## Brand profile

STAEDTLER is one of the world's leading manufacturers and suppliers of writing and drawing instruments and its name vouches for highest brand quality.

### STAEDTLER guarantees

- perfect writing performance
- high reliability
- superb writing comfort

This follows the company's many decades of experience in the development and manufacture of professional writing and drawing instruments.

### Tradition – company and brand

Both the STAEDTLER brand and the product lines 'Mars' and 'Noris' can look back on a long tradition. Already in the year 1900, the product name 'Mars' was registered at the imperial patent office, followed, only one year later, by 'Noris'.

Today, both product lines are still of great importance to STAEDTLER and are registered trademarks in more than 100 countries. The product name 'Minerva' is even older. It was registered in the trademark ledger in 1896 and is still used in the present day.

The company itself is rich in tradition too. One of Johann Sebastian Staedtler's ancestors, Friedrich Staedtler, had been active in the pencil-making trade long before the foundation of the company J.S. Staedtler in 1835.

Indeed, first references to him in the city annals date back as far as 1662.

## Responsibility for the environment

As an internationally active manufacturing company, environmental protection is something that STAEDTLER has always taken very seriously. For years already, the company has been implementing numerous publicly recognised pollution control measures and has received a number of environmental awards as a result – not only at the head office in Nuremberg.

STAEDTLER is particularly active in the areas of waste water treatment, reusable material sorting, raw material recycling and energy conservation by means of heat recycling. Worldwide, top priority is given to a careful use of resources and

an efficient and environmentally friendly manufacturing process in order to conserve our ecosystem for future generations.

When it comes to global ecology, STAEDTLER has gone still one step further. In the year 2000, the company's management started a joint research project together with the Malaysian government on the reforestation of jelutong (*Dyera costulata*). In doing so, STAEDTLER is making an active contribution to the research, cultivation and growth of a type of wood commonly used for the manufacture of pencils.

## Quality – Made in Germany and international

Tradition is value, quality is tradition – not only in the company’s German production plants where the majority of STAEDTLER products are manufactured. The words **MADE IN GERMANY** are regarded as a guarantee for top quality all over the world. STAEDTLER is proud of its long manufacturing history in Germany – and will, of course, continue this tradition in the future as well.

A continuous striving for top performance is something that is very much anchored in the STAEDTLER workforce on a worldwide level. This principle is actively enforced by the company’s more than 3,000 employees at eleven production plants and 24 sales subsidiaries all over the globe. STAEDTLER is the largest manufacturer of blacklead and coloured pencils and erasers in Europe.

### Innovation secures success – both now and in the future

Know-how stimulates innovation – innovation stimulates success. Ground-breaking inventions – today standards for the entire branch – provide the foundation for STAEDTLER’s outstanding market positioning in many product segments. This already began in 1834 with Johann Sebastian Staedtler’s invention of the **coloured pencil**. The first **OHP pen** – STAEDTLER Lumocolor – set another milestone in the writing instruments market. The development of the **DRY SAFE feature** for permanent and non-permanent inks is another example of STAEDTLER’s pioneering spirit.

High investments in R&D secure STAEDTLER’s innovative power well into the future. For products offering a perfect synthesis of functionality and design, in line with the high standards of the STAEDTLER brand.

## STAEDTLER Foundation

All shares of the STAEDTLER Group are held by the STAEDTLER Foundation. On 16th April 1997, the foundation was officially recognised and certified as a non-profit organisation by the regional government of Central Franconia. The purpose of the foundation is to

support scientific research at national universities and polytechnics. Every year, profits from the STAEDTLER Foundation are allocated to generously fund research projects and to finance highly remunerative awards for outstanding PhD theses.

## Lumocolor® – perfect all-rounders

Suitable for a whole variety of uses and offering a perfect solution for just about every imaginable application – the pens and markers of the Lumocolor range are true standard-setters. Thanks to the innovative ink technology, products remain ready for use at all times, even when really put to the test, and excel with their long service life and superb writing and marking performance on all kinds

of different materials. For over 50 years now, Lumocolor has stood for excellent product quality MADE IN GERMANY. The characteristic design of the Lumocolor OHP pen, market leader in many countries, is today common to all products in the assortment. What's more, the unique, prize-winning STAEDTLER box keeps pens ready to hand at all times. What more could you want?

