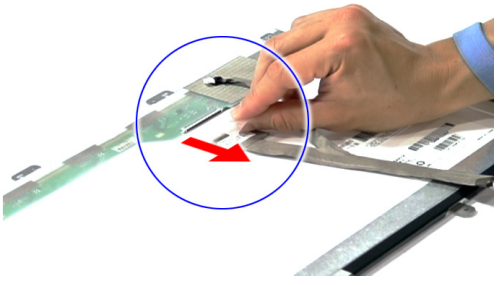




9. Detach the acetic tapes holding the FPC cable from the LCD panel and detach the acetic tape securing the FPC connector.



10. Disconnect the FPC cable from the LCD panel.



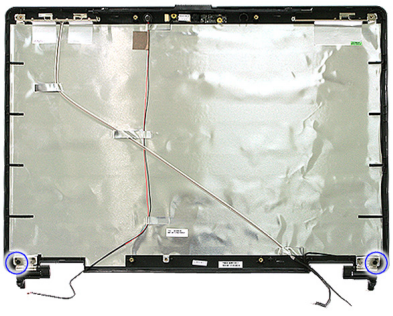
Removing the LCD Brackets

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the WLAN Board Modules” on page 68.
4. See “Removing the Middle Cover and the Power Board” on page 78.
5. See “Removing the LCD Module” on page 81.
6. See “Removing the LCD Bezel” on page 97.
7. See “Removing the LCD module with the Brackets” on page 98.
8. See “Removing the Inverter Board and FPC Cable” on page 99.
9. Remove the four screws (F) securing the left and right LCD brackets to remove the brackets.

Step	Size (Quantity)	Color	Torque
1~4	M2 x L3 (4)	Silver	1.6 kgf-cm

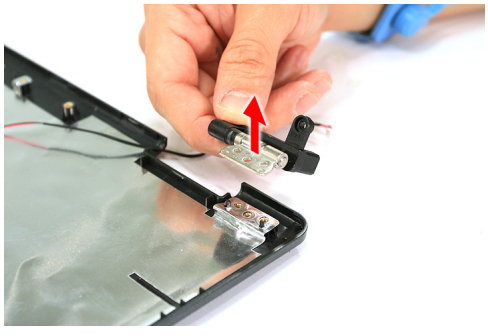
Removing the Left and Right Hinge

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the WLAN Board Modules” on page 68.
4. See “Removing the Middle Cover and the Power Board” on page 78.
5. See “Removing the LCD Module” on page 81.
6. See “Removing the LCD Bezel” on page 97.
7. See “Removing the LCD module with the Brackets” on page 98.
8. Remove the two screws (E) securing the left and right hinge to the back cover.



Step	Size (Quantity)	Color	Torque
1~2	M2.5 x L5 (2)	Black	2.5 kgf-cm

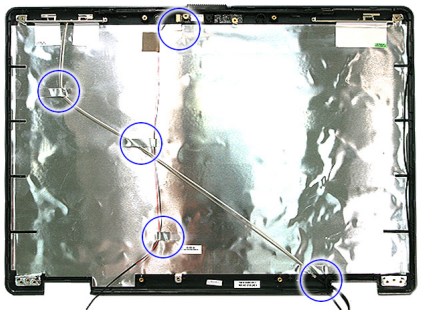
9. Remove the left and right hinge from the back cover.



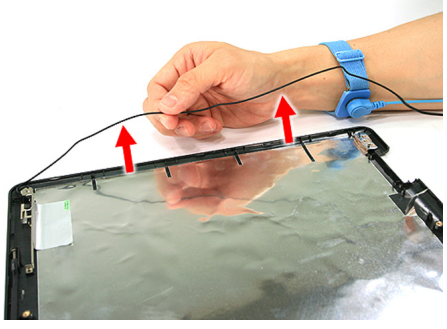
Removing the Antennas

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the WLAN Board Modules” on page 68.
4. See “Removing the Middle Cover and the Power Board” on page 78.
5. See “Removing the LCD Module” on page 81.
6. See “Removing the LCD Bezel” on page 97.
7. See “Removing the LCD module with the Brackets” on page 98.
8. See “Removing the Left and Right Hinge” on page 101.

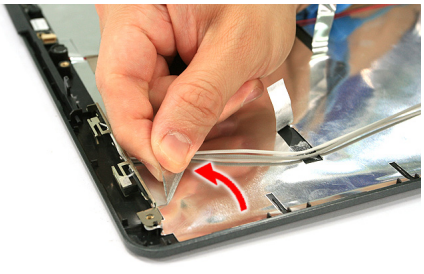
9. Loosen the aluminum tape holding the antennas in place.

