# Mosaic moves on rezoning denial

By CRAIG GARRETT  
ARCADIAN EDITOR

Apparently, it's time to pay the piper. Following a July decision by the DeSoto Board of County Commissioners to deny rezoning of farmland to industrial mining, Mosaic Fertilizer is asking for third-party intervention.

The Fortune 500 firm on Tuesday submitted a letter of intent to DeSoto County, citing the Florida Land Use and Environmental Dispute Resolution Act, which gives applicants the chance to resolve questions of property usage without heading to court.

In this case, Mosaic was denied rezoning on 14,053 acres in DeSoto County it intended to mine for raw phosphate minerals. That decision by the DeSoto Board of County Commissioners followed two days of mostly cordial hearings. Mining opponents were warned at the July 24-25 hearings about noise, catcalls or applause,

risking expulsion, even arrest.

Ultimately, DeSoto commissioners voted 4-1 against Mosaic's application. Commissioner Elton Langford triggered that surprising move. Commissioner Terry Hill sided with the county's recommendation to rezone. Mosaic is one of Florida's large landholders and would mine phosphate in DeSoto within five years. It already has 9,000 acres zoned for such purposes.

"Mosaic is clearly a property owner entitled to request relief under the Act," according to language in a cover letter to DeSoto County dated Aug. 14. Mosaic's letter/packet was also discussed at the DeSoto commission hearing on Tuesday. Mosaic is represented by Hopping, Green & Sams, a Tallahassee firm specializing in governmental law.

Mosaic's public affairs manager, Jackie Barron, said of the firm's decision to request a special magistrate's intervention: "This flexible process should allow the County, Mosaic, and the public

to work constructively towards a mutually beneficial outcome. We look forward to these continued discussions."

Mining opposition, however, saw the move differently.

Andy Mele, Suncoast Waterkeeper, said: "Mediation is usually part of the dance before litigation. One wonders if Mosaic is sending a not-so-subtle signal about its intentions, a shot over the bow."

DeSoto attorney Donald Conn said should DeSoto comply with the intervention request, a neutral "special master" would hear from both sides, decide and recommend compliance, in either direction. DeSoto has 10 days to respond. That hearing would be open to the public. A courtroom could ultimately decide the matter, however. Or commissioners could reverse themselves.

"It may be going in their favor, or it may be going in ours," Langford said Tuesday. "We'll see."

# History of DeSoto Veterans Memorial Park, Part II

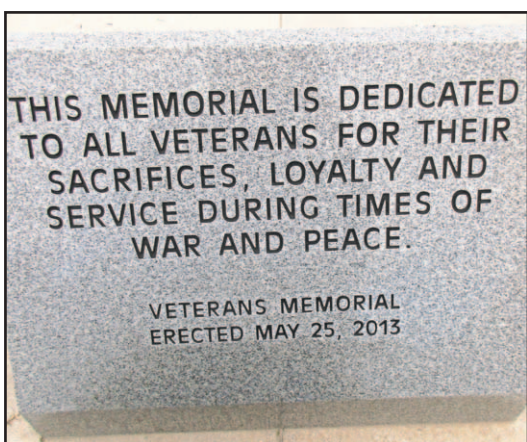

By CAROL MAHLER  
ARCADIAN HISTORICAL CORRESPONDENT

One could argue that DeSoto Veterans Memorial Park would not exist had the new State Road 70 not been built in 1961. The contract for the road project was awarded to the C. T. Stockton Construction Co. of Hialeah—as reported in the Dec. 29, 1960, *Arcadian*—and a new bridge was the first step.

A "relief channel"—commonly called "the overflow"—was dug west of the Peace River bridge in an attempt to keep the river from flooding by allowing it to overflow into a designated channel.

Before then when the river flooded the old Arcadia-Bradenton Road, the city of Arcadia provided a ferry from the old Peace River Bridge to County Road 661. It was a tractor that pulled a flatbed trailer. Michael Pooser remembered riding it when the river was high and that it was called "a Missouri wagon." Perhaps it was given the name of a Conestoga-type wagon associated with a river?

# Meet Arcadia City Council candidates

## Jackie Tucker

**History:** South Florida native, arrived in Arcadia as a district manager for Equitable Life Insurance. At that time the city had been named one of 100 best small towns in America.

TUCKER

Graduated Miami Edison High School and then became a professional baton instructor, the goal to create one of America's best and largest baton organizations. Within five years achieved that goal, having over 55 years worked with more than 30,000 youth. Founder of Five Star Youth of America, which has reached youngsters in DeSoto County and much of Southwest Florida.

Humanitarian of the Year (2000) award by the DeSoto County Chamber of Commerce. In 2009, the first DeSoto County Distinguished Citizen Award by the DeSoto Board of County Commissioners, also presented the Calvin Murphy Award at Wright State University at international baton competition as the "Most Dedicated Coach in America." Won that same award for work with baton athletes and for work with challenged youth.

**Platform:** "In 1974 I began a career as a life insurance agent, specializing in life, health, employee benefits and Medicare. At that time I was going to give up work as a baton coach and found myself not being able to leave the kids. I am a community activist who has also been in the insurance business for 44 years.

"I came to Arcadia 42 years ago and fell in love with the city from the beginning. I decided Arcadia would become my home. I have always been interested in Arcadia and DeSoto County. I'd like it to continue to be a great place to raise a family, a great place to retire. We have some wonderful things happening here. And I would like to play an even greater role in making Arcadia and DeSoto County even better. We do not need to make it great again. We've already done that.

"I am very interested in our Historic Downtown District and am very proud of the antique dealers and the business people of our community. They have put us on the national map.

"But like any small city, we have problems to solve every day. We are concerned about our infrastructure and streets, for example. As a council person, I will continue to work on and support the the city to get these problems resolved.

"I am also concerned about the future of our youth. I would continue to support programs we have for them ... and to develop more. Adults showing support to youth provides hope, and hope gives motivation and encouragement to bring out the best in everyone. I will support programs and ideas that create community awareness for our youth and for our seniors, our veterans and the homeless, for public safety, for those who need and help and those who cannot support themselves.

"In closing, I ask for your vote as a business and community leader of more than four decades. I will work for you and would be honored to represent this great city on its council. Working together is the plan, and only then can we make good and positive things happen."

## Keith Keene

**Job:** Environmental Health administrator, Florida Department of Health-DeSoto County, retired

KEENE

**History:** Lifelong resident Arcadia, DeSoto High School graduate, Class of 1971. Bachelor's degree, University of South Florida. Graduate CDC Environmental Public Health Leadership Institute. Attended Florida League of Cities Elected Municipal Officials training. Served Arcadia Planning and Zoning Board. Elected to Arcadia City Council, 2009, serving two years as mayor. Appointed by current council in June 2017 to serve out balance of vacant position. Member of the Central Florida Regional Planning Council. Member of the Florida Public Health Association, National and Florida Environmental Health Associations and the National Association of City and County Health Officials.

**Platform:** "I am running for city council because I love my community, where I was born and raised. I have lived here all my life, chose to live and work here and raise a family. My two sons, their wives and four granddaughters live here. I am invested in Arcadia and passionate about its future.

"I was appointed by the Arcadia City Council in June 2017 to serve out the unexpired term of council member Delshay Turner, who passed away. I was previously elected to the council in 2009. During my five-year term, I served as mayor for two consecutive years. I represent the city of Arcadia on the Central Florida Regional Planning Council.

"Our council is making progress to improve the issues of failing infrastructure, roads and many abandoned/unmaintained properties. A few of the councils' recent accomplishments include repair of sidewalks, adopting the International Property Maintenance Code and acquisition of SRF funding to begin sewer upgrades. The council will soon begin work on the new budget. Our challenge continues to be the low taxbase. There is much work left to do.

"I am a proven leader with the skills needed by council to make decisions that are critical to the future of the city of Arcadia. I will work to find ways to improve our business district and residential areas. A council that is focused on resolving issues and doing what is best for the city of Arcadia will ensure our success.

"I make sound, fact-based, common-sense decisions. I feel my most important traits are honesty, integrity and accountability. I have great communication skills and a high standard of ethics. I pledge to tackle all issues with an open mind, seek clarity and use common sense. My goal all along has been to make Arcadia a better place to live work and play."

# DeSoto Arts and Humanities Council ... creative platform

Remember when you were a kid, your mom bought you a little metal tray with watercolor squares and a paint brush. You went to the kitchen, got a glass of water, soaked up those little colored squares ... and started painting.

No one could recognize the finished work, but everyone told you it was beautiful. It made you proud that you had created something all by yourself.

Well, it's not too late to bring that feeling back—and you don't have to worry that it still may be something that no one recognizes. Just be aware that this time around people may not tell you that it's beautiful. But that doesn't matter, what matters is that you had the courage to take a chance, you created something, then put it on display for everyone to see.

Allowing people the opportunity to do this is just one of the many goals of the DeSoto Arts and Humanities Council.

In 2002, a number of local residents got together and formed an art club. It soon evolved into the DeSoto Arts and Humanities Council. Then in 2006 the DAHC filed papers to become a 501(c)(3) nonprofit organization.

Today, the DeSoto Arts and Humanities Council, or DAHC, supports a wide variety of community projects and organizations: Arcadia's schools with purchasing art supplies, a scholarship program for graduating high school seniors, Arts for Children at the Public Library, and Links2Success. The DeSoto County Historical Society, DeSoto Chamber of Commerce, the Main Street Project Association, Saturday Nite Lights and Leadership DeSoto programs ... and more are supported by the DAHC. Mac Martin, president of the DAHC, said: "We have supported most of our community organizations in some way over the years."

Keeping in mind those watercolors that were used so long ago, the Arts Council gives everyone, the beginner to professional artist, the opportunity throughout the year to display their creations in a number of venues. For instance, Art in Public Places, DeSoto Memorial Hospital, the Annual Art Show, Plein Air Paint Out, Sip N Paint, the Cowboy Art Competition, and Portrait of a Community, which takes the place of Art of the River, are planned for this year.

Martin continued, "These shows allow artists to display their work to the public in a professional setting. Qualified judges evaluate the entries and award ribbons and prize money to the winners."

Mac Martin went on to explain: "The DeSoto Arts and Humanities Council is structured to be an umbrella to provide support for writers, artists, theater and music. Art and photography are quite popular right now, but we are looking for leaders to take over writers, community theater and music. The Arts Council welcomes any ideas that promote the arts in our community. Plus, we are always looking for new members."

"We would love more members who can provide services, for instance, offering guitar lessons, teaching an art class, or taking over projects such as one of our art shows. But, keep in mind, you don't have to be an artist at all to join the Arts Council. It's a great place for people who just love art and want to support artists."

ARCADIAN PHOTOS BY JIMMY PETERS/

Entries from 4th grade Memorial Elementary art class on display at the South Florida State College campus in Arcadia.

Plans for the future include a physical location where the Arts Council can hold exhibits, provide art classes, and communicate better with members and the community.

"We are presently talking to the city about the use of under-utilized properties," Mac Martin explained, "We are also exploring vacant spaces in the historic downtown area."

"As a nonprofit, the monies that we get from dues and various fundraisers are returned to the community. We are always mindful of our volunteers, without them we would not be able to do any of the

many projects that we sponsor throughout the year. And, we certainly want to thank our sponsors that support those projects."

*Next week we will be talking about two art events coming soon. So, get down to the store and buy one of those little tin boxes of watercolors and get ready to paint!*

TAMPA BAY TIMES

## 1st Amendment right attacked in lawsuit

**M**aggy Hurchalla joked this spring that all she could offer a billionaire who won a \$4.4 million judgment against her after she exercised her free speech rights were “two kayaks and an aging Toyota.” The billionaire didn’t laugh.

This week, Martin County sheriff’s deputies armed with a court order seized the 14-year-old car and the kayaks—the only property owned by the 77-year-old sister of late Attorney General Janet Reno. This bullying should send a chill through every Floridian who cherishes their constitutional rights to free speech and to petition their government, and the Florida Supreme Court ultimately will have to correct this miscarriage of justice.

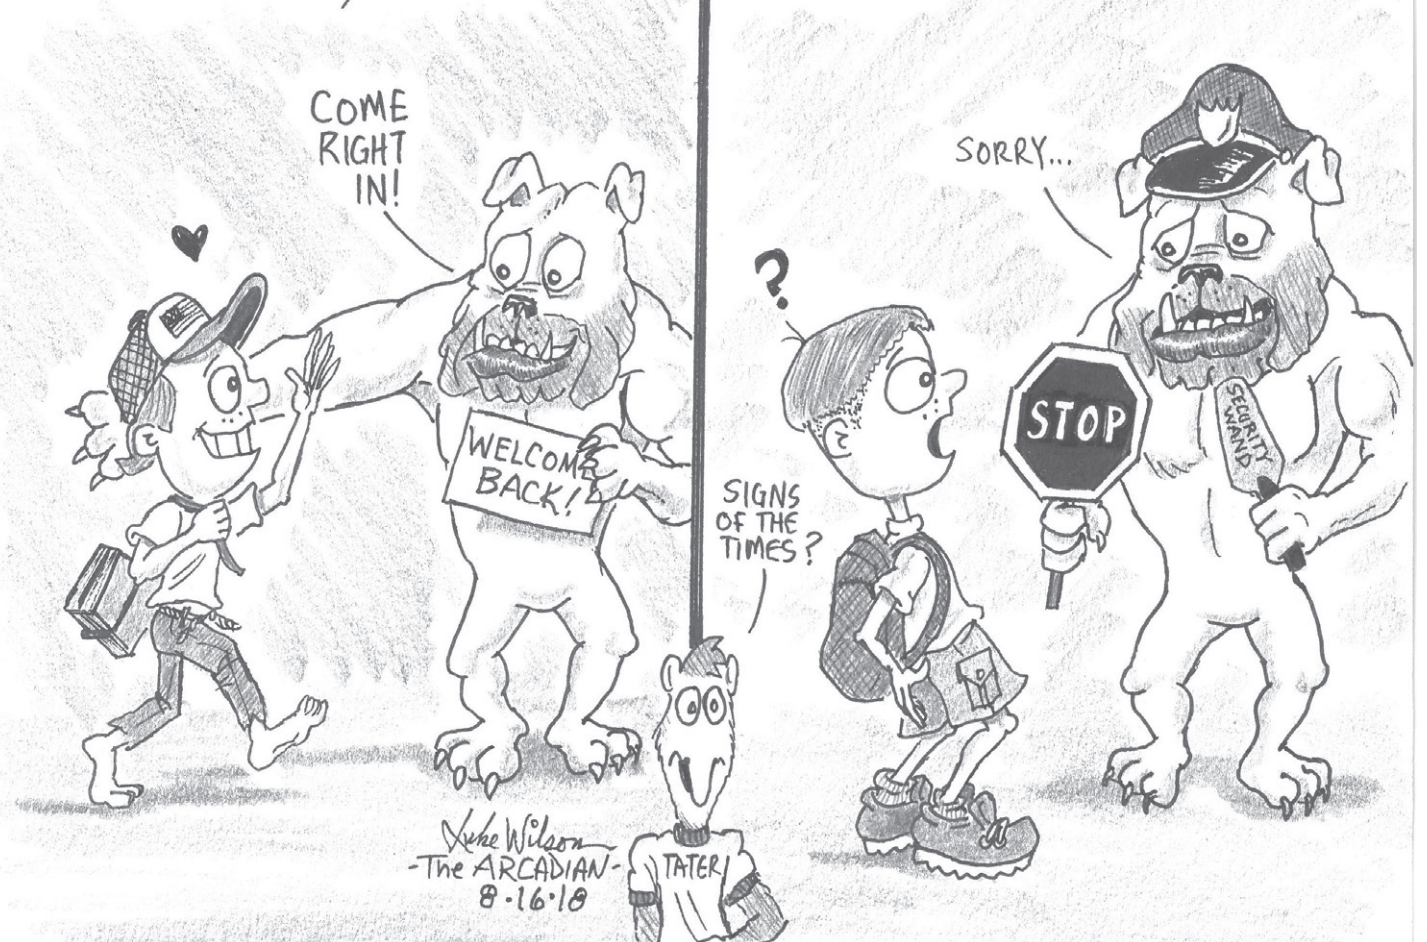

The David vs. Goliath drama played out on Florida’s east coast with themes that include the environment and the water supply, open government and a citizen’s right to protest to their elected officials. As the Tampa Bay Times’ Craig Pittman reported in May, billionaire George Lindemann Jr. put together a group to buy 2,200 acres of sugar cane fields near Lake Okeechobee in Martin County that is known as Lake Point. The idea was to dig up rocks to sell for construction projects and use the mining pits to store and clean water from the lake. By 2009, the South Florida Water Management District and the Martin County Commission signed off on the deal.

Then it got more complicated. Lake Point came up with a new idea in 2011 to sell the water in the pits. Lindemann told Pittman that Lake Point actually would have been paid for storing and cleaning the water, because nobody can sell water without state permission. But the idea didn’t sit well with the water management district or Martin County, and Hurchalla protested after the concept became public in 2012.

Hurchalla sent emails to Martin County commissioners urging them to get out of their agreement with Lake Point, and the deal fell apart. Lake Point sued the water management district, Martin County and Hurchalla. It turned out that Hurchalla sent some emails to the county commissioners’ personal accounts and the county failed to turn them over. Two commissioners have been charged with violating public records laws, and the water management district and Martin County settled for millions with Lake Point in 2017. Hurchalla refused to apologize and went to trial, where Lake Point lawyers suggested there was something “sinister” about her deleting her emails to county

## LETTERS TO THE EDITOR

### Check before voting

Primary is almost here. We have all seen the news about the water releases and red tide. We know big business is trying to strip mine more of our beautiful state. The schools need help. Healthcare is out of control. It goes on and on.

There is one man running for governor who has a plan. Bruce Nathan is running a grassroots campaign, he is the dark-horse candidate in the Republican race. He is a conservative, honorably discharged veteran, husband and father. Not a politician but working full time while he campaigns. He has a Facebook page,

Bruce Nathan for governor 2018, he does FB Live regularly and a website, brucenathan2018.com. Check him out before you decide to vote for the same people who have allowed this state to sink to the level we find ourselves at.

**Candace Lawless**  
Arcadia

## GRITS & PIECES

### What is your breakfast of champions?

**I** have often heard it said that breakfast is the most important meal of the day. I finally got around to wondering why that is, and my conclusion is that your body hasn’t had anything since supper the night before, and is thinking you’re trying to starve it to death. Make sense to me.

What is the perfect breakfast to you? I know the possibilities are endless, as folks like to eat any and all things, and sometimes it’s even as their first meal of the day. Regardless of whatever finds its way to my plate, it is always preceded by that rich, hot, roasted bean nectar known as coffee, known to many as starter fluid.

Actually, I rarely eat breakfast, though I know I should. I love breakfast but I also love to eat too much. In fact, it’s nearly midnight as I’m typing this, and my belly is growling at the thought of breakfast. I do make exceptions when camping or on vacation, though. If I have my way, my plate is filled with eggs over easy

**Luke Wilson**

troubador55@embarqmail.com

with grits, crispy bacon, biscuits, a stack of flapjacks, and a coffee cup that keeps getting refilled. Your tastes may vary.

Some opt for cereal, oatmeal, toast with jelly, muffins, fried bologna, waffles, ham, or something really special — red eye gravy over grits. If you’ve never had gravy with coffee in it, you’ve never had the real thing. I was probably a grandfather before I ever heard of breakfast stuff like quiche and bagels, and I had/have some doubts about them.

I heard somebody say they ate lox on bagels. Then once I found out that was some kind of fish spread, that was off my bucket list. Same goes for the other, after I got a copy of Bruce

Feirstein’s book “Real Men Don’t Eat Quiche.” I was afraid I might have to surrender my man card if I ingested any of that stuff. Oh yeah, and let’s not forget cream of wheat. That never appealed to me no way, no how, so I won’t go to my grave thinking I’ve missed out on something by not forcing that down my throat.

Remember the many cereals we ate as children? Remember pitching a fit in the grocery store for your mom to buy a box of whatever it was that had the coolest free toy inside? No matter that it tasted like dust bunnies covered with chalky sugar—it was all about the prize. The bad part was that we had to eat it all anyway.

Some cereals are extinct, having disappeared off the grocery shelves long ago. You know, those such as Puffa Puffa Rice, KaBoom, Sugar Coated Rice Krinkles, Quake, Kix, Sugar Pops, and many more. For awhile there was even a cereal named Mr. T, and I pity the fool who was

**GRITS & PIECES | 9**

## LETTER SUBMISSION POLICY

Letters are welcome on virtually any subject, but we do have some rules. Please keep them to less than 250 words. Letters must be received no later than noon on Tuesday. Letters will be edited to length as well as grammar and spelling. All letters must be signed with full name - not initials. An address and telephone number must be included; they are not for publication, but must be provided so we may verify authorship if necessary. Due to the number of letters received, we reserve the right to run only one letter per person per month. The Letters to the Editor section is intended as a public forum for community discourse and the opinions and statements made in letters are solely those of the individual writers. The Arcadian takes no responsibility for the content of these letters. Please send or bring correspondence to the Arcadian, 108 S. Polk Ave., Arcadia FL 34266, or fax to 863-494-3533. Readers with access to the internet may e-mail Letters to the Editor to cgarrett@sun-herald.com or arcadian.editor@gmail.com.

“He has what it takes”

-Mitzie McGavic

I spent 30 years working in the judicial system, 11 years as the judicial assistant to Judge Parker, Judge Hall and Judge Holtzendorf, and 19 years as the elected Clerk of Courts for DeSoto County.

I've seen the good, the bad and the very ugly sides of people going through the court system. I know how tough the process can be on children, parents, spouses and friends, physically and emotionally.

Having a judge that understands not only the law, but who also genuinely cares about people, makes the entire process better for all; regardless of how simple or complex the case may be.

- ✓ A good judge has the combination of knowledge, experience and compassion.
- ✓ A good judge is fair to all parties and earnestly listens to both sides.
- ✓ A good judge cares about the case, the law, and the circumstances of each case individually.
- ✓ Above all, a good judge cares about who is in front of him.

**I know that Joshua Schueneman is that person.**

He has all the right qualities to make a **GREAT** judge for DeSoto County. He is fair, honest, and caring. There is no twisting of words. Who you are or who you aren't makes no difference to him.

As a judge, Joshua Schueneman will be the person you want to come before, as you can be assured that you will receive fair, unbiased, honest, and respectful treatment. Spend a few minutes chatting with Joshua. You will feel his passion for DeSoto County, as well as the law and fairness.

