

Overview for Contract 5805-55 PBX RE-BID

Prior to utilizing a contract, the user should read the contract in it's entirety.

DESCRIPTION

► This contract covers the requirements of Commonwealth Agencies to procure, either outright or on an installment basis, PBX Systems (configuration I-IV) in any of all 67 counties of the Commonwealth of Pennsylvania.
Section 3 PBX Re-Bid: Statewide Procurement for Private Branch Exchange (PBX) Systems and Services. This section is not divided into three (3) zones, it covers the entire state

CONTRACT INFO

Contract Number, Title & Collective Number	5805-55 Statewide PBX Telephone Systems & Services CN 00024669
Number of Suppliers	Four (4)
Validity Period	Effective Date of Award - December 31, 2009 with the Option of two (2) additional one (1) year renewals
DGS Point of Contact	Sheryl Kimport, Commodity Specialist
Contact Phone #	Phone: 717-346-2670
Email	skimport@state.pa.us

PRICING HIGHLIGHTS

Section 3 PBX Re-Bid: Upon notification from an Agency, suppliers will conduct a Site Visit & complete a PBX Reconciliation Sheet using the prices and rates as set forth in the contract & listing the quantities, equip., maint., etc. to be used for issuing a PO. The PBX system, & any add'l. costs that are approved by the Issuing Agency will then constitute the final costs for the PO.

PROCESS TO PURCHASE

► All agencies will process their Purchase Orders through SAP
All suppliers have agreed to participate in the COSTARS Program for eligible Local Public Procurement Units
Contact Information for all suppliers can be located in the Header Text of each individual Outline Agreement in SAP and on the Supplier list posted to the DGS Website www.dgs.state.pa.us
Manufacturer Lines awarded to each supplier can be located in the Item Text on each Line Item for each individual Outline Agreement in SAP
You can also refer to the Item Sheet for Contract #5805-55 posted at the DGS Website www.dgs.state.pa.us for Section, Zones and Manufacturer Lines awarded to each supplier

SPECIAL CONTRACT TERMS AND CONDITIONS

CONTRACT SCOPE/OVERVIEW: This Legacy Contract No. 5805-55 (ReBid) (identified here and in the other documents as the "Contract") will cover the requirements of Commonwealth Agencies to purchase, either outright or on an installment basis, PBX Systems and Services (Configuration I-IV) in any of all 67 counties of the Commonwealth of Pennsylvania.

ORDER OF PRECEDENCE: These Special Contract Terms and Conditions supplement the Standard Contract Terms and Conditions For Statewide Contracts for Supplies. To the extent that these Special Contract Terms and Conditions conflict with the Standard Contract Terms and Conditions for Statewide Contracts for Supplies, these Special Contract Terms and Conditions shall prevail.

TERM OF CONTRACT: The Contract shall commence on the Effective Date, which shall be no earlier than **Date of Award** and expire on **December 31, 2009**.

OPTION TO RENEW: The contract or any part of the contract may be renewed for two (2) additional one (1) year terms by mutual agreement between the Commonwealth and the Contractor(s). If the Contract is renewed, the same terms and conditions shall apply.

OPTION TO EXTEND: The Department of General Services reserves the right, upon notice to the Contractor, to extend the Contract or any part of the Contract for up to three (3) months upon the same terms and conditions. This will be utilized to prevent a lapse in Contract coverage and only for the time necessary, up to three (3) months, to enter into a new contract.

LIMITATION OF LIABILITY: The Awarded Supplier's liability to the Commonwealth under this Contract shall be limited to the greater of one million dollars (\$1,000,000.00) or the total contract price for all the Equipment, Software and/or Services covered by this Contract. This limitation will apply, except as otherwise stated in this paragraph, regardless of the form of action, whether in contract or in tort, including negligence. This limitation does not, however, apply to damages for bodily injury or damage to real property or tangible personal property for which the Awarded Supplier is legally liable, nor will the limitation apply to the Awarded Supplier's indemnity of the Commonwealth for patent, copyright, trade secret, or trademark infringement.

PRICE/COSTS: Awarded supplier agrees to provide, on a turnkey basis, ordering Commonwealth Agencies with PBX systems and/or services at the rates set forth in the contract. Upon contact from a Commonwealth Agency, supplier shall provide to the Commonwealth Agency a completed Price Reconciliation sheet, which shows how the system pricing was computed and shall use the prices and rates set forth in the contract in completing the form. The ordering agency shall use the completed Price Reconciliation sheet in preparing their purchase order.

OPTION FOR SEPARATE COMPETITIVE BIDDING PROCEDURE: The Department of General Services reserves the right to purchase supplies covered under this Contract through a separate competitive bidding procedure, whenever the department deems it to be in the best interest of the Commonwealth. The right will generally be exercised only when a specific need for a large quantity of the supply exists or the price offered is significantly lower than the Contract price.

COOPERATIVE SOURCING TO ACHIEVE REDUCTIONS IN SPEND (COSTARS) PROGRAM:

COSTARS Purchasers. Section 1902 of Act 57 of May 15, 1998, as amended by Act 142 of December 3, 2002, 62 Pa.C.S, Section 1902, authorizes local public procurement units and state-affiliated entities (together, "COSTARS Purchasers") within the Commonwealth of Pennsylvania to participate in Commonwealth contracts for supplies, services, or construction that the Department of General Services ("DGS") chooses to make available to COSTARS Purchasers. DGS has identified this Contract as a contract that will be made available for COSTARS Purchasers.

- a. A "local public procurement unit" is defined as:
- Any political subdivision;
 - Any public authority;
 - Any tax exempt, nonprofit educational or public health institution or organization;
 - Any nonprofit fire, rescue, or ambulance company; and
 - To the extent provided by law, any other entity, including a council of governments or an area government that expends public funds for the procurement of supplies, services, and construction.

A state-affiliated entity is a Commonwealth authority or other Commonwealth entity that is not a Commonwealth agency.

b. Only those COSTARS Purchasers registered with DGS may purchase from a DGS contract. Any qualified entity not presently registered and wishing to participate in the COSTARS Program may register at any time by either completing a one-time, online registration on the DGS COSTARS Website at www.dgs.state.pa.us/costars or completing and returning a one-time Registration Form to the address below. Currently, there are several thousand registered COSTARS Purchasers. To view a list of the registered entities, please visit the website.

c. COSTARS Purchasers have the option to purchase from a DGS Statewide Contract with awarded contractor(s) for Commonwealth agencies' use, from any DGS cooperative procurement contract established exclusively for COSTARS Purchasers in accordance with the requirements of Act 77 of 2004, amending Section 1902 of the Commonwealth Procurement Code, 62 Pa.C.S. § 1902, or from their own procurement contracts established in accordance with the applicable laws governing such procurements. The Contractor understands and acknowledges that there is no guarantee that any prospective COSTARS Purchaser will place an order under this Contract, and that it is within the sole discretion of the registered COSTARS Purchaser whether to procure from this Contract or to use another procurement vehicle.

d. Registered COSTARS Purchasers electing to participate in this Contract will order items directly from the Contractor and be responsible for payment directly to the Contractor.

Third Party Beneficiaries. DGS is acting as a facilitator for COSTARS Purchasers who may wish to purchase under this Contract. Registered COSTARS Purchasers who elect to participate in this contract and issue orders to the contractor(s) are third party beneficiaries who have the

right to sue and be sued for breach of the contract without joining the Commonwealth or DGS as a party.

Quarterly Sales Report. The Contractor shall furnish to the DGS COSTARS Program Office an electronic contract use report, preferably in Excel spreadsheet form, no later than the fifteenth calendar day after each quarter in the contract period, detailing the Contract purchasing activity.

a. The Contractor shall e-mail the reports to GS-PACostars@state.pa.us or send the reports on compact disc via US Postal Service to the address below.

b. On each report, the Contractor shall include the Contractor's name and address, the Contract number, and the period covered by the report. The Contractor should list as much as the following information as possible on the report for each order received:

- Registered COSTARS Purchaser
- Material Code (UNSPSC)
- Item Description
- Quantity
- Unit Price
- Total Price
- Delivery Date

c. Failure to provide the Quarterly Sales Report in the specified time may result in suspension of activities with the COSTARS Program.

