

Trees for Canterbury

Te Waonui o Tane Ki Waitaha

A project of the Green Effect Trust

The 'whats good now' List

All plants shown are subject to availability at time of ordering.

This is our retail price list. For bulk purchases please ask for a quote.

TC = recycled 1L milk carton. LBP = 10cm pot.

Pb3/5 will be either PB3 or PB5. These may also be in hard pots.

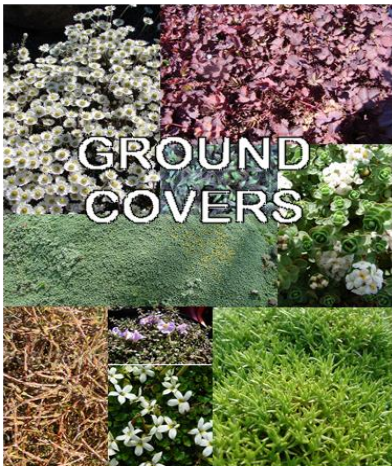

PB12/18 will also mean either PB12 or PB18.

We also stock a wide range of natives that we do not grow ourselves. These do not on this list. Examples do appear at the bottom of this list. Please ask staff for more information.

Prices include GST

We are at 42 Charlesworth St, Ferrymead Christchurch. Ph/Fax 03 9821028. Email: info@treesforcanterbury.org.nz

Groundcovers

Canterbury sourced

Acaena anserinifolia			PB3	\$10.00		Canterbury sourced
Groundcover or on walls. Fruit dec to feb White flowers oct to dec						
Acaena buchananii			PB3	\$10.00		
Densely matted creeping plant Forms patches up to 50cm or more Prefers light shade and not too dry						
Acaena buchananii var Picta			PB3	\$10.00		
Densely matted creeping plant Forms patches up to 50cm or more Prefers light shade and not too dry with slightly rey/bronze colouring.						
Acaena caesiiglauca			PB3	\$10.00		
Groundcover or on walls. Fruit dec to feb White flowers oct to dec						
Acaena inermis "purpurea"			PB3	\$10.00		
Sun or shade. Purplish flowers dec to feb. Effective purple foliage Ideal for rock garden						
Anaphalioides bellidioides			PB3	\$10.00		Canterbury sourced
Sun or semi-shade, dry or moist. White papery flowers oct to feb. Ideal for rock garden. Frost hardy						
Coprosma "Mangitangi"			PB3	\$10.00		
A small divaricating shrub growing to 75 cm high. The yellowish branchlets are offset by the small light green leaves. Plants stay in tight mounds and small look rather like hedgehog. Will grow in a range of conditions but doesn't stand heavy frosts. Best in shady conditions.						
Coprosma acerosa	TC	\$4.50				
Groundcover. Sun or semi-shade, dry or moist White or blue fruit mar to apr. Attracts birds. Coastal tolerant						
Coprosma acerosa LCP	TC	\$4.50				Canterbury sourced
Groundcover. Sun or semi-shade, dry or moist. White or blue fruit mar to apr. Attracts birds. Coastal tolerant. Local variant.						
Coprosma 'Dark Spire'			PB3	\$10.00		
An attractive narrow growing shrub to 1-1.5m high. Best grown in a sunny site. Hardy.						
Coprosma 'Flat Freddy'			PB3	\$10.00		
Very low growing groundcover, hardy to some foot traffic. Bronze brown colour. 8cmx1m.						
Coprosma 'Hawera'			PB5	\$10.00		
A mat forming coprosma with small narrow olive-green leaves. Naturally occurring on clifftops near Hawera. Tolerant of cold and wind, great coastal plant.						
Coprosma kirkii	TC	\$4.50				
Sun or semi-shade, dry or moist Coastal tolerant Forms trailing mats Flowers form in clusters.A vigorous and extremely hardy groundcover. Suitable for large areas ands erosion control.						
Coprosma Red Rocks			PB5	\$10.00		
A very hardy shrub with interesting red-brown foliage. Forms a cushion like shape. 1m						
Dysphyma australe			PB3	\$10.00		Canterbury sourced
A densely branched succulent plant. It has pink flowers and is naturally found hanging down cliffs. Grows 1m +.						
Euphorbia glauca			PB3	\$10.00		Canterbury sourced
It has a creeping rhizome so in the garden it is best contained in a pot. The foliage is very attractive and the flowers are small red/purple. It grows to 45cm tall. If planted in the garden a sunny, well drained site is best as it naturally grows in coastal rocky areas.						
Fushsia procumbens			PB3	\$10.00		

Beautiful groundcover, ideal in the garden and can be used for trailing over low walls. It is frost tender and does best in a sheltered semi-shaded site with adequate moisture in a well drained soil. Flowers are yellow/orange and purple mix, in October through January.

Geranium brevicaule

PB3

\$10.00

A small geranium growing 15cm high by 25cm wide. It forms a neat green ball shape and has white flowers. This plants is ideal for rock gardens or small pots. It will handle dry/well drained sunny and exposed sites. Frost hardy.

Geranium brevicaule "purpureum"

PB3

\$10.00

Suits the same conditions as the green form but has a purple/bronze foliage that can vary depending on the site.

Gunnera dentata

PB3

\$10.00

This plant is a mat forming and creeping plant. It grows naturally along subalpine streamsides and in other damp places throughout NZ. It is frost hardy (although some damage may occur) and prefers sun-shade in a moist site.

Gunnera prorepens

PB3

\$10.00

This is normally November to March. It prefers a moist soil in sun or semi-shade.

Halorgoris erecta bronze form

PB3

\$10.00

A sprawling plant growing to 1m tall. It naturally grows along forest margins, banks, cliffs etc. It is quite hardy to frost, sun, shade dry and exposed conditions.

Leptinella "Platts Black"

PB3

\$10.00

A vigorous creeping plant which is great as a lawn replacement. It does best in full sun with adequate moisture. It has green to charcoal foliage.

Leptinella calcarea

PB3

\$10.00

Forms a light green carpet. It can take coastal conditions, and is very hardy. It has small yellow flowers. Best suited to full sun in a dryer well drained site.

Leptinella dioica

PB3

\$10.00

A mat forming groundcover that is quick growing and can be invasive. It makes a great lawn replacement. It has yellow/green leaves and a non descript flower.

Leptinella minor

PB3

\$10.00

A groundcover that suits sun or semi-shade, moist. White flowers. Can be invasive. Full sun gives brown foliage

Leptinella nana

PB3

\$10.00

Canterbury sourced

A groundcover that suits shade or semi-shade, moist. White flowers.

Leptinella rotundifolia

PB3

\$10.00

An endangered groundcover found naturally on coastal cliffs. Very hardy in semi-shade/shaded, exposed sites but requires moisture.

Leptinella serrulata

PB3

\$10.00

This groundcover has fern like purple/grey to bronze foliage. Hardy.

Leptinella squalida ssp.

PB3

\$10.00

A groundcover that suits semi-shade or shade, moist, Can be invasive

Linum monogynum

PB3

\$10.00

This is called true NZ flax as the word linum is Latin for flax. It grows naturally in coastal conditions and has masses of white flowers from October - February. It grows to 60cm in the right site, which is a well drained, exposed position in full sun or semi shade.

Jovellana Sinclairii

PB3

\$10.00

A lovely plant growing to 30cm in moist, well drained and shady sights. It is frost sensitive so placement is important and it does not like full sun or dry areas. It has masses of white flowers spotted with purple on long slender stalks from October to February.

Mimulus repens

PB3

\$10.00

A coastal marsh plant. Flowers are muave with yellow throats spring to mid summer. Great in moist sunny spots but can be short lived.