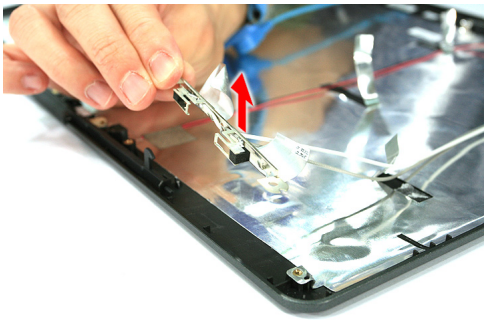


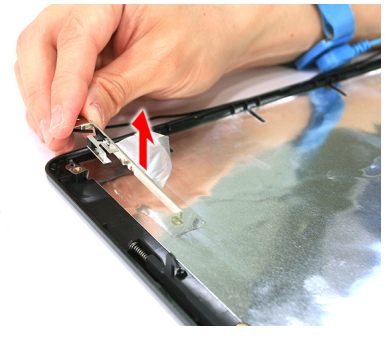
10. Release the antenna cables from the latches.



11. Remove the tapes together with the antenna cables from the back cover.



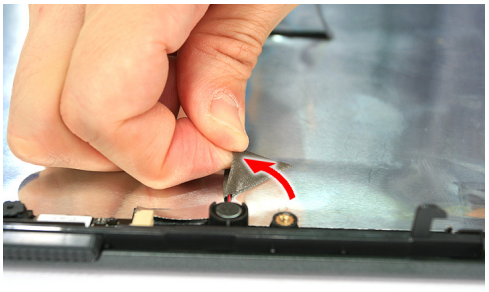




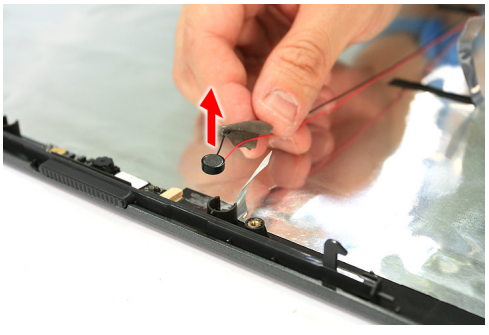
Removing the Internal Microphone and Web Camera

1. See “Removing the Battery Pack” on page 62.
2. See “Removing the Lower Cover” on page 64.
3. See “Removing the WLAN Board Modules” on page 68.
4. See “Removing the Middle Cover and the Power Board” on page 78.
5. See “Removing the LCD Module” on page 81.
6. See “Removing the LCD Bezel” on page 97.

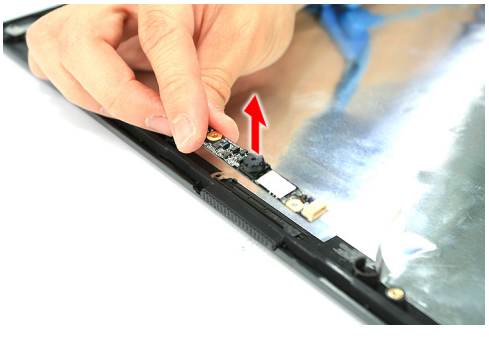
7. See “Removing the LCD module with the Brackets” on page 98.
8. See “Removing the Left and Right Hinge” on page 101.
9. See “Removing the Antennas” on page 101.
10. Remove the tape holding the internal microphone in place.



11. Remove the internal microphone from the back cover.



12. Remove the Web camera from the back cover.



Troubleshooting

Use the following procedure as a guide for computer problems.

NOTE: The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.

1. Obtain the failing symptoms in as much detail as possible.
2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
3. Use the following table with the verified symptom to determine which page to go to.

Symptoms (Verified)	Go To
Power failure. (The power indicator does not go on or stay on.)	“Power System Check” on page 107.
POST does not complete. No beep or error codes are indicated.	“Power-On Self-Test (POST) Error Message” on page 110 “Undetermined Problems” on page 124
POST detects an error and displayed messages on screen.	“Error Message List” on page 111
Other symptoms (i.e. LCD display problems or others).	“Power-On Self-Test (POST) Error Message” on page 110
Symptoms cannot be re-created (intermittent problems).	Use the customer-reported symptoms and go to “Power-On Self-Test (POST) Error Message” on page 110 “Intermittent Problems” on page 123 “Undetermined Problems” on page 124

System Check Procedures

External Diskette Drive Check

Do the following to isolate the problem to a controller, driver, or diskette. A write-enabled, diagnostic diskette is required.

NOTE: Make sure that the diskette does not have more than one label attached to it. Multiple labels can cause damage to the drive or cause the drive to fail.

Do the following to select the test device.

1. Boot from the diagnostics diskette and start the diagnostics program.
2. See if FDD Test is passed as the program runs to FDD Test.
3. Follow the instructions in the message window.

If an error occurs with the internal diskette drive, reconnect the diskette connector on the system board.

If the error still remains:

1. Reconnect the external diskette drive/DVD-ROM module.
2. Replace the external diskette drive/CD-ROM module.
3. Replace the main board.

External CD-ROM Drive Check

Do the following to isolate the problem to a controller, drive, or CD-ROM. Make sure that the CD-ROM does not have any label attached to it. The label can cause damage to the drive or can cause the drive to fail.

Do the following to select the test device:

1. Boot from the diagnostics diskette and start the diagnostics program.
2. See if CD-ROM Test is passed when the program runs to CD-ROM Test.
3. Follow the instructions in the message window.

If an error occurs, reconnect the connector on the System board. If the error still remains:

1. Reconnect the external diskette drive/CD-ROM module.
2. Replace the external diskette drive/CD-ROM module.
3. Replace the main board.

