			usually eaten fresh. Relatively unknown, this fruit is a rich source of vitamin C. It is second only to guava and much higher than citrus or apples. It contains 20 to 30% sugar, up to 2.5% protein and 12.8% carbohydrates. Fruits are also eaten in other forms, such as dried, candied, pickled, as juice, or as ber butter. In Malawi, dried fruit is used to make a potent distilled alcoholic beverage. Yields of 80 to 130 kg/tree/year have been reported in Africa (von Maydell 1986).
