WELCOME TO THE FUTURE OF SKATING!

The TRISKATE revolution by Powerslide.

TRISKATES can be used for every skating discipline - from fitness to speed skating, from offroad to freeskating or hockey. There are NO LIMITATIONS and more and more people are exploring the new trend of skating. Triskates help you to skate faster, skate longer, have more fun, be more agile and to explore your limits. Be free with THREE! That's the philosophy of Triskating and we are sure you will feel the same! The Powerslide DNA is based on innovation, quality, design and performance and you can see this in every detail of our products. ENJOY!

FITNESS

CONQUER THE STREETS

From beginners to advanced skaters Triskates bring you more excitement, more speed, more control and first and foremost more FUN!

RULE THE COMPETITION

When winning is not enough: smash records, make history, conquer the competition

RACE

URBAN SLALOM

REVIVE THE CITIES

Conquering the city has never been this easy and fast! Triskates guarantee fun whether you cruise, skate stairs, jump obstacles, do slides or use them for freestyle slalom.

FEEL THE NATURE

Skating off-road is more than just doing a full body work out or getting an adrenalin kick. Leave the stress behind and become one with nature.

OFF-ROAD

HOCKEY

DOMINATE THE GAME

The game that is loved by kids and adults just got faster, more exciting and more cutting edge than ever - thanks to Triskates.

BENEFITS OF TRINITY:

EASIER CONTROL OF EDGES

LOWEST POSSIBLE CENTER OF GRAVITY

GREAT FOR JUMPS AND GAPS

MORE BALANCE AND CONTROL

MORE CONTROL AND POWER FOR SLIDES

AMAZING POWER TRANSFER AND PUSH

MORE SENSITIVE AND EASIER TO CONTROL THE BOOT

FASTER AND BETTER ACCELERATION

LESS VIBRATION

MORE STABLE

MORE CONTROL AND BETTER BALANCE

AS LOW AS POSSIBLE

WHY THE WORLD NEEDS IT?

With bigger wheels the center of gravity of skates is higher, control and support are also more important. With bigger wheels the force gets higher too, more torque. We at Powerslide, as the pioneers of big wheels are aware of these facts and looked for solutions to make skates not only faster, but also more secure, agile and easier to control.

WHAT WE DID:

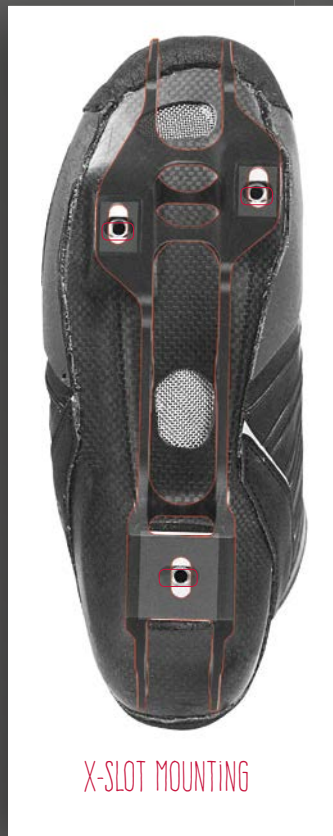

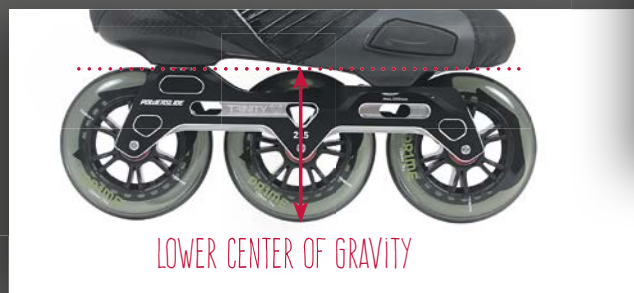

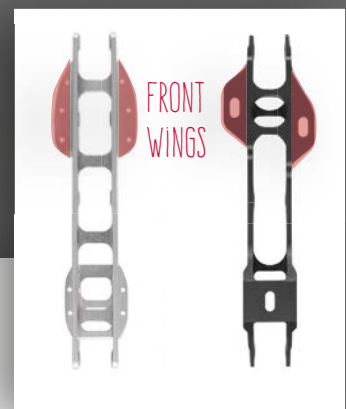

So we looked at different sports, fixations in different areas and at other disciplines of skating. Inline hockey frames use FRONT WINGS FORMING A CHANNEL SINCE AGES FOR ONE REASON: TO LOWER THE CENTER OF GRAVITY.