Keyboard or Auxiliary Input Device Check

Remove the external keyboard if the internal keyboard is to be tested.

If the internal keyboard does not work or an unexpected character appears, make sure that the flexible cable extending from the keyboard is correctly seated in the connector on the system board.

If the keyboard cable connection is correct, run the Keyboard Test.

If the tests detect a keyboard problem, do the following one at a time to correct the problem. Do not replace a non-defective FRU:

1. Reconnect the keyboard cables.
2. Replace the keyboard.
3. Replace the main board.

The following auxiliary input devices are supported by this computer:

- ❑ Numeric keypad

- External keyboard

If any of these devices do not work, reconnect the cable connector and repeat the failing operation.

Memory check

Memory errors might stop system operations, show error messages on the screen, or hang the system.

1. Boot from the diagnostics diskette and start the diagnostic program (please refer to main board.
2. Go to the diagnostic memory in the test items.
3. Press F2 in the test items.
4. Follow the instructions in the message window.

NOTE: Make sure that the DIMM is fully installed into the connector. A loose connection can cause an error.

Power System Check

To verify the symptom of the problem, power on the computer using each of the following power sources:

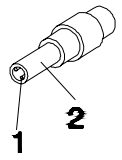
1. Remove the battery pack.
2. Connect the power adapter and check that power is supplied.
3. Disconnect the power adapter and install the charged battery pack; then check that power is supplied by the battery pack.

If you suspect a power problem, see the appropriate power supply check in the following list:

- “Check the Power Adapter” on page 108
- “Check the Battery Pack” on page 109

Check the Power Adapter

Unplug the power adapter cable from the computer and measure the output voltage at the plug of the power adapter cable. See the following figure



Pin 1: +19 to +20.5V
Pin 2: 0V, Ground

1. If the voltage is not correct, replace the power adapter.
2. If the voltage is within the range, do the following:
   - ❑ Replace the System board.
   - ❑ If the problem is not corrected, see “Undetermined Problems” on page 124.
   - ❑ If the voltage is not correct, go to the next step.

NOTE: An audible noise from the power adapter does not always indicate a defect.

3. If the power-on indicator does not light up, check the power cord of the power adapter for correct continuity and installation.
4. If the operational charge does not work, see “Check the Battery Pack” on page 109.

Check the Battery Pack

To check the battery pack, do the following:

From Software:

1. Check out the Power Management in control Panel
2. In Power Meter, confirm that if the parameters shown in the screen for Current Power Source and Total Battery Power Remaining are correct.
3. Repeat the steps 1 and 2, for both battery and adapter.
4. This helps you identify first the problem is on recharging or discharging.

From Hardware:

1. Power off the computer.
2. Remove the battery pack and measure the voltage between battery terminals 1(+) and 6(ground).
3. If the voltage is still less than 7.5 Vdc after recharging, replace the battery.

To check the battery charge operation, use a discharged battery pack or a battery pack that has less than 50% of the total power remaining when installed in the computer.

If the battery status indicator does not light up, remove the battery pack and let it return to room temperature. Re-install the battery pack.

If the charge indicator still does not light up, replace the battery pack. If the charge indicator still does not light up, replace the DC/DC charger board.

Touchpad Check

If the touchpad doesn't work, do the following actions one at a time to correct the problem. Do not replace a non-defective FRU:

1. Reconnect the touchpad cables.
2. Replace the touchpad.
3. Replace the system board.

After you use the touchpad, the pointer drifts on the screen for a short time. This self-acting pointer movement can occur when a slight, steady pressure is applied to the touchpad pointer. This symptom is not a hardware problem. No service actions are necessary if the pointer movement stops in a short period of time.

Power-On Self-Test (POST) Error Message

The POST error message index lists the error message and their possible causes. The most likely cause is listed first.

NOTE: Perform the FRU replacement or actions in the sequence shown in FRU/Action column, if the FRU replacement does not solve the problem, put the original part back in the computer. Do not replace a non-defective FRU.

This index can also help you determine the next possible FRU to be replaced when servicing a computer.

If the symptom is not listed, see “Undetermined Problems” on page 124.

The following lists the error messages that the BIOS displays on the screen and the error symptoms classified by function.

NOTE: Most of the error messages occur during POST. Some of them display information about a hardware device, e.g., the amount of memory installed. Others may indicate a problem with a device, such as the way it has been configured.

NOTE: If the system fails after you make changes in the BIOS Setup Utility menus, reset the computer, enter Setup and install Setup defaults or correct the error.

Index of Error Messages

Error Code List

Error Codes	Error Messages
006	Equipment Configuration Error Causes: 1. CPU BIOS Update Code Mismatch 2. IDE Primary Channel Master Drive Error (THe causes will be shown before “Equipment Configuration Error”)
010	Memory Error at xxxx:xxxx:xxxxh (R:xxxxh, W:xxxxh)
070	Real Time Clock Error
071	CMOS Battery Bad
072	CMOS Checksum Error
110	System disabled. Incorrect password is specified.
<No error code>	Battery critical LOW In this situation BIOS will issue 4 short beeps then shut down system, no message will show.
<No error code>	Thermal critical High In this situation BIOS will shut down system, not show message.