Muehlenbeckia axillaris		PB3	\$10.00		
A dense groundcover with wiry stems and small dark leaves. Masses of small creamy flowers followed by small opaque fruit. Grows in full sun, and very hardy. Tolerant of dry conditions. H15c W1m					
Muehlenbeckia complexa		PB3	\$10.00		Canterbury sourced
A sprawling coastal shrub that grows into a tangled mass of brown wiry stems with small round leaves. A vigorous and tough plant.					
Myosotidium hortensia		PB3	\$10.00		
Growing up to 1m high. Thick fleshy leaves that are 30cm or more long. Flowers are produced Oct to April, in dense clusters 15cm wide and range from pale to dark blue. This is a coastal plant in nature. It prefers a moist semi shaded spot, will tolerate exposed site and medium frosts.					
Pimelea oreophila		PB3	\$10.00		
A low growing, sprawling plant up to 30cm tall. It is found in subalpine regions and exposed rocky places throughout N.Z. which makes this an ideal rock garden plant. Covered in creamy-white, strongly scented flowers from October to January.					
Pimelea prostrata		PB3	\$10.00		
A low growing plant that forms a rather dense cover of up to 50 cm across. It has blue-green to grey green foliage covered with white, scented flowers Oct through to Mar. Will grow in almost any well drained soil, when well established it will stand fairly dry conditions.					
Pratia angulata		PB3	\$10.00		
A creeping matt forming plant. It has small rounded leaves and small white flowers appear for a long period from spring. The flowers are then followed by reddish purple berries. A vigorous ground cover for a damp area in either sun or semi shade.					
Raoulia australis	LBP		\$10.00		
This is a dense and compact ground cover that will form firm mats of silvery green foliage of up to 1m or more across. Yellow flowers are produced in abundance during Oct to Nov. Plant in full sun in a gritty soil. Useful as a rock garden plant.					
Raoulia hectorii	LBP		\$10.00		
Forms a hard bright silvery green moss like mat. Prefers a well drained gritty soil and a sunny site.					
Raoulia hookeri		PB3	\$10.00		
Forms dense silvery white mats of up to 1m across. During Dec and Jan, it gets a cover of sweetly scented, pale yellow flowers. When established it can withstand fairly dry conditions, but growth is better if it is given reasonably moist conditions.					
Raoulia monroi	LBP		\$10.00		
Sun or semi-shade, moist, well-drained. Effective foliage. Ideal for rock garden					
Raoulia subsericea	LBP		\$10.00		
A mat forming groundcover that forms a compact mat about 20-40cm wide. Covered in scented white flowers during November to January. Easily grown, prefers a sunny position in the rock garden. Once established it will tolerate quite dry conditions.					
Raoulia tenuicaulis		PB3	\$10.00		
Forms dense mats in stony places. Covered in white flowers during December and January. Frost hardy. Plant in full sun or shade in a moist but well drained soil. In moist shady areas the plant is more of a light green colour, while in sun it can become quite silver.					
Rubus parvus		PB3	\$10.00		
open situation but will grow in almost any soil or site. Very Hardy.					
Rubus x barkeri		PB3	\$10.00		
A creeping plant that makes a good vigorous groundcover able to tolerate dry conditions. The leaves are trifoliate with lance shaped leaflets and are a shiny green with bronze tonnings. It is a natural hybrid first found by Lake Brunner.					
Scleranthus biflorus		PB3	\$10.00		

It forms low moss like mounds of tightly packed tiny leaves and has minute greenish flowers. Requires a sunny situation and a free draining soil.

Scleranthus brockerii	PB3	\$10.00
-----------------------	-----	---------

with good drainage in the garden rockery or container. Height 4cm Span to 75cm

Scleranthus uniflorus	PB3	\$10.00
-----------------------	-----	---------

This species is very similar to S. biflorus but is found in drier areas east of the South Islands main divide. It has a tighter habit and the foliage is more yellowish green. Plant in full sun, in a well drained soil, preferably on the dry side. Frost hardy.

Scutellaria novae zelandiae	PB3	\$10.00
-----------------------------	-----	---------

Small semi-woody plant with erect branches growing to 30 cm tall. It flowers December through to March. Plant in a moist, well drained soil in a shady position.

Selliera radicans	PB3	\$10.00
-------------------	-----	---------

A low growing, wide spreading groundcover. It produces small white flowers- sometimes pale blue during summer. Plant in sun or light shade, good plant for coastal areas. May be used as a lawn, but takes time to establish.

Viola lyallii	PB3	\$10.00
---------------	-----	---------

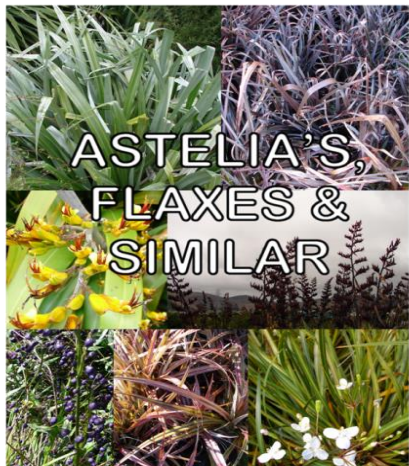

This small creeping perennial herb with pale green heart shaped leaves likes filtered light and a moist soil. It has white flowers from October to January with some purplish-pink on petals.

Wahlenbergia pygmaea	PB3	\$10.00
----------------------	-----	---------

A low growing perennial 1-2 cm high, with white-blue flowers Nov-Feb. Likes a sunny site with adequate moisture and good drainage.

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

Astelia, Flaxes, and other grass like plants.

Plant Name	Grade	Price	Grade	Price	Grade	Price	Canterbury sourced
------------	-------	-------	-------	-------	-------	-------	--------------------

Aciphylla aurea	PB3	\$10.00
-----------------	-----	---------

A very spectacular plant with dramatic foliage, excellent in a rock garden or pot. It has spikey yellowish or golden foliage and is at it's best grown in an open sunny position that is well drained or dry. It flowers in December to January and grows to 1m high.

Aciphylla colensoi			PB3	\$10.00	
Prefers moist / well-drained position. Flower stalk 2.5 M tall is scented. Bluish coloured sword-like leaves Subalpine - alpine plant					
Aciphylla dieffenbachii			PB3	\$10.00	
Yellow flower 1 metre tall Sun or shade, deep moist soil. Effective foliage. Coastal tolerant					
Aciphylla squarrosa			PB3	\$10.00	Canterbury sourced
Prefers open situation and good drainage flower stalk up to 2M, yellowish, scent. Bluish-grey sword-like leaves. Subalpine & coastal plant					
Aciphylla subflabellata			PB3	\$10.00	
Sun, deep moist soil .Yellowish flower nov to jan. Effective foliage, spikey. Found locally.					
Arthropodium cirratum			PB3	\$10.00	
Sun or shade, dry or moist, med frost. White flowers nov to dec Ideal for underplanting. 60cm tall and clump forming.					
Arthropodium cirratum Matapouri Bay			PB3	\$10.00	
Sun or shade, dry or moist, med frost. White flowers nov to dec. Ideal for underplanting. Similar to A. cirratum but the leaves tend to be slightly broader and much more erect. It seems to be hardier to frost. Ideal for under-planting trees.					
Astelia chathamica			PB5	\$10.00	
An easily grown plant that is very hardy to a range of conditions. The silver foliage is more noticeable when grown in full sun. Growing -to 1.5m tall with a width of 1m +. The fruit is highly attractive for birds, and they appear February to June and are bright orange in colour.					
Astelia fragrans	TC	\$4.50	PB5	\$10.00	Canterbury sourced
A plant that grows up-to 1m tall, thrives in semi-shaded sites which makes it ideal for under-planting established trees. The fruit is highly attractive to birds and although inconspicuous are strongly honey scented and appear December - May.					
Astelia nervosa			PB5	\$10.00	
Sun or shade, moist or wet. Bright orange fruit mar to may. Effective silver foliage. Attracts birds. 75cm x75cm					
Astelia Rebel			PB5	\$15.00	
Reddish bronze leaves which turn a rich claret in winter.Ideal for rockeries, mass plantings or containers. Best in sunny well drained location. 75x75cm.					
Celmisia mackaui			PB3	\$10.00	Canterbury sourced
A local plant only found on Banks Peninsula. It is suitable for rock gardens and grows well in shade or semi-shade. In cooler climes it will grow in full sun. It forms clumps up-to about 45cm tall and has a white daisy flower January-February. It prefers a moist but well drained site.					
Dianella nigra			PB3	\$10.00	Canterbury sourced
Growing from 30-90cm tall. Small white flowers Nov-Dec, Pale blue-purple berries Feb and Mar. Suitable for frosts, sun-shade, well drained and exposed sites.					
Libertia cranwelliae			PB3	\$10.00	
60cm. Very similar to liberitia ixioides but spreads through rhizomes. Hardy to sun or semi shade. Will tolerate drier sites but prefers a free draining site.					
Libertia grandiflora			PB3	\$10.00	
A clump forming plant reaching 50cm tall. Clusters of white flowers from Oct - Nov. It makes an excellent plant in pots, in mass plantings or even as single plants. Quite hardy and grow well in sun or shade, moist but free draining sites, heavy frost or exposed conditions.					
Libertia ixioides			PB3	\$10.00	Canterbury sourced
Clump forming to 50cm tall, white flowers from Oct-Dec. Very hardy and will grow in all conditions. It is an ideal pot plant.					
Libertia peregrinans			PB3	\$10.00	

A creeping plant. Very hardy to a variety of sites and will handle very dry, exposed sites in full sun, semi-shade. It has white flowers from October to January. Best grown in an area where it can spread. The colour of the leaves can become bright orange in the right conditions.

Phormium Black Rage

PB5

\$13.50

A bold striking flax. The blue-black foliage makes a stunning contrast against green or silver foliage. Hardy. 1.5 x 1m.

Phormium 'Black Pepe'

PB5

\$13.50

Copper coloured flax. Easy to grow plant for low maintenance gardens. Ideal for coastal areas. Grows best in a permanently moist soil. 75 cm x 75 cm.

Phormium cookianum

PB5

\$10.00

Canterbury sourced

A fast growing variable species growing from 60cm to 1.5m high. Yellowish to orange flowers are produced on stalks Nov to Dec. These are rich in nectar and attract such birds as the Tui and the Bellbird. Plant in sun or semi-shade. Tolerates a dry or moist soils.

Phormium 'Dark Delight'

PB5

\$13.50

Deep purplish bronze leaves becoming darker with age. Great contrast plant along with lighter leaf colours. Stands wind and easily grown in any soil. Height 1m.

Phormium 'Elfin'

PB5

\$13.50

A small growing native flax, with distinctive curled ends to its bronze leaves. Will grow in any reasonable soil. Small, compact growing, hardy. 40 x 40cm.