Please join me in voting for Joshua Schueneman for DeSoto County Judge on August 28th, or by early voting beginning August 13th. The integrity of DeSoto County's judicial system rests in the hands of DeSoto County voters.

*Mitzie W. McGavic*

Mitzie W. McGavic - Retired, DeSoto County Clerk of Circuit and County Courts

# Roan to serve 3 years for drug sale

Buck Roan, 41, was transferred to the Department of Corrections on August 7 to begin serving a three-year sentence. The sentence is based on several drug-related charges to which Roan pleaded no contest.

ROAN

According to records from the DeSoto County Sheriff, Clerk of Court and Department of Corrections, in December, 2016, a Confidential Informant was given \$500 to purchase half an ounce (about 14 grams) of methamphetamine from Roan. The CI purchased the drugs and returned to the deputies, who measured the methamphetamine to determine it weighed 11.99 grams. The CI had initially arranged the transaction with Roan through Facebook Messenger. He was charged with sale of a controlled substance.

On July 3, 2017, a CI was given \$50 to buy methamphetamine from Roan. The buy was completed at Roan's residence, and the CI reported that, at the time, Roan also had an additional "two balls" (about 7 grams) of methamphetamine. The transaction was also recorded on audio and video, and depicted Roan measuring a substance on a scale. Roan was charged with sale of a controlled substance and possession of drug paraphernalia.

On July 6, 2017, a CI met with Roan for the purpose of buying methamphetamine from him. The CI was given \$70 and met Roan at his residence. The CI asked for an "eight-ball" (3.5 grams of meth) but Roan said he had only one gram, which he sold for \$80. Roan was charged with sale of a controlled substance and possession of drug paraphernalia.

In addition to the DeSoto County charges, Roan was charged by Charlotte County with possession of a firearm by a convicted felon on Nov. 14, 2017. That arrest came from a traffic stop when a Charlotte deputy pulled Roan's vehicle over because the license plate light was not working. When the deputy inventoried the vehicle prior to it being towed, he found a handgun with live rounds in the driver's side door pocket. Roan entered a plea of no contest to the Charlotte County charge on July 25, 2018 and was sentenced to three years in prison.

His DeSoto and Charlotte prison terms will run concurrently. The Department of Corrections states his projected release date is June 13, 2021. He will also serve two years and 4 months of probation following his release from prison.

Roan previously served a prison term for possession of methamphetamine and sale of a controlled substance in 2013, for which he was sentenced to three years in 2014. He was released about two-and-a-half years later in 2016. He was subsequently to serve probation but that was revoked upon the adjudication of his guilt for the subsequent offenses.

## Victim says two Arcadia men tried to grope her in Punta Gorda

Two Arcadia men were arrested by Punta Gorda Police on a charge of felony battery after a female victim said they touched her and tried to rape her.

According to the arrest report from the Punta Gorda Police Department, a woman called to report two Hispanic men tried to rape her while she was in their white SUV, but before she could provide any more

## POLICE BEAT

The information for Police Beat is gathered from police, sheriff's office, Florida Highway Patrol, jail and fire records. Not every arrest leads to a conviction and guilt or innocence is determined by the court system.

GOMEZ-CARRANZA

details, the call was disconnected. Police responded to the area of the call, around West Marion Avenue and Gilchrist Street. They did not see the victim but noticed a white SUV nearby with two Hispanic men inside. Michael Dennis Rosas, 28, was driving and Eric Gomez Carranza, 29, was a passenger. Police separated the two men to get their statements.

ROSAS

Rosas said they had come from Arcadia to go to some Punta Gorda bars, ending up at Dean's South of the Border. When Dean's closed, they went to RaceTrac; no one else, Rosas said, was in the SUV with them.

Carranza chose not to speak with police. While police were present with the two men, the original caller returned to the area. She told an officer she had been walking over the Barron Collier Bridge when the Dodge SUV pulled up by her and offered her a ride. Carranza, who was driving, began touching her inappropriately. They pulled into the RaceTrac and she left the vehicle, but there was no one to help her and she was afraid if she did not get in, they may hurt her.

Carranza tried to find a dark secluded spot as he tried to put his hand inside her pants. They came to Gilchrist Park, where he continued to touch her, and Rosas then groped her under her blouse.

The victim said she pulled a stun gun out of her purse and threatened to use it, so they backed away, giving her a chance to exit the SUV. She then called 911 and gave as much information as possible until her battery died. When an officer drove her past the two men (whom other officers were questioning at the park), she confirmed they were the ones who had touched her, and the white Dodge was the SUV they had been riding in.

The two men were arrested on charges of felony battery and are being held on \$100,000 bond each.

The DeSoto County Sheriff's Office reported the following arrests:

- Shannon Marie Albanese, 42, 1200 block of S.E. 3rd Ave., Arcadia. Charge: unarmed burglary of an occupied dwelling. Bond: \$7,500.

## ROADWATCH

**DeSoto County: State Road 70 (West Oak Street) Railroad Crossing**—Crews continue work to improve the railroad crossing on State Road 70 (West Oak Street) west of U.S. Highway 17 in Arcadia. Crews will be shifting traffic to complete work. Two-way traffic will be maintained at all times; however, motorists should use caution and expect delays. The project also includes milling and resurfacing the roadway adjacent to the railroad tracks and installing drainage improvements. Estimated completion is summer 2018, weather permitting. The contractor is Ajax Paving Industries of Florida LLC.

**Hardee County: U.S. Highway 17 from the Hardee/Desoto County Line to Sweetwater Road (County Road 634)**—Crews will widen U.S. 17 from two lanes to four lanes, add a grassed median and build new two-lane bridges over Charlie Creek and Charlie Creek Overflow. The contractor will also install new roadside drainage swales and storm water ponds to manage water running off the roadway. Watch for crews and equipment working close to the road. Drivers should expect daytime lane closures and flaggers will direct motorists through the work zone in a single lane. Observe posted speed limits and drive with caution in the construction zone. The contractor is Watson Civil Construction. Estimated completion is late summer 2018.

## FAMILY ALBUM PHOTOS

Send us a photo to celebrate a birth, birthday, engagement, wedding, anniversary, etc. The Arcadian will run it free. We must have it no later than noon on Monday. Bring your photo to the office or e-mail to [Arcadian.editor@gmail.com](mailto:Arcadian.editor@gmail.com)

### William Lattimore ... 20 years

ARCADIAN PHOTO PROVIDED

Arcadia at its Aug. 7 council hearing honored staff for their time serving the city and its citizens. Pictured is William Lattimore, a school crossing guard working for the Arcadia Police Department. Mr. Lattimore was recognized for 20 years of service. Mayor Judy Wertz-Strickland presents the appreciation certificate.

## Notice to DeSoto veterans

DeSoto County is notifying military veterans that a federal health agency warns contaminated drinking water might have caused cancer and other chronic disease among veterans and families who lived at a former northern Michigan military base. The Agency for Toxic Substances and Disease Registry released a draft report about the Wurtsmith Air Force Base in Oscoda, Mich. The report concluded that

people who consumed or had skin contact with Wurtsmith water may be at an increased risk for cancer.

Extremely high levels of benzene and trichloroethylene were documented in the former B-52 bomber base's water before its 1993 closure. The report is based on long-term exposure over a period of years. The findings also note that even short-term exposure to trichloroethylene

for pregnant mothers during the first trimester could lead to heart birth defects in their children. The chemical was first found in the base's water in 1977, but drinking water wells could've been contaminated for many years before the discovery, according to reports. The Air Force installed a groundwater treatment system to clean up the trichloroethylene in the 1980s after being sued by Michigan.

### Congratulations, Yosmel

ARCADIAN PHOTO PROVIDED

Yosmel Mantilla at the Aug. 7 council hearing was congratulated for receiving a certificate of U.S. citizenship in May 2018. Mr. Mantilla works for the Arcadia Parks Department. He received a Certificate of Recognition from Mayor Judy Wertz-Strickland.

commissioners—which as a private citizen she had no obligation to keep. Yet a circuit court jury in Martin County ruled against her in February and awarded Lake Point absurd damages of \$4.4 million.

Talbot “Sandy” D’Alemberte, the former American Bar Association president working pro bono on Hurchalla’s appeal, accurately calls this a classic SLAPP lawsuit—a strategic lawsuit against public participation aimed at intimidating and silencing critics. “She did nothing but send emails to county commissioners,” he told the Times

editorial board. “What they’re really coming after is your rights to petition the government and free speech.” The First Amendment Foundation (disclosure: Times Editor of Editorials Tim Nickens serves on the foundation’s board), the Florida League of Women Voters and the Florida Press Association are among the organizations planning to file a brief in support of Hurchalla’s appeal.

That appeal to the Fourth District Court of Appeal based in West Palm Beach isn’t likely to be heard until early next year, and then the case is likely to move to the Florida Supreme Court. Hurchalla could have posted a bond to protect her car and kayaks, but D’Alemberte said the cost would have been prohibitive. So deputies

towed away the Toyota Monday, and they picked up the old kayaks, including one Hurchalla and her sister used on the Potomac River as Secret Service agents protecting the attorney general trailed behind.

“There is something very childish about thinking that if they take away my car and my toys I will burst into tears and stop defending the First Amendment,” Hurchalla wrote in an email to several reporters. “The car and the kayaks can be replaced. The First Amendment cannot.”

Agreed. Florida needs more engaged citizens like Maggy Hurchalla who aren’t afraid to tell government officials what they think—not fewer.

**GRITS & PIECES**

**FROM PAGE 4**

crazy enough to try that one. And I sometimes wonder if these and the many other long-gone ones fell victim to a cereal killer.

I’m one of those who thinks stuff tastes the same no matter what time of day it’s eaten, while many others can’t imagine eating anything but breakfast stuff in the morning. Maybe I got that from my dad, who loved to eat leftover fried fish, cold out of the refrigerator, dipped in syrup for breakfast. It was good to me, too.

If you like peanut butter and jelly sandwiches, I will let you in

on another favorite of mine. Toast a couple of waffles to substitute for the bread, and that will take the traditional PB&J to a whole new level for you. Trust me, your taste buds will rejoice and be exceedingly glad. And, you’re welcome.

If I had to name a time when I loved breakfast the most it would have to be in the early 1970s, when my buddy Royce and I would head out to work at the state hospital, and would go by the diningroom to eat before starting our day. There were some great cooks out there, but the best part was the price. You ain’t gonna believe me, but this is true. You could get an egg cooked any way you liked for a nickel. Grits cost

a penny, toast was two cents and coffee was three cents. If you really wanted to splurge, you could spend a whole dime for meat—ham or bacon. And so you could enjoy a complete breakfast for under a quarter a day. As they say, if I’m lyin’, I’m dyin’.

Wheaties cereal is said to be the “breakfast of champions.” That’s a good catch phrase, but I believe that whatever tantalizes your taste buds in the morning and gets you ready to face another day is just as good.

Now if you’ll excuse me, I’m going to bed, where I’ll likely dream of thick bacon, cooked with the rind on it, some red-eye gravy and grits, and a big ol’ cat head biscuit, dripping with melted butter and guava jelly...

# Charley's anniversary was Monday

By **CRAIG GARRETT**  
ARCADIAN EDITOR

Hurricane Charley's 14-year anniversary in DeSoto County was Monday (Aug. 13). He was the first of four hurricanes to whistle through Florida in 2004. The hurricane ran its course over six days, causing billions in damage and the loss of 15 lives. Charley will not be remembered fondly in DeSoto County, where destruction still lingers. *Arcadian* correspondent Shasta Mott shared photos from Hurricane Charley's passing in and around her hometown.

This tumbled water tower made national news.

PHOTOS PROVIDED BY SHASTA MOTT

Charley destroyed pockets of southwest Florida. DeSoto County was hard hit, with damages in the tens of millions.

The rodeo arena took a good bucking.

Charley's winds reached 150 mph, easy game for light camper tops.

Charley's winds whistled through much of southwest Florida.

Turner Center was crushed by Charley's winds.

# School bell rings, the principal's principles

By CRAIG GARRETT  
ARCADIAN EDITOR

Monday was Amanda Irby's first day back to school. She was welcomed by: backed up commodes, A/C units on the blink, streets around the school building wrapped with cars, little people everywhere, new rules to funnel kids into one entry, parents in the office 10 deep with that look, the one that says "I'm lost!"

An outsider facing that chaos would likely run fast.

But it was just another day at the office for Irby. She is the principal at Memorial Elementary School, an 18-year educator and a pro at this sort of thing. Call it the principal's principles. The toilets would

get fixed, kids situated and the air would cool again, she said. And the new safety measures—locked doors and a full-time sheriff's deputy—are what modern schools must cope with, she added.

"The first day ... is always a unique day," said Irby, who has a principal's demeanor, the one that means business, which comes from managing a huge enterprise, a campus of some 950 kids, 80 staffers and all those layers of expectations. "We make it through. And by Friday the transition will be smooth. It has been normal so far, no hiccups."

Irby is, of course, no different than her counterparts in DeSoto's other learning centers. Those men and women must move their ships in the same direction. And the superintendent on down must

provide the tools for these teachers, administrators and the staff to keep things operating smoothly. And the district this year introduces an after-school dinner program, to ship some kids home with snacks, in case there are none at home. It also deals with ever-shifting Florida mandates, Hurricane Irma's leftovers—after insurance claims were denied—a million other issues. It is nothing less than a small army moving against counter forces of dysfunction, disinterest, poverty, language barriers, other obstacles of a shifting world, including fewer teachers.

Yet, Irby keeps upbeat.

"I have a great staff, an absolutely wonderful group of [volunteers] who help out," Irby said. "We'll be just fine."

Staff at DeSoto Middle School listening to Supt. Adrian Cline and law enforcement officials outline the new school year.

T-shirt says everything.

DeSoto schools offer breakfast and lunch to every district child and will introduce after-school snacks.

Built 95 years ago, Memorial Grammar School was named in honor of those who died in World War I.

Mike, Frances and Jack Pooser shown in this undated photograph.

## Frances Pooser remembers her first day of school in 1924

Built 95 years ago, Memorial Grammar School was named in honor of those who died in World War I. Born a few weeks before Armistice, Frances Pooser started school there in 1924.

Before the school was constructed, "all the children who lived out on Coon Prairie [east of Mills Avenue] had to walk to West Elementary School."

Pooser remembered her mother worried about her child having to walk such a distance. Her mother showed her the new foundation for Memorial Grammar School. "She told me I'd be going to school there," Pooser said. "She was really glad it was coming along."

Although the new school was closer to her house, Frances said, "I really hated leaving home. As I walked away, I looked back. I knew every place I could turn around and see the house. I looked back to see [my brothers] Mike and Jack playing on the porch. Then I couldn't see home and the boys any more."

Unlike the Pooser home that had an outhouse, the new school had toilets. Pooser recalled that on the first day a girl in the fourth-grade was frightened by flushing the toilet. "Even the drinking fountains scared some of the children," she said.

She and her brothers had learned to use a flush toilet when they visited their Uncle Zeke McLenon while he was caretaker of the Fort Ogden home owned by the Russell family who spent summers in New York. Pooser recalled, "Our house was near enough to school that I could run home quickly to get lunch. That was the only redeeming feature. Mama watched the clock and had lunch ready for me. I did not like being away from home."

Yet after a while she "envied the other children" who lived farther away and brought their lunch to eat outside under the trees. "I asked my mother if some day

I might bring my lunch and have a picnic with the other children." Eventually, her mother packed a lunch, and Frances ate at school with the other children "a time or two."

"On the first day of school," she said, "they gave us a list of supplies that we needed." One unusual item that her father bought for her at the Harry Cross Drugstore, 15 W. Oak St., was a box of crayons. She had never seen such things.

At school, she said, "I was in something called the 'Baby Chart,' and there were some children who had a box of 16 crayons." That double box had a pink crayon in it. "That just did me in," she said. "...The color pink fascinated me."

After maybe six weeks, Pooser and some others were promoted to the first-grade. "That's when I got a double box of crayons," she said.

Crayons were a luxury in earlier times.

# DeSoto SPORTS EXTRA

## Beginning of the return, bring back tradition

By **STEVE KNAPP**  
ARCADIAN SPORTS EDITOR

Those words (above) are not just the slogan for the 2018 DeSoto County Bulldogs football team, they are the words of a lifestyle. The lifestyle of Friday Night Lights and all of the excitement that goes along with high school football.

The packed stands cheering every play for their team. The color and pageantry of the bands, the cheerleaders and the excitement of high school football. The idea of the high school football game as the place to be on Friday nights. The buzz that is created by a football team, whether they win or lose, they are still OUR football team.

The players put in the effort as they work tirelessly during the brutal heat and humidity of August in Florida, preparing for another season that will create memories of a lifetime. If they put in the effort, the fans and members of the community should be there to cheer them on and show their

appreciation for what these young men are doing.

Those are the things that new Bulldog coach Bumper Hay is trying to instill, not only in his team but the community as well.

"We're trying to bring back the legacy of DeSoto football," Hay said. "I think we have all 11 games, now that the community has donated a dinner for the team on Thursday so we can have a family dinner and fellowship. Also Friday night pregame meals are all covered by the community and we've got our Wednesday night meals covered too. We don't want individuals on this team. We are one team, we act alike and think alike and play together."

Hay is no stranger to DeSoto County as he takes over the helm of the Bulldog football team. Hay was a lineman for the Bulldogs team prior to his graduation in 1994. He also ran track and went to the state meet in weightlifting three times, finishing third in his senior year.

Hay continued his career on the

gridiron at West Alabama and later became a strength and conditioning coach at LSU. He has worked in the weightroom and with the offensive line and linebackers for the Bulldogs program. His recent stint as commissioner of the youth football program prepared him for all of the non-coaching aspects of the job. He has been grooming himself for the

position of head coach for over 20 years and now the time is right for Hay to do what he can to return the glory to the football program.

There is a new unity with this team. You hear words like "together" and "team," along with "us" and "brotherhood" used by the players. They hold

# RETURN

FROM PAGE 14

each other accountable, both on the field and off of it. At the end of a recent practice, senior runningback Neo Hillard, for example, told the team, "We're in our game week now. Don't do anything crazy in class or out of it. We've all got to be here."

The team has been working as a single unit. During "gassers" at the end of practice, one player was "doggin it" and the whole team had to run an extra one to make up for it. That didn't happen again. Players encourage and cheer their teammates as some struggle through the "gassers" that you can only experience if you've been a player.

Hay and his completely new staff have a good nucleus for a successful team. The players have bought into the idea of being able to win and they have worked hard to get themselves in the best condition that they can be in. With just 30 players on the team (more are expected to join once school starts), many players will be playing on both sides of the ball.

Gone from last season's team are four-year starter—on both lines—Kendhal Stewart. Stewart is attending Bethune Cookman University in Daytona and plans to join their team as a walk-on. A three-year starter at quarterback, Malcom Smith is now in college and his experience will be hard to replace.

Hard-hitting linebacker Elijah Arthur will be missed, as will Tyreke Evans, who always had a nose for the ball. Evans recovered a fumble in three straight games last season. Semajd "El Boogie" Elrod came up with some big plays as a receiver and Anthony Gaitan plugged up a big hole

with his experience as a lineman for the Bulldogs.

The Bulldogs will not feature any one runningback or wide receiver on offense. They are a team and will spread the ball around with a stable of fine runningbacks. "We've got so many good backs that we could have gone to a full-house backfield," said Hay.

They have bruisers such as Nate Lowe and Tyrese Smith that can cause some pain to defensive players who get in their way. Of course the Bulldogs will also continue their tradition of speedy and quick runningbacks with Hillard and Trayvis Smith, along with several others ready to display their skills.

The receiving corps is a good one, with Nate Maybell showing flashes of his talent during the preseason. Maybell stands 6 feet/three inches but is an outstanding jumper. He missed going to the state tournament last season by just one person in the high jump for the track team. Ty Wesley is a junior who had several big plays last season including a long touchdown catch on the first play of the game against Bayshore last season. You can expect more fireworks out of him this season.

At tightend is 6 foot/5 inch sophomore Keimar Richardson who can also put some light under his feet if needed. While the tightend doesn't using get many opportunities to catch a pass, he is more than capable for a quick jump pass or short route. Sophomore Ethan Redden will play the slot and will also get time under center. Redden has the kind of moves and speed that Hay described as "being hard to touch even if he's in a phone booth."

"We've got guys like Will Maybell and Kawassmi Wilson who can play

several positions. Maybell can catch the ball and can run too. Wilson is a tough kid that is big and runs hard and can even play quarterback if we need him," said Hay.

Arnold "Bubba" Mele will move from his wide-receiver position to take the snaps this season. The senior had some experience last season and has shown a strong arm with very good accuracy during fall practice. "He's grown a lot even since the spring game," said Hay.

Mele has scored the first DeSoto touchdown in each of his first three seasons since becoming a starter in his freshman year. Mele also played on defense as a safety and returned kickoffs and punts last season. Besides his receiving position he has had a few snaps as a runningback and can fill in just about anywhere Hay needs him.

Providing protection and opening holes for the backs will be senior Tyler Hennager and junior Juan Garibay. Both were starters from last year's squad. There are several players still battling for starting positions on the line.

"We're a typical DeSoto line. We won't be huge on the line but they're bigger than when I played. We have some good, decent-sized kids and they have been working in the weight-room during the off season ... so we'll have to see how it pays off," said Hay.

On the other side of the ball are seniors Trayvis Smith and Dillan Evans. Both players are members of the Bulldogs' weightlifting team and have used their strength and quickness to plug holes from their linebacker positions. Both have been impressive in preseason practice.

"Evans is the kind of kid that will give you 100 percent on every play. Trayvis can run the ball and also is

ARCADIAN PHOTO BY STEVE KNAPP

Senior Arnold "Bubba" Mele and new DeSoto County coach Bumper Hay are both in their first season in a new position. Hay is starting as head coach of the Bulldogs, while Mele takes over at quarterback for three-year starter Malcom Smith. Mele has scored the first DeSoto touchdown of the season in each of his first three years as a starter.

tough at his linebacker spot. The thing is that we will have some depth this year," said Hay.

"The thing that really excites me is the kids are all working hard this year and they haven't missed many practices. I tell them it is just like going to school. If you miss a class, you have to make it up ... and that is the same with football," Hay added.

The Bulldogs travel to Cardinal Mooney tomorrow night (Aug. 16) for the Kick Off Classic. After their bye week, their first home game is against a very strong Avon Park team on Aug. 31.

Let's bring back the legacy and tradition of DeSoto football and fill the stands for this season's team. They are working hard and deserve your support as they try to recreate the Friday Night Lights' experience and bring back the tradition of Bulldog football.

# BUSINESS SPOTLIGHT

Tara Poulton with the "Investing in FPRA" President's Award.

