The Highlands News-Sun will be relocating its office to 321 N. Ridgewood Drive and will open at 8 a.m. Monday, March 25.

Commissioners allow non-residents on committees

Tuck opposes move; Elwell: Gives 'flexibility'

By PHIL ATTINGER
STAFF WRITER

SEBRING — If you work, serve in, previously lived in or have any other vested interest in Highlands County, the County Commission wants your advice. That was the result of a 4-1 vote by the Board of County Commission to relax county rules and allow those who live outside the county to serve on

ALAYANDE

TUCK

advisory boards. Commissioner Arlene Tuck, who voted "a definite no," said

no other county does this and expressed vehement opposition to the idea.

She counts 102,000 people in Highlands County, from whom she said county advisory committees should be able to recruit new members when needed. She also suggested the county keep a database of those who can or could serve.

"So many people never served who are willing to serve," Tuck

said.

Commissioner Greg Harris suggested a former resident with strong ties to the community could serve very well on an advisory board. He cited Jerry Miller, a Lake Wales resident and government liaison for Duke Energy who previously lived in Highlands County and still has strong ties.

School Board seeks discussion on athletic fields

Firemen's Field/Sebring High fields in question

By MARC VALERO
STAFF WRITER

SEBRING — Renew or new? is the big question for The School Board of Highlands County as it looks to either continue its lease agreement for Firemen's Field or possibly build athletic fields and facilities for Sebring High School.

During her comments at the end of Tuesday's School Board meeting, School Board Member Jan Shoop said the agreement with the Sebring Firemen will expire in 15 years from August.

"We need to figure out what direction we would want to take," she said. "I would like to see a workshop on that ... we should plan; I am a planner. If we do want to build then we have to start putting away money and figure that out."

"Whatever direction the board wants to take, we need to make some decisions." At the March 5 School Board meeting, School Board Chairman Bill Brantley opposed the Sebring Firemen's proposal of putting AstroTurf on the football field, at a cost of \$60,000 per year for 15 years, which, with the annual base rental at \$35,000, would make the total annual lease price at \$95,000.

Rep. Steube reports to county

Cites partisanship as roadblock

By PHIL ATTINGER
STAFF WRITER

SEBRING — Congressman Greg Steube probably didn't surprise anyone when he said Washington, D.C., seems mired in partisan politics.

He said he was a little surprised when, immediately after being sworn in as representative for Florida's 17th Congressional District, the federal government shut down for almost two months.

"It's certainly interesting," Steube said, remarking that when he left D.C. last week, it was snowing and in the 30s. "So it's always good to come home."

He said the first real district work he was able to get done was last week, and requested any input.

Currently, Steube serves on three committees and six subcommittees, many of which are scheduled at the same time.

He serves on the Judiciary Committee on the following subcommittees:

Immigration and Citizenship
Crime, Terrorism and Homeland Security

Antitrust, Commercial and Administrative Law

He also serves on the Oversight Committee, which recently heard testimony from Michael Cohen, former attorney for President Donald Trump. There, Steube sits on the Subcommittee for Government Operations.

Finally, Steube sits on the Veterans Affairs Committee. He was active-duty military for five years with a tour in Iraq in 2006-2007.

"I have personally gone through the VA process. Actually I'm still going through the VA process," Steube said. "So I think it's good to have someone that's a vet, that's actually going through the VA process, and has dealt with that personally, to better understand how our VA process works."

COURTESY PHOTO

U.S. Representative Greg Steube, holding a water bottle, meets with, from left, Senator Marco Rubio, Senator Rick Scott, Senator Marco Rubio and his fellow freshman Congressional colleagues from Florida to discuss priorities for Florida.

On that committee, he sits on the Subcommittee for Disability Assistance and Memorial Affairs and the Subcommittee for Health, which deals with all the VA hospital and clinic facilities.

"I think in this Congress, that is one area that there can be some bipartisan work to get done," Steube said.

He's filed two bills. One would allow those exposed to radiation on a Pacific atoll in World War II to be compensated for their injuries. Another would remove the fee on veteran group events in D.C.

Steube also said he's working on making the Choice Program, which allows veterans to receive care from a community provider through the Department of Veterans Affairs, truly a "choice" among providers.

Overall, he said, Congress is very partisan. As soon as something passes the House, the Senate president holds a press conference to say they will not take those bills up.

Among these fights, he said, are border wall funding, voting rights and gun control bills, on which the votes are strictly along party lines.

"Unfortunately, that's the environment that we're in," Steube said.

Another example, he said, was how the Judiciary Committee has

PHIL ATTINGER/STAFF

Congressman Greg Steube reports to the Highlands County Board of County Commission on Tuesday that politics in Washington, D.C., have become mired in partisanship. As a minority in the House of Representatives, he said he's looking for bipartisan bills to sponsor, especially to help veterans, an issue close to his heart as a combat veteran himself.

subpoenaed 81 people in search of evidence of obstruction of justice by

CHIP summary looks at race and poverty

By KIM LEATHERMAN
STAFF WRITER

SEBRING — The Florida Department of Health released the Community Health Improvement Plan for 2018-2021. The report is compiled of information from 286 residents of Highlands County

residents that answered health-related surveys in the fall of 2015.

The CHIP summary gives health care policy makers a gauge as to the public's perception of their access to health care. The surveys asked the participant to list their main health care concerns. They were also

asked for input on creating a healthier Highlands.

"The Florida Department of Health in Highlands County is committed to working with our community partners to serve the needs of all people in Highlands County," said Mary Kay Burns, health officer. "We value their contribution

to the progress we have made together toward building a healthier Highlands."

As previously reported, the majority of those who took the survey were concerned about getting any type of cancer. They felt there should be a

Mickey Gilley in concert tonight

By **JIM ERVIN**
CORRESPONDENT

LAKE PLACID — The “Urban Cowboy” himself, Mickey Gilley, is coming to a theater near you. Literally. Tonight, country legend Mickey Gilley and his seven-piece Urban Cowboy Band will perform at The Genesis Center in Lake Placid. Showtime is 7 p.m.

Although well established by then, Gilley became a household name in 1980 with the release of the smash hit movie, “Urban Cowboy.” The movie, starring John Travolta and Debra Winger, was filmed, to a large extent, at Gilley’s Pasadena, Texas bar, “Gilley’s,” which itself became an iconic location thanks to the film.

The movie, along with its hugely popular soundtrack became a cultural brush fire. The popularity of country music, as well as Gilley himself, soared.

“I think probably the thing that I enjoy more than anything else is the camaraderie I have with the audience,” says Gilley. “I think it’s really awesome when you consider the fact that at the present time I’m 83 years old. I’ve had a great career as far as the entertainment world is concerned.”

Cousin to Jerry Lee Lewis and evangelist Jimmy Swaggart,

COURTESY PHOTO

Award-winning country artist Mickey Gilley will be in concert tonight at the Genesis Center.

Mickey Leroy Gilley was born in Natchez, Mississippi on March 9, 1936 and raised not far from there in Ferriday, Louisiana. Later, in the 1950’s, Gilley would relocate to Houston.

Although Gilley released his first record, “Down The Line,” in 1967 on Paula Records, it wasn’t until 1974 that the singer

began to make some noise. This was the year that the country artist would top the charts for the first time with the hit single “Room Full Of Roses.”

Gilley’s career took off in the mid-1970’s and ‘80s with hit after hit. With songs such as “That’s All That Matters,” “Don’t The Girls All Get Prettier At

Closing Time” and the smash remake of “Stand By Me,” the performer was at the top of his field.

At the 12th Annual Academy of Country Music Awards in 1977, Gilley cleaned house. He received the award for Song Of The Year for “Don’t The Girls All Get Prettier At Closing Time,” as well as Album Of The Year for “Gilley’s Smokin’.” He capped off the night by winning Top Male Vocalist Of The Year and the coveted Entertainer Of The Year.

The numbers for this country giant are staggering. Gilley has placed 42 singles in the top 40 on the US Country charts. He has had 17 No. 1 hits. That number includes six in a row in the early 1980’s. Over 30 top ten hits and six Academy of Country Music Awards.

Gilley always tries to work in all 17 of his chart-toppers into the shows, as well as some of his work from “Urban Cowboy.”

“I’m going to do my best to do as many of the 17 No. 1 songs as I possibly can,” said Gilley. “It depends on the time limits that they give me on the show. The show ends with a segment from the film (“Urban Cowboy”) and music from the soundtrack. I think it’s an interesting and refreshing part of the performance that I think

the people will enjoy.”

Gilley has a star on The Hollywood Walk Of Fame, has his own theater in Branson, Missouri, his own brand of beer and a golf tournament that bears his name.

He was awarded the Key to the City of Winchester, Virginia in 2017 by the Hon. David Smith at the Shenandoah Conservatory of Music’s Ohrstrom-Bryant Theatre at Bonnie Blue’s Roadhouse Classic Concert.

Additionally, Gilley is a licensed pilot, holding an instrument rating with commercial pilot privileges for multi-engine airplanes, as well as private pilot privileges for single engine aircraft.

Gilley returned to the studio in 2017 and released “Kickin’ It Down The Road.”

In 2018, Gilley teamed up with a longtime friend, Troy Payne, to record “Two Old Cats,” a CD containing 13 duets. The collection is available worldwide as download or CD format.

For tickets or more information, call 863-494-9362 or visit www.sunevents.com.

You may purchase tickets at the venue from 10 a.m. to noon today.

The Genesis Center is at 218 E. Belleview St.

AP man charged with obstructing justice through intimidation

By **MARC VALERO**
STAFF WRITER

AVON PARK — A 25-year-old Avon Park man has been charged in using physical violence to intimidate another man to not testify in the proceedings of a first-degree felony case.

Jamaree Shavon Nelson was charged Tuesday, after his arrest, with wearing a hood or mask on the street, obstructing justice/tampering in first-degree felony proceeding and battery causing bodily harm.

The victim reported that while he was at the GeoDev laundry mat on West Walnut Street on Sunday he was attacked by Nelson, according to a Highlands County Sheriff’s Office report.

While charging his

NELSON

phone, the victim said he noticed a shadow approaching him and when he turned around a black male wearing

a mask was charging toward him, the report shows. The subject began striking him in the area of his head and face with a closed fist and slammed him to the ground multiple times.

The victim recognized the voice as Nelson and during the attack was able to remove the mask and see that it was in fact Nelson, according to the report.

The HCSO Tactical Anti-Crime Team located Nelson on Tuesday at 200

N. Anoka Ave., Avon Park where he was arrested.

Nelson was out on bail on previous drug charges that included: selling methamphetamine within 1,000 feet of a church or schools, trafficking in methamphetamine, drug equipment possession, manufacture or delivery, using a two-way communication device to facilitate a felony.

On another case, which shows charges on Wednesday, Nelson was charged with possession of a controlled substance without a prescription, possession of not more than 20 grams of marijuana and drug equipment possession, manufacture or delivery.

He is being held without bond in the Highlands County Jail.

Woman charged with meth possession

By **PHIL ATTINGER**
STAFF WRITER

SEBRING — A traffic stop Tuesday night on Hammock Road resulted in a warning for bad equipment, a consensual search of the car, and methamphetamine charges.

Natalie Weires, 40, of Sebring has been charged with possession of both methamphetamine and drug paraphernalia. As of Wednesday afternoon, she was in the Highlands County Jail in lieu of \$4,000 bond.

The traffic stop took place at 10 p.m. at the intersection of Hammock Road and Lakewood Road. A Highlands

WEIRES

County Sheriff’s deputy had stopped her 2013 Ford Explorer for an equipment violation, and had

written her a warning.

The deputy then asked her if she would consent to a search of the vehicle, which she did, according to arrest reports.

The deputy took a purse from the front seat and brought it to where Weires was standing, in front of the patrol car.

He asked if there was anything in there that didn’t belong to her and, reports said, she told

him there shouldn’t be. A folded dollar bill in her wallet allegedly had a white crystal-like substance inside it, reports said. The deputy folded the bill back up and then read Miranda rights to Weires.

When asked about the crystal-like substance in the dollar bill, she said she was framed, according to reports.

The crystal field-tested positive for methamphetamine, reports said, and weighed a tenth of a gram.

OBITUARIES

Lillian B. Hendricks

Lillian Bohall Hendricks passed away March 18, 2019. She was born Sept. 24, 1945 to Alva L. and Pearl Fulford Bohall in

Bloomington, Indiana. Lillian graduated from Bloomington High School class of 1963 and attended Indiana University.

Lillian and her husband owned and operated Hendricks Corner Grocery for 27 years. She is preceded in death by her husband of 51 years, Robert D. Hendricks; her parents; four brothers and five sisters. Lillian leaves behind her much-loved son, Robert "Bobby" D. Hendricks II; grandchildren, Robert D. Hendricks III and Rachel Lynn Hendricks; brother, Charles D. Bohall; former daughter-in-law

Rosa Duran and many nieces and nephews. A celebration of life will be held at 2 p.m. Saturday, March 23, 2019 at VFW Post 9853. Please attend to celebrate a long, happy and loving life. Arrangements entrusted to Stephenson-Nelson Funeral Home, 111 E. Circle St., Avon Park, FL 33825. 863-453-3101. Online condolences may be left at stephensonnelsonfh.com.

Barbara L. Harden-Ward

Barbara L. Harden-Ward, age 70, of Avon Park, FL passed away on Tuesday, March 19, 2019. Barbara was born on Sept. 1, 1948 in Avon Park, Florida to Harvey and Louise (Pate) Harden. Barbara worked for the state of Florida as a corrections officer, was a member of Church of Christ and has been a lifelong resident of Avon

Park, Florida. She is survived by her husband Richard "Bud" Ward of Avon Park, Florida; daughter, Lanita Cutts; sons, William Anderson and Stephen Harden; brother, Larry (Velma) Bond; four grandchildren and four great-grandchildren. Barbara was preceded in death by her parents, three sisters and four brothers. A memorial service will be held at 11 a.m. Tuesday, March 26, 2019

at Stephenson Nelson Funeral Home with Rev. Jon Beck officiating. The family will receive friends beginning at 10 a.m. Memorial contributions may be made in Barbara's name to Good Shepherd Hospice, 1110 Hammock Road, Sebring, FL 33870. Arrangements entrusted to Stephenson-Nelson Funeral Home, 111 E. Circle St., Avon Park, FL 33825. Online condolences may be left at www.stephensonnelsonfh.com

STEUBE

FROM PAGE 1A

the Trump organization. "So I guess we've gone from Russia collusion to obstruction, and that's, unfortunately, what our committees are spending our time on," Steube said. He also stated that the citizenship question for the 2020 U.S. Census was one of the matters that took up five to six hours of the Oversight Committee. Steube said the question has always been on the census, but committee members asked the Secretary of Commerce Wilbur Ross why he wanted it instated. The Center for Immigration Studies, at cis.org, states that the question has been asked on and off through the census' history. The last time it was a universal mandatory question was 1950, the Center states. It wasn't asked in 1960, although the birthplace

has been asked. The Center states citizenship and birthplace were on the 1970, 1980, 1990 and 2000 Census forms, but was not mandatory. Both were taken off for 2010. The 2020 proposal is to reinstate a citizenship question, not a birthplace question. Steube said he would like to spend committee time on other matters, but is outvoted as a member of the minority party in the House. Instead, he's focusing on bipartisan issues as much as he can. When he asked what he can do for Highlands County, Commissioner Don Elwell said, many of Highlands' concerns would be mirrored throughout Steube's nine-county district. With a population of 15-20 percent veterans, whatever he can do for them will help Highlands County, Elwell said. On budget, Elwell said he would like to see Congress pass one

— close to balanced. "Because we all see the debt. We see the 22-trillion plus (dollars) that we're looking at now," Elwell said. "That is a large ship to turn, and certainly not one that can be turned in a few years, much less a decade or so." Beginning the process of balancing it, he said, would be important. Elwell also said much of the economy, being based on agriculture, would need Steube's advocacy, since many in D.C. don't understand it as intimately. If there is extra money available, Elwell said, Highlands County needs it for infrastructure, including U.S. 27, connection routes and evacuation routes. "And even just monies that can be used to four-lane roads that are just two lane(s), that are causing us to lose a lot of our citizens," Elwell said, pausing, "because it's two-lane road." Elwell said

infrastructure will also help attract new business, not just with roads but also broadband and other communications technology. Steube said the president's budget would address reducing that deficit over the next 15 years. He said Democrats spoke against it immediately. A budget did pass, but Steube said he voted against it for the reasons Elwell mentioned: "It was another \$390 billion that did nothing to address the deficit." He knows it will have to be dealt with again in the fall. He also said infrastructure is key for the whole district. He hopes other members of the Florida delegation can help. In closing, Commissioner Greg Harris asked Steube to keep an eye out for the county's Hurricane Irma reimbursement check from the Federal Emergency Management Agency.

Man charged with battery on elder

By PHIL ATTINGER

LUDWIG

OKEECHOBEE — An argument on State Road 70 allegedly turned violent when a man allegedly pulled a 71-year-old woman out of a car against her will. Matthew John Ludwig, 42, of Lake Placid has since been charged with battery on a person 65 years or older, a third-degree felony. He is being held in the Highlands County Jail without bond. Arrest reports state that at 12:45 p.m.

Tuesday, he and the victim allegedly had a dispute at SR 70 and County Road 721. While en route, the deputy learned they had driven to "the Circle K," the nearest of which is located on U.S. 27 at SR 70. When the deputy arrived, the victim reported that she and Ludwig were having an argument about money.

He was driving and she was in the back seat, reports said. Reports said Ludwig became upset, abruptly stopped the vehicle, got out, opened the left rear door and pulled the woman out by her arms. A witness in the front passenger seat corroborated that story, reports said. When questioned, Ludwig admitted to getting upset and stopping the car, but said the argument never turned physical and denied ever grabbing the older woman.

K-9 alerts deputies to drugs

By KIM LEATHERMAN

LYNCH

SEBRING — Zachary Otto Lynch, 23, of Sebring may not agree that dogs are man's best friend after a K-9 deputy sniffed out the marijuana in his vehicle and alerted deputies on Saturday night. Highlands County Sheriff's Office deputies arrested Lynch and he faces a felony possession of marijuana, over 20 grams and a misdemeanor count of drug equipment possession. Deputies pulled Lynch over for a traffic stop on Sun 'N Lake Boulevard close to 11 p.m. The deputy wrote in his arrest report that Lynch appeared to be very nervous. He asked Lynch if there was anything illegal in the van. He hesitated before saying no, the report said. As the arresting deputy

are man's best friend after a K-9 deputy sniffed out the marijuana in his vehicle and alerted deputies on Saturday night. Highlands County Sheriff's Office deputies arrested Lynch and he faces a felony possession of marijuana, over 20 grams and a misdemeanor count of drug equipment possession. Deputies pulled Lynch over for a traffic stop on Sun 'N Lake Boulevard close to 11 p.m. The deputy wrote in his arrest report that Lynch appeared to be very nervous. He asked Lynch if there was anything illegal in the van. He hesitated before saying no, the report said. As the arresting deputy

was speaking with Lynch, K-9 Kyo Ren was performing a free air sniff around the van's exterior. The K-9 alerted the other deputies to show there could be drugs on board. The arresting deputy searched the van and found two baggies with "a green leafy substance" on the floorboard. He also found two partially smoked marijuana cigarettes, called blunts, in the ashtray. In a cup, the deputy found an aluminum pipe with burnt cannabis within. The field test on all of the samples showed positive for marijuana. The total weight of the marijuana was over 27 grams, making the charges a felony. Deputies took photos of the evidence.