**Lumocolor –  
write on whatever you like!**

## The comprehensive Lumocolor range ...

### Permanent / non-permanent

- Permanent / waterproof: dark barrel colour
- Non-permanent / water-soluble: light barrel colour

### Colour range

- Up to 8 different colours are available

### Line widths

- The right line width whatever the application

## ... with its ingenious packaging ...

### STAEDTLER box

- Practical pen stand for desks
- Quick to assemble
- Patented in Germany, Japan and the USA (US Pat 6,364,100 B1); patents pending in Europe

- Perfect alignment of products
- The exact moulding of the STAEDTLER box enables easy removal and replacement of pens
- Sturdy material protects pens during transport

red dot design award  
winner 2003

- 2003 distinguished with the internationally acclaimed red dot design award for exceptional product design

... and outstanding characteristics

**ONE FOR ALL**

- For almost all surfaces, such as glass, plastic, metal, porcelain, wood etc.
- For labelling CDs/DVDs
- For overhead film, whiteboards and flipcharts

**DRY SAFE – Say goodbye to dried-up pens!**

- Thanks to the DRY SAFE feature, pens can be left uncapped for days at a time without drying up
- When left open during breaks in writing, they remain ready for action without delay
- The DRY SAFE permanent ink is patented in Germany, France, Great Britain, Italy and Japan; the DRY SAFE non-permanent ink is patented in Germany, France, Great Britain, the Netherlands, Spain, Italy and the USA (US 6,364,100).

**Dry in seconds**

- Lumocolor permanent ink takes only 3 – 6 seconds to dry, making it ideal for left-handed users

**Lightfast**

- Lumocolor permanent markers, Lumocolor permanent compact and 4 of the Lumocolor permanent pen colours excel by their high level of lightfastness
- Writing is still clearly legible years later
- Some of the inks are lightfast for more than 7 years

**Locked tip**

- Even when subjected to extremely heavy writing pressure, the tip remains locked in place and cannot be pushed back into the barrel

**Refill station**

- For easy and clean refilling
- Simply insert pen or marker into the refill station
- Minutes later the pen is ready for use, after 3 – 4 hours it is completely refilled
- An overfilling is impossible as the pen can only draw its own maximum ink content out of the refill station

## Lumocolor® permanent compact

### 342

- Handy-sized all-rounder for labelling and marking
- With sturdy universal tip for variable line widths
- DRY SAFE – can be left uncapped for days without drying up (test ISO 554)
- Excellent smudge-proof and waterproof qualities on almost all surfaces and on CDs/DVDs
- Dries in seconds, therefore ideal for left-handed users
- Lightfast (black and green for over 10 years on paper)
- Black and green are weatherproof
- Colour-intensive, low odour, xylene-free
- Locked tip
- With clip
- PP barrel and cap guarantee long service life
- Stand-up STAEDTLER box
- 4 colours

10 pieces per box

Set of 4 colours in STAEDTLER box

### Compact size

- Feels like a pen – performs like a marker when writing or labelling
- Lumocolor permanent compact – the universal all-rounder

### Universal tip

- The sturdy universal tip for variable line widths offers a consistent line width performance even during intensive use
- By altering the way the pen is held, line widths of between 1 – 2 mm are possible: steep angle for fine lines and shallow angle for broad lines

## Lumocolor® permanent marker

350/352

- DRY SAFE – can be left uncapped for days without drying up (test ISO 554)
- Excellent smudge-proof and waterproof qualities on almost all surfaces
- Dries in seconds, therefore ideal for left-handed users
- Lightfast (black and green for over 10 years on paper)
- Black and green are weatherproof
- Colour-intensive, low odour, xylene-free
- Locked tip
- With clip
- PP barrel and cap guarantee long service life
- Easy to refill with refill station 488 50
- Stand-up STAEDTLER box
- 8 colours
- 2 line widths:  
 Bullet tip approx. 2 mm  
 Chisel tip approx. 2 or 5 mm

10 pieces per box

Set of 4 colours in STAEDTLER box

352 WP4 (bullet tip)

350 WP4 (chisel tip)

## Lumocolor® permanent marker

385

- DRY SAFE – can be left uncapped for days without drying up (test ISO 554)
- Excellent smudge-proof and waterproof qualities on almost all surfaces
- Dries in seconds, therefore ideal for left-handed users
- Lightfast (black and green for over 10 years on paper)
- Black and green are weatherproof
- Colour-intensive, low odour, xylene-free
- Locked tip
- With clip
- PE barrel and PP cap guarantee long service life
- Refillable with bottle 485 23
- 4 colours
- Broad chisel tip approx. 2 or 7 mm