Jorge Hernandez is the director of Code Compliance.

ARCADIAN PHOTOS PROVIDED

Golden Faircloth is with DeSoto's Facilities Department. He receives the award from BOCC Chair Jim Selph.

The DeSoto County Tourism Development Department, branded as Discover DeSoto, was presented with a Golden Image Award for excellence in public relations programming. The department's director is Michael Taber, shown with DeSoto County Administrator Mandy Hines.

## Congratulations, DeSoto County!

DeSoto County on Tuesday recognized its own. Staff picked up individual and team awards across several departments. Those included:

Thrifty Nickel Award: **Golden Faircloth**, Facilities Department

Outstanding employee: **Jorge Hernandez**, director, Code Compliance (oversees Animal Control/Code Enforcement)

Outstanding Team Performance Award: **Animal Control Division**

The DeSoto County Tourism Development Department, branded as Discover DeSoto (<http://visitdesoto.com>), was presented with a Golden Image Award

for excellence in public relations programming at the Florida Public Relations Association's (FPRA) recent annual conference in Ponte Vedra Beach. The Award of Distinction was awarded to **Michael Taber**, Discover DeSoto, and the DeSoto Board of County Commissioners for the "Open for Business" social media campaign in the Digital Tools of Public Relations/Online Audience Engagement category. The award was issued after Discover DeSoto successfully completed a social media campaign as a way to help business owners get back on their feet after Hurricane Irma. Also at the conference, **Tara Poulton**, DeSoto's special projects director and

Outstanding Team Performance Award is given to the DeSoto County Animal Control Division.

local chapter president of the Central West Coast Chapter of FPRA (CWC-FPRA) which serves DeSoto, Manatee and Sarasota counties, was also awarded the "Investing in FPRA" President's Award in recognition of the local Chapter's commitment to reinvesting in its members

by hosting the highest quality speakers, making conferences, monthly programs and ongoing educational opportunities more accessible and affordable, and facilitating social opportunities to help members enjoy downtime and get to know each other better.

## Welcoming downtown merchants

By **CRAIG GARRETT**  
ARCADIAN EDITOR

They model themselves on "American Pickers," the History Channel reality show whose stars work America's backroads to seek value in other people's stuff, poking through barns, homes and sheds to hit paydirt. In some way, most of us do the same thing. It's the thrill of the hunt.

Bob Doughty and Rhonda Allegretto bring their version of "American Pickers" to Arcadia's downtown in September. They're restoring the closed Purple Peacock retail space at Oak and Polk in the former Rosin Arcade, the "Pink Building." Their Arcadia Seas/Traveled

Treasures shop brings items the couple find working the stretch from New England to Florida, Allegretto said. The pair had a vintage shop in Englewood, but are convinced Arcadia, with its national reputation for quaintness and a good selection of shops, is the place to stake their tent. "We are thrilled for opportunity," she said. "We moved to Arcadia in May to follow our dream."

Former owners of the Purple Peacock, Renee Otto and Tim Kilkelly, moved their business to 207 W. Oak. Kilkelly also owns Treasure Alley on Oak.

Doughty and Allegretto will feature nautical keepsakes, but offer other items they've collected in their travels, she said, adding that they're well networked

ARCADIAN PHOTO PROVIDED

Historic Rosin Arcade in earlier days.

and find an array of unusual and usable things. They expect to fill the shop and cycle things in as sales increase.

"It's a lot of work but a lot of fun,"

she said. The shop will open six days in season, five in the off months. Check the Traveled Treasures Facebook page for updates and contact information.

## What's going on here?

By **CRAIG GARRETT**  
ARCADIAN EDITOR

Wonder what's happening at the former Arcadia Winn-Dixie? Susan Laielli, director of communications for the Diocese of Venice, answers that question.

"As part of Pastoral planning for the growing Catholic population in and around Arcadia, the Diocese of Venice purchased the former Winn-Dixie property for \$3 million in July 2017, with the goal of redesigning it for the faithful of St. Paul Catholic Church. A new Pastor has been appointed at the Parish, Father Pablo Ruani, who will oversee the construction. There is also a vibrant community of Women Religious serving at the Parish.

ARCADIAN PHOTO PROVIDED

Former Winn-Dixie property in Arcadia under construction to become a new facility for St. Paul Parish.

"The construction occurring today is part of the Pastoral plan to offer larger worship space for this growing Catholic community. The design plans include a new Catholic Church, Parish Hall, offices, and space for Religious Education classrooms. The goal for completion, God willing, is summer 2019.

"As you may know, Diocese of Venice Catholic Charities, Inc. has a satellite center in Arcadia, and has built and dedicated two phases of farm-worker housing known as Casa San Juan

Bosco, and has plans to shortly begin building desperately needed senior housing.

"A point of note, immediately following Hurricane Irma, the former Winn-Dixie property served as a distribution center during a desperate time of need for those in and around Arcadia.

"When the new Church, Parish Hall, offices, and Religious Education classrooms are complete, the current Church will become a Chapel used for smaller gatherings of the faithful."

## Vote early and ...

ARCADIAN PHOTO PROVIDED

**Early voting for the Aug. 28 primary started Monday. Turnout was steady at the DeSoto administration building. Early voting for the Nov. 6 general election is Oct. 22-Nov. 3. Voters on election day must arrive at their assigned precincts. You may also vote by mail. Early voting is 8 a.m.-4:30 p.m., Monday-Friday, 7 a.m.-3 p.m. weekends. Details are at 863-993-4871, [www.votedesoto.com](http://www.votedesoto.com). The Arcadian will track election results to keep you in the loop.**

# Arc-DeSoto up to par at golf tourney

By **PAT SCHUDEL**

ARCADIAN SPORTS CORRESPONDENT

Nine Special Olympics athletes on Aug. 8 traveled to Naples to participate in the Area 9 Special Olympics Golf Tournament held at the Royal Palms Golf Course. Area 9 consists of six counties that include Charlotte, Collier, DeSoto, Lee, Manatee and Sarasota.

As part of the opening ceremonies, DeSoto's Dennis Carter performed the "Star Spangled Banner."

For the tournament, athletes are assigned a division based on results in the County Games. Each athlete participated in five skill events consisting of long putt, irons, woods, pitch shot and chip shot. Ribbons were determined by total points for all five events.

DeSoto's Jerome Raynor had the best overall score of all participants, earning a first-place blue ribbon. Also winning blue ribbons for DeSoto County were Vanessa Byrd and Jeffrey Tomlinson.

Roy Engels and Kim Holder won third-place yellow ribbons. Placing fourth in their divisions were Dennis Carter, Casey Collins, Jonathan Franco and Carl Schudel. All blue-ribbon winners are

eligible to advance to the State Finals, which will be held at the Disney World Sports Complex in Orlando in September.

Coaches for the Arc-DeSoto Team in Naples were Ken Clark and Joyce Collins. Team chaperone was Lucinda Tomlinson. Teresa Marler served as a bus driver for the team.

Sponsors for the tournament include the Collier County Sheriff's Department, Mosaic, PGA Superstore and the Royal Palms Golf Course.

Next up for the Arc-DeSoto Special Olympics Team will be the Area 9 Swim Meet to be held on Aug. 18 in Sarasota.

ARCADIAN PHOTOS PROVIDED

DeSoto athletes in Naples for golf competition.

Arc-DeSoto athletes honed their golf skills in Arcadia at the newly upgraded municipal course. It helped in earning ribbons in Naples.

DeSoto's Dennis Carter performed the "Star Spangled Banner."

Golfers sponsorships came partly from the Collier County Sheriff's Office, Mosaic, PGA Superstore and the Royal Palms Golf Course chipped in contributions.

# SUDOKU

**Fun By The Numbers**

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

**Here's How It Works:**  
Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

ANSWER:

**ARIES — Mar 21/Apr 20**  
Aries, even if you believe you have a handle on all that is going on around you, some surprises are bound to pop up. Enjoy any unexpected turn of events.

**TAURUS — Apr 21/May 21**  
Taurus, embrace your inner storyteller in the days ahead. Family and friends will want to catch up, and sharing memorable moments can be fun.

**GEMINI — May 22/June 21**  
Gemini, words flow effortlessly from your lips this week, and others are captivated by your tales. You can use this power and creative streak to your advantage.

**CANCER — June 22/July 22**  
Cancer, you may have been a little preoccupied of late. Focus on what has been on your mind and how it is affecting your relationships, making changes where necessary.

**LEO — July 23/Aug 23**  
Relationships with friends and associates have significant influence on your life this week, Leo. They can create new business opportunities and expand your social circle.

**LIBRA — Sept 23/Oct 23**  
Libra, a budding relationship is ready to be taken to the next level. Devote the time necessary to make that happen, as doing so can further build on an already strong foundation.

**SCORPIO — Oct 24/Nov 22**  
Scorpio, reaching an acceptable conclusion is easier if you run ideas by others as you work out some details in your head. Discussing any doubts you have can be helpful.

**SAGITTARIUS — Nov 23/Dec 21**  
Sagittarius, make a concerted effort to keep lines of communication open in the days ahead. This can benefit you and your loved ones in some surprising ways.

**CAPRICORN — Dec 22/Jan 20**  
Capricorn, you feel like you are in the driver's seat as it pertains to your love life and relationship this week. But a partnership requires sharing responsibilities.

**AQUARIUS — Jan 21/Feb 18**  
Aquarius, nearly everything you do this week will be connected to your career. Strategic moves come easily to you, and certain pieces may fall into place just when you need them to.

**PISCES — Feb 19/Mar 20**  
Pisces, there is a time to share your dreams, and this week may be the perfect time to do just that. Open up to your closest loved ones.

**FAMOUS BIRTHDAYS**

**AUGUST 12**  
Cara Delevingne, Model (26)

**AUGUST 13**  
Sebastian Stan, Actor (36)

**AUGUST 14**  
Steve Martin, Comic Actor (73)

**AUGUST 15**  
Jennifer Lawrence, Actress (28)

**AUGUST 16**  
Madonna, Singer (60)

**AUGUST 17**

# CALENDAR

FROM PAGE 6

3 p.m. Group book discussion open to everyone.

- DeSoto Memorial Hospital offers free blood pressure screenings from 3 to 4 p.m. in the DeSoto Memorial Hospital McSwain Room. Call 494-8432 for details.

- The AA District 5 committee business meeting is held at 8 p.m. on the third Tuesday of every month at St. Nathaniel's Episcopal Church, 4200 S. Biscayne Dr., North Port. Visit <http://aadistrict5.org> for details.

- SunCoast Blood Bank holds a blood drive: every Tuesday, noon-5 p.m. at Winn-Dixie every Friday, 9 a.m.-noon at Habitat for Humanity, 114 N. Polk St. For details, call 1-866-97-BLOOD.

- The Senior Friendship Centers, 219 W. Oak St., offer daily coffee and conversation 9 a.m.-1 p.m., movie day 9:30-11:30 a.m., lunch served at 11:30 a.m. Donations appreciated but no one is turned away. Not interested in scheduled activities? We have a large assortment of games, puzzles, cards, crafts, books, movies, discussion groups and guest speakers.
- Tuesday Night Quilters meet twice monthly at the Turner

Civic/Ag Center from 5:30-7 p.m. For more info call 494-4652.

- The DeSoto Public Library hosts Legos for children every Tuesday at 3 p.m.

- The Peace River Woodcarvers meet at 8 a.m. at Trinity United Methodist Church in Arcadia. For information, call Dale Weese at 941-740-4790.

- The only Narcotics Anonymous now meets Tuesday and Thursday from 7 p.m.-8 p.m. at St. Edmund's Church in Arcadia. For information, call Curtis at 244-2884.

- The All Faiths Food Bank distributes free food 6-10 a.m. Monday through Friday at the Center for the Needy, 161 S. Orange St.

- The Faith Mission holds a conversational English class from 10 a.m.-11 a.m. A coloring club is available for kids during the class.

- Rotary Club of Arcadia meets at noon every Tuesday in the McSwain Room at DeSoto Memorial Hospital.

- The All Faiths Food Bank distributes free food 9 a.m. to noon every Tuesday at Trinity United Methodist Church, 304 W. Oak St.

- Freedom Fellowship Christian Ministries Support Group meets at 7 p.m. Tuesday at 1528 N.E. Turner Ave.

- Weight Watchers meets every Tuesday at 6 p.m. at

Calvary Baptist Church, 1509 E. Oak St. For details visit [www.weightwatchers.com](http://www.weightwatchers.com) and "find a meeting" or call 800-651-6000.

- DeSoto County Library holds Lego time at 3 p.m. Tuesdays at 125 N. Hillsborough Ave., Arcadia. Call 993-4851 for more information.

- Alcoholics Anonymous Second Tradition meets at 8 p.m. at St. Edmund's Episcopal Church, 327 W. Hickory St.

- AA Hispanic Group meets at 8 pm. at La Clinica, 1901 10th Ave.

- Prescription Assistance is at the DeSoto County Health Department Clinic Location: 1031 E. Oak St., Arcadia. Call to make an appointment or for more information, call 491-7580 ext. 256.

- Suncoast Community Blood Bank is open from noon to 6 p.m. today at 710 N. Brevard Ave. (U.S. 17 North), Arcadia. For more information, call 993-9366.

## WEDNESDAY

- The Senior Friendship Centers, 219 W. Oak St., offer daily coffee and conversation 9 a.m.-1 p.m., low-impact exercises start at 10 a.m., Weigh-In Healthy Eating and Recipe Sharing 10 a.m. Lunch served at 11:30 a.m. Donations appreciated but

no one is turned away. Not interested in scheduled activities? We have a large assortment of games, puzzles, cards, crafts, books, movies, discussion groups and guest speakers.

- The All Faiths Food Bank distributes free food 6-10 a.m. Monday through Friday at the Center for the Needy, 161 S. Orange St.

- The All Faiths Food Bank distributes free meals every Wednesday 11 a.m.-12:30 p.m. at Trinity United Methodist Church, 304 W. Oak St.

- Hour of Power Prayer time is held at noon at Freedom Fellowship Christian Ministries, 1528 N.E. Turner Ave.

- AA "Brown Bagger" meetings are offered every Wednesday at noon at Trinity United Methodist Church, 304 W. Oak St.

- Alcoholics Anonymous Serenity meets at 8 p.m. at Grace Lutheran Church, 900 W. Oak St. (State Road 70).

- "Art for Kids" is at 3 p.m. every Wednesday in the DeSoto County Library's children's wing. This free program, sponsored by the DeSoto County Arts and Humanities Council, is for elementary school-aged children.

- Prescription Assistance is available at the DeSoto County Health Department Clinic Location: 1031 E. Oak St., Arcadia. Call to make an appointment or for more information, call 491-7580 ext. 256.

# AGRICULTURE BRIEFS

## No bull, heat bad for cattle

Cattle are a little like humans: They are more productive when they are cooler. With cattle, a cooler body helps with meat and dairy production, new University of Florida research shows.

Cows with shorter hair are cooler, and thus, more productive, said Raluca Mateescu, an associate professor of animal sciences at the UF Institute of Food and Agricultural Sciences. A calm cow is also more productive than an agitated one, Mateescu said. When their bodies heat up, cattle use energy to try to lower their temperature, which usually means they eat less, said Mateescu, who led a recent study on body temperature and cattle traits.

The U.S. livestock industry suffers an annual economic loss of \$2.36 billion to heat stress, according to a 2003 study led by Ohio State University. Scientists predict most livestock throughout the U.S. will experience extreme summer heat in the years to come, which translates to less-productive cattle, Mateescu said.

For their research, Mateescu and other UF/IFAS colleagues studied 725 Brangus cows in south-central Florida. Brangus are a cross between Brahman

# Area AGRICULTURE

Updates, alerts, reports and other local agricultural information.

and Angus cows and are the most common breed in Florida. Because Angus and Brahman possess such different traits, Brangus cattle are ideal to research relationships between the animal's coat and demeanor and their body temperature, Mateescu said.

UF Institute of Food and Agricultural Sciences

## More hopeful news on greening

Citrus greening has puzzled and plagued Florida growers and researchers alike, forcing stakeholders to think and reach outside the box for solutions—any. Now, University of Florida scientists believe a group of plant hormones might eventually be a helpful tool for those dealing with the disease.

Fernando Alferez, a UF/IFAS assistant professor of horticultural sciences, is

leading a team of researchers studying the effects of *Homobrassinolides* (HBr), a specific type of plant hormone, on greening-infected citrus trees. Early results show with the hormone, fruit is maturing faster and is 20 percent heavier, according to Alferez. The hormone also helps reduce the number of oranges that drop from the trees, he said. In treated trees, scientists have seen 15-20 percent more fruit per tree. So far, the hormone has not reduced the greening bacteria in the citrus trees, but Alferez and his fellow researchers have seen indicators of better tree health, such as more chlorophyll, suggesting the treatment might make citrus trees more tolerant to greening.

Although HBr is commercially available and can be used for Florida citrus, UF/IFAS researchers are still researching its impact on citrus greening before making a final recommendation to growers.

# HISTORY

FROM PAGE 1

As early as 1955 the state of Florida began purchasing property to dig the relief channel, and the excavated soil may have been used to build the embankment for the new road. The "overflow" intersected with the remnants of "Crystal Lake," a dredged water body with access to Peace River.

It was designed as part of River Side Terrace, a subdivision of Arcadia, Florida. The plat also reserved an entire block for the construction of a hotel on the west shore of the river where the bathrooms/concession building is now located in the park, just south of the old concrete Peace River Bridge. Built by the Lutten Bridge Co., the structure—complete with electric "street lights"—opened to traffic in June 1925.

The River Side Terrace plat was filed on Oct. 13, 1925, by the Atlantic-Florida Corp., established on Oct. 15 and dissolved by proclamation on Sept. 17, 1936.

On Sept. 20, 1943, Gertrude Morgan (1891-1988) and Louie R. Morgan (1891-1975) purchased the property that is today DeSoto Veterans Memorial Park as part of a larger parcel "being in what is known as Riverside Terrace ... said lands being subject to City Tax Liens in the amount of \$1,221.34," as recorded in Deed Book 247, p. 251.

In Block XX of River Side Terrace along the south shore of Peace River, the Woman's Club owns lot 3 and the American Legion lots 11-14. Lots 1 and 2 of Block Y were the Pure Oil Filling Station was located on the east side of the "Owens Road" and the Bradenton Road intersection. The curbs for Owens Road can easily be seen along the south side of the old Bradenton Road, and across State Road 70, the road's planned route forms the eastern boundary of the triangular property owned by the DeSoto Gun Club.

According to Deed Book 92, p. 739, South

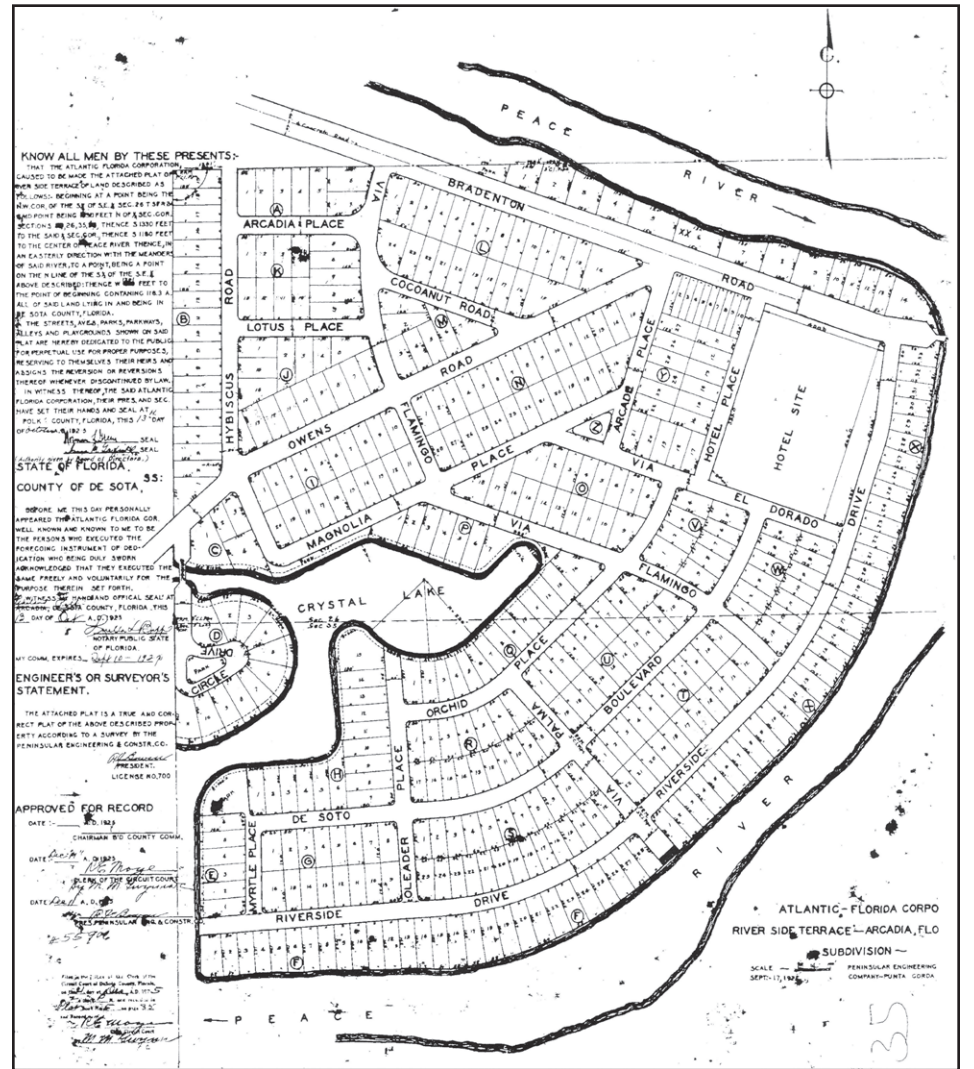

Lamp posts had lighted the old Peace River bridge feeding Veterans Park.

Florida Securities leased the property south of the river and north of the new S.R. 70 to DeSoto County in 1973: "The lessee intends to use the leased premises as a public park ... The property shall not be sold by lessor for a period of five years after the date of this lease." Gertrude Morgan served as president and Louie R. Morgan as secretary of South Florida Securities.