WHAT DID WE WANT?

WE WANTED

- > a mounting that is as low as possible for ALL wheel sizes and setups.
- > to make the connection between the boot and frame more stable.
- > to add more control and better balance.

HOCKEY TRINITY

X-SLOT MOUNTING

Hockey is the fastest game in the world, and the lower skate is, the easier it is to maneuver, to handle and to control. This was our goal and mission for the new Trinity frame concept. The construction of hockey skates inspired us to

CREATE A THREE POINT MOUNTING FRAME,

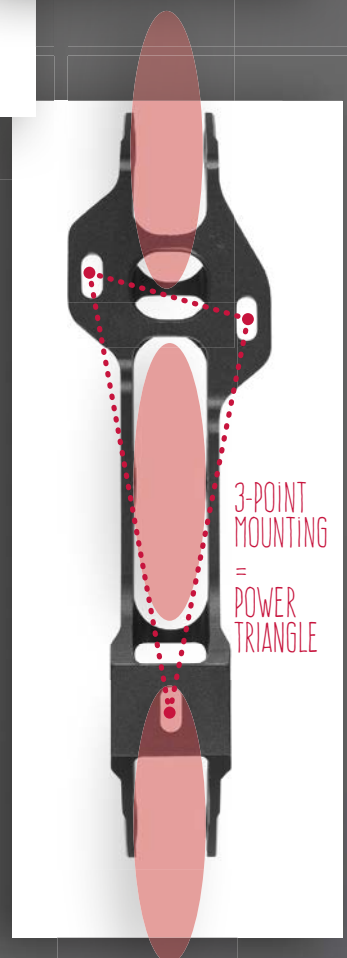

where we placed the two front mounting points outside of the frame using wings like in hockey frames

FORMING A DEEP GROOVED CHANNEL FOR THE WHEELS:

It was natural for us to

INTEGRATE THE X-SLOT MOUNTING INTO OUR TRINITY 3-POINT MOUNTING

frames as well. It gives the skater the opportunity to shift their frames to the front and back and even sideways, which enables them to customize the frame position under their boots to their skating skills and needs to optimize their performance.

HAVE MORE FUN

The Triskate revolution was solely started by Powerslide. But why should we offer Triskates only to adults if kids could benefit even more from a light weight skate? Triskates featuring big wheels are very agile and safe, especially for kids due to the fact that small particles, which could block small wheels can be rolled over easily with more control and without losing balance during skating. Kids can save a lot of energy skating on lighter skates and in the end they have more fun.

MORE INNOVATION, MORE DEVELOPMENT MORE PASSION

When winning is not enough: smash records, make history, conquer the competition.

Powerslide is the world leader in speed skating. It sets trends, and dictates the rules to the competition. Our new collection is our best ever. More innovation, more development and even more passion. The focus is on three important areas:

- TRISKATES
- TRINITY MOUNTING
- KIDS SKATES

Powerslide is also pleased to announce a proud partnership with FIRS with the vision to develop our sport even further.

OUR KIDS ARE THE FUTURE OF OUR SPORT.

Bart Swings, Peter Michael and Sandrine Tas all started as kids who had dreams and wanted to go fast. After years of hard work with countless ups and downs along the way, they were able to reach the pinnacle of the sport. Powerslide noticed that there was a huge problem in the market and not all kids were perfect technically and this led to future problems in skating and maybe, ultimately lead to kids leaving the sport, and the problem: The skates!

