What is Top Config?

HP's Top Config is an online build-to-customer-order program which simplifies the configuration, quote and order processes, delivering exactly the PC the customer wants at a competitive price in a reduced time.

HP's channel partners benefit from suitable availability without requiring specific in-house resources and, at the same time, achieve a better margin. The program is expanding to include corporate notebooks and industry standard servers throughout FY05.

1) Through Top Config, HP's objective is to achieve direct-like agility and operational efficiency with the reach, convenience, services and personalization of the channel.

2) HP's Top Config program means customers get products configured to match their needs with the serviceability and reliability associated with using their trusted HP partners ? at a highly competitive price and with fast turnaround time.

3) Top Config is one of our key channel go-to-market drivers.

Whilst it boasts direct-like agility, all orders are through our channel partners. Top Config is a key differentiator HP and our partners can bring to customers.

Value for Customer

The 29 inch format press produces any commercial job—with quality, substrate versatility, and production flexibility. This robust press is an easy fit for offset print service providers, printing large volumes with a wide variety of applications.

HP Indigo 10000 Digital Press

Standard features

- **With its 29 inch format and built-in duplex mechanism, the press makes it possible, for the first time, to digitally print any size application, including pocket folders, six-page brochures, posters, and large lay-flat books.**

The 29 inch format facilitates quick ramp up and easy integration into offset PSPs

- **Printing 3450 sheets per hour or 4600 using the Enhanced Productivity Mode (EPM), the press is capable of producing over two million color sheets per month. The 29 inch format enables highly efficient imposition of jobs and lowers the cost per copy.**

Extensive automation enables high press uptime and productivity, freeing operators from routine tasks.

- **Supporting the largest media range in the industry, the press is compatible with more than 2500 certified substrates—including coated, uncoated, metallic, recycled, and specialty papers, and paperboard for folding cartons.**

The press is compatible with standard sheet size, offset palette feeding, and conventional finishing devices.

- **Enabled by HP Indigo’s liquid ElectroInk technology and unique digital offset process, HP Indigo prints are of the highest quality, matching or even exceeding offset, allowing them to be used interchangeably.**

The Quality Automation Suite on the press makes it easy to achieve the highest possible Indigo quality, using an embedded spectrophotometer, registration cameras, and the Vision System.

- Colors supported standard: Cyan, magenta, yellow, and black; HP IndiChrome Plus 7-color printing (adding orange, violet and green)
- Recommended monthly page volume: Up to 2.2 million sheets
- Media width, maximum: 29 in
- Media thickness: 3-18 pt
- Paper size maximum: 29.5 x 20.9 in
- Paper size maximum: 75 x 53 cm
- Finished output handling: Sheet feed
- Number of print cartridges: 4 (1 each black, cyan, magenta, yellow)
- Color(s) of print cartridges: Cyan, magenta, yellow, and black
- Printer smart software features: A version of the scalable HP Indigo SmartStream Production Pro is specifically designed to support 29 inch imposition and high-volume production of large quantities of jobs, including variable data

The HP Indigo 5600 Digital Press delivers unmatched digital offset and photo quality with high versatility and productivity. Seamlessly switching between jobs and media types—with a new added ability to print on synthetics.

HP Indigo 5600 Digital Press

Standard features

- **Capture high-value jobs on specialty applications that diversify business.**

High-quality printing on synthetics at full press speed using HP Indigo's One Shot Color technology. All color separations are accumulated on the blanket and transferred to the substrate in a single pass, ensuring perfect color registration.

- **Enabled by HP Indigo's liquid ElectroInk technology and unique digital offset process, HP Indigo prints are of the highest quality, matching or even exceeding offset, allowing them to be used interchangeably.**

Up to 7 on-press ink stations enable use of HP Indigo's wide digital color gamut, including special effect inks

- **The press opens opportunities for high-value applications on unique media, extending product range with new and creative offerings.**

New sensor technology enables printing on dark and transparent substrates, eliminating the need for backing paper during printing on transparencies.