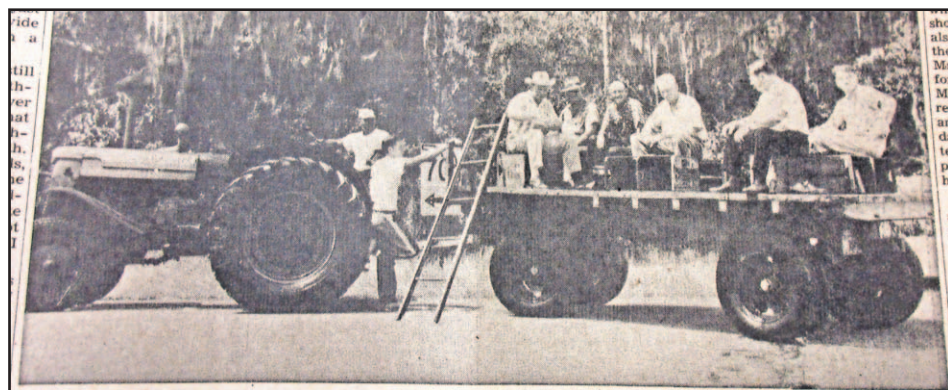

In 1977, the property was transferred to the Louie R. and Gertrude Morgan Foundation, as recorded in Deed Book 142, p. 769, and in 1979 the Foundation granted the land to "be used by DeSoto County as a public park and for no other purpose," according to Deed Book 158, p. 903.

In 2012, DeSoto County commissioners voted to rename DeSoto Park as DeSoto Veterans Memorial Park and a flag pole commemorating the U.S. Armed Services was installed in 2013. A 12-foot-wide sidewalk was also constructed from the boat ramp along the river's south shore and joins—via the old road and bridge—to the sidewalk in Morgan Park.

On the west side of the boat ramp the sidewalk continues south of the boat ramp and across the "relief channel" bridge to the old Bradenton Road that deadends at Peace River Campground and County Road 661.

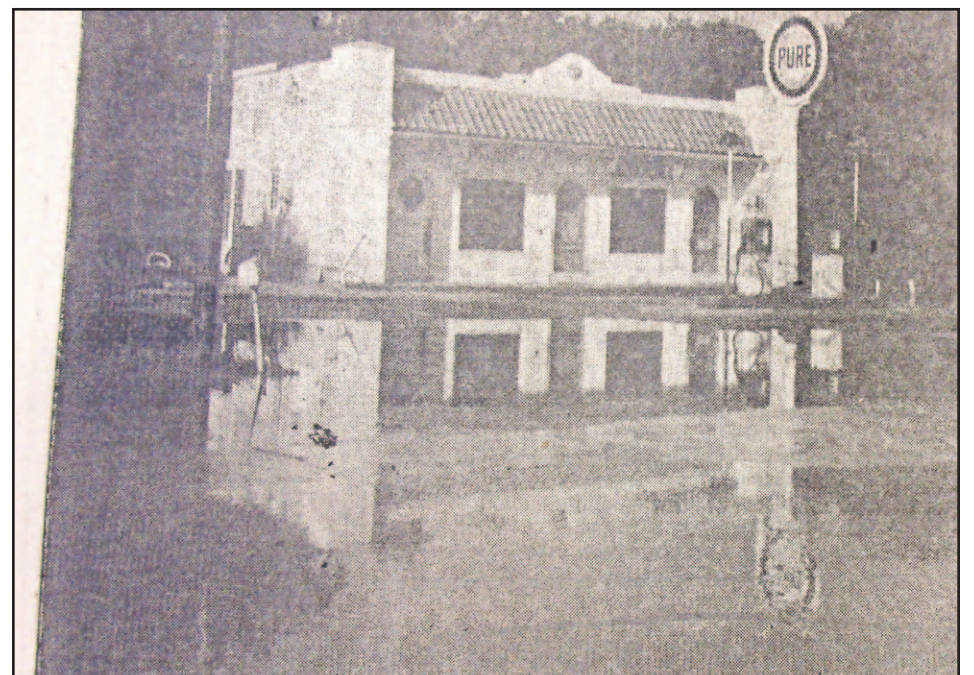

The River Side Terrace plat was filed on Oct. 13, 1925, by the Atlantic-Florida Corp.

County Commissioners and several other local residents made a survey trip of Road 70 late last week, but they had to depend on the ferry service to get completely across Peace River. The group is shown just before they started back to the bridge from the west side of Peace River on Road 70.

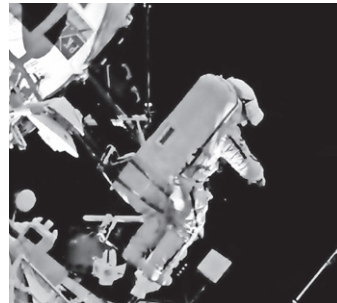

Arcadia provided a ferry from the old Peace River Bridge to County Road 661.

## Trump yanks ex-CIA chief's clearance

By JILL COLVIN and ZEKE MILLER  
ASSOCIATED PRESS

WASHINGTON — President Donald Trump abruptly revoked the security clearance of ex-CIA Director John Brennan on Wednesday, an unprecedented act of retribution against a vocally critical former top U.S. official.

AP FILE PHOTO

Trump also threatened to yank the clearances of eight former officials and a current one, mostly top intelligence and law enforcement officials from the Obama and previous administrations.

Trump denounced Brennan's criticism and spoke anxiously of "the risks posed by his erratic conduct and behavior. The president described his own action as fulfilling his "constitutional responsibility to protect the nation's classified information."

However, Democratic congressmen said it smacked of an "enemies list" among fellow Americans and the behavior of leaders in "dictatorships, not democracies." Brennan tweeted: "My principles are worth far more than clearances. I will not relent."

Trump's action, critics and nonpartisan experts said, marked an unprecedented politicization of the federal government's security clearance process. It also was a clear escalation in Trump's battle with members of the U.S. intelligence community he inherited and has attempted to reorient since he took office.

And it came in the middle of the president's latest controversy — accusations of racism by former assistant Omarosa Manigault Newman and his bitter reaction to them. Trump's statement, distributed to reporters, was dated July 26, 2018, suggesting it

In this May 23, 2017, photo, former CIA Director John Brennan testifies on Capitol Hill in Washington, before the House Intelligence Committee Russia Investigation Task Force.

could have been held and then released when needed to change a damaging subject.

Trump, in a statement read by his press secretary and distributed by the White House, accused Brennan of having "leveraged his status as a former high-ranking official with access to highly sensitive information to make a series of unfounded and outrageous allegations, wild outbursts on the internet and television about this administration."

"Mr. Brennan's lying and recent conduct characterized by increasingly frenzied commentary is wholly inconsistent with access to the nations' most closely held secrets," the statement said.

Brennan has indeed been deeply critical of Trump's conduct, calling his performance at a press conference last month with Russian President Vladimir Putin in Finland "nothing short of treasonous."

He said of Trump's order on Wednesday, "This action is part of a broader effort by Mr. Trump to suppress freedom of speech & punish critics. It should gravely worry all Americans, including

## Pennsylvania grand jury: Catholic Church hid decades of sex abuse by priests

By MATT PEARCE  
LOS ANGELES TIMES

The 1,356-page report from Pennsylvania begins with a plea: "We, the members of this grand jury, need you to hear this." The Roman Catholic Church's darkest secrets start tumbling out not long afterward.

In the Diocese of Allentown, one priest was confronted by his superiors and said: "Please help me. I sexually molested a boy." The diocese indeed

helped him by letting the priest serve for several more years after the diocese concluded that "the experience will not necessarily be a horrendous trauma" for the boy, the report says.

In the Diocese of Erie, according to the report, one priest confessed to orally and anally raping at least 15 boys, who were as young as 7 years old. He was not removed from the priesthood until years later. The bishop ordered the parish to not say why, adding, "Nothing else need be noted."

The landmark report into Catholic priest abuse released Tuesday in Pennsylvania — the culmination of a two-year grand jury investigation launched by the state's attorney general — is thought to be the most extensive U.S. inquiry into how priests sexually abused children for at least half a century and were shielded by senior church officials trying to avoid public controversy.

Based on half a million pages of internal church documents, as well as the

testimony of dozens of witnesses, the grand jury identified 301 "predator priests" who abused more than 1,000 children in six of Pennsylvania's eight dioceses, with the "real number" of victims thought to be in the thousands. (Pennsylvania's Altoona-Johnstown Diocese and the Archdiocese of Philadelphia had already been investigated by other grand juries.)

"We've never seen a report that gives so much

## CAN HACKERS TAMPER WITH YOUR VOTE?

SHUTTERSTOCK

## Researchers show it's possible in nearly 30 states

By TIM JOHNSON, GREG GORDON and CHRISTINE CONDON  
McCLATCHY WASHINGTON BUREAU

LAS VEGAS — Top computer researchers gave a startling presentation recently about how to intercept and switch votes on emailed ballots, but officials in the 30 or so states said the ease with which votes could be changed wouldn't alter their plans to continue offering electronic voting in some fashion.

Two states — Washington and Alaska — have ended their statewide online voting systems.

The developments, amid mounting fears that Russians or others will try to hack the 2018 midterm elections, could heighten pressure on officials on other U.S. states to reconsider their commitment to online voting despite repeated admonitions from cybersecurity experts.

But a McClatchy survey of election officials in states that permit military and overseas voters to send in ballots by email or fax — including Alabama, Kansas, Missouri, North Carolina, South Carolina and Texas — produced no immediate signs that any will budge on the issue. Some chief election officers are handcuffed from making changes, even in the name of security, by state laws permitting email and fax voting.

At the world's largest and longest-running hacker convention, two researchers from a Portland, Ore., nonpartisan group that studies election security showed how, in about two hours, they could set up a sham server and program it to intercept and alter ballots attached to emails.

"Ballots sent over email are not secure," said Lyell Read, one of the researchers from the group Free & Fair. "As long as people have a chance to vote another way, that's probably a good decision."

"Anyone who controls a router can change a ballot. It's just insane. It's like attaching a \$100 bill to a postcard and mailing it and expecting it to get there."

— David Jefferson,  
computer scientist at California's Lawrence Livermore National Laboratory

Read and Daniel M. Zimmerman, who earned credentials as a computer scientist at CalTech, said the hacking at the annual DefCon conference in Las Vegas required nothing more than commonly available programming tools.

Read said he set up an "impostor server" to mimic a real one that would normally route emails containing attached ballots. On the rogue server, he inserted 30 or so lines of computer code, known as Bash shell script, to alter voters' choices on ballots attached to emails in transit and to replace them with Read's preferred candidates.

Among those attending the conference were more than 20 officials from the U.S. Department of Homeland Security. Several of them observed the email vote switcheroo, said a department official who spoke on condition of anonymity.

DHS officials have stepped up their consultations with states about election security since Russian operatives hacked a voting vendor in 2016 and tried through so-called spearphishing attacks to penetrate 21 state voter registration systems, succeeding only in Illinois. The agency rarely discusses its advice to state and local officials, whom the Constitution gives nearly total authority over the nation's elections.

However, at an election security conference in Washington in March 2016, DHS cybersecurity official Neil Jenkins said the agency believes

online voting "introduces great risk into the election system" at any level of government, providing "an avenue for malicious actors to manipulate the voting results."

Jenkins said the department would issue guidelines warning states against online voting in the final months of the Obama administration. Why that never happened could not immediately be determined, Jenkins has since left the department.

Researchers at the DefCon convention were sharply critical of any sort of electronic voting, including voting by smartphone, which will occur for the first time in November. West Virginia announced last week that it will allow military personnel posted overseas and registered to vote in West Virginia to vote via smartphone in the Nov. 6 election, using an app created by Voatz, a Boston-based startup.

"In my opinion, email voting is the most dangerous form of voting," said David Jefferson, a computer scientist at California's Lawrence Livermore National Laboratory and former board chairman of both the California Voter Foundation and Verified Voting, nonpartisan groups that promote secure and transparent election technology.

"Anyone who controls a router can change a ballot," Jefferson said. "It's just insane. It's like attaching a \$100 bill to a postcard and mailing it and expecting it to get there."

### Security clearances under scrutiny

The White House says President Donald Trump has revoked the security clearance of former CIA chief John Brennan and is reviewing whether to do the same to nine other officials who have criticized him:

JAMES CLAPPER  
Former director of national intelligence

JAMES COMEY\*  
Former FBI director

MICHAEL HAYDEN  
Former CIA director

ANDREW MCCABE\*  
Former deputy FBI director

BRUCE OHR  
Former associate deputy attorney general

LISA PAGE  
FBI attorney

SUSAN RICE  
Former national security adviser

PETER STRZOK  
Former FBI agent

SALLY YATES  
Former deputy attorney general

\*Does not currently have a security clearance.

# Turkey increases tariffs on US goods, escalating feud

By SUZAN FRASER ASSOCIATED PRESS

ANKARA, Turkey — Turkey said Wednesday it is increasing tariffs on some U.S. products like cars, alcohol, and coal — a move that is unlikely to have much economic impact but highlights the deteriorating relations with the U.S. in a feud that has already helped trigger a currency crisis.

The Turkish government said tariffs on American cars will be doubled to 120 percent while those on alcoholic drinks will be hiked by the same rate to 140 percent. Overall, the duties will amount to \$533 million, a relatively small sum meant as retaliation for U.S. President Donald Trump's recent decision to double tariffs on Turkish steel and aluminum.

The tariffs also come a day after President Recep Tayyip Erdogan said Turkey would boycott U.S. electronic goods, singling out iPhones. Though it was unclear how the boycott would be enforced or encouraged.

Beyond the bluster of the two world leaders, the spat between the NATO allies has exacerbated a financial storm in Turkey. International investors have been put off by the country's high levels of foreign debt and Erdogan's refusal to allow the central bank to raise interest rates to support the currency, as experts say it should.

The currency drop is particularly painful for Turkey because it has accumulated a high debt in foreign currencies.

AP PHOTO

**Turkey's President Recep Tayyip Erdogan, left, and Qatar's Emir Sheikh Tamim bin Hamad Al Thani embrace each other before their talks in Ankara, Turkey, Wednesday.**

The Turkish lira has dropped to a series of record lows in recent weeks, having fallen 37 percent so far this year. It recovered a bit, by 5 percent to around 6.05 lira per dollar Wednesday, after the government took steps to shore up the currency by reducing the daily limit in bank foreign currency swap transactions.

On Wednesday, Turkish officials said Qatar had pledged \$15 billion of direct investments for Turkey, in a bid to help Turkey's economy. The officials said Qatar's Sheikh Tamin bin Hamad Al Thani pledged to "quickly implement" the investment package during a meeting with Erdogan in Ankara. The officials from Erdogan's office provided the information on condition of anonymity in line with regulations.

Presidential spokesman Ibrahim Kalin later confirmed the pledge on Twitter, saying: "Turkish-Qatari relations are based on solid foundations of true friendship and solidarity."

## NEWS FROM AROUND THE WORLD

### UK arrests one of Europe's most wanted

LONDON (AP) — Britain's National Crime Agency says it has arrested one of Europe's most wanted men, nabbing the suspected head of a Romanian organized crime network.

The NCA says Romanian Florin Ghinea, 43 was detained after leaving a gym in Watford, about 15 miles northwest of central London.

Romanian authorities are seeking Ghinea, who goes by the nickname "Ghenosu," on allegations he organized a trafficking ring that dispatched Romanian women to Ireland, Finland and Dubai for sexual exploitation. He is also accused of conspiring to kill a criminal rival.

### Heavy monsoon rains kill 67 in southern India

NEW DELHI (AP) — Torrential monsoon rains have disrupted air and train services in the southern Indian state of Kerala, where flooding, landslides and bridge collapses have killed at least 67 people in the past week, officials said Wednesday.

The international airport at Kochi, a major port city, suspended flight operations until Saturday after rains flooded the runway.

Monsoon rains kill hundreds of people every year in India. The monsoon season runs from June to September.

### Forgotten remnant of Berlin Wall found in central district

BERLIN (AP) — A local official has discovered a forgotten remnant of the Berlin Wall close to the new headquarters of Germany's foreign intelligence service. It's the second long-lost piece of the barrier to

AP PHOTO

**A newly discovered section of the Berlin Wall hides behind bushes near the headquarters of Germany's Federal Intelligence Service in Berlin, Wednesday.**

be identified and given protected status this year.

Most of the wall, built in 1961 by communist East Germany, was demolished starting in 1990. Only a few preserved sections remain.

### Boat sinks on Nile River in Sudan, killing 22

CAIRO (AP) — A boat sank on Wednesday while crossing the Nile River in Sudan and at least 22 people drowned, including 21 students and a woman, the country's state news agency reported.

The boat was carrying more than 40 students on their way to school in the northern River Nile state, SUNA said. The report did not say how old the students were.

SUNA said the boat sank after one of its engines broke down at the middle of the river. The victims' bodies have not yet been recovered, the report said.

### Germany creates 3rd gender identity for records: 'diverse'

BERLIN (AP) — Germany's Cabinet on Wednesday approved a third gender option for official records that will allow people to be registered as "diverse," complying with a ruling from the country's highest court.

In November, the Federal Constitutional Court decided that people must be allowed to be entered in records as neither male nor female, ordering authorities either to create a third identity or scrap gender entries altogether.

It ruled on a case in which a plaintiff sought unsuccessfully to have their entry in the birth register changed from "female" to "inter/diverse" or "diverse." Until now, the only other option was to leave the gender blank.

### Cuba and Canada agree to fight sex trafficking

HAVANA (AP) — Cuba and Canada have signed an agreement to reinforce cooperation on sex trafficking of minors and women, pledging to track and apprehend citizens from either country engaged in exploitation of children and adolescents for pornography or sexual abuse.

A superintendent of the Canadian Royal Mounted Police charged with

tracking sexual abuse of minors by Canadian citizens says the agreement will enhance the efforts by both sides to monitor and impede sexual crimes against women and minors in both countries.

The agreement signed Wednesday calls for greater information sharing, joint investigations, and prosecution of suspects by either country.

### Illegal border crossings in Canada rise in July

TORONTO (AP) — The number of border crossers entering Canada illegally from the U.S. rose from June to July, but remained sharply below the pace of last summer.

Canada's immigration department said this week the Royal Canadian Mounted Police intercepted 1,634 migrants last month. That's up from 1,263 in June but far below the 3,134 caught in July 2017 or the record 5,712 in August last year — part of a surge that strained Canada's immigration system.

Officials say the drop is likely due to their warnings that winning asylum isn't as easy as some believed.

Canadian officials say economic reasons are not grounds for asylum and that many crossing the border illegally won't be allowed to stay

### Suicide bomber targets Shiite students in Kabul, killing 48

KABUL, Afghanistan (AP) — A suicide bomber struck a private education center in a Shiite neighborhood of Kabul on Wednesday where high school graduates were preparing for university entrance exams, killing 48 young men and women and leaving behind a scene of devastation and tragedy.

The bombing, blamed on the Islamic State group, was the latest assault on Afghanistan's Shiite community, which has increasingly been targeted by Sunni extremists who consider Shiites to be heretics.

It also showed how militants are still able to stage large-scale attacks, even in the heart of Kabul, and underscored the struggles of the Afghan forces to provide security and stability on their own.

The attack comes amid a particularly bloody week in Afghanistan that has seen Taliban attacks kill scores of Afghan troops and civilians.

# Parkland students start school year with tightened security

PARKLAND, Fla. (AP) — Students at Marjory Stoneman Douglas High School returned to a more secure campus on Wednesday as they began their first new school year since a gunman killed 17 people in the freshman building. But some say they still won't feel protected despite \$6.5 million in security enhancements, including 18 safety monitors, new classroom locks and upgraded video surveillance.

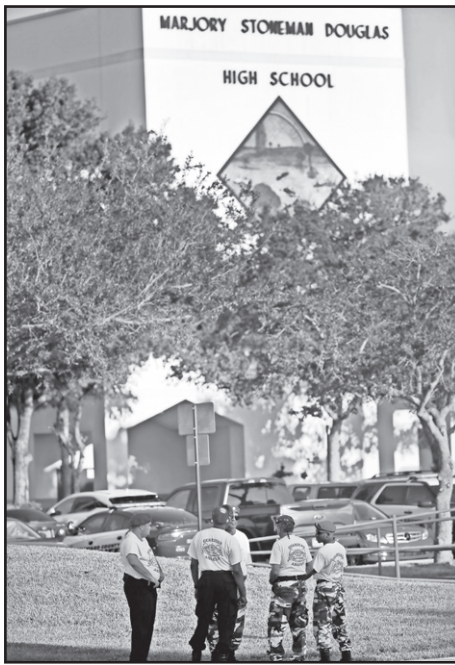

All the students wore lanyards with IDs around their necks as they walked past a heavy police presence, in what has become their new normal. Volunteers greeted them with German shepherds, and a helicopter hovered overhead as a throng of media watched from across the street.

Three school resource officers, three security specialists and a dozen campus monitors will be on patrol. They'll be keeping watch at new fences and gates at the beginning and end of the school day, keeping out all but staff and students wearing ID badges.

Visitors will have only one way in, and they'll be screened through a video intercom system. The district had planned to add metal detectors but reversed course amid concerns over privacy and the impracticality of trying to clear thousands of students before each day's morning bell.

All classroom doors have new hardware that automatically locks when doors are pulled shut. Witnesses said teacher Scott Beigel and student Joaquin Oliver were fatally shot as they ushered students inside to safety, in part because the old hardware required relocking from the outside.

Some changes are statewide: Florida became the first state to require police or armed guards at all public schools after the shooting — a mandate many districts are struggling to meet. And the state's

AP PHOTO

**Members of the Guardian Angels Safety Patrol stand outside Marjory Stoneman Douglas High School, Wednesday in Parkland, Fla.**

new Office of Safe Schools announced Wednesday that in two weeks, a new FortifyFL app, developed with \$400,000 in state funding, will enable people to anonymously report suspicious activity in state schools.

At Stoneman Douglas, the tributes to victims have been removed, replaced with a single statue of an eagle hugging a heart. But the freshman building still stands as a solemn reminder of the bloodshed, surrounded by a permanent new fence as prosecutors continue to use the crime scene for their legal case. The classes it once held have been diverted to nearly three dozen new portable classrooms.

## HEADLINES FROM AROUND THE STATE

### New cases brings measles count to 3 in Florida's Gulf Coast

ST. PETERSBURG, Fla. (AP) — Officials say two more cases of measles have been diagnosed in a Florida county where an unvaccinated child came down with the illness earlier this week.

The Florida Department of Health said Wednesday the two individuals live in the same household and also weren't immunized. The first individual lives in a separate household.

The new cases bring the number of individuals with measles to three in Pinellas County, along Florida's Gulf Coast.

### 2nd Florida university cuts ties with Confucius Institute

JACKSONVILLE, Fla. (AP) — Another Florida school is cutting ties with a language and culture institute that's supported by the Chinese government but criticized by some U.S. lawmakers and security officials.

