The information on your screen could be a golden opportunity for your competition. Make sure you protect it.

Bolder.
Brighter.
Unmatched privacy.

The information on your computer is like gold.
And its value lies in keeping it secret.

When it comes to your on-screen information, you're responsible for security that rivals Fort Knox.

3M™ Gold Privacy Filters rise to the challenge, offering unmatched privacy and increased clarity for an

incredible viewing experience. While viewing the screen from straight on, users will see a clear, crisp

screen. From the side, onlookers are blocked from viewing screen information, seeing only a dazzling
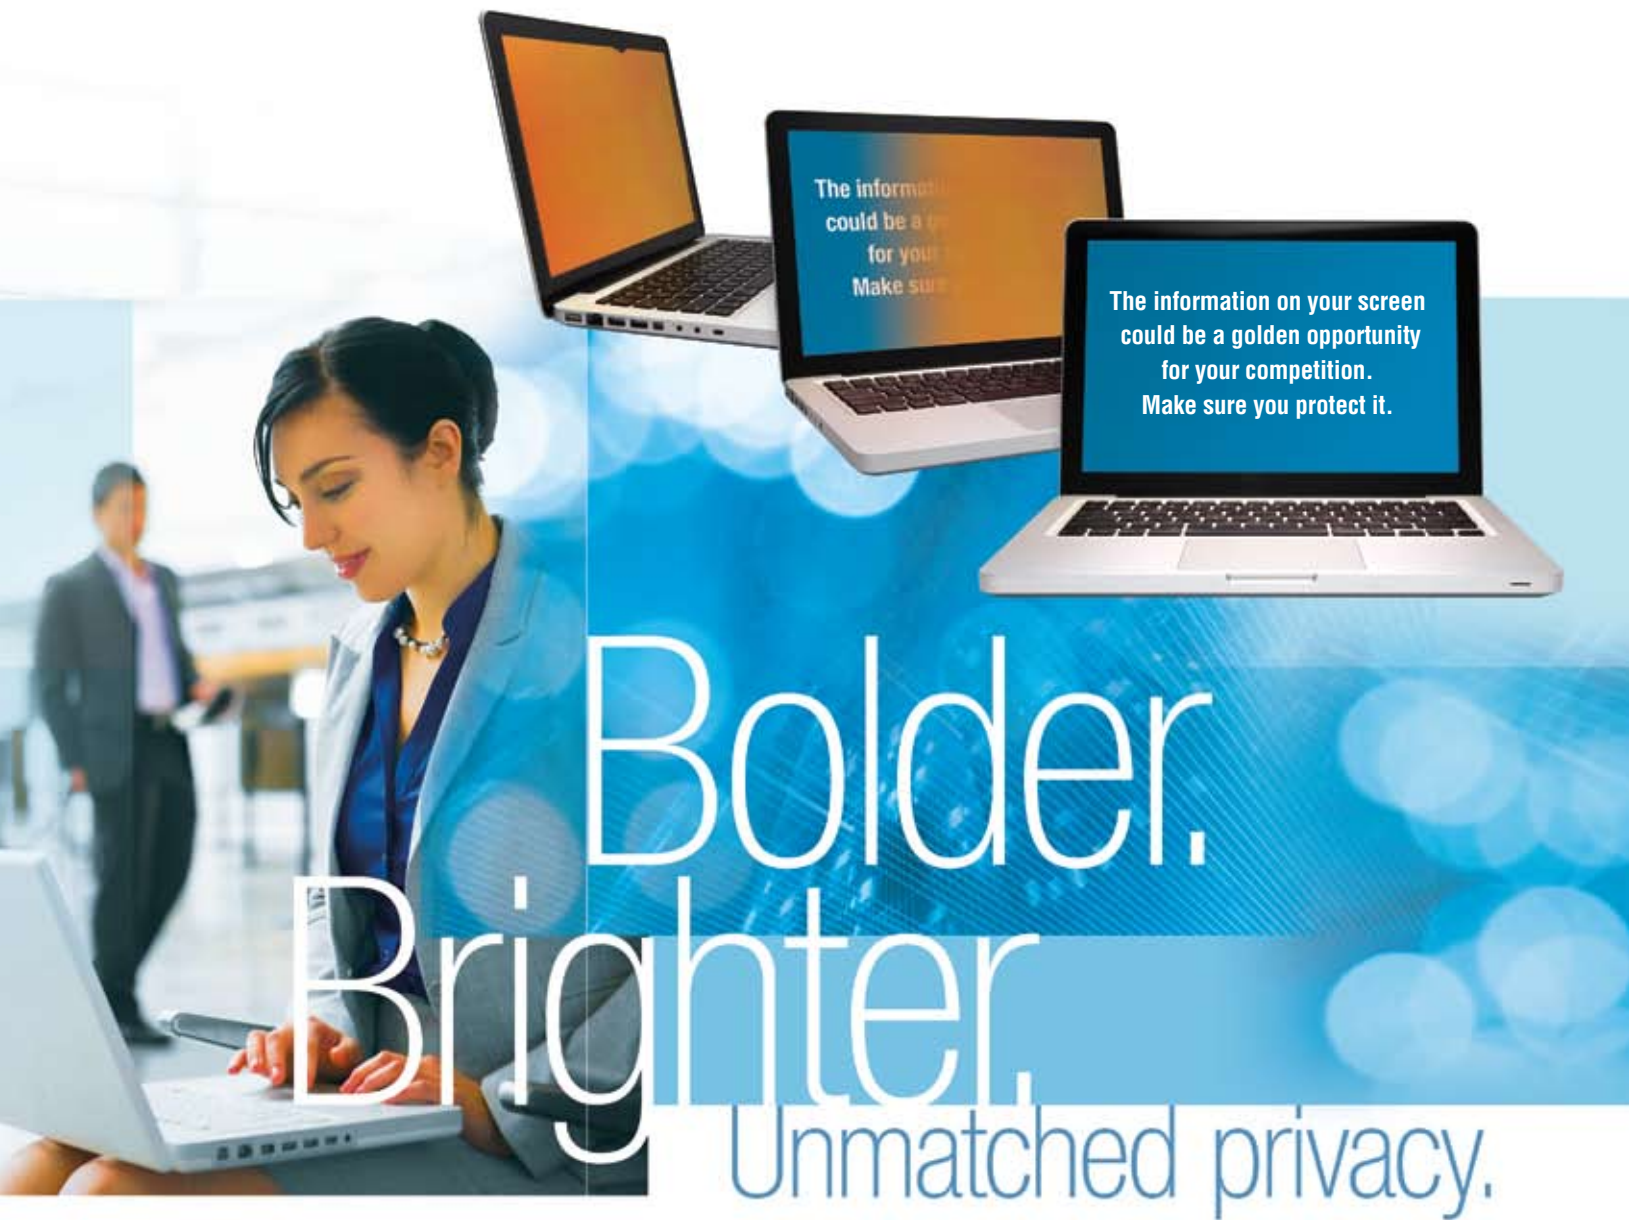

