Treasurer :

THE HON. EDWARD LANGTON.

LIBRARIAN:

HENRY SHEFFIELD, Esq.

SUPERINTENDENT OF INDUSTRIAL MUSEUM:

J. COSMO NEWBERY, Esq., B.Sc.

DIRECTOR OF THE NATIONAL MUSEUM:

PROFESSOR MCCOY.

MASTER OF SCHOOL OF PAINTING AND CURATOR OF FINE ART GALLERY:

EUGENE VON GUERARD, Esq.

MASTER OF THE SCHOOL OF DESIGN:

O. R. CAMPBELL, Esq.

SECRETARY TO THE TRUSTEES:

ROBERT CURTIS, Esq.

REPORT.

TO THE HONORABLE THE CHIEF SECRETARY.

THE Trustees of the Public Library, Museums, and National Gallery of Victoria have the honor to present their Report for the year 1878.

1. At a meeting held on the 15th day of April 1878, His Honor Mr. Justice Barry was re-elected President, David Charteris McArthur, Esq., Vice-President, the Honorable Edward Langton, Treasurer, and the several gentlemen whose names appear at the head of each Report were appointed to the Sectional Committees.

2. Their annual Reports and those of the Directors of the various departments are annexed.

3. From a perusal of these Reports it will be seen that the complaints of want of space are reiterated with increased urgency.

4. The development of every department of the Institution, the annually augmented number of readers in the Library, of visitors in the Museums, and students in the various schools, justify the renewal by the Trustees of their request that a sufficient sum be placed on the Estimates to enable them to meet the demand for further accommodation.

REDMOND BARRY,
President.

31st March 1879.

REPORT OF THE SECTIONAL COMMITTEE OF THE PUBLIC LIBRARY.

Sectional Committee:

His Honor Mr. JUSTICE BARRY, Chairman ;
The Honorable Sir WILLIAM FOSTER STAWELL,
DAVID CHARTERIS McARTHUR, Esq., J.P.,
The Honorable Sir JOHN O'SHANASSY, K.C.M.G.,
MARTIN HOWY IRVING, Esq., M.A.,
The Honorable Sir GEORGE VERDON, K.C.M.G., C.B.,
The Honorable JOHN MACGREGOR,
The Honorable EDWARD LANGTON.

THE SECTIONAL COMMITTEE of the Public Library have the honor to present the Report of their proceedings for the year 1878-79.

1. That of the Librarian, which accompanies it, gives full details of the books acquired by purchase, donation, and under the Copyright Act, of those bound and lent, and of the number of visitors to the institution.

2. The total number of the latter during the previous year was 234,559, during the last year 256,400.

3. It is gratifying to the Committee to announce that, at the enumeration recently completed, it was found that the Library now contains—of printed books, 84,658 ; of pamphlets, parts, &c., of serials or progressive publications, 16,377 ; making a grand total of 101,035.

4. That such a number of books of solid merit and standard value of the nature and character collected within less than quarter of a century should have been assembled in a building expressly constructed to receive them, at an outlay of £111,603 16s. 9d.—serving at the same time as a library of research and a commodious reading-room for more than 600 persons, with several other spacious apartments stored with choice and varied examples and illustrations of the fine, the useful, and the practical arts, and the economic sciences—in a country so remote from the ancient seats of literature is matter for sincere congratulations.

5. In their Report for the year 1870-71, to which they beg leave to refer, the Committee furnished tabular statements of the number of volumes in several of the most notable libraries in

Europe and in America, and a synopsis of the leading divisions under which the books are classified in this Library.

6. In many of those in the old world the shelves are laden with thousands of works on theology, medicine, and law, of which much is obsolete, empirical, or exploded learning; in others of modern origin works of fiction and ephemeral literature superabound to the exclusion of those of a higher and more useful order. It will be observed that in the classification adopted here these objections have been avoided.

7. The prominent writers of ancient and of the latest dates, admitted authorities on those important subjects, are represented, while of the fleeting productions of the hour few except those published in periodicals will be found.

8. This has enabled the Committee to expand the basis of their operations to include (and as far as they have yet proceeded) to secure possession of the most able exponents of many branches of knowledge, imperfectly developed or not at all found in other libraries, and to balance the reinforcement of the different subjects as the demands of readers diverge into new channels, so that none may be materially in arrear, and all may be brought up as nearly as funds will allow and as is desirable to the latest publication.

9. It may, therefore, be affirmed without unseemly exultation that this Library, with its 100,000 volumes, now daily open for unrestricted use to a quarter of a million of readers in the year, may deservedly take rank amongst those which in other countries justly assert their claim to high renown.

10. The general arrangement of the books has been preserved, while fresh subdivisions have been formed as the compartments became overcrowded, and additional cases have been set up in some of the recesses to receive the lately acquired works.

11. This, although it has partially relieved the inconvenience felt by the public, mentioned expressly in the Report of last year, impairs to a certain extent the appearance of the room, and can serve only as a temporary expedient, for the annual increment may be estimated at between 4,000 and 5,000 volumes; and it is manifest that, if this be continued for some time without increased accommodation being provided, it will be incumbent on the Committee to shut off a portion of the reading-room in which to store the books, or to adopt some other measures.

12. Any alteration in the system, in vogue for 23 years, by which the readers take books from the shelves without the intervention of an attendant, and practised on such a scale in

Melbourne, and in no other place, will much abridge the freedom so long enjoyed, and will also entail the necessity of employing more assistance at augmented cost.

13. On the score of ultimate economy, as well as convenience and justice to the readers, the necessary funds should be obtained.

14. That the institution is useful and popular requires no proof; that the Legislature on all occasions when its aid was invoked has acted with a generous liberality is well known; and it may be safely assumed that, if the Government were to place upon the Estimates the sum of £8,000 required to complete the north or the south wing, the money would be cheerfully voted by the House.

15. The Lending Library continues to work well; and the extension of railways has enabled the Committee, through the courtesy of the Minister, to transmit two, three, or four hundred volumes of books to different towns in remote parts of the country free of expense, for the benefit of the population who contribute to the support of the Institution, but cannot otherwise partake of its advantages.

16. In addition to these loans, donations have been made to Mechanics' and other literary Institutions in the interior of photographs of pictures in the galleries of Europe, and in our own gallery, and of educational and instructive charts of various kinds.

17. This intercourse has been the means of creating a sympathy for the Library, which it is highly desirable should be strengthened in every way.

18. Relations of mutual exchange on a regulated plan have been opened in quarters from which heretofore the donations received were casual and uncertain.

19. In addition to the great Smithsonian Institute of Washington, the Institute of Public Instruction of France and the Government of Belgium have entered into correspondence, have suggested that objects of natural history and publications relating to the productions and statistics of Victoria would be acceptable, and have offered a reciprocity of benefits on their part.