ANOTHER VIEW

Political will from all is needed

The sharp rise in the number of unauthorized migrants apprehended at the U.S.-Mexico border in February seemed to confirm one of President Trump's loudest claims — that the nation faces a full-blown migrant crisis that requires a border wall. More than 76,000 unauthorized migrants crossed the border in February, a 31 percent jump from January.

But what's really happening at the southern border undercuts the president's central claims. Last month, when he declared a national emergency to build a wall, he said "(W)e have an invasion of drugs, invasion of gangs, invasion of people, and it's unacceptable." Yet the number of people apprehended is still below historical highs, and 40,325 of them are parents and children. And the people entering are overwhelmingly not criminals.

The migrants mostly come from El Salvador, Guatemala, and Honduras — the area known as the Northern Triangle. They're coming to seek refuge from brutal socioeconomic forces in Central America.

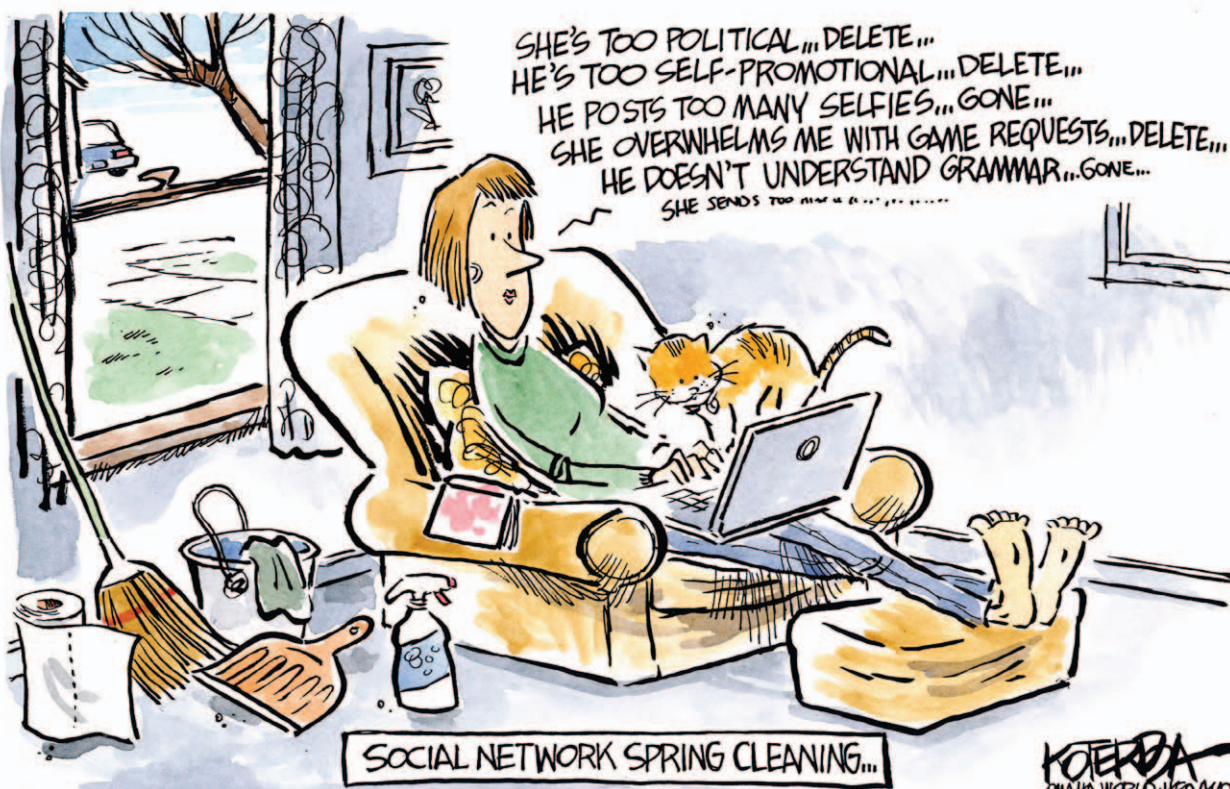

... While homicide rates have fallen in El Salvador and Honduras in recent years, they still had the world's highest and second-highest rates in 2016. Guatemala ranked 10th. In addition to facing the pervasive threat of violence, people in these countries must live under governments that have largely failed to provide fundamental rights and protections for their citizens. There's a high incidence of gender-based violence, extortion by organized crime, and gang recruitment, as well as hate crimes committed against the region's gay and lesbian population. Impunity is commonplace, due to weakened institutions deeply infected by corruption. For instance, about 90 percent of crimes in Guatemala go unpunished, with similar rates in Honduras and El Salvador.

Helping those countries grow economically and providing opportunity and security to their residents would help stem the tide of migrants. But U.S. aid to Central America has hovered between only \$500 million and \$1 billion in recent years. Trump has tried to slash that funding, but Congress has largely rejected his attempts.

How aid money is spent is also critical. The administration has focused on security, with funds going mostly to rule-of-law efforts and to fight organized crime and drug trafficking. In contrast, the Obama administration had a broader approach. "They recognized that there were other factors driving people to migrate — poverty, high rates of inequality, lack of economic opportunity, and systemic corruption," said Adriana Beltran, director of citizen security at the Washington Office on Latin America, a human rights advocacy group. "They were also financing programs related to violence prevention, workforce development, anti-corruption initiatives." There's evidence those programs were working.

The flow of individuals from Central America to the United States will continue to rise unless there's a clear shift in the American response to the "crisis at the border." Walls don't dissuade people who are suffering through a humanitarian disaster. Rather, a solution requires political will, and not just from the United States but from the Guatemalan, Salvadoran, and Honduran governments.

An editorial from the Chicago Tribune.

Why the government should subsidize the liberal media

GUEST COLUMN
Tim Dowling

As I read Joyce Terhaar's Op-Ed piece last Friday, on dying newspapers, I was overcome with disbelief. She talked about newspapers losing revenue to tech giants causing almost "1,800 newspapers [to] close in the last 15 years."

The tech giants aren't causing the demise of the mainstream newspapers. Mainstream newspapers have been committing suicide for the last 20 years. What business could possibly survive by alienating half of its customers? What would happen to Apple's customers if they advertised the new iPhone by questioning the president's honesty with the headline "He said, he said" — Who can you trust in Cohen-Trump saga? Newspapers are no different than any other business. If you anger half of your customer base, eventually you will go out of business.

Newspapers have been allowing their journalists to stray from the facts and offer their own conclusions and biases. Have you noticed that you can tell the political affiliation

of a journalist now just by reading one of their stories? I'm betting Jill Colvin and Zeke Miller are liberals. Jill and Zeke of AP, recently wrote a story headlined "Trump Issues First Veto After Rebuke of Border Order". In it, these two "journalists" write as their opening sentence: "Unbowed by a congressional rebuke, President Donald Trump issued the first veto of his presidency on Friday in a demonstration that he is not through fighting for his signature campaign promise, which stands largely unfulfilled 18 months before voters decide whether to grant him another term."

How do they know he was unbowed? How do they know that it was a demonstration that he is not through fighting? Was the wall really his "signature campaign promise"? I'll decide that. Also, I'll decide if it is largely unfulfilled. I don't need or want their opinion on it.

Journalistically, that entire sentence could and should have been written

without the innuendos as: President Donald Trump issued the first veto of his presidency on Friday.

Their second sentence in the story: "Trump rejected an effort by Congress to block the emergency declaration he'd used to circumvent lawmakers as he tried to shake loose funds for his long-promised wall along the U.S.-Mexico border." I'll decide if he circumvented lawmakers. If the wall was his "signature campaign promise" and he won the election because of this promise why is it "his" wall? Wouldn't it be more accurate to say it's the voter's wall? This was the first two sentences in a story filled with these kinds of disrespectful, biased, opinionated comments.

Newspapers are struggling because they are filled with garbage like the story above. Virtually every story from AP regarding Trump is slanted to the left. Reuters is not quite as bad. Let's break it down factually. Trump was elected president. Therefore, most voters voted for Trump. Therefore if you

consistently alienate everyone who voted for Trump you are driving off most voters (and a lot of non-voters). If newspapers want to increase readership, they need to demand and expect unbiased, clear and honest reporting from their journalists. Readers (or TV watchers) should not be able to determine a journalist's political affiliation from a news story.

In her article, Terhaar says we can help by subscribing to a local newspaper. Then she talks about subsidies from Google and Facebook. Then she hints about subsidies from the government. So really, the bottom line for Joyce Terhaar is that in order for newspapers to be able to continue to slam conservatives, they need to be subsidized by everyone, including the government. I think Joyce may be a liberal.

YOUR VIEW

Without exception, framers were Christians

In a single god who set the universe on its course and then stepped back to watch, deists believe their deity is the same God of Judeo-Christian tradition, the Constitution refers to the year the Convention created the document as "The year of our lord One Thousand Seven Hundred and Eighty Seven." The bible played a unique role in helping create the U.S. Constitution. It's predicated on the Declaration of Independence — our national birth certificate, which mentions God four times. There is a great deal of evidence that America's Founders were influenced by Christian ideas.

Virtually all the Founders were devout, orthodox Christians who consciously drew from their religious convictions

to answer most political questions. Many claim the Founders were deists, there is virtually no evidence that more than a hand full of civic leaders in the founding era — notably Benjamin Franklin, Ethan Allen, Thomas Jefferson, John Adams — embraced anything approximating this view.

Christianity is not mentioned in the Constitution or Bill of Rights: Founders of the American Republic were influenced by Christian ideas in significant ways. There are many examples. I will mention 3:

1. Founders firmly believed God ordained moral standards.
2. Founders believed humans were created in the imago dei-the image of God.
3. Founders concluded that religious liberty should be extensively protected.

We say yes! It was most

certainly created in the image of God and the Bible.

Facts are there to prove such.

John Larsen
Sebring

How compassion works

This is how compassion for victims works. From The Hill: "New Zealand's largest gun show has been canceled just days after mass shootings at two mosques resulted in at least 50 deaths."

Organizers for the gun show said they have canceled the event out of respect for victims of the shootings in Christchurch, according to The Associated Press. Organizers also cited "elevated security risks" for the cancellation.

The annual show attracts thousands of attendees to view historical reenactments and

promote the country's military history.

"We regret the inconvenience caused to all involved with the running of the show, The Military vehicle owners, memorabilia collectors and exhibitors, defence force members, community groups, vendors, and support organisations," organizers wrote in a Facebook post.

A date for a possible rescheduling of the event was not listed on the group's Facebook page.

New Zealand is mourning following last week's mass shooting, with Prime Minister Jacinda Ardern promising to tighten the country's gun laws.

Several vigils for victims took place over the weekend, and mosques had heightened security in the aftermath of the massacre."

JOIN THE CONVERSATION

Letters are welcome on virtually any subject, but we do have some rules. We will not accept any Letters to the Editor that mention a business in a negative tone, as they have no means to defend themselves. Please keep Letters to the Editor to less than 250 words. Letters will be edited to length as well as for grammar and spelling. All letters must be signed with full name — not initials. An address and telephone number must be included. The phone number and address are not for publication, but must be provided. In the case of letters that are emailed, the same rules apply.

Due to the number of letters received, we are able to run only four letters per person per month.

The Letters to the Editor section is designed as a public forum for community discourse, and the opinions and statements made in letters are solely those of the individual writers. The newspaper takes no responsibility for the content of these letters.

Please send or bring correspondence to the Highlands News-Sun, Letters to the Editor, 315 US 27 North Sebring, FL 33870, or fax to 863-385-1954. Readers may also email Letters to the Editor to editor@newssun.com.

POLICY

FROM PAGE 1A

"If you do business in Highlands County, you have interest here," Commission Vice Chair Ron Handley said, agreeing with Harris.

Handley's main concern with the rules for advisory board members was that all members would have to stay off a committee for a year after serving two terms.

"I'm not OK with that," Handley said.

Commission Chair Jim Brooks said some committees have an exemption from the one-year break, such as the Planning and Zoning Board, on which he once served.

"This whole thing is for us to have flexibility," Commissioner Don Elwell said.

He said he liked the idea of allowing someone from outside the county to serve if no "elector" — someone registered to vote in the county — is available.

Elwell also liked waiving the one-year removal if a committee member has served two terms, no one has applied, and the sitting member wants to "re-up."

"This gives us the options to make exceptions in those rare occasions," Elwell said.

County Attorney Joy Carmichael, after a sidebar discussion with Assistant County Administrator Tasha Morgan, said there were guidelines that the local government could allow out-of-county residents to serve if restrictions were not otherwise set by state law or local ordinance.

"I still disagree with you," Tuck said.

Citing a conversation with officials with the Florida Small County Coalition, Tuck said no county in Florida has someone on an advisory

board from another county.

"(There are) people all over this county who are willing to serve," Tuck said. "No one asks them."

Brooks said they can go to the county website to find boards on which to serve. Likewise, Elwell said people who really want to serve will seek out a particular board.

Brooks said any commissioner will have a chance to vote for or against a particular candidate. They all have to be approved by the County Commission.

Tuck said she could see she would be the one dissenting vote.

Aisha Alayande, executive director of Drug Free Highlands, said she started at Drug Free Highlands as a volunteer in 2008 and still drives down at 6 a.m. for Children's Services Council meetings.

She sits on the Fetal Mortality Review Committee for Polk, Highlands and Hardee Counties, and started a doula (midwife) project to assist with birth outcomes in all three counties.

"I'm here a lot more than I am in the county in which I reside," the Lake Wales resident said. "I have a vested interest in this community, because I have friends here who I now consider family."

She also said she spends more time in each municipality in Highlands County than she spends in Polk County, as a whole, "because I care about what is happening here," whether in the areas of health, wellness or prosperity.

She said she volunteered for many organizations while living in Avon Park — the Avon Park Recreation Center, the Avon Park and Sebring Libraries and with Healthy Start.

Handley started to say she was a perfect example of the type of person they need.

"And I'm sure you're a great volunteer, but you know what, we have 102,000 people in Highlands County," Tuck said. "You don't think we could find one other person that is as committed as you are?"

"Well, I would like to speak to that," Alayande said. "When we actually publicly notice that there are vacancies, we do not have many of those 102,000 residents to fill those positions."

"And you know why?" Tuck said, "Because most of the people will say, 'Well they won't pick me. They don't want me.' You've got to get out and talk to those people."

"I don't think that's true," Alayande said. "As a member of this community, you know, as an employee of Drug Free Highlands, I was one of five parents that would attend DSAC (District School Advisory Committee) meetings at Park Elementary School, out of how many? — 500 students? And I have seven children, so I made the time to attend those meetings with four other parents. So I don't think it's the lack of communication, because it's there. It's on social media. It's in the newspaper. It's on the website. I sought out these positions because I have a vested interest in what happens in these committees."

Brooks thanked Alayande and agreed with Handley that she presented an example of the kind of person they were trying to attract.

Brooks also pointed out Elwell sits on the Hospital District Board, which has had an open seat for up to six months.

"She is, pardon the expression, you are the poster child for my disjuncted motion," Elwell said to Alayande, poking fun at his rambling motion to approve the policy changes.

holding that over our head. Whether we have to look at a new facility or long-term lease if they are really looking out for the kids, that is my main priority."

If the Firemen are looking out for the kids, they should be willing to do a long-term lease instead of trying to renegotiate it every 15 years, he said.

School Board Vice Chair Donna Howerton said the School Board should have a workshop with the Sebring Firemen about the future of their lease

agreement.

There has been a good partnership between the school district and the Firemen to do what is best for the youth and sports, along with Sebring High School's use of the facilities at Firemen's Field, she said.

Swaine said Wednesday the Firemen don't have any specific plans for 15 years from now. He is sure there will be further discussions between now and then.

A School Board workshop date on the issue has not been set.

FIELDS

FROM PAGE 1A

football stadium and baseball field at Firemen's Field.

Sebring Firemen Inc. President Bob Swaine said if the AstroTurf proposal was not approved by the School Board, he could not guarantee there will be another lease extension past the 15 years at a \$35,000 per year rate.

Brantley said Wednesday, "I am not a fan of them [Firemen]"

HEALTH

FROM PAGE 1A

lower cost health insurance to improve health and the most difficult health services to access were dental.

CHIP looked at the possible growth, ages and the gender statistics in the county for future health care planning. The county is made up of 48.7 percent of males and 51.3 percent females.

The surveys addressed race and socioeconomic statistics as compared to the rest of the state of Florida. Ethnicity and race are separate in this summary. Participants were offered the following categories for ethnicity:

Hispanic or Non-Hispanic; people in both of those groups can identify as white, black or other non-white.

The sampled members reported being 81 percent white.

Hispanic or Latino makes up 17.4 percent of the county.

African Americans make up 9.4 percent of the county.

The county's socioeconomic indicators were below the state average in all six categories. "The unemployment rate increased from 4.8 percent in 2000 to 6.6 percent in 2016; it is, however, slightly higher than the state rate of 4.9 percent," the summary states. Highlands County also has a higher incidence of people living under the poverty line than the state average. High school and college indicators are below Florida state levels.

The total population living under poverty line is 19.1 percent.

Those children 5 to 17 in families who live under the poverty line are at 30.3 percent.

Civilian labor unemployment was at

6.6 percent.

Average household income was reported at \$35,865.

Percentage of high school graduates or higher is 83.3 percent.

Those who earned a bachelor's degree or higher is 16.5 percent.

Courageous Kid baseball game on tap

Plenty of activities in the Heartland

Highlands News-Sun Sports Staff

The Sebring High School baseball teams are hosting their annual Heartland Courageous Kid baseball game starting at 9 a.m. Saturday at Firemen's Field.

This year's courageous kid is Isaac Juliano, who will throw out the first pitch. Previous year's Courageous Kids will be honored during the event.

One hundred percent of the gate proceeds will be donated to benefit the Heartland Courageous Kid, as well as profits from the Courageous

Cupcakes tent located next to the concession stand.

Tangible items will be collected for the Champions for Children Foundation, such as gift cards for gas, groceries, food and diapers of any size.

Less Work, More Play Tennis

A tennis program designed to help kids of all ages to learn the sport of tennis in a fun environment. It introduces the families to the United States Tennis Association (USTA), where they learn how kids can compete all

Pickleball league crowns champs

Players compete in Shootouts

By NEIL SIMPSON

SPECIAL TO HIGHLANDS NEWS-SUN

The South Central Florida Pickleball League championship "shootouts" were held at Del Webb Orlando on Sunday and Monday with Sun n Lake's Best 8 team and Tanglewood's Ladies team each emerging as 2019 champions.

Best 8 Division

The Best 8 shootout held Sunday saw seven teams compete for supremacy in a double elimination format. Each community fielded a team comprised of four pairings ranked A, B, C and D. Pairings only competed against similarly ranked duos. Sun n Lake led the league during regular season and had a bye in round one in which second place Tanglewood played seventh place River Ranch, third place Del Webb faced off against sixth place Frostproof while the fourth and fifth place teams Lake Ashton and Camp Inn squared off.

Tanglewood, Del Webb and Camp Inn all won their first round matches. In round two, Sun n Lake defeated Camp Inn and Del Webb beat Tanglewood. Subsequent rounds saw Sun n Lake win over Del Webb to advance to the gold medal round.

Tanglewood, having lost a match in the second round, had to beat Lake Ashton and Camp Inn to compete against Del Webb in the bronze medal match which the locals won, propelling them to the gold medal round against undefeated Sun n Lake.