5 pieces per box

## Lumocolor® permanent marker

388

- Characteristics as for Lumocolor permanent marker 385, but with:
- Extra-broad chisel tip approx. 2 or 12 mm

5 pieces per box

## Lumocolor® permanent special

319 S / 319 F / 319 M

- For many special applications such as coated surfaces, nano coatings, optical glass, laboratory glass
- Adheres to many special surfaces which other fine markers do not adhere to
- The black Lumocolor permanent special F and M can also be used for marking laundry with and for a variety of outdoor applications, e.g. as a "garden marker"
- Excellent smudge-proof and waterproof qualities on almost all surfaces
- Dries in seconds, therefore ideal for left-handed users
- Colour-intensive, low odour
- Extremely lightfast (on smooth surfaces: black for 7 years, red for 1 year; on paper: much longer)
- Black is weatherproof
- With clip
- PP barrel and cap guarantee long service life
- 3 line widths, 2 colours

10 pieces per box

-  **319 S-9** — approx. 0.4 mm
-  **319 F-2** — approx. 0.6 mm
-  **319 F-9** — approx. 0.6 mm
-  **319 M-9** — approx. 1.0 mm

### Example of application on a nano-coated surface:

The Lumocolor permanent special adheres perfectly without beading or smudging.

Conventional markers do not adhere well, ink beads and smudges.

CD/DVD pens . Special markers

## Lumocolor® CD/DVD pen

310 CDS

- Extra-soft tip does not damage sensitive CD/DVD surfaces
- Ink does not penetrate data storage layer
- DRY SAFE – can be left uncapped for days without drying up (test ISO 554)

Dry markers

# Lumocolor® – for impressive presentations

Add a striking visual dimension to speeches, give presentations a clear structure, develop and convey ideas in meetings. A strong visualisation is essential for getting your point across. Whether on overhead film, whiteboards, flipcharts or presentation boards – Lumocolor pens and markers communicate thoughts and ideas both clearly and precisely.

Available in four different line widths and eight high-contrast colours, the OHP pens are ideal for drawing up clear structures and coherent charts with. When it comes to the markers, the bullet tip ensures a consistent writing performance, whilst the chisel tip is ideal for emphasising headlines and individual words. True leaders in quality, offering outstanding expertise.

**OHP permanent and non-permanent pens**

**Whiteboard markers and accessories**

**Flipchart markers**

## Overhead presentations

- An overhead projector is almost always to hand; transparencies are quick, easy and inexpensive to make
- Notes made with Lumocolor non-permanent can be wiped off using a damp cloth
- Lumocolor permanent can be removed quickly and easily using STAEDTLER Mars plastic erasers

Lumocolor OHP permanent and non-permanent pens can be found on pages 14 and 15.

## Whiteboard presentations

- A whiteboard is more versatile than a conventional blackboard
- Text can be quickly dry-wiped from the board and changed
- Non-dry-wipe lines – e.g. for charts and timetables – can be made with Lumocolor non-permanent universal pens

Whiteboard markers and accessories can be found on pages 23 – 25.

## Flipchart presentations

- A flipchart is versatile and not dependent on other equipment, such as a plug or screen
- It can also be used in daylight conditions
- Individual sheets can be prepared in advance
- Notes remain unchanged; pages can be turned backwards or forwards

Flipchart markers can be found on page 26.

## Lumocolor® whiteboard compact

341

- Handy-sized whiteboard marker
- With universal tip for variable line widths of approx. 1 – 2 mm
- DRY SAFE – can be left uncapped for days without drying up (test ISO 554)
- Can be dry-wiped from whiteboards and surfaces such as glass and porcelain without leaving a trace
- Fast-drying, low odour
- Locked tip
- With clip
- PP barrel and cap guarantee long service life
- Stand-up STAEDTLER box
- 4 colours

10 pieces per box

Set of 4 colours in STAEDTLER box

341 WP4

### Compact size

- Feels like a pen – performs like a marker when jotting down notes or making presentations
- Lumocolor whiteboard compact – the ideal marker for small whiteboards