20. The Baron de Watteville has already, with marked urbanity, exercised his powerful influence in the Bureau des Cultes et des Beaux Arts, and a second contribution from that department has been made. The shipment of it has been announced, and the arrival may happen shortly.

21. The Committee procured, through the obliging exertions of Professors McCoy and Halford of the University, and Mr. Cosmo Newbery of the Industrial Museum, an interesting collection, which has been entrusted to the care of Monsieur Charnay, a French gentleman despatched by the Minister on an ethnographical and geographical mission to Australasia, and now in Melbourne, who returns immediately to France.

22. It is to be hoped that such reciprocal comity may be long sustained in the same spirit as that in which it has been auspiciously begun.

23. Good progress has been made in printing the Catalogue of Books, but the undertaking has proved much heavier than was anticipated, and has severely taxed the time and energies of the Librarian and the portion of the staff employed on the work.

24. When it is borne in mind that direct and cross references, and the contents of such a repertorium of writers as that of Grævius and Gronovius, or of Migne or of Pertz, with many others—estimated at 100,000, but actually amounting to more than 150,000 entries—and a copious index have to be prepared in manuscript and revised with rigid accuracy, the labor involved may be conceived.

25. The letter H has been already reached: it is expected that by the end of the financial year the whole of the letter L may be completed.

26. This, with the prefatory matter, will form one volume of about one thousand pages. The remainder of the alphabet, with the Index, and the List of the Maps, Charts, and Books in the Lending Library, another, if not of necessity divided into two.

27. In order to perfect this a request for a further grant of one thousand two hundred and fifty pounds in aid will be submitted to the Treasurer to be placed before the Honorable the Chief Secretary, and by him placed on the Estimates of the ensuing year; and occasion will be taken to reproduce in amended and enlarged form the catalogues of the objects in the Museums and Gallery, some of which are out of print, others, in consequence of the large acquisitions since they were produced, no longer serve the purpose for which they were originally intended.

28. The want of such guide-books is a subject of complaint by intelligent visitors and those who come to the Gallery and Museums for purposes of instruction.

29. The Committee remark with increased anxiety the continued disgraceful abstractions of books, and with special concern that some have been removed from the gallery in which medical works are kept, the only portion of the building to which visitors are not admitted without permission, the readers in which are generally professional men. By far the greater number taken are of small value, being unbound pamphlets and treatises on early educational topics; some have been found already, and others have been mysteriously restored after long intervals of time from the date when abstracted. There is so much of meanness in this selfish abuse of the regulations that instructions have been given to expose and bring to justice the primary delinquents as well as the more guilty receivers of the public property, when apprehended.

THE LIBRARIAN'S REPORT TO THE COMMITTEE OF THE PUBLIC LIBRARY OF THE ANNUAL CLEANING AND ENUMERATION OF THE BOOKS, MARCH 3-19 1879.

The Librarian has the honor to report to the Committee that the cleaning of the Library and the enumeration of the books was commenced on the 3rd March, and continued to 19th March 1879, the reading-room being re-opened to the public 20th March.

The closing was continued for seventeen days, from which are to be deducted two Sundays, making fifteen working days. The work occupied five days more than on the last occasion, which is accounted for by the fact of the increased number of books to be examined, as well as by the Librarian being so occupied in preparing and carrying through the press the new catalogue, that he could give little assistance to his staff. Notwithstanding these impediments the work was finished in four days less than was usual formerly, when the books were much fewer in number.

The books generally were found in good condition, allowance being made for wear and tear, and other influences which usually affect books collected in large numbers in an apartment frequented by many readers.

The same observations are applicable to the furniture and fittings.

The contractor, W. Holroyd, has satisfactorily performed his contract. Donations have been received from the Governments of Great Britain, the United States of America, India, &c. Among these may be named a valuable collection of publications from the Chatham School of Engineering.

The various societies and institutions still continue to supply their various publications, especially the South Kensington Museum.

A valuable collection of municipal publications from the Glasgow Municipal Board has been received.

The various hospitals and benevolent institutions of Victoria have answered the request of the Committee for copies of their reports to be transmitted to foreign institutions.

Amongst the private donors may be mentioned the names of James Shaw, Esq., who has presented a large number of books on spiritualism; R. Caulfield, Esq., works relating to the History and Antiquities of Cork; the Rev. J. Mozley, his publications on Henry VII., Prince Arthur, and Cardinal Morton; Sir C. Gavan Duffy, a work handsomely illustrated and bound, on the subject of the O'Connell Centenary; T. Lewis, Hughson's London, in 6 volumes, 8vo., and other works.

Schedules I., II., III. show the amount of money expended during the year for books bought, and binding executed in Europe and Victoria; IV. and V., the number of books received as donations, and under the Copyright Act; VI., the number lent to country libraries; VII., the number of visitors to the Library.

Last year the books were	80,373
„ Pamphlets, &c.	16,236
			<hr/>
Total	96,609
			<hr/>
The total number of			
Bound books is now	84,658
Pamphlets, parts, &c.	16,377
			<hr/>
Total in Library	101,035
			<hr/>
Thus showing an increase this year of			
Books	4,285
Pamphlets	141
			<hr/>
Total increase	4,426
			<hr/>

The increase upon the pamphlets is small, in comparison with the very large numbers acquired last year and the year before by donations from various parts of America and Europe, and in consequence of the diminution of the number received by the Committee, who have sent many duplicate and superfluous copies to American and European Libraries, as well as in consequence of several hundred on kindred subjects having been bound together in volumes.

The missing volumes, which amounted to fifty-one last year, have increased this year to sixty-eight. Most of them are of trifling value, and in most cases they are unbound. It is not improbable that some, as occurred on former occasions, may be returned or found.

The mutilated volumes, which amounted to eleven last year, have increased this year to fifteen.

The catalogue, now in the printer's hands, has been set up in type as far as the end of the letter G, extending to 574 pages.

By utilizing the vacant portions of each bay, accommodation has been provided for several thousand volumes, still there are many which cannot be placed on the shelves for want of room, and are thus exposed to constant damage.

HENRY SHEFFIELD,

31st March 1879.

Librarian.

REPORT OF THE SECTIONAL COMMITTEE OF THE INDUSTRIAL AND TECHNOLOGICAL MUSEUM.

Sectional Committee :

The Hon. SAMUEL HENRY BINDON, Chairman ;
DAVID CHARTERIS McARTHUR, Esq., J.P.,
The Hon. Sir JAMES McCULLOCH, K.C.M.G.,
The Hon. JAMES GOODALL FRANCIS, M.P.,
CHARLES EDWARD BRIGHT, Esq.,
The Hon. JOHN MACGREGOR.

THE SECTIONAL COMMITTEE have the honor to report the progress of the Museum during the past year has been satisfactory.