golden surface. It's privacy – with an amazing new look.

3M™ Gold Privacy Filters

The information on your screen could be a golden opportunity for your competition.
Make sure you protect it.

When Business Travels, Take Security- and a BOLD New Look- Along!

Twice the level of privacy

The 3M™ Gold Privacy Filter provides twice the level of privacy protection as standard competitive "blackout" privacy filters. This means that wherever you are sitting, your confidential information is less likely to be inadvertently revealed, helping to protect you and your firm from liability and cost.

Protection of your valuable business tool

The 3M™ Gold Privacy Filter shields your notebook screen from scratches, dents and other damage. And it stays in place when the notebook is closed, making it easy for you to bring your protection on the road with you and avoid replacement costs.
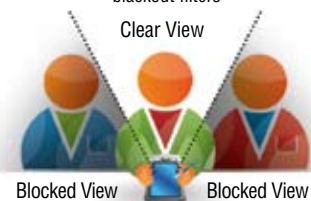

Clarity for working efficiently

It's important for your screen images to be clean and crisp so you can work comfortably and without delay. The 3M™ Gold Privacy Filter provides 14% higher clarity than competitive standard blackout filters so that you can enjoy privacy without having to compromise on visual clarity.

Order the Correct 3M™ Privacy Filter

NOTE: Measure height and width of viewable are only. For proper fit, do not include plastic monitor or laptop frame in your measurement.