Inquiries. Additional information regarding the COSTARS Program is available on the DGS COSTARS Website at www.dgs.state.pa.us/costars. Direct all questions concerning the COSTARS Program to:

Section 3 – Re-Bid

Statewide Procurement for Private Branch eXchanges (PBX) and Services - 225 universal ports to 901 universal ports

The purpose of this contract is to provide statewide coverage for the outright purchase or installment purchase of new fully digital Private Branch eXchanges (PBX) telephone systems, peripheral equipment and services from a single responsible vendor or a consortium of vendors continuity for all sixty-seven (67) counties of the State of Pennsylvania. Awarded suppliers must have the capability to install and service throughout the State of Pennsylvania (now called State). All telephone systems installed will be turnkey installations. The awarded supplier must have the capability of installing and servicing all counties and must carry a product line(s) that handles all requirements stated in the contract for the four (4) configurations including voice mail, automatic call distribution (ACD), station message detail recording (SMDR), and Department of Correction's security features.

The awarded suppliers will be contracted to furnish, install, maintain and support the common equipment, station equipment, cable records and all other ancillary equipment to make the systems fully operational. The State will consider the awarded suppliers to be the sole point of contact with regard to contractual matters, including payment of any and all charges resulting from the cost of any contract.

Awarded Suppliers Responsibility: The awarded suppliers will be responsible for investigating and recommending the most effective and efficient technical configuration. Consideration shall be given to the stability of the proposed configuration and the future direction of technology, confirming to the best of their ability that the recommended approach is not short lived. Several approaches may exist for hardware configurations, other products and any software. The awarded suppliers must provide a justification for their proposed hardware, product and software solutions along with cost therefore. Awarded suppliers are encouraged to present explanations of benefits and merits of their proposed solutions together with any accompanying services, maintenance, warranties, value added services or other criteria identified herein.

General System Requirements:

Configuration 1: Up to 225 universal ports that are equipped and wired for:

- 1 attendant console
- 55 multi-button phones, minimum 8 line appearances (no speakerphone)
- 15 multi-button phones, minimum 8 line appearances with speakerphone
- 15 multi-button phones, minimum 8 line appearances with speakerphone and display
- 10 multi-button phones, minimum 8 line appearances with display only
- 95 single line 2500 sets with message waiting lamp and TAP button
- 1 administration terminal for moves adds and changes (MAC) and printer*
- 13 direct inward dialing (DID) trunks
- 11 two-way trunks
- 1 T-1 for outgoing long distance traffic to a TelCove point of presence (POP)
- 1 Paging access card
(4 ports required. Does not use spare ports from cards already indicated in the configuration)
- 1 3 zone all-call paging adapter
- 10 power failure circuits
- 1 minimum 4 hour uninterruptible power supply (UPS)

Configuration 2: Up to 226 to 450 universal ports that are equipped and wired for:

- 1 attendant console
- 117 multi-button phones, minimum 8 line appearances (no speakerphone)
- 34 multi-button phones, minimum 8 line appearances with speakerphone
- 34 multi-button phones, minimum 8 line appearances with speakerphone and display
- 10 multi-button phones, minimum 8 line appearances with display only
- 195 single line 2500 sets with message waiting lamp and TAP button
- 1 administration terminal for moves adds and changes (MAC) and printer*
- 22 direct inward dialing (DID) trunks
- 21 two-way trunks
- 1 T-1 going long distance traffic to a TelCove point of presence (POP)
- 1 paging access card
(4 ports required. Does not use spare ports from cards already indicated in the configuration)
- 1 3 zone all-call paging adapter
- 20 power failure circuits
- 1 minimum 4 hour uninterruptible power supply (UPS)
- 1 voice processing system (list all other components required for a system)
12 universal ports, 10 hours of message storage, 200 mailboxes
- 1 ACD System - 15 trunk system (include all other components required for a system) 9 digital agent phones with headsets, 1 supervisory phone/terminal (After the award agencies have the opinion of supplying a PC or Purchase a PC from the awarded vendor)
- 1 SMDR system (include all other components required for a system) for a minimal 30,000 call records, 1 printer

Configuration 3: Up to 451 to 900 universal ports that are equipped and wired for:

- 1 attendant console
- 240 multi-button phones, minimum 8 line appearances (no speakerphone)
- 75 multi-button phones, minimum 8 line appearances with speakerphone
- 75 multi-button phones, minimum 8 line appearances with speakerphone and display
- 10 multi-button phones, minimum 8 line appearances with display only
- 400 single line 2500 sets with message waiting lamp and TAP button
- 1 administration terminal for moves adds and changes (MAC) and printer*
- 36 direct inward dialing (DID) trunks
- 33 two-way trunks
- 1 T-1 for outgoing long distance traffic to a TelCove point of presence (POP)
- 1 paging access card
(4 ports required. Does not use spare ports from cards already indicated in the configuration)
- 1 3-zone all-call paging adapter
- 25 power failure circuits
- 1 minimum 4 hour uninterruptible power supply (UPS)

Configuration 4: Up to 901 universal ports and up that are equipped and wired for:

- 1 attendant console
- 375 multi-button phones, minimum 8 line appearances (no speakerphone)
- 120 multi-button phones, minimum 8 line appearances with speakerphone
- 120 multi-button phones, minimum 8 line appearances with speakerphone and display

10	multi-button phones, minimum 8 line appearances with display only
625	single line 2500 sets with message waiting lamp and TAP button
1	administration terminal for moves adds and changes (MAC) and printer*
53	direct inward dialing (DID) trunks
50	two-way trunks
1	T-1 for outgoing long distance traffic to a TelCove point of presence (POP)
1	paging access card (4 ports required. Does not use spare ports from cards already indicated in the configuration)
1	3 zone all-call paging adapter
30	power failure circuits
1	minimum 4 hour uninterruptible power supply (UPS)

* Awarded suppliers will provide a dedicated PC and printer.
DID trunks are to be T1/PRI.
Two-way trunks standard POTS (copper) line and are analog.
Power failure circuits would be used in the event of a power failure to the PBX.

The awarded suppliers will provide upon agencies request on all four (4) configurations of PBX's: automatic call distribution (ACD) with standard reports, voice processing, station management detailed recording (SMDR), and the Department of Corrections security features.

The awarded suppliers will provide as an option a voice processing system. The system is to be configured for a minimum of 12 universal ports and 10 hours of message storage with 200 mailboxes. All components are included in the cost sections of the contract. Also, included only in configuration 2 is cost data pricing for the following:

- 1 voice processing system (list all other components required for a system)
- 12 universal ports
- 10 hours of message storage
- 200 mailboxes

The awarded suppliers will provide as an option automatic call distribution (ACD). The system must be digital switching, expandable up to a minimum of 80 trunks and 5 functional agent groups, and have a complete reporting system, which includes at a minimum, agency activity, trunk activity and group activity. The system must be able to digitally store multiple announcements. Standard and optional reporting capabilities are included in the cost sections of the contract. All components and all optional capabilities are included in the cost sections of the contract. Also, included only in configuration 2 is cost data pricing for the following:

- 15 trunk system (include all other components required for a system)
 - 9 digital agent phones with headsets
 - 1 supervisory phone/terminal*
- * After the award agencies have the opinion of supplying a PC or Purchase a PC from the awarded vendor.

The awarded suppliers will provide, if required or requested by the end user, voice processing systems capable of automated attendant, audiotex, facsimile and forms software that can query a caller for information to be transcribed at a later time. All components are included in the cost sections of the contract.

The awarded suppliers will provide as an option station message detailed recording (SMDR). Describe the capabilities of the SMDR required in all configurations. System must be a microprocessor controlled, stand-alone telephone accounting system with fully modular software

with the capacity from a minimum of 15,000 to 100,000 call records and fully support all configurations. The system must also be able to furnish, at a minimum, station, account, trunk and summary reports. All standard and all optional reporting capabilities are included in the cost sections of the contract. Also, included only in configuration 2 is cost data pricing for the following:

- 1 SMDR system (include all other components required for a system)
for a minimal 30,000 call records
- 1 printer

Unit Installed Prices for Adds and Deletes (UIPAD) includes all wiring, hardware and labor for installation up to 150 feet homerun.

If cabling is being reused, item 45 cable credits for reused cable will be used as listed in the awarded suppliers UIPAD.