In a statement Tuesday, the University of North Florida said it would close its Confucius Institute in early 2019. The institute opened at the Jacksonville school in 2014 to provide Chinese language instruction and cultural programs.

Officials said the institute's offerings did not align with the university's mission and goals.

China funds over 100 Confucius Institutes on college campuses nationwide. Critics including Florida Republican Sen. Marco Rubio say they present a spy risk and threaten academic freedom.

The University of West Florida announced in February that it wasn't renewing its contract with the Confucius Institute because student interest in its programs was lacking.

### Sheriff's son can't use 'stand your ground' in Florida

TAMPA, Fla. (AP) — A judge says a sheriff's son can't use Florida's "stand your ground" law to avoid prosecution for an aggravated battery charge.

The judge denied a motion for immunity for George Chronister under the Florida law which allows people to use force without retreating if they feel threatened.

Hillsborough Circuit Judge Christopher Nash says Chronister's use of force was not justified.

Chronister is the son of Hillsborough County Sheriff Chad Chronister.

The Tampa Bay Times reports that Chronister had argued he feared for his life.

The Florida law has gotten renewed scrutiny after the sheriff in neighboring Pinellas County refused to initially arrest a white man who fatally shot a black man who had pushed him to the ground in a dispute over parking.

The gunman was charged Monday with manslaughter.

### Mysterious liquids at Florida airport make officers ill

ORLANDO, Fla. (AP) — Orlando International Airport officials say four security officers fell ill after checking the contents of oversized containers holding liquids.

Two of the Transportation Security Administration officers and an airport operations worker were taken to the hospital "out of an abundance of caution" on Tuesday. The liquids ended up being a form of herbal tea.

Airport officials say in a statement that airport operations weren't affected by the incident.

A hazmat team from the Orlando Fire Department was called to the airport to evaluate the containers holding the liquids, as well as homemade soap.

The passenger with the containers of liquids was questioned by the FBI and released.

### Florida vouchers may have gone to ineligible students

TALLAHASSEE, Fla. (AP) — A new audit is raising questions about whether private school vouchers went to ineligible students in Florida.

The state Auditor General released an audit last week that found Step Up for Students did not always properly evaluate the household income of those seeking vouchers.

Step Up for Students is the main administrator of the state's tax credit scholarship program. That program offers vouchers to low-income families although eligibility has recently been expanded. About 100,000 students participate.

Auditors looked at a sample of voucher recipients and discovered examples where Step Up did not properly analyze income records.

Step Up for Students officials contend the sample was small and does not mean there are widespread problems. But they also said they found a technical problem that resulted in some errors.

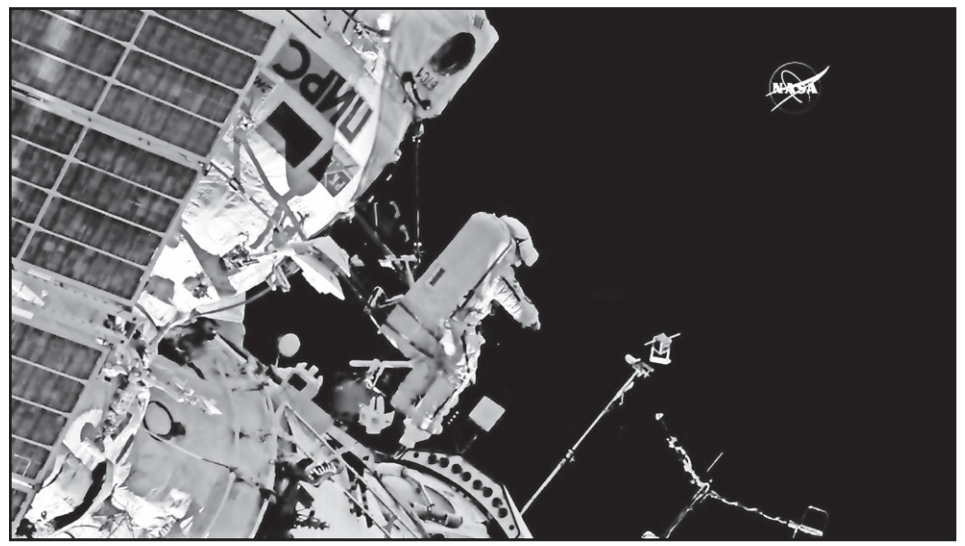

### Worker dies after falling into vat of oil in Florida

WINTER GARDEN, Fla. (AP) — Authorities say a worker has died after falling into a vat of oil at a facility near Walt Disney World.

Lt. Emanuel Curry of the Orange County Sheriff's Office told the Orlando Sentinel the 61-year-old man slipped and fell into the vat early Wednesday while emptying oil and grease from a tractor-trailer.

Deputies said witnesses couldn't pull the man from the oil. He became overwhelmed by fumes and slipped further down.

In a statement to WKMG-TV, Disney said the victim worked for Harvest Power, a company that converts food waste and yard waste into biofuel, compost, mulch and fertilizer.

# Spacewalkers flinging satellites, installing bird trackers

By **MARCIA DUNN**  
AP AEROSPACE WRITER

CAPE CANAVERAL, Fla. — Russian cosmonauts took a spacewalk Wednesday to fling tiny satellites into orbit and install an antenna for tracking birds on Earth.

Soon after leaving the International Space Station, Sergey Prokopyev released all four research satellites by hand.

"I'm ready for the launch," Prokopyev told Russian flight controllers near Moscow.

The first satellite tumbled away as the space station soared 250 miles above Illinois. By the time the fourth one was on its way 14 minutes later, the station was almost to Spain. Two were the size of a tissue box, while the other two were longer.

Prokopyev and Oleg Artemyev then turned their attention to a German-led, animal-tracking project known as Icarus, short for International Cooperation for Animal Research Using Space.

The space station is an ideal perch for the antenna, compared with a satellite, said project director Martin Wikelski of the Max Planck Institute for Ornithology in Germany. That's because spacewalkers could fix something if necessary and the computer is better protected from space radiation, he noted.

The project will start out tracking blackbirds and turtle doves with small GPS tags, then move on to other songbirds, fruit bats and bigger wildlife.

Wikelski said researchers have ear tags for big mammals like gazelle,

jaguars, camels and elephants, as well as leg-band tags for larger birds such as storks. The tags are easy to wear and should not bother the animals, he noted.

Wikelski, who watched the spacewalk from Russian Mission Control outside Moscow, said researchers can better understand animal behavior through lifelong monitoring. Among the things to learn: where the animals migrate, and how they grow up and manage to survive.

"We also learn where, when and why they die," he explained in an email, "so we can protect our wild pets."

The space station is also home to three Americans and one German. They have two spacewalks next month.

## HEADLINES FROM AROUND THE NATION

### Subtropical Storm Ernesto develops in Atlantic

ORLANDO, Fla. — That low-pressure system in the Atlantic Ocean has a name.

It's Subtropical Storm Ernesto.

Ernesto is about 695 miles southeast of Cape Race, Newfoundland, and has maximum sustained winds of 40 mph, according to the 11 a.m. EDT advisory from the National Hurricane Center.

### Baker who refused to make cake for gays sues again

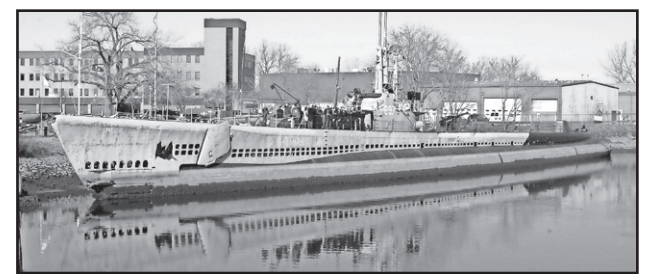

DENVER (AP) — A Colorado baker who insisted his religious beliefs justified his refusal to make a wedding cake for a gay couple — an argument partly supported by the U.S. Supreme Court — has sued the state again for opposing his refusal to bake a cake celebrating a gender transition, his attorneys said Wednesday.

Lawyers for Masterpiece Cakeshop owner Jack Phillips allege in a federal lawsuit filed Tuesday that Colorado is on a "crusade to crush" Phillips because of his religious beliefs.

They are challenging a June 28 finding by Colorado's Civil Rights Division that Phillips discriminated against a Denver-area attorney who requested a birthday cake in 2017 to celebrate the attorney's gender transition from male to female.

The rights division found that Autumn Scardina, who requested the cake, was discriminated against based on her transgender status. It ordered both parties to seek a mediated resolution.

The original case started when Phillips refused to bake a wedding cake for Charlie Craig and Dave Mullins in 2012. Phillips operates a small, family-run bakery located in a strip mall in the southwest Denver suburb of Lakewood. He told the commission in

the latest case that he can make no more than two to five custom cakes per week, depending on time constraints and demand for other goods.

The new lawsuit alleges that Colorado violated Phillips' First Amendment right to practice his faith and 14th Amendment right to equal protection, citing commission rulings upholding other bakers' refusal to make cakes exhibiting hate messages.

### John Lennon's killer is up for parole for 10th time

ALBANY, N.Y. (AP) — The man who killed John Lennon is up for parole again.

Mark David Chapman is scheduled to go before New York's parole board next week, in what will be his 10th attempt to win release. A decision is expected within two weeks of the parole hearing.

The now 63-year-old Chapman is serving 20-years-to-life in the Wende Correctional Facility in western New York. He shot and killed the former Beatle outside his Manhattan apartment on Dec. 8, 1980.

The state Board of Parole last denied parole to Chapman two years ago.

In that decision, the board noted that Chapman has since described the murder as "selfish and evil." It determined that Chapman should remain behind bars, in part because of the premeditated and "celebrity-seeking" nature of the crime.

### Vandals flood historic submarine, plaques stolen

HACKENSACK, N.J. (AP) — Vandals have flooded a World War II-era submarine that has been part of the New Jersey Naval Museum since 1972.

Submarine Memorial Association vice president Les Altschuler tells The Record locks were cut and hatches were open on the USS Ling between Saturday afternoon and Sunday morning. Four bronze plaques honoring submarines and crews that were lost during the war also were stolen.

Altschuler says the Ling did not sink even though it was flooded with several feet of water. However, artifacts inside were damaged.

The sub is stuck in several feet of mud and in a section of the Hackensack River that is too shallow for the vessel to float.

### Cause of seal die-offs unknown

SACO, Maine (AP) — Rehabilitation facilities are reaching full capacity in Maine as investigators are still trying to determine what's causing dead or stranded seals to wash ashore.

The National Oceanic and Atmospheric Administration tells the Portland Press Herald 84 harbor seals were found dead or stranded on southern Maine beaches so far this month. Some have been found in New Hampshire. That's far above the 10-year average of 38.

**HOROSCOPE**

**ARIES** (March 21-April 19). You'll encourage a loved one to give you frequent feedback. You don't want to be in competition with your love, and you'll shy away from situations in which there will be a clear winner and loser.

**TAURUS** (April 20-May 20). Your conversational choices will make a difference. This is a matter of destiny. Choose topics that are likely to lead to enjoyment, optimism and happiness. This is no time to stir up controversy.

**GEMINI** (May 21-June 21). You have more in common with an interesting stranger than you do with many of the people in your own family. So go on and strike up a conversation. See what there is to know about others.

**CANCER** (June 22-July 22). You're in the running for an important role. Your previous success qualifies you for the job, but it will be your charm and your excellent listening skills that get you the position.

**LEO** (July 23-Aug. 22). You love to give; you're a giver! And you expect nothing in return — well, almost nothing. You do

like knowing that your contribution made a difference. So a smile and a report back later will be awfully nice.

**VIRGO** (Aug. 23-Sept. 22). Your cosmic gift will be strength, stamina and energy to burn. That's a mighty gift, though it comes with a responsibility. Where should you apply it? Bonus: Exciting people will be drawn in by your vitality.

**LIBRA** (Sept. 23-Oct. 23). There will be some frustration in the way events unfold, but don't be discouraged. It's bound to happen with smart, quick people like you who might prefer to have life go at their pace. Life has its own pace, though.

**SCORPIO** (Oct. 24-Nov. 21). Listen to your critics with an open mind. Maybe they don't know the proper, kinder or ideal way to phrase things, but there will be something valuable in their words nonetheless — something that can give you an advantage.

**SAGITTARIUS** (Nov. 22-Dec. 21). You didn't make the impression you wanted to make on someone. Good news: Now you will get another chance at it. Present your best self and you'll become your best self.

**CAPRICORN** (Dec. 22-Jan. 19). It's said that there's a price for every gift and all advice. Indeed, this is true. But the cosmic forces can be kind in this regard, as they will be today, naming a price in the realm of what you're more than prepared to pay.

**AQUARIUS** (Jan. 20-Feb. 18). Maybe you want people to like you, but you care more that they respect you. It's not because this is what you need; rather, it's for the good of all.

**PISCES** (Feb. 19-March 20). The social secret is very simple, and it's a one-size-fits-all maxim. All people care about is how you make them feel. That's all. If they feel powerful, happy and significant around you, they will come back for more.

**TODAY'S BIRTHDAY** (Aug. 16). The solar return shows you surrounded by people who love and support you, as well as those who challenge and defy you. You would be hard-pressed to say which is better, as the first category will give you comfort and the second category will make you great, which in turn gives you a way to help many. Virgo and Sagittarius adore you. Your lucky numbers are: 9, 20, 24, 48 and 12.

 Pass 2♠ 3NT All pass

Opening lead: Six of ♣

The usual suspects were slugging it out at the club's weekly duplicate when Hard Luck Louie found himself at the helm in this three no trump contract. Louie captured East's king of clubs with his ace at trick one and had to decide which red suit to go after. He decided to play on

diamonds and led a low diamond to dummy's eight. East won with the ace and shifted to the jack of spades. Dummy's queen won this trick and Louie realized that he was going to need at least one heart trick to make his contract so he led a heart to his 10. West grabbed his queen, cashed the queen of clubs, and led the 10 of clubs to set up his clubs while he still had the ace of hearts. Good defense and the contract was defeated.

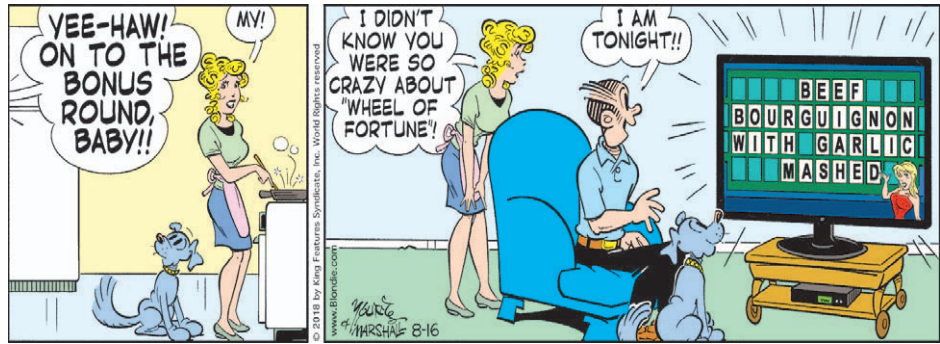

Lucky Larry also declared three no trump with the same opening lead. He also wasn't sure which red suit to attack and he decided to postpone his decision. He played low at trick one and allowed East to hold the trick. Larry won the spade shift in dummy and led a heart to his 10. West won with the queen but couldn't safely lead another club, so he led his last spade. Larry had time to knock out both red aces and easily came to nine tricks. Well done!

# Shipwreck from only WWII battle in America found off Alaska

ANCHORAGE, Alaska (AP) — Daryl Weathers remembers trying to pull men from the sea off Alaska's Aleutian Islands after a U.S. Navy destroyer hit a mine left by the Japanese following the only World War II battle fought on North American soil.

The explosion, which ripped the stern off the USS Abner Read, also covered many of the men in oil, which prevented some from being rescued. "They were so slippery, you couldn't get ahold of them," the 94-year-old Weathers said this week from his home in Los Angeles.

The remaining 250 crew members made the ship watertight, and it limped back to the West Coast for repairs. Only one body among the 71 men killed

was recovered.

Nearly 75 years later, scientists using multi-beam sonar have discovered the 75-foot stern about 290 feet below the Bering Sea.

The scientists from Scripps Institution of Oceanography at the University of California, San Diego, and the University of Delaware found it last month during a research mission funded by the National Oceanic and Atmospheric Administration.

The researchers confirmed the discovery with a remotely operated craft, which provided high definition video in real time to those on the research ship.

"To hit success is obviously extremely joyous for everybody. There's lots of cheering

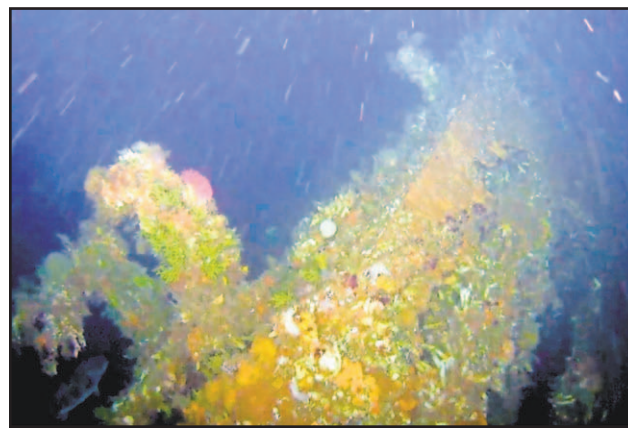

AP PHOTOS

In this Tuesday photo, Daryl Weathers poses for a picture at his home in Seal Beach, Calif.

you know, it's like scoring a touchdown," said Andrew Pietruszka, an underwater archaeologist with Scripps.

The euphoria ended with the realization that it was the final resting place for U.S. service members. Those aboard the research vessel held a wreath-laying ceremony to honor the dead.

This July 2018 photo from video provided by Project Recover shows a portion of the coral-encrusted stern of the destroyer USS Abner Read in the waters off Kiska Island, Alaska. The Abner Read hit a mine left by the Japanese after they abandoned Kiska Island in Alaska's Aleutian Islands in 1943, ripping the stern off.

## Republicans blast Pearl Jam poster of burning White House

HELENA, Mont. (AP) — Republicans on Wednesday condemned a poster by Pearl Jam that shows the White House in flames and a bald eagle pecking at a skeleton they say is meant to depict President Donald Trump.

The National Republican Senate Committee compared it to the now-infamous photo of comedian Kathy Griffin holding a fake decapitated Trump head.

The rock group's Twitter account says the official poster for Monday's concert in Missoula, Montana, is a collaboration between bassist Jeff Ament and Bobby Brown, an artist also known as Bobby Draws Skulls.

The "Rock2Vote" concert aimed to encourage young people to vote in the November midterm elections and support Democratic U.S. Sen. Jon Tester of Montana, who is from Ament's hometown of Big Sandy.

Ament was unapologetic in an emailed statement Wednesday.

## Shooting followed dispute in Walmart checkout lines

WYNCOTE, Pa. (AP) — A man pulled a gun during a dispute with another customer in Walmart checkout lines near Philadelphia and opened fire, wounding several people before fleeing but was later arrested after crashing into a police vehicle, police said Tuesday night.

All victims sustained non-life-threatening injuries in the gunfire reported just after 6 p.m. Tuesday in the crowded store at the Cedarbrook Plaza Shopping Center, Cheltenham Township, Cheltenham Township, Chief of Police John Frye said.

Frye said the gunfire started after some type of altercation between customers in separate lines near the cash

register, when "words were exchanged" and the suspect pulled a gun from his female companion's waistband and fired "at least 10 shots."

The male suspect and his female companion fled, tossing the gun from the car, but then ran into a police vehicle. Two officers whose vehicle was rear-ended were taken to hospitals along with the woman in the suspect's car, while the male suspect was arrested after being hit with a stun gun when he tried to break the window of the police vehicle, a Philadelphia police spokesman said.

More than 22 police departments responded to the scene, Frye said.

## YANKS

FROM PAGE 1

intelligence professionals, about the cost of speaking out." Brennan said he learned of Trump's action only when the White House announced it.

Former intelligence officials are wondering how far Trump will go, according to a former senior intelligence official who spoke on condition of anonymity to share private conversations he's had with people who have worked in the field.

They said Trump has moved from threatening to revoke security clearances of former intelligence officials who have not been involved in the Russia investigation to former officials who did work on the probe.

Trump's statement said the Brennan issue raises larger questions about the practice of allowing former officials to maintain their security clearances, and said that others officials' were under review.

They include former FBI Director James Comey; James Clapper, the former director of national intelligence; former CIA Director Michael Hayden; former national security adviser Susan Rice and Andrew McCabe, who served as Trump's deputy FBI director until he was fired in March.

Also on the list: fired FBI agent Peter Strzok, former FBI lawyer Lisa Page and senior Justice Department official Bruce Ohr, whom the president has tweeted about recently.

## ABUSE

FROM PAGE 1

detail on so many priests," said Terence McKiernan, founder and president of BishopAccountability.org, a nonprofit that researches and archives allegations against clergy members.

The bulk of the abuse identified in the report happened before the early 2000s, when inquiries into sexual abuse by Catholic priests launched a global reckoning outside and inside the church over its handling of problem clergy, which was marked by evasion and secrecy.

The grand jury report said the strategies used by the church to respond to allegations of sexual abuse amounted to "a playbook for concealing the truth."

The seven steps in the "playbook" were: 1) use euphemisms like "boundary issues" instead of "rape"; 2) use fellow clergy to conduct investigations; 3) send problem priests to church-run treatment centers; 4) decline to say why abusive priests were removed; 5) provide housing and living expenses for predator clergy; 6) transfer problem priests to new dioceses; and 7) avoid reporting the priests to the police.

"The cover up was sophisticated," said Pennsylvania Attorney General Josh Shapiro, a Democrat, in a statement. "The church protected the institution at all costs."

Despite the number of cases of abuse identified, the grand jury indicted only two priests — both on suspicion of sexually

assaulting children — because the statute of limitations had passed on the rest.

Both cases involved allegations from the last decade. One of the priests was accused of ejaculating into the mouth of a 7-year-old. The other is alleged to have assaulted two boys "on a monthly basis" for years.

For the other abusers, "this report is our only recourse," the grand jury wrote, vowing to "name their names, and describe what they did — both the sex offenders and those who concealed them."

One name was Cardinal Donald Wuerl, who is currently the archbishop of Washington, D.C. The grand jury detailed how he managed his priests suspected of abuse during the time he was a bishop in Pittsburgh between 1988 and 2006.

There, a priest under Wuerl's watch, Ernest Paone, had previously been accused of "molesting young boys" in another parish in 1962. Initially, Wuerl's predecessors responded by shifting Paone to posts in Southern California, where he served in Los Angeles, Diamond Bar and San Diego, and where his duties included teaching seventh- and eighth-graders.

