***Beer is proof that God loves us
and wants us to be happy.***

Benjamin Franklin

Brouwerij Martens
*more than 250 years of love for
and knowledge of the trade*

At Brouwerij Martens, we are proud of our 250-year-old beer-brewing tradition.

We like nothing more than sharing our love for what we do with our customers. We have a passion that drives us to continually invest in new products, new packaging and new recipes. Our customers are the focus of this entire process. This is why we are successful in building up durable partnerships. Because beer should be drunk responsibly, and most especially with friends...

Brouwerij Martens was founded in 1758, which is when Adriaan Geerkens first started brewing beer in his inn.

Today, more than 250 years later, this fabulous brewery is run by the eighth generation. Much has changed since 1758,

but our passion, love, knowledge of brewing and our insistence on using only the best raw materials remain unchanged.

We brew and bottle more than 3,000,000 hl per year. This makes Brouwerij Martens the second biggest beer producer in Belgium. The group comprises two breweries that employ a total of 250 people. International exports make up 85% of our turnover.

We are IFS-certified. 85% of our products are private label products.

Vision

Why do so many customers around the globe choose us?

- We specialise in customised products: We create and produce beers according to the flavours and wishes of our customers. And we always do this in close consultation with our customers.
- In addition to customised beers, we also offer our own high quality beers.
- Our company is structured in such a way that we are able to produce at the lowest possible price combined with the best possible quality.
- We have a very efficient supply chain so that we can always deliver to our customers within the best possible deadlines.
- Our customer service department is ready to help customers with all their requirements.
- We help our customers to create new packaging solutions.

Drinks

We brew low-fermentation beers (lagers, alcohol-free beers, low-alcohol beers) and high fermentation beers (wheat beers, dark or pale monastery beers, etc.) as well as flavoured beers (cherry, raspberry, apple, lemon, etc.) and mojito or tequila beers.

Packaging

Brouwerij Martens has different packaging lines. We can fill:

- 33-cl and 50-cl cans. Then these can be packaged in hi-cone, foil (4-, 6-, 12-packs, etc.) or just loose in a tray.
- Disposable bottles: we have 33-cl and 50-cl disposable bottles. These are available in a cluster pack (3- or 6-pack) with a tray or a box.
- Returnable bottles of 20 cl, 25 cl and 30 cl in a crate.
- PET bottles: we have two highly efficient PET lines where we can fill 33 cl, 50 cl, 66 cl and 1 L bottles in trays or loose in foil.

Own brands

Martens Sezoens

According to the renowned beer connoisseur Michael Jackson, Sezoens deserves a place of honour among specialised Belgian beers. This beer gets its typical aroma from the expert selection of aromatic types of hops and the special dry-hopping procedure (hops that are added at a late stage in the brewing process). The beer is refreshingly mild with a malty sensation in the mouth and a strong aroma of hops.

Sezoens Quattro

Amber-red beer with a very mild, full-bodied malt flavour and a pronounced bittersweet sensation.

Martens Pils

Martens Pils has a very harmonious and spicy feel to it and a balanced bitterness from the hops. It is refreshing and thirst-quenching.

Contracting

In addition to private labels and own brands, we also brew beer and bottle products for third parties.