The awarded suppliers will work with an agency to determine if other cabling is required. When an individual agency installing a system determines additional or all new cabling is required, for example in a campus environment, cabling of the systems will be the option of the State. The awarded suppliers will be required to submit an installed cabling pricing when requested by an individual agency of the State. The awarded suppliers will write the cabling technical requirements for the individual project, receive approval from the requesting agency, and bid the cabling project to awarded suppliers list of qualified cabling subcontractors. The awarded suppliers may add up to a maximum 10% administrative markup to the agencies selected cabling subcontractor's bid. This add-on cost will cover all costs incurred in overseeing the project in order to insure satisfactory performance. The cabling subcontractor must at all times have a minimum of 50% of its own workforce who have been employed by the subcontractor for at least six (6) months prior to the start of any cabling project. Agencies will retain the right to accept or reject cabling price proposals. The State also reserves the right to approve or reject, in writing, any subcontractor.

Each PBX system must be equipped to allow the user and awarded supplier to use remote administration in all PBX's furnished under this contract so an agency may elect to perform moves, adds and changes (MAC). Also, awarded suppliers will provide remote maintenance 24/7 that includes monitoring of the PBX for minor and major alarms. A technician will be dispatched for all alarms not cleared remotely, and the local site will be called and notified of the situation.

Each PBX system must be equipped with the capability for the awarded suppliers maintenance center to have the ability to remotely enter all proposed PBX's to perform under contract for trouble shooting problems. In addition, for performing agency requested MACs.

Each PBX must have inherent ISDN (integrated service digital network), ACD (automatic call distributor), and SMDR (station message detail recording), and have IVR (Interactive Voice Response) capabilities and must be T-1 (DS1)/DS3 compatible and must be capable of enabling Telephony Services Application Programmers Interface (TSAPI) or Telephone API. The systems must also have a minimum redundancy level of duplicate central processing units, RAM memory and power supply. The redundant system must be capable of "hot swapping," that is, the ability to change integral parts without any loss of service. The proposed system must be configured non-blocking and provide a platform with open face specifications which will allow intra and internet work videoconferencing and future advances in technology without requiring non-affected elements to be replaced. The proposed PBX must have sufficient memory to handle for example speed calling and the memory capacity must increase proportionately as configurations increase in sizes for example configuration 1 to configuration 4. The awarded suppliers will be responsible for complete system design.

All telephone products must be ADA compliant. Signed into law in 1990, it "prohibits discrimination on the basis of disability in employment, programs and services provided by state and local governments, goods and services provided by private companies, and in commercial facilities." (See the U.S. Department of Justice "ADA Homepage" at <http://www.usdoj.gov/crt/ada/adahom1.htm>.) The Commonwealth wants all awarded suppliers end user hardware - proposed and installed - be ADA compliant. Prior examples were general telephone handset amplifiers, assistive listening devices, and telephones compatible with hearing aids.

Cabling:

Technical Requirements: The scope of the voice cabling support starts at the demarc (or extended demarc), includes the main distribution frame (MDF), any intermediate distribution frames (IDFs), other wiring closets, the jacks located in the user space, and all wiring in between. The demarc being defined as the point between the wiring that comes in from the local telephone company and the wiring used to connect to the telephone system. A demarc might be anything as simple as a RJ-11C jack (one trunk) or an RJ-14C (two trunks) or an RJ-21X (up to 25 trunks or a 66 or 110 punchdown block).

All cabling will be labeled at both ends. Additionally, the patch panel or wiring block will be labeled with the telecommunications outlet number and locations of the remote end. The numbering scheme will be kept uniform and consistent throughout an entire site. Each installation will be required to have up-to-date cable records located at the MDF, IDF, or patch panel. The patch panel or wiring block will be labeled with the telecommunications outlet number and locations of the remote end. Documentation/labeling are typically done in accordance with the TIA 606 standard. These cable records are and will remain the property of the State.

On-site technicians must have all necessary tools and materials to perform cable, jack inserts, terminal box, faceplates, testing and labeling.

All cabling will be installed and tested in accordance with the current version of the EIA/TIA-568 Commercial Building Wiring Standard and all associated reference documents.

Voice circuits are typically terminated with industry standard telecommunications jacks (e.g., RJ11, RJ45). Jacks will be wired according to Electronic Industries Association/Telecommunications Industry Association (EIA/TIA)-568 Commercial Building Wiring Standard EIA/TIA 568B, bulletin TSB-36, or bulletin TSB-40A standards, based on relevancy. The State's minimal cable to be installed is Category 5e unshielded twisted pair (UTP) cable.

Testing may include, but is not limited to, attenuation testing, near-end crosstalk (NEXT) testing, distance testing (time domain reflectometer – TDR), wiremap testing, and tone testing for any and all of the circuits and systems outlined above. The nature of the testing is determined by the devices in use and the circuit type. Testing is typically per TIA/EIA TSB-67 standard and all associated reference documents. As a minimum the test results for each telecommunications outlet location must contain the jack number and wire map. Depending on the nature of the problem attenuation, near end cross talk (NeXT), and cable impedance may also be required. Testing/troubleshooting specific to ISDN includes full channel (analog only) / half channel (analog and digital) measurements (particularly when there is a PBX with ISDN interface), attenuation, line level, peak code word, crosstalk, idle channel noise, bit error testing, error measurement (short and long term), and coder offset. Due to the higher frequency of ISDN, voltage and current measurement alone is insufficient for ISDN testing.

All new cabling is required for each installation and must be type CMR unless cabling is run in air plenum space in which case cabling must be CMP. The awarded supplier may use existing cabling ONLY where it has prior approval from both the using office and the agency

telecommunications management officer (TMO). Contract prices will prevail where cabling runs are home run within 150 feet. The awarded suppliers must notify the agency TMO when cabling runs exceed this distance and any additional cost must be justified in accordance with the length of run. If TMO approves the reuse of existing cabling the awarded suppliers will provide a dollar per jack credit in the bid response. Re-used cabling requires testing by the awarded suppliers. The TMO must also be notified if any additional labor is required because of drilling through concrete, etc. Additional labor of this kind is expected to be minimal. The awarded suppliers must provide a minimum of 25% spare cable pairs at the mainframe and/or IDF. An agency TMO list will be provided upon an awarded supplier's award of a contract. The dollar per jack is not negotiable.

Testing and certification is required to insure all cables and their associated jacks, patch panels and jumpers meet the appropriate standard for the type of network being installed. (i.e., voice, data). The awarded suppliers shall provide a complete copy of all certification test results to the agency TMO.

At a minimum standard all category 5e unshielded twisted pair (UTP) cable will be installed and will adhere to the installation and testing requirements of the current versions of IIA/TIA/TSB-36 and TSB-40.

If cable records are in a facility they must be updated whenever a move/add/change (MAC) is made that affects the internal building wiring or location of a telephone number in any way. These records are to be updated by anyone that is involved in performing any work that changes any of the information in this form.

MDF Cable Record Form Update Process:

The State has updated cable management records to one format for all building housed by the State agencies. The awarded suppliers and awarded supplier's sub-contractor will follow the same formatted cable records when installing systems.

If cable records are in a facility they must be updated whenever a move/add/change (MAC) is made that affects the internal building wiring or location of a telephone number in any way. These records are to be updated by anyone that is involved in performing any work that changes any of the information in this form.

The Cable Management Record Form must be used by all contractors or subcontractor and agency personnel when performing any voice or data telecommunications work that affects cable and wiring information within State facilities. Awarded suppliers will be responsible for filling out the portion of the form which pertains to the work they perform and send the completed form to the agency TMO. The agency TMO will enter the Cable Management Record Form into the Cable Management System into the established State's Integrated Support System (ISS).

Awarded suppliers may be required, in the future, to electronically keep their cable records updated through the Commonwealths Cable Management System. Access will be made available through the website to the current Integrated Support System's (ISS) Cable Management Section for updating purposes only when cable changes and/or new services are requested by an agency. Once access has been given to the awarded suppliers, this information must be provided before billing takes place. In the case of a MAC order where a telephone set is moved, the awarded suppliers are responsible for insuring the cable records are updated. Cable Management Records for updating purposes falls under minor malfunction and will be updated within eight (8) working hours. Until electronic implementation has been made, awarded suppliers will continue to provide hardcopy forms to the TMO's for their updating into the ISS system.

The awarded suppliers will include any free software upgrades during the warranty period. The awarded suppliers will also include free software upgrades after the warranty period when an agency is under a maintenance contract for maintenance services.