## Lumocolor® memo board

641 A5

- Reusable notice board
- Self-adhesive
- Removable
- Dry wipe
- Handy size: A5 (210 x 148 mm)

Cellophane bag containing 10 pieces

641 SBKD / 641 SBKE

Set containing 1 Lumocolor memo board, 1 blue Lumocolor whiteboard compact and pen holder

Single pack

641 A5

Textsurfer dry

STAEDTLER triplus textsurfer

STAEDTLER Textsurfer classic  
INKJET SAFE  
GERMANY

# Outstanding highlighters – for a better transparency of texts

STAEDTLER highlighters enable you to focus on the essentials. Whether classic, innovative designer or wood-cased version – all STAEDTLER highlighters can be relied upon to put the spotlight on what’s important. Textsurfer classic even performs perfectly on inkjet print-outs, without smudging the ink; its violet and turquoise colours are truly amazing too, with highlights still remaining visible after photocopying.

The dry markers are ideal for use on thin paper and the triplus textsurfer, with its ergonomic design and soft tip, guarantees an exceptional highlighting experience every time. The innovative refill station is not only environmentally-friendly, it also offers an easy, clean and cost-efficient refilling solution for Textsurfer classic. Truly outstanding!

### INKJET SAFE

- All Textsurfer classic colours do not smudge inkjet print-outs

# Textsurfer® classic – perfect performance even on inkjet print-outs

In contrast to conventional highlighters, which are usually only suitable for use on normal paper, photocopies and fax, STAEDTLER Textsurfer classic is just perfect for all kinds of paper and applications. These innovative experts offer impressive colour brilliancy while maintaining excellent legibility of highlighted text.

Set colourful highlights on normal paper, photocopies, carbon copies, autcopy paper, fax and even inkjet print-outs! All eight colours do not smudge inkjet print-outs. What's more, with violet and turquoise, both highlights and text remain visible when photocopied. Innovation and quality MADE IN GERMANY – simply brilliant!

**COPY PROOF**  
With violet and turquoise,  
both highlights and text remain  
visible when photocopied

# Inkjet safe

The new generation of STAEDTLER Textsurfer classic was developed especially for use with pigmented inkjet inks, as are common in inkjet printers.

Conventional highlighters loosen pigments from the paper, causing them to smudge. The new STAEDTLER Textsurfer classic fixes the pigments. Highlights without smudging!

# Copy proof

The majority of highlighter colours either don't get recognised by photocopiers at all, meaning that highlights simply don't show up on the copies, or they merely appear as a thick black line, covering the text.

However, with the STAEDTLER Textsurfer classic in violet (364-6) and turquoise (364-35), both highlights and text remain clearly visible on the photocopies too.

# triplus® – for fatigue-free writing

The name triplus stands for an innovative product concept with all features designed specifically with one goal in mind: fatigue-free writing, drawing, colouring and highlighting. This is reflected in the ergonomic triangular shape, slip-resistant pen surface, DRY SAFE ink feature – rendering it unnecessary to keep

replacing pen caps all the time – and the STAEDTLER box – the ingenious storage solution that keeps products ready to hand whenever and wherever they're needed. Taken together, these features offer ideal conditions for a stress and fatigue-free use of the triplus articles – whether at home, at school or at work.

- Fineliners**
- Rollerballs**
- Gel rollers**
- Fibre-tip pens**
- Ballpoint pens**
- Mechanical pencils**
- Highlighters**

### Triangular shape

- Recommended by the Technical University of Munich
- For effortless, fatigue-free writing, drawing, colouring and highlighting
- Products fit perfectly in the hand so they cannot turn or slip around whilst in use
- The grip remains relaxed and unstrained – even when used over longer periods of time, the hand does not tire

Fineliner    Gel roller    Rollerball    Fibre-tip pen    Ballpoint pen    Mechanical pencil    Highlighter

### Writing systems

- With the triplus concept, STAEDTLER has succeeded in developing an extensive range of products for fatigue-free writing, drawing, colouring and highlighting

### Awards

- The triplus products have been distinguished for outstanding, innovative product design
- The STAEDTLER box has been awarded the red dot design award for exceptional packaging design and superb functionality

### DRY SAFE

- No more dried-up pens!
- The unique DRY SAFE feature of the inks enables pens to be left uncapped for days at a time without drying up
- Even when left open during long breaks in writing, they remain ready for action without delay

