Introducing FREEZE Page 9

The Global **Stapling Expert**

Isaberg Rapid AB is a Swedish company. It is active on a global market and sells its products in more than 140 countries. We have been a specialist company since 1936, offering complete ranges through three areas – OFFICE, TOOLS and OEM.

Our long experience and constant drive to make improvements enable us to quickly recognise and satisfy our customers' needs. Our position as a world leader is guaranteed through the continual development of new products and the improvement of existing products. Our market leadership is consolidated by the quality assurance derived through having our own manufacturing facilities in Sweden, China and France.

Making the right choice

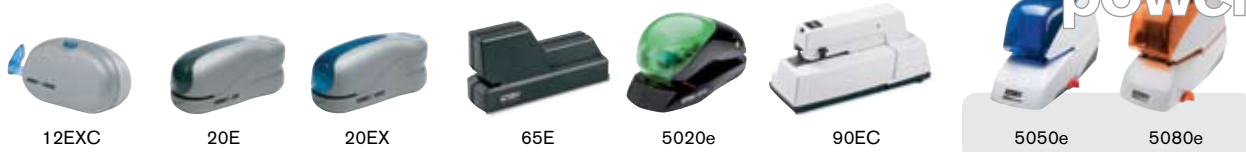

Whichever aspect you consider - cost, ease of use, or appearance - it is always important to make the right choice. In a professional situation, where people do a lot of stapling or hole punching, the more advanced models are the order of the day. But if you use a stapler or hole punch only occasionally, then the right choice will be the simpler models. Some people attach great importance to distinctive design, others only look to performance. With this in mind, we have divided our products into groups according to how they fulfil the needs and wants of different users. In short, we've made it easier to make the right choice.

Coordinated power™

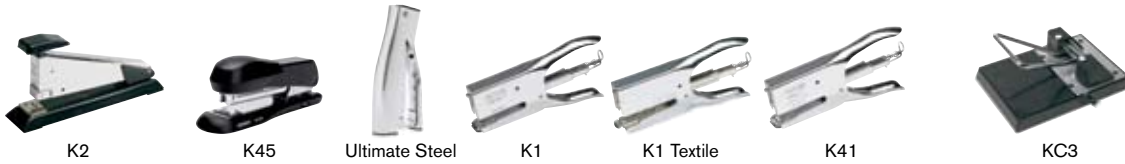

Coordinated power™

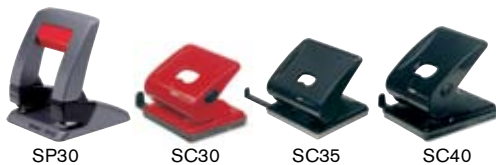

CLASSIC

Everyone looking for staplers, hole punches or stapling pliers that provide purity of line in combination with quality of the very highest level will find what they want in our Classic Collection. The world's best selling stapler, the K1, which first saw the light of day in 1942, exemplifies what the Classic Collection stands for - quality, tradition and durability.

SUPREME

Supreme is our exclusive collection for people who wish to make a statement through top-of-the-line office equipment in terms of design and technology. The Supreme Collection contains models with the latest technical innovations - SuperFlatClinch™ and Press Less™. You can read more about these innovations on page 4.

FASHION

Our wide Fashion range of staplers, hole punches and stapling pliers. They have a modern design, and their quality is very high in relation to their price. The performance, high quality and value-for-money of these products make them perfect for the home office.

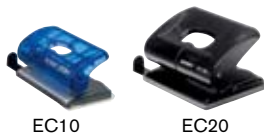

SOON

A young, cheeky range of see-me design staplers, hole punches and staple removers. The range is extremely popular among schoolkids of all ages.

ECONOMY

Attractive, simple, value-for-money staplers to have handy in the desk drawer or school satchel.

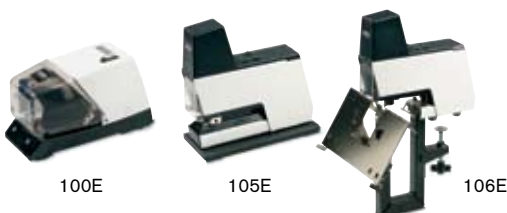

HEAVY DUTY

Our heavy-duty staplers, heavy-duty stapling pliers and heavy-duty hole punches have all been developed to provide extremely high capacity and the durability to withstand the wear and tear of demanding professional use. The HD210, the biggest stapler, can staple all of 210 sheets.

ELECTRIC

Our comprehensive range of electric staplers contains everything from our small, handy 20E desk stapler, to industrial staplers. Our latest innovation, the versatile, cassette loaded 5020e, does corner stapling, side stapling and brochure stapling.

The importance of comprehensive, **day-to-day commitment**

It is not easy to provide a relevant description of Isaberg Rapid's environmental work. Naturally, the company is accredited in accordance with ISO 14000, but there is much more going on, and at so many different levels - from the individual employee's choice of cycling instead of driving to work, to new research findings leading to the exclusion of hazardous substances from the manufacturing process. Because working actively with environmental issues is not about sitting back and being content with having invested in the world's most modern and environmentally friendly powder coating plant (which we have, of course, done). Instead, it's a matter of making daily improvements, as well as keeping up to speed on what is happening in environmental research and legislation.