In the championship matches, Tanglewood took the best two of three round with wins by their A team (Clint Hunter/Mike Klindworth) and their C team (Aart DeVos/Mike

Sun n Lake was crowned as the South Central Florida Pickleball League Best 8 Champions.

Whalen). Since each community had now lost once during the day, a final game to 15 had to be played. Some great pickleball skills were on display and it all boiled down to the match between the A teams. Sun n Lake's top pair, Chris Donaghy and Rene Smit jumped out to an early 8-1 lead. Hunter and Klindworth battled back to tie it 14-14 but couldn't finish off the Sun n Lake players who took gold with their 16-14 win.

Final results:

Gold - Sun n Lake — Chris Donaghy, Rene Smit, Mickey Dorman, Gary Schinderle, Jeff Lindskoog, Ross Myles, Dave Kontowsky, Bob Kollmeyer, Ted Klassen and Joe Oblon.

Silver - Tanglewood - Clint Hunter, Mike Klindworth, Mike March, Grant McLaughlin, Aart DeVos, Mike Whalen, Gene Timmerberg, Dennis Aldridge, Jim Maynard and Steve Batey.

Bronze - Del Webb - Ray

Luccetti, Dick Grosek, Bob Cisler, Gary Hansen, Steve Nevarez, Jim Vernon, Dennis Borowicz, Bob Auchenbach, Jim Vernon, Jeff Morris and Siva Sivasubramaniam.

Twelve Hours of Sebring was super

Endurance race was a tremendous success

Special to Highlands News-Sun

DAYTONA BEACH — Last Saturday's 67th Mobil 1 Twelve Hours of Sebring Presented by Advance Auto Parts was a tremendous success both on and off the racetrack for IMSA and the IMSA WeatherTech SportsCar Championship.

The four-day event — billed as "Super Sebring" with the IMSA MICHELIN Pilot Challenge's Alan Jay 120, the one-hour, 45-minute IMSA

Prototype Challenge race and the addition of Friday's inaugural 1,000 Miles of Sebring FIA World Endurance Championship (WEC) race set an all-time Sebring International Raceway attendance record. Ticket sales and camping increased by more than 40 percent from 2018 to 2019.

Event merchandise sales reached unprecedented levels this year, more than double what was considered an impressive sales figure

IMSA PHOTO

The Twelve Hours of Sebring and the 1000 Miles of Sebring attracted record attendance at Sebring International Raceway last weekend.

in 2018. U.S. television viewership of the Mobil 1

Twelve Hours of Sebring Presented by Advance Auto Parts on CNBC and NBCSN saw a 46 percent increase over 2018.

On the track, three of the four classes in the Twelve Hours saw margins of victory under three seconds. That included an all-time record margin of victory overall of 1.030 seconds by the winning No. 31 Whelen Engineering Cadillac DPi-V.R of Felipe Nasr, Pipo Derani and Eric Curran over the second-place No. 10

Konica Minolta Cadillac DPi co-driven by Jordan Taylor, Renger van der Zande and Matthieu Vaxiviere.

"We could not be prouder of what we collectively accomplished at Sebring," said IMSA President Scott Atherton. "Two world-class sports car endurance sports car races were flawlessly organized and executed, garnering rave reviews from fans, media, competitors and

RACE

FROM PAGE 7A

stakeholders. "After 12 hours of intense racing, much of it occurring in challenging wet conditions, the margin of victory was just one second. The bottom line is, I am not aware of any other motorsports

event that has generated this level of record-setting performance and year-over-year growth." Next up for the WeatherTech Championship is the 100-minute BUBBA burger Sports Car Grand Prix at Long Beach on Saturday, April 13. The race features only the DPi and GT Le Mans

(GTLM) classes as part of the Acura Grand Prix of Long Beach event weekend. Tickets are available now on GPLB.com. NBCSN will have live, flag-to-flag coverage of the race beginning at 5 p.m. IMSA Radio also will cover the action live on IMSA.com, RadioLeMans.com and SiriusXM Radio.

BRIEFS

second and third flight prizes, closest to the pin for men and women, longest drive for men and women. Refreshments during golf, meal to follow at VFW Post 4300 at 1041 Lakeview Dr, Sebring Fl. The event will also have door prizes, a raffle and 50/50 drawing. Hole sponsorship are available for \$50 and corporate sponsor are \$1,000 and include a foursome.

The deadline for sign-up is Saturday, March 30. Please make checks payable to VFW Post 4300. Payment must accompany entry form. For more information please contact Tim Harker at 937-776-5920 or VFW Post 4300 at 863-385-8902.

Golf For Life
The 2019 Choices Family Resource Centers' Annual Golf for Life Brooke Moran Memorial golf tournament will kickoff Saturday, April 6. River Greens Golf Course will host the event. The event is a four-person scramble with a

\$10,000 hole-in-one prize. Registration begins at 7 a.m. with a 8 a.m. shotgun start.

Registration is \$70 per player adding up to \$280 per team. Price includes golf and lunch.

To register online go to choicesfrcc.com or call 863-386-0307. Please make checks payable to CFRC. Please mail checks to P.O. Box 166 Avon Park, FL 33826.

NU-HOPE Golf Tournament

The 22nd Annual NU-HOPE Elder Care Services Golf Tournament, presented by MIDFLORIDA Credit Union, will be held on Saturday April 20, at the Sun 'N Lake Golf Club.

This event is a four-person scramble with handicapped flights. Registration will begin at 7:30 a.m. with a shotgun start at 8 a.m. An award ceremony and lunch will follow.

Registration is \$70 per player adding up to be \$280 per team. Sponsorship packages are also available.

Entries or to enter a team, to become a

sponsor or to donate please stop by NU-HOPE at 6414 US Hwy 27 S or contact Laurie Murphy at 863-382-2134 No later than Wednesday April 10th.

Lake Placid Rotary Golf Tournament

The Lake Placid Morning Rotary Golf Tournament will be held on Saturday, March 30, at Placid Lakes Country Club. There will be a shotgun start at 8:30 a.m. An award ceremony and luncheon will follow immediately after the conclusion of play.

The event will be a four-person scramble with closest to the pin and longest drive contests. The entry fee is \$65 per person or \$250 per team. Fee includes greens fee, cart, prizes and luncheon.

The deadline for paid entries is Saturday, March 16. All entries must be paid in advance. Sponsorship packages are also available.

For entry information please call Nell Hays at 863-446-3031. Please make checks payable to Lake Placid Morning Rotary Club.

PICKLE

FROM PAGE 7A

played River Ranch (7th), Highlands Ridge (3rd) met up with Buttonwood (6th) and Del Webb (4th) competed against Sun n Lake (5th).

Early winners were Lake Ashton, Highlands Ridge and Sun n Lake. Buttonwood lost their first match and moved to the consolation round.

In round two, Highlands ridge defeated lake Ashton while Sun n Lake upset the top ranked Tanglewood ladies relegating Tanglewood to the consolation round.

The third round saw Highlands Ridge emerge victorious over Sun n Lake.

In consolation play, Buttonwood was eliminated by River Ranch. Tanglewood showed the depth of their team by eliminating River Ranch, Del Webb and finally getting revenge with a win over Sun n Lake. This meant that Sun n Lake took the bronze while Tanglewood went on to face Highlands Ridge in the gold medal match where Highlands Ridge A team won in two straight games as did Tanglewood's B team. In the C and D matches Highlands Ridge forced Tanglewood to a third game in each set but Tanglewood dominated.

As in the Best 8 shootout, a final set of games to 15 was needed to determine a winner as both Highlands Ridge and Tanglewood had now lost once during the day. The Highlands Ridge A team (Susan Price and Mary Smit) was victorious but Tanglewood repeated as league champions with wins by B (Sylv

The twins

“Double the Pleasure, Double the Fun”, was a great advertising slogan for Doublemint Gum some years ago and it applied to the next NASA space program Gemini. The Mercury program laid the foundation of learning to work in space and answered many of the questions of what effects zero gravity had on the human body.

There were many more challenges to meet as we pushed on to the moon. The journey to the moon would require the command module and the lunar landing module (LEM) to leave the earth joined together aboard a yet untested large rocket. Once in orbit, the LEM needed to separate, turn 180 degrees and re-dock with the command module.

From Wikipedia; “Project Gemini was NASA’s second human spaceflight program. Conducted between projects Mercury and Apollo, Gemini started in 1961 and concluded in 1966. The Gemini spacecraft carried a two-astronaut crew. Ten Gemini crews flew low Earth orbit (LEO) missions during 1965 and 1966, putting the United States in the lead during the Cold War Space Race against the Soviet Union.

Gemini’s objective was the development of space travel techniques to support the Apollo mission to land astronauts on the Moon. It performed missions long enough for a trip to the Moon and back, perfected working outside the spacecraft with extra-vehicular activity (EVA), and pioneered the orbital maneuvers necessary to achieve space rendezvous and docking. With these new techniques proven by Gemini, Apollo could pursue its prime mission without doing these fundamental exploratory operations.

All Gemini flights were launched from Launch Complex 19 at Cape Kennedy Air Force Station in Florida. Their launch vehicle was the Gemini-Titan II, a modified Intercontinental Ballistic Missile (ICBM) Gemini was the first program to use the newly built Mission Control Center at the Houston Manned Spacecraft Center for flight control.

The astronaut corps that supported Project Gemini included the “Mercury Seven”, “The New Nine”, and the 1963 astronaut class. Neil Armstrong and Edwin “Buzz” Aldrin the first two humans to walk on the Moon were in the new class. During the program, three astronauts died in air crashes during training, including the prime crew for Gemini 9. They were Elliot See, Clifford Williams and Ted Freeman. This mission was flown by the backup crew, the only time that has happened in NASA’s history to date.”

Set realistic goals for puppies

Housebreaking can be challenging

By Metro Creative Services

Individuals and families who decide to bring new puppies into their homes understand that their lives are bound to change until the new pup acclimates to the household. Many are willing to accept the work involved because of the love and affection their adorable puppy offers.

Arguably one of the most challenging — and often frustrating — components about puppyhood is training the dog to use the outdoors for bathroom needs. It’s easy to underestimate the time involved in

housebreaking a puppy. The Humane Society of America says puppies typically can control their bladders for one hour for every month of age. That means if the dog is three months old, he can hold it for about three hours.

How often a puppy will need to defecate depends on the food being fed and when meals are offered. The American Kennel Club says that most puppies will need to poop shortly after a meal, anywhere from 15 minutes to a few hours.

Puppies typically can hold urine a little longer overnight, but probably

won’t be able to go the entire night without a potty break. Many pups can last around six hours from the last time they’ve gone out. An early-morning bathroom break will be needed, or consider penning the dog with puppy pads to catch the mess until the dog gains greater control over its bladder.

The following are some other tips for housebreaking success:

- Take pups outside immediately in the morning, after naps and after vigorous play.
- Pick up food bowls and water several hours

METRO CREATIVE SERVICES

It’s easy to underestimate the time involved in housebreaking a puppy.

before bedtime. This can prevent accidents by ensuring dogs’ stomachs and bladders are not full

Life on Lupines at Archbold

Colorful flowers brighten up the landscape

By ARCHBOLD BIOLOGICAL STATION

Every February and March there is a wondrous sight to behold on the yellow sand atop Red Hill at Archbold Biological Station. Interspersed among the low growing carpet of brown grasses and dull, yellowish shrubs is a profusion of brilliant blue flowers. Native to open pine and oak woodlands of the Southeast, the bushy Sky Blue Lupines put on an extravaganza of color in an otherwise dull landscape.

Arising from velvety green leaves, each plant has a crown of about two dozen floral spikes. Dr. Jim Carrel, Research Associate at Archbold and former professor at the University of Missouri explains, “A lupine in bloom reminds me of a fanciful birthday cake in a Disney movie, with flowers instead of candles. The flowers are so fetching that I can’t resist inspecting them close up.”

Thirty years ago Carrel noticed some of the lupines on Red Hill were infested with bright orange caterpillars blatantly feeding on the tender leaves. Nothing else bothered the foliage. The insects were clearly visible to passing predators, such as birds and wasps. The fact that the larvae got away with being so exposed suggested immediately to Carrel that they probably were poisonous; their bright coloration served to warn potential enemies. Carrel commented, “More than a half

PHOTO BY JIM CARREL

Sky Blue Lupines flowering in the yellow sands of Archbold’s Red Hill.

century ago a few scientists from the Northeast demonstrated the effectiveness of warning coloration in caterpillars at Archbold. The results were groundbreaking.”

Carrel decided to perform a series of field observations and laboratory tests to assess if the lupine caterpillars are chemically defended from predators. A second problem faced by Carrel was that he did not know the caterpillar’s scientific name. He needed to rear some

caterpillars to adulthood so the insect expert at Archbold, Dr. Mark Deyrup, could identify the specimens to species level. He foresaw that both of these things would take time and would challenge his patience.

Over the course of seven years Carrel invested a total of 200 hours, both day and night, sitting near lupines loaded with a dozen of more caterpillars, hoping to observe attacks. He saw ants, spiders, tree frogs and other carnivorous animals

moving on the plants, but all ignored the caterpillars. His perseverance finally paid off. One afternoon an immature Milkweed Assassin Bug attacked. Carrel narrates, “The bug slowly stalked a feeding caterpillar larva. When close, the bug suddenly impaled the caterpillar with its needle-like beak. The paralyzed caterpillar was lifted into the air and held there for an hour as the bug

Tips to plan your dream vacation

Strategies to help you have a good time

By Metro Creative Services

If asked to come up with an idea for their dream vacations, many people may not hesitate to name a destination. The Egyptian pyramids, the Great Wall of China and St. Peter’s Basilica are just a few of the many attractions people have on their bucket lists.

Planning can help people turn their dream vacations into reality. The following three tips can help those who have many a destination left to visit on their bucket lists get out of the house and off to parts unknown.

1. Make use of travel agencies.

With an abundance of travel-based websites at your fingertips, you may be inclined to go it alone when planning a dream vacation. However, travel agencies remain valuable assets to would-be vacationers, especially when planning overseas trips. Travel agencies often get discounted admissions to popular tourist attractions, which can save travelers substantial amounts of money. In addition, vacationers who prefer self-driving excursions can rely on the expertise of travel agents to map out

METRO CREATIVE SERVICES

LUPINES

FROM PAGE 1B

sucked its trophy dry." Later Carrel read that the docile Milkweed Assassin Bug is a popular agent among organic gardeners nationwide for biological control of insect pests.

To evaluate his field observation, Carrel collected 20 Milkweed Assassin Bugs on lupines and housed them individually in the lab at Archbold. When presented with a living caterpillar, every Milkweed Assassin Bug quickly attacked and ate its caterpillar prey in the same fashion as observed in the wild. Similar tests with two species of ants and four species of spiders produced the opposite results: the caterpillar larvae remained unharmed. These laboratory findings confirmed the observations made in the field.

Rearing caterpillars to adulthood turned out to be easy. After they pupated, Carrel placed them in jar inside a refrigerator for six months to simulate winter conditions in order to break hibernation, which is called 'insect diapause'. When placed

PHOTO BY JIM CARREL

The colorful caterpillar larva of the Genista Broom Moth feeds on the leaves of lupines.

back in the warm lab for several weeks, many moths emerged. Carrel and Deyrup identified the species as the Genista Broom Moth.

Published studies have determined that lupines are replete with toxic, bitter alkaloids that render the leaves poisonous to most animals. Genista caterpillars not only eat the leaves with impunity, but also they transport the alkaloids from their guts to their thin skin and store them there in high concentrations. Hence, the vast majority of carnivores brave enough to bite or even

lick a caterpillar instantly get a bad taste, causing them to release the larva unharmed. But the assassin bugs with their needle-sharp mouthparts are so fast in their attack that they overwhelm the caterpillar's narrow line of protection. Perhaps this might be called 'The Maginot Line Fallacy' based on the French long line of defensive fortifications at the start of World War 2. To quote Carrel, "Once an enemy manages successfully to breach the caterpillar skin, there are no further lines of defense and a larva is doomed."

FLIGHT

FROM PAGE 1B

Even though NASA was on the cutting edge of space technology, it was and still is, a dangerous undertaking. The space program was expanding and moving rapidly forward, racing to the deadline President Kennedy told the world. The missions, the equipment, and the technology became more complex.

A prime example was the first U.S. Astronaut to venture outside the safety of the spacecraft while in orbit. Ed White became our first astronaut to "walk" in space, although there was no walking involved. It was a new challenge as his space suit had to protect him from the zero pressure of space. The sunny side of his suit would have temperatures in excess of 200 degrees, and the shadow side would be minus of 200 degrees. If there as

any loss of pressure in his suit by a hole, seam failure or rip, the instant lack of pressure would mean instant death as his blood would boil in the zero pressure of space.

White exited the Gemini capsule and found it was extremely difficult to complete his assigned tasks. The lack of gravity with few things to press against, he was having to exert too much energy just trying to be stable. He had a small hand-held wand that shot out compressed gas as a maneuvering device. It was not that effective. White became so exhausted, he didn't complete all the assigned tasks. He did enjoy the view and was sternly told by Houston Control to get back in the capsule before entering the earth's shadow and having to re-enter while it was dark. Later missions had astronauts train underwater at the Houston Space center learning

how to effectively work outside weightless during EVAs. You did everything slowly, as for every action, there is an equal and opposite reaction. Seems we learned that in science class.

As the Gemini missions went on NASA mastered the tasks to prepare for the next stage, Apollo. We were going to the Moon, and the clock was ticking. Next week we'll look at the many small steps that many took before Neil Armstrong took his on the Moon. There was success and tragedy, a tragedy that caused NASA to pause and re-think the process of the journey. Keep looking up!

No matter what you're looking for,

Check the Sun Classified first!

From a new job to a place to live, Classified has what you need!

VACATION

FROM PAGE 1B

their trips and find comfortable lodging in small towns and cities. It might not be possible to book nights in bed and breakfasts or countryside inns via travel websites, while travel agents often have working relationships with some businesses.

2. Start saving now. Vacation costs fluctuate, and much of that cost will be determined by where you live and where you want to go. But vacationing isn't cheap no matter where you go, so saving early and often is a great way to guarantee you can do everything you want while on vacation without breaking the bank. Airfare will be one

of your biggest expenses, so start looking for flights around the time of year you want to travel. Once you get a ballpark of how much you will need to spend on airfare, you can then start to look into lodging costs, which might be slightly more than airfare depending on the length of your trip. Travel agencies often build lodging into their estimates and arrange lodging for their clients. That can greatly reduce the cost of lodging and make planning that much simpler.

3. Explore ways to save. Unless you have an unlimited travel budget, you will probably encounter some dream vacation sticker shock as you start researching flights, hotels, etc. If

you're planning a resort vacation, then consider all-inclusive packages, which typically include food and beverages. Such packages can be financially prudent, especially for travelers who intend to spend most of their time at the resort. Resorts also tend to offer discounted prices on local tourist attractions to their guests. Travelers who can travel at any time of year also might be able to save substantial amounts of money by traveling during the offseason. Everything from flights to hotels to attraction tickets may be heavily discounted during the offseason.

A dream vacation can be everything you expect and more with some simple planning strategies.

PUPPIES

FROM PAGE 1B

overnight.

- Some pups may be hesitant to go outside when the weather is cold, rainy or snowy, so people who live in cold climates may want to wait until

the weather warms up to adopt their puppies.

- Err on the side of caution at the start and take the pup outside once every 30 to 60 minutes to establish a system of reward and praise for going outside.