A Pennsylvania district attorney in the 1960s had decided not to press charges against Paone "in order to prevent unfavorable publicity," according to a letter the prosecutor sent to the church.

In 1991, Wuerl, overseeing Paone from Pittsburgh, granted a

request by the priest to be reassigned to the Diocese of Reno-Las Vegas in good standing. Three years later, Wuerl's diocese learned more about allegations against Paone dating from the 1960s and notified the dioceses in California and Nevada. But Wuerl did not recall or suspend him.

After scrutiny into the church's handling of abusive priests began to grow in 2002, the Pittsburgh diocese suspended Paone and notified prosecutors about allegations of "inappropriate touching" in the early 1960s. Wuerl accepted Paone's resignation in 2003.

"Approximately 41 years after the Diocese learned that Paone was sexually assaulting children, he was finally retired from active ministry," the grand jury wrote. "The clear and present threat that Paone posed to children was hidden and kept secret from parishioners in three states. Wuerl's statements had been meaningless without any action."

In a letter to the priests of the Archdiocese of Washington on Monday, Wuerl said he had reviewed portions of the report and warned them that they might find the contents "disturbing."

Wuerl acknowledged the church's failings but defended himself by saying that societal standards for handling sexual assault cases had "evolved" over time and that he had "sought to implement child-protection policies that kept pace with or were ahead of that evolution."

## Church helped former priest accused of abuse get Disney job

HARRISBURG, Pa. (AP) — A sweeping grand jury report into child sexual abuse in Roman Catholic dioceses in Pennsylvania said church officials gave a former priest a positive reference to work at Disney World, even though they'd fielded at least one allegation about him sexually abusing a boy.

The ex-priest, Edward Ganster, left the priesthood in 1990, moved to the Orlando area and went on to work at Disney World before he died in 2014.

The report said Ganster worked at the theme park for 18 years. Ganster drove the train at the Magic Kingdom, according to an obituary in the Orlando Sentinel, which said Ganster worked there for 15 years.

Ganster, who became a priest in 1971, was working at St. Joseph's Church in Easton in the late 1970s when a woman complained to a Monsignor that Ganster had gotten in bed with her 13-year-old son on an overnight trip and "hurt" him, the report said. The boy also told his mother that "something happened" in the confession booth, it said.

About a decade later, Ganster was on sick leave at a Catholic mental health hospital as he sought to leave the priesthood and get married.

More than a decade after Ganster left the priesthood, a man contacted the Allentown Diocese to report that Ganster had victimized him when he was 14 and an altar boy some two decades earlier, the report said.

Ganster fondled, groped and beat him repeatedly, once dragging him across a living room floor by his underwear and once beating him with a metal cross, the report said.

## ALMANAC

Today is **Thursday, Aug. 16**, the 228th day of 2018. There are 137 days left in the year.

### Today in history

On **August 16, 1987**, 156 people were killed when Northwest Airlines Flight 255 crashed while trying to take off from Detroit; the sole survivor was 4-year-old Cecelia Cichan.

### On this date

In **1812**, Detroit fell to British and Indian forces in the War of 1812.

In **1861**, President Abraham Lincoln issued Proclamation 86, which prohibited the states of the Union from engaging in commercial trade with states that were in rebellion — i.e., the Confederacy.

In **1920**, Ray Chapman of the Cleveland Indians was struck in the head by a pitch thrown by Carl Mays of the New York Yankees; Chapman died the following morning.

In **1948**, baseball legend Babe Ruth died in New York at age 53.

In **1962**, The Beatles fired their original drummer, Pete Best, replacing him with Ringo Starr.

In **1977**, Elvis Presley died at his Graceland estate in Memphis, Tennessee, at age 42.

### Today's birthdays

Actress Julie Newmar is 85. Actress-singer Katy Lester is 84. Actor John Standing is 84. College Football Hall of Famer and NFL player Bill Glass is 83. Actress Anita Gillette is 82. Actress Carole Shelley is 79. Actor Bob Balaban is 73. Ballerina Suzanne Farrell is 73. Actress Lesley Ann Warren is 72. Rock singer-musician Joey Spampinato is 70. TV personality Kathie Lee Gifford is 65. Rhythm-and-blues singer J.T. Taylor is 65. Movie director James Cameron is 64. Actress Laura Innes is 61. Singer Madonna is 60. Actress Angela Bassett is 60. Actor Timothy Hutton is 58. Actor Steve Carell is 56. Actor-singer Donovan Leitch is 51. Actor Andy Milder is 50. Actor Seth Peterson is 48. Singer Vanessa Carlton is 38. Actor Cam Gigandet is 36. Actress Agnes Bruckner is 33. Actor Shawn Pyfrom is 32. Actor Okieriete Onaodowan is 31. Actor Kevin G. Schmidt is 30. Singer-pianist Greyson Chance is 21.

### Bible verse

"Holding forth the word of life; that I may rejoice in the day of Christ, that I have not run in vain, neither labored in vain." — Philippians 2:16.

Here's news, Christian friend. Our greatest job is not to explain the word of God, but to extend it. "My word shall not return unto me void."

## ODD NEWS

### Restaurant busted over tarantula tacos

MEXICO CITY (AP) — Fancy a tarantula taco for a cool \$27? Not so fast, Mexican authorities say.

A Mexico City market restaurant recently put the arachnids on its menu and posted a video on Facebook showing a chef torching one until blackened.

The only problem: The Mexican red rump tarantula is a protected species.

The federal environmental protection agency said Tuesday it was alerted to the situation via social media and seized four tarantula corpses that were ready to be served up on tortillas.

The tarantula tacos were apparently on offer for 500 pesos, or 50 times the price of a basic street taco.

The restaurant's menu also features other creepy-crawly such as grasshoppers, worms and ant eggs, which have a long tradition in Mexican cuisine, and scorpions, which are less common.

NYSE

Main table containing NYSE stock listings with columns for Name, Ticker, Div, Yield, PE, 52-week High/Low, Vol, Last, and YTD. Includes sub-sections for C and C&J Eng n.

Continued on next page

Continued from previous page

Table with columns: Ticker, Symbol, Div, Yield, PE, 52-week High/Low, Vol 1000s, Last, YTD %Chg. Includes tickers like CUB, CUBP, CUBS, etc.

- D -

Main table of stock data for the 'D' section, including tickers like DCP, DCT, DDD, DDDP, etc.

NYSE

Main table of stock data for the NYSE section, including tickers like DxsPGBI, DxsREB, DxsHit, etc.

Main table of stock data for the right-hand section, including tickers like EV F1R1, EV F1R2, EV F1R3, etc.

- F -

Continued on next page

Continued from previous page

NYSE

Main table containing NYSE stock data with columns for Name, Ticker, Symbol, Div, Yield, PE, High, Low, 1000s, Last, %Chg, YTD, and various other metrics.

- K -

# Poisoned fish

FROM THE PUBLISHER'S DESK • CAPT. JOSH OLIVE

**CAPT. JOSH:**

In reference to your column last week about leaving the dead fish for other creatures to consume, isn't it likely that if the contaminated fish is eaten (and I'm not seeing any birds partake), the toxin will go up the food chain? Is that a possibility?

— Becca DeRosa

**BECCA:**

I've been fielding this and similar questions a lot lately. Some people are worried about the birds or other fish, and some folks are more concerned about themselves. So let's talk about brevetoxins, the poisons that red tide creates. Red tide is a unicellular organism, and it makes brevetoxins to discourage grazing by other unicellular organisms. It's only by unhappy accident that brevetoxins have such extreme effects on other life forms. Many other types of tiny plantlike plankton produce other chemicals for the same reasons, yet most don't bother us at all.

Brevetoxins work by activating sodium channels inside cells. Poisons that do this are called neurotoxins, because they disrupt the functionality of the nervous system. Basically, the

brevetoxin causes paralysis. While the effect is temporary, fish and other animals often suffocate before it has a chance to wear off.

Most of the time, brevetoxin's fatal impacts are to the respiratory system. We feel it in our lungs. So do manatees, dolphins and seabirds. That happens because wave action breaks apart dead or dying red tide cells, releasing the poison into the air. This is called aerosolization. As humans, we can usually escape areas with aerosolized brevetoxins. Marine air-breathers aren't always so lucky.

Then there are water-breathers. Their gills are just as susceptible as our lungs, and it's harder for them to escape. Fish obviously die in large numbers. Invertebrates aren't as easily affected, but heavy concentrations of brevetoxins can kill them too.

You remember the whale shark that died on Sanibel? It got its fatal dose by ingesting it. Whale sharks are filter feeders, and that poor sucker got a bellyful. So do clams, oysters, scallops, etc. When these creatures are eaten in a red tide zone, the eater gets a dose of brevetoxin. It's why shell-fishing gets shut down quickly in these events.

But what about the fish that die from red tide

suffocation? Where is the brevetoxin in their bodies, and how much of it exists?

In most cases, it takes only a little of the poison to paralyze a fish's gills and kill it. Other than that small amount in the gills and bloodstream, the fish is fine. There's so little of the brevetoxin in the meat and internal organs that it poses minimal risk to man or beast (not that I'm encouraging you to eat fish killed by red tide, no matter how fresh they might be).

The bigger risk to birds — and we've seen some of this around — is scavenging rotting fish. Younger, less experienced individuals are more likely to indulge in carrion that's past the sell-by date. They don't usually get poisoned by brevetoxin. Instead, they get food poisoning. Botulism is often the culprit, but there are other nasty bacteria that can cause illness. Not every bird has a vulture's cast-iron stomach.

But to answer the question: Yes, brevetoxin can and does go up the food chain. It even does this when there aren't active blooms around. So, to do other natural neurotoxins, such as saxotoxin and tetrodotoxin. You've probably eaten some in seafood before. We all have.

With poison, it's all in the dose.

## That's a big grouper

By Capt. Roger Newton  
Fine Bait & Tackle

It was about 5 o'clock and I was cleaning up the shop to close. I got a call from my father, who was on his way in from fishing offshore with one of his good friends, Capt. Ed Tapping. He said, "I'm not sure what you're doing, but you might want to stick around and see what I caught."

About 6 o'clock they arrived, and a few other captains and I walked out into the parking lot. Up in the boat, they were wrestling with something big trying to lift it up and get it out of the ice box — but it was just too big. I climbed up into the boat and was presented with a monster fish stuck in the ice box. It was so big I still had no clue what it was. You guys didn't keep a jewfish, did you?

They finally managed to squeeze the fish out of the ice box and three guys lowered it down from the boat onto land. That's when I could see what it was: A true black grouper — the biggest any of us had ever seen or heard of.

A few years ago, Fine Bait & Tackle was certified to weigh world record fish. Years went by and the certified scale was never used for a record, so I let the certification go.

We weighed the fish on our no-longer-certified scale anyway, and the weight shown was 125 pounds. Tyler Degraff had a separate scale on

Roger Newton Sr. with his 100-pound black grouper.

hand, so we weighed the fish on his scale as well — again, 125 pounds.

I looked online to see what the world and state records for this fish were and saw 124.18 pounds for the world record and 113.6 pounds for the state. That's when I got real excited. I called everyone I could think of — FWC, IGFA, Publix, Winn-Dixie, all my Facebook friends and everywhere in between — trying to find a certified scale. No luck until the following day, when a fish house in Bradenton would open.

The fish was completely encased in ice overnight. The following morning we brought to a certified scale at a fish house. The scale showed the fish at 100 pounds. No record after all, but

Photos provided

Capt. Rob McCue and Tyler DeGraff struggle to lift the huge grouper.

surely a huge grouper.

What a fish story — and not to mention it was caught on a Bass Pro Shops Ocean Master 20/40 spinning rod with a Penn SSG 5500 reel, spooled with 50-pound Dawia braid to a 40-pound Seaguar fluorocarbon leader.

Dad didn't get the world record, but it's still pretty cool if you ask me. And the moral of the story: Don't let your certification expire. Special thanks to my father, Roger Sr.; Capt. Ed Tapping; Capt. Robert McCue; and Tyler Degraff.

# OUTDOOR NEWS BULLETIN BOARD

If you have an event you want included in the Outdoor News Bulletin Board, email it to [Editor@WaterLineWeekly.com](mailto:Editor@WaterLineWeekly.com)

## GOT AN EVENT COMING UP?

We'd be happy to let people know. Email your info to [Editor@WaterLineWeekly.com](mailto:Editor@WaterLineWeekly.com) at least two weeks before the event. Submissions may be edited for length or clarity.

## PLACIDA PIER REPAIR WORK

Repairs to the Placida Fishing Pier (13120 Pier Road, Placida) are in progress. The expected completion date has been moved from Aug. 8 to the end of the month. The pier was closed earlier this year due to fire damage. In the interim, please visit Ainger Fishing Pier (1385 Beach Road, Englewood), El Jobean Fishing Pier (5001 El Jobean Road, El Jobean) or Boca Grande Fishing Pier (5810 Gasparilla Road, Placida).

## NEW APP FOR PARKING PAY STATIONS

Charlotte County Community Services beach and boat ramp parking can now be paid with your smartphone through ParkMobile. Mobile Now is no longer the service provider. The ParkMobile app is available for both Apple and Android. To learn more about ParkMobile, visit [ParkMobile.com](http://ParkMobile.com). For info, contact Community Services at 941-625-7529.

## LIVE OAK POINT CLOSED

Due to safety concerns at Live Oak Point from Hurricane Irma damage, as well as ongoing construction of Live Oak Point Phase 1B, the park is closed until further notice. Live Oak Point is located at 5100 Tamiami Trail, Charlotte Harbor.

## COMMUNITY NIGHTS AT KING FISHER FLEET

King Fisher Fleet, headquartered at Fishermen's Village in Punta Gorda, offers half-price admission on sunset cruises to select groups and their families through Sept. 30. Tuesdays: Teachers, school administration, and school support staff. Wednesdays: State, county, and city government employees, including fire, police, and other first responders. Thursdays: Healthcare workers (doctor's offices, retirement communities, hospitals). All community members employed in each category are eligible for half-price admission for themselves and family members on the sunset cruise with proof of employment (name tag with the company logo, an employee ID, or other identifying document). Advance reservations are recommended. For more info on this special offer, call 941-639-0969.

## SCALLOP SEARCH CANCELED

The 10th annual Great Bay Scallop Search, scheduled for Aug. 18, has been canceled due to red tide. Small-scale surveying may still take place through September. If you are interested in getting involved, email [staugler@ufl.edu](mailto:staugler@ufl.edu).

## RED TIDE MEETING

A public red tide environmental meeting will be held from 7

## ONGOING EVENTS

**FISHING CLUB MEETINGS:** The Gulf Cove Fishing Club meets on the second Monday of the month from October through May at the Hope Lutheran Church in Gulf Cove (14200 Hopewell Ave., Port Charlotte) at 7 p.m. At each meeting, a speaker will talk on a timely topic. The public is invited to attend, but only Gulf Cove residents can be members. For more info, call 941-698-8607.

**NATIVE PLANT SOCIETY MEETINGS:** The Mangrove Chapter of the Florida Native Plant Society meets from 7 to 9 p.m. the second Tuesday of each month (Oct-May) at Lemon Bay Park (570 Bay Park Blvd., Englewood). Call 941-769-3633. The Coccoloba Chapter of the Florida Native Plant Society meets from 7 to 9 p.m. the second Thursday of each month at the Calusa Nature Center and Planetarium (3450 Ortiz Ave., Fort Myers). Call 239-275-3435. Meetings are free and the public is welcome.

**WHAT'S THAT BIRD?:** Volunteer bird interpreters share their expertise on ID and behavior of raptors, shorebirds, waterfowl and other avian visitors at Myakka River State Park (13208 S.R. 72, Sarasota). Volunteers set up scopes and help people identify birds from 9 a.m. to 1 p.m. every day of the week.

to 8:30 p.m. Aug. 24 at the Englewood Event Center (3069 S McCall Road, Englewood). Speakers will include experts on red tide, algae bloom, and Florida's watershed. No registration required (maximum attendance is 700 seats). For more info, call 941-270-3324.

## FASHION SHOW FOR WILDLIFE

Wildlife Center of Venice supporters are invited to a fashion show fundraiser from 1 to 3 p.m. Aug. 25 at Topaz Fashion Outlet (1850 University Parkway, Ste 1870, Sarasota). Items will be offered for sale at wholesale prices. Topaz Design Group will donate a percentage from sales to the Wildlife Center. Tickets are \$20 per person. Space is limited, so call in your reservation ASAP. To reserve your space, contact Ivy Smart at 941-484-9657 or email [TheWildlifeCenterOfVenice@hotmail.com](mailto:TheWildlifeCenterOfVenice@hotmail.com)

## PLANT SOCIETY FIELD TRIP

The Mangrove Chapter of the Florida Native Plant Society invites the public to join them Aug. 25 to walk the Jeep Trail at Cedar Point Environmental Park (2300 Placida Road, Englewood). The society promotes the preservation, conservation and restoration of the native plants and native plant communities of Florida. Meetings, field trips and special events are free and open to the public. For more info, contact trail guide Al Squires at 941-769-3633 or [AHSquires1@comcast.net](mailto:AHSquires1@comcast.net).

**HANG OUT WITH SCRUB JAYS:** Spend the morning with the scrub jays at Oscar Scherer State Park (1843 S. Tamiami Trail, Osprey) from 8:30 to 10:30 a.m. every Sunday. This unique Central Florida experience includes a nature walk to see the park's diverse ecosystems, native flora and fauna. Call 941-483-5956 for info.

**CHARLOTTE HARBOR DRAGONS:** Dragon boat club meets every Wednesday and Saturday at 8 a.m. and Sundays at 1 p.m. Learn the ancient art of dragon boat racing. We practice out of the Port Charlotte Beach Complex (4500 Harbor Blvd. Port Charlotte). For availability, contact Eddie Amara at 941-740-1286 or [eamara1@comcast.net](mailto:eamara1@comcast.net), or to learn more about the club visit [CharlotteHarborDragons.com](http://CharlotteHarborDragons.com). Paddles up!

**CHARLOTTE HARBOR MULTIHULL ASSOCIATION:** Members of this club for multihull owners, sailors or those who are interested in the exchange of ideas about equipping and sailing boats, share information about anchorages and cruising destinations, hold informal races and have raft-ups. No dues. The club meets at a local restaurant the first Monday of each month at 6 p.m. For more info, call 941-876-6667.

**COASTAL VENTURES CRUISE CLUB:** This club, designed for personal boat cruising, meets on the third Tuesday of the month at the Waterfrontoo Restaurant (2205 N. Tamiami Trail, Nokomis). Join them for dinner at 6 p.m. and/or the 7:30 p.m. meeting where they'll discuss upcoming cruises and activities. Enjoy the camaraderie of like-minded water rats. If interested, attend a meeting or call 941-493-0070 for more info.

**VOLUNTEER AT SHAMROCK PARK:** Shamrock Park Nature Center (3900 Shamrock Drive, Venice) holds its monthly volunteer work mornings from 8 to 10 a.m. on the third Friday of each month. For more info, call Jennifer Rogers at 941-861-5000 or email her at [jrogers@scgov.net](mailto:jrogers@scgov.net).

**GREATER CHARLOTTE HARBOR SIERRA CLUB:** Meetings are held from October to April at 7 p.m. on the third Tuesday of each month at the Unitarian Universalist Fellowship Church (1532 Forrest Nelson Blvd., Port Charlotte). Meetings include coffee, outdoor prizes, environmental speakers and more. For more info, call Allen at 941-423-2713. Visit [GCHGroup.org](http://GCHGroup.org) for a list of planned 2018 fall outings.

## FISHIN' TALK RADIO SEMINAR

The next event in the Fishin' Talk Radio seminar series will be held Sept. 4 at Gasparilla Marina's Waterside Grill (15001 Gasparilla Road, Placida). Seminars are scheduled for the first Tuesday of each month and are hosted by the boys from Fishin' Talk Radio. Topics vary depending on how the fishing is going, but you're guaranteed to learn something useful — and if you have any questions you want answered, bring 'em with you. Come out at 5:30 p.m. and enjoy dinner and drinks with Capt. Josh Olive and Capt. Mike Myers (you buy your own); the talk gets started at 6:30 p.m. For more info, call Capt. Mike at 941-416-8047 or Josh at 941-276-9657.

## SALTWATER FISHING 101

Do you like to fish? Would you like to learn the basics of shallow saltwater fishing from men who love God and love fishing Charlotte Harbor? Fishermen from Deep Creek Community Church invite young men between the ages of 11 and 15 who are interested in fishing to join us for a free saltwater fishing clinic conducted on two consecutive Saturday mornings. The first Saturday is classroom hands-on instruction in preparation for a half-day fishing trip on the following Saturday. For the safety and enjoyment of all involved, all participants must complete the classroom instruction prior to the fishing trip. For available class dates, go to [YF4C.org](http://YF4C.org).

## FREE VESSEL SAFETY CHECKS

The Coast Guard Auxiliary is conducting free vessel safety checks in Englewood. They'll make sure the safety equipment mandated by federal and state regulations is onboard. If an inspected vessel is found to be safe, a "Seal of Safety" decal is awarded to the boat owner and affixed in a prominent location. For more info or to schedule an appointment, call Bill Shaw at 941-474-2705 or email [ShawCo1@att.net](mailto:ShawCo1@att.net). Visit [Flotilla87@CoastGuardEnglewood.com](http://Flotilla87@CoastGuardEnglewood.com) for more info and a schedule of classes.

**Do you have an event for the Outdoor News Bulletin Board? Send your event information to [Editor@WaterLineWeekly.com](mailto:Editor@WaterLineWeekly.com). Deadline is two weeks before you want it to print!**

# WaterLine FISHING RULES

State and federal regulations for Southwest Florida waters as of July 1, 2018. All bag limits are per harvester per day. Other limits may apply. For full rules, visit [MyFWC.com/fishing](http://MyFWC.com/fishing) and [GulfCouncil.org/fishing\\_regulations](http://GulfCouncil.org/fishing_regulations).

## LICENSES

Resident saltwater or freshwater: Annual \$17, 5-year \$79. If you fish from shore in saltwater only, a license is required but it is free. A combo license for both freshwater and saltwater fishing is \$32.50 annually.

**Resident senior:** If you are a Fla. resident 65 or older, your driver's license or ID card replaces your fishing license. Gulf Reef Fish Survey (see below) and tarpon tags are still required.

**Nonresident saltwater or freshwater:** 3 days \$17, 7 days \$30, annual \$47. Free shore fishing license not available for nonresidents.