The dispatch center will have a toll free number(s) used by the State agencies for placing service calls via telephone. The awarded suppliers will have sufficient telephone lines or will add additional telephone lines and telephone operators to meet the needs of the State in supporting the awarded supplier's dispatch center. The State will not call a manufactures telephone number or an 800 for reporting telephone system problems, the awarded suppliers will have a centralized dispatch center. The awarded suppliers will have sufficient operators to take the agencies telephone calls.

All parts used in providing maintenance will be new or warranted as new, and meet or exceed Original Equipment Manufacturer (OEM) specifications.

Awarded suppliers will have trained, experience and certificated to qualify technicians assigned to work on a project under the contract resulting from this bid.

Awarded suppliers will have on-hand inventory of replacement parts.

Awarded suppliers will have a plan in the event a required part is out of stock and/or unavailable to the service technician performing maintenance work.

Surge/transient protection is mandatory for each installation and must be included in all systems installed.

The awarded suppliers will provide a maintenance report if requested by the agency.

Requirements for the Department of Corrections:

Awarded suppliers must supply the following requirements for the Department of Corrections.

1. Watch Call/Head Count Conference: The PBX must have the capability of automatically conferencing a minimum of twenty-one (21) participants by dialing a pre-defined access code.
2. Rip-Out and Off-Hook Alarms: The PBX must have the capability when any type of phone (analog and digital) that is ripped-out or goes off-hook. Security personnel must receive audio and visual rip-out and off-hook alarms at the Control Center within a maximum of 10 seconds after the phone is off-hook or when the cable is severed or ripped out of the jack. Some PBX manufacturers don't have the capability of providing the required capabilities with analog phones. The solution found to provide enhanced Line Lock Out alarm reporting capability for analog single line phones was a Ramex unit 25 ports wired with frame and misc. hardware with two (2) pairs from each set appearing on MDF.
3. Head Count Conference with Printer: Provides real time data for the watch call/head count conference and rip-out and off-hook alarms. The data will include at least the following information: extension number, location, date and time of the event, and the text that identifies whether it is a conference or alarm.

Project and Contract Management:

Liquidated Damages are imposed on the awarded suppliers when they cannot install a system within sixty (60) days from the date of issuance of a purchase order.

It will be the awarded suppliers responsibility in coordinating all telephone matters between the using agency and the serving ILEC or CLEC.

Awarded suppliers installation will take place without any loss of service.

A project manager designated by the awarded suppliers in the response shall be responsible for coordination of all activities between the Issuing Office, using agency and awarded suppliers and the awarded supplier's subcontractors. The project manager assigned to the State project will not be removed from the project without written consent from the State.

Awarded suppliers will install the most advance feature package(s)/software for each system installed.

Awarded suppliers will guarantee that installation of the system will be in full compliance with all federal, State, and local government building and fire statues, codes, regulations as well as industry standards.

The awarded suppliers will install a system when telephones are in multiple buildings and provide protection both for the system and employees from high voltage electrical surge cased when lightning strikes the cabling between the buildings.

Training:

The awarded suppliers will provide a training plan for the office technical staff that will support the system administration during the life of both the initial warranty period and any subsequent maintenance contracts. Training will include the process for completing moves, adds and changes (MAC) for the general phone systems, voice mail, automatic call distribution (ACD), call accounting packages, and other peripherals purchased from the contract.

Training classes will be provided for the office technical staff, executive staff, and general staff at the location where the telephone system is being installed. Training will be conducted for those employees who work shift work during their work hours. Examples of training elements to be trained are: all varieties of telephones, attendant consoles, voice mail, automatic call distribution (ACD), administrative terminal, etc. The training dates will be coordinated between the awarded suppliers and the using agency.

Courses must be completed prior to activation of the telephone system and peripheral systems. Specific courses for the administrator of the voice mail, ACD, SMDR and attendant console training must be conducted separately.

Training documentation will be provided to each system installed by the awarded suppliers. The awarded suppliers will develop, update and maintain all training documentation.

Awarded suppliers will provide unlimited follow-up training as required by the agency. After initial installation, training will be required when peripherals are added, for example voice mail, ACD, etc., to an installed system. Provide full information on follow-up training and associated cost(s) after installation. Training will be required when peripherals are added, for example voice mail, ACD, etc., to an installed system and cost to be included in the cost data section of the bid.

New Equipment: All equipment installed statewide will be new. All equipment installed will be fully covered by the warranty.

Site Visit: Since various using agencies of the State will install telephone systems, and the proposed locations of these systems are unknown to the Issuing Office until time of notification by the using agency, the following procedures will ensure after the awarded suppliers are notified by the using agency of its intention to procure:

The awarded suppliers will conduct a SITE VISIT within five (5) business days upon notification from the using agency.

If at the time of the SITE VISIT, the awarded suppliers determine that there are unusual installation factors that will require additional cost which will subsequently affect the awarded supplier's total price, awarded suppliers will submit, in writing to the requesting agency, a specific explanation of the additional cost and specific reasons for same.

Awarded suppliers will complete a PBX price reconciliation sheet for the agency listing the quantities, equipment, maintenance, etc. that will be used for issuing a Purchase Order (PO). The awarded suppliers will include a product brochure with the PBX price reconciliation sheet and all pertinent bid cost sheets.

The Purchase Order (PO) will include all components of the telephone system, plus any additional costs that have been approved by the agency. The PO will be issued to the awarded suppliers by the using agency for each PBX installation.

Negotiate System Design: The Issuing Office reserves the right to negotiate system design changes prior to issuance of a Purchase Order (PO). If such changes in a basic system are required by the using agency, the awarded suppliers will be given the right to alter costs upon agreement of the using agency and the Issuing Office. The State reserves the right to require the awarded suppliers to furnish additional or lesser quantities of equipment or features in order to reflect any system requirements, which may become known after issuing the bid. The unit prices furnished with the bid proposals will be used to modify the awarded supplier's quoted price.

Liquidated Damages:

All contractual arrangements with the awarded suppliers will contain a schedule and timetable for installation. The maximum time for any installation to start will be sixty (60) days from the date of issuance of a Purchase Order to the awarded suppliers. If for any reason (except those beyond the control of the awarded suppliers), the defined installation date is not met, the awarded suppliers shall be liable to the State for damages which shall be calculated at the rate of one-half of one percent per business day of delinquency, but not to exceed fifty (50) percent of the cash price of the system.

Maintenance Liquidated Damages:

A. General:

The awarded suppliers must provide facilities to receive repair calls on a 24-hour per day basis, 365 days of the year, during the warranty period, the contract period, and for any years beyond the contract period i.e.; a total of five (5) years.

The terms "working hours" and "Business Day" shall mean 8:00 A.M. to 5:00 P.M., Monday through Friday, excluding State holidays.

Liquidated damage charges as specified in the following paragraphs will not be assessed where performance of the awarded supplier's obligation is prevented or delayed by acts of God, freight embargoes, strikes, fire or acts of government, provided the vendor notifies the using agency of such circumstances and the using agency reasonably determines that the failure to perform

within the specified time was beyond the control and without the fault or negligence of the awarded suppliers. The dollar amount of liquidated damages being imposed by the State may be deducted from payment due, or to become due, to the awarded suppliers or may be billed separately.

B. Routine Services:

To provide **routine services** to the equipment, the awarded suppliers shall respond, between 8:00 A.M. and 5:00 P.M., Monday through Friday, within eight (8) working hours after notification.

For the purpose of this contract, routine services shall be defined as, but not limited to, malfunction of any equipment or cabling which is not affecting services as outlined in paragraphs C and D below.

C. Minor Malfunctions:

Following the cutover date, the awarded suppliers shall respond, between 8:00 A.M. and 5:00 P.M, Monday through Friday, to repair **minor malfunctions** in the equipment and cabling within eight (8) working hours after notification. The term "respond" as used shall mean arriving at the site of the minor malfunction. If the awarded suppliers fail to respond within eight (8) working hours, the awarded suppliers will pay the State \$100.00 as initial liquidated damages and \$10.00 for each and every working hour, full sixty (60) minutes, of delay after the first eight (8) working hours. All repairs and/or replacements shall be started within twenty-four (24) working hours following the response to notification of a minor malfunction. In the event the twenty-four (24) working hour period expires at a time other than on a business day, the awarded suppliers must start repairs or replacement by 8:00 A.M. on the next business day. The awarded suppliers must exhibit a best efforts approach to the completion of the repairs or replacement during the first twenty-four (24) working hours following initial response to notification. If the awarded suppliers fail to exhibit best efforts as determined by the agency telecommunications management officer (TMO) and concurred in by the contract administrator, to complete the repairs and/or replacement of the malfunctioning equipment within twenty-four (24) working hours following initial response, the awarded suppliers will pay the State as liquidated damages the sum of \$100.00 for each and every completed calendar of delay.