Phormium 'Emerald Gem'

PB5

\$13.50

Excellent bush clumping growth habit in an unusual emerald green colour. Hardy and wind resistant. Not fussy as to soil. 60cm

Phormium 'Jester'

PB5

\$13.50

Beautiful glossy bright red leaves with green margins. Great for a structured look. Stunning colour. 75cm - 75cm.

Phormium tenax

TC

\$4.50

PB5

\$10.00

Canterbury sourced

A rigid upright flax from 1-3m high, which produces bronzy red flowers on flower stalks up to 5 m high Nov to Jan. Will tolerate a wide range of growing situations, from swamp land to normal garden conditions. It is hardy to frosts, tolerant of coastal winds.

Phormium Wildwood

PB5

\$13.50

Lush purple flax.

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

Grasses and Rushes

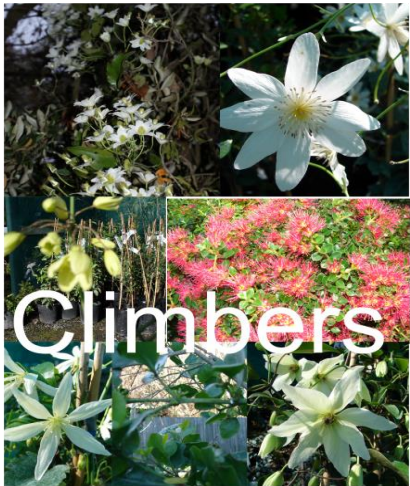

Plant Name	Grade	Price	Grade	Price	Grade	Price	Canterbury sourced
<i>Austrofestuca littoralis</i>	TC	\$4.50					
A grass that forms clumps upto 60cm tall. Great coastal plant that requires well drained sites.							
<i>Carex albula</i>	TC	\$4.50					
A tufted sedge 45cm tall, It has a pale buff to white colouring. Quite attractive plant great for areas where you want a contrasting colour or upright grass. Tolerant of cold and dry conditions. Found in mackenzie Country and near Kurow in North otago.							
<i>Carex buchananii</i>	TC	\$4.50					
A densely tufted grass growing to 60cm with a very distinctive reddish brown colour. It prefers a slightly damp spot in semi-shade for good colour all year round. Will tolerate heavy frost, full sun, dry or exposed sites also.							
<i>Carex comans</i> "Frosted curls"	TC	\$4.50					
As with the <i>C. comans</i> this grass thrives nearly anywhere. The foliage tends to green in appearance with white (frosted) curling tips. 50cm high.							
<i>Carex flagellifera</i>	TC	\$4.50					Canterbury sourced
A lovely sedge found in damp ground in the open or along forest margins. It has excellent colour all year round and is also good in pots or rock gardens. It can grow to 1m and needs very little maintenance.							
<i>Carex germinata</i>	TC	\$4.50					Canterbury sourced
Can grow from 50cm to 1.3m high. Attractive flower spikes in November to February. Hardy to frost and tolerant of wind. It is found throughout N Z on swamp margins, along streams and open damp areas. The green foliage is known to cut the skin if grasped and pulled.							
<i>Carex littorosa</i>	TC	\$4.50					Canterbury sourced
A plant growing to 60cm tall that is found in marshes or sandy tidal river banks. Erect habit, leaves pale green to red. Good for frosty, exposed and moist sites.							
<i>Carex maorica</i>	TC	\$4.50					Canterbury sourced
A good plant for environmental plantings as it has become quite uncommon. It grows to 50cm tall and is often found in water on margins of swampy lakes, swamps and other damp areas. It will tolerate quite dry sites and heavy frost. It is great for sun or shade.							
<i>Carex secta</i>	TC	\$4.50					Canterbury sourced
Effective foliage. Ideal waterside sedge. Fast growing. Flower panicles up to 1M dec to jan. Grows to 1.5 by 1.5m							

Carex solandri	TC	\$4.50			
A plant that prefers moist sites in semi-shade to full shade. It grows up-to 50cm high. It is a forest plant so it is good for under-planting trees in damper areas. Will tolerate heavy frost, full sun to shade, moist sites and wind exposure.					
Carex testacea	TC	\$4.50			
A most sort after sedge. It is a densely tufted plant growing from 30-60cm tall. It has light green foliage that has a coppery tone towards the top of the plant. It is best suited to a well drained sunny site and looks good in mass plantings. Frost hardy.					
Carex trifida			PB5	\$10.00	
Deep brown flower spikes contrast well against blue-green foliage of this sedge that grows to 60cm, in bold clumps. Although best in shady, wet places alongside water it can grow quite well on a dry bank. It will grow in cold, shade as long as it is not got overhead shading.					
Carex virgata	TC	\$4.50			
A sedge that grows in swampy areas. It grows to 90cm tall and grows best in damp soils whether sunny or shaded. It will grow sometimes in dry sites.					
Chionochloa conspicua			PB5	\$10.00	
A tussock that makes an excellent feature as it resembles a toetoe It will thrive in a number of places, prefers to be sheltered from strong winds or coastal conditions. Best grown in a slightly moist site in full sun to semi-shade. The plant grows to 1m but the flower plumes can get to 1.8m long.					
Chionochloa flavicans			PB3	\$10.00	
An excellent tussock. Forms a lush green clump with toetoe like fronds during the summer. It grows to 1m tall and looks good as a single plant or a small hedge. It grows best in a slightly moist, sunny site but will tolerate light shade or dry sites when established. Quite quick growing.					
Chionochloa rigida			PB3	\$10.00	Canterbury sourced
A hardy tussock found in dry sites from the Rakia and Hokitika catchment areas south and also on Banks Peninsula. It grows to 1m tall. It is hardy to frosts, exposed sites, and sunny sites.					
Chionochloa rubra			PB3	\$10.00	
An excellent landscaping tussock that suits dry or wet areas. It is very effective grown in groups or mass plantings. The damper the soil the redder the plant appears. It grows to 1.5m tall and is hardy to most sites including heavy frosts.					
Cortaderia richardii	TC	\$4.50			Canterbury sourced
Sun or shade, dry or moist Flower plumes dec to jan Attracts birds Fast growing					
Cyperus ustulatus	TC	\$4.50			Canterbury sourced
Great for planting in wet areas or alongside waterways or ponds. It can actually grow in shallow water. It is a large and robust plant growing to 1m tall with flower heads reaching 1.2m with a dark brown appearance. Useful plant for environmental or revegetation plantings.					
Desmoschoenus spiralis			PB3	\$10.00	Canterbury sourced
a sedge best grown in full sun in sandy conditions. Found naturally along our coast line binding the dune system. It grows to 90cm high and puts out runners.					
Festuca actae	TC	\$4.50			Canterbury sourced
A small upright growing blue-green tussock reaching 30-50cm in height. It is tolerant of quite dry, exposed sites and responds well to be divided every 3-4 years.					
Festuca novae zelandiae	TC	\$4.50			Canterbury sourced
A hardy erect tussock that grows to 70cm high. It is ideal in rock gardens and grows in full sun or semi-shade, dry, moist and exposed sites.					
Hierochloes redolens			PB3	\$10.00	
A grass that grows in clumps from 45-90cm tall. It is found in wet grassland and scrub throughout NZ. It is best planted in a moist soil in sun or light shade.					
Juncus edgariae	TC	\$4.50			Canterbury sourced
A rush growing upto 2m tall. Naturally found in damp pasture, wet hollows river and lake margins.					

Juncus pallidus	TC	\$4.50			Canterbury sourced
A rush forming large clumps upto 2m tall this plant thrives in any reasonably moist soil and does well in quite wet spots.					
Luzula ulophylla	LBP	\$9.00			
Hardy low alpine plant best in well drained gritty-stony sites. 10cm high and forms little tufts. It likes sun or semi-shade, exposed sites and is frost tolerant.					
Poa cita	TC	\$4.50			Canterbury sourced
A graceful drooping tussock with very fine fawn foliage, it grows in a clump to 50 cm tall. A common plant of scrub and grassland in coastal to subalpine areas throughout N.Z. from Thames southward. Likes a dry sunny spot and looks best when grown in poor soil.					
Typha orientalis	TC	\$4.50			Canterbury sourced
The raupo is found abundantly in marshy places in lowland regions throughout N.Z. A vigorous deciduous plant growing 2-3m tall. Although quite ornamental, it is far to invasive for the garden. Tolerates plenty of moisture and needs a sunny spot.					
Uncinia rubra			PB3	\$10.00	
A red grass with very dark narrow leaves reaching 35 cm tall. Best foliage colour is obtained in a sunny well drained spot, although this sedge will also cope with semi shaded positions provided they are well drained. Frost hardy, and tolerates exposed sites.					

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

Climbers and Scramblers

Plant Name	Grade	Price	Grade	Price	Grade	Price	Canterbury sourced
Brachyglottis sciadophila			PB3	\$10.00			Canterbury sourced
A climber that forms a shrubby mass in the absence of support. Flowers are loose clusters of small bright yellow daisies. It is restricted to the South island.							
Carmichaelia kirkii			PB5	\$10.00			
Sun or semi-shade, dry or moist Creamy white flowers oct to dec Rare and endangered Bears leaves spring to summer							
Clematis quadibracteolata			PB3	\$10.00			

One could describe this plant as quite ugly in appearance but when you smell the lovely scented purple brownish flowers you will want one in your garden. It is best described as a trailing or climbing plant to 2m. Keep the roots cool when planted.