Error Message List

Error Messages	FRU/Action in Sequence
Failure Fixed Disk	Reconnect hard disk drive connector. “Load Default Settings” in BIOS Setup Utility. Hard disk drive System board
Stuck Key	see “Keyboard or Auxiliary Input Device Check” on page 106.
Keyboard error	see “Keyboard or Auxiliary Input Device Check” on page 106.
Keyboard Controller Failed	see “Keyboard or Auxiliary Input Device Check” on page 106.
Keyboard locked - Unlock key switch	Unlock external keyboard
Monitor type does not match CMOS - Run Setup	Run “Load Default Settings” in BIOS Setup Utility.
Shadow RAM Failed at offset: nnnn	BIOS ROM System board
System RAM Failed at offset: nnnn	DIMM System board
Extended RAM Failed at offset: nnnn	DIMM System board
System battery is dead - Replace and run Setup	Replace RTC battery and Run BIOS Setup Utility to reconfigure system time, then reboot system.
System CMOS checksum bad - Default configuration used	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system.

Error Message List

Error Messages	FRU/Action in Sequence
System timer error	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system. System board
Real time clock error	RTC battery Run BIOS Setup Utility to reconfigure system time, then reboot system. System board
Previous boot incomplete - Default configuration used	Run “Load Default Settings” in BIOS Setup Utility. RTC battery System board
Memory size found by POST differed from CMOS	Run “Load Default Settings” in BIOS Setup Utility. DIMM System board
Diskette drive A error	Check the drive is defined with the proper diskette type in BIOS Setup Utility See “External Diskette Drive Check” on page 106.
Incorrect Drive A type - run SETUP	Check the drive is defined with the proper diskette type in BIOS Setup Utility
System cache error - Cache disabled	System board
CPU ID:	System board
DMA Test Failed	DIMM System board
Software NMI Failed	DIMM System board
Fail-Safe Timer NMI Failed	DIMM System board
Device Address Conflict	Run “Load Default Settings” in BIOS Setup Utility. RTC battery System board
Allocation Error for device	Run “Load Default Settings” in BIOS Setup Utility. RTC battery System board
Failing Bits: nnnn	DIMM BIOS ROM System board
Fixed Disk n	None
Invalid System Configuration Data	BIOS ROM System board
I/O device IRQ conflict	Run “Load Default Settings” in BIOS Setup Utility. RTC battery System board
Operating system not found	Enter Setup and see if fixed disk and drive A: are properly identified. Diskette drive Hard disk drive System board

Error Message List

No beep Error Messages	FRU/Action in Sequence
No beep, power-on indicator turns off and LCD is blank.	Power source (battery pack and power adapter). See “Power System Check” on page 107.. Ensure every connector is connected tightly and correctly. Reconnect the DIMM. LED board. System board.
No beep, power-on indicator turns on and LCD is blank.	Power source (battery pack and power adapter). See “Power System Check” on page 107.. Reconnect the LCD connector Hard disk drive LCD inverter ID LCD cable LCD Inverter LCD System board
No beep, power-on indicator turns on and LCD is blank. But you can see POST on an external CRT.	Reconnect the LCD connectors. LCD inverter ID LCD cable LCD inverter LCD System board
No beep, power-on indicator turns on and a blinking cursor shown on LCD during POST.	Ensure every connector is connected tightly and correctly. System board
No beep during POST but system runs correctly.	Speaker System board

Phoenix BIOS Beep Codes

Code	Beeps	POST Routine Description
02h		Verify Real Mode
03h		Disable Non-Maskable Interrupt (NMI)
04h		Get CPU type
06h		Initialize system hardware
08h		Initialize chipset with initial POST values
09h		Set IN POST flag
0Ah		Initialize CPU registers
0Bh		Enable CPU cache
0Ch		Initialize caches to initial POST values
0Eh		Initialize I/O component
0Fh		Initialize the local bus IDE
10h		Initialize Power Management
11h		Load alternate registers with initial POST values
12h		Restore CPU control word during warm boot
13h		Initialize PCI Bus Mastering devices
14h		Initialize keyboard controller
16h	1-2-2-3	BIOS ROM checksum
17h		Initialize cache before memory autosize
18h		8254 timer initialization
1Ah		8237 DMA controller initialization
1Ch		Reset Programmable Interrupt Controller
20h	1-3-1-1	Test DRAM refresh
22h	1-3-1-3	Test 8742 Keyboard Controller
24h		Set ES segment register to 4 GB
26h		Enable A20 line
28h		Autosize DRAM
29h		Initialize POST Memory Manager
2Ah		Clear 215 KB base RAM
2Ch	1-3-4-1	RAM failure on address line xxxx
2Eh	1-3-4-3	RAM failure on data bits xxxx of low byte of memory bus
2Fh		Enable cache before system BIOS shadow
30h	1-4-1-1	RAM failure on data bits xxxx of high byte of memory bus
32h		Test CPU bus-clock frequency
33h		Initialize Phoenix Dispatch Manager
36h		Warm start shut down
38h		Shadow system BIOS ROM
3Ah		Autosize cache