- Contain the pup when you can't provide it with

your undivided attention. It only takes a moment for a puppy to wander off and have an accident.

Housebreaking requires extreme patience, routine and practice. Eventually the puppy will gain greater control of its bowels and stop soiling inside the house.

NOTICE OF MEETING 26

Notice of Meeting

Notice is Hereby Given that the Highlands County Health Facilities Authority (the "Authority") will meet in public session in the Sebring City Council Chambers at the Sebring City Hall, 368 South Commerce Avenue, Sebring, Florida, on Friday, March 29, 2019, at 12:00 p.m. (noon) for the following purposes:

(A) Adopting resolutions with respect to the Authority's Adventist Health System/Sunbelt, Inc. Accounts Receivable Program: (i) authorizing and approving the redemption, during calendar year 2019, of \$40,000,000 in principal amount of the outstanding Highlands County Health Facilities Authority Revenue Bonds, Series 2012A (Adventist Health System/Sunbelt, Inc. Accounts Receivable Program), issued in the original aggregate principal amount of \$294,985,000; (ii) authorizing and approving the execution and delivery of and/or ratifying all documents necessary in connection with such redemptions; and (iii) making other provisions with respect thereto.

(B) Considering such other business as may properly come before the Authority at such meeting.

In accordance with the Americans with Disabilities Act ("ADA"), if any person with a disability as defined by the ADA needs special accommodations to participate in the meeting of the Authority, then not later than two (2) business days prior to the meeting he or she should contact the counsel to the Authority, J. Michael Swaine or Robert S. Swaine, at 863-385-1549.

If any person decides to appeal any decision made by the Authority with respect to any matter considered at such meeting, such person will need a record of the proceedings and, for such purpose, may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and the evidence upon which the appeal is to be based.

Dated: March 22, 2019.

Advertising Account Executive

Here we GROW Again!

★ Are you looking for a career with **\$40,000-\$55,000+** earnings potential?

★ Are you ready for a career where you can make a difference in the community?

★ Are you a people-person that enjoys socializing and networking at community events?

The **Highlands News-Sun** is looking for Advertising Account Executive ready to join a winning team of professionals. We're looking for good people who want an exciting career with a growing media company. Experience is preferred, but we're willing to train the right person. We need people who really care about their community and the businesses that make our local economy tick. Our Advertising Account Executives work closely with the local business owners to provide powerful advertising campaigns that deliver results.

We Offer:

- **Salary plus Commissions**
- **Paid Time Off (PTO)**
- **Health & Dental Insurance**
- **401(k)**
- **Training**

Don't miss this opportunity to interview for a career as an Advertising Account Executive at the **Highlands News-Sun.**

We are a drug and nicotine free workplace. Pre-employment drug/nicotine testing required.

Send your resume to:

Highlands News-Sun
Attn: Cliff Yeazel,
Advertising Director
315 US Hwy 27 N., Sebring,

With more than 60 different species of deer worldwide, there's a good chance individuals will have some sort of interaction with these majestic animals at one point during their lifetimes.

Deer, which live on all continents except Antarctica, can survive in everything from mountainous areas to wet rainforests to suburban neighborhoods. These herbivores are voracious eaters that will search far and wide for their meals. Home landscapes tend to be easy pickings for foraging deer.

Many people are excited to see deer in their neighborhoods and yards because they can be such graceful creatures to behold. However, once deer start to munch on

METRO CREATIVE SERVICES

Deer also can be covered in ticks that spread illnesses like Lyme disease.

ornamental trees, annuals and flowering shrubs, the novelty of these animals may wear off. Furthermore, deer also can be covered in ticks that spread illnesses like Lyme disease. Here are some tips to keep deer at bay.

- Avoid tasty morsels. Deer like English ivy, lettuces, impatiens, pansies, and hostas. Fruit trees also are targets. Choose other plants to grow, and wait until after early spring, when deer aren't as concerned with regaining weight lost

during the winter, to get them in the ground.

- Use fishing line to deter deer. Put a few stakes in the ground and then run fishing line at a height of about three feet. Deer can sense movement but do not have keen vision. As the deer approach your garden, they'll brush against the "invisible" fishing line and then get spooked off.

- Plant plants that produce strong aromas. The experts at Good Housekeeping suggest planting lavender and marigolds, which emit strong aromas. Deer will be reluctant to walk through because the smell can interfere with their ability to find food and assess their environment via their sense of smell.

- Stock up on soap. The

tallow in soap helps keep deer away, according to the University of Vermont Extension Department of Plant and Soil Science. Scented soaps like Irish Spring may be especially good at warding off deer.

- Plant in levels. Raised beds and sunken gardens can discourage deer from coming into the yard because they aren't avid climbers, offers the home and garden resource This Old House.

- Employ harmless scare tactics. Deer are skittish, and any unfamiliar movement or sound may scare them away. Cans hung from strings, sundials and lights can keep them at bay.

Deer will seek out an easy meal, but homeowners can take steps to safeguard their trees, flowers and shrubs.

METRO CREATIVE SERVICES

While it might take a little effort to address, thinning grass can be treated if homeowners correctly identify that cause of the problem.

Potential culprits behind thinning grass

Keep your yard looking good

By Metro Creative Services

Thick grass is often a hallmark of a healthy lawn. If grass begins to thin, homeowners may feel as though all the time and effort they spent tending to their lawns was for naught.

Thinning grass can be caused by any number of things. And while it might take a little effort to address, thinning grass can be treated if homeowners correctly identify that cause of the problem.

Leaf spot

The Center for Agriculture, Food and the Environment at the University of Massachusetts Amherst notes that leaf spot diseases affect both cool- and warm-season turfgrasses. Various fungi can cause leaf spot. Symptoms and the timing of the appearance of leaf spot will vary depending on which fungi is causing the problem. For example, bipolaris sorokiniana, which affects grasses in warm, wet summer months, produces small spots that are dark purple to black. Drechslera poae is another fungi that causes leaf spot, and it also produces dark purple to black spots. However, it tends to appear in the spring when the weather is cool and moist. Understanding the different fungi and when they typically strike can help homeowners identify what is causing their grass to thin. In such situations, professional landscapers can be invaluable resources as well.

Stripe smut

The University of Maryland Extension notes that stripe smut primarily poses a threat to Kentucky bluegrass that is older than three years. Pale green streaks that run parallel to the veins in the leaves and leaf sheaths are symptomatic of stripe

smut, which tends to be noticed in spring and fall, when weather is cool. As the disease progresses, stripes turn black or a silvery gray, causing the leaf blade to shred and curl. After the blades have shred, they turn brown and die. The grass thins because stripe smut makes it vulnerable to problems like drought.

Ascochyta leaf blight

Lawns suffering from ascochyta leaf blight will become straw-colored. According to the lawn care and pesticide experts at Ortho, when a lawn is affected by ascochyta leaf blight, its healthy grass blades will be mixed in with diseased grass blades. Most prevalent in the spring, this disease can affect grass at any time during the growing season. That's because the ascochyta fungi invade leaf blades through wounds, such as those that can result from mowing. Ortho notes that dull lawn mowers can contribute to the disease, which might disappear on its own and can even return after it's seemingly been cured.

Various issues can cause grass blades to thin. Working with a landscape professional is a great way to combat such issues before they compromise the look of a lawn.

By Metro Creative Services

Avid gardeners may be enticed by the idea of a greenhouse that allows them to explore their passion for plants year-round. While it's true that greenhouses afford this luxury, there are important things to consider before erecting a greenhouse in your yard.

Greenhouses require ample time to maintain. Greenhouses are not self-managing; they require heat, water, venting, electricity, and maintenance on the part of gardeners. Individuals need to determine how much time they have to devote to a greenhouse and then consider their options.

Start by choosing the size of the greenhouse. Many experts, like those at the home and garden information site The Spruce, suggest getting the largest one you can afford and fit into the yard. It is much easier to fill a large greenhouse than try to expand on a small one later on.

Next, consider whether you want to build the greenhouse from scratch or utilize a prefabricated kit that can make easier work of the job. Kits typically contain all of the materials needed, and are easiest for someone who is a construction novice. Look for "grower greenhouses," which are all-purpose options with adjustable shelving and space for growing plants full-term.

The next step is deciding where the greenhouse will be located. The goal is to have a consistent amount of sunlight year-round. A south-facing locale is ideal, and structures should remain north of the greenhouse so they do not cast a shadow on it. The building, cars

Greenhouses require plenty of attention

Choose the right size for you

METRO CREATIVE SERVICES

Greenhouses can be a great addition to a yard for those who know what to expect.

and technology resource Popular Mechanics advises gardening enthusiasts to take into consideration the angle of the sun during all seasons before choosing a location. Doing so ensures that the sun is not obscured in the winter or fall.

Select a spot that also has ample drainage, as you will not want water pooling up along the sides of or underneath the greenhouse. Raise the greenhouse on footings to alleviate flooding concerns.

Consult with a gardening or agriculture expert about the best way to heat the greenhouse. Options abound

with electric-, gas- and propane-powered heating sources. Some systems will require venting. You also will need to know what is available and legal in your area. Check to see if you need a building permit for the greenhouse and any accompanying heating elements.

Once the greenhouse is situated, you can begin to add other items, like benches, additional shelving, hooks for tools, and even an automated watering or misting system.

Greenhouses take commitment, but the reward is the chance to enjoy gardening all year long.

Unprecedented spring flooding possible

Weather officials say the flooding in Midwest is a preview of widespread major flooding to hit this spring

By **SETH BORENSTEIN** and **JEFF MARTIN**
ASSOCIATED PRESS

The stage is set for unprecedented major flooding this spring for most of the nation, U.S. weather officials said Thursday.

More than 200 million Americans are at risk for some kind of flooding, with 13 million of them at risk of major inundation, the National Oceanic and Atmospheric Administration said in its spring weather outlook. About 41 million people are at risk of moderate flooding.

Major flooding now occurring in Nebraska, Iowa, South Dakota, Missouri and other Midwestern states is a preview of an all-too-wet and dangerous spring, said Mary Erickson, deputy director of the National Weather Service. "In fact, we expect the flooding to get worse and more widespread," she said.

This year's flooding "could be worse than anything we've seen in recent years, even worse than the historic floods of 1993 and 2011," she said. Those floods caused billions of dollars in damage, and officials said this

year's damage in Nebraska, Iowa and South Dakota has already passed the billion-dollar mark.

Forecasters said the biggest risks include all three Mississippi River basins, the Red River of the North, the Great Lakes, plus the basins of the eastern Missouri River, lower Ohio River, lower Cumberland River and the Tennessee River.

"This is the broadest expanse of area in the United States that we've projected with an elevated risk that I can remember," said Thomas Graziano, a 20-year weather service veteran and

AP PHOTO

Officials say recent flooding in parts of Nebraska has caused nearly \$1.4 billion in estimated losses and damage.

director of the Office of Water Prediction. "Is this the perfect storm? I don't know."

A lot depends on how much rain falls in the next couple months, Graziano said, but

forecasters say it will be more than average.

The Missouri River has already set records with historic flood

US bump stock ban is just days away. What will owners do?

AP PHOTO

The bump stock is an attachment used to make weapons fire rapidly like machine guns and will be a felony soon in the U.S.

On March 26 it will be illegal to own a bump stock

By **LISA MARIE PANE**
ASSOCIATED PRESS

BOISE, Idaho — David Lunsford is an avid gun owner with a firing range on his Texas spread. With bump stocks about to be banned by the U.S. government, he grudgingly decided to sell off his and

let someone else figure out what to do with them.

"If I get caught with one, I'm a felon, and it seems like to me that's entrapment in the biggest way. I bought that thing legally with my hard-earned money," said the 60-year-old Lunsford, who has at one time owned

six AR-15 rifles that he built from kits, as well as a World War II German submachine gun.

The bump stock — the attachment used by the killer during the 2017 Las Vegas massacre to make his weapons fire rapidly like machine guns — will become illegal on Tuesday

in the only major gun restriction imposed by the federal government in the past few years, a period that has seen massacres in places like Las Vegas; Thousand Oaks, California; Sutherland Springs, Texas; and

New Zealand to observe Muslim prayer day after it bans 'military-style' semi-automatic firearms

By **NICK PERRY** and **JULIET WILLIAMS**
ASSOCIATED PRESS

CHRISTCHURCH, New Zealand — Thousands of New Zealanders and others who have flown in from abroad plan to observe an emotional Muslim call to prayer Friday as the nation reflects on the moment one week ago in which 50 people were killed when

SHUTTERSTOCK PHOTO

a gunman terrorized two mosques.

Prime Minister Jacinda Ardern and thousands of other people plan to

congregate in Hagley Park opposite the Al Noor mosque in Christchurch to observe the call to prayer at 1:30 p.m. Many radio

and television stations plan to broadcast the event live.

The call to prayer will be followed at 1:32 p.m. by two minutes of silence. At least 42 people died at the Al Noor mosque and at least seven others at the nearby Linwood mosque in last Friday's attack.

The observance

Fentanyl-linked deaths: The opioid epidemic's third wave

By **MARTHA BEBINGER**
WBUR (TNS)

BOSTON — Men are dying after opioid overdoses at nearly three times the rate of women in the United States. Overdose deaths are increasing faster among black and Latino Americans than among whites. And there's an especially steep rise in the number of young adults ages 25 to 34 whose death certificates include some version of the drug fentanyl.

These findings, published Thursday in a report by the Centers for Disease Control and Prevention, highlight the start of the third wave of the nation's opioid epidemic. The first was prescription pain

medications, such as OxyContin; then heroin, which replaced pills when they became too expensive; and now fentanyl.

Fentanyl is a powerful synthetic opioid that can shut down breathing in less than a minute, and its popularity in the U.S. began to surge at the end of 2013. For each of the next three years, fatal overdoses involving fentanyl doubled, "rising at an exponential rate," said Merianne Rose Spencer, a statistician at the CDC and one of the study's authors.

Spencer's research shows a 113 percent average annual increase from 2013 to 2016 (when adjusted for age). That total was first reported

SUV crashes through barrier, hits 4 kids on Florida beach

ORMOND-BY-THE-SEA (AP) — A sports utility vehicle driven by an 82-year-old man ripped through a wooden barrier separating a parking lot from the beach and hit four children in the sand, the Florida Highway Patrol reported.

The children and their parents were getting ready to leave the beach for the day Wednesday afternoon when William Johnson, of Yarmouth, Massachusetts, attempted a U-turn and drifted onto the shoulder of State Road A1A. The SUV careened through the parking lot of Al Weeks Sr. North Shore Park and onto a ramp leading to the beach before dropping 20 feet into the sand near the water's edge.

"It's unbelievable to me how this happened," Jan Youwers, a tourist from Wisconsin who was renting a kayak across the street with her husband, told The Daytona Beach News-Journal. "They were literally the only people on the beach."

Youwers said she and her husband ran to the crash. She said the mother had taken beach stuff to the family's vehicle and was on her way back when the SUV hit her children. The father was on the beach but wasn't hit.

"The parents were amazing," Youwers said. "They kept all of their children lying still and

A young girl is helped from a boat after being evacuated from flood waters following cyclone force winds and heavy rain in Mozambique, Wednesday.

Death toll from cyclone surpasses 500 in Africa

More torrential rains caused a dam to overflow

By FARAI MUTSAKA
ASSOCIATED PRESS

CHIMANIMANI, Zimbabwe — A week after Cyclone Idai lashed southern Africa, flooding still raged Thursday as torrential rains caused a dam to overflow in Zimbabwe, threatening riverside populations. The confirmed death toll in Zimbabwe, neighboring Mozambique and Malawi surpassed 500, with hundreds more feared dead in towns and villages that were completely submerged.

Aid agencies and several governments continued to step up their deployments, with helicopters in short supply for hundreds of thousands of people displaced by the cyclone.

Spokesman Herve Verhoosel of the World Food Program told reporters in Geneva of the “alarming news” that the Marowanyati dam in Zimbabwe was hit by heavy rains overnight, putting populations in the region at risk.

Zimbabwe's defense minister said more than 120 bodies had been washed into neighboring Mozambique, where residents there buried them, and more bodies were still being recovered in rivers, raising the official death toll in the country to 259.

“Most of the bodies were washed into Mozambique and

because they were in a really bad state, they could not keep the bodies,” Defense Minister Oppah Muchinguri said, speaking in the eastern city of Mutare. “So they ended up burying them.”

Meanwhile, the confirmed death toll in Mozambique rose to 217, the Portuguese news agency Lusa reported, and in Malawi, at least 56 people were killed. But that was sure to rise. Mozambican President Filipe Nyusi has estimated that 1,000 people could have been killed in his country alone. Zimbabwean officials have said some 350 people may have died in their country.

Homes, villages and entire towns were submerged across central Mozambique, where flooding created a muddy inland ocean 30 miles wide. The U.N. food aid agency said 400,000 people were displaced and “in urgent need of life-saving assistance” in Mozambique's coastal city of Beira and flooded areas along the Pungue and Buzi rivers.

The persistent rains lifted in some areas on Thursday, and floodwaters began to recede in Beira, the worst-hit city, and in the countryside, according to a Mozambican government report.

Aid groups were continuing to work non-stop to rescue families desperately clinging to tree branches and rooftops for safety from the surging waters.

It will be days before Mozambique's inundated plains drain toward the Indian Ocean and even longer before the full scale of the devastation is known.

Ferry packed with Iraqis celebrating holiday sinks; 94 die

By FARID ABDULWAHED and QASSIM ABDUL-ZAHRA
ASSOCIATED PRESS

MOSUL, Iraq — A ferry overloaded with people celebrating the Kurdish new year and Mother's Day capsized in the Tigris River near the Iraqi city of Mosul on Thursday, killing nearly 100 people, including families, officials said.

Many of the dead were women and children who could be seen struggling to swim against a strong current, their heads bobbing in the water opposite restaurants and an amusement park where people had been celebrating minutes earlier.

An Interior Ministry official said 94 people were killed in the accident, which residents said was the worst in recent memory. The official spoke on condition of anonymity in line with regulations.

Col. Hussam Khalil, head of the Civil Defense in Iraq's northern Nineveh province, told The Associated Press the accident occurred as scores of people were out in the tourist area, known as Ghabat,

celebrating Nowruz, which marks the Kurdish new year and the arrival of spring.

The boat had been ferrying people to a small island nearby. Abdulrazzaq Falih, a rescuer with the river police of Mosul, said he pulled more than 20 bodies from the water.

“Children, women, and young, what can I tell you? It was a difficult situation,” he said.

A man who identified himself as Abdul-Jabbar al-Jbouri appealed for the police to look for his wife and children.

“My wife and three daughters are in the water!” he screamed.

Mosul was devastated by the war against the Islamic State group, which occupied the city for three years. Iraqi forces drove the militants from Mosul in 2017 after a grueling campaign that left entire neighborhoods in ruins, and residents are still struggling to rebuild.

Videos of the ferry disaster posted online showed people struggling against the strong current. Young men who had been lunching on the banks

jumped into the water with their clothes on to try and save people.

The usually tame Tigris is running high this time of year, fed by snowmelt from mountains in Turkey. The river swelled further after a rainy season that brought more precipitation than in previous years.

Falah al-Taii, director of Nineveh health department, said the number of victims that arrived at the forensic department and in the hospitals in Mosul is more than 60, the majority of them women and children.

Khalil said the ferry sank because of a technical problem, and that there weren't many boats in the area to rescue people.

Saudi Aziz, a 23-year-old Kurd, said he was on another ferry crossing the river. He said the stricken ferry was overloaded with around 150 people when it capsized. He said it wasn't long before he saw people drowning, their heads bobbing up and “sliding away across the water like plastic bags.”