The HP Indigo 7500 delivers an unprecedented range of opportunities for PSPs, and sets new standards in quality, productivity and scalability, facilitated by innovative intelligent automation in both the press and the e2e production environment.

HP Indigo 7500 Digital Press

The fastest 13 x 19 in digital press in the market, combines proven quality, versatility and breakthrough productivity with new intelligent automation that maximizes uptime. New special effect capabilities—including raised print and textured effects.

HP Indigo 7600 Digital Press

Standard features

- **The press prints four million color pages per month. Using the Enhanced Productivity Mode, throughput increases by 33%. Hardware and software advancements and new supplies improve robustness, adding to high productivity with proven quality.**

Enhanced Productivity Mode (EPM)—increases throughput by 33% to 160 pages per minute for most image-rich color jobs, significantly reducing turnaround time and production costs.

- **New special effects and a variety of special inks open opportunities for unique applications that can increase profits. Special applications are created on press, making them quick and simple to achieve compared with laborious conventional methods.**

Create embossed-style textures on substrates to give ordinary applications a boost of creativity and uniqueness. Make raised effects using layers of transparent ink applied directly to the substrate.

- **Enabled by HP Indigo’s liquid ElectroInk technology and unique digital offset process, the prints are of the highest quality. ElectroInk provides the widest digital color gamut, including special effect inks, using up to 7 ink stations on press.**

ElectroInk and the Indigo process deliver a very thin ink layer that gives uniform gloss.

The press serves high-volume production using its unique combination of quality, productivity, and competitive total cost of ownership. This application-focused press platform prints on virtually any paper at high speed.

HP Indigo W7250 Digital Press

Standard features

- **HP Indigo printing technology delivers consistent, best-in-class, offset-matching colour quality.**

Liquid electrophotography produces sharp images with a thin ink layer that is transparent, exposing the finish of the paper. HP Indigo ElectroInk enables high quality and wide and accurate colour gamut.

- **Enhanced Productivity Mode (EPM) enables customers to print ore jobs digitally and cost-effectively, as colour printing speed is increased by 33% from 240 ppm to 320 ppm. The press also prints in 2 colours at 480 ppm and monochrome at 960 ppm.**

Enabled by HP Indigo’s liquid ElectroInk technology and unique digital offset process, the press delivers prints of the highest quality—even at high speed—that match or exceed offset, allowing them to be used interchangeably.

- **Thanks to its high speed, wide media capabilities, efficient 317 x 980 mm image format, and finishing solutions, the press enables PSPs to offer customers a unique and diverse range of products and services.**

Produce books cost-effectively in just the quantities customers need, enabling them to streamline their supply chain. Inline signature folding can produce up to 270 colour 160-page book blocks per hour and 720 monochrome book blocks per hour.

Stay productive and connected on the go with HP ePrint mobile printing.[2] The HP Jetdirect 2700w USB Wireless Print Server enables you to make printing devices wireless, so you can locate printers and MFPs wherever you need them.[1]

HP Jetdirect 2700w USB Wireless Print Server

Standard features

- Wirelessly share HP printers and MFPs with ePrint capability across your network.[1][2] Connect easily via external USB port. Increase speed and performance and take advantage of greater range with the 802.11 b/g/n high-speed wireless connection.[1]

Secure wireless solution gives you flexibility to place printers in more convenient locations.[1]

- Multiple features keep your confidential information private and secure on protected wireless networks.[1] Enterprise-class security includes authorization, authentication, and encryption. Data is encrypted across your network when it is logged.

Rely on HP for secure network printing via wireless connection.[1]

- Increase the abilities of compatible HP ePrint-enabled devices. With HP ePrint mobile printing, there's no need to wait. Stay productive and connected on the go with mobile printing away from your printer or MFP.[2]

Stay productive on the go—use HP ePrint mobile printing for emails, photos, business materials, and more.[2]