The large number of specimens received and incorporated in the collections has necessitated the re-arrangement of nearly all the divisions of the Museum.

Mr. George H. F. Ulrich resigned his position as Curator of the Mineral Collections and Instructor in Practical Mineralogy in April, since which time Mr. O. Rule has been employed in the re-arrangement of the mineral sections.

The classes have been fairly attended.

Since the date of the last report a class in Practical Engineering and Mechanical Drawing has been formed under Mr. R. J. Terrill. Eighteen pupils attended.

The lectures on Elementary Chemistry were continued, and were attended by an average of 250 persons at each lecture. Teachers, pupil teachers, and the highest class pupils from the State schools were admitted free. This course has become so popular that it is intended to extend the courses and establish advanced classes.

The interest taken in the Museum is shown, not only by the increased attendance of visitors, but also by the donations. Its usefulness is also shown by the constant applications made for information on scientific and technical subjects, which is always supplied gratuitously. These applications, personal and by letter, number 437 for the year ; all the Australasian colonies being represented in the list.

The report of the Superintendent, and the class lists, are appended.

SUPERINTENDENT'S REPORT.

The collections in the Museum have received many additions during the year, and have been re-arranged so as to illustrate a larger number of subjects. The following is a list of the classified collections, with the number of specimens:—

MINERAL SECTION.				Specimens.
General mineral collection	1,657
Minerals of Victoria	631
" Australasia	654
Minerals, crystals, and models	287
Ornamental stones, gems, &c.	1,073
Typical rocks of Europe	535
" Victoria	653
Rocks of Australasia	3,124
Illustrations of hardness, structure, fusibility, &c., of minerals and rocks	200
Australasian building stones	365
Manufacture of glass	539
" earthenware, china, &c.	877
Metallurgy of iron	408
" copper	539
" lead and silver	218
" tin	280
" gold, pyrites, &c.	448
" antimony	76
" zinc	63
" nickel, cobalt, mercury, bismuth, &c.	70
Miscellaneous metallurgical specimens	249
Mining tools	252
Mining models	58
Ore-dressing machine models	52
Manufactured metals	1,157
Arms and munitions of war	496
Mineral colors	143
				15,074
VEGETABLE DIVISION.				
Cereals	1,693
Pulse and other food	1,349
Tea, coffee, cocoa, &c.	281
Medicinal substances, &c.	467
Fibres, cotton, &c.	1,364
Paper	250
Grasses	198
Tree seeds	228
Tobacco	55
Fruit models	613
Agricultural implements	36
Australian woods	727
American woods	212
Miscellaneous manufactures	154
				7,627

ANIMAL DIVISION.				
Leather and manufactures	288
Glue, &c.,	„	170
Wool	„	425
Bone	„	65
Manures	„	58
Soap	„	594
Candles	„	278
Hair, brushes, feathers, and manufactures			...	134
Silk and manufactures	271
Fishery and marine industries	477
				2,760
Miscellaneous specimens	200
Educational models	290
Maps and diagrams	199
Books and pamphlets	1,413
				2,102
Total specimens and illustrations, not including duplicates	27,563

The number of visitors to the Museum steadily increases, and the usefulness of the institution is shown in some degree by the record of applications for information on technical subjects. During the year these applications, personal and by letter, have numbered 435; they have all been answered gratuitously; those in which a fee has been charged for laboratory investigation are not included. All the colonies are represented, and numerous specimens are obtained in this way to increase our collections.

On the resignation of Mr. G. H. F. Ulrich, Mr. O. Rule was employed to continue the classification and re-arrangement of the Mineral section. His report is attached, together with that of Mr. T. McMillan on the Phytological section.

Some additions have also been made to the Animal section, amongst which may be noted the prize wools from the show held by Messrs. Hastings Cuninghame and Co., presented by the firm.

The classes have been well attended, as is shown by the attached lists.

An elementary Chemistry lecture course by Mr. F. Dunn, my laboratory assistant, was attended by an average of 250 persons for each of the thirteen lectures.

The Mineralogy class has been discontinued as a separate course since Mr. Ulrich's resignation. During the coming year mineralogy pupils will be received under the ordinary laboratory rules. A class in modelling under Mr. McMillan will also be opened. The new class in mechanical drawing, engineering, &c., under Mr. Terrill, has been attended by twenty-three pupils.

The work done in the laboratories has been fully up to the standard of former years. Mr. Dunn has continued the examinations of the rain water collected at the Melbourne Observatory, and with the assistance of Mr. Ellery, the Government astronomer, we hope to add during the coming year the analysis of water collected in country rain gauges.

Some investigations relating to the more economic methods of extracting gold and silver from pyritous ores and the utilization of the waste products have been so successful that practical trials will be made during the coming year.

As in previous years the examinations of the specimens of the Department of Mines have been made in the laboratory, and in addition to these the analyses required in carrying out the new Explosives Act, under which, with your permission, I was appointed Inspector, and also the examinations of building stones for the Commissioners reporting on the most suitable stone for the new Parliament Houses.

J. COSMO NEWBERY.

REPORT OF MINERAL SECTION.

To the Superintendent.

Considerable alterations have been made in the arrangement of the Mineralogical, Geological, and Metallurgical collections. They are now more grouped together, greatly improving the appearance of the Museum, and rendering them more easy of reference.

The standard collection of minerals has been re-classified, and quite a large number of new examples added, the whole of the specimens numbered, and descriptive labels placed to each one. A collection of more or less perfect natural crystals, together with a large collection of models of crystals in wood, illustrating the six systems of crystallography, has been arranged in close proximity to the above. The faces of the models have been lettered according to Dana's system of mineralogy.

A colonial collection of minerals has now been formed, containing 875 examples illustrating the mineralogy of Australia and New Zealand.

The metallurgical collection is now in progress of classification. Several new tables have been added, illustrating the ores and metallurgy of silver, cobalt, manganese, mercury, chromium, aluminum, and bismuth.

A collection of 95 specimens of minerals of Victoria has been made up and forwarded to C. T. Pech, of Berlin, for exchange; also, a large collection of minerals and rocks, containing some 400 examples, for Mons. Charnay, to go to Paris.

A fine collection of about 300 specimens, mostly Australian, formerly in the possession of R. B. Smyth, Esq, has been kindly placed at the service of the Museum by J. C. Newbery, Esq. The greater portion of them has been absorbed into the various collections in the Museum.

EXCHANGES AND DONATIONS DURING THE YEAR.

Fourteen examples of Irish Marble, Sir Redmond Barry.

Eighteen samples of crushed Antimony Ore, Allison Antimony and Gold Mine, Costerfield.

Ninety-eight specimens of Siliceous Tufa, Hot Springs, New Zealand, the Hon. John Wallace.

One sample Sand, Waterloo Bay; one specimen of Hematite; one parcel Copper Ore, Quartz Crystals, Zircons, &c., A. W. Toane.