For the purpose of this contract, a minor malfunction shall be defined as, but not limited to, an occurrence of any or all of the following:

- a. A failure of between 10% and up to 39% of the trunks or a total number of three (3) trunks or greater to function as normally intended.
- b. A failure of between 10% and up to 39% of the stations or equipment or a total of three (3) stations or greater.
- c. Any failure of supervisor and answering positions.
- d. A failure of any peripheral equipment, which renders it incapable of functioning as it was intended to and/or has an impact on paragraphs a. & b. above. This includes features such as, ACD, auto attendant, voice mail, SMDR, etc.
- e. An indication of minor alarm condition in any of the switch equipment, if the switch provides the alarm feature.

D. Major Malfunctions:

Following the cutover date, the awarded suppliers shall respond to a **major malfunction**, including malfunctions of the key service unit (KSU)/switch, trunk/station cards, peripheral equipment and cable, by arriving at the site of the malfunction on a twenty-four (24) hour per day basis, 365 days of the year, within two (2) hours after notification. If the awarded suppliers fail to respond within two (2) hours, the awarded suppliers will pay the State \$200.00 as initial liquidated damages and \$20.00 for each and every working hour, full sixty (60) minutes, after the first two (2) hours. All repairs and/or replacements shall be started within twenty-four (24) hours following the response to notification of a major malfunction and the awarded suppliers must exhibit a best efforts approach to completion of the repairs and/or replacement of the malfunctioning equipment during the first twenty-four (24) working hours following response to notification. If the awarded suppliers fail to exhibit best efforts as determined by the agency telecommunications management officer (TMO) and concurred in by the contract administrator, to complete the repairs or replacement within twenty-four (24) working hours following initial response to notification, the awarded suppliers will pay the State as liquidated damages the sum of \$200.00 for each and every completed calendar of delay.

For the purchase of this contract, a major malfunction shall be defined as, but not limited to, an occurrence of any or all of the following:

- a. A failure of the system, its common equipment or power supply, which renders it incapable of performing its normal functions.
- b. A failure of any or all of the consoles (if supplied) which prevents the attendant(s) from handling incoming or outgoing calls.
- c. A failure of any peripheral equipment, which renders it incapable of functioning as it was intended to and/or has an impact on paragraphs d. & e. below. This includes features such as ACD, auto attendant, voice mail, paging system (for the Department of Public Welfare), SMDR, Department of Corrections Security Features, etc.
- d. A failure of 40% or more of the trunks to function as they are normally intended to.
- e. A failure of 40% or more of the stations to function as they are normally intended to.
- f. An indication of a major alarm condition in any of the switch equipment, if the switch provides the alarm feature.

Awarded suppliers are to revise the term "respond" as used shall mean arriving on site of the malfunction, or beginning remote diagnostic on the equipment located at the site of the malfunction.

Standards of Performance: Standards of Performance criteria are those standards, which assure compliance with the contract. Testing, administered by personnel of the agency, after the system is installed, will examine normally accepted standards of workmanship, construction and electrical codes, and performance testing to assure compliance with contractual specifications and requirements.

The awarded supplier's system(s) must successfully complete a Standard of Performance. The system(s) must operate at 99% up time for a total of fifteen (15) continuous days before the State will accept the system(s).

Test and Acceptance: A test and acceptance will be conducted by the Governor's Office of Administration, Bureau of Infrastructure & Operations (BIO) as soon as practicable after notification of cutover by the awarded suppliers. Warranty will not begin until the PBX system has met the standard of performance and accepted by BIO by signing the test and acceptance certificate. Reference attachment 13 for the acceptance certificate. The awarded suppliers will email the following information before a test and acceptance site visit is scheduled to ra-voiceoperations_support@state.pa.us.

(1) All agencies purchase orders that were issued to install the system.

(2) Awarded suppliers will compile one list of the installed system components. The list will have separate columns listing purchased components; installed components and customer spare components and associated pricing.

(3) If cabling was bid as an option, the awarded suppliers will provide a list of all cabling components installed and associated pricing, and information verifying cable testing was completed and complies with awarded supplier's pricing.

(4) A meeting will be scheduled at the agency site where the PBX system was installed. Attendees at the meeting will include the awarded supplier's technical and operations staff, local agency personnel and agency personnel from Harrisburg, and the representative from BIO. At the meeting discussions regarding the awarded suppliers installation, project management, technical questions, operations questions, training, problems, other questions that may arise, and verification that the agency knows the awarded suppliers trouble reporting telephone numbers and the awarded suppliers escalation procedures, etc.

- a. Then the meeting will move to the PBX room to verify the list of components that were installed. If all the agency and BIO are satisfied with operation, system, and all components that were verified, the test and acceptance certificate will be signed.
- b. If any problems and/or items are missing, the information will be written down by the awarded suppliers and will be resolved in a timely matter. Only when all items and/or issues are resolved will the test and acceptance certificate be signed.
- c. BIO staff will also provide the awarded suppliers with the opinion of counsel required documents when an agency is financing a system. Reference attachment 14 from the bid, Appendix To Contract No. 5805-55, Installment Purchase Option, which also includes the test and acceptance certificate.

Purchase of Additional Equipment after Initial Installation: For a period of five (5) years from the date of cutover of a system installed by the awarded suppliers, the awarded suppliers shall, upon receipt of order(s) from the State agencies, furnish the using agency with additional telephones and/or peripheral telephone equipment for the system originally installed by the awarded suppliers. The awarded suppliers total cost for the purchase and installation of these additional telephones and/or peripheral equipment shall not exceed the installed price for that item of the awarded suppliers bid at an increase of no more than 5% per year from the date of installation.

New Technology: The State reserves the right to negotiate a rate with the awarded suppliers for any new software, software upgrades and new equipment type not identified in the original bid.

Prime Awarded Suppliers Responsibilities: The awarded suppliers will be required to assume responsibilities for delivery, installation, and maintenance of all equipment, systems, subsystems, and support services offered in the bid whether or not they are manufactured or produced by the

awarded suppliers. Further, the State will consider the awarded suppliers to be the sole point of contact with regard to contractual matters.

Substitution: If during the term of the contract new equipment and/or software become available, the awarded suppliers may, with the written approval of the issuing office, substitute new equipment or software if it offers features equal to or greater than, and at a cost that is equal to or less than, the original equipment or software.

Management Reports: Awarded suppliers shall furnish cumulative monthly management reports, which shall be emailed to Georgia Baer at gbaer@state.pa.us. The management report will consist of a summary of installed telephone systems provided for all counties in Pennsylvania under contract with the awarded suppliers. The summary is to include, at a minimum, agency name, agency address, system installed, installed date, system configurations (installed, equipped for, and maximum growth) and cost of the system.

The second report, the awarded suppliers will design and provide a maintenance management report. The report will be associated with the plan for dispatch center logging, tracking, and updating State service calls as proposed in the contract. The awarded suppliers will manage the Maintenance Liquidated Damages not only will it use the report, but will also provide a copy to Georgia Baer a mutable monthly report structure emailed to gbaer@state.pa.us

Contract Requirements: As a result of this contract, the contractual agreement with the selected awarded suppliers will in no way obligate the State to purchase (either by outright purchase or installment) any telephone systems under this contract. The State agrees, in entering into any contract, to purchase only such system in such quantities as represent its actual requirements as determined by the State. The actual number of systems purchased in any particular county will depend upon the State requirements in that county.

Installment Purchase Option

Installment Purchase Option, including Exhibits A through D below, contains the terms and conditions for the installment purchase option. These terms and conditions are not subject to negotiation.