Man sets fire to bus with more than 50 kids on board

By ALVISE ARMELLINI
DPA (TNS)

ROME — The driver of a school bus in northern Italy set fire to the vehicle on Wednesday, but the 51 pupils on board escaped with no serious injuries.

The man, a 47-year-old Italian of Senegalese origin, wanted “to punish Europe for policies, unacceptable in his view, against migrants,” Milan anti-terrorism prosecutor Alberto Nobili said.

The suspect, who recorded a YouTube video announcing his attack, faces charges of kidnapping and attempted mass murder, with terrorism as an aggravating circumstance.

Nobili, whose comments were carried by the ANSA

news agency, described the driver as a “lone wolf” with no links to Islamic State or other Islamist groups.

The episode that “sparked” the attack was a stand-off between migrant rescue vessel Mare Jonio and Interior Minister Matteo Salvini, ANSA reported the driver as telling Nobili and prosecutor Luca Poniz.

Events, involving children aged around 12 and three adult minders, unfolded on a suburban highway on the southeastern outskirts of Milan.

“We were all very scared,” one boy, interviewed anonymously by La Repubblica newspaper, said. “He tied us all up and seized all mobile phones so that we could not

call the police.”

However, one mobile fell on the floor. The boy, deemed a “hero” by La Repubblica, used it to call the police after managing to untie his hands.

A police chase ensued, at the end of which the bus crashed. Officers forced open the back door and helped students off the bus, while the driver threatened suicide.

He was arrested after setting fire to the bus, which he had previously doused with petrol.

“He wanted revenge for his daughters” who died at sea while trying to reach Italy, said another boy from the bus, according to a video posted by Agenzia Vista.

“He wanted revenge for his three daughters and to kill us,” he said.

Andrew Gillum's new mission: Register 1M new voters for 2020

By ANTHONY MAN
SUN SENTINEL

MIAMI GARDENS — Andrew Gillum, the Democrat who narrowly lost his bid for Florida governor last year, said Wednesday he's getting back in the political arena for 2020.

His mission: Lead an effort to register and engage 1 million new Florida voters. His objective: Help the eventual Democratic nominee evict President Donald Trump from the White House.

“It is so consequential that we get this thing right,” Gillum said at a kickoff rally for the effort at Florida Memorial University in Miami Gardens. “It is consequential not only for the state of Florida, but for the United States of America

that Florida deliver like we never have delivered before.”

Gillum acknowledged that the effort might not be as fun as running for president — which he isn't doing — or getting involved as a campaign volunteer. He sought to motivate interest in the effort by repeatedly invoking Trump.

“What is happening in Washington, D.C., is not normal. There is nothing normal about what we see happening in the White House. He ain't normal. There's a lot about him that ain't normal,” he said.

If Democrats can complete their mission, Gillum said “we can deny Donald Trump a second term right here in the state of Florida.” Florida awards 29 electoral votes, more than 10 percent of the total

needed to win the presidency. The message Gillum wants Florida to send is, “Sir, your eviction notice is served and you are out of the White House.”

Gillum's effort involves a new organization, Bring It Forward, which was his 2018 slogan. It will also involve Gillum's political committee, Forward Florida, which has about \$3.9 million.

Also on Wednesday, the Florida Democratic Party announced its own \$2 million effort to register 200,000 voters before the 2020 presidential. There is some overlap between the two efforts, said Terrie Rizzo, chairwoman of the Florida Democratic Party.

“This investment is monumental for the party and is about creating the electorate we want, not the one we have been

told we have,” Rizzo said in a written statement.

“The Florida Democratic Party has not dedicated enough resources to voter registration in recent years, and we are making it a top priority ahead of 2020.”

The party said the effort would involve technology and data, hiring “dozens” of full-time field organizers across the state, and investing in county Democratic Party organizations.

Gillum said some of the new registrations would come from felons who have finished serving their sentences, who now can register to vote because of an amendment voters added to the state Constitution last year.

He criticized Republican efforts to scale back the impact of the amendment. “I want us to be able to

send an unapologetic message to the Legislature to get their hands off Amendment 4,” he said. “It is the law of the land. It is enshrined in the Florida Constitution.”

To many Democrats, Gillum, 39, emerged from the 2018 loss as a superstar. He's no longer mayor of Tallahassee, but has a gig as a CNN political analyst, helping him stay in the public eye.

His advance publicity on social media for Wednesday's event ignited a flurry of hope among fans — and scorn among some critics — that the former Tallahassee mayor might announce his own presidential candidacy, something that didn't happen.

Several Broward activists who attended the event said they'd like to see

Gillum run for president — someday.

Gloria Pierce of Pembroke Pines is a big fan. “I love — love — Andrew Gillum,” she said, adding she's glad he's waiting because she doesn't think the time is right in 2020.

Losing a high-profile election isn't necessarily career-ending. Beto O'Rourke, who lost the U.S. Senate race in Texas last year, is running for president, and Stacey Abrams, who lost a race for governor of Georgia, is contemplating a candidacy.

Appearing Friday on HBO's “Real Time with Bill Maher,” Gillum noted a precedent set by the nation's 16th president. Abraham Lincoln “lost, went on to become president.”

HEADLINES AROUND THE STATE

Prosecutors clear dead serial rapist of 1983 murder

FORT LAUDERDALE (AP) — Florida prosecutors want a deceased serial rapist cleared of a 1983 murder, saying DNA evidence shows the killer was actually a man executed for a similar murder.

Broward County prosecutors asked a judge Thursday to dismiss Ronald Stewart's 1985 conviction for the murder of a 20-year-old Regina Harrison. They say the real killer was Jack Jones, who was executed in 2017 for a 1995 Arkansas murder. Jones also pleaded guilty to a 1991 Fort Lauderdale murder. Stewart was arrested in 1983 for serial rapes in the Fort Lauderdale area. He pleaded guilty to three and no contest

to second-degree murder for Harrison's slaying and sentenced to 50 years. He died in prison in 2008. Prosecutors say Stewart's serial rape convictions and the evidence behind them stand.

Woman charged with manslaughter in boy's hot-vehicle death

ORLANDO (AP) — Authorities say a Florida woman has been charged in the death of a 4-year-old boy who was left in a hot minivan for more than six hours.

The Orlando Sentinel reports 27-year-old Mariah Butler was arrested Tuesday and charged with aggravated manslaughter and child neglect.

The Orange County Sheriff's Office says Logan Starling was one of five children that Butler brought to the Elite Preparatory

Academy, where she worked as an administrative assistant, in September. Investigators say Butler didn't realize she left Logan in her vehicle until the boy's teacher asked about him that afternoon.

The school's director ran out to the minivan, found Logan and rushed the child across the street to a fire station. Logan was later pronounced dead.

Rescuers helping turtle find raccoon stuck off coast

SARASOTA (AP) — A seafaring raccoon has been plucked off the Florida coast and safely released on dry land.

News outlets report Mote Marine Laboratory and Aquarium workers were helping an injured turtle in Sarasota

waters Wednesday when they spotted the normally land-based bandit parked atop a channel marker. Area police departments and the Florida Fish and Wildlife Conservation Commission were called in to assist the raccoon, which initially fled rescuers by diving overboard.

A video posted online by Sarasota police shows the swimming raccoon darting around rescuers before returning to the boat, where it was placed in a cooler and returned to shore.

It's unclear how the raccoon managed to get to the channel marker.

Squabble over airport's name heads to court

ORLANDO (AP) — Apparently, this region ain't big

enough for two airports with the name “Orlando.”

The authority that governs Orlando International Airport has sued the authority for the much smaller Orlando Melbourne International Airport on Florida's Space Coast, claiming its name is misleading passengers into believing they're going to the theme park mecca instead of the coast.

The lawsuit filed this week in federal court asks that the airport in Melbourne stop using the word “Orlando” in its name.

The Melbourne airport is located about 70 miles southeast of the Orlando airport, which was the nation's 11th busiest in 2017.

Melbourne airport officials have said in the past both airports compete for the same market share.

Florida man pleads guilty to mailing bombs to Trump foes

Bombs were sent in September but none detonated

By **LARRY NEUMEISTER**
ASSOCIATED PRESS

NEW YORK — A Florida man pleaded guilty Thursday to sending pipe bombs to CNN and prominent critics of President Donald Trump in a wave of attacks that harmed no one but spread fear of political violence across the U.S. for days leading up to last fall's midterm elections.

Cesar Sayoc, 57, sobbed as he entered the plea before a federal judge in New York.

"I'm extremely sorry," he said, adding that he never intended for the devices to explode.

He could get life in prison at sentencing Sept. 12 on 65 counts, including using weapons of mass destruction and mailing explosives with intent to kill. In exchange for his guilty plea, prosecutors dropped a charge that carried a mandatory life sentence.

Sayoc sent rudimentary bombs — none of which detonated — to 16 targets, including Bill and Hillary Clinton, former Vice President Joe Biden, several members of Congress, former President Barack Obama and actor Robert De Niro. Devices were also mailed to CNN offices in New York and Atlanta.

The bombs began turning up weeks before the hotly contested midterms, contributing to an already tense political environment.

Sayoc was arrested in late October at a Florida auto parts store. He had been living in a van plastered with Trump stickers and images of Trump opponents with crosshairs over their faces.

BROWARD COUNTY SHERIFF'S OFFICE VIA AP

Cesar Sayoc

On Thursday, he told the judge he made objects designed to look like pipe bombs and filled them with explosive powder from fireworks.

"Did you intend they would explode?" U.S. District Judge Jed Rakoff asked.

"No, sir," Sayoc said.

"What would prevent powder from fireworks from exploding?" Rakoff asked.

"I was aware of the risk they would explode," Sayoc said.

The first of the bombs was discovered Oct. 22 in a mailbox at an estate in New York City's northern suburbs owned by the billionaire George Soros, a liberal political activist.

A device addressed to the Clintons was discovered the following day, followed a day later by a slew of bombs found at the homes or offices of prominent Democrats. One, addressed to former CIA director John Brennan, was sent to CNN in New York.

Over several days, investigators tracked the packages to a mail center in Florida. Prosecutors said the evidence against Sayoc included DNA that linked him to 10 of the devices and fingerprints on two of them.

Boeing to make safety feature standard on troubled Max jets

Sensor that may help prevent plane from stalling could be cause of at least one Boeing crash

By **ELIAS MESERET**
and **DAVID KOENIG**
ASSOCIATED PRESS

Boeing will make standard on its troubled new airliner a safety feature that might have helped the crew of a jet that crashed shortly after takeoff last year in Indonesia, killing everyone on board.

The equipment, which had been offered as an option, alerts pilots of faulty information from key sensors. It will now be included on every 737 Max as part of changes that Boeing is rushing to complete on the jets by early next week, according to a person familiar with the changes.

The person spoke on condition of anonymity because Boeing and federal regulators are still discussing details of the upgrade to the Max fleet, which was grounded worldwide after a second deadly crash this month in Ethiopia.

The cause of the accidents has not been determined, but investigators probing the crash of a Lion Air Max jet have focused on an automated system designed to use information from two sensors to help prevent a dangerous aerodynamic stall.

The sensors measure whether the plane is pointed up, down or level in relation to the direction of onrushing air. Software on the Max can push the plane's nose down if data from one of the sensors indicates the plane is tilted up so sharply that it could stall and fall from the sky.

AP FILE PHOTO

U.S. prosecutors are looking into the development of Boeing's 737 Max jets, there appeared to be "clear similarities" in the crash of an Ethiopian Airlines Max 8 and a Lion Air jet.

In the Lion Air case, the sensors malfunctioned and gave wildly conflicting information, and the plane crashed minutes after takeoff. A preliminary report described a grim fight by the pilots to control the plane as it pitched downward more than two dozen times.

It is not known whether the same flight-control system played a role in the March 10 crash of the Ethiopian Airlines jet shortly after takeoff from Addis Ababa, but regulators say both planes had similar erratic flight paths, an important part of their decision to ground the roughly 370 Max planes around the world.

The CEO of Ethiopian Airlines said Thursday that the carrier's pilots went through all the extra training required by Boeing and the U.S. Federal Aviation Administration to fly the 737 Max 8 jet that crashed, killing 157 people from 35 countries.

Tewolde Gebremariam said the training was meant to help crews shift from an older model of the 737 to the Max 8, which entered

airline service in 2017. In a statement, he said pilots were also made aware of an emergency directive issued by the FAA after the Lion Air crash, which killed 189 people.

The New York Times reported that the pilots of the Ethiopian plane never trained in a simulator for the plane. Gebremariam said that the 737 Max simulator is not designed to imitate problems in the new jet's flight-control software. He declined to say whether the pilots had trained on the simulator.

The Ethiopian jetliner was on a regularly scheduled flight from Ethiopia to neighboring Kenya.

In an emotional gathering Thursday in the Kenyan capital of Nairobi, the victims' relatives asked for lawyers to help them pursue their case.

The government will assist in obtaining death certificates for the victims, he said.

Officials have delivered bags of scorched earth from the crash site to family members of the victims because of the problems identifying the remains.

Facebook left millions of passwords readable by employees

By **BARBARA ORTUTAY** and **FRANK BAJAK**
AP TECHNOLOGY WRITERS

SAN FRANCISCO — Facebook left millions of user passwords readable by its employees for years, the company acknowledged Thursday after a security researcher exposed the lapse.

By storing passwords in readable plain text, Facebook violated fundamental computer-security practices. Those call for organizations and websites to save passwords in a scrambled form that makes it almost impossible to recover the original text.

"There is no valid reason why anyone in an organization, especially the size of Facebook, needs to have access to users' passwords in plain text," said cybersecurity expert Andrei Barysevich of Recorded Future.

Facebook said there is no evidence its employees abused access to this data. But thousands of employees could have searched them. The company said the passwords were stored on internal company servers, where no outsiders could access them.

The incident reveals yet another huge and basic oversight at a company that insists it is a responsible guardian for the personal data of its 2.2 billion users worldwide.

The security blog KrebsOnSecurity said Facebook may have left the passwords of some 600 million Facebook users vulnerable. In a blog post, Facebook said it will likely notify "hundreds of millions" of Facebook Lite users, millions of Facebook users and tens of thousands of Instagram users that their passwords were stored in plain text.

Facebook Lite is a version

designed for people with older phones or low-speed internet connections. It is used primarily in developing countries.

Last week, Facebook CEO Mark Zuckerberg touted a new "privacy-focused vision" for the social network that would emphasize private communication over public sharing. The company wants to encourage small groups of people to carry on encrypted conversations that neither Facebook nor any other outsider can read.

The fact that the company couldn't manage to do something as simple as encrypting passwords, however, raises questions about its ability to manage more complex encryption issues — such in messaging — flawlessly.

Facebook said it discovered the problem in January. But security researcher Brian Krebs wrote that in some cases the passwords had been stored in plain text since 2012. Facebook Lite launched in 2015 and Facebook bought Instagram in 2012.

Recorded Future's Barysevich said he could not recall any major company caught leaving so many passwords exposed internally. He said he's seen a number of instances where much smaller organizations made such information readily available — not just to programmers but also to customer support teams.

Security analyst Troy Hunt, who runs the "haveibeenpwned.com" data breach website, said that the situation is embarrassing for Facebook, but that there's no serious, practical impact unless an adversary gained access to the passwords. But Facebook has had major breaches, most recently in September when attackers accessed some 29 million accounts.

'Snakes ... why'd it have to be snakes?'

Dozens of rattlesnakes removed under Texas home

ALBANY, Texas (AP) — A Texas homeowner who reported seeing "a few" snakes under his home actually had dozens of rattlesnakes living beneath his house.

Big Country Snake Removal, which was called in to help, said the homeowner crawled underneath his home after strong winds disrupted his cable television service. He saw a few snakes, quickly crawled out and contacted the snake removal company.

Workers later pulled 45 rattlesnakes from underneath the home near Albany, about 150 miles west of Dallas, according to the company's Facebook page. Video shows numerous large snakes coiled up as workers use long poles to pull the animals out.

Snakes will begin slithering out from underneath Texas homes as the weather warms up, increasing the risk of snakebites, said Nathan Hawkins, the owner of Big Country Snake Removal.

PHOTO PROVIDED VIA AP

A Texas homeowner who reported seeing "a few" snakes under his home actually had dozens of rattlesnakes living beneath his house.

"They'll start emerging, and then what they're going to do is they're going to start trying to find food. And then they're going to start breeding," Hawkins said.

Hawkins told Abilene TV station KTXS that his company removes about 2,000 snakes per year.

State wildlife officials say that about 7,000 people are bitten by venomous snakes each year in the United States but very few bites are fatal. Officials say that on average, one to two people die in Texas each year from a venomous snake bite.

S&P 500 ends 2-day losing streak as tech leads stocks higher

By **DAMIAN J. TROISE** and **ALEX VEIGA**
AP BUSINESS WRITERS

Technology companies powered a broad rally for U.S. stocks Thursday, snapping the market's two-day losing streak.

Apple and chipmakers led the wave of buying, helping to drive the technology sector to an overall gain of 2.5 percent. The sector is up 21.1 percent this year so far, well ahead of the S&P 500's 10 other sectors.

Retailers and industrial companies also notched solid gains, which easily offset losses in stocks.

Levi Strauss soared as the storied jeans maker went public for the second time.

The latest gains erased the market's modest losses from a day earlier, when the Federal Reserve said it expected the U.S. economy to slow down and that it no longer expected to raise interest rates this year.

While investors appeared to be circumspect about the central bank's economic outlook, any concerns seemed to take a backseat Thursday to the likelihood that the Fed will hold off on raising interest rates. "Overall, stocks are rallying

because interest rates have gone down and we know that the Fed is going to continue to be the market's friend," said Karyn Cavanaugh, senior markets strategist at Voya Investment Management. "There's absolutely no reason not to be in stocks when you have an incredibly dovish Fed that is going to support asset prices."

The S&P 500 index rose 30.65 points, or 1.1 percent, to 2,854.88. The Dow Jones Industrial Average gained 216.84 points, or 0.8 percent, to 25,962.51

STOCKS LISTING CHANGE - REQUESTS WELCOME! Mutual fund listings will run on Saturdays.

The Sun Newspaper is tweaking the way stocks are listed in the daily paper. We will continue to run a wide range of stocks, but we're trying to eliminate stocks

our readers don't want. If you do not see your stock in the paper, please let us know and we will put it in the listings. Email the name of the company and the symbol to nlane@sun-herald.com, or call 941-206-1138. You can leave the stock name and symbol on voice mail. If you reach voice mail, please leave your contact information so your call can be returned.

Not everyone with an inactive vaccine needs vaccination

DEAR DR. ROACH: In a recent column on the measles vaccine, you wrote: "Older people may lose immunity, and some people born between 1963 and 1967 may have received an inactive vaccine." Wait, what?! How do we know if we were not properly vaccinated, and what should we do about it? — L.T.

ANSWER: There were two types of measles vaccines available between 1963 and 1967. One type was a live, attenuated vaccine, and there were three strains given: the Schwarz, Edmonston B and Moraten strains. If given on or after the 1st birthday, these strains continue to provide lifelong immunity.

A second, killed vaccine was available only during those years, and was frequently given as a series of two or three injections. People who received the killed vaccine are at risk for developing a condition called atypical measles if they are exposed to a person with measles.

If you have your original vaccination record, it should say what

Dr. Roach

type of vaccine you received. If it doesn't, or if you received killed vaccine, you should consider yourself inadequately vaccinated. High antibody titers by blood testing is not sufficient.