Code	Beeps	POST Routine Description
3Ch		Advanced configuration of chipset registers
3Dh		Load alternate registers with CMOS values
42h		Initialize interrupt vectors
45h		POST device initialization
46h	2-1-2-3	Check ROM copyright notice
48h		Check video configuration against CMOS
49h		Initialize PCI bus and devices
4Ah		Initialize all video adapters in system
4Bh		QuietBoot start (optional)
4Ch		Shadow video BIOS ROM
4Eh		Display BIOS copyright notice
50h		Display CPU type and speed
51h		Initialize EISA board
52h		Test keyboard
54h		Set key click if enabled
58h	2-2-3-1	Test for unexpected interrupts
59h		Initialize POST display service
5Ah		Display prompt “Press F2 to enter SETUP”
5Bh		Disable CPU cache
5Ch		Test RAM between 512 and 640 KB
60h		Test extended memory
62h		Test extended memory address lines
64h		Jump to User Patch1
66h		Configure advanced cache registers
67h		Initialize Multi Processor APIC
68h		Enable external and CPU caches
69h		Setup System Management Mode (SMM) area
6Ah		Display external L2 cache size
6Bh		Load custom defaults (optional)
6Ch		Display shadow-area message
6Eh		Display possible high address for UMB recovery
70h		Display error messages
72h		Check for configuration errors
76h		Check for keyboard errors
7Ch		Set up hardware interrupt vectors
7Eh		Initialize coprocessor if present
80h		Disable onboard Super I/O ports and IRQs
81h		Late POST device initialization

Code	Beeps	POST Routine Description
82h		Detect and install external RS232 ports
83h		Configure non-MCD IDE controllers
84h		Detect and install external parallel ports
85h		Initialize PC-compatible PnP ISA devices
86h		Re-initialize onboard I/O ports
87h		Configure Motherboard Configurable Devices (optional)
88h		Initialize BIOS Area
89h		Enable Non-Maskable Interrupts (NMIs)
8Ah		Initialize Extended BIOS Data Area
8Bh		Test and initialize PS/2 mouse
8Ch		Initialize floppy controller
8Fh		Determine number of ATA drives (optional)
90h		Initialize hard-disk controllers
91h		Initialize local-bus hard-disk controllers
92h		Jump to UserPatch2
93h		Build MPTABLE for multi-processor boards
95h		Install CD ROM for boot
96h		Clear huge ES segment register
97h		Fixup Multi Processor table
98h	1-2	Search for option ROMs. One long, two short beeps on checksum failure.
99h		Check for SMART drive (optional)
9Ah		Shadow option ROMs
9Ch		Set up Power Management
9Dh		Initialize security engine (optional)
9Eh		Enable hardware interrupts
9Fh		Determine number of ATA and SCSI drives
A0h		Set time of day
A2h		Check key lock
A4h		Initialize Typematic rate
A8h		Erase F2 prompt
AAh		Scan for F2 key stroke
ACh		Enter SETUP
AEh		Clear Boot flag
B0h		Check for errors
B2h		POST done- prepare to boot operating system
B4h	1	One short beep before boot
B5h		Terminate QuietBoot (optional)
B6h		Check password (optional)

Code	Beeps	POST Routine Description
B9h		Prepare Boot
BAh		Initialize DMI parameters
BBh		Initialize PnP Option ROMs
BCh		Clear parity checkers
BDh		Display MultiBoot menu
BEh		Clear screen (optional)
BFh		Check virus and backup reminders
C0h		Try to boot with INT 19
C1h		Initialize POST Error Manager (PEM)
C2h		Initialize error logging
C3h		Initialize error display function
C4h		Initialize system error handler
C5h		PnPnd dual CMOS (optional)
C6h		Initialize notebook docking (optional)
C7h		Initialize notebook docking late
C8h		Force check (optional)
C9h		Extended checksum (optional)
D2h		Unknown interrupt

Code	Beeps	
E0h		Initialize the chipset
E1h		Initialize the bridge
E2h		Initialize the CPU
E3h		Initialize the system timer
E4h		Initialize system I/O
E5h		Check force recovery boot
E6h		Checksum BIOS ROM
E7h		Go to BIOS
E8h		Set Huge Segment
E9h		Initialize Multi Processor
EAh		Initialize OEM special code
EBh		Initialize PIC and DMA
ECh		Initialize Memory type
EDh		Initialize Memory size
EEh		Shadow Boot Block
EFh		System memory test
F0h		Initialize interrupt vectors
F1h		Initialize Run Time Clock
F2h		Initialize video
F3h		Initialize System Management Mode
F4h	1	Output one beep before boot

Code	Beeps	
F5h		Boot to Mini DOS
F6h		Clear Huge Segment
F7h		Boot to Full DOS

Index of Symptom-to-FRU Error Message

LCD-Related Symptoms

Symptom / Error	Action in Sequence
LCD backlight doesn't work LCD is too dark LCD brightness cannot be adjusted LCD contrast cannot be adjusted	Enter BIOS Utility to execute “Load Setup Default Settings”, then reboot system. Reconnect the LCD connectors. Keyboard (if contrast and brightness function key doesn't work). LCD inverter ID LCD cable LCD inverter LCD System board
Unreadable LCD screen Missing pels in characters Abnormal screen Wrong color displayed	Reconnect the LCD connector LCD inverter ID LCD cable LCD inverter LCD System board
LCD has extra horizontal or vertical lines displayed.	LCD inverter ID LCD inverter LCD cable LCD System board