I. General.

- (A) This contract 5805-55 requires contractors to offer equipment covered by the contract through an installment purchase as outlined in Exhibit B. Further, an installment purchase ("Installment Purchase") from the contractor, shall also be in accordance with the following terms (in addition to the terms and conditions of Contract No. 5805-55). The ordering State agency shall indicate its election to make an outright purchase or an Installment Purchase on the applicable purchase order issued to the contractor.
- (B) The contractor may assign such purchase order and Installment Purchase to a third party ("Initial Assignee"), who will fund the purchase of the equipment and assume the right to receive all payments thereunder. The consent of the State to such assignment by the contractor shall not be required. The contractor shall notify the State of its assignment to an Initial Assignee in its acknowledgement to the State agency of the purchase order and by providing the State agency with a copy of an assignment agreement between the contractor and the Initial Assignee.
- (C) Notwithstanding any provisions to the contrary in Contract 5805-55, in the event of an assignment of an Installment Purchase to an Initial Assignee, the Initial Assignee shall only be bound to the obligations of the contractor as they are specified in this Appendix and shall not be responsible for any additional representations, warranties, covenants or obligations of the contractor as provided in the remainder of Contract 5805-55. The State waives any claims it may have against the initial Assignee for any loss, damage or expense caused by the equipment or any defect therein or use or maintenance thereof. The State acknowledges that Initial Assignee is not the supplier of the equipment and is not responsible for its selection or installation. Once an acceptance certificate in the form attached hereto as Exhibit A is executed by the ordering State agency and is received by Initial Assignee, if any portion of the equipment is unsatisfactory for any reason, the ordering State agency shall, nevertheless, continue to make payments under the applicable Installment Purchase and shall make any claim against the contractor or the manufacture, but not against the Initial Assignee or any subsequent assignee of the Initial Assignee.
- (D) The rights of the Initial Assignee and any subsequent assignee to receive payments under an Installment Purchase are absolute and unconditional and shall not be affected by any right of set-off or defense of any kind whatsoever once an acceptance certificate in the form attached hereto as Exhibit A is executed by the ordering State agency and is received by Initial Assignee.

II. Pricing Plans. The contractor agrees to provide the equipment covered by Contract No. 5805-55 through a forth-eight (48) month Installation Purchase in additional to outright purchase.

III. Term. The term of each Installment Purchase shall commence on the date the equipment is accepted by the ordering State agency (as evidenced by an acceptance

certificate in the form attached hereto as Exhibit A) and shall continue for forty-eight (48) months as designated on the purchase order.

IV. Rates. The contractor agrees to provide equipment through the forty-eight (48) month pricing plan at interest rates, that will be established by the contractor and provide to the State on a quarterly basis, at the beginning of each calendar quarter, in accordance with the following provisions. The rates established for a given calendar quarter shall be effective for all equipment accepted by a State agency during the applicable quarter. The rates for the initial quarter following the execution of this Contract by the parties ("Base Rate") are set forth in Exhibit D hereto. The "Initial Index Rate", which represents the average interest rate of two (2) and three (3) year U.S. Treasury Bills at the time the Base Rates are issued, is also set forth in Exhibit D. Through the rates for all subsequent calendar quarters will be adjusted based on the difference between the Initial Index Rate and the average interest rate of two (2) and three (3) year U.S. Treasury Notes as reported by the Federal Reserve Board and published in the "Wall Street Journal" for the week proceeding the Monday closest to forty (40) days prior to the start of the next calendar quarter (The "Rate Adjustment Date"). The Base Rates will be adjusted (up or down) by the amounts ("Adjustment Amounts") set forth in Exhibit D for each one hundred (100) basis points change in the above-stated average Treasury Bills rate, and will be prorated for changes of other than one hundred (100) basis points. The Base Rates and subsequent rates may be stated for different categories of technology as well as different manufacturers of equipment. The applicable interest rate, and the equipment cost (as determined by Contract 5805-55) shall then be factored together to determine the applicable installment purchase amount.

V. Payments.

A. Full term intention. The ordering State agency shall pay the applicable monthly or annual Installment Purchase payment for the equipment, as shown on the payment schedule (in substantially the forms attached hereto as Exhibit B), which must be signed by the contractor or Initial Assignee (if applicable) and the State agency, and attached to the purchase order. Payment shall be made by the ordering State agency, for the full term, unless the purchase order is terminated by the State agency for contractor default under Section VI (F) (2) or herein or for non-appropriation of funds.

B. Non-appropriation. The State agency's obligation is payable only and solely from funds allotted for the purpose of the Installment Purchase. If sufficient funds are not appropriated for continuation of performance under any Installment Purchase for any fiscal year subsequent to the one in which the purchase order was issued, the State agency may return the equipment to the contractor or Initial Assignee (if applicable) and thereafter be released of all further obligations, provided: (i) The State agency delivers unencumbered title to the equipment to the contractor or initial Assignee (if applicable), (ii) The equipment is returned to the contractor or Initial Assignee (if applicable) in good condition, reasonable wear and tear excepted, and (iii) thirty (30) days written notice is given to the contractor or Initial Assignee (if applicable) stating the failure of appropriations as the reason for return and certifying that the equipment is not being replaced by similar equipment from another vendor. In the event the State agency returns the equipment for failure of appropriations, all amounts then due to the contractor or Initial Assignee (if applicable) through the end of the fiscal year from which sufficient funds have been appropriated shall be paid by the State agency.

VI. Title and Security Interest. Title to the equipment passes to the State at the time and place of delivery to the State of each unit of equipment. The contractor or its duly authorized assignee shall have a purchase money security interest in the equipment, its

substitutions, replacements, accessions and modifications, until payment of all installments as set forth in the payment schedule are made. Upon payment of the final installment, or any concluding payment option, the contractor or his duly authorized assignee shall have no further interest in the equipment. The equipment shall remain personal property and shall not become a fixture or affixed to real property. At the request of the contractor or Initial assignee (if applicable) the State will join the contractor or Initial Assignee in executing one or more financing statements, pursuant to the Uniform Commercial Code or other registration law applicable to the location of the equipment. The contractor or Initial Assignee (if applicable) will pay the cost of filing the financing statement(s) in all public offices wherever filing is deemed by the contractor or Initial Assignee to be necessary or desirable. The State will keep the equipment free and clear of all encumbrances except the contractor's or any assignee's security interest.

VII. Assumption of Risks.

A. The State agency shall, after acceptance of the equipment, assume and bear the risk of loss, damage, or theft of the equipment all components parts thereof caused by Act of God and its own employees, agents, or others except the contractor or (if applicable) Initial Assignee. No such loss or damage to the equipment shall impair any obligation of the State agency, which shall continue in full force and effect except as hereinafter provided. In the event that all or part of the equipment shall, as a result of the above-mentioned causes, become lost, stolen, destroyed, or rendered irreparably unusable or damaged, as reasonably determined by the State agency, then the State agency shall provide the contractor or (if applicable) Initial Assignee with written notice in regard thereto and, at its option, either (a) replace the equipment with like equipment, or (b) pay pro rata to the contractor or (if applicable) Initial Assignee all payments then currently due in the amount indicated in payment schedule plus the pro rata principal portion of remaining installments. The pro rata principal portion of remaining installment payments is that percentage of the principal portion of remaining installment payments as of the date of payment that the cost of the units of the equipment lost, stolen, destroyed, or rendered irreparably unusable or damaged bears to the total cost of the equipment determined by the amounts set forth in the purchase order.

B. The State assumes all risks and liabilities for injury to or death of any person or damage to any property, in any manner arising out of possession, use, operation, condition, or storage of any piece of equipment by the State agency whether such injury or death be with respect to agents or employees of the State or of third parties, and whether such property damage be to the State's property or the property of others; provided, however, that said damage or injury results from the negligence of State, its agents or employees, and provided that judgment has been obtained against the State. This provision shall not be construed to limit the sovereign immunity of the State, the Department of General Services or any State agency.

VIII. Insurance. The State shall, during the term of the Installment Purchase, self-insure with respect to the risks which it has assumed under Section VII above including risks of damage or destruction to the equipment caused by fire, boiler explosion, flood and flood-related hazards, or any other natural disasters and risks of public liability and damage under Act 142 of October 5, 1980, P.L. 693, 42 Pa. C.S.A. Section 8522.

IX. Assignment. The State shall not assign any Installment Purchase hereunder or any interest therein without the prior written consent of the contractor or its assignee. The contractor may assign the purchase order and the Installment Purchase and/or transfer security interests in the equipment to an Initial Assignee and such Initial Assignee may

further assign an Installment Purchase and/or grant a security interest therein to a subsequent assignee without the consent of the State. Any other assignment by the contractor shall require the prior written consent of the State. Upon notice to the ordering State agency, the contractor may assign installment payments under the Installment Purchase to a third party.