One specimen Crystallized Galena, Champion Bay, Mr. C. Sutherland.

One parcel Ferro Calcites, Riddell's Creek, Mr. H. Bartlet.

Two specimens Copper Ore, one ditto of Zinc Blende, Mr. H. Bartlet.

Four specimens polished Nickel Ore, one ditto of Magnesite, one ditto of Nickel Ore, and two of Manganese, Mr. T. Bennett.

One specimen Stibnite, one Lydian Stone, from New Caledonia, Mr. Mesner.

One specimen of Silver Ore, Marmato Mine; one ditto, Santa Anna Mine, Mr. J. Munday.

One specimen of Coal, Coleraine Coal Co., Mr. J. Chenhall.

One small parcel of Pearls; one specimen Crystallized Quartz; one specimen of Galena, Mr. J. H. Samuel, Fitzroy.

One specimen of Granite; one Stone, brought up from the bottom of the Atlantic Ocean; one specimen of Granite, from Cleopatra's Needle, Sir Redmond Barry.

Two specimens of Asbestos, one ditto of Soapstone, Mr. Barnet.

One specimen Mineral Charcoal; three specimens of Phacolite; three of Mesolite; three of Iron Pyrites; three of Wad, South Clunes, Mr. N. Taylor.

Seven specimens of Precious Opal, Queensland, J. G. Knight.

One specimen of Stibnite, New Caledonia; one specimen of Pitchstone Porphyry; one of Volcanic Breccia; one of Floatstone, Tasmania; one specimen of Bituminous substance, Grampians; one specimen of Coal, Coleraine; one ditto of Brownspar, Sandhurst, the Superintendent.

Six specimens of Rocks, Marysville; two ditto, from Fernshaw; two specimens of Auriferous Quartz, Tasmania; one ditto Blue Dolomite, Maldon, Mr. O. R. Rule.

Nine specimens Tin Ore; seven ditto ditto; one parcel Scorodite; one specimen of Copper Pyrite; one parcel Scorodite, Mr. Rampf.

Nineteen specimens Copper Regulus, Bethanga, Mr. T. Bennett.

One specimen Calc Sinter, one sample Scorodite, Laboratory.

Two specimens Scorodite, two Zinc Blende, Mr. Munday, from Bethanga.

Two specimens Tin Ore, T. Lempriere, Esq.

One parcel Rocks, from Ireland, collected and presented by Sir Redmond Barry.

One specimen Crystallized Galena, Champion Bay; two of Gypsum, Geelong; one of Orthoclase Felsite; one of Orthoclase, Beechworth, O. R. Rule.

One specimen Silver Ore, Tenterfield, Mr. Stubly.

Two specimens of Iron Pyrites, Daylesford, Mr. Amos.

Three specimens Chert, Carlton, Mr. Cooper.

One case containing one parcel common Opal, four specimens Tremolite, six of Crystallized Orthoclase, three of Micaceous Iron, one of Calc Spar, one of Chalcedony, one of Iron Ore, and several Rock specimens, Mr. Marshall, South Australia.

The following have been purchased:—

One specimen Diamond in the matrix, South Africa.

Six Moss Agates, seventeen Brooch Paintings on Ivory, from India.

One specimen Crystallized Gold.

O. R. RULE.

To J. Cosmo Newbery, Esq., Superintendent Industrial and Technological Museum.

SIR,

I have the honor to hand you progress report for the Phytological section of the Museum for the past year.

The establishment of a workroom for the casting and modelling of fruits and other subjects of agriculture and horticulture is enabling me to make considerable strides in this particular department.

The opening of the workshop was inaugurated by the preparation of a collection of thirty-eight varieties of Apples, chiefly American kinds of recent introduction, the natural specimens having been supplied by the Horticultural Society through the curator of the gardens, Mr. George Neilson. Half sections also of this collection are in course of preparation.

A small collection of five varieties of late Pears, in condition in the month of August, supplied by Mr. J. C. Cole, nurseryman, Richmond, was also prepared simultaneously with the above.

Of other specimens of Pomaceous fruits, embracing both Apples and Pears and one Quince (and exclusive of the work of re-coloring numerous specimens), about thirty additional specimens have been placed during the season. A large Bell Pear, grown in South Australia, and presented by Mr. J. S. Butters, has also been copied and placed.

ORANGES AND OTHER CITRI.

Of this family a nice collection, from Mr. J. C. Cole, has been prepared in their half sections, and copies of whole specimens are in a state of progress. A copy of a large cluster of the "Twelve-quartered" Orange, so called, has, with a half section of the Emperor Mandarin Orange, from the garden of the Hon. Henry Miller, Findon, and presented by the gardener, Mr. H. Boyce, been also placed.

JAPANESE DATE PLUMS (*Diospyros Kaki*).

Two varieties of this excellent fruit, of larger size than any of the previously supplied specimens, were received from the gardens of the Horticultural Society, and have been copied in whole and half sections.

CHERRIES.

A collection of twenty-six varieties of the cultivated Cherry, from the same source, has enabled me to illustrate Dr. Hogg's classification for this fruit by whole specimens and half sections.

APRICOTS.

About twenty-seven varieties, also from the gardens of the Horticultural Society, are, with their half sections, in progress of preparation.

PLUMS.

Copies of a valuable collection of about sixty-eight varieties of Plums with their half sections, the natural fruits from the same source, are also in progress, by which it is proposed to illustrate Dr. Hogg's classification for this important fruit, or some slight modification thereof.

FIGS.

Seven varieties of Figs, with half sections of six of them, have in like manner been prepared.

NECTARINE.

A copy with half section of a seedling freestone Nectarine of good quality, raised on the Museum grounds by Mr. Thos. McBirney, has been prepared.

NUTS AND FILBERTS.

A small collection of six varieties has been received from the Horticultural Society.

ANNUAL HERBACEOUS FRUITS.

From the same source specimens of the Tomato Capsicum, and the Yellow and Orange Spanish Capsicums (*Capsicum annuum* and *C. a. grossum*), Tall Okra and Prolific Dwarf Okra (*Hibiscus esculentus*), have also been received and copied.

OSAGE ORANGE (*Maclura aurantiaca*).

A fruit of this ornamental and useful hedge plant, received from Messrs. Law, Somner, and Co., seedsmen, Melbourne, has been copied.

FUNGI-BOLETUS (*B. luteus?*).

A copy of this species has been made from a specimen gathered in the neighborhood of the Horticultural Society's gardens, Richmond Park.

PRESENTED BY MR. THOS. CHUCK, Royal Arcade.

Two samples of Hemp (*Cannabis*), St. Petersburg and Rhine, and Twenty-three samples of Cotton, from various foreign sources.

By MR. JAMES HODGKINSON, Richmond River, New South Wales.