Indicator-Related Symptoms

Symptom / Error	Action in Sequence
Indicator incorrectly remains off or on, but system runs correctly	Reconnect the inverter board Inverter board System board

Power-Related Symptoms

Symptom / Error	Action in Sequence
Power shuts down during operation	Power source (battery pack and power adapter). See “Power System Check” on page 107. Battery pack Power adapter Hard drive & battery connection board System board
The system doesn’t power-on.	Power source (battery pack and power adapter). See “Power System Check” on page 107. Battery pack Power adapter Hard drive & battery connection board System board

Power-Related Symptoms

Symptom / Error	Action in Sequence
The system doesn't power-off.	Power source (battery pack and power adapter). See "Power System Check" on page 107. Hold and press the power switch for more than 4 seconds. System board
Battery can't be charged	See "Check the Battery Pack" on page 109. Battery pack System board

PCMCIA-Related Symptoms

Symptom / Error	Action in Sequence
System cannot detect the PC Card (PCMCIA)	PCMCIA slot assembly System board
PCMCIA slot pin is damaged.	PCMCIA slot assembly

Memory-Related Symptoms

Symptom / Error	Action in Sequence
Memory count (size) appears different from actual size.	Enter BIOS Setup Utility to execute "Load Default Settings, then reboot system. DIMM System board

Speaker-Related Symptoms

Symptom / Error	Action in Sequence
In Windows, multimedia programs, no sound comes from the computer.	Audio driver Speaker System board
Internal speakers make noise or emit no sound.	Speaker System board

Power Management-Related Symptoms

Symptom / Error	Action in Sequence
The system will not enter hibernation	See "Save to Disk (S4)" on page 39. Keyboard (if control is from the keyboard) Hard disk drive System board
The system doesn't enter hibernation mode and four short beeps every minute.	Press Fn+**0**and see if the computer enters hibernation mode. Touchpad Keyboard Hard disk connection board Hard disk drive System board
The system doesn't enter standby mode after closing the LCD	See "Save to Disk (S4)" on page 39. LCD cover switch System board

Power Management-Related Symptoms

Symptom / Error	Action in Sequence
The system doesn't resume from hibernation mode.	See “Save to Disk (S4)” on page 39. Hard disk connection board Hard disk drive System board
The system doesn't resume from standby mode after opening the LCD.	See “Save to Disk (S4)” on page 39. LCD cover switch System board
Battery fuel gauge in Windows doesn’t go higher than 90%.	Remove battery pack and let it cool for 2 hours. Refresh battery (continue use battery until power off, then charge battery). Battery pack System board
System hangs intermittently.	Reconnect hard disk/CD-ROM drives. Hard disk connection board System board

Peripheral-Related Symptoms

Symptom / Error	Action in Sequence
System configuration does not match the installed devices.	Enter BIOS Setup Utility to execute “Load Default Settings”, then reboot system. Reconnect hard disk/CD-ROM/diskette drives.
External display does not work correctly.	Press Fn+F5, LCD/CRT/Both display switching System board
USB does not work correctly	System board
Print problems.	Ensure the “Parallel Port” in the “Onboard Devices Configuration” of BIOS Setup Utility is set to Enabled. Onboard Devices Configuration Run printer self-test. Printer driver Printer cable Printer System Board
Serial or parallel port device problems.	Ensure the “Serial Port” in the Devices Configuration” of BIOS Setup Utility is set to Enabled. Device driver Device cable Device System board

Keyboard/Touchpad-Related Symptoms

Symptom / Error	Action in Sequence
Keyboard (one or more keys) does not work.	Reconnect the keyboard cable. Keyboard System board

Keyboard/Touchpad-Related Symptoms

Symptom / Error	Action in Sequence
Touchpad does not work.	Reconnect touchpad cable. Touchpad board System board

Modem-Related Symptoms

Symptom / Error	Action in Sequence
Internal modem does not work correctly.	Modem phone port modem combo board System board

NOTE: If you cannot find a symptom or an error in this list and the problem remains, see “Undetermined Problems” on page 124.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
2. If no error is detected, do not replace any FRU.
3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