X. Early Payment Option. The State agency shall have the right, during the term of the Installment Purchase, to exercise its option to purchase the equipment early upon payment of an amount equal to the concluding payment option as of such date as set forth on the payment schedule and upon the giving of notice to the contractor or Initial Assignee (if applicable) of such intention of the State at least thirty (30) days prior to the date upon which such right will be exercised. After all payments have been made pursuant to the payment schedule including any concluding payment option, the contractor or its assignees shall have no further interest in and to the equipment. The contractor, Initial Assignee or any subsequent assignee will execute and file, at its own expense, the standard UCC release form relinquishing any and all security interests.

XI. Default.

A. If the State (1) does not pay an installment payment within thirty (30) days after the due date and such non-payment continues for fifteen (15) days after receipt of written notice from the contractor or Initial Assignee (if applicable) that the State Agency is delinquent in payment of any installment; (2) breaches any other provision under this Appendix and such breach continues for fifteen (15) days after receipt of written notice thereof from the contractor or Initial Assignee (if applicable); or (3) files any petition or proceeding (or has a petition or proceeding filed against it) under any bankruptcy, insolvency or similar law, the contractor or its assignee may pursue and enforce one of the following remedies:

1. Terminate the applicable purchase order and take possession of any or all items of equipment without any court order or other process of law and for such purpose. The contractor or its assignee may enter upon the premises where the equipment may be and may remove the same therefrom upon written notice of its intention to do same, without being liable to any suit or action or other proceeding by the State. The contractor or its assignee may, at its option, sell the equipment at public or private sale for cash or credit and may become the purchaser at such sale. The State agency shall be liable for all accrued and unpaid installments, if any, the expense of retaking possession and the removal of the equipment, in addition to the balance of the payments provided for herein, less the net proceeds of the sale at a fair market value of the equipment after deducting all costs of taking, storage, repair, and sale. When the equipment is returned to the contractor or its assignee, it shall include only those items that were originally purchased as per the contract specifications.

2. Recover from the State agency all installment payments then due and all remaining installment payments due under the purchase order.

B. In the event of default by the contractor, the State may pursue one or more of the following remedies.

1. If the installment payments under the purchase order have been assigned to an Initial Assignee, the State shall continue to make installment payments for those units of equipment which have been delivered for which acceptance certificates have been received, and cancel its order without liability for payment for those units which have not been delivered and for which acceptance certificates have not been received. The amount of the installment payments shown in the payment schedule will be recalculated, however, to take into consideration and pay for the actual number of units which were delivered and for which acceptance certificates have been received. If no acceptable units of equipment have been delivered and accepted, the State agency may terminate the purchase order without liability to make any payments.
 2. If the payments under this agreement have not been assigned to an Initial Assignee, the State agency may setoff or counterclaim against its obligation to make the payments any and all damages incurred by the State as a result of the contractor's default.
- XII. Compliance with Internal Revenue Code. The contractor or its assignee must, if it intends to provide tax exempt financing, file, in timely fashion, any reports that must be filed with the Internal Revenue Service with respect to the order under Section 148 or 149 of the Internal Revenue Code (IRC). The State shall cooperate with the contractor or its assignee in the preparation and execution of these documents. The State shall also keep a copy of each notification of assignment with the State's counterpart of the order and shall not, during the term of the Installment Purchase, permit the equipment to be directly or indirectly used for a private business use within the meaning of Section 141 of the IRC. The State represents that it and each ordering State agency that enters into a Installment Purchase hereunder qualifies as a State or political subdivision of a State for the purpose of Section 103(a) of the IRC. Any misrepresentation of such status under Section 103(a) shall constitute an event of default by the State pursuant to paragraphs VI(K) and VII(F). If (a) the Internal Revenue Service rules that the State or any ordering State agency does not so qualify under Section 103(a) of the IRC, or (b) the State fails to cooperate with the contractor or Initial Assignee in the preparation and execution of any reports required under Section 148 or 149 of the IRC (including 8038G and 8038GC forms), the State will pay the contractor or Initial Assignee (if applicable) upon demand, a sum to be determined by the contractor or Initial Assignee sufficient to return the contractor or Initial Assignee (if applicable) to the economic results it would otherwise have received.
- XIII Other Documents. Upon request from the contractor or Initial Assignee the State will sign properly completed UCC-1 Forms, as appropriate, and opinions of counsel (in the form attached hereto as Exhibit C). The contractor or Initial Assignee at its expense shall be responsible for completing these forms and filing them with the appropriate offices/parties.
- XIV. Use and Location of Equipment and Alterations. The State agency shall keep the equipment under an Installment Purchase within the confines of the State of Pennsylvania. The State agency will inform the contractor or the Initial Assignee of the location of the equipment upon request. The State agency will not use or deal with the equipment in any manner which is inconsistent with the terms of the Contract or any

applicable laws and regulations. The equipment will not be misused, abused, wasted or allowed to deteriorate except for ordinary wear and tear resulting from its intended use. No alterations, changes, or modifications to the equipment shall be made without the approval of the contractor or Initial Assignee (if applicable). Once approval is obtained and an alteration, change or modification is completed, the State will not be required to return the equipment to its original condition, if the equipment is returned to the Contractor, Initial Assignee or subsequent assignee as allowed herein.

- XV. **Warranty Disclaimer.** IN THE EVENT CONTRACTOR ASSIGNS A INSTALLMENT PURCHASE HEREUNDER TO AN INITIAL ASSIGNEE, SUCH INITIAL ASSIGNEE AND ANY SUBSEQUENT ASSIGNEE MAKE NO WARRANTY EXPRESS OR IMPLIED, AS TO ANY MATTER WHATSOEVER, INCLUDING BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. AS TO THE INITIAL ASSIGNEE AND ANY SUBSEQUENT ASSIGNEE, THE STATE TAKES THE EQUIPMENT "AS IS." IN NO EVENT SHALL THE INITIAL ASSIGNEE OR ANY SUBSEQUENT ASSIGNEE HAVE ANY LIABILITY FOR, NOR SHALL THE STATE HAVE ANY REMEDY AGAINST THE INITIAL ASSIGNEE OR ANY SUBSEQUENT ASSIGNEE FOR, CONSEQUENTIAL DAMAGES, ANY LOSS OF SAVINGS OR LOSS OF USE.
- VI. **Governing Law: Severability.** All Installment Purchases hereunder shall be governed by and construed in accordance with the laws of the State of Pennsylvania, however the parties agree that Article 2A of the Uniform Commercial Code shall not apply or govern transactions under this Appendix. If any provision of this Appendix is held to be invalid or unenforceable, all other provisions shall remain in effect. All disputes arising in connection with this Appendix shall be resolved in accordance with Section 22 of the General Conditions And Instructions To Bidders contained in Contract No. 5805-55.
- VII. **Notices.** Service of all notices under this Appendix shall be sufficient if delivered by hand or overnight courier or mailed to the State at the address set forth in the applicable purchase order, or to the contractor or Initial Assignee (if applicable) at the address set forth in its acknowledgment to the purchase order (or any document attached thereto). Notices by mail shall be effective when deposited in the U.S. mail, duly addressed and postage prepaid. Notices delivered by hand or by overnight courier shall be effective when actually received.
- VIII. **Contract No. 5805-55 Terms.** The terms and conditions of this Appendix are in addition to the terms and conditions of Contract No. 5805-55 except to the extent the contractor assigns a Installment Purchase hereunder to an Initial Assignee, in which case the Initial Assignee shall only be bound to the obligations of the contractor indicated in this Appendix and shall not be responsible for any additional representations, warranties, covenants or obligations of the contractor as provided by the current terms and conditions of Contract 5805-55. To the extent that there is a conflict between the terms and conditions of Contract No. 5805-55 and the terms and conditions of this Appendix, the terms and conditions of this Appendix shall prevail to the extent that an installment purchase option is selected by the ordering State Agency. All other terms and conditions of Contract No. 5805-55 which are not amended by this appendix, shall remain in full force and effect.