Not everybody who is inadequately vaccinated needs to run out and get the vaccine. However, people planning international travel or people who are in an area of the United States with measles outbreaks and at high risk for exposure should be revaccinated with two doses of MMR vaccine (there is no single-dose measles vaccine).

DEAR DR. ROACH: Your recent article was pro-vaccination. I also have been pro-vaccination until recently, when my daughter brought to my attention that the vast majority of vaccines are made with aborted fetal tissue. I checked and found this to be the truth. I am appalled that this fact is not publicized and that I have had vaccines made with aborted fetal tissue. That I have unintentionally participated in the murder of innocent children through vaccination is a betrayal of my trust in the medical profession and my personal faith. You may find that this is the major reason for the decline in vaccination rates. There should be an informed consent before any vaccination occurs with the option of being vaccinated with a serum that is not contaminated with fetal tissue. — J.G.

ANSWER: In July 1962, a pregnant woman was exposed to rubella, and underwent a therapeutic abortion given the high likelihood of severe fetal damage. The cells from this fetus were used, and

continue to be used, to produce the rubella vaccine, which requires a cell line. From this one fetus, over 300 million doses of rubella vaccine have been produced. It is certainly not the case that production of the vaccine requires any additional abortions, nor has there ever been fetal tissue in any vaccine, as vaccines are purified extensively.

The National Catholic Bioethics Center wrote an opinion, which states:

"One is morally free to use the vaccine regardless of its historical association with abortion. The reason is that the risk to public health, if one chooses not to vaccinate, outweighs the legitimate concern about the origins of the vaccine. This is especially important for parents, who have a moral obligation to protect the life and health of their children and those around them."

From one family's tragedy came cells that have prevented 11 million deaths and 4.5 billion cases of disease. It is my position that using the vaccine honors that loss.

Dad allows his daughter's lice infestation to linger

DEAR ABBY: I take care of two girls. I have never asked for money from their dad. Because they are poor, I go to great lengths to make sure they get the same advantages as everyone else.

I took the girls to the hair salon because I wanted them to feel pretty. When it was the youngest girl's turn, the stylist found lice in her hair! She was at what they call an "infestation period." After that it's an infection and then baldness.

I went to their father and asked about the lice. He knew the entire time that she had lice and did not warn me or my family. Abby, he knowingly put my loved ones at risk! I know he doesn't care about the lice, so he's probably making her go to school despite the lice policy. What should I do? — Infested In California

DEAR INFESTED: Father of the year this man isn't.

Of course he should have warned you so you could caution your children. He should also be watching his children more closely to be sure they shower regularly. Keep an eye on him, because he may be neglecting his girls in other

Dear Abby

ways. Could he be unaware that a head lice infestation can be treated?

Because you are concerned about the girls' welfare, perhaps the school should be alerted.

According to the Centers for Disease Control, as many as 12 million lice infestations occur in the United States each year, and they are NOT caused by poor hygiene. While they may be inconvenient and cause severe itching, the condition is treatable, and they do not generally cause baldness.

According to kidshealth.org, head lice are "spread mainly through head-to-head contact, but sharing clothing, bed linens, combs, brushes and hats also can pass them along. Kids are most prone to catching lice because they tend to have close physical contact with each other and share personal items."

Traveling solo as a woman

Dear Heloise: You offer travel hints for families, but what about us single women who want to travel but can't convince anyone else to go with us? Isn't it dangerous to TRAVEL ALONE to foreign countries? — Andrea Y., Pulaski, Tenn.

Andrea, first check with the State Department's Bureau of Consular Affairs (travel.state.gov) to find out which countries they ask you to stay away from. After that, go online and check out travel sites for suggestions and advice. Traveling alone doesn't have to be terrifying, lonely or dull. You'll meet people, conquer your fears and have a nice time if

Hints from Heloise

you let yourself enjoy the experience. — Heloise
Dear Heloise: Sometimes luggage tags get ripped off or somehow lost. For this reason, I always make sure there is an address label on the handle of my luggage as a backup to prevent lost luggage. — Ellen M., Sun Valley, Nev.

RULES

- Each row and each column must contain the numbers 1 through 4 (easy) or 1 through 6 (challenging) without repeating.
- The numbers within the heavily outlined boxes, called cages, must combine using the given operation (in any order) to produce the target numbers in the top-left corners.
- Freebies: Fill in single-box cages with the number in the top-left corner.

HOROSCOPE

ARIES (March 21-April 19). Don't worry; you're good at being a person. This is not even a question. There are certain things you don't need to question and this is one of them. Move along.
TAURUS (April 20-May 20). Maybe you haven't been able to exactly control your thoughts on a certain matter. (Some thoughts can be incredibly addictive and harder to wrangle than wild beasts.) But if you control what you say out loud, that's a start.
GEMINI (May 21-June 21). Too much attention on anything will change its state, so the main thing is to be careful what you place attention on. Attention can either make a good thing out of a bad thing or make a bad thing out of a good thing.
CANCER (June 22-July 22). You've felt more ready to take on the world. But this isn't so bad - this part where you acknowledge your fragility. There's so much you can do when you accept all the different parts of yourself.

LEO (July 23-Aug. 22). Gravitation involves flying and anti-gravitation involves falling, because "up" and "down" are somewhat interchangeable. So don't be too quick to decide where you are right now. It's that you are, not where you are, that matters.
VRGO (Aug. 23-Sept. 22). Your life hypnotizes you. There's a pattern, and it lulls you into a rhythm. Then that rhythm brings a frame of mind that allows for unexpected things to spring forth.
LIBRA (Sept. 23-Oct. 23). You put all your focus on making yourself better and it works; you get better. Bonus: It even feels somehow very easy to improve. Savor this rare and uncomplicated day.
SCORPIO (Oct. 24-Nov. 21). What makes you feel better in the short term may not be right for your long-term plan. Today, you are better off serving your long-term plan rather exclusively.
SAGITTARIUS (Nov. 22-Dec. 21). If you can provide a framework in which people can use their talents, then this is doing something amazing that will have repercussions beyond what you could ever imagine.

CAPRICORN (Dec. 22-Jan. 19). To express yourself in a way that is better than the last time, that is definitely unique, that lands on the ear and heart of your audience in a certain way is an expression of genius.
AQUARIUS (Jan. 20-Feb. 18). All of the stories will change in time. The true ones will become false, the false ones will become true. The difference between history and mythology is not a difference of content, but years.
PISCES (Feb. 19-March 20). The middle is a good place to be today; you're protected at either side, so long as no one crowds in or gets too close. You'll learn what's happening for the majority.
TODAY'S BIRTHDAY (March 22). People love you for reasons unreasonable, mysterious and obvious. People love you for you and who you'll be and who you were once. Love is subjective, also beyond the rules of subjectivity and objectivity. Mostly, this year, you'll enjoy so much love you won't even remember a time you were without it. Leo and Taurus adore you. Your lucky numbers are: 8, 20, 11, 40 and 17.

GOREN BRIDGE

WITH BOB JONES

©2019 Tribune Content Agency, LLC

A TOUGH ONE

East-West vulnerable, East deals

NORTH		EAST	
♠ 10 8 7		♠ 9 6 4 3	
♥ A 10 9 4		♥ Q J	
♦ J 9 5		♦ A K 10 6	
♣ A 7 5		♣ 8 6 4	
WEST		SOUTH	
♠ K J		♠ A Q 5 2	
♥ 8 7 5 2		♥ K 6 3	
♦ Q 8 4 3		♦ 7 2	
♣ K J 9		♣ Q 10 3 2	

The bidding:
EAST Pass
SOUTH 1♣
WEST Pass
NORTH 1♥
 Pass INT All pass

Opening lead: Three of ♦

The contract of one no trump can be a difficult one to play. The opponents have roughly the same values as you do, sometimes more, and they have the advantage of the opening lead.

East won the opening diamond lead with his 10, cashed the king of diamonds, and shifted to the six of spades. Declarer played low from his hand and lost to West's jack. West

cached the queen of diamonds and led a diamond to East's ace. South discarded a heart from dummy and one heart and one club from his hand.

East shifted to the queen of hearts. South won this with his king and did well to play a heart to dummy's ace, dropping the jack from East. East had shown up with 10 points and had passed as dealer, meaning that he couldn't hold either black king. A spade to the ace brought more good news when the king fell from West. Declarer knew that West had started with two spades, four hearts, and four diamonds. That left him with three clubs, presumably to the king. South led a low spade to dummy's 10, forcing West to shed a heart. The queen of spades was now good, but there was no entry to it.

Declarer cashed dummy's 10 of hearts and discarded the queen of spades, leaving a three-card ending with only clubs in the North, South, and West hands. A low club to declarer's 10 lost to West's jack, but West was forced to lead a club from the king and declarer had his contract. Phew!

FENTANYL

FROM PAGE 1

in late 2018, but Spencer looked deeper with this report into the demographic characteristics of those people dying from fentanyl overdoses.

Increased trafficking of the drug and increased use are both fueling the spike in fentanyl deaths. For drug dealers, fentanyl is easier to produce than some other opioids. Unlike the poppies needed for heroin, which can be spoiled by weather or a bad harvest, fentanyl's ingredients are easily supplied; it's a synthetic combination of chemicals, often produced in China and packaged in Mexico, according to the U.S. Drug Enforcement Administration. And because fentanyl can be 50 times more powerful than heroin, smaller amounts translate to bigger profits.

Jon DeLena, assistant special agent in charge of the DEA's New England Field Division, said 1 kilogram of fentanyl, driven across the southern U.S. border, can be mixed with fillers or other drugs to create 6 or 8 kilograms for sale.

For drug users, fentanyl is more likely to cause an overdose than heroin because it is so potent and because the high fades more quickly than with heroin. Drug users say they inject more frequently with fentanyl because the high doesn't last as long — and more frequent injecting adds to the risk of overdose.

There are several ways fentanyl can wind up in a dose of some other drug. The mixing may be intentional, as a person seeks a more intense or different kind of high. It may happen as an accidental contamination, as dealers package their fentanyl and other drugs in the same place.

Or dealers may be adding fentanyl to cocaine and meth on purpose, in an effort to expand their clientele of users hooked on fentanyl.

THE DAYTONA BEACH NEWS-JOURNAL VIA AP

Rescue workers carry an injured child off the beach at Ormond-by-the-Sea.

BEACH

FROM PAGE 1

calm. Everyone was awake and responding," Highway Patrol Lt. Kim Montes said three of the children — who are ages 3 to 11 — and Johnson were taken by ambulance to a nearby hospital. A 5-year-old suffered traumatic

injuries and was airlifted to another hospital.

"She received a serious gash on her head," Montes said.

None of the other injuries appeared to be life-threatening, she said.

Johnson was ticketed for careless driving and troopers recommended a driver's license re-examination.

FLOODING

FROM PAGE 1

marks measured in 30 places in Nebraska, Iowa and South Dakota, Kansas City forecaster Kevin Lao said.

The river "remains vulnerable to moderate flooding for the remainder of the spring and early summer," Lao said. "People should be prepared for major flooding along the Missouri River ... going into the future."

Most of Nebraska, except right along the Missouri River, is unlikely to see major flooding

again this year, but the rest of the flooded area is still prone to more, Low said.

Several factors will likely combine to create a pulse of flooding that will eventually head south along the Mississippi: above average rainfall this winter — including 10 to 15 inches earlier this year in a drenching along the Ohio and Tennessee Valleys; the third wettest year in U.S. history; and rapidly melting snow in the Upper Midwest.

Extra rain will bring more farm runoff down the Mississippi, which will likely lead to more oxygen-starved areas in the Gulf

of Mexico and likely make the summer dead zone larger than normal, said Edward Clark, director of NOAA's National Water Center in Tuscaloosa, Alabama.

It's too early for scientists to make the complex calculations to see if human-caused climate change played a role in the flooding. However, scientists said the conditions are consistent with what they expect from global warming.

"You can think of climate change as steroids for these rain events," said Texas A&M University climate scientist Andrew Dessler.

BUMP STOCK

FROM PAGE 1

Orlando and Parkland, Florida.

Unlike with the decade-long assault weapons ban, the government isn't allowing existing owners to keep their bump stocks. They must be destroyed or turned over to authorities. And the government isn't offering any compensation for the devices, which can cost hundreds of dollars. Violators can face up to 10 years in prison and thousands of dollars in fines.

Lunsford bought three bump stocks over the years and wanted to recoup at least some of the money he shelled out, but it bothers him that he and others have been put in this position.

"I've never committed a crime with it, and just because of that one killer up in Las Vegas that used one that killed a bunch of people, they're going to make people pay for it," he said.

But Shannon Watts, the

founder of Moms Demand Action, said: "It was because of bump stocks that the gunman in Las Vegas was able to kill 58 people from a hotel window. ... It just goes to show the incredible lethality and dangers of these accessories."

The prohibition goes into effect less than two weeks after the mosque shootings in New Zealand that left 50 people dead. New Zealand's prime minister reacted swiftly to the bloodshed by announcing on Thursday a ban on military-style semi-automatic firearms and high-capacity magazines.

The U.S. Bureau of Alcohol, Tobacco, Firearms and Explosives first ruled that bump stocks were legal in 2010, and since then, the government estimates more than 500,000 have been sold.

They were originally created to make it easier for people with disabilities to fire a gun. The device essentially replaces the gun's stock and pistol grip and causes the weapon to buck back

and forth, repeatedly "bumping" the trigger against the shooter's finger.

Technically, that means the finger is pulling the trigger with each round fired, a distinction that led the ATF to allow the devices.

They were considered by most gun owners to be a novelty and weren't widely known until a gunman attached bump stocks to several of the AR-type rifles he used to rain bullets on concertgoers outside his high-rise Las Vegas hotel room.

The attachments were swiftly condemned by even ardent gun supporters, including President Donald Trump, who directed the Justice Department to rewrite the regulations to ban them. The impending ban was announced in mid-December.

Owners are being advised to either destroy them by crushing, melting or cutting them up or set up an appointment with the ATF to hand the devices over.

A week before the ban was set

to take effect, bump stocks were being sold on websites and by at least one company that took over the inventory of Slide Fire, the Texas manufacturer that was the leading maker and has since shut down.

Ryan Liskey, of Virginia's Shenandoah Valley, said he isn't sure what to do with his bump stock. He said he got the device as a lark after trying it on the range with some friends.

Starting next week, a person in possession of a bump stock can face federal charges of illegally possessing a machine gun.

The rule was met almost immediately with resistance from gun rights advocates. A federal judge in Utah refused to block it last week, and in February, a judge in Washington said the Trump administration can move forward with it, saying it was reasonable for the ATF to determine a bump stock performs the same function as a machine gun. An appeals court is set to hear arguments in the case on Friday.

BAN

FROM PAGE 1

comes the day after the government announced a ban on "military-style" semi-automatic firearms and high-capacity magazines like the weapons that were used in last Friday's attacks.

An immediate sales ban went into effect to prevent stockpiling, and new laws would be rushed through Parliament that would impose a complete ban on the weapons, Prime Minister Jacinda Ardern said.

"Every semi-automatic weapon used in the terrorist attack on Friday will be

banned," Ardern said.

The prohibition includes semi-automatic guns or shotguns that can be used with a detachable magazine that holds more than five rounds. It also applies to accessories used to convert guns into what the government called "military-style" weapons.

The ban does not apply to guns commonly used by farmers and hunters, including semi-automatic .22 caliber or smaller guns that hold up to 10 rounds, or semi-automatic and pump-action shotguns with non-detachable magazines that hold up to five rounds.

The legislation is supported not only by Ardern's

liberal Labour Party but also the conservative opposition National Party, so passage of the legislation is expected. New Zealand does not have a constitutional right to bear arms.

The announcement brought immediate comparisons to the United States, where contentious debate over gun control remains unresolved after frequent mass killings.

Firearms experts said the ban in New Zealand has wide support.

Polly Collins of Christchurch was thrilled to hear of Ardern's announcement as she visited a memorial to the victims.

"The prime minister is amazing," she said. "It's

not like in America, where they have all these things and then they go 'Oh yeah, we'll deal with the gun laws,' and nothing's done."

One of New Zealand's largest gun retailers, Hunting & Fishing New Zealand, said it supports "any government measure to permanently ban such weapons."

"What (Ardern's) done is a very brave move, and it's the kind of move that can only be done in a common-law country where guns are not a right," said Alexander Gillespie, a professor of international law at Waikato University. "Guns are a real privilege. If there was a legal right like there is in the United

States, this would be much more difficult."

There are nearly 250,000 licensed gun owners in New Zealand, which has a population of 5 million. Officials estimate there are 1.5 million guns in the country.

She said there will be "tightly regulated" exemptions for some owners such as hunters and farmers. The government said the police and military would be exempt. Access for international shooting competitions would also be considered.

Ardern's announcement came as authorities said all 50 bodies from the attacks were formally identified.

ALMANAC

Today is **Friday, March 22**, the 81st day of 2019. There are 284 days left in the year.

Today in history

On **March 22, 1765**, the British Parliament passed the Stamp Act to raise money from the American colonies, which fiercely resisted the tax. (The Stamp Act was repealed a year later.)

On this date

In **1882**, President Chester Alan Arthur signed a measure outlawing polygamy.

In **1933**, during Prohibition, President Franklin D. Roosevelt signed a measure to make wine and beer containing up to 3.2 percent alcohol legal.

In **1978**, Karl Wallenda, the 73-year-old patriarch of "The Flying Wallendas" high-wire act, fell to his death while attempting to walk a cable strung between two hotel towers in San Juan, Puerto Rico.

In **1988**, both houses of Congress overrode President Ronald Reagan's veto of the Civil Rights Restoration Act.

Ten years ago: A single-engine turboprop plane headed to a Montana ski resort nose-dived into a cemetery short of a runway in Butte, killing all 14 aboard, including seven children.

Today's birthdays

Bible verse

"Touch not mine anointed, and do my prophets no harm." — **I Chronicles 16:24.**

Be very careful how you treat God's anointed. You may get by abusing them for a while but sooner or later you will be reminded of these words. Pray daily for God's servants and if they are at fault God will deal with them.

ODD NEWS

Pursuit suspect breakdances before surrendering

LOS ANGELES (AP) — Law-breaking turned into breakdancing at the end of a Southern California vehicle pursuit.

TV news helicopters were overhead Tuesday night when a suspect pursued by the California Highway Patrol finally surrendered, but broke out into a 10-second dance before being handcuffed. The pursuit began in the Calabasas area and headed east into Los Angeles, then the motorist exited the freeway in the San Fernando Valley.

A CHP cruiser finally bumped the car and spun it out. The driver got out with hands up but did not appear to be fully complying with officers pointing guns at him.

The driver suddenly busted a move before being busted.

Power failure is not only caused by hurricanes.

Kabengele, Mann lead 4th-seed FSU over Vermont

Seminoles pull away from tight game, face dangerous No. 12 Murray State next

AP PHOTO

Florida State's David Nichols celebrates in the second half against Vermont in the first round of the NCAA Tournament in Hartford, Conn. Florida State won and advanced to face Murray State.

HARTFORD, Conn. (AP) — Florida State got a first-round scare from sharp-shooting Vermont.

In the end, the Seminoles were just too long and too strong for the upset-minded Catamounts.

Mfiondu Kabengele had 21 points and 10 rebounds, and Florida State withstood a barrage of 3-pointers from 13th-seeded Vermont in a 76-69 victory Thursday in the opening round of the NCAA West Regional.

