To Whom It May Concern:

Florida Landscape Service, Inc has employed Mike Walker (Walker Technical Service) since November 1, 2007 until current date. Mike manages our Maxi-Com system for Bellalago. This 537 acres property consists of residential homes as well as common areas.

TOHO & Masuen Consulting recently performed an efficiency test for our site. The results were a dramatic water consumption decres since Walker Technical service began their monitoring. This was due to their intense flow watch, pump management capabilities, and close contact with our people in the field and extensive water management experience.

It is my professional opinion the Walker Technical Service is the best at managing Central Controlled irrigation systems in the State if not the Country.

Felipe Rosado Jr,
Irrigation Design & Management