### Colour range

- The range includes a wide array of brilliant colours and effect colours for a whole variety of applications

### STAEDTLER box

- An exceptional packaging for exceptional products
- It can be transformed into a practical pen stand for desks in no time at all
- Patented in Germany, Japan and the USA (US 6,364,100 B1); patents pending in Europe

### Pen slots

- The exact moulding of the STAEDTLER box ensures an optimal alignment of products and keeps them perfectly in place
- Easy removal and replacement of products
- Sturdy box for safe transport

### STAEDTLER box tray

- Exceedingly practical and extremely attractive
- This space-saving display for 10 STAEDTLER boxes not only looks good, it is also very sturdy

# triplus® multi-set

34 SB4

## The mobile office

- The practical STAEDTLER triplus multi-set comprises:
  - 1 triplus fineliner, black
  - 1 triplus roller, blue

# STAEDTLER mechanical pencil leads – evolution at its best

STAEDTLER mechanical pencil leads possess outstanding product characteristics. Made up of over 90%, carefully-selected, natural raw materials and manufactured in a unique, ecological production process – no PVC and no softening agents –,

the mechanical pencil leads offer users a soft, smooth-gliding writing performance and, thanks to their high graphite content, jet black lines. The high flexibility of the leads (bend not break) makes them extremely break-resistant. Last but not least, good

erasability rounds off this range of features which make writing and technical drawing with STAEDTLER mechanical pencil leads so special. Tried and tested for over 30 years already – quality MADE IN GERMANY.

255 05-	2B	HB	0.5 mm
255 07-	2B	HB	0.7 mm

## Innovative push-button mechanism

- Easy single-handed refilling – hold tube, press push-button, one lead is released
- If the push-button is pressed accidentally, the lead can be pushed back in by turning the tube upside-down and pressing the push-button a second time

## STAEDTLER mechanical pencil lead

### 255

- Mechanical pencil lead for use on paper and drawing card
- Innovative push-button mechanism for single-handed use and refilling of individual leads
- Funnel-shaped tip for easy refilling
- Lead content window
- Smooth-gliding lead
- Jet black lines
- Highly flexible – extremely break-resistant
- Easy to erase
- Suitable for use with all mechanical pencils
- 2 line widths, 2 degrees

40 leads per tube

### Funnel-shaped tip

- Easy insertion of tip – irrespective of lead tube diameter
- Lead cannot fall between barrel and lead tube
- Advantages:
  - No touching of lead
  - No dropping of lead
  - No breaking of lead

## Mars® micro carbon

250

- Mechanical pencil lead for use on paper and drawing card
- Easy "12-a-go" refilling for Mars micro and graphite 779
- Smooth-gliding lead
- Jet black lines
- Highly flexible – extremely break-resistant
- Easy to erase
- ISO colour coding
- Suitable for use with all mechanical pencils
- 4 line widths, up to 7 degrees

12 leads per tube

### 12-a-go

- The neck of the lead tube is simply inserted into the end of the mechanical pencil – all twelve leads can be filled into Mars micro or graphite 779 in one go
- Advantages:
  - No touching of lead
  - No dropping of lead
  - No breaking of lead

### ISO colour coding

- The identical colour coding of mechanical pencils, mechanical pencil leads and technical pens facilitates recognition of the different line widths

## Mars® micro color

254

- Coloured mechanical pencil lead also for use on matt drafting film and tracing paper
- Easy "12-a-go" refilling for Mars micro
- Suitable for use with all mechanical pencils
- Line width 0.5 mm, 3 colours

12 leads per tube

# STAEDTLER eraser blocks

With Mars plastic and rasoplast, STAEDTLER offers a range of erasers which not only satisfies the very highest demands but also sets new standards. The formula guarantees superb erasing performance at all times on a whole variety of materials such as paper, matt drafting film and OHP film – extremely clean and

practically residue-free results thanks to significantly less crumbling! What's more, not only does the cellophane wrap with practical tear strip offer protection against dirt, the slide sleeve ensures convenient handling too. Simply perfect – all the way down the line!