Terance Mann added 19 points for the fourth-seeded Seminoles (28-7), who were tied with the Catamounts at halftime but pulled away late.

“I thought we exercised physicality, the quality

of our depth, our athleticism and strength in the second half, getting the ball to Mfiondu,” said FSU coach Leonard Hamilton. “I thought he was a little bit bigger, stronger and taller.”

Anthony Lamb had 16 points to lead a balanced, long-range attack for Vermont (27-7), which lost for the first time in seven games. Three Catamounts — Stef Smith, Ernie Duncan and Ben Shungu — each finished with 15 points.

The America East champs went small — no starter stood over 6-foot-6 — and stayed close by hitting 16 of 32 3-point attempts. The Seminoles countered by wearing out Vermont down low, outscoring the Catamounts

30-14 in the paint.

A dunk by Kabengele gave Florida State a 50-45 lead with nine minutes left, part of a 6-0 run that put the Seminoles ahead for good. Another by the 6-10 sophomore made it 61-53, and the cheers of Vermont fans, who made the four-hour drive south from Burlington, gave way to the tomahawk chop from behind Florida State's bench.

Florida State led by 12 with a minute left and withstood a late run by Vermont. FSU will face No. 12 Murray State next.

BOYS SOCCER PLAYER OF THE YEAR

Passion pushes Arango to become the best

North Port scoring juggernaut outsmarted foes, hated losing

By JACOB HOAG
SPORTS WRITER

His passion is clearly seen any time he steps on the field and his leadership is often unmatched.

North Port forward Camilo Arango loves to outsmart an opposing keeper, and he absolutely hates to lose.

Sometimes his passion for winning, which stems from the intense devotion to the game he inherited from his home country of Colombia, boils over and gives off an unfair depiction of who he really is.

He doesn't yell at refs because of arrogance, it's because of his adoration for a game he's played since he was a child and a burning desire to compete on every 50-50 ball and every attack.

“The love I have for this sport makes me into a different person on and off the pitch,” Arango said. “It makes me competitive and somewhat aggressive, especially being in the role of a leader this year. Anyone who has love for something, especially a sport, would understand me.”

“I always want to be playing soccer, I always want to be training. I'm

ARANGO | 3

North Port's Camilo Arango scored 20 goals in his senior year, earning the honor of Sun Boys Soccer Player of the Year.

five years and \$50 million, locking up the 26-year-old ace through his age 30 season — answering a lot of questions about his plans going forward.

“It'll help me pitch better, for sure,” Snell said. “Just because I'm not thinking about anything now, if I was even thinking about anything before. But the goal is still the same for me. The

money is good security for me, but I'm here to get better. I want to be the best.”

Along with Snell, the Rays also locked up second baseman/outfielder Brandon Lowe to a 6-year, \$24 million deal earlier this week, and the 24-year-old showed why he's worth the money on Thursday — crushing a three-run homer in the

first in a 2-for-4 effort.

“Hopefully we can keep this vibe going, and hopefully people see the Rays are investing into this team a lot with B. Lowe and me,” Snell said. “They're continuing to show that they care, and that they want to win. And they want to win now.”

SUN PHOTO BY TOM O'NEILL

After creating a stir by giving a \$15,500 raise to Cy Young Award winner Blake Snell, the Tampa Bay Rays have agreed to a five-year, \$50 million contract with the lefty through 2023.

Rays settle up with Snell on \$50 million deal

Five-year contract puts ends to distraction

By MARC TOPKIN
TAMPA BAY TIMES

PORT CHARLOTTE — The Rays have signed Cy Young award winner Blake Snell to a five-year, \$50-million deal that could keep him with the team through 2023.

The contract covers this season, Snell's three years of arbitration eligibility and his first year of free agency, which is significant.

There are \$2 million in escalator clauses that could raise the total value, though no options. The Rays said it is the largest contract given to a pitcher before reaching arbitration.

“Since being drafted in 2011, Blake's talent and hard work have enabled him to establish himself as one of the most dominant pitchers in the game,” said Rays principal owner Stuart Sternberg said in a statement. “We're looking forward to seeing him take the mound for the Rays for years to come.”

The agreement was somewhat unexpected given that Snell said recently he planned to go to arbitration after past discussions on a long-term deal failed to produce an agreement, and further when the team opted to stick with its salary structure and give him just a \$15,500 raise for winning the award, to \$573,700, for this season.

Under the new contract, Snell gets a \$3 million signing bonus and salaries of \$1 million this season, then \$7 million in 2020, \$10.5M in 2021, \$12.5M in 2022 and \$16M in 2023, with the opportunity to increase that by up to \$2M based on top 3 Cy Young award finishes.

The Snell agreement comes a day after the Rays signed infielder/outfielder Brandon Lowe to a deal that guarantees him \$24 million over six years and could be worth up to \$49 million over eight.

Charlotte 6, Palm Beach 3

Charlotte edges Palm Beach Central, takes victory on Thursday 6-3
The Tarpons got things started in the first inning. Aaron Martins drove in two when on a double.

Charlotte tallied three runs in the third inning and put the pressure on, lead by singles by Hal Turner and John Dominguez.

Cade Reich got the win for the Tarpons. He surrendered one run on two hits over four innings, striking out seven. Kevin Conway threw three innings in relief out of the bullpen.

Baxt took the loss for Palm Beach Central. He lasted three innings, allowing six hits and five runs while striking out three.

Charlotte tallied 12 hits in the game. Dominguez, Conway, Martins, and Turner each collected two hits to lead Charlotte. Colan led Palm Beach Central with two hits in two at bats.

NBA: Roundup

Jokic tops balanced Nuggets effort

By IAN QUILLEN
ASSOCIATED PRESS

WASHINGTON — Nikola Jokic had 15 points and 11 assists, and the Denver Nuggets beat the fading Washington Wizards 113-108 on Thursday night for their fifth straight victory.

Paul Millsap, Gary Harris, Jamal Murray and Torrey Craig also added 15 points for the Nuggets, who were playing for the first time since clinching their first playoff berth in six years with Monday's win in Boston.

Eight players reached double figures for Denver, which began the night a half-game behind Western Conference leader Golden State. The Warriors played later Thursday.

Bradley Beal scored 25 points and Tomas Satoransky had 16 points and 10 assists for Washington, which lost its third straight.

Thomas Bryant added 22 points in his first start in a month, but the 11th-place Wizards' playoff hopes continued to fade. They're now six games back of eighth-place Miami with nine remaining.

CHARLOTTE 113, MINNESOTA 106

Kemba Walker scored 31 points, rookie Miles Bridges had 11 points and 12 rebounds for his first career double-double on his 21st birthday, and the Charlotte Hornets handed the Minnesota Timberwolves their fifth straight loss, 113-106 on Thursday night.

Jeremy Lamb added 13 points and 10 rebounds for the Hornets, who won for only the fifth time in their last 16 games.

Karl-Anthony Towns led Minnesota with 21 points and 16 rebounds. Hornets coach James Borrego turned to his youth after entering the night 3 1/2 games behind the eighth-place Miami Heat in the Eastern Conference and with the team's playoff hopes fading fast.

Second-year player Dwayne Bacon got the start over Nic Batum, who earns \$24 million per season. Bridges continued to start while rookie Devonte Graham and second-year pro Malik Monk (14 points) also saw action.

Lightning catch seventh straight

Tampa Bay lights up scoreboard with six goals on Carolina

RALEIGH, N.C. (AP) — Ryan Callahan scored the tiebreaking goal midway through the third period, and the Tampa Bay Lightning picked up their seventh straight win with a 6-3 victory over the Carolina Hurricanes on Thursday night.

Steven Stamkos had a goal and two assists and Tyler Johnson, Anthony Cirelli, Brayden Point and Ryan McDonagh all scored for the Lightning, who scored four unanswered goals in the third period to erase a 3-2 deficit.

Victor Hedman had three assists and Louis Domingue stopped 25 of 28 shots for his 13th win in his past 14 starts. Lightning forward Nikita Kucherov became the first player to reach 120 points in a season since 2006-07 with his assist on Johnson's first-period goal.

Nino Niederreiter, Dougie Hamilton and Jordan Staal scored for the Hurricanes. Staal's short-handed, go-ahead goal in the second period came after he returned from hit to the head from Lightning center Yann Gourde, who was given a match penalty and ejected.

Curtis McElhinney made 26 saves for the Hurricanes, who are in a race for a playoff spot in the Eastern Conference.

Stamkos opened the scoring at 3:20 of the first on a power play with a wrist shot into the upper corner of the net, but

Carolina Hurricanes' Jordan Staal falls to the ice with an injury as Andrei Svechnikov (37), struggles with Tampa Bay Lightning's Braydon Coburn (55) in Raleigh, N.C., Thursday. AP PHOTO

Niederreiter responded with a hard wrist that nicked the knob of Domingue's stick on its way to the upper right corner midway through the first.

Tampa Bay opened the third on the attack and pulled into a 3-3 tie less than four minutes in.

After Erik Cernak got called for tripping and Warren Foegele was sent off for embellishment to create a four-on-four matchup, Cirelli tied the score when he fought through a tie-up with Teuvo Teravainen to get just enough of Stamkos' centering pass and push it into the net.

FLORIDA 4, ARIZONA 2

Aleksander Barkov scored two goals and Jonathan Huberdeau had three assists as the Florida Panthers beat the Arizona Coyotes 4-2 Thursday night.

Mike Hoffman and MacKenzie Weegar also scored goals for the Panthers, who won for the first time in three games. Roberto Luongo made 32 saves and broke a five-game losing streak. Evgenii Dadonov added two assists.

Brad Richardson and Michael Grabner scored for the Coyotes, who lost

their third straight. Darcy Kuemper stopped 18 shots.

BOSTON 5, NEW JERSEY 1

Patrice Bergeron scored twice and reached the 30-goal mark for the fifth time and the streaking Boston Bruins beat the injury-ravaged New Jersey Devils 5-1 on Thursday night to open a six-point lead over Toronto in the race for second place in the Atlantic Division.

David Pastrnak, Danton Heinen and David Backes also scored for the Bruins, who are 16-3-1 in their last 20 games.

Sun Preps Boys Soccer All-Area Team

Ben Crumpton,
Forward, Lemon Bay

Crumpton finished as a close second in Player of the Year voting after a stellar 20-goal season. He paced the offense for the most successful team in Lemon Bay history. Crumpton helped lead the Mantas to a 12-7 record and the second round of the playoffs.

"He's a person who can control the game and see the game with a perspective that other players can't, so he has a chance to score where others don't," Lemon Bay coach Emilio Baradith said. "You can tell he's from a soccer culture because that's how he sees the game."

Harley Rusher,
Midfielder, Lemon Bay

Rusher earned the right of team captain and filled in a gap that the Mantas needed in the midfield. He helped spur the offense along and led the team with 13 assists on the year. In the district quarterfinals, Rusher sealed the win on a free kick to beat Dunbar.

"Team captain of most successful Lemon Bay team in recent memory," Lemon Bay assistant coach Mark Hertz said.

"He was center midfielder and the missing ingredient in transitioning to a controlled, possession oriented passing game, something LB desperately needed after the departure of Blake Dean. His work ethic and knowledge of the game are in the top 10 percent of all area players."

Adam Berry, Defender,
Lemon Bay

A strong offense often starts with a solid defense and Berry helped lead the back line for Lemon Bay. A knee injury kept him sidelined for the past two years, but he thrived as a junior.

"Adam is a junior who did not play the last two years due to a major knee injury while playing football as a freshman," Hertz said. "He is easily the comeback player of the year for our team. Anchor of the defense, our center back, captain, and highly skilled player. One of the key reasons for our success this year."

Tyler Amaral, Forward,
Charlotte

Amaral could be the future of the Tarpon program if you ask his coach. As a freshman, he scored five goals with an assist and also had a game-winner in his first game on the varsity squad.

"This guy is going to be a player to be watched," Charlotte coach Greg Winkler said. "He arrived late because he was pulled up for Charlotte's playoff football team. He made an immediate

impact and provided a spark mid-season."

Jonathan Villarreal,
Defender/Midfielder,
Charlotte

Villarreal set the tone for the Charlotte defense. He set the formations, directed the ball and led the team by example. He also scored two goals with seven assists on the offensive end.

"Everything went through Johnny, he ran the entire field, a force on defense and a creator of scoring opportunities," Winkler said. "Until we found a forward, much of his work went to waste on the attacking end."

Jeremiah Bohdanets,
Forward,
North Port

Not to be overshadowed by the Player of the Year, who flanked him on attacks, Bohdanets was just as effective. He scored 15 goals on the year and finished second in District 4A-11 with 32 points on a productive offensive team.

"Jeremiah is a coach's player," North Port coach Joey Sorbino said. "He shows up early and leaves late. As only a sophomore he was able to make a run at scoring leader on our team and showed many teams what they will have to deal with for two more years. Jeremiah excels on the field while balancing

many off the field obligations and holds a 4.8 weighted GPA."

Andrew Syzonenko,
Defender,
North Port

Stats don't always find their way to defenders, but their importance is major. Syzonenko was a key factor on a defense that didn't give up a ton of goals.

"Andrew's name will not show up on the score sheet every night," Sorbino said. "But he is a vocal leader and the core of our back line that only allowed 12 goals all regular season."

Alvaro Amaya,
Goalkeeper,
North Port

After playing the field last year, Amaya came on strong as the Bobcats' brick wall in net. He forced nine shutouts with 110 saves and only allowed 12 goals in 16 regular season games.

"Alvaro emerged as our sure fire goalkeeper this year for our program that was in desperate need of a full-time solution," Sorbino said. "Not only did he exceed our expectations, but went on to lead the district in nearly every category and set a new school record for shutouts in a season."

Hunter Cole,
Goalkeeper, Port
Charlotte

Cole never missed a game or a practice this season and it

showed on the field as he was one of the top keepers in the area. He stopped 228 shots and three penalty kicks despite being often pressured. Cole's season high came against Cape Coral where he had 27 saves in a game Port Charlotte lost 1-0.

"Hunter has no fear of the opposing players," Port Charlotte coach Joe Roca said. "Hunter is a team player and a role model for his teammates. His positive attitude is infectious and led the team even in times of loss and disappointments. His respect for the game and his coaches is admirable and most appreciated. I will miss Hunter who has been a star player in all respects."

Connor Anderson,
Midfielder, Venice

Anderson stepped in admirably as the place-kicker on the football team and continued his success during soccer season. He was also thrown in on defense to use his 6-foot-1, 150-pound frame to toughen up a young squad. He scored one goal with one assist.

"Connor did a great job stepping into a leadership role as one of the few returning players from last year and was a great role model for our young team thanks to his work ethic," Venice associate head coach Greg Atkin

Leandro Luna,
Midfielder, DeSoto

Luna was the emotional leader of the team and helped on both offense and defense.

"He's a three year varsity player as a center mid," DeSoto coach Jose Garcia said. "He is the leader and mentor on the team at a time when we needed someone to step up into that role. He is an example of a player that plays hard until the final whistle regardless of the score."

Nick Renaud, Forward,
Imagine School

Renaud set school records for goals and points as a senior. He was the engine of the offense, leading the team with 11 goals and 11 assists. He gained the attention of opposing teams, but still managed to score.

"Nick once again proved his commitment and leadership both on and off the field," Imagine coach Ryan Alvarez said. "Leading the team in goals and assists for the second straight season, he was double teamed much of the year."

HONORABLE MENTION: Alex Johnson (GK, Lemon Bay), Keagan Hoaglin (MF, Lemon Bay), Thomas Sousa (F, North Port), Gavin Pennell (GK, Charlotte), David Lawson (MF, Charlotte), Brock MacDonell (F, Venice).

RAYS FROM PAGE 1

Following up Brandon Lowe, Rays prospect Nate Lowe — who will begin the season in the minor leagues — also crushed a three-run homer as Tampa Bay took a 6-1 lead in the first.

While Snell's extension and both of the Lowes' blasts stole the show on Thursday, the pitching debut of Brendan McKay was another reason for optimism among Rays fans.

Though the 2017 first-round pick is just 23-years-old and was facing big-league hitters for the first time, McKay had little trouble in his two innings of work.

Aside from a first-pitch

fastball that Braves third baseman Austin Riley smoked for a solo home run in the first inning, McKay was otherwise in control on the mound — throwing 17 of his 28 pitches for strikes.

McKay's two innings featured four strikeouts in which he used his fastball (around 93 mph), curveball, changeup and cutter to work quickly through the lineup.

"I think he's got excellent stuff," Rays catcher Mike Zunino said of McKay. "I was able to talk to him a little bit afterwards and just sort of tell him what I thought of it. And I thought he was excellent."

"He was very poised, very polished. Being only a year and some change out of college, I think the upside is extremely

high with him." One day, McKay could be the next former first-round pick to sign a long-term extension with the Rays. But for now, he's simply happy that he got to put on a big league uniform and face off against hitters at the highest level of pro baseball.

"Yeah, I was getting excited, but I wasn't trying to overplay what it is," McKay said of learning about his Thursday start.

"I told my parents and they came down this week so they got to see me. I let me family members know so they can follow along. It's a great experience."

Duffy returns to the lineup

Absent for the majority of spring training due to a nagging hamstring injury, Rays infielder

Matt Duffy batted leadoff and played third base on Thursday.

Though he was sent down on strikes in each of his three at-bats, the veteran said it was a positive step forward just to play baseball without any setbacks.

"The way I mentally went into today was to see pitches, and I think after I got one strike on me, I was a little bit too much in that mode. Mentally, I wasn't the most aggressive," he said.

"Combine not being mentally aggressive with poor timing, and that's what you get. You can almost look at today as an off day."

Zunino's power surge

Rays catcher Mike Zunino reached 20 home runs just once in his first four seasons at the MLB

SUN PHOTO BY TOM O'NEILL

Rays catcher Mike Zunino (left) hit his fourth home run of the spring, Thursday, while pitching prospect Brendan McKay (right) started against the Braves and threw two innings of two-hit, one-run ball with four strikeouts.

level, but has become a power threat over the past couple of years — hitting 45 homers over his past 237 games.

Thursday, Zunino unloaded on a deep shot

over the centerfield wall for his fourth home run of the spring and looks to provide Tampa Bay with some offense from the catcher position for the first time in years.

ARANGO FROM PAGE 1

just trying to get the best out of me every game"

His fire and sometimes freakish quickness and athleticism made him a hard player to defend. A 20-goal season earned him the title of the Sun's Boys Soccer Player of the year. "You've got to respect him," North Port coach Joey Sorbino said. "Whether they mark him with three guys or one guy or if he's running free, you know he's gonna make a difference in the game regardless and that's a special player."

Sorbino has known Arango and most of the North Port players for some time. A former player with the Bobcats, he's been involved with the program and club teams in the area as Arango has come up.

But when tryouts came ahead of Arango's senior year,

Sorbino saw a different mentality in his striker — a desire to make the leap from good to great.

"He came up to me at tryouts and said, 'This is my year,'" Sorbino said. "They can talk all they want, but I wanted them to know that nothing is gonna come of it until they back it up on the field. From Day 1, he understood that he had to prove himself first and he did that and he led them. He needs to feed himself with the highest opposition possible, and he does that."

Despite playing a big role, passion and heart only go so far in the world of sports. So what makes Arango so difficult to game plan for?

Well, he's lightning fast, quite agile with the ball and possesses a strong soccer IQ.

Port Charlotte goalkeeper Hunter Cole has been in first hand over the past few years. The two played on the same team back in middle school.

Now in high school, Cole had the challenge of lining up across from him.

