Birds- Owls of Brazil, by Antonio Silveira

Owls of Brazil

by Antonio Silveira

As it is known by us, Brazil is the country that has the biggest biodiversity in the world, and one of the biggest in quantity of bird species, in a way that our bird fauna is too rich, and it is composed of many families and its enormous quality of species.

Talking about the owls, there are in Brazil 38 forms among species and subspecies, which follow bellow.

This list was done for helping birdwatchers.

TYTONIDAE FAMILY

Tyto alba (Suindara or Coruja-branca; Barn Owl).

Cosmopolitan bird, existing almost all around the world, and existing all around Brazil. It mainly lives near human habitation, where it is used to nest at the church and towers. The voice looks like the sound of tearing a cloth, which usually emits in flying. Size: 37 cm. Two forms in Brazil:

- *Tyto alba tuidara*. This form occurs at central and oriental Brazil. For the south area up to the Fire Land and west in Chile.
- *Tyto alba hellmagri*. It occurs at Venezuela's east and Guineas and from the extreme north up to the left bank of Amazonas River.

STRIGIDAE FAMILY

Megascops choliba; Corujinha-do-mato; Tropical Screech-Owl

Occurs at Costa Rica to Bolivia, Paraguay and Argentina and all around Brazil, being one of the most common; in the forest board and near human habitation, where are a lot of insects attracted by the lights, mainly from the posts. Eminently of night habits. Size: 22 cm. Five forms at Brazil:

- *Megascops choliba choliba*. South Brazil, Paraguay, Uruguay e North Argentina.
- *Megascops choliba crucigerus*. Occurs at low Amazonas and Brazil's center.
- *Megascops choliba caatingensis*. Northeast Brazil.
- *Megascops choliba decussatus*. East Brazil.
- *Megascops choliba chapadensis*. South Brazil.

***Megascops watsonii*; Corujinha-orelhuda; Tawny-bellied Screech-Owl**

It habits pine trees areas and forests. Occurs from Venezuela to Bolivia, Mato Grosso, Pará, Amapá. Size: 22 cm. Four forms at Brazil.

- *Otus watsonii watsonii*. Occurs at North Amazônia.
- *Otus watsonii ater*. Central Brazil.
- *Otus watsonii usta*. Central Brazil and North Argentina.
- *Otus watsonii fulvescens*. Central Brazil up North Bolivia.

***Megascops usta*; Corujinho-relógio; Austral Screech-Owl**

Occurs at Rio Amazonas, do Maranhão ao Amazonas e Rondônia

***Megascops atricapilla*; Corujinha-sapo; Black-capped Screech-Owl**

Developed ears. Habits forests. Besides Brazil it also exists at Paraguay, Argentina (Misiones) and Uruguay. Size: 24 cm. Two forms at Brazil:

- *Megascops atricapilla atricapilla*. Central regions and South Brazil.
- *Megascops atricapilla argentinus*. Brazil's South Area.

***Megascops sanctaecatarinae*; Corujinha-do-sul; Long-tufted Screech-Owl**

It occurs at Santa Catarina, having some diversity about if it is a specie or sub-specie of the one above.

***Megascops guatemalae*; Corujinha-de-roraima; Vermiculated Screech-Owl**

Roraima's North Area. Size: 19 cm.

***Lophostrix cristata cristata*; Coruja-de-crista; Crested Owl**

Long ears, forming a V. It occurs from Venezuela to Bolivia, Mato Grosso North and Pará. It habits forests of Amazônia. Size: 39,5 cm

***Pulsatrix perspicillata*; Murucututu; Spectacled Owl**

Habits high forests, not being just nighter. Size: 48 cm.

- *Pulsatrix perspicillata perspicillata*. North area of South America and Brazil. Regions of dense forests.
- *Pulsatrix perspicillata pulsatrix*. It lives at the atlantic side of forest from Bahia to Rio Grande do Sul.