- Some erasers leave traces of graphite when erasing soft pencil degrees

## Eraser performance Mars plastic

- Mars plastic erasers ensure superb erasing performance at all times
- For practically residue-free erasing – precise and clean

## Crumbling

- The formula of Mars plastic results in significantly less crumbling
- The eraser waste twists itself up into long strands which can be easily removed

# The new STAEDTLER sharpeners

There are many dimensions to writing and drawing with blacklead and coloured pencils. Whether used for jotting down notes with, sketching, outlining or colouring – different applications require different degrees and lead diameters and that means different pencil sizes. All that's needed then is creativity and the right pencil sharpener. For writing purposes, a

cone which sharpens standard-sized pencils to a long, sharp point is ideal, thereby ensuring fine, accurate results. Colouring applications, on the other hand, demand a sharpener with a blunt cone which gives coloured pencils a shorter, broader point, able to withstand higher pressure and suitable for colouring in large areas with. When it comes to quality, the

new STAEDTLER sharpener range is most impressive. The three-point fixing of sharpener blades and extra-long pencil guiding slot to prevent wedging guarantee superb sharpener performance. All sharpener inserts are made out of die-cast zinc which guarantees stability, precision and an exceptionally long service life.

STAEDTLER sharpeners – to the point!

## karat® aquarell – variations in impressions

An effective play of light and shadow, transparency and colour, subtlety and vehemence can be created by both hobby and professional artists alike using the high-quality, water-soluble STAEDTLER karat aquarell watercolour pencils. They offer infinite creative potential – even making it possible to combine fine detail with large area washes. Their break-resistant leads in

60 brilliant, lightfast colours are now even softer and more colour-intensive and retain their vibrancy even when blended with water. Whether used for making quick sketches with when out-and-about or for doing more detailed work back home, STAEDTLER karat aquarell watercolour pencils can always be relied upon to bring your ideas to paper perfectly.

### Watercolour pencils

## Dry techniques

### Sketching

Creation of contours

### Hatching

Drawing of a series of parallel lines closely together – for special light and shadow effects

### Overlaying

Blending by overlaying of different colours

## Wet techniques

### Watercolouring

Washing of colours using a brush

### Dry-on-wet

Use of dry lead on wet paper – strokes remain visible

### Wet-on-wet

Use of wet lead on already wet paper – for smooth, soft transitions of colour

## Special techniques

### Reproduction

Creation of a print by pressing a piece of dry paper on top of a wet watercolour

### Scraping

Scattering of fine, scraped lead particles over a wet wash – for impressive effects

### Smudging and blotting

Reduction of colour density or creation of colour transitions using a dry or moist cloth

# karat® aquarell watercolour pencil

## ergo soft® – fun included

The high-quality STAEDTLER ergo soft range has been distinguished with the 'spiel gut' seal of approval and 'product of the year 2004' award. And not without good reason either, as the assortment possesses a number of advantageous features designed to offer users fatigue-free writing, drawing and colouring. The triangular shape – recommended by the

Technical University of Munich – guarantees natural ergonomics and the non-slip, ultra-soft surface ensures superb handling.

Additional comfort is offered by the permanent and water-soluble, break-resistant, easy-to-sharpen leads in 24 brilliant colours – fun galore whether for school, office or recreational use.

Watercolour pencils

Coloured pencils

Pencils

### Perfect ergonomics with innovative soft surface

- The pencil's triangular shape offers optimal writing comfort; its non-slip surface ensures a good grip and prevents fingers from slipping

### Unique STAEDTLER box

- Protection for coloured pencils
- Stand-up box
- Convenient handling
- Re-closable
- Easy to open
- Ideal for school, home and office use
- Multi-purpose
- Refillable
- Patented in Germany, Japan and the USA (US Pat 6,364,100 B1); patents pending in Europe

### Writing and drawing quality

- Soft leads
- Up to 24 brilliant, opaque colours
- Permanent and water-soluble

### Lead quality

- Break-resistant leads
- Easy to sharpen

### Pencil sizes

- Jumbo pencils and coloured pencils
- Standard pencils and coloured pencils
- Standard watercolour pencils
- All pencils in ergonomic triangular design

### The ergosoft range

STAEDTLER has combined outstanding manufacturing competence in the field of wood-cased pencils with state-of-the-art technology in order to enhance the haptics – for fatigue-free writing and drawing.