RAPID ENVIRONMENT POLICY

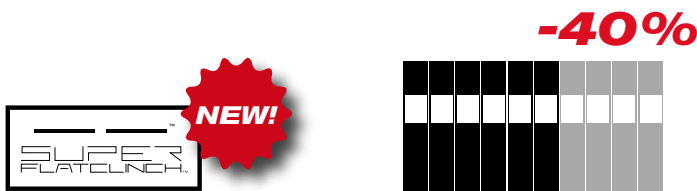

As a manufacturer of stapling products, Isaberg Rapid AB shall be among the leaders when it comes to environmental issues. We shall aim at an ecological, sustainable development and thereby take responsibility for future environmental issues along with the sound financial operations.

THIS INVOLVES:

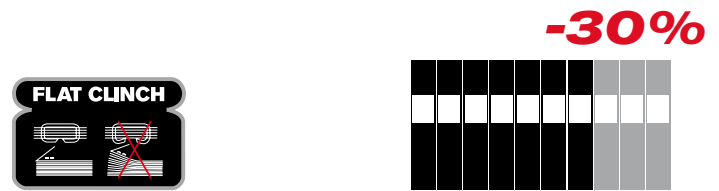

- Act according to relevant legislation, decrees, directions and other demands regarding the environment.
- Act to reduce and prevent pollution and to strive to attain continuous improvements.
- Aim at the efficient use of raw material and energy.
- Reduce the use of hazardous substances by eliminating or replacing these by less harmful ones.

Different ways of stapling and hole punching

Rapid has been in the business almost 70 years. During that time, our driving force has always been innovation. Rapid is the speciality company that sets new standards in stapling and hole punching - from the K1 stapler which, more than six decades after it first saw the light of day, is still the most sold stapler in the world, to the present-day Duax® which can staple from 2 to 170 sheets using the same size staple. Now, with our introduction of two new technologies - SuperFlatClinch™ and Press Less™, we are convinced that two new standards will reign on the market. Make sure you are among the first to get them.

OUR PATENTED SUPERFLATCLINCH™ TECHNOLOGY reduces the swell effect at stapled corners by all of 40%, which is more than any other manufacturer has achieved. So documents normally filling ten files can be stored in just six files when stapled using SuperFlatClinch™ technology. And because SuperFlatClinch™ is so effective, you can pile up stapled documents on your desk without them leaning, and then finally toppling over. Also, fully flattened staples will not scratch your desk. The SuperFlatClinch™ technology can be found in the new Supreme Collection and in Freeze.

RAPID HAS BEEN MAKING FLAT CLINCH staplers for many years. These traditional flat clinch staplers reduce swell at stapled corners by 30%. Rapid's classic 65E electric stapler, and the 5050e and 5080e electronic staplers, are typical examples of Rapid staplers that feature flat clinch technology.

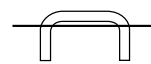

OUR INNOVATIVE PRESS LESS™ TECHNOLOGY means that you use far less force when stapling or hole punching. For example, you need 50% less force to deal with 30 sheets than with the standard method. This makes Press Less™ the most effective manual, effort-reducing technology on the market.

DUAX®. Staple 2–170 sheets using just one size staple. The Duax stapler cuts off any excess staple leg length to suit the thickness of the document.

PINNING. You can rotate the anvil on some of our staplers. Turn it one way and you staple in the normal way. Turn it the other way and you can pin the document together. Pin stapling - also called pinning or temporary stapling - is a handy alternative to using paper clips.

TACKNING. Several of our staplers can also be used as tackers. Just open them to 180° and you are all set to staple notices on the notice board, or even recover the board with a fresh piece of fabric.

SUPREME PUNCHES

Press Less™

NEW SUPREME

NEW!

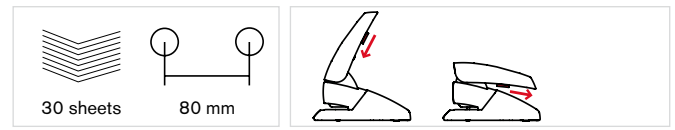

Press Less™

SP30 - Press Less™ hole punch

Why use more power than you need? Rapid SP30 is bringing innovations to the market. The innovative Press Less™ Technology reduces the power needed with more than 50% compared to traditional hole punches. SP30 has an elegant and functional design, the ergonomic handle and rubber feet enables perfect performance up to 30 sheets. The centre line up mark and paperguide for all paper sorts gives the precision you can expect from a best in class hole punch. Rapid SP30 is an all metal construction with a handle lock for easy storage. SP30 is design coordinated with all staplers within the new Supreme line up.

MASS MARKET

AS THE MASS MARKET SEGMENT continues to grow, and grow even faster than the total market of stationary products, Rapid now takes a leap forward to secure the position as one of the leading stapling and hole punching companies in the world. A whole new retailing concept is developed specifically for one-stop-shopping in super- and hypermarkets. The blister Emballage is adapted for quick purchase decisions and catches the consumers' eye with bargains and campaign like offers.

The line for this year constitutes of 26 products which all hold the guaranteed quality that Rapid products are known for, and these products are likewise guaranteed to grab attention in stores.