**Gulf Reef Fish Survey** (required to harvest red snapper, vermilion snapper, gag, red grouper, black grouper, amberjack, almaco jack or triggerfish): No charge

**Annual permits** (required only when a license is required): Snook \$10, lobster \$5

## SALTWATER FISH

### ALMACO JACK

Limit 100 pounds in state waters, limit 20 in federal waters; notes: 9,11,14

### AMBERJACK, GREATER

34" min.; limit 1; **open May 1 - 31 and Aug. 1 - Oct. 31**; notes: 1,3,4,5,7,9,14

### AMBERJACK, LESSER

**BANDED RUDDERFISH**  
Slot 14" to 22"; aggregate limit 5; notes: 1,4,5,7,9,14

### BARRACUDA

Collier, Monroe, Miami-Dade, Broward, Palm Beach and Martin counties only: Slot 15" to 36"; limit 2 (max. 6 per vessel; may possess one per vessel over 36"); notes: 1,5

### BLACK DRUM

Slot 14" to 24" (may possess 1 over 24"); limit 5; notes: 5,7,8

### BLACK SEA BASS

10" min.; limit 100 pounds; notes: 2,4,5,7,9,15

### BLUEFISH

12" min.; limit 10; notes: 1,5

### BLUE RUNNER

Limit 100

### COBIA

33" min.; limit in state waters 1 (max. 2 per vessel); limit 2 in federal waters; notes: 1,5

### FLOUNDER, ALL SPECIES

12" min.; limit 10; notes: 2,5,7,8,15

### GROUPEL, BLACK

24" min.; limit 4; notes: 2,3,4,5,7,9,10,12,14

### GROUPEL, GAG

24" min.; limit 2; season open June 1-Dec. 31; notes: 2,3,4,5,7,9,10,14

### GROUPEL, GOLIATH (JEWFISH)

Harvest prohibited; legal to target for catch and release in state but not federal waters

### GROUPEL, RED

20" min.; bag limit 2; notes: 2,3,4,5,7,9,10,12,14

### GROUPEL, SCAMP

16" min.; limit 4; notes: 2,3,4,5,9,10,12

### GROUPEL, SNOWY & YELLOWEDGE

No min. size; limit 4; notes: 2,3,4,5,9,10

### GROUPEL, WARSAW & SPECKLED HIND

No min. size; limit 1 per vessel; notes: 2,3,4,5,7,9,10

### GROUPEL, YELLOWFIN & YELLOWMOUTH

20" min.; limit 4; notes: 2,3,4,5,7,9,10,12

### GROUPEL, CONEY, GRAYSBY, ROCK HIND, RED HIND (STRAWBERRY) & TIGER

No min. size; limit 4; notes: 2,3,4,5,7,9,10,12,15

### HOGFISH

14" min.; limit 5; notes: 1,4,5,7,9

### MACKEREL, KING (KINGFISH)

24" min.; limit 3; notes: 1,5

### MACKEREL, SPANISH

12" min.; limit 15; transfer of Spanish mackerel to other vessels at sea prohibited; notes: 1,5

### MAHI (DOLPHIN)

Limit 10 (max. 60 per vessel in state waters only); notes: 5,15

### MULLET, STRIPED & SILVER

Limit, Feb. 1-Aug. 31, aggregate 50 (max. 100 per vessel); Sept. 1-Jan. 31, aggregate 50 (max. 50 per vessel); bag limit also applies to bait mullet; possession of striped mullet prohibited in Punta Gorda 6 p.m. to 6 a.m. Nov. 1-Feb. 29 (see <http://bit.ly/urExej>); notes: 15

### PERMIT

Slot 11" to 22"; limit 2 (over 22" — limit 1; max. 2 per vessel); hook and line gear only in state waters; spearing legal in federal waters; see <http://goo.gl/pU5Wug> for rules in Special Permit Zone south of Cape Sable; notes: 1,5,6,7

### POMPANO, FLORIDA

11" min.; limit 6; notes: 1,5,6,7

### POMPANO, AFRICAN

24" min.; limit 2 (max. 2 per vessel); notes: 1,5,6,7

### PORGY, RED (CHAMPAGNE)

Limit 100 pounds; notes: 4,5,7,9,15

### REDFISH (RED DRUM)

Slot 18" to 27"; limit 1 (max. 8 per vessel); off-the-water transport limit 6 per person; illegal to harvest or possess in federal water; notes: 2,5,6,7,8

### SAILFISH

63" min. from tip of lower jaw to center of fork; limit 1; notes: 5,6,16

### SEA TROUT, SPOTTED

Slot 15" to 20"; limit 4 (over 20" — limit 1); notes: 2,5,6,7

### SHARKS

State waters, no size limit on sharpnose, blacknose, blacktip, bonnethead, finetooth & smooth dogfish; 54" min. on bull, nurse, spinner, common thresher, blue, oceanic whitetip, porbeagle & shortfin mako; **species not listed are prohibited.** Federal waters, 54" min all species except sharpnose and bonnethead; **for federally prohibited species see <https://goo.gl/envCwD>**; limit in state waters 1 (max. 2 per vessel); limit in federal waters 1 per vessel; **inline circle hooks required when fishing for sharks in federal waters**; notes: 1,5,6,7,8,16

### SHEEPSHEAD

12" min.; **limit 8 (max. 50 per vessel in March & April)**; notes: 2,5,7

### SNAPPER, CUBERA

Slot 12" to 30"; limit 10 if under 30" (over 30" — limit 2, max. 2 per vessel); fish over 30" not included in aggregate snapper limit; notes: 2,4,5,7,9,13

### SNAPPER, MANGROVE (GRAY)

10" min. in state waters; 12" min. in federal waters; limit 5 in state waters, 10 in federal waters; notes: 2,4,5,7,9,13

### SNAPPER, LANE

8" min.; limit 20 in federal waters or 100 pounds in state waters; not included in aggregate snapper limit; notes: 2,4,5,7,9,11

### SNAPPER, MUTTON

18" min.; limit 5; notes: 2,4,5,7,9,13

### SNAPPER, RED (AMERICAN)

16" min.; limit 2; recreational season open June 11-July 21 for state and federal waters; federal charter season open June 1-July 22; notes: 2,3,4,5,7,9,13,14

### SNAPPER, SCHOOLMASTER

10" min.; limit 10; notes: 2,4,5,7,9,13

### SNAPPER, VERMILION (BEELINER)

10" min.; limit 10; not included in aggregate snapper limit; notes: 2,4,5,7,9,11,14

### SNAPPER, BLACKFIN, DOG, QUEEN, MAHOGANY, SILK & YELLOWTAIL

12" min.; limit 10; notes: 2,4,5,7,9,13

### SNOOK

Slot 28" to 33"; limit 1; season closed Dec., Jan., Feb., May, June, July, and Aug.; \$10 snook permit required to harvest when license is required; state regulations apply in federal waters; notes: 2,5,6,7,8

### TARPON

Limit 1 per harvester per year; \$51.50 tag required to harvest or possess, which is legal only in pursuit of an IGFA record; for seasonal Boca Grande Pass rules, see <http://bit.ly/l6zrDj>; notes: 6,7,8

### TRIGGERFISH, GRAY

15" min.; limit 1; open March 1-May 31

and Aug. 1-Dec. 31; notes: 1,4,5,7,11,14

### TRIPLETAIL

18" min.; limit 2; may be harvested by hook and line only; notes: 2,5,6,7,8

### WAHOO

No min. size; limit 2; notes: 1,5,15

### LIONFISH

Kill on sight; no limits

### UNREGULATED SPECIES

In state waters, limit 100 pounds or two fish, whichever is more: Blackfin tuna, catfish, cero mackerel, croaker, grunts, ladyfish, little tunny, jack crevalle, pinfish, porgies, rays, sand trout, silver trout, spadefish, whiting, etc. See <http://bit.ly/1aLP4f>.

### NO-HARVEST SPECIES

In addition to the species previously listed, harvest of bonefish, Nassau grouper, spotted eagle rays, manta rays and sawfish is prohibited.

Visit <http://bit.ly/10nYDlz> for full rules, including more no-harvest species.

## NOTES

1. Measured fork length (the straight line distance from most forward part of the head with mouth closed to the center of the tail).
2. Measured total length (the straight line distance from the most forward part of the head with the mouth closed to the farthest tip of the tail with the tail squeezed together while the fish is lying on its side).
3. Bag limit zero for captain and crew of for-hire vessels on a paid trip.
4. Reef fish gear rules apply. Anglers must use inline circle hooks when using natural baits, and must possess a dehooking device. Venting tool not required. Also, cannot be taken by powerhead in the reef fish stressed area (see <https://goo.gl/KqP2Ab>).
5. Must remain in whole condition (head and tail intact) until landed ashore. Removal of gills and internal organs OK. **Cannot be used as cut bait.**
6. Harvest by spear, gig or bow prohibited.
7. Use of multiple hooks (more than one point on a common shank, like a treble hook) in conjunction with natural bait prohibited.
8. Harvest by snatching prohibited.
9. Reef fish; illegal to use as bait in federal waters. In state waters, legal-size reef fish may be used as bait but must remain in whole condition and count against bag limit.
10. Included in aggregate 4 grouper bag limit.
11. Included in 20-fish reef fish aggregate bag limit in federal waters (includes vermilion snapper, lane snapper, almaco jack, gray triggerfish and all tilefish species).
12. Closed Feb. 1-March 31 in federal waters outside 20-fathom break ONLY.
13. Included in aggregate snapper bag limit of 10 fish.
14. Participation in Gulf Reef Fish Survey required to harvest. See <http://bit.ly/15D6Hip>
15. No bag limit in federal waters.
16. HMS permit required to target or harvest in federal waters; see <https://goo.gl/bbMLXL>

## FRESHWATER FISH\*

- LARGEMOUTH BASS:** No min. size; limit 5. Only one fish can be longer than 16" (tournaments may apply for a permit allowing participants to weigh more than one over 16")
- SUNFISH** (all species excluding crappie): Aggregate limit 50
- CRAPPIE:** Aggregate white/black limit 25
- AMERICAN EEL:** Min. 9", limit 25
- BUTTERFLY PEACOCK BASS:** Max. 17", limit 2 (may possess 1 over 17")
- GRASS CARP:** Must be released immediately.
- OTHER EXOTIC FISHES:** Keep and eat or otherwise destroy; may not be used as live bait.
- UNREGULATED:** No limits on bowfin, pickerel, catfish and gar (see below).
- PROHIBITED:** Alligator gar, sturgeon.
- \* Visit <http://bit.ly/10nYJQr> for full rules, including special management areas.

# Protect our waters: Baitfish

## WaterLine Fish Finder

FRESH LOCAL FISHING REPORTS FROM VENICE TO PINE ISLAND

### INSHORE & FRESHWATER

#### MALCOLM

COOKS SPORTLAND  
Venice  
941-493-0025

Reports have not been amazing. There have been a few really nice **mangrove snapper** and a couple **snook** reported on the jetties. Lots of folks are waiting on the **trout** and **redfish** reports to pick up on Lemon Bay. Freshwater anglers have had a decent **bass** bite on worms fished deep along the weed edges.

### GULF & OFFSHORE

Keeper **red grouper** have been reported from 50 to 80 feet, though there are plenty of shorts mixed in. The water is good out past 10 miles, and there's no shortage of **lane snapper**, **porgies** and **grunts**.

### BEST BET

Heading offshore is probably the best way to keep your rods bent.

#### JIM

FISHERMAN'S EDGE  
Grove City  
941-697-7595

Decent **trout** catches have been coming from Bull and Turtle bays, plus a few bonus **snook**. Lots of **jacks** have been busting small baitfish around Gasparilla Sound. **Trout** and **redfish** have been caught around Lemon Bay Park. The north end of the west wall has had fair numbers of trout too. **Spanish mackerel**, **ladyfish** and **tarpon** have been in the Quarantine Rocks area of Cayo Costa.

Most anglers are heading out at least 12 to 15 miles, but they're finding a decent mixed bag of **lane**, **mangrove** and **yellowtail snapper**, plus **grunts** and **porgies**. Shrimp are the hot ticket. A few **red grouper** have also been caught. On some reefs, there are loads of **barracuda** and **sharks** if you enjoy that sort of thing.

**Trout** inshore or **snapper** in the Gulf — take your pick!

#### JEFF

CAPT. TED'S TACKLE  
Port Charlotte  
941-627-6800

The east side from Matlacha to Ponce Park has been holding baitfish in good numbers, which has drawn **pompano**, **ladyfish** and **sharks**. Other random fish have been showing up, but you'll need plenty of luck to find **red** or **snook** in there. Anglers fishing the canals in PGI and Port Charlotte have had moderate success with small **tarpon** and **black drum**.

Red tide in the nearshore waters have kept many boats from going out.

Explore those east side islands. Hope for the best, settle for what you catch, and don't complain because we still have fish.

#### ROBERT

FISHIN' FRANK'S  
Charlotte Harbor  
941-625-3888

**Black drum** have been in the canals and roaming around the Harbor. Feed them shrimp or crabs. The canals also have **sand bream** and small **mangrove snapper**, which like peeled shrimp tails. There are OK numbers of **redfish** on the east and west side, both under the mangroves and swimming with the mullet. A few baby **sharks** are on the Burnt Store bar and down into Matlacha, and there are also **pompano** from Pirate Harbor to Two Pines.

**Red grouper** and **amberjack** are coming from 100 to 140 feet of water. **Lane** and **mangrove snapper** are really good in 50 to 60 feet, and there are also a few **permit** and **Spanish mackerel** in the same range.

**Tarpon** are all over the middle of the Harbor, the Myakka, Boca Grande, and on the beaches from Boca to Englewood. **Ladyfish** and DOA Bait Busters are both catching, but they're a bit picky.

#### CHUCK

LAISHLEY MARINE  
Punta Gorda  
941-639-3949

Action in the upper Harbor is good. Nocturnal anglers are catching **snook** and **tarpon** around the bridges while avoiding the heat and storms. **Redfish** and **trout** action has slowed. **Black drum** are in the canals and moving around; crabs, squid and cutbait are good choices. The canals also have **jacks** and small **tarpon**. **Pompano** are on the outside of the bar from Hobbs Point to Two Pines, along with a couple **cobia**.

Red tide has been reported up to 7 miles. Anglers at 30 miles are getting a mixed bag of **red grouper**, **amberjack**, **porgies** and **snapper**. At 50 miles, there have been **blackfin tuna** and **mahi**.

Whatever you're targeting, get out there as early as possible. It's August!

#### CAMERON

RIO VILLA  
BAIT & TACKLE  
Punta Gorda  
941-639-7166

On the outgoing tide, the **snook** and **tarpon** are feeding under the El Jobean lights. Rapala X-Rap 10 and 12 sizes are working, and so are 4- or 5-inch swimbaits in a mullet-like color. **Ladyfish** and live mullet are also hot baits. Juvenile **tarpon** are along the inside of the east side bar, around Redfish Key. Nose-hook a pearl white jerkbait. The freshwater **bass** are biting pretty well late in the evening or at dawn. Try a Whopper Plopper along and weedlines you can reach.

Nothing to report this week.

**Black drum** from 20 inches to 30 pounds have been reported around the PGI canal mouths. Try a chunk of crab or whole shrimp fished on the bottom.

#### JESSE

OLD PINE ISLAND  
MARINA & TACKLE  
St. James City  
239-283-2548

**Redfish** action has been decent around Bokeelia and Matlacha. They're schooling with the mullet, so don't be afraid to toss a chunk of cutbait in there. You can catch **ladyfish** along the dropoffs and chop them up. Matlacha is also producing some **trout** over the grass in 4 feet. **Jacks** have been popping up all over the place, mostly around bait pods. Watch for birds.

**Mangrove snapper** are decent starting at about 10 miles out. The farther you go, the bigger they get. **Lane snapper** are also pretty good once you get past the dirty water. The **red grouper** action is good, but you'll drive a bit — 50 miles is where that's happening.

**Pompano** are all around Pine Island Sound, with quite a few caught in the St. James City area. Silly jigs naked or tipped with shrimp are good.

**THE FISH COACH'S TIP OF THE WEEK:** What does your boat look like to a fish? It depends where you are and what you're doing. If you're anchored, whether in deep or shallow water, it might look like a floating log that could provide great shelter. It's not uncommon for fish to home in on a motionless boat, especially when there's not much cover around (such as on an open flat or in deep water). A drifting boat can also be a fish magnet, but it's more likely in deeper water. Fish in the shallows are just too spooky. A boat moving faster can look like something entirely different: A predator. What's big and chases fish around? A shark. If your boat is acting like a predator, it is one. How about on plane? Would you believe it looks like a buffet? The little fish and other critters that get run over and tossed in your wake are easy pickings. Many fish know to take advantage. — *As the Fish Coach, Capt. Josh Olive offers personalized instruction on fishing techniques. To book your session or for more information, go to FishCoach.net, email Josh@FishCoach.net or call 941-276-9657.*

### WHY IT MATTERS

Baitfish aren't just "free bait" for us — they're also a crucial food source for predatory fish, including the gamefish we want to catch.

### HOW WE HARM IT

Over-harvest of baitfish disrupts the natural feeding of gamefish and seabirds, forcing them to work harder for less food. Live chumming with baitfish also changes how and where fish (especially snook) feed and live.

### MAKING BETTER CHOICES

It's OK to net and use live bait. The problem is how much is taken and how we use it. These tips will help ensure we have a healthy population.

- Take only what you need for the day's fishing.
- Don't overcrowd your well and kill baitfish pointlessly. Know your capacity.
- If bait dies in your well, put it in the cooler and save it for later. It's great chum for another day. Or donate it to a wildlife rescue organization.
- Avoid throwing a net with mesh that's too large. Gilled baits (called a "Christmas tree") rarely survive — bad for the bait and your net.
- Don't throw too much live chum. A small handful is more than enough most of the time. Better yet, avoid live chumming altogether.
- If you have leftover bait, release it on the flats. Bait released at the ramp will probably die.

**THANK YOU FOR BEING A GOOD STEWARD AND HELPING TO MAKE OUR WATERS HEALTHIER — WE ALL NEED TO DO OUR PART!**

# Dog days tarpon

WaterLine photo by Capt. Josh Olive  
**A tarpon on the line comes up to gulp air. When a tarpon does this, pull it hard to the side to disrupt it from getting a big breath. If it succeeds, the fight can go on much longer.**

## ANGLING 101 • ROBERT LUGIEWICZ

Here we are in the hottest part of the year, and the tarpon bite is about to go off in Charlotte Harbor. If you can stand the heat, now's the time to plan an adventure, taking on gold-tinted silver kings in dark water.

Our summer rains typically start to break up a bit around the end of August, giving salinity in the Harbor a chance to stabilize some. The full moon, coming up on the 26th, will also bring stronger tides, and stronger tides will bring salty water and baitfish further up into the Harbor. And that baitfish bonanza is going to attract hungry predators.

Ladyfish will be at the top of that list, and they've already started showing up in the Harbor. As more baitfish move in, more ladyfish will appear, as if by magic. Soon we'll have a genuine feeding frenzy going on, and thousands of jacks and catfish will arrive to get their share. Most of the action takes place in open water, so the redfish, snook and trout generally stay out of the scrum — but the tarpon don't. They get right in there, taking advantage of the smorgasbord and chowing down on everything in sight.

Tarpon have big mouths, but sometimes

they go after small prey. It can be very frustrating trying to catch tarpon that are keyed in on teeny-tiny baitfish — sometimes less than an inch long. They're out there slurping them up by the mouthful. Even if you put a small bait out there, what are the chances of a tarpon eating yours when there are 10 million out there? You can try it, but expect a ladyfish or catfish to beat the tarpon to it.

Actually, that's not all bad — ladyfish and catfish are great tarpon bait. You can put a hook in the live fish and send it back over the side, or you can cut it in half and use it that way. It doesn't seem to matter to the tarpon. They'll even take small pieces of cut fish, but bigger baits are better because catfish eat the small ones pretty quickly. Even with big baits, you'll still have catfish gumming them to death.

Catching bait is easy. When the ladyfish are fired up, a bare jighead is all you need to get them to bite. Catch two or three, toss them on ice, and start fishing. If you hook a jack, let it go — tarpon must eat them, but they're lousy bait for some reason. Pinfish, however, are a good choice. If you prefer to use artificial lures, Storm swimbaits and DOA Bait Busters or

Swimmin' Mullet are top picks.

To have the best chance of getting a tarpon, put out three baits covering the water column — one freelined, one under a float and one rigged with a sinker. I use 7/0 or 8/0 Owner or Gamakatsu hooks. Some people insist on using circle hooks because it's politically correct. I do use circle hooks for my bottom bait, because the fish might have it for a minute before I'm aware of it. With the freelined and floated baits, I know I'll detect strikes quickly, so I feel OK with using J-hooks.

With the water so warm and low in oxygen, it's important to limit your fight times. One way to do that is to use suitably heavy tackle instead of your snook gear. I prefer spinning tackle, and I use a 5000 to 8000 size reel spooled with 50- to 65-pound braid or 30-pound mono. You'll want to match that to a good heavy rod; I like a 7- or 8-foot rod because I can cast farther. You never know what size fish you'll hook — there are tarpon from 10 to 180 pounds out there. You'll need a leader of 60- to 80-pound mono (with the water so dark, you can skip the fluorocarbon).

This time of year, tarpon might be anywhere

in the Harbor, from the river mouths all the way to Boca Grande Pass. Sometimes they're broken up into smaller pods of 20 to 50 fish; other times there's a school the size of a couple football fields. Finding the smaller groups is nice because you usually have the fish to yourself, but it's just awesome to see the huge schools — sometimes the tarpon free-jump as they feed.

No matter the size of the school, approach it carefully. Never drive through the fish; instead, set up in front of a moving school or run upcurrent and then drift through them. If you shut down the bite by running your motor too close, you won't make many friends. Be patient — feeding tarpon are probably going to be chewing for a while, so there's no need to rush it. Just sit back, sip a cool beverage and wait for the strike.

*Robert Lugiewicz is the manager of Fishin' Frank's Bait & Tackle, located at 4425-D Tamiami Trail in Charlotte Harbor and at 14531 N. Cleveland Ave. in North Fort Myers. Call 941-625-3888 for more information about the shop or for local fishing info, or visit them online at FishinFranks.com.*

ANGLING 201 • CAPT. KARL BUTIGIAN

WaterLine photo by Capt. Karl Butigian

A tired tarpon at boat-side. This is becoming a more common sight in Charlotte Harbor lately.

# Hot bite in the Harbor

With a little bit of red tide still on the Boca Grande beaches and the water temperature reaching 94.3 this week, conditions have been tough — but the fish have been going off in the Harbor.