Fuchsia colensoi

PB3

\$10.00

Flowers late spring to early summer. Scrambling and best suited to well drained semi-shaded sites planted at the base of other trees.

Helichrysum dimorphum

PB5

\$10.00

Dimorphum means occurring in two different forms and this is true of this plant when you look at its foliage. It has small white flowers Dec-April. You find this endangered plant growing on river edges, steep terrace faces and the sides of gorges in the Waimakariri Basin. It can scramble or climb for 8m.

Metrosideros diffusa

PB3

\$10.00

A clinging climber with small clusters of white flowers. It likes a cool or shaded root run but will grow in any moist well drained site with sun or shade.

Parsonia capsularis

PB3

\$15.00

A semi vigorous climber. Small but sweetly scented flowers in spring and summer. Prefers cool root run.

Parsonia heterophylla

PB3

\$15.00

A vigorous climber with both juvenile and adult foliage. It produces a great profusion of white, fragrant flowers from September through to March. Generally found in coastal situations and on margins of bush remnants. Prefers a well drained soil and is a great coastal plant.

Passiflora tetrandra

PB3

\$10.00

A slender climber, usually growing by tendrils. It produces scented greenish white flowers Nov to Dec. Male and female flowers are carried on separate plants, so both must be grown closely for fruiting to occur. Needs a cool root run and any reasonable soil.

Rubus cissoides

PB3

\$10.00

Canterbury sourced

A vigorous and vicious climber with white panicles of flowers in spring. It is an attractive plant if you have space to avoid its thorns.

Rubus schmelioides

PB3

\$10.00

Canterbury sourced

This looks like R. Cissoides but is less vicious.

Rubus squarrosus

PB3

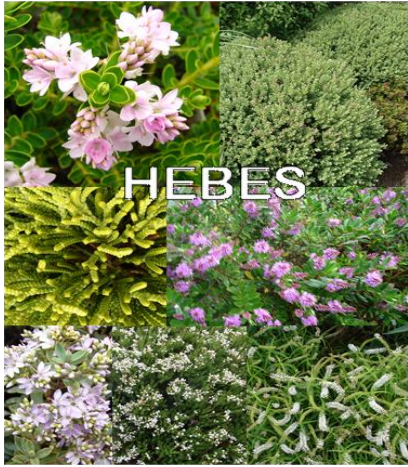

\$10.00

Canterbury sourced

A vigorous and sparsely foliated climber found throughout New Zealand, with white flowers in spring. Plant in either a dry or moist soil in full sun. Frost hardy and can cope with an exposed aspect.

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

Hebes, Heliohebes and Parahebes

Plant Name	Grade	Price	Grade	Price	Grade	Price	Canterbury sourced
Hebe "anomala"			PB3	\$10.00			
Grows 1.2m with purplish tipped leaves. White flowers in summer. Hardy to full sun, dry and exposed conditions. Does best if pruned quite hard each year.							
Hebe "Inspiration"			PB3	\$10.00			
A neat compact shrub suited for coastal localities, usually growing to about 75cm. In Christchurch the purple flowers appear in November-December and may appear as early as July. It prefers sun/semi-shade in a slightly drier site with good airflow.							
Hebe "James Stirling"			PB3	\$10.00			
A fairly slow growing plant 40cm tall by 60cm. It forms a flat topped shrub with rich golden foliage and white flowers in early summer. It is quite hardy.							
Hebe albicans	TC	\$4.50	PB5	\$10.00			
A compact shrub up to 1 m high. It is quite hardy, suits full sun, will stand some shade. White flowers for about 1 month during December.							
Hebe Red Edge			PB3	\$10.00			
When it flowers, they are violet in colour and appear in Summer. Hardy to dry and cold conditions. Grows 60-80cm.							
Hebe annulata			PB3	\$10.00			
A whipcord hebe 10-15cm tall. Quite hardy, will handle a bit of wind exposure. Is best grown in a well drained site in full or semi-shade. Great as a low border.							
Hebe armstrongii			PB3	\$10.00			
A 1m tall whipcord hebe with a rounded appearance. It has a greeny-yellow foliage and rarely flowers. This plant is best used as a foliage plant due to its conifer like appearance. It is very hardy and will do well in all sites except overly moist.							
Hebe biggarii			PB3	\$10.00			
A small prostrate hebe that grows 10cm by 20cm and has small white flowers. It will handle frost, dry/moist, full sun, semi-shade and exposed sites.							
Hebe buchananii			PB3	\$10.00			
Low growing clump 20cm high by 90cm wide with white flowers appearing in November usually. It is great in a rock garden.							
Hebe chathamica			PB3	\$10.00			
A rambling shrub to 10cm high and 1.2m wide. During summer it is smothered by white flowers. This is an ideal plant in a coastal site.							
Hebe christensenii			PB3	\$10.00			

A rounded plant growing to 90cm. It is hardy and grows in sun or semi-shade, dry or moist sites. It is a shy flowerer.

Hebe decumbens			PB3	\$10.00
----------------	--	--	-----	---------

A low growing plant that will spread up to 1m usually only growing to about 10-30cm tall. It has very black stems, shiny deep green foliage and gets white flowers tinged with pink from Dec to Feb. Best in semi-shade, free draining soil but will tolerate full sun and dry conditions.

Hebe decumbens upright			PB3	\$10.00
------------------------	--	--	-----	---------

A low growing plant to about 10-30cm tall. It has very black stems, shiny deep green foliage and gets white flowers tinged with pink from Dec to Feb. Best in semi-shade, free draining soil but will tolerate full sun and dry conditions.

Hebe diosmifolia	TC	\$4.50	PB5	\$10.00
------------------	----	--------	-----	---------

Growing to 1.2m with a pale mauve flower that fade to white during spring. It flowers quite profusely and is hardy to full sun and quite dry conditions. It is only moderately hardy to light to medium frost and should be planted in a sheltered site.

Hebe edinensis			PB3	\$10.00
----------------	--	--	-----	---------

A low growing plant up to 30cm tall by 60cm + wide. White/ light mauve flower in summer, it should be trimmed to maintain a good shape.

Hebe elliptica	TC	\$4.50	PB5	\$10.00
----------------	----	--------	-----	---------

Grows to 1.5m. Large single white flowers, during late spring and early summer. Tolerant to harsh conditions, a good coastal plant.

Hebe Emerald Gem			PB3	\$10.00
------------------	--	--	-----	---------

A low bun shaped plant growing 20-30 cm tall, with attractive fresh green semi whipcord foliage.

Hebe epacridea			PB3	\$10.00
----------------	--	--	-----	---------

It has white flowers during May-June and grows 10cm x 50cm. It will tolerate frost, full sun, moist but well drained soils in exposed sites.

Hebe laingii			PB3	\$10.00
--------------	--	--	-----	---------

A very compact whipcord hebe growing 30-50cm tall. It has white flowers in summer, requires a well drained soil. It is suitable for colder areas.

Hebe Lindsayi			PB3	\$10.00
---------------	--	--	-----	---------

An erect rounded shrub to about 75cm. Pale pink flowers in summer.

Hebe ' MacEwanii'	TC	\$4.50	PB5	\$10.00
-------------------	----	--------	-----	---------

A compact shrub growing 50 cm, with small narrow blue/grey leaves on purplish stems. Pale mauve flowers are borne in Summer.

Hebe macrantha			PB3	\$10.00
----------------	--	--	-----	---------

This hebe grows to 60 cm and produces large white flowers. A light pruning after flowering will encourage more compact growth

Hebe mckean			PB3	\$10.00
-------------	--	--	-----	---------

Growing 40 x 60cm with white flowers. Ideal as an edging plant, pot or a small rock garden.

Hebe odora	TC	\$4.50	PB5	\$10.00
------------	----	--------	-----	---------

It grows to 1.5m tall and has white flowers in late spring. A light pruning or clipping is recommended after flowering helps to keep it compact.

Hebe odora "Prostrata"			PB3	\$10.00
------------------------	--	--	-----	---------

A hardy and easy to grow plant, growing to 20cm tall x 60cm wide with small white flowers in summer. Great for rock gardens.

Hebe pimelioides "Quicksilver"			PB3	\$10.00
--------------------------------	--	--	-----	---------

Attractive grey foliage and blue/purple flowers in summer. It grows to 45cm high x 75cm wide. It is best grown in full sun, dryer conditions with good airflow.

Hebe pimelioides var glauca			PB3	\$10.00
-----------------------------	--	--	-----	---------

An attractive plant that can fall over and become decumbent with age. Great for rock gardens. It has a Violet-blue flower in summer.

Hebe pinguaefolia	TC	\$4.50	PB5	\$10.00
-------------------	----	--------	-----	---------

Grows 25cm high and maintains excellent shape. Flowers are white appear in December. Very hardy and does best in full sun, dry, exposed sites. It is frost hardy.