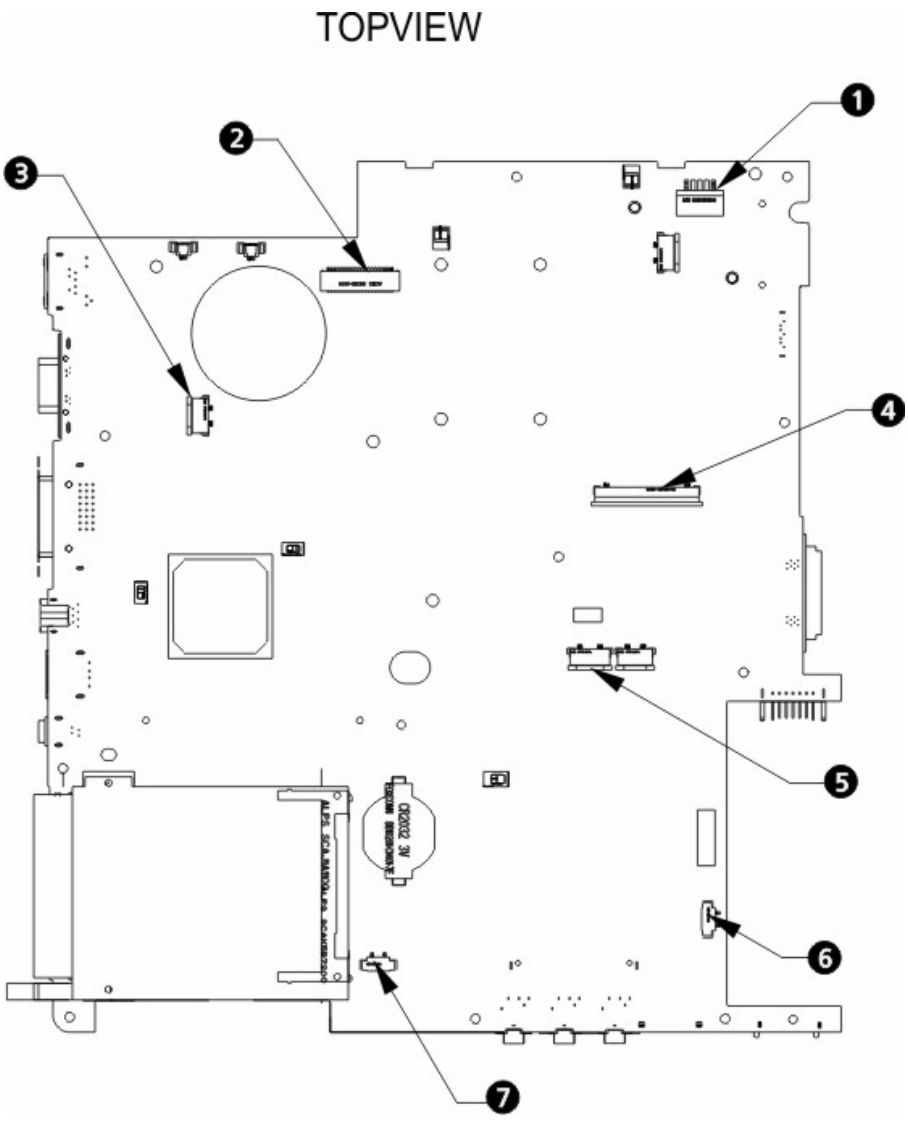
NOTE: Verify that all attached devices are supported by the computer.

NOTE: Verify that the power supply being used at the time of the failure is operating correctly. (See “Power System Check” on page 107.):

1. Power-off the computer.
2. Visually check them for damage. If any problems are found, replace the FRU.
3. Remove or disconnect all of the following devices:
    - ❑ Non-Acer devices
    - ❑ Printer, mouse, and other external devices
    - ❑ Battery pack
    - ❑ Hard disk drive
    - ❑ DIMM
    - ❑ CD-ROM/Diskette drive Module
    - ❑ PC Cards
4. Power-on the computer.
5. Determine if the problem has changed.
6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:
    - ❑ System board
    - ❑ LCD assembly

Jumper and Connector Locations

Top View



No.	Description	No.	Description
1	Power Cable Connector	5	Fingerprint/Touchpad Connector

Standard Operation Procedures of Password Bypassing and BIOS Recovery

For RD and CSD to debug easily, the system provide one hardware DIP switch for Bypassing Password Check, and one Hotkey to enable BIOS Recovery.