Sample of Queensland Nuts (*Macadamia ternifolia*), Moreton Bay Chestnuts (*Castanospermum Australe*), both as found indigenous to New South Wales; and five Sugar Canes.

By MR. W. WELCH, Sandhurst and Elmore.

Sample of Olive Oil from fruit the produce of a tree six years old, grown at Runnymede, near Elmore, by Mr. Berthoud.

By SIGNOR ANTONIO DE LA CAMARA.

Sample of Native Lemons (*Citrus Australasica*) from Richmond River, New South Wales, and the Native Flax (*Linum marginale*) from the neighborhood of Nunawading, near Melbourne.

By MR. HUGH McCOLL, Secretary North-western Canal Company.

Specimen of wood of one of the Mallee Scrub bushes, named *Eucalyptus dumosa*, cut at Warracknabeall. The Mallee Scrub, Mr. McColl observes, covers nearly 15,000,000 acres Victorian territory, and 8,000,000 South Australian.

By MR. W. S. SMITH.

Leaves of a Myrtaceous plant, probably a Eucalypt, bearing wax scales, apparently the work of an insect.

By MR. R. CURTIS.

A cob of Maize, grown at Richmond River, New South Wales.

I am, Sir,

Your most obedient servant,

THOS. McMILLAN

REPORT OF THE SECTIONAL COMMITTEE OF THE NATIONAL GALLERY.

Sectional Committee:

The Hon. Sir JAMES McCULLOCH, K.C.M.G., Chairman ;
 The Hon. Sir C. GAVAN DUFFY, K.C.M.G.,
 The Hon. THOMAS TURNER A'BECKETT,
 The Hon. SAMUEL HENRY BINDON,
 The Hon. Sir GEORGE VERDON, K.C.M.G., C.B.,
 The Hon. FRANK STANLEY DOBSON, M.L.C.,
 The Hon. EDWARD LANGTON,
 DAVID CHARTERIS McARTHUR, Esq.,
 The Hon. JOHN A. MACPHERSON,
 CHARLES EDWARD BRIGHT, Esq.,
 The Hon. Sir WILLIAM FOSTER STAWELL, C.J.,
 The Hon. JAMES GOODALL FRANCIS, M.P.

THE COMMITTEE of the National Gallery present the following Report for 1878 :—

I.—THE PAINTINGS AND FINE ART COLLECTION.

The following oil paintings have been purchased by the Trustees during the year :—

1. "England," by Thomas Creswick, R.A., and Richard Ansdell, R.A.

* 2. "Queen Esther," by Edwin Long, A.R.A.

These works were purchased for the Trustees by Alfred Taddy Thomson, Esq., who has for many years given the Committee the benefit of his knowledge, good taste, and experience in selecting pictures for the Gallery.

Writing of these purchases Mr. Thomson says :—

("ENGLAND.")

"15th February 1878.

"Remembering the injunction with regard to Creswick, in your letter of 5th October 1875, I have purchased for you an example of that master. It is a joint work of Creswick and Ansdell. It was exhibited in the Royal Academy in 1850. It is as good an example of the two masters as has been offered for sale for some years past, and it is one that increases in favor the more one is acquainted with it; so that I hope it will be liked in the colony."

("QUEEN ESTHER.")

"10th May 1878.

"I have at length succeeded in obtaining for you a picture which embodies a good subject well treated, a description of work which I have been long in search

* This picture, purchased in 1878, was received in 1879.

of. It is by Edwin Long, the painter of your 'Question of Propriety,' and is entitled 'Queen Esther.'

"It is just such a work as, judging by your recent communications to me, seems to have been in contemplation of the Committee, and it is in entire accordance with my instructions.

"Long's pictures are rapidly increasing in value; for instance, I am assured on the most competent authority, that the work by him now in your possession is worth £2,500, and his rising reputation justifies the probability of their attaining to much greater prices."

Although only two oil paintings have been added to the collection in the Gallery, they are of great merit, and the Committee are glad to report that they have been most favorably criticised by the public and the press.

It is the intention of the Committee to continue the policy of only purchasing works of eminent masters, and they congratulate the Trustees and the public on the possession of two such works of art.

The Committee having received a communication from Mr. Folingsby, the painter of "Bunyan in Prison," stating that it was his intention to leave Europe, and, if sufficient inducement offered, to make Victoria his home, commissioned him to execute a painting for the Gallery.

By the latest advices Mr. Folingsby had nearly completed his work, and is expected to arrive in Melbourne in a few weeks.

The Ethnotypical Collection has been removed to a room at the west end of the old Gallery which will be opened to the public so soon as sufficient cases for the display of the various objects have been provided.

A classified Catalogue of the Collection has been prepared and printed.

A Catalogue of the Pictures and Works of Art, the want of which has been so long felt, is now in the press.

Five Chromo-lithographs published by the Arundel Society for 1877-8 have been received.

II.—DONATIONS AND LOANS.

During the year, the Committee have received an unusual number of valuable donations and loans, as set forth in Schedules III. and IV.

The Committee are indebted to the liberality of the Hon. W. J. Clarke for four marble Statues, by the late Mr. Summers:—

1. The Queen.
2. His Royal Highness the late Prince Consort.
3. His Royal Highness the Prince of Wales.
4. Her Royal Highness the Princess of Wales.

These works are at present placed in the South Hall. The light is not favorable for the exhibition of these valuable statues, but the Committee are glad to state that as the Government have promised to place a sum on next year's Estimates towards the erection of a building for Sculpture, the Trustees have been enabled to give instructions for the preparation of plans. They are in a forward state, and the work will be carried out without delay.

Two fine copies in marble—

1. "Venus de Medici,"
2. "The Rape of the Sabines,"

have been presented by the family of the late James Purves, Esq.

An addition has been made to the collection of oil paintings by the presentation of a work by Robert Dowling, "A Sheikh and his Son entering Cairo, on their return from a Pilgrimage to Mecca."

This work was purchased by subscription, and presented to the Trustees by a committee of gentlemen.

The President, on his late visit to Europe and America, procured two valuable collections of Medals :—

1. Medals of the Royal Mint of England.

Presented by the Master of the Mint, with the permission of the Right Hon. the Chancellor of the Exchequer.

2. Medals from the Mint of the United States, Philadelphia.

Presented by the Hon. James Pollock, Superintendent of the Mint.

III.—SCHOOLS OF PAINTING AND DESIGN.

The Reports of the Master in the School of Painting, and of the Master in the School of Design, are attached.

In the School of Painting the number of students was 62, in the School of Design 164.

APPENDIX A.

REPORT OF THE MASTER OF THE SCHOOL OF PAINTING FOR THE YEAR 1878.

To the Chairman of the National Gallery Committee.

SIR,

Reviewing the lists of works of art in their various branches, which have been added to the art collections in the National Gallery by purchases, donations, or lent for exhibition during the year, and comparing

them with those of previous years, the Trustees must be complimented on the success achieved.