Hebe pinguifolia var sutherlandii	TC	\$4.50	PB5	\$10.00	
This plant grows to 45cm then becomes decumbant and sprawling. It is frost hardy, enjoys full sun and well drained sites.					
Hebe recurva	TC	\$4.50	PB5	\$10.00	
It grows to 90cm tall and has spikes of white flowers in summer. It needs no pruning and likes a sunny, well drained site. It is good for small gardens.					
Hebe speciosa			PB3	\$10.00	
A rounded bushy shrub growing from 1-2m. The flower colour can range from beetroot purple to violet purple. It is quite hardy. Good airflow is essential so it is suited to an exposed site. Ideal in full sun, dry areas and in seaside localities.					
Hebe stricta			PB3	\$10.00	
Growing from 1.5-3.5m in the garden. This plant appears to be quite hardy wherever you grow it. It has white flower spikes from December to March.					
Hebe strictissima			PB3	\$10.00	Canterbury sourced
A local plant that grows to 1-2.5m tall and has white flowers that cover the plant in summer. It is not a fast growing plant but it is quite hardy. Trim to keep tidy.					
Hebe subalpina	TC	\$4.50	PB5	\$10.00	
A densely branched shrub growing upto 2m tall that grows naturally in damp montane to sub-alpine areas. It is free flowering and the flowers appear December to January and are white. It is hardy to frost full sun/semi-shade, moist and exposed conditions.					
Hebe tairawhiti			PB3	\$10.00	
Similar to H. stricta but with a yellowish stripe in the leaf. It forms a large ball upto 3m tall. Very quick growing and hardy to full sun/semi-shade, dry and exposed sites. Trim to contain growth.					
Hebe topiaria	TC	\$4.50	PB5	\$10.00	
Tolerant of wind and coastal exposure, up to 1m tall, produces white flowers in summer. Blue-grey foliage is attractive. Forms a neat ball shape. It prefers a site in full sun, is tolerant of heavy frost and only requires average moisture.					
Hebe townsonii	TC	\$4.50	PB5	\$10.00	
A rounded shrub growing to 1m. It has white flowers with a hint of mauve in spring. It is tolerant of sun or semi-shade and requires a light pruning after flowering.					
Hebe Waireka			PB3	\$10.00	
Thick green leaves with purple flower spikes in summer. Grows to 1m. Trim once a year, usually after flowering.					
Hebe Wiri Dawn			PB3	\$10.00	
A low spreading hebe 45cm x 1m, with pale olive-green foliage. It bears pale pinkish white flowers for long periods in summer and again in autumn and winter.					
Hebe Wiri Image			PB3	\$10.00	
A vigorous yet neat shrub growing 1m high, with fresh green foliage and long racemes of violet flowers, mostly in early summer. A popular plant for mass planting.					
Hebe Wiri Mist			PB3	\$10.00	
A spreading shrub up to 60 cm high and more across, which bears masses of white flowers from late spring. A popular plant for mass planting.					
Hebe Wiri Splash			PB3	\$10.00	
A dense shrub growing 50 x 70 cm, with yellowish green foliage and a single flush of lilac flowers in early summer, and it is also cold hardy.					
Hebe youngii			PB3	\$10.00	
A useful rock garden or edging plant that is tolerant of most conditions. It has flowers in November-December and they are whitish in the tube with lobes that are violet. It only grows to 25cm tall but will spread to 60cm. A great plant for the garden or even in a smaller pot.					
Heliohebe lavaudiana	LBP	\$10.00			Canterbury sourced
A local plant found mainly on Banks peninsula. It needs to be planted in an open , sunny, dry and exposed site. Too much humidity will cause mildew problems. It grows to 30cm high and has rosy pink flowers fading to white in May.					

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

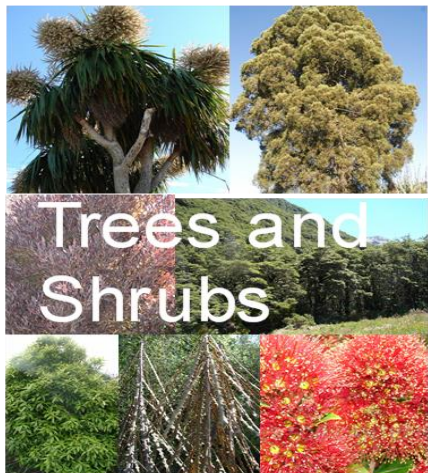

Ferns

Plant Name	Grade	Price	Grade	Price	Grade	Price	Canterbury sourced
Asplenium Maori Princess			PB3	\$17.50			
A semi-hardy fern best grown in well drained soil that is not too dry. Semi-shade is best but will grow in a spot that gets more sun if you avoid the hottest part of the day. Grows to 1m.							
Blechnum chambersii			PB3	\$17.50			
A low growing fern to 50cm in height. Suits semi-shade to full shade in a site that does not get to dry.							
Blechnum discolor			PB3	\$17.50			
A hardy fern that prefers semi-moist conditions and semi-shade. Will form a small trunk. Grows to max of 1.2m.							
Blechnum fluvatile			PB3	\$17.50			
Delightful symmetrical fern like a starfish. Easy to grow in a light soil and light shade. Does not like to dry out. 30-40cm max height.							
Blechnum novae zealandiae			PB3	\$17.50			
Very hardy. New fronds pink in the sun. A popular fern for revegetation and ornamental plantings. Grows to 1m with a spread of 1.5m							
Blechnum penna-marina			PB3	\$10.00			
A groundcover Fern common throughout NZ. Easy to grow in sun or semi-shade, moist. Ideal for rock garden or under shrubs.							

We also have access to a wide range of other varieties that we do not grow ourselves. If we do not have what you seek please ask our staff.

Shrubs and Trees

Trees and Shrubs

Plant Name	Grade	Price	Grade	Price	Grade	Price	Canterbury sourced
Agathis australis			PB5	\$10.00			
Semi-shade, moist, sheltered. Can handle medium frost. Slow growing							
Alectryon excelsus			PB5	\$10.00			Canterbury sourced
Semi-shade, moist, sheltered. Can handle medium frost. Fruit in spring & early summer. Attracts birds.							
Aristotelia fruiticosa			PB3	\$10.00			Canterbury sourced
Will thrive in any good soil. Trim occasionally to retain a good shape Small attractive flowers spring to early summer. Semi shade to full sun. Grows from 1-2m.							
Aristotelia serrata			PB5	\$10.00	PB18	\$30.00	Canterbury sourced
A fast growing tree up to 5 m. Large clusters of small rose-pink flowers during October, followed by small dark red- black berries which attracts birds. In colder areas it is deciduous. Prefers a good moist soil and an open situation. Ideal in semi-shade. Ideal plant for erosion control.							
Brachyglottis greyii			PB3	\$10.00			
Sun or shade, good drainage. Bright yellow daisy flowers dec to mar Coastal tolerant . Very hardy. Grows to 1.5m x 1.5m							
Brachyglottis Leonard Cockayne			PB5	\$10.00			
A large spreading shrub, 2.5m wide and up to 3 m high. It produces yellow flowers during December to January on panicles. It is an excellent plant for growing in dry places and coastal districts, it is also hardy in all districts. Prune regularly to keep it shapely and compact.							
Brachyglottis monroi			PB3	\$10.00			
Sun or semi-shade, dry. Yellow daisy-like flowers dec to mar. Compact rounded shrub. 90 x 90cm							
Brachyglottis repanda			PB5	\$10.00			
A shrub or small tree up-to 6m. Small creamy, fragrant flowers from August - November. It is a little frost sensitive. A little pruning after flowering will help keep a good shape. It will grow in most soil types except for very wet conditions. Coastal tolerant.							
Carmichaelia angustata			PB5	\$10.00			
Semi-shade, dry or moist. Purple flowers feb to ap.r Will not tolerate salty wind. Attracts birds. 2m							
Carmichaelia glabrescens			PB5	\$10.00			
A weeping broom growing to 3m in the garden. The flower is a Rosy Pink from Mid December. Perfers well drained sites.							