326 WP20

326 NKP40

## triplus® color

323

- Fibre-tip pen in ergonomic triangular shape
- See triplus range, page 40

340 WP12

## Jumbo colouring marker

340

- Ink contains food colouring
- Sturdy, pressure-resistant tip
- Ventilated cap in accordance with ISO 11540 and BS 7272-1/2
- Washes out of most textiles easily
- 12 brilliant colours
- Line width approx. 3 mm
- Conforms to EN 71

340 WP12

Set of 12 colours in plastic wallet

228 M10

## triplus® wax crayon

228

- Ergonomic triangular wax crayon
- Ideal for first writing and drawing exercises
- Fosters correct grip for fatigue-free drawing and colouring
- Especially suitable for scraping technique
- Can be blended using water and brush
- Highly break-resistant, paper-wrapped
- 10 vibrant, brilliant colours
- Crayon diameter 9 mm
- Conforms to EN 71

228 M10

Set of 10 colours and 1 scraper in tin

220 NC8

220 NC16

220 NC24

## Wax crayon

220

- Waterproof wax crayon
- Break-resistant, paper-wrapped
- 24 vibrant colours
- Crayon diameter approx. 8 mm
- Conforms to EN 71

220 NC8

220 NC16

220 NC24

Set of 8, 16 or 24 colours in cardboard box

## Poster colours

885

- Opaque poster paint in plastic pots
- Vibrant, lightfast colours
- Can be diluted with water
- Excellent opaque coverage
- Easy to blend
- Suitable for a variety of painting techniques
- 18 ml in plastic pot
- Conforms to EN 71

Set of 6 colours

885

## School compasses \*

- Precision compasses with obtuse-angled safety needle for first circle-drawing exercises at school
- Maximum circle Ø approx. 300 mm
- Length 124.2 mm

550 50

School compass with lead part and lead box in case with hinged lid

550 55

School compass with universal adapter\*\* in case with hinged lid

550 60

School compass with lead part, universal adapter\*\* and lead box in case with hinged lid

550 50

550 55

## School compasses with centre wheel \*

- Precision compasses with centre wheel and quick-setting mechanism
- Interchangeable lead part and needle
- Hinged lead and needle legs
- With shouldered/pointed needle
- Maximum circle Ø approx. 260 mm with extension bar approx. 395 mm
- Length 156 mm

550 01

School compass with universal adapter\*\* and lead box in case with hinged lid

550 02

School compass with extension bar, universal adapter\*\* and lead box in case with hinged lid

550 01

\* Available November 2005

\*\* For pens and pencils up to 11 mm diameter

## Precision for perfectionists and future visionaries

High precision and accurate results are of vital importance to anyone who uses a drawing board on a daily basis. STAEDTLER's professional equipment is designed to provide exactly that and to offer extensive support so that rooms can be planned right down to

the last millimetre and visions can be filled with life. The range also includes drafting instruments tailor-made to meet the demands of semi-professional users, career-beginners and school-goers.

# Mars® professional

With the Mars professional, STAEDTLER has come up with a real highlight for the world of writing and drawing. The Mars professional satisfies even the highest demands when it comes to technical drawing

and makes writing a real experience. Its unique tip and indelible ink are most impressive. Superb prize-winning design and technical finesse. Quality MADE IN GERMANY!

712

## Mars® professional

712

- Indelible pigment ink conforming to ISO 14145-2
- Water-based, fast-drying, acid-free black pigment ink
- Unique tip encased in solid metal sleeve
- Perfectly designed ink feed system
- Refill system including new tip
- 10 line widths
- The line widths 0.18 mm, 0.25 mm, 0.35 mm, 0.5 mm, 0.7 mm conform to ISO 128 and 3098
- Line width indication at base of barrel
- Suitable for use with templates (e.g. 572 FL)
- High-class aluminium finish
- Ergonomic grip zone with integrated roll-stop
- Safety cap with fine-pitch thread
- With shiny, chrome-plated metal clip

Single pack

700

## Mars® matic technical pen

700

- Standard-conforming use of technical pen with lettering guides

- Use of technical pen with compass

- Easy changing of drafting point

- For maximum precision
- With hard chrome-plated drafting tube
- No drying up of ink thanks to double sealing system in cap
- Steady ink flow thanks to ink collector system
- Triple line width colour indication according to ISO and DIN resp.
- For use on drafting and tracing paper and on matt drafting film
- Easy to refill from bottle or with cartridge
- 14 line widths