"He knows my weaknesses well," Cole joked. "I've played with him my entire life. Since he was young, he could always adapt to different styles of play and pressure."

Cole said one of the hardest positions for a keeper to defend Arango is in one-on-one situations. Arango's unpredictability turns a potential save into a sure-fire goal with ease.

"It's unpredictable where he'll shoot," Cole said. "It's just straight reaction at that point."

Coming into his senior season, Arango was bold in his aspirations. He wanted the single-season record of 28 goals. Though he fell short, 20 goals is nothing to look down upon. After a blazing start to the season — 14 goals in 12 games — opposing teams began to notice, constantly throwing physical double teams his way and diminishing his goal totals.

"When he touches the ball, there's three guys flocking to him," Sorbino said. "When you score goals, that's what happens. But also, when you're a great player that's what happens. Their game plan is to shut him down."

"He doesn't get frazzled easily, he carries the weight on his shoulders well. That's not something he's had in the past. This year he's matured and the leadership we got from him and the other captains this year is one of the main difference on the team."

Twenty goals created 20 memories for Arango in his final season as a Bobcat, but the memory that stands out is the one goal he couldn't get.

Down 2-1 against Braden River in the district semifinal, North Port needed a score to force overtime in the second half, but couldn't get it that season, and his high school career, came to a close.

Arango doesn't know what's

in store for him after high school. He is confident he'll be playing collegiate soccer, but is still in talks with some schools. For now, it's up in the air.

As one of the better offensive weapons to come through North Port High, Arango became a go-to person for young players to look up to and model themselves after.

That's the legacy Arango wants to leave behind — a passionate, hard-working athlete that gives everything to the sport he loves.

"It was good helping all the younger kids, pushing them, training them," Arango said. "I stepped up this season. I knew I had to fill that role of being a leader on the team. I'll tell them all my experiences to help them and motivate them. I want them to have good seasons after I leave, so I do what I can to help."

elusive 3-point stroke just in time to give coach Richard Pitino the NCAA Tournament win he'd been seeking for years.

The 10th-seeded Gophers won their first NCAA Tournament game in six seasons behind 24 points from freshman Gabe Kalscheur, who helped Minnesota roll past Louisville 86-76 in the opening round of the East Region on Thursday.

The win for Pitino came against school that fired his father. Rick Pitino coached the Cardinals for 16 seasons before his 2017 dismissal.

"This wasn't about getting the win for coach Pitino. It was about getting the win for us in general and advancing to the next round," said Minnesota's Jordan Murphy, who scored 18 points.

AUBURN 78, NEW MEXICO STATE 77

Red-hot Auburn of the Southeastern Conference will be Kansas' opponent in Saturday's second-round NCAA Tournament Midwest Regional contest.

The No. 5 seed Tigers, who have won nine straight games since a 27-point loss to Kentucky on Feb. 23 at Kentucky, held on to defeat No. 12 seed New Mexico State, 78-77, in the first NCAA game of the day Thursday in Salt Lake.

Down two with 6 seconds left, New Mexico State missed a chance to tie or take the lead when AJ Harris passed up a layup to throw the ball to Terrell Brown for a 3-point attempt. Brown missed but was fouled. Then he only made one of three free throws.

The Aggies still had a chance to win on their final possession after Auburn's rebound attempt on the missed free throw went out of bounds.

Trevelin Queen (14 points, four threes) missed a 3-pointer from the corner that left his hand right before the final horn.

MICHIGAN STATE 76, BRADLEY 65

Cassius Winston scored 26

points and second-seeded Michigan State held off Bradley 76-65 on Thursday in the opening round of the East Region.

Xavier Tillman had 16 points with 11 boards for the Spartans (29-6), who'll face Big Ten rival, 10th-seeded Minnesota, on Saturday in search of their first trip to the Sweet Sixteen in four years. Michigan State throttled the Gophers 79-55 in East Lansing back on Feb. 9.

Bradley gave the Big Ten champions all they could handle, though.

It was a one-possession game until Matt McQuaid drilled a crucial 3 to put Michigan State ahead 61-55 with 3:31 left.

MARYLAND 79, BELMONT 77

Maryland's Eric Ayala deflected a pass to set up a steal by Darryl Morsell that stopped Belmont's last-second attempt at an NCAA Tournament upset and the Terrapins escaped with a 79-77 victory Thursday in the East Region.

Playing their second tournament game in less than 48 hours, the 11th-seeded Bruins left no doubt they belonged after receiving one of the selection committee's final at-large bids.

But the mid-major powerhouse from Nashville, Tennessee couldn't knock off the No. 6-seeded Terrapins (23-10) from the Big Ten, despite a 35-point performance by Dylan Windler.

KANSAS 87, NORTHEASTERN 53

Dedric Lawson had 25 points and 11 rebounds, and Kansas dominated inside for an 87-53 rout over Northeastern on Thursday in the opening round of the Midwest Region.

The fourth-seeded Jayhawks (26-9) had a notable size advantage inside and used it, outscoring the Huskies 50-16 in the paint while grabbing 17 more rebounds.

Kansas shot 56 percent and advanced to Saturday's second round against fifth-seeded Auburn.

LSU 79, YALE 74

As LSU's comfortable lead started to disappear, most of the crowd at Veterans Memorial

AP PHOTO

Abilene Christian's Kolton Kohl, right, goes up for a shot which is contested by Kentucky's EJ Montgomery during the first half of a first-round game in the NCAA men's college basketball tournament in Jacksonville, Thursday.

Arena turned on the Tigers. Underdog Yale became the hometown team.

Skyler Mays heard the cheers — and then silenced them.

With suspended coach Will Wade watching from afar, Mays hit four free throws in the final 15 seconds to help embattled LSU slip by 14th-seeded Yale 79-74 in the East Region.

Mays scored 12 of his 19 points in the second half and sealed the game from the charity stripe. The third-seeded Tigers (27-6) needed each one of his free throws.

MURRAY STATE 83, MARQUETTE 64

Murray State's Ja Morant is the star of the NCAA Tournament's first day after leading No. 12 seed Murray State to an 83-64 blowout of No. 5 seed Marquette.

Morant ended up with 17 points, 16 assists and 11 rebounds to lead four players in double figures.

Markus Howard scored 26 points for Marquette but shot 9 of 27.

Murray State advances to a

second-round matchup with Florida State.

KENTUCKY 79, ABILENE CHRISTIAN 44

With PJ Washington watching from the bench in a cast, second-seeded Kentucky romped to a 79-44 victory over NCAA Tournament newcomer Abilene Christian.

Keldon Johnson scored 25 points in a huge mismatch that was over by halftime. The Wildcats shot 60 percent in the opening period, held Abilene Christian to 5 of 26 from the field.

Reid Travis added 18 points and Tyler Herro 14 for Kentucky.

Kentucky advanced to the second round of the Midwest Regional on Saturday to face either Wofford or Seton Hall.

GONZAGA 87, FAIRLEIGH DICKSON 49

When it comes to a 16 seed beating a 1, it's still true — anything really can happen in

the NCAA Tournament.

Just not on Thursday night. And not against Gonzaga.

One year after dreamers and underdog lovers rejoiced at top-seeded Virginia's first-of-its-kind, first-round loss, the Gonzaga Bulldogs crushed any thought of a repeat with a wire-to-wire 87-49 thumping of Fairleigh Dickinson in the West Region.

Rui Hachimura led the Zags (31-3) with 21 points and eight rebounds.

VILLANOVA 61, ST. MARY'S 57

The defending national champions are moving on in the NCAA Tournament.

Phil Booth scored 20 points, fellow senior Eric Paschell added 14 and No. 6 seed Villanova held off Saint Mary's 61-57 in the first round of the South Region.

Jordan Ford and Malik Fitts each had 13 points for Saint Mary's, which never trailed by more than eight but also couldn't draw even.

The Gaels' last chance ended with a steal by Saddiq Bey.

■ NCAA MEN'S BASKETBALL TOURNAMENT: No. 10 Florida 70, No. 7 Nevada 61

Gators grind out upset of Wolf Pack

Hayes, Hudson combine for 31 points, will face No. 2 Michigan Saturday

By ERIC OLSON
AP SPORTS WRITER

DES MOINES, Iowa — Florida nearly squandered a double-digit lead before finally stopping a Nevada comeback and pulling off a 70-61 upset in the first round of the NCAA Tournament.

Kevarrius Hayes scored 16 points, Jalen Hudson added 15 and the 10th-seeded Gators won their tournament opener for the third straight year.

Andrew Nembhard, whose last-second shot beat LSU in the Southeastern Conference Tournament last week, drove to the basket for a

layup with 1 ½ minutes left and Florida scored the last seven points after the seventh-seeded Wolf Pack had rallied from down 18 to cut the deficit to just two points.

The Gators (20-15) were the third double-digit seed to win on Thursday.

Cody Martin scored 23 points and twin brother Caleb Martin had 19 for the Wolf Pack (29-5). The two combined for 28 of their team's 33 points in the second half of the West Region matchup.

The Gators controlled the pace with their deliberate offense, often letting the shot clock

run into single digits before shooting. The SEC's top-rated defense clogged passing and driving lanes and contested almost every shot.

KeVaughn Allen made back-to-back shots to start a 12-0 run early in the second half that swelled the lead to 51-33 with 14 minutes left.

That's when things started to turn.

The Wolf Pack began to bother Florida with their full-court press. After Caleb Martin stole the ball from Jalen Hudson in the backcourt and dunked, it was 58-51 with 6 minutes to play. Caleb Martin's two free

throws made it 63-61 with 2:02 left, but Nevada could get no closer.

BIG PICTURE

Florida: The Gators can count on Nembhard in the postseason.

He had only eight points against Nevada, but he came up big when needed and stemmed the Wolf Pack's comeback with a dazzling drive to the basket against Jazz Johnson.

UP NEXT

Florida: The Gators play No. 2 seed Michigan or No. 15 Montana on Saturday.

Game's tallest player, UCF's Tacko, ready for VCU

By PETE IACOBELLI
AP SPORTS WRITER

COLUMBIA, S.C. — The tallest man in college basketball is finally on the game's grandest stage — 7-foot-6 Tacko Fall is set for the NCAA Tournament.

Fall's ninth-seeded UCF (23-8) open East Region play Friday night against No. 8 seed VCU (25-7).

"For me, for us, I would say it means everything," said Fall, who's been the tallest player in college since joining UCF in 2016. The native of Senegal entered prep basketball as a project and slowly worked his way into a key performer to help the Knights make the NAAs for the first time since 2005.

"We just put our heads down and say we have to make it and we made it happen," Fall said with a grin.

Fall is impossible to miss on the court, standing a half a foot or more above opponents. Year by year, Fall has increased his skill level from a raw freshman to a much more polished senior.

He averaged seven points a game his first season, despite an astonishing .750 shooting percentage which was then a UCF record.

Fall had 94 blocked shots his sophomore year (another single-season high) and was

selected as the American Athletic Conference defensive player of the year.

As a junior, Fall topped his freshman season by making 79 of 103 field goals for a .767 percentage. This season, Fall has improved his positioning underneath and his basketball knowledge in understanding the game, UCF coach Johnny Dawkins said.

"He's really improved his skillset," Dawkins said. "He scores around the basket, doesn't need to dunk everything to score" as in the past.

And then there's the Fall away from the court, a thoughtful, humble person who wants to be engaged in the community.

Fall, a Muslim, was asked Thursday his feelings about the killing of 50 people at two mosques in Christchurch, New Zealand, a week ago.

Fall didn't hesitate with his reply, saying in Senegal there are Christians and Muslims who work alongside each other and live in peace.

"I love the game of basketball, but it's always bigger than that," Fall said. "Being able to represent what we are about means a great deal to me. I was very sad when I saw what happened down in New Zealand. I thought about it a lot. But we've just

got to learn how to get along. I mean, everybody, we all pretty much are people, regardless of the religion."

Fall is eager to concentrate on basketball this week. If he's playing well, he can give VCU a difficult challenge to overcome.

Rams coach Mike Rhoades said his players did "awareness drills" he uses when the Rams face an opponent with a different style or player with great size or quickness.

"A guy like Tacko Fall around the rim that you're not just going to go in and shoot a finger roll," Rhoades said. "That's not going to happen."

Dawkins, Fall's coach, said he's been remarkable to coach, receptive to teaching and working hard to get better.

Fall is more of a throwback center without the shooting ability from the perimeter.

While many NBA mock drafts don't have Fall getting picked, Dawkins believes his skill and personality make him an asset to any team he's on.

"I hear the game has changed and his style of play no longer exists, but when you have a player like Tacko Fall with his personality, with who he is, in any community, he'll be one of the best people you'll ever have," he said.

Central Florida center Tacko Fall, who stands 7-foot-6, is the tallest player in the game. He gets to appear on the game's biggest stage when UCF plays VCU on Friday.

■ NCAA WOMEN'S BASKETBALL

UConn using No. 2 seed as motivation for tourney

By PAT EATON-ROBB
AP SPORTS WRITER

STORRS, Conn. — UConn comes into this year's NCAA Tournament feeling a little disrespected and that could be bad news for the rest of the field.

The Huskies (31-2), who have been to 11 consecutive Final Fours, open play Friday evening in the Albany Region as a No. 2 seed against No. 15 seed Towson.

The Huskies expected to be the region's top seed with a No. 2 ranking in the polls, four wins over top-25 teams and losses only to top-five opponents Baylor and Louisville on the road.

"Obviously we don't agree with it, but there's nothing we can do about it," said UConn forward Napheesa Collier, who is averaging more than 20 points and 10 rebounds a game. "I think it does

put a little bit more of a fire under our butts just because, like I said we don't agree with it, and we just want to prove to everyone that we should have been a one. We can be, and we're going to come out swinging."

Coach Geno Auriemma notes that his teams have lost in the NCAA Tournament when they were a top seed and have won the national championship when they were not.

Being seeded second rather than first, means little more than having to pack both white and blue jerseys if they make it to Albany, where they could meet No. 1 seeded Louisville again.

"I mean, we're not in one of those conferences that perennially wins women's basketball national basketball championships, so we can't be expected to lose two games and

not be dropped," joked Auriemma, who is hoping to guide the Huskies to a 12th national title. "I'm just happy they kept us at two instead of four."

Friday's game will mark the return for UConn of All-American Katie Lou Samuelson, who sat out the Huskies regular-season finale and the entire American Athletic Conference Tournament with a back injury.

Auriemma said the senior's shooting form has returned, but she not back to full mobility.

He said he never considered sitting Samuelson, who is averaging just under 19 points per game, in the first round.

"If I tell coach I'm good, then he's going to trust me," Samuelson said. "He's going to believe me and he's going to let me do what I need

to do."

Other things to watch for in Storrs on Friday;

STRINGER STILL OUT

No. 7 seed Rutgers will face No. 10 seed Buffalo without Hall of Fame coach Vivian Stringer, who has not coached since late February because of an undisclosed illness.

Stringer, 71, is in her 24th year at Rutgers and 48th season of coaching.

Timothy Eatman, who has been serving as acting head coach. He filled the same role in 2016, when Stringer missed three games to care for and later mourn her mother.

"It's always hard when your head coach isn't around, but we have a great coaching staff and supporting staff," Rutgers senior forward Stasha Carey said.

"Coach Eatman knows what he's doing. He's been doing it pretty well the past couple games.

"The good thing is we have talked to her and she gave us some words of encouragement, so that made us feel a lot better," Carey added. "And we are just going to take that and run with it as far as we can."

DIVIDED FAN BASE

Buffalo's men's and women's teams will be playing at the same time. The women face Rutgers at 4:30 p.m. The men tip at 4 p.m. in Tulsa against Arizona State.

"Nate (men's coach Nate Oats) and I have had our moment where we've looked at each other and said 'wow, what are we doing here?'" Buffalo coach Felisha Legette-Jack said. "It's really fun to go

through this with what I call my brothers and to come out to the airport in Buffalo and see two planes that are headed in opposition directions to take the athletic department to postseason play."

LEARNING TO WIN

Towson (20-12) had its first winning season since 2011-12, and had its most wins since 2007-08.

The Tigers played just one ranked team this season, falling to Syracuse in December, 98-55.

"It's exciting for all of us," Towson red-shirt sophomore guard Kionna Jeter said. "We've never been here before, so it's a great experience. At the end of the day we still have to play basketball no matter the name or who we are playing."

You don't use these anymore.

Bucs first team in league with 2 female coaches

TAMPA, Fla. (AP) — The Tampa Bay Buccaneers have hired Maral Javadifar and Lori Locust as assistant coaches, becoming the first NFL team with two female coaches on their staff.

Locust and Javadifar are also the first full-time female coaches in franchise history.

Locust will be an assistant defensive line coach and Javadifar an assistant strength and conditioning coach.

"I know how hard it can be to get that first opportunity to coach at the highest level of professional football," Buccaneers coach Bruce Arians said in a statement.

"Sometimes, all you need is the right

organization to offer up the opportunity. The Glazer family and our general manager, Jason Licht, were extremely supportive of my decision, and I know Maral and Lori will be great additions to my coaching staff."

Locust joins the Bucs after working as the defensive line coach for the Birmingham Iron of the Alliance of American Football. Last year, Locust served as a defensive coaching intern for the Baltimore Ravens during the team's training camp.

Javadifar has most recently worked as a physical therapist in Seattle. A native of Queens, Javadifar played basketball at Pace University in New York.

AP PHOTO

If Tampa Bay Buccaneers defensive tackle Gerald McCoy returns for another season, his new assistant defensive line coach will be Lori Locust, one of two female coaches hired by the Bucs.

St. Louis Cardinals first baseman Paul Goldschmidt is close to signing a five-year extension worth \$130 million.

Cardinals finalize extension with Goldschmidt for club record sum

By Derrick Goold
ST. LOUIS POST-DISPATCH

JUPITER — Before the Cardinals could assemble a crowd to welcome Paul Goldschmidt to Busch Stadium and begin the sales pitch to have him call St. Louis home for years to come, they were able to make a club-record commitment to their new first baseman.

The Cardinals and Goldschmidt are finalizing a five-year extension worth around \$130 million, according to a source familiar with the negotiations. The deal is expected to be finalized by Saturday.

The extension will

start after 2019 and carry through 2024.

The completion of the deal is pending a physical. That is scheduled for Friday, and a press conference to introduce Goldschmidt, 31, as a fixture for years to come could happen as soon as Saturday. It's a swift resolution to conversations the Cardinals expected to go into the season as they introduced Goldschmidt to the home crowd and gave his family a chance to see what it was like to call St. Louis home in the summers.

John Mozeliak, Cardinals president of baseball operations,

declined comment.

"We are working toward something," he said.

The Cardinals felt their best edge was to surround Goldschmidt with Cardinals history and Cardinals tradition and sellout crowds and then present him with one of the largest offers ever from the club.

Goldschmidt's extension surpasses Matt Holliday's seven-year, \$120-million contract as the largest in club history. He also surpasses Yadier Molina's \$20-million salary to become the highest paid Cardinal ever.

The Cardinals acquired

the six-time All-Star from Arizona in a four-player deal that sent catcher Carson Kelly and pitcher Luke Weaver along with a draft pick and a prospect to the Diamondbacks.

He arrived with one year remaining on his contract. He will make \$15.5 million this season.

Since 2012, Goldschmidt has rivaled Cincinnati's Joey Votto as the most productive first baseman in the National League. He's one of six players with at least 200 home runs in the previous six seasons and he's the only National League player who was a part of the past six All-Star teams.