Currently there is no kids skate designed specially for kids. They are all basically adults skates, just made smaller into kids sizes. But kids don't have the same balance, strength, control or co-ordination as adults.

The most common problem for kids is pronation of the ankles, or falling inside. This problem is the root of other major technical problems and needs to be eliminated. With this kids collection we have added several new models which feature new designs, that focus on allowing younger skaters to develop their technique in the correct way so that in the future years they can achieve greatness, too. The focus has been on a greater support in the ankle area, with higher, more supportive boots. **BUT STILL GO FAST & WIN!**

**EVERY KID STARTS WITH A DREAM,
AND POWERSLIDE IS HERE TO HELP THEM ON THEIR WAY.**

FEEL THE NATURE

Our slogan:

“ALL SEASON,
ALL WEATHER,
ALL TERRAIN” can now be 100% believed!

We have some new exciting products that really raise the stakes of the game. The Kaze SUV 150mm Triskate and the new Grave Digger Nordic skate featuring 200mm wheels are both incredible innovations. Nothing can stop these skates which are built based on the newest technology along with the next level in skating - the TRINITY 3-point mount. Now your full body workout is unlimited. You are able to train more than just your legs, upper body or cardio vascular system, you can also free your mind, become one with nature and enjoy skating everywhere.

POWERSLIDE® **HOCKEY**

DOMINATE THE GAME

A NEW EMPIRE TO CONQUER INLINE HOCKEY

Reign is a complete inline hockey skate collection designed in Germany with revolutionary products that allow players all over the world the chance to destroy their competition.

Never before has a hockey skate been so specifically constructed, designed and developed. With our Reign collection, we threw out everything that had been done before and started from scratch with new innovation, new ideas and new features.

We thought it was time for a revolution, time to dominate.

Reign also features the pat. pending revolutionary TRINITY mount. As the name suggests, it features three mounting points between the boot and frame, but these strategically placed points are designed to allow for maximum power transfer, but actually increase maneuverability without adding any extra weight. The TRINITY mount is designed to be used in tandem with 3 wheels to magnify those benefits.

Reign has all the weapons needed to conquer your adversaries

THE NEW RECALL LINER MEANS INSTANT MEMORY FIT.

The liner combines the finest materials such as 3-D shaped latex foam with memory foam and dual density closed cell foam.

Along with the new memory fit 3-D skates innersole the Recall liner accomplishes a 360 degree custom fit. The lacing on top of the liner adds extra stability and fixation for perfect fit, control and performance.

Every time you step in you will feel the "Recall effect": fully memory foam wrapping smoothly around your feet for perfect contact and comfort.

chaya

Powerslide has a long history in roller skating... we are known for our inline skates, but our foundation was built on roller skates. As a result we have a depth of knowledge of this market and with Chaya as our pure rollerskating brand we are only focused on one thing...

OFFERING THE VERY BEST ROLLER SKATES FOR ROLLER DERBY, LIFESTYLE AND PARK SKATING.

Chaya has its origin in Hebrew and means 'Life'. Roller skating is life to many people and we want to reflect that in our products.

After a successful launch,
CHAYA IS READY TO TAKE IT TO THE NEXT LEVEL.

We will offer a wider selection of roller skates at a range of price points while simultaneously bringing new and exciting innovation to the market.

In the past 20 years of roller skating, there has never been as much innovation as we have achieved with Chaya. For example, our Dual Centre Mount system, our new Quicky Axle system or that we were the first to champion the return of the Clip Axle. All these innovations aim to make life easier for everyone, both the shop owner and the skater themselves. We aim to save you time and worry when assembling your boots or changing your wheels so that you have more time to enjoy roller skating and enjoy life.

It is our mission to become the number one roller skate brand in the world for roller derby, lifestyle and park. The very best materials and craftsmanship paired with comfort, fit and performance. You will see and feel the difference from the first moment you put on your skates.

CHAYA - IT'S TIME.