It is not only the number, but especially the quality of the works of art collected which will mark this year as one of the most prosperous since this noble institution was founded for the intellectual development and pleasure of the population of Victoria. The thousands of visitors who frequented the Gallery during the year give an evident proof of the great interest the public take in the so liberally offered means of instruction given by the Legislature of the country, not only in admiring our art treasures, but by a careful study of them, as the largely increased number of students in the School of Painting attests.

If the number of the works of art purchased for the Gallery is not larger than usual, most decidedly they are notable for size, costliness, and excellence, such as the large picture of Mr. Herbert, R.A.,* the exceptionally fine painting by Creswick and Ansdell, R.A., and the eleven very valuable classic cartoons by J. C. Horsley, R.A.*

The donations received during the year are of an unprecedented magnitude, first of which must be mentioned the four colossal statues in marble of Her Majesty the Queen, the Prince Consort, and the Prince and Princess of Wales, by Charles Summers, presented to the Trustees by the Hon. William John Clarke.

The donation of two very fine copies of renowned statues in Italy, the "Venus de Medici," and the "Rape of the Sabines," by Giovanni di Bologna, presented by the family of the late James Purves, Esq., is also a proof of the patriotic liberality of the wealthy classes in Victoria. Another example is the donation of the large picture by Robert Dowling, presented by a committee of gentlemen, not to speak of the number of smaller donations of which mention is made in the annexed lists. A very valuable donation, consisting of eighty-four medals from the mints of London and Philadelphia, of which sixty are various British silver war medals, was received through the agency of Sir Redmond Barry.

The exhibition of loans was also more important in this than in any former year, of which must be mentioned—In sculpture, four large size marble busts, and in oil paintings the large works of the late John Martin, K.L.; two very fine pictures by R. Ansdell, R.A., and a fine sea piece by Franz Hunten. In water-color paintings, two exceedingly fine sea pieces by O. W. Brierly, which were highly admired by all connoisseurs of art.

During the year twenty new students entered the class of painting, and sixty-two was the total number of those who studied in the Gallery. Most probably, in accordance with the progress in the School of Design, this number will increase in the future.

The large collection of ethnological objects was catalogued by Brough Smyth, Esq., and Mr. Smyth, jun., arranged the collection in the new glass cases, where it will be better protected and preserved.

The only time during the whole year when the Gallery was closed to the public was for twelve days, when all the rooms were cleaned, also the only time at which I availed myself of a leave of absence.

Respectfully,

EUGENE VON GUÉRARD,
Master and Curator of the National Gallery.

* These works were included in the Report of the Trustees for 1877.

APPENDIX B.

REPORT OF THE MASTER OF THE SCHOOL OF DESIGN FOR THE
YEAR 1878.

To the Chairman of the National Gallery Committee.

SIR,

As this is the last quarter of the year, I may perhaps be expected to give a general description of the past year's matters. The number of students during the respective quarters is as follows, to which is added a comparison with the year 1877 :—

Quarter ending		1877.	1878.
31st March	... Males	... 16	... 19
	... Females	... 54 = 70	... 49 = 68
30th June	... Males	... 25	... 20
	... Females	... 77 = 102	... 64 = 84
30th September...	... Males	... 29	... 29
	... Females	... 76 = 105	... 60 = 89
31st December	... Males	... 27	... 33
	... Females	... 84 = 111	... 70 = 103

You will perceive some slight difference in the numbers attending the class during last year and this, but there are quite as many as I can manage without assistance.

During the past year you have enabled me to make valuable additions to the collection for the benefit of the students—several works on art and a number of lithographic copies from London. I have also selected many copies in Melbourne, and purchased two useful books on anatomy. A human skeleton has also been obtained, and a collection of drawings showing the muscles separately. The boards and easels are now in excellent order, and the class is well furnished with suitable means of study. A work upon the anatomical construction of quadrupeds would be of value, but I do not know yet where to get one.

I have been endeavoring to collect a number of the students' drawings to place before you, but, for some reason, I have failed. Some consider their drawings not good enough; others object; some beg me not to ask them yet. I think, however, I shall be able to do so soon; but as you have before you examples of two of the young ladies' drawings, who are desirous of admission to the painting school—they could not draw anything when they came here—you may judge what progress they have made; they are also far advanced in anatomical knowledge.

I have the honor to be, Gentlemen,

Your obedient servant,

O. R. CAMPBELL,

Master of the School of Design.

SCHEDULE I.

OIL PAINTINGS AND WATER-COLOR DRAWINGS PURCHASED
DURING THE YEAR 1878.

Name of Artist.	Name of Picture.	Description.	Size.	Date received.
Creswick, Thos., R.A., and Ansdell, Richard, R.A.	"England"	Oil painting on canvas	Feet. 6 x 4	6th June 1878.
Long, Edwin, A.R.A.	"Queen Esther" ...	Oil painting on canvas	Ft. Ft. in. 7 x 5 7	11th Feb. 1879.
Hegg, Madame	Two Flower paintings	Water-color	Inches. 17 x 13	8th June 1878.

SCHEDULE II.

CHROMO-LITHOGRAPHS, PHOTOGRAPHS, AND CURIOSITIES
PURCHASED DURING THE YEAR 1878.

Description.	Date received.
CHROMO-LITHOGRAPHS.	
Twelve Plates, illustrating Australian Life and Scenery	8th March.
PUBLICATIONS OF THE ARUNDEL SOCIETY.	
"Christ's Charge to St. Peter," from the fresco by Pietro Perugino in the Sistine Chapel, Rome. Second publication for 1877	24th April.
"Christ bearing the Cross, the Interment, and Resurrection of Christ," by Hans Memling, in the Cathedral at Lubeck	10th July.

REPORT OF THE SECTIONAL COMMITTEE OF THE NATIONAL MUSEUM.

Sectional Committee :

CHARLES EDWARD BRIGHT, Esq., Chairman ;
The Hon. JOHN A. MACPHERSON,
The Hon. Sir WILLIAM H. F. MITCHELL,
The Hon. JOHN MACGREGOR,
The Hon. EDWARD LANGTON,
The Hon. JAMES GOODALL FRANCIS, M.P.

IN presenting the Report of the National Museum, your Committee have the satisfaction of stating that the efforts of the Professor still continue to be exerted to the utmost as far as the means at his disposal will permit.

Your Committee have continually had under their notice the excessively crowded condition of the objects in the Museum, and much regret that the means of erecting suitable buildings as proposed have not yet been placed at their disposal, in order that the objects may be removed from the Museum at the University.

The Director's report and schedules attached will furnish information as to purchases made, donations received, and contents of the Museum.

REPORT OF THE DIRECTOR OF THE NATIONAL MUSEUM FOR THE YEAR 1878.