Tarpon fishing is very good right now, but they are moving all over the place so you do have to spend some time driving and looking. A side-scan fishfinder is a very good tool to have for finding the tarpon. The right rods and reels help get the job done. On my boat, we use the 8-foot Reaper 20-50s with 6000 Penn Clash reels, 65-pound Suffix 832, and 60- to 80-pound fluorocarbon leaders.

The good thing about the water temperature being so high is that it makes the tarpon come up and show themselves a lot more as they come up for air. When I'm starting out looking for them in the morning, I usually begin by looking in the deep holes in the

Harbor. If I don't find them, I run down to the west wall, Two Pines or Alligator Creek Reef. I'll spend about 30 minutes in one area looking around before I move down or try a different spot.

Once you figure out where the fish are hanging out, start fishing. Usually what I do is put a couple ladyfish or threadfins off the back of the boat. I put them under floats so I can keep an eye on them and make sure they don't end up under the boat or twisting up on each other. If you don't have live bait, you can also use few different artificials. DOA Bait Busters are the number-one go-to lure for tarpon, but I also like the 6-inch Storm WildEye Shad.

If tarpon aren't your thing, there are many other opportunities. The black drum fishing has been red hot. There has been a big school running the upper part of the Harbor, mainly

around the U.S. 41 bridge and I-75 bridges. Half a blue crab is the best bait.

One of the best bites going on is — believe it or not — redfish. Redfish have been on the hunt pretty good on the east and west sides of the Harbor and around Hog Island. My best bite on reds has been with crabs on Rockport Rattler jigheads. I throw the bait underneath the bushes and let it sit. Shrimp have been working well too, especially if you break their tails off to put more scent into the water. Remember, redfish have a tough time turning down somethings that smells good.

If you like lures better, Gulp shrimp on a jighead will get reds also, but you have to work it nice and slow. Slow is the key right now. If you think your working slow, slow down some more. Work every bush for 10 minutes. It takes patience, but the reward is worth the effort.

The snook fishing has been pretty good too, with a lot of big snook running around. Live ladyfish and big Storm swimbaits have been catching the linesiders.

All in all, the fishing on Charlotte Harbor is great right now. Yes, it is hot, but start your day at dawn and get done early so you can beat the heat and the storms. Avoid the Intracoastal areas where there is still red tide. Stay in the Harbor where the red tide can't go because the water isn't salty enough. Keep one eye on the sky — storms can pop up any time — and remember to drink lots of water so you don't dehydrate yourself.

*Capt. Karl Butigian lives, breathes and eats Florida fishing. He owns and operates KB Back Country Charters (KBBackCountryChartersFishing.com) on the waters of Charlotte Harbor and the Gulf of Mexico. To book a trip or for info, call him at 941-565-7325.*

# Shrimp & grits

Photo provided  
Shrimp and grits is a southern favorite best enjoyed on the coast where the shrimp are at their freshest.

It seems like it been forever already with this problem with our waters. I hope the minds much brighter than mine will find a solution so folks around us might enjoy their backyards like we do.

Chefs are being affected along with everyone else who depends on our area being an attractive market to enjoy a vacation or your retirement. When Lauren and I first moved here, I was at the bait shop talking with Fishin' Frank. I mentioned brown water and he told me that if the water was blue, guys like you and me couldn't afford to live here. He's right.

I don't know what the fix is. I just hope it gets fixed soon so our descendants can enjoy in the future what we enjoyed just months ago.

How does it affect a chef like me? Well, inshore mangrove snapper dinners will be a hard sale, even though they are probably just fine to eat. Imagine yourself booking your vacations and finding a private chef to cook your catch. Then you remember the waters close to shore and think, "Do I really want to book an offshore charter and pay for a private chef?" It's so easy to get in your car and drive to get food. I have to make an effort to want you to have me cook in your home.

I rely mostly on local fish supply for my catering, unless they want beef. By the way, I know beef. Most folks probably don't know that Florida was the first place in America to have cattle. Thank Juan Ponce de Leon in 1521 for that. He

brought his own food because he wasn't sure what there was to eat here, and some of his cattle still have descendants here in Florida.

Anyway, back to the water here. I grew up just few a short drive northeast of here and I can't ever remember anything like this happening before. I hope that there won't be a snook season this fall and the spring of 2019 in order to allow the population to grow again.

I guess I've done enough complaining and rambling about the conditions of our waters and I need to get to talking about a recipe that I hope you will try: Shrimp and grits. I love the combination of the grits with the shrimp. They just seem like they are meant to be together when they are done right.

If you don't like grits, you can use polenta instead. Before you make that call, I need to let you in on something: Polenta and grits are the same thing. The only difference is the grits are course-ground and bleached white. So if your from up north and turn your nose up to eating grits, but you will happily eat a bowl of creamy polenta — well, you might want to rethink that idea.

## SHRIMP & GRITS

- 2 pounds 16-20 raw shrimp
- 2 quarts water
- 2 cups stone-ground grits
- 2 cups shredded cheddar
- 4 tbsp whole butter, divided
- 6 slices raw bacon, chopped
- 2 tbsp lemon juice
- 3 cloves fresh garlic, chopped
- 1/2 cup thinly sliced scallions

A clip-n-save seafood recipe provided by

— Recipe by  
Chef Tim Spain

Peel and devein shrimp; set aside. Bring the water to a boil and add grits with a pinch of salt and pepper. Cook the grits until the water is absorbed and remove from the heat. Stir in half the butter and the cheese, then set aside and keep warm. In a large sauté pan, cook the raw bacon until just about done. Add shrimp and sauté until they are pink. Add garlic and lemon juice and turn off the heat. Sauté for about 30 seconds longer. Drain off the grease, then just pour the contents of the pan on top of the grits. Garnish with scallions. Makes an excellent Florida Cracker-style breakfast for 4.

# Flushing red tide

WaterLine photo by Capt. Josh Olive

How hard were our snook hit by red tide? We won't really know for a few months yet.

## AROUND CHARLOTTE HARBOR • CAPT. RALPH ALLEN

A few weeks ago I thought I was seeing it, but I wasn't sure. Now I am certain: The grass in my yard is not growing quite as fast as it was. After all that rain during May was followed by all that sun in June, the lawn was growing so fast that I was afraid to park my lawnmower to go get a drink of water because I might not be able to find it again.

The fact that the grass has now slowed its summertime growth spree is a sign that the seasons are changing. Have you noticed that the days are already a half hour shorter than was the case just two months ago?

Less sunshine means that less heat is being pushed into the ground and into the water. This means it won't be long before things cool off just a bit, and by the first of September we'll probably be able to feel a difference in the mornings. I am ready for the change. This has been a long blazing hot summer, and it's been made longer by being forced to watch the excruciating progression of the red tide blooms which have lingered along the coast for months.

It's possible that changing weather patterns will curtail those outbreaks. One of the frustrating things about red tide is that there is absolutely nothing that humans can do that will have the slightest effect on an outbreak. There is no way to treat the water over the immense areas of a bloom to kill it (at least, not without killing other stuff too), no way to put out booms or barriers to keep it away from certain areas. All humans can do is try to learn from it what we could or should do that might affect future blooms.

But Mother Nature might be able

to help in the short term. We don't yet understand exactly what combination of environmental conditions — man-made or natural — create the perfect scenario for red tide blooms. But it's possible that a water temperature even a few degrees cooler might break the cycle.

Speaking of cycles, we went through a years-long cycle in the 1980s and '90s when it seemed as though most of our red tide events occurred in the fall (at least, that's my recollection). I can remember hoping for a hard cold front to break up red tide along the coast, which seemed to happen sometimes. I don't know whether it was the drop in temperature or humidity, the lack of sun due to the overcast skies, the sediment stirred up by the crashing of wind-driven waves onto the beaches, or something else — but we were all convinced that a cold front was our friend during times of red tide. It did seem to work that way.

I almost hate to mention it but here goes: A tropical storm could be our friend too. Now, please, Charley survivors, don't come after me with pitchforks and torches. People whose lives were turned upside-down by Irma, don't break out the tar and feathers. But a tropical storm could stir things up along the coast and just might flush things out. Or maybe not.

This red tide outbreak has been gut-wrenching for sure. Among all the other sad images, it's been tough to see all those snook lying on the beach, especially since many of them were there for the summer spawn. We probably won't know until next year how much this season's snook spawn was affected, but it can't be good and it might be pretty bad.

The best case would be that a signif-

icant amount of spawning occurred in the inlets in May and June, when the red tide was still pretty patchy along the coast, and that the snook fry were swept back into the estuaries away from red tide. Soon after hatching, those wee snook head inland towards fresh water on incoming tides — which is one reason why snook spawn heavily during full and new moons when the tides are strongest.

The FWC will need to evaluate the mortality of adult snook and the possible lack of spawning success during this red tide event, and may have to consider whether it's appropriate to impose a harvest closure on snook (or possibly other species), similar to what was done after the freeze in 2010. On the plus side, there are usually more fish left alive after a fish kill than you're expect after seeing so many dead fish on the beach.

For example, this time of year there is a surprisingly healthy population of very large breeder-sized snook offshore on artificial reefs and on some of the larger natural ledges in areas that are so far mostly clear of red tide. And there are lots of snook in the rivers and in portions of the upper Harbor where red tide has not appeared. Much will depend on how this bloom plays out in the coming weeks. Let's all hope that things swing our way soon.

Let's go fishing!

**PEACE RIVER WILDLIFE CENTER • ROBIN JENKINS, DVM**

PRWC photo

A northern parula perches on an unidentified hand. No, they don't usually do this.

# Meet the parula

Peace River Wildlife Center's adorable patient of the week goes to a northern parula. Brought to us by an astute couple who noticed him at the base of a window at the library in Port Charlotte, the little guy had suffered head trauma and was briefly unable to fly. That short stint of vertigo would have been enough for some wily predator to take advantage, had he not been brought to us.

One of the smallest warblers, the parula's summer breeding range is almost exclusively in the eastern half of North America from Florida to southern Canada, although they do skip certain states like Iowa, Wisconsin and Michigan. Scientists speculate that air pollution there inhibits the growth of the mosses the birds use for nest building. (Or maybe the

birds are just embarrassed to be seen in states with such outranked and overrated football teams.) They winter in eastern Mexico, the Lesser Antilles and Florida. (Go, Gators!)

Since the parula's diet consists primarily of insects, they spend most of their time at the tops of the tree canopy and are rarely seen at feeders. It is therefore advantageous to this species as well as many other resident and migratory birds if you plant native vegetation in your yard. Those plants attract and provide proper nutrition and nesting, resting and hiding spots for both local and travel-weary birds.

The northern parula has bluish-grey feathers above with two white wing bars and a partial white eye ring. It has a yellowish patch

on its back and a yellow throat and breast, with a white belly. The males have a brownish-black band across the chest. Our patient is a juvenile, and we aren't sure which sex it is since the chest band hasn't developed yet.

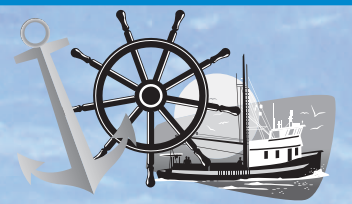

This small bird has had a large identity crisis over the years. It was originally called a "finch creeper," but that sounds like someone who doesn't understand personal boundaries. It was later practically crushed under the designation "blue yellow-backed warbler." Its current name refers to it as a diminutive form of parus (or titmouse) — hence it is a "tiny titmouse." A fitting name finally for an absolutely adorable bird.

Our petite patient was able to be released after a 24-hour stay. We gave it some anti-in-

flammatory medication (like Tylenol, but for birds) and let it safely sleep off its headache. By the next morning, it was flitting about and was taken back to the library where it was found. Hopefully it will check out a book on workplace safety.

Peace River Wildlife Center is a nonprofit organization, dedicated to the care, preservation and protection of Charlotte County's native wildlife since 1978. They are open seven days a week year-round, including holidays. Tours are offered from 11 a.m. to 4 p.m. PRWC receives no government funding and relies entirely on private donations. For more info, visit PRWildlife.org, email PeaceRiverWildlife@yahoo.com or call 941-637-3830.

# Bobber fishin'

Photo provided  
A frisky wild shiner is almost irresistible to a bass — even if it's not hungry.

**TOURNAMENT BASSIN' GREG BARTZ**

To be fair, I don't do a lot of live bait fishing. My wife and I mainly fish tournaments, and we aren't allowed to fish with shiners in competition — so we don't use them when we head out to fish. But when we're out for a relaxing day on the water and the bass aren't too keen on our artificial lures, I've been known to idle up to the nearest bait shop to grab a dozen wild shiners and set some bobbers out.

There have been many times when we've struggled to catch bass while out practicing. When the bass are being finicky, I'll sometimes put out a shiner just to see if there are any bucketmouths in the spots we're fishing. They may not be in a feeding mood, but bass usually fire right up when a nice big shiner swims through their area.

When we do this it becomes kind of comical. Missy has never caught a bass while floating a shiner under a bobber. More often than not, she kills the shiner because she gets antsy when it swims too close to the vegetation. The constant tugging on the bait to keep it from getting tangled up in the weeds makes her feel like she has to constantly keep it clear of that. I just let my shiner swim in, or keep the line slightly tight where it can't reach the vegetation. That way it can't get tangled up.

Now, it's not that she doesn't find some fish. Missy has gotten plenty of bites on shiners, but hasn't got a bass to the boat yet. I think her biggest problems with bobber fishing are common to many anglers. First, they don't let the bass hold onto the bait long enough to make sure that they have the hook in their mouth. They set too fast and wind up missing the bass. Once a fish takes your shiner, he's unlikely to just drop it. It's not plastic or metal. It's food.

Then, if they do wait long enough, they often forget how much slack line is really out there. I have missed some killer fish simply because all the line past the bobber wasn't exactly where I thought it was when I set the hook. Sometimes the set becomes a tad abbreviated and doesn't really push the hook into the mouth of the bass. Bad hooksets will cost you fish.

There are a few things you can do to avoid

these mishaps. For shiner fishing, use a good stiff rod with some length. This allows a greater swing through the hookset that pulls more line toward you. And once you feel the fish on, start winding to make sure that hook is driven home.

Hook your shiner just behind the dorsal fin instead of in the nose. It keeps that shiner swimming more naturally, and in my experience they live longer hooked like that. If you have to pull your bait back from getting too deep into vegetation, the hook near the back makes it easier to ease it out of the weeds and prevents you from killing your shiner too quickly.

Another thing you can try is using braided line for shiner fishing. I like to tie a 14-pound monofilament leader on and use a barrel swivel to connect the two. You may be asking why I would do that. Well, the answer is to keep the line from twisting up. If you ever spent a day with mono line and looked at it after you were done bobber fishing, you would see that line all twisted up to the point that if you leave slack in your line, it will roll right up to the rod tip.

By using a barrel swivel right around the depth of your bobber, you keep that line from twisting because the barrel will rotate while the shiner swims around in circles under the bobber. That will keep the line from twisting up. (Editor's note: Standard barrel swivels are only OK at preventing line twist. If you really want to get rid of twist, spend the couple extra bucks to get ball bearing swivels.)

Missy and I may use some live bait to check out a few spots for our upcoming tournament in September. I have not been on this lake for quite some time, and using shiners may help me narrow down where I should be looking for bass. I have used that technique in the past with some success. I am no great live bait fisherman by any stretch, but these few simple tips can make your experience a whole lot more fun when you are out using shiners.

Greg Bartz is a tournament bass fisherman based in Lakeland. Greg fishes lakes throughout Florida's Heartland with his wife and tournament partner, Missy. Contact him at Greg.Bartz@SummitHoldings.com.

## READY TO LIST YOUR BOAT? 941-429-3110

### FISH-WATERS' SURPRISE

- 1 lb mild white fish fillets
- 1 egg
- 1/2 cup milk
- 1/2 cup seasoned Italian bread crumbs
- 1/4 cup Parmesan cheese
- 1/4tsp garlic powder
- 1/2 tsp onion powder
- Salt and black pepper to taste
- Vegetable oil

A clip-n-save seafood recipe provided by

Beat the egg and mix in the milk and seasonings. Dip the fish fillets into the mixture. Combine the bread crumbs and Parmesan cheese and completely coat the fish with this dry mixture. Place fillets in a baking dish sprayed with non-stick coating. Drizzle a little oil on the fillets before baking. Bake the fish at 325°F for 20 minutes then broil at 500°F for 3-4 minutes until browned.

**A LIFE ON THE WATER  
CAPT. VAN HUBBARD**

Shutterstock photo

A school of yellowtail snapper in clear water. It's easy to see how they spot even light leader.

**Good to get away**

I was blessed by my youngest brother and his boss with a week in Key West. Florida lobster season opened on Aug. 6, and we were able to snorkel up a few crawfish. East winds kept the Atlantic waters stirred up until Friday, so we traveled west to the Gulf. We didn't find any big bunches like many have this year, but we got enough to enjoy fresh lobster dinners. We had a good time snorkeling on the ocean side Friday. The calm, crystalline waters allowed us to ride around and scout out new places.

It was wonderful to share a week with both of my brothers and Blake's friends at the end of the Earth. Key West is a unique place. I liked most of it. Their growth and tourist trap culture can be escaped if you get out on their beautiful waters. I also recommend hiring a local guide when visiting; local knowledge enhances your experience. We found some action on our own, but Capt. Hugh Morgan (home port Hurricane Hole on Stock Island) put us on the big ones again.

On the charter, my brother Mike caught two large, colorful mutton snapper on 15-pound spinning gear and tiny jigs. Their brilliant colors were intense. I meant to get a quick photo, but the fish were biting. When we got in at the Hurricane Hole docks, they had lost those gorgeous colors.

We also caught a bunch of smaller yellowtail snapper. Their variations in colors intrigued me. Some patterns were very different than others, but all shared that bright yellow tail. We used 25-pound blocks of chum to pull schools of tails up to the surface, allowing us to sight-fish them with cutbait on light jigheads to match the drop of our chum. It's so much fun to watch a fish grab your offering and take off. Seeing the brightly colored fish darting around trying to outmaneuver each other for our baits really lit me up. They weren't flags — most were only 12 to 15 inches — but they created big excitement for our entire crew.

Lighter gear and liberal use of fluorocarbon leader enhances your success in targeting these sharp-eyed fish. Use small hooks or jigs. Larger yellowtail come into the chum slick occasionally, but big ones usually stay deeper. Allow a bait to sink below the schoolies if you want to try for the big ones. I always enjoy chumming fish up to watch them in action.

Those larger mutton snapper wouldn't eat with 30-pound leader. I guess they could see even the fluorocarbon. They are worthy opponents with lighter gear. When you tangle

with a big fish on light tackle, remember to balance your effort. Don't jerk, even to set the hook. Just exert as much pressure as your gear will allow. When your opponent stops, attempt to coax it up carefully, then reel down as you lower the rod tip. The trick is balancing your pull to gear movements. If you have trouble, try my old trick: Close your eyes so you can increase awareness to feeling.

You will be amazed at how big a fish lighter gear will land when it's utilized effectively. However, don't forget that using overly light gear on fish you plan to release can reduce their chance of survival. Fish like our awesome tarpon must be landed efficiently, because if you fight them too long, lactic acid buildup can literally stress them to death. With fish you are going to eat, it's not a concern.

When water quality has been compromised, like with our recent red tide problems it's best to allow stressed fish like snook a break. We need them to survive and spawn for replenishment of stocks. Redfish are stronger, but trout are delicate fish also. We lost a lot of Goliath grouper, and it's going to be interesting to see how quickly new fish move in to replace lost local stocks. I'm betting it won't take very long, considering the overabundance we had.

Sometimes Mother Nature handles carrying capacity her way. Mothers know best! I saddened by our losses, but how much can our devastated habitats support? It's something to think about. We have trashed our waters, seagrasses and mangroves. We have vital seagrass issues right now that are being ignored because of the dead fish and red tides. Our habitats need our help to help us fight all our problems! These are some things for our consideration.

Locally, things are better for the moment. No one knows how long that will last or what the future brings but I'm hearing positive reports coming from several local guides. Minnows, bait and striking fish have moved back into some local waters. Let's see how things progress. Sometimes fish magically reappear after these disasters. We lost a lot but may be able to recover faster than we thought.

Remember that you can't catch fish if you don't go fishin', so let's go fishin' soon.

## MOROCCAN TILAPIA

- 1 tsp vegetable oil
- 1 medium onion, chopped
- 1 clove garlic, finely chopped
- 2 red bell pepper, seeded and sliced into strips
- 1 large carrot, thinly sliced
- 3 tomatoes, chopped
- 4 olives, chopped
- 1 (15-oz) can garbanzo beans, drained and rinsed
- 1/4 cup fresh parsley, chopped
- 3 tbsp paprika
- 4 tbsp ground cumin
- 1 tsp cayenne pepper
- Salt to taste
- 5 pounds tilapia fillets

A clip-n-save seafood recipe provided by

— Recipe from AllRecipes.com

Heat a large skillet on medium-high heat. Add the oil, then cook and stir the onion and garlic, until slightly tender. Add the bell peppers, carrots, tomatoes, olives, and garbanzo beans and continue to cook until the peppers are slightly tender. Sprinkle the parsley, paprika, cumin, cayenne, and chicken bouillon over the vegetables. Season with salt to taste and stir. Place the fish on top of the vegetables and add enough water to cover the vegetables. Reduce the heat to low, cover and cook for 40 minutes. Serves 10.

## SOLUNAR TABLES

### What is a solunar table?

The sun and moon, even when they are out of sight, exert forces wild creatures can feel. These forces affect when fish and other animals feed. Weather and tide also play a role, but expect fish to be more active during the major and minor solunar times.

READY TO LIST YOUR BOAT? 941-429-3110

# Reader Photos

Chris Perry and his son Christopher with a Keys mahi.

5-year-old Logun Minnich caught this 26-inch redfish on a live pinfish in Charlotte Harbor.

Timmy and Joey Lawson of Fort Myers fished on the Magic Wacker. Joey got a keeper grouper; his older brother had to throw his back.

Bill Balog with a couple red grouper — 21 and 31 inches — caught off Stump Pass.

## WE WANT YOUR PHOTOS!

Here's how it works: Take pictures of your outdoor adventures. Send your high-quality digital photos to Editor@WaterLineWeekly.com. DO NOT send us photos of oversized or other release-only fish being poorly handled. Photos of such fish being gaffed, held by the lower jaw only or obviously damaged or dead will not be published, no matter how big the fish or how proud the angler may be.

## Marine Trading Post offers *Everything*

to rebuild a boat from motor to hull, and everything in between!

All Locations open on Sunday