Carmichaelia muritai			PB5	\$10.00			
This nationally endangered tree grows up to 5-6m tall. Flowers from December to January are white with purple/violet markings. Best planted in a free draining, fertile soil in a sunny, sheltered position. Endemic to the South Island, Marlborough, vicinity of Clifford Bay.							
Carpodetus serratus			PB5	\$10.00		PB18	\$30.00 Canterbury sourced
A good canopy tree and very hardy. Eventually up-to 10m tall. White star like flowers when mature. Flowers are produced in profusion during November-March and are fragrant. Fruit is attractive to birds. It likes a damp semi-shaded spot but can tolerate dry. Hardy to heavy frosts.							
Coprosma aerolata			PB3	\$10.00			
Slow growing small leaved shrub to 5m. Fruits are purple/black from march onwards.							
Coprosma crassifolia			PB3	\$10.00			Canterbury sourced
A much branched divaricating shrub to 2m tall. White/cream coloured fruit during March and April which is attractive to birds. It is found in scrub, tussock-lands, river terraces, rocky places and forests. It will handle heavy frost, full sun to semi-shade, dry and exposed sites.							
Coprosma linarifolia	TC	\$4.50					
Fast growing. Very hardy, prefers open situation. Insignificant flower. Fruit translucent white drupe 6mm long A fairly fast growing shrub that can get to 8m in a forest setting. It is very hardy and prefers an open situation.							
Coprosma lucida	TC	\$4.50					Canterbury sourced
Quite often used as a nurse plant in revegetation projects. It has orange/red fruit in Feb and Mar. Half hardy to frosts, grows in a variety of situations, full sun/semi-shade, dry, moist, exposed, coastal areas. It prunes well so can be quite useful for filling a gap in the garden.							
Coprosma propinqua	TC	\$4.50	PB5	\$10.00			Canterbury sourced
A variable species which is known to grow from 1-6m high. It has a pale blue-violet blue fruit from March to May. It is found throughout New Zealand in lowland, forests, forest margins, streambanks, scrublands, gravelly places and along the edges of swamps and bogs. It does best in an open sunny site.							
Coprosma repens	TC	\$4.50					
A vigorous coastal plant. Orange fruit March to April attractive to birds. Frost sensitive, does best in a coastal, dry and exposed site. It will make a tight hedge.							
Coprosma rhamnoides			PB3	\$10.00			Canterbury sourced
A dainty divaricating shrub that grows to 3m slowly. Berries only appear on the female plant and go from bright red to almost black when ripe. It is most suited to a dry and exposed site and is hardy to frost. It is suitable for a low hedge and requires little trimming.							
Coprosma rhamnoides "Canterbury Gold"			PB3	\$10.00			
Our very own selected form of C. rhamnoides. It has a vibrant green/gold foliage.. Berries only appear on the female plant and go from bright red to almost black when ripe. It is most suited to a dry and exposed site and is hardy to frost. It is suitable for a low hedge and requires little trimming.							
Coprosma robusta	TC	\$4.50					Canterbury sourced
A rapid growing plant with vast amounts of orange- red fruit for long periods that birds find attractive. Capable of growing to 6m tall and is good for filling a gap. Can be pruned to shape if required. Will handle most conditions including extreme frost and coastal sites.							
Coprosma rotundifolia			PB3	\$10.00			Canterbury sourced
A shrub or small tree to 5m tall. Small round leaves range from pale green to purplish or bronze. It is found throughout New Zealand in lowland and montane forests, in scrub or alongside riverbanks. It prefers sun or semi-shade in slightly moist conditions.							
Coprosma rubra			PB3	\$10.00			Canterbury sourced
A plant that grows to 2-3m tall. It can withstand heavy frost, full sun and semi-shade, dry or exposed sites. Its fruit is white and ripens May to June.							
Coprosma rugosa			PB5	\$10.00			
Quick growing upright shrub to 3m tall. It has large amounts of pale blue fruit which is highly attractive to birds. It is extremely hardy and will tolerate most sites.							

Coprosma rugosa 'Midnight'			PB3	\$10.00		
A C. rugosa selection with fine dark foliage and irregular shape. Grows to 45-60cm.						
Coprosma taylorii	TC	\$4.50				Canterbury sourced
A shrub to 3m tall. The pale gold-clear fruit Appears in late January-April. It will tolerate frost, sun or semi-shade, dry, moist and exposed sites.						
Coprosma 'Taiko'			PB3	\$10.00		
A prostrate shrub with dark green leaves that forms a dense groundcover. Can be used for trailing down retaining walls. Very hardy.						
Coprosma virescens			PB3	\$10.00	PB12	\$30.00 Canterbury sourced
An attractive divaricating growing 2-3m high. It has an overall golden coppery glow from its extremely tangled branches. An excellent garden plant suitable for growing as a specimen, in groups or for hedging. Very tough plant, tolerant of poor soils and dry conditions.						
Cordyline australis	TC	\$4.50	PB5	\$10.00	PB18	\$30.00 Canterbury sourced
A truly New Zealand plant that can look great wherever it is planted, particularly in groups. It will make an effective plant in a tub. The flowers are sweetly scented while the fruit is highly attractive to birds. It is hardy to sun, dry, moist and frosty sites. Does not like shade much.						
Corokia "Bronze Knight"	TC	\$4.50	PB5	\$10.00		
An erect shrub that produces yellow flowers and red fruit. It will grow to from 1.8-2.4 m tall. Makes a great hedge and is hardy to dry exposed conditions.						
Corokia buddleioides	TC	\$4.50	PB5	\$10.00		
An attractive and very hardy shrub, great for hedges. Masses of yellow starry flowers Oct - Dec followed by red/yellow berries. Attractives birds. Lightly prune to keep in shape. Hardy to dry coastal sites and frost. Prefers a sunny site. Grows to 3.5m						
Corokia cotoneaster			PB3	\$10.00		Canterbury sourced
A very wiry and tangled growth form makes this plant stand out. It grows into a dense bush 1-3 meters tall. Very tolerant of dry exposed sites including coastal winds. It can be clipped. Bright yellow flowers in October to January are followed by Red/yellow/orange berries.						
Corokia Frosted Chocolate			PB5	\$10.00		
A lovely neat shrub with quite rich chocolate foliage.. Best in a sunny site. Very hardy. Grows to 2m. Red berries/yellow flowers.						
Corokia x virgata cheesemanii	TC	\$4.50	PB5	\$10.00	PB12	\$30.00
An ideal hedging plant, grows from 1.8-2.4m tall and can be easily trimmed. Best grown in a sunny site and is hardy to frost and coastal exposure. The flowers are yellow and appear September to November followed by red berries that birds find attractive.						
Corynocarpus laevigatus			PB5	\$10.00		
A upto 15m. Orange fruit ripens in January-April. The kernel of the fruit should be treated as deadly poison. Considered frost sensitive and is best grown in coastal conditions in Christchurch. Suits a sunny site, rich deep soil, well drained and adequate moisture.						
Cyathodes colensoi			PB3	\$10.00		
Sprawling bush/shrub up-to 2m wide by 50cm tall. Small white flowers followed by fruit that ranges from pink, red or white infairly widespread in the mountains.						
Dacrycarpus dacrydioides	TC	\$5.00	PB5	\$10.00		Canterbury sourced
The tallest of our native trees reaching its full potential after about 750 years. Prefers growing in wet swamplands but will grow in dryer sites if sheltered. Ranging from a straggly brown appearance through to a green giant covered in red fruit which is highly sort after by birds.						
Discaria toumatou			PB3	\$10.00		Canterbury sourced
A spiny shrub or tree reaching up-to 5m tall and found in dry riverbeds, open rocky places and sand dunes from the coast to subalpine regions. The thorns are vicious. It needs a dry sunny site but makes a wonderful contrasting plant or home security system.						
Dodonaea viscosa	TC	\$4.50	PB5	\$10.00	PB18	\$30.00 Canterbury sourced

A small tree growing to 6m high. It is suitable for coastal conditions, hedging or as a shelter plant. It is quite fast growing and prefers a site protected from frost (especially when young). Grow in well drained light to medium soil. The seed capsule appears about March.

Dodonaea viscosa "purpurea"	TC	\$4.50	PB5	\$10.00	
-----------------------------	----	--------	-----	---------	--

Very similar to its green counterpart but does not like coastal conditions and it is much harder to frost. Trim lightly to prevent becoming leggy.

Eleocarpus hookerianus			PB3	\$10.00	Canterbury sourced
------------------------	--	--	-----	---------	--------------------

A medium sized tree from 4-12m high that passes through a distinct juvenile stage. Likes a moist site and preferably shady.

Griselinia littoralis	TC	\$4.50	PB5	\$10.00	PB18 \$30.00 Canterbury sourced
-----------------------	----	--------	-----	---------	---------------------------------

Hardy tree up to 7m if left untrimmed. Can be used for hedging. Vibrant green foliage will withstand the full range of conditions from coastal, wet, dry, sun, shade, wind and heavy frost. Excellent container plant. It does best when given space to grow.

Halocarpus bidwillii			PB3	\$10.00	
----------------------	--	--	-----	---------	--

A low growing spreading shrub up to 1-2m. Can be grown in a rock garden or in damp places. Can be clipped to maintain shape.

Hedycarya arborea	TC	\$4.50	PB5	\$10.00	Canterbury sourced
-------------------	----	--------	-----	---------	--------------------

Tree to 6m, ideal for larger gardens. The fruit is orange-red. It is highly attractive to birds. The flowers are a creamy-green, and they appear in Sep-Dec. It prefers shelter and is frost sensitive. It grows best in moist, sun or semi-shaded areas away from strong winds.

Helichrysum intermedium			PB3	\$10.00	
-------------------------	--	--	-----	---------	--

A small plant with creamy white flowers in summer that grows to a height of 30cm. It needs a well drained gritty soil and does well in rock gardens or small pots.

Helichrysum lanceolatum	TC	\$4.50			Canterbury sourced
-------------------------	----	--------	--	--	--------------------

A shrub to 3m tall. It has tiny flowerheads with clusters of creamy/white scented flowers October-November. It needs full sun and dry rocky sites are best.

Helichrysum parvifolium			PB3	\$10.00	
-------------------------	--	--	-----	---------	--

The yellow flowered helichrysum that flowers November-March. It grows to 50cm. Best in full sun, with a well drained soil. Ideal for rock gardens and pots.

Hoheria angustifolia			PB5	\$10.00	Canterbury sourced
----------------------	--	--	-----	---------	--------------------

Slender tree to 10m. It has clusters or pure white flowers in December-March. The juvenile form is a mass of divaricating branches with a slightly weeping habit. It is best grown in full sun, dry or wet, and exposed site. It is not particular of soil types and is frost hardy.