To the Chairman of the National Museum Committee.

SIR,

I have the honor to forward the usual annual schedules of donations to the National Museum for the year, marked A ; of the specimens purchased in the colony, marked B ; of the visitors, marked C ; exchanges, marked D ; and a further instalment of the register of the contents of the National Museum, from No. 26,405 to No. 33,964, for publication with the Annual Report.

The attendance of the general public was ninety-eight thousand one hundred and forty-nine (98,149) ; and the students attending the Natural Science Lectures at the University continue and expand as usual, in the Museum, the systematic instruction they receive in the adjoining lecture-room.

The collections continue to be maintained in the most perfect order, although open to the public from 10 a.m. to 5 p.m. on every week day (but two) in the year, and have been largely augmented during the year in several branches.

The specimens recorded in the register now number forty-three thousand eight hundred and twelve (43,812), all of which are labelled

and classified for public use in the cases; besides which are some thousands of Entomological and Mineralogical specimens also labelled and arranged but not yet entered in the catalogues.

The work of the Museum has been well advanced in all the branches during the year.

I have the honor to be, Sir,

Your most obedient servant,

FREDERICK McCOY,

Director of Museum.

SCHEDULE A.

DONATIONS TO THE NATIONAL MUSEUM FOR THE YEAR 1878.

Name of Donor.	Donation.
Acclimatisation Society (per A. A. C. Le Souef)	1 Apteryx Mantelli, 1 Goura coronata, 1 Presbytes cinereus, 2 Aix sponsa, 1 Kanchil (India), 1 Macacus radiatus, 1 Pavo cristatus
Atkins, William, Portland ...	1 Fossil (Grange Burn, Hamilton)
Butler, Thomas, Barber's Ck., Yan Yean	1 Schizorhina Australasia (near Plenty R.)
Bailey, J. F., Swanston street ...	1 Myadora brevis (Mordialloc), 2 Natica (Sandridge), 100 sps. various Shells (Madagascar), collection of Fossils (Skye Isd.)
Bennet, T., Richmond ...	1 Onustus, 2 Spirula Australis, sps. Nickel Ore, 1 Pinna, 1 Strombus, and 6 Freshwater Shells (N. Caledonia)
Breslin, Neil, McKenzie street, Melbourne	1 Larva Anthæra Eucalypti
Berry, E., Faraday st., Carlton	1 Australian Mullet (malformation or healed wound, Gippsland)
Cowie, Jas., jun., Albert Park ...	1 Ruffey (Fremantle, W. Australia)
Daintrey, —, Menzies' Hotel ...	1 Argonauta tuberculosa (Port McDonald, N. of Lighthouse), sp. recent deposit (12 miles from Pt. McDonald, on road to Mt. Gambier)
Evans, Miss, Bealiba ...	1 Tropicoderus Childreni (Bealiba)
Elliot, Alex., University Grounds	1 Phalacrocorax carboides (University Grounds)
Fenton, J. L., Warrnambool ...	1 Callorhynchus Antarcticus (Warrnambool—in spirits)
Foley, Malachy, Brunswick ...	1 Caterpillar
Gladish, F. G., University ...	1 Spiloglaux boobook (Melbourne)
Groth, W. Fitzroy ...	1 Phæton æthereus (Maldon Isd.), 1 Crab (Cook's Isd.), collection Shells (Cook's Isd. and Batavia)
Godfrey, F. R., St. Kilda ...	1 Antichinus albipes (Murrumbidgee)
James, Dr. M., Collins street E.	Head of Salmo salar (Derwent, Tasmania)
Leadbeater, J., Museum ...	1 sp. Grub out of boxwood (rare), 6 Rats, 1 Lizard (Fiji), 1 Cacatua eos (Victoria, fem.)
McCormack, W. & M., Richmond	Sps. Quartz, Chalcedony, Agate, Zircons, Spinnelle, Black Corundum, Pleonaste, Sapphire (Gembrook, Gippsland)
McCoy, Professor, Museum ...	1 Oreocinclæ lunulata (Brighton, fem.)
May, Rev. J. P., Tasmania ...	Head and Tail Salmo trutta (Derwent)
Nelson, Wm., Waurin Ponds ...	4 Fossils, 1 box Fossils (Waurin Ponds), 1 sp. anterior simple Tooth of Squalodon Wilkinsoni
Porter, Zadok, Eurambeen ...	1 Phascogale penicillata
Patten, Rev. Jas., Hawthorn ...	7 Reptiles (Natal), collection Fossil Shells (Schnapper Point), 2 Voluta (Gibraltar), 2 Scutus (Pt. Lonsdale), 1 sp. Serpenula (Natal), 1 Gastrochœna (?) Tasmanicus (Schnapper Point), 1 Lima (Natal), collection Coleoptera (Natal)

Name of Donor.	Donation.
Stephen, F. J. S., Caulfield ...	1 Myrmeleon substendus
Stafford, Cyril, Gippsland ...	1 Plotus Novæ Hollandiæ, 1 Platycercus Penantii, 1 head Sawfish
Wilson, H. A., Athenæum Club	1 Incisor of Upper Jaw of Diprotodon (Darling R.)
Wilson, Sir Saml., Ereildoune ...	3 sp. Fish
Williamson, S. C., Gippsland ...	Intestinal Worms from stomach of Black Snake
Waghorn, Alfred, Melbourne ...	1 Daption capensis (Cape Otway)

SCHEDULE B.

SPECIMENS PURCHASED IN THE COLONY FOR THE NATIONAL MUSEUM DURING THE YEAR 1878.

Name.	Specimens.
Aldis, Charles	1 Sunfish (Brighton)
Bailey, J. F.	Fossil portions of Jaw of extinct Australian animal
Berry, H.	Rare Fish (Queenscliff), 1 sp. Gurnard (Queenscliff)
Bertollo, Angelo	1 Sunfish (Brighton)
Broadbent, Kendall	1 Buceros, 1 Goura, 1 Bird of Paradise, 1 Golden Oriole, 1 Wren, 1 Cyclopsitta, collection Insects (New Guinea)
Cumming, Fredk., jun.	1 Dugong (skeleton)
Du Boulay, A.	Collection Land Shells (Queensland, N.S.W., Tasmania, and S. Sea Islands)
French, Chas.	1 Lamprocolius splendidus (Senegal), 1 Icterus leucopteryx (Jamaica), 1 Pyroderus Granadensis (Bogota), 1 Chrysotis Panamensis (Panama)
Hill, Wm.	Rare Fish (Queenscliff), 1 Gigantic Tern, 4 Spur-winged Plover
Hards, —	2 Wallaby
Irvine, Mrs. J. F.	7 Argonauta (Tasmania), 12 Voluta fusiformis
Overend	1 sp. Strombus
Patterson, William	Collection Fossils from N.W. Bend, South Australia
Stafford, Cyril	6 Emus, 2 Emus (skeletons), 1 Pacific Gull, 5 Allied Dotrel, 2 Hooded Dotrel, 4 White-winged Chough, 4 Tribonyx, 4 Barred-rumped Godwit, 2 Australian Coot, 1 Ground Thrush, 5 Gang Gangs, 1 Sulphur-crested Cockatoo, 1 Tippet Grebe, 4 Porphyro melanotus, 1 Bush Rat, 1 Hapelotus apicalis, 6 Pigeon Gulls, 1 Antechinus, 1 Crab, 1 Snag Eel, 1 Lizard, 4 Black Swan (Cygnet), 1 Gigantic Tern, 4 Spur-winged Plover
Stewart, Edwin	1 Boar Fish (Brighton)
Sing, Ah	5 Rock Cod, 7 small Fish, 1 Cuttle Fish, 1 Hoary-headed Grebe
Tappin, William	Rare Fish (Queenscliff), 5 Cape Barren Geese, 2 Leatherjackets
Williams, F. J.	23 Skulls Australian Mammals and Birds, 1 Darter (Upper Yarra)