1. DIP Switches:

DIP	Default Setting	Description
SW1	Disabled (High)	Bypassing Password Check

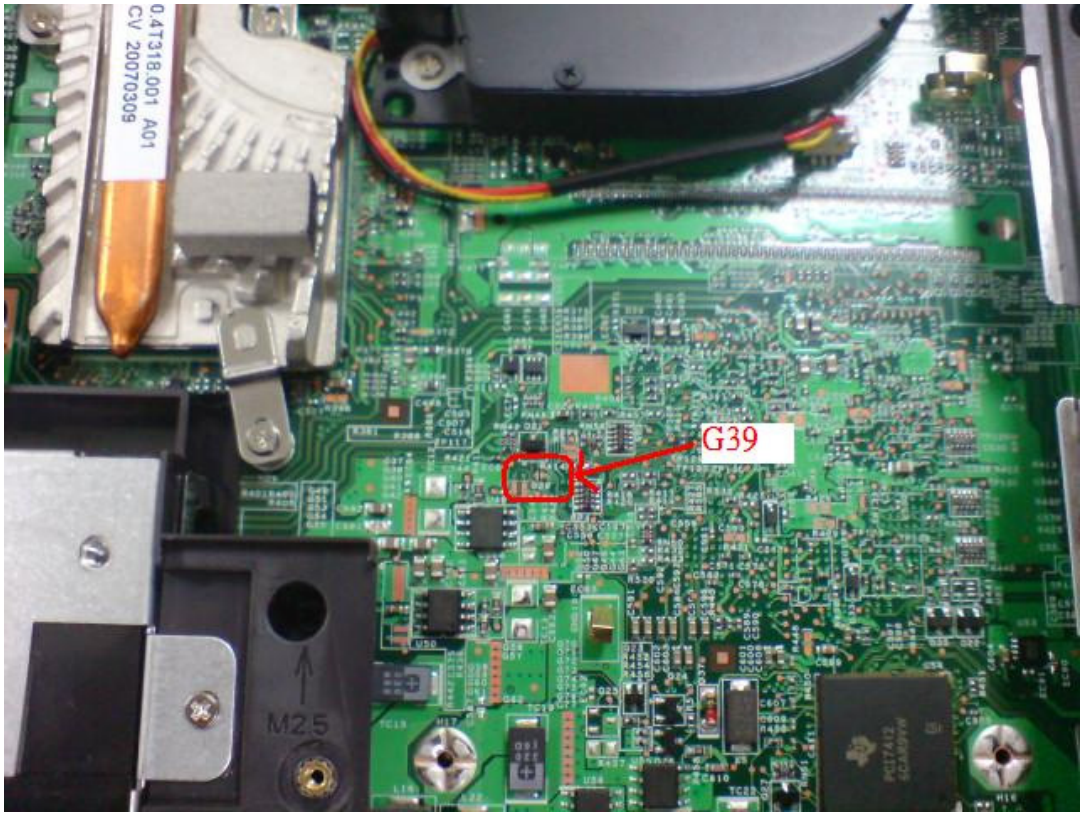
2. Hotkey to enable BIOS Recovery: **Fn+ESC**, then Power Button. To use this function, it is strongly recommended that the AC adapter is connected to the system and plug-in to a wall outlet and the Battery is also in the system

Bypassing Password Check (SW1): If the user has set Password (power-on or setup password) for security reason, BIOS will check password during POST or when entering the BIOS setup menu. However, if it is necessary to ignore the password check, the user may enable DIP SW1 to bypass password check.

BIOS Recovery: Boot Block is a special block of BIOS. It is used to boot up the system with minimum BIOS initialization. The user can enable this feature to restore the BIOS to a successful one if previous BIOS flashing process fails.

1. DIP Location:

RD/CSD can enable or disable this function by switching the DIP. The DIP switch is located as shown in the figure below:



2. Clear Password

DIP SW1: Bypassing Password Check, Disabled by default. Switching it to ON then powering on the system will force the BIOS to clear Supervisor and User passwords. The power-on, setup password, and the HDD password are all cleared.

3. Restore BIOS by the Crisis Disk

Enable this function by pressing the combination: **Fn+ESC**, and pressing the **Power Button**. To use this function, it is strongly recommended that the AC adapter is connected to the system and plug-in to a wall outlet and the Battery is also in the system. If this function is enabled, the system will force the BIOS to enter a

special BIOS block, called BootBlock. RD/CSD can use this special BIOS code to recover the BIOS to a successful one if previous BIOS flashing process fails. However, before doing this, one Crisis Disk should be prepared in WinXP. Detailed steps are as the followings:

a. Prepare the Crisis Disk in WinXP.

b. Insert the Crisis Disk to a USB floppy drive which is attached to the failed machine.

c. While the system is turned off, press and hold **Fn+ESC**, then press **Power Button**. The system should be powered on with Crisis Recovery process.

d. BootBlock BIOS starts to restore the failed BIOS code. Short beeps should be heard when flashing.

e. If the flashing process is finished, a long beep should be heard.

f. Power down the system after you hear the long beep.

If the crisis recovery process is finished, the system should be powered on with the successful BIOS. RD/CSD can then update the BIOS to a workable one by regular BIOS flashing process.

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of TravelMate 5710/5310 and Extensa 5610/5210. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

Test Compatible Components

This computer's compatibility is tested and verified by Acer's internal testing department. All of its system functions are tested under Windows® XP Home, Windows® XP Pro environment.

Refer to the following lists for components, adapter cards, and peripherals which have passed these tests. Regarding configuration, combination and test procedures, please refer to the TravelMate 7720/7320 Series Compatibility Test Report released by the Acer Mobile System Testing Department.

Microsoft® Windows® Vista Environment Test

Item	Device Name

Online Support Information

This section describes online technical support services available to help you repair your Acer Systems.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website. However some information sources will require a user i.d. and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

- Service guides for all models
- User's manuals
- Training materials
- Bios updates
- Software utilities
- Spare parts lists
- TABs (Technical Announcement Bulletin)

For these purposes, we have included an Acrobat File to facilitate the problem-free downloading of our technical material.

Also contained on this website are:

- Detailed information on Acer's International Traveler's Warranty (ITW)
- Returned material authorization procedures
- An overview of all the support services we offer, accompanied by a list of telephone, fax and email contacts for all your technical queries.

We are always looking for ways to optimize and improve our services, so if you have any suggestions or comments, please do not hesitate to communicate these to us.