Single pack

750

## Mars® matic spare drafting point

750

- For technical pen Mars matic 700
- With hard chrome-plated drafting tube
- Easy replacement
- 14 line widths

Single pack

780 C

## Mars® technico

780 C

- Leadholder for drawing, sketching and writing
- See pencil range, page 61

661 A3

## Mars® drawing boards

- With parallel drafting arm with double-sided scale
- Convenient single-hand double locking mechanism for setting at any position on the rail
- Twin rail for especially smooth, even gliding of the ruler
- Colour indicator shows whether locked or unlocked
- Sheet clamping strips on both sides of the drawing board for fastening of paper – securely holds more than one sheet at a time
- Scale with needle hole for precise compass radius setting
- Made out of sturdy, break-resistant plastic
- With non-slip rubber feet
- In 2 sizes: A3 and A4

### 661 A3

### 661 A4

A4 drawing board

Single pack

661 A4

## Mars® drafting head

660 20

- For use with the drawing boards 661 A3 and A4
- Single-handed use
- Stop-and-go push-button for easy setting at desired angle and freewheeling
- Two transparent ruler arms with double-sided opposite-running scales
- Parallel guide lines serve as hatching aid
- Opposite-running protractor scales from 0° – 90° with additional marks at 7° and 42° for dimetric projection
- Automatic settings at 15° intervals
- Uninterrupted drawing of right angles possible

Single pack

660 20

## Mars® drawing board bags

- For safe transportation of drawing boards and drawings
- Water-repellent
- With removable cell phone case
- With handle and adjustable shoulder strap
- Made out of durable nylon
- In 2 sizes: for A3 and A4

# Perfection in precision

For the past 75 years already, the STAEDTLER brand has stood for top technological performance in the field of high-precision drafting instruments. STAEDTLER compasses enjoy a superb reputation the world over and today continue to remain indispensable tools on the drawing boards of professional users.

The STAEDTLER compass range is clearly structured:

- Professional for specialists
- Comfort for use in education and at the workplace
- Basic for primary school and hobby users

## Push-button mechanism

- Convenient quick setting using sturdy, push-button mechanism
- Easy to use thanks to large push-buttons

## Centre wheel

- Precise setting using centre wheel
- Prevents unintended setting adjustments

## Hinged legs

- For parallel leg positioning
- Facilitates exact drawing of particularly large radii

### Extension bar

- Enlarges the possible circle diameter by up to max. 235 mm
- Exact fit for needle leg

### Universal adapter

- For drawing precise circles with all common writing and drafting instruments
- Easy to use with all compasses with interchangeable lead part

### Adjustable leg and needle shoe

- For parallel positioning
- Facilitates exact drawing of large radii

### Telescopic extension bar

- Integrated in needle leg
- Enlarges the possible circle diameter by up to max. 110 mm

### Grip zones

- Ergonomic grip zones for optimal handling

### Safety needle

## All STAEDTLER compasses have the following standard features:

- Precision compasses conforming to ISO/DIN 12753-2
- Resilient surfaces thanks to sandblasting and nickel-plating of metal parts
- Plastic parts reinforced with glass-fibre to keep them distortion-free
- Non-slip grooved grips

- Interchangeable needles
- Break-resistant, sturdy, hang-sell plastic cases with transparent, hinged lids
- All compasses come equipped with a high-quality universal metal adapter<sup>(1)</sup> and spares box<sup>(2)</sup>

(exception Mars 556<sup>(1)</sup> and Mars 559<sup>(1)+(2)</sup>)

Mars 555

555 03

## Professional

The STAEDTLER Professional solid metal compass fully satisfies all the demanding requirements expected by professional users of a high-grade drafting instrument. The compass set also comprises high-quality accessories for perfect drafting results.

## Professional

### Mars 555

- High-quality solid metal compass
- With quick-setting push-button mechanism and centre wheel
- Hinged lead and needle legs
- Interchangeable lead part with shank  $\varnothing$  4 mm
- Interchangeable shouldered/pointed needle
- Max. circle  $\varnothing$  approx. 400 mm, with extension bar approx. 635 mm
- Length 170 mm

### 555 03

Compass, extension bar, technical pen adapter, universal adapter and spares box in high-quality plastic case with transparent lid

# Comfort

The range for advanced school-goers, apprentices and students. Whatever the schooling level, these products have the right features.