SCHEDULE C.

RETURN OF VISITORS TO THE NATIONAL MUSEUM FOR THE
YEAR 1878.

Quarter ending 30th March	23,199
„ 29th June	29,794
„ 30th September	22,134
„ 31st December	23,022

 98,149

The Monthly Returns are as follows :—

January	10,774
February	6,078
March	6,347
April	14,051
May	9,220
June	6,523
July	8,106
August	7,294
September	6,734
October	7,094
November	6,645
December	9,283

 98,149

SCHEDULE D.

EXCHANGES ON THE PART OF THE NATIONAL MUSEUM DURING
THE YEAR 1878.

SENT TO DR. JAS. HECTOR, WELLINGTON MUSEUM, NEW ZEALAND.

(In exchange for 3 sps. *Sphenodon punctatum* ("Tuatara"), 2 sps. *Naultinus Pacificus* (North Island), 1 sp. *Mocoza Zealandica* (Chatham Island), 2 sps. ditto (S. Island), 2 ditto (N. Island), 2 sps. *Naultinus elegans* (N. Island), in spirits.)

2 specimens *Emus* (skin).

SENT TO FRENCH MUSEUM, PER MONS. CHARNAY.

(In exchange for specimens to arrive.)

2 sps. *Anas nævosa*, 1 *Cereopsis*, 2 *Malacorhynchus membranaceus*, 2 *Menura Victoriae*, 2 *Biziura lobata*, 2 *Leptotarsis Eyttoni*, 1 *Astur approximans*, 1 *Falco lunulatus*, 1 *Corcorax melanoramphus*, 2 *Nycticorax Caledonicus*, 2 *Cacatua galerita*, 2 *Thick-kneed Plover*, 1 *Calyptorhynchus funereus*, 1 *Psephotus multicolor*, 2 *Platycercus flaviventer*, 1 *Leipoa ocellata*, 2 *Biziura lobata*, 1 *Podargus Cuvieri*, 2 *Podiceps Australis*, 1 *Licmetis tenuirostris*, 1 *Tricoglossus Swainsoni*, 1 *Cacatua eos*, 1 *Euphema elegans*, 1 *Rallus Lewinii*, 1 *Calamanthus sagittata*, 2 *Petroica Goodonovi*, 1 *Peristera chalcopetra*, 2 *Graucalus*, 1 *Coachwhip bird*, 1 *White-rumped Wood Swallow*, 1 *Pomatostomus superciliosus*, 1 *Pomatostomus ruficeps*, 3 *Ocyphaps lophotes*, 2 *Psephotus hæmatonotus*, 1 *Psephotus hæmatogaster*, 2 *Crested Oreoica*, 1 *Dotrel*, 2 *Plectorhyncha lanceolata*, 1 *Sphenostoma cristatum*.

SCHEDULE E.

REGISTER OF CONTENTS OF NATIONAL MUSEUM.

AS NUMBERED (CONTINUED FROM LAST REPORT).

Museum No.	Name.	Locality.
26405-6	<i>Dolabella Rumphii</i> (Lam.) Moluccas
26407-8	„ (n. sp.) Philippines

REPORT OF THE SECTIONAL BUILDING AND GENERAL COMMITTEE.

Sectional Committee:

HIS HONOR MR. JUSTICE BARRY, Chairman ;
 DAVID CHARTERIS MCARTHUR, Esq., J.P.,
 THE HON. SIR JAMES MCCULLOCH, K.C.M.G.,
 THE HON. JAMES GOODALL FRANCIS, M.P.,
 THE HON. SAMUEL HENRY BINDON,
 CHARLES EDWARD BRIGHT, Esq.,
 THE HON. SIR GEORGE VERDON, K.C.M.G., C.B.,
 THE HON. EDWARD LANGTON.

THE BUILDING AND GENERAL COMMITTEE have the honor to report :—

No works of any importance have been carried out this year in consequence of the failure of the application of the Trustees made last year to the Government for money to add to the building.

The inconvenience felt in every department for want of space has been considerably aggravated by reason of the acquisition during the past years of objects of all kinds.

This is especially felt in the Library, in which the number of books (101,000 vols.) exceeds that for which accommodation was originally provided ; and also in the National Museum, which is much overcrowded ; and as it has been determined that the buildings in the University grounds are not to be enlarged, and the specimens, the property of the Trustees, are to be removed to the building on their own grounds as soon as they can be received, funds for completing the Great Hall, or erecting a new Museum, are urgently required.

This inconvenience is felt also in the National Gallery, which has been enriched by the noble donation by the Honorable William John Clarke of four statues in marble, executed by the late Mr. Summers—

1. The Queen.
2. His Royal Highness the late Prince Consort.
3. His Royal Highness the Prince of Wales.
4. Her Royal Highness the Princess of Wales.

These are at present placed with other statues and busts in marble in an apartment wholly unsuitable for their being seen to advantage.

The Honorable the Chief Secretary, having recognized the weight of the representations made by the Trustees, promised that a sum of £5,000 should be placed on the Estimates for the financial year 1879-80, towards the erection of a Sculpture Hall. On the faith of this promise the Trustees have given instructions for the preparation of plans, which are now in a forward state.

When approved of by the Trustees, and when the money is available, the Committee will lose no time in carrying out the design.

The ordinary repairs have received attention, and the Committee report that the several buildings are in good condition.

ROBERT CURTIS,
Secretary to the Trustees.

EDWARD LANGTON,
Treasurer.

The above account of Receipts and Expenditure of the Public Library, Museums, and National Gallery has been examined and found correct.

(Signed) C. H. SYMONDS, }
ALFRED J AGG, } Commissioners of Audit.

Audit Office, Melbourne, 25th April 1879.
