Jamo®

Danish Sound Design

The Story of Jamo

1968 was the humble beginning for Jamo in the Danish fishing village of Glyngøre. Two young Danes, Preben Jacobsen and Julius Mortensen decide to pursue their greatest passion by designing and producing loudspeakers. Together they founded the company Jamo, which takes its name from the first two letters of the two men's surnames: Jacobsen and Mortensen. By 1994 Jamo officially became the biggest producer of loudspeakers in Europe, and by the time the company celebrated its

30th anniversary in 1998, more than 11.5 million Jamo speakers had been sold in more than 80 countries around the world. Right from the start Jamo's mission has been to produce sound solutions that make a difference. With a continued focus on creating synergies between innovative technology and renowned Danish design, Jamo has remained one of the world's most popular speaker brands for 40 years – and has one of the most comprehensive ranges of speaker systems on the market today.

Audiophile enthusiasts can revel in the outstanding performance of the Reference standard R909, whilst iPod owners can enjoy the new i300 – possibly the best sound in its class. The appealing and elegant design of most products on this page is the work of award-winning Danish team Smedegaard and Weiss – two female designers internationally recognised for their ability to successfully combine technical and aesthetic qualities with the Scandinavian traditions of simplicity, functionality and purity

A102HCS5

A102HCS5 Surround Speaker System

If you are looking for a competent, yet discreet 5.1 solution to match your current AV or DVD receiver, this is it! This package includes 4 x A102/A10 Surrounds, a dedicated A10CEN Centre channel and the powerful SUB200 Active Subwoofer. The speakers feature a unique, compact design and are available in high gloss black, white and silver. As the elegant A102 speakers are incredibly small, it is easy to integrate them into most domestic environments, no matter which room you intend to listen in

SUB200
See Active Subwoofer section for product description

A102
With its extremely compact size, you will enjoy fantastic sound in your room without the need for large traditional speakers. The A102 can also be mounted on the wall (wall-brackets included). For extra sound in another room, the A102 speakers are also available as pairs.

Optional: New DMR70

Add in the new Jamo DMR70 Digital Media Receiver – with built-in DVD/CD Player and USB input - and you can play almost any format of Movie, Music – even MP3, MPEG4 and JPEG files. The impressive list of features in the DMR70 includes HDMI and Component Video output with Progressive Scan (for smooth and well defined picture quality), an excellent Digital Amplifier (which keeps all signal processing in the digital domain, maintaining the absolute highest level of fidelity) and a Radio with 40 AM/FM presets. Two analogue audio inputs and two digital audio inputs adds further flexibility for fabulous sound quality.

A340 HCS7 / A320 HCS6

Thanks to its discreet and elegant design, the Jamo A320HCS6 Home Theatre speaker package will suit most small to average size living rooms. The well thought-out design allows the speakers to be placed virtually anywhere – horizontally or vertically – on the floor or on the wall (wall-brackets and table-stands are included – floor-stands are optional). For large rooms, the A340HCS7 is ideal. With larger A340 Surround speakers and a more powerful 10" Subwoofer, it will fill a bigger room with sound, whilst still not cluttering the room with large speakers.

A340 HCS7

System consists of:
4 x A340 Surrounds,
1 x A3CEN.4 and 300 Watt
10" Active Subwoofer (SUB300)

SUB300
See Active Subwoofer section for product description

A340

Although the satellite speakers are relatively small, they feature a highly compact two-way medium-sized bass-reflex configuration – a 4" woofer and a 1" tweeter – with superior sound quality and high power-handling. Mount the speaker on the wall with the ingenious fittings supplied or on the dedicated table-stand: it's your choice as both are included. Alternatively you can mount the speaker on the optional A340FS floorstand

A3CEN.4

The A3CEN.4 is specifically designed to work with both the A320 and A340. This centre speaker features a two-way system with two woofers and a tweeter. This results in very natural vocals, giving perfect dialogue reproduction during movies. And the low-profile design offers a perfect match for the new flat screen TVs on the market. The wall bracket allows users to tilt the speaker upwards or downwards – so that, regardless of whether it's placed on top of or below the screen, it can be aimed towards the listening position

A320 HCS6

System consists of:
4 x A320 Surrounds,
1 x A3CEN.4 and 250 Watt
8" Active Subwoofer (SUB250)

SUB250
See Active Subwoofer section for product description

A320

The A320 is a very compact two-way satellite speaker featuring a 3 1/4" woofer and a 1" tweeter. It reproduces the mid and upper range frequencies with full fidelity and very natural sounding vocals.

Mount the speaker on the wall with the ingenious fittings supplied or on the dedicated table-stand: it's your choice as both are included with the speaker. Alternatively you can mount the speaker on the optional A320FS floorstand

Finish Black Finish Silver

HIGHLIGHTS

Two-way system

Despite the small size of the satellite speakers, they feature a two-way system – a woofer and a tweeter – that reproduces the mid- and upper range frequencies with full fidelity. The result is a very natural sounding vocal quality.

Magnetic shielding

The A320, A340 and A3CEN.4 are all magnetically shielded, making it possible to place the speakers close to a TV without distorting its picture tube.

Electronic overload protection

The electronic PTC resistor limits power to the loudspeaker if it becomes overloaded. When the volume is turned down again, the resistor cools down and the sound is restored to its normal level

Design

Thanks to their rounded profile, A3 speakers can be placed almost anywhere; horizontally or vertically on a bookshelf, on a wall, in a corner – the only limit is your imagination. Some accessories for different placement options are included with the speakers

Optional accessories

A340FS / A320 FS – Designed especially for the A340 / A320, the stands feature clever cable management that completely conceals the speaker cables