Kunzea robusta	TC	\$4.50			Canterbury sourced
----------------	----	--------	--	--	--------------------

Hardy tree to 15m high in the wild. Clusters of small white flowers from Sep to Feb. Prune after flowering and you can stop the tree growing so tall or getting leggy. It is quite quick growing and prefers full sun/semi-shade, dry or moist and exposed sites. It is frost hardy. Mt Herbert Port Hills Variety

Kunzea serotina	TC	\$4.50			Canterbury sourced
-----------------	----	--------	--	--	--------------------

Hardy tree to 15m high in the wild. Clusters of small white flowers from Sep to Feb. Prune after flowering and you can stop the tree growing so tall or getting leggy. It is quite quick growing and prefers full sun/semi-shade, dry or moist and exposed sites. It is frost hardy. Canterbury plains Variety

Leptospermum scoparium	TC	\$4.50			
------------------------	----	--------	--	--	--

A very hardy plant to 4m. White flowers quite often with a pink center. It prefers an open situation in full sun with good drainage. Makes an ideal hedge, great for erosion control and fast growing. Prune after flowering to stop the plant becoming leggy.

Leucopogan fasciculatus			PB3	\$10.00	
-------------------------	--	--	-----	---------	--

A slow growing shrub or small tree up to 5m. It requires a dry spot in sun or semi-shade. It has small flowers followed by red berries in autumn.

Lophomyrtus "Kathryn"			PB5	\$10.00	
-----------------------	--	--	-----	---------	--

A small tree to 2m with deep purplish-red colouring, and a creamy-white flower which is followed by a red berry. It prefers a well drained soil in a sunny position.

Lophomyrtus obcordata	TC	\$4.50	PB5	\$10.00	Canterbury sourced
-----------------------	----	--------	-----	---------	--------------------

A spreading shrub upto 5m high. It has a creamy-white flower in Dec-Feb. It prefers sun or shade in a moist but well drained soil. It will handle exposure to wind and frost, although it can get some damage from frost when young. Coastal wind intolerant.

Melicope simplex			PB3	\$10.00		Canterbury sourced
------------------	--	--	-----	---------	--	--------------------

Grows up to 5m tall but in exposed conditions usually only reaches 2-3m. The flowers attract insects which in turn will attract birds like the fantail. Not fussy about conditions which makes it ideal for exposed sites. Branches interlacing and with a light prune will bush up well.

Melicytus alpinus			PB3	\$10.00		Canterbury sourced
-------------------	--	--	-----	---------	--	--------------------

Low rigid shrub grows 50cm x 1m. It has interlacing branches and few leaves. It has tiny white bell shaped flowers in October-November followed by white to dull blue berries. It grows naturally on rocky outcrops and in snow tussock grasslands or fellfields. Very hardy.

Melicytus micranthus			PB3	\$10.00		
----------------------	--	--	-----	---------	--	--

A divaricating but erect shrub reaching 2m. It prefers a dry situation but will grow nearly anywhere. It has purple/black berries from November-May.

Melicytus obovatus			PB3	\$10.00		
--------------------	--	--	-----	---------	--	--

Hardy shrub to 2-3m tall. It is naturally a coastal plant and will withstand exposed, dry, full sun and frosts. It has very small flowers but attractive purple berries.

Melicytus ramiflorus	TC	\$4.50	PB5	\$10.00		Canterbury sourced
----------------------	----	--------	-----	---------	--	--------------------

Best suited for a large garden or as a shade tree. Grows to 6m tall and does best in a sheltered situation, will not tolerate strong winds. Although young plants are not capable of handling frost mature plants will. It is fast growing and will tolerate coastal sites.

Metrosideros excelsa			PB5	\$10.00	PB18	\$30.00
----------------------	--	--	-----	---------	------	---------

A tree up to 20m in height and produces crimson to brilliant red flowers during December through to January. The Pohutukawa grows best close to the sea, but will grow in almost any well drained soil. Protect young shoots from frost over first few years. Very wind resistant.

Metrosideros umbellata			PB3	\$10.00		
------------------------	--	--	-----	---------	--	--

A small, very slow growing tree 3 - 6m high. It produces blood red flowers Nov to March, takes many years before the tree will flower. It will grow in most well drained soils and once established will tolerate dryness (water during dry weather until established). Frost hardy.

Muehlenbeckia astonii			PB3	\$10.00		Canterbury sourced
-----------------------	--	--	-----	---------	--	--------------------

A shrub growing 1-2.5m tall with tangled wiry stems and small heart shaped dark green leaves. Very hardy, able to tolerate quite dry soil. Semi deciduous

Myoporum laetum			PB5	\$10.00	PB18	\$30.00 Canterbury sourced
-----------------	--	--	-----	---------	------	----------------------------

Tree growing 4-6m high. Young plants are frost tender. Best in fairly good soil, but grows in poor dry soils. White flowers Oct to Jan. It is mainly used for a shelter plant, particularly in coastal locations. Can be trimmed for use as a hedge. Fruit and leaves are poisonous.

Myrsine australis			PB3	\$10.00		Canterbury sourced
-------------------	--	--	-----	---------	--	--------------------

heavy frosts. Is an excellent hedging plant that can be pruned quite severely.

Myrsine divaricata			PB3	\$10.00	PB12	\$30.00 Canterbury sourced
--------------------	--	--	-----	---------	------	----------------------------

Prefers a good soil but is very hardy. Unusual weeping habit Berries ripen aug - may

Neomrytus pendunculata			PB3	\$10.00		Canterbury sourced
------------------------	--	--	-----	---------	--	--------------------

A slow growing shrub or small tree, 2-3m. Produces tiny white flowers in Summer, followed by orange-red berries which attract birds. Plant in sun to semi-shade.

Nothofagus fusca			PB5	\$13.50		
------------------	--	--	-----	---------	--	--

It can usually reach about 10m in cultivation so is better suited to large gardens. The small oval leaves are mid to dark green, with leaves having a reddish tinge in winter. The beech prefers a cooler climate so is not a good tree for northern areas.

Nothofagus menziesii			PB5	\$13.50		
----------------------	--	--	-----	---------	--	--

Grows to 10m in cultivation. When grown in an open situation, silver beech forms handsome spreading dome shaped canopy.

Nothofagus solandri var cliffortioides			PB5	\$13.50		PB18	\$30.00	Canterbury sourced
A spreading tree that grows up to 25m high. Hardy to frosts and tolerant of wind exposure. Grows well in wet boggy or poorly drained soils as it needs adequate moisture. It prefers to be planted in a spot that gives it filtered sunlight..								
Olearia arborescens			PB5	\$10.00				Canterbury sourced
Shrub 4m tall x 2 m wide.Produces creamy-white flowers October to January. Prefers a sunny site, tolerant of exposure to wind and coastal exposure. Frost hardy.								
Olearia avicenniaefolia			PB5	\$10.00				Canterbury sourced
A tree growing to 6m tall with thick wavy leaves and a profusion of sweetly scented white daisy like flowers January to April. Does well in a sunny position, with a rock or two at the base to give the plant a cool root run. Very hardy and will tolerate very dry conditions.								
Olearia cheesemanii			PB5	\$10.00				
flowering to quickly tidy the bush. Prefers a sunny spot with good drainage.								
Olearia coriacea			PB3	\$10.00				
Shrub 1.8-3m tall, drought resistant, useful as a low growing hedge. Plant in a well drained, sunny position. Withstands heavy frosts. Suitable for coastal planting.								
Olearia cymbifolia			PB3	\$10.00				
Neat shrub with boat shaped leaves and a erect habit up to1.2m. White flowers with a yellow centre from November to January. Hardy, very drought resistant.								
Olearia dertonii	TC	\$4.50				PB12	\$30.00	
A shrub with very narrow leaves and slender drooping branches. It grows between 1.8 and 4.6m tall and must attain some maturity before it is seen to its best advantage. Its flowers are inconspicuous but quite fragrant, these are produced during Spring. Very hardy. Tolerates moist or dry soil and coastal conditions.								
Olearia fragrantissima			PB3	\$10.00				
Grows to about 3m. Tiny yellowish green and fragrant flowerheads spring to early summer. Withstands dry conditions and tolerates strong winds.								
Olearia ilicifolia			PB3	\$10.00				Canterbury sourced
Slow growth, reaching 5m high. It produces musk scented white flowers from December through to January. The mountain holly requires a cool moist situation and is good for cold and partly shaded situations. Will respond well to a light pruning.								
Olearia ilicifolia x moschata			PB3	\$10.00				
White daisy flowers from Dec-Jan. Needs adequate moisture & good drainage. Will do well if in light shade. Not common. 1.5m								
Olearia macrodonta			PB5	\$10.00				
A tree growing 1.5 to 6m tall that produces white flowers with a yellow centre during October though to January. These are more profuse on older bushes. Its' foliage has a strong musky odour. Requires a cool moist situation, growing well in cold shady spots.								
Olearia nummularifolia			PB3	\$10.00				
makes it suitable for dry and exposed places. It is useful and attractive as a low hedge.								
Olearia odorata			PB5	\$10.00				
A deciduous shrub to 4m. Scented flowers in summer. Quite hardy.								
Olearia oleifolia			PB3	\$10.00				
A shrub growing up to 1.2m high, that produces white flowers December through to January. Good for dry and partially shaded situations.								
Olearia paniculata	TC	\$4.50	PB5	\$10.00		PB12	\$30.00	
Tree grows to about 4.6m tall. Produces very fragrant creamy white flowers during Autumn which scent the air for many metres around. Suited to dry soils and windy places, will not tolerate wet conditions. Commonly found in coastal areas. Makes an excellent hedge.								
Olearia solandri			PB5	\$10.00				

A fairly rapid growing shrub that grows 1.5 - 4.6m tall. During Jan and Feb it produces small white, vanilla scented flowers. Very hardy plant can tolerate heavy frosts, dry or exposed areas. Great plant for coastal conditions. Plant in full sun. Good as a hedging plant or for shelter.

Olearia traversii	TC	\$4.50		PB5	\$10.00		PB18	\$30.00
-------------------	----	--------	--	-----	---------	--	------	---------

A small tree to 10 m high. It is extremely hardy, enjoying the most rigorous conditions and is particularly suited for planting in coastal districts. Excellent hedge.

Ozothamnus leptophylla				PB3	\$10.00			
------------------------	--	--	--	-----	---------	--	--	--

A fast growing silver coloured shrub, that produces clusters of creamy flower heads November-January and again during March - April. Plant in full sun in a dry, exposed site. Frost and possum hardy. Good for erosion control and ideal as a hedging plant.

Ozothamnus leptophylla LCP	TC	\$4.50						Canterbury sourced
----------------------------	----	--------	--	--	--	--	--	--------------------

A golden coloured shrub growing 60 cm to 1.8m tall. It produces creamy coloured flowers. Found in riverbeds and sandy coastal areas. For best effect it should be grown in an exposed position in full sun and in poor dry soils. Will tolerate medium frosts.

Ozothamnus vauvilliersii				PB3	\$10.00			
--------------------------	--	--	--	-----	---------	--	--	--

A shrub growing 1-3m high and 1m wide, found in drier areas. Produces clusters of white flowers. Prefers maximum sunshine, dry conditions and perfect drainage. Useful for growing in dry exposed places. Tolerant of medium frosts.

Pennantia corymbosa				PB3	\$10.00		PB18	\$30.00
---------------------	--	--	--	-----	---------	--	------	---------

Its juvenile stage, can last up to 20 years and is a tangled mass of wiry branches. As an adult it will form a round-headed tree of up to 10m tall. It will produce clusters of waxy white, fragrant flowers during late Spring. It prefers to be planted in moist soil in an open situation.

Pittosporum anomalum				PB3	\$10.00			
----------------------	--	--	--	-----	---------	--	--	--

A small divaricating shrub growing to 1m. Small fragrant yellowish flowers. Grows in sun or semi shade and prefers a well drained soil

Pittosporum crassifolium				PB5	\$10.00			
--------------------------	--	--	--	-----	---------	--	--	--

A small tree growing up to 9m high. It produces very dark red scented flowers Sept through to Dec. Grows fairly rapidly and densely, making it an ideal hedging or windbreak plant. With hard pruning it can be kept to 2m high. Prefers an open situation, not fussy as to soil type.

Pittosporum eugenioides	TC	\$4.50		PB5	\$10.00		PB18	\$30.00 Canterbury sourced
-------------------------	----	--------	--	-----	---------	--	------	----------------------------

A quick growing tree from 6-12m tall. Its' foliage is lemon scented (when crushed) and it has highly fragrant honey scented flowers. Prefers an open sunny site, with moisture and average garden conditions. Tolerant of medium frosts, winds and coastal exposure.

Pittosporum tenuifolium	TC	\$4.50		PB5	\$10.00		PB18	\$30.00 Canterbury sourced
-------------------------	----	--------	--	-----	---------	--	------	----------------------------

A tree growing 4-6m high. It produces sweet, fragrant, bright purple flowers Oct - Nov. Will thrive anywhere in almost any soil or climate. Is tolerant of medium frosts, wind and coastal conditions Used extensively for hedges, can be kept to about 1.8m with regular pruning.

Plagianthus divaricatus	TC	\$4.50						Canterbury sourced
-------------------------	----	--------	--	--	--	--	--	--------------------

A dense twiggy shrub growing to 2m. The scented flowers and fruit are both very small. The natural habitat of P.divaricatus is coastal marshes and estuaries. throughout N.Z For this reason it has value as one of the few plants that will tolerate both salt laden winds and wet soils.

Plagianthus regius	TC	\$4.50		PB5	\$10.00		PB18	\$30.00 Canterbury sourced
--------------------	----	--------	--	-----	---------	--	------	----------------------------

A fast growing tree 5-10m. The tree has a divaricating juvenile form while the adult becomes a straight trunked tree. The tree has an attractive airy appearance, yet is quite tough, being able to withstand strong winds. It will grow in most soils but does best in one that has been well worked.

Podocarpus acutifolius				PB5	\$10.00			
------------------------	--	--	--	-----	---------	--	--	--

A small tree growing 4-5m, with sharp needle like foliage. It is found naturally from the Marlborough Sounds to southern Westland and will grow in most conditions, being very hardy. It can be clipped to maintain a bushy shape and would make a good hedging plant.

Podocarpus nivalis				PB3	\$10.00			
--------------------	--	--	--	-----	---------	--	--	--

This shrub is found in alpine and subalpine areas throughout N.Z. It has a variable form, being either prostrate or erect and can grow to about 1m high. Makes a good groundcover in a rock garden. Grows in a wide range of conditions.

Podocarpus totara			PB5	\$10.00		Canterbury sourced
In the forest the Totara can reach 30m, but under cultivation it grows to about 5-10m. The needle like leaves are olive green, with the fresh growth being a brighter shade. Totara is suitable for planting as a specimen or for hedging and is not fussy about soil conditions.						
Pomaderris phyllicifolia var. ericifolia			PB3	\$10.00		Canterbury sourced
This shrub is found in scattered areas of the North Island and upper South Island. The bright green leaves are very small and narrow with a wrinkled surface. It grows about 1m tall. Prefers a sunny to semi-shady, well drained situation.						
Prumnopitys ferruginea			PB5	\$10.00		
Miro is slow growing and usually reaches 5-10m in cultivation. Trees of both sexes are necessary for fruiting. Plant in a good moist soil in semi shade.						
Prumnopitys taxifolia			PB5	\$10.00	PB18	\$30.00 Canterbury sourced
The juvenile form has drooping tangled branches with an orange hue and silvery foliage. Matai will tolerate drier soils than miro.						
Pseudopanax arboreus	TC	\$4.50	PB5	\$10.00	PB12	\$30.00 Canterbury sourced
Grows into a well branched rounded tree of between 3-6m high. Small purple berries are attractive to birds. It can be kept bushy as it responds well to regular pruning. In humid areas it can be prone to root rot, so should be grown on dry sites with good air movement.						
Pseudopanax crassifolius			PB3	\$10.00		Canterbury sourced
Eventually will develop into a round headed tree of about 5m. Sun or shade, dry or moist Coastal tolerant Black berries attract birds						
Pseudopanax ferox			PB3	\$10.00	PB12	\$30.00
Eventually will develop into a round headed tree of about 5m. Sun or shade, dry or moist Coastal tolerant Black berries attract birds						
Pseudowintera colorata			PB3	\$10.00	PB12	\$30.00 Canterbury sourced
In the garden it grows to a bushy shrub of 2-3m. The colourful leaves are yellowish green often mottled or speckled with red. It prefers a good soil and although it can tolerate quite dry conditions it does appreciate watering during dry spells. Grow in sun or semi shade.						
Raukaua anomalus			PB3	\$10.00		Canterbury sourced
A shrub growing up to 2m high, found throughout N.Z in forest and in scrub. Tiny green or fawn flowers in January and February, fruiting during February and April.						
Sophora chathamica			PB5	\$13.50		
Found mainly in coastal and lowland areas. It becomes a moderate to large tree up to 10m tall with one main trunk. Plant in full sun or semi shade in any reasonable conditions with good drainage, do not like a water logged soil in winter.						
Sophora microphylla	TC	\$4.50	PB5	\$10.00		Canterbury sourced
It has a somewhat tangled juvenile form before growing into a tree 3-7m. Its juvenile stage can last for up to 10 years and it doesn't flower during that time. Once mature, the plant will become a round headed tree and during spring it will be covered with beautiful yellow flowers.						
Sophora prostrata			PB3	\$10.00		Canterbury sourced
Found in lowland places from Marlborough to Canterbury, the prostrate kowhai forms a close mound with tangly branches. The leaves are very small and the flowers too are smaller than any other species and are yellow to orange. They are borne sparsely and sporadically.						
Teucrium parvifolium			PB5	\$10.00		
Twiggy shrub growing 1-2m tall, covered in small white flowers in spring and summer. Requires regular pruning to maintain a good shape. Suitable for dry open areas in sun or semi shade. Does not like overcrowding by other plants.						

We also normally have stocks of the following

Pittosporums, Mountain green, Wrinkled Blue (Screenmaster), Stephens Island, Wai Iti, Tandarra Gold and many more

Sophora Dragons Gold, Many Coprosma Species, Psuedopanax lessonii varieties, Psuedopanax laetus.
Marlborough Rock Daisies, assorted Manukas and a good selection of Pohutakwas.

If you are not sure please ask as we do have access to many different varieties and are more than happy to obtain them for you.