**EXHIBIT C
OPINION OF COUNSEL**

DATE: _____

Ladies and Gentlemen:

As counsel for the State of Pennsylvania, Department of General Services, I am familiar with Contract No. 5805-55 (the "Agreement") dated as of _____, 19 ____, and Purchase Order No. _____, dated _____ (both referred to as the "Agreement"), between _____ as the contractor and the State of Pennsylvania, including all exhibits and attachments to the Agreement.

Based on the examination of these and such other documents, records, and papers as I deemed to be relevant and necessary as the basis for my opinion set forth below, It is my opinion that:

1. The State is authorized to enter into the transaction contemplated by the Agreement and to carry out its obligations thereunder.
2. The Agreement set forth above has been duly authorized, executed, and delivered by the State and constitutes a legal, valid, and binding agreement enforceable in accordance with its term.
3. No further approval, consent, or withholding of objections is required from any federal, state, or local governmental authority with respect to the entering into or performance by the State of the Agreement and the transactions contemplated thereby.
4. The entering into and performance of the Agreement and other related documents will not violate any judgment, order, law, or regulation applicable to the State or result in any breach of, or constitute a default under, or result in the creation of, any lien, charge, security interest, or other encumbrance upon any assets of the State or the equipment pursuant to any indenture, mortgage,

deed or trust, bank loan, credit agreement or other instrument by which the State is a party or by which it or its assets may be bound.

5. There are no actions, suits, or proceedings pending or, to the knowledge of the State, threatened against or affecting the State, in any court or before any governmental commission board or authority which, if adversely determined, will have a material adverse effect on the ability of the State to perform its obligations under the Agreement.
6. All required public bidding procedures regarding the award of the Agreement have been followed by the State.
7. The State is self-insured and is authorized to self-insure the equipment with respect to the risks assumed by this Agreement.

Sincerely,

Assistant Counsel

Exhibit "D"

FIRST QUARTER ASSUMPTIONS:

BASE INSTALLMENT PURCHASE RATES: 48 MONTHS = _____% PERCENT

INSTALLMENT PURCHASE ADJUSTMENT FACTOR = _____% PERCENT

SECOND QUARTER ASSUMPTIONS:

AVERAGE TREASURY BILLS = _____% PERCENT

(INDEX RATE _____) PLUS (SECOND QUARTER ADJUSTMENT RATE) DIFFERENCE
BETWEEN FIRST QUARTER & SECOND QUARTER _____ EQUALS AVERAGE TREASURY
BILLS NUMBER.

ADJUSTED INSTALLMENT PURCHASE RATE:

48 MONTHS = (BASE INSTALLMENT PURCHASE RATE) _____ PLUS
((SECOND QUARTER ADJUSTMENT RATE) X (INSTALLMENT PURCHASE
ADJUSTMENT FACTOR)) = (EQUALS) NEW INSTALLMENT PURCHASE
RATE TOTAL

SPECIAL TERMS AND CONDITIONS FOR THE ACQUISITION OF ELECTRONIC DATA PROCESSING EQUIPMENT AND SOFTWARE

These Special Terms and Conditions for the acquisition of electronic data processing equipment and software supplement the General Conditions and Instructions to Bidders. If there are any conflicts or discrepancies, these Special Terms and Conditions shall prevail.

1. LICENSE FOR SOFTWARE PRODUCTS

The successful bidder shall grant to the Commonwealth a nonexclusive non-transferable perpetual license to use each software product including related materials provided therewith. The license granted for each software product is effective from the acceptance date and shall remain in force, unless terminated by the Contractor for failure to comply with any of the conditions hereof, for as long as the Commonwealth retains the equipment or software or until the Commonwealth discontinues the use of such equipment or software product(s). Upon any termination or expiration of the license, the Commonwealth shall return to the successful bidder or destroy all copies of the software.

2. PROPERTY OF SUCCESSFUL BIDDER

All software products, including related materials provided therewith, shall remain the property of, and is proprietary to, the successful bidder and the Commonwealth shall, to the best of its ability, keep confidential and protect from unauthorized disclosure each licensed software product.

3. USE

The Commonwealth shall have the right to use each software product or any portion thereof on the system or only a portion of the system for which it was acquired under the contract. If the Commonwealth is temporarily unable to use a software product on its system because of conditions beyond the Commonwealth's control, the license may be temporarily transferred to permit the Commonwealth to use the software product on another system.

4. REPRODUCTIONS AND COPIES

The Commonwealth shall have the right, with the prior consent of the successful bidder, which shall not be unreasonably withheld, to reproduce or copy any portion of each software product in machine readable form into machine readable or printed form as necessary to support the Commonwealth's own use of each software product on the system for which it was acquired. The Commonwealth shall reproduce and include copyright or trade secret notices of any copies, in whole or in part, in any form, including partial copies in modifications of software products made herein in compliance with any applicable instructions provided by the successful bidder. All copies of each software product made by the Commonwealth are the property of the successful bidder.

5. MODIFICATIONS

The Commonwealth may modify any software product for its own use and at its own expense and responsibility to meet its specific requirements. Any portion of a software product included in such modifications shall be subject to the same conditions and limitations as have been designated herein for the original software product. Any modifications of a software product by the Commonwealth voids the warranty for any affected function of the original software product and the successful bidder will only be required to continue maintenance of the unmodified parts of the software product. To the extent that they do not contain any proprietary information, the Commonwealth shall have all ownership rights in any application software developed by the Commonwealth or modification to such software and associated documentation for which the Contractor furnishes technical support.

6. TERMINATION

Commonwealth may terminate a license upon thirty (30) days prior written notice. The successful bidder may terminate a license upon written notice only if the Commonwealth fails to comply with any of the terms and conditions of the agreement after the successful bidder has given Commonwealth written

SPECIAL TERMS AND CONDITIONS FOR THE ACQUISITION OF ELECTRONIC DATA PROCESSING EQUIPMENT AND SOFTWARE

notification of noncompliance and thirty (30) Commonwealth workdays within which to correct the deficiency. If terminated by the successful bidder, for reasons other than default and/or misuse, the successful bidder shall provide replacement software product comparable to and no less capable than the original, and at no additional charge.

7. SUPERVISION

The Commonwealth assumes responsibility for the supervision, management and control of its use of each software product and related materials provided thereto, modifications and updates thereto, upon acceptance of the system, including but not limited to: (1) assuring proper system configuration as recommended and agreed to by the successful bidder program installation, reasonable audit control and operating methods; (2) implementing sufficient procedures and checkpoints to satisfy its requirements for security and accuracy, for input and output as well as restart and recovery in the event of malfunction; and (3) accomplishing the productive utilization of each software product in the system.

8. UPDATES

If the Commonwealth requests modifications to a software product or an update thereof, the conditions appropriate to the modification or update shall be subject to agreement between the parties. Notwithstanding the above, the successful bidder agrees to at no additional charge furnish to the Commonwealth any updates to software products normally furnished to other customers for their use at no charge.

9. WARRANTY OF TITLE

The successful bidder warrants that it is the owner of each licensed software product, or if not, has the right to grant a sublicense to such software products or is an authorized dealer for the software products.

10. THIRD-PARTY SOFTWARE

Third-party software designated in the successful bidder's bid proposal may be subject to a third-party license agreement and the Commonwealth shall comply with the terms and conditions governing the use of such software as found in the license agreement, endorsed with the bid proposal or accompanying the software.

21	two-way trunks
1	T-1 going long distance traffic to a Qwest point of presence (POP)
1	paging access card
1	3 zone all-call paging adapter
20	power failure circuits
1	minimum 4 hour uninterruptible power supply (UPS)

Add Optional items: 1 voice process system with 12 universal ports and 10 hours of message storage 1 automatic call distribution (ACD) with standard reports 15 trunks, 9 digital agency 1 phones with headsets & 1 supervisory phone/terminal station message detailed recording (SMDR) system with 30,000 call records and 1 printer and

Watch Call/Head Count Conference: The PBX must have the capability of automatically conferencing a minimum of twenty-one (21) participants by dialing a pre-defined access code.

Rip-Out and Off-Hook Alarms: The PBX must have the capability when any type of phone (analog and digital) that is ripped-out or goes off-hook. Security personnel must receive audio and visual rip-out and off-hook alarms at the Control Center within a maximum of 10 seconds after the phone is off-hook or when the cable is severed or ripped out of the jack. Some PBX manufactures don't have the capability providing the required capabilities with analog phones. The solution found to provide enhanced Line Lock Out alarm reporting capability for analog single line phones was a Ramex unit 25 ports wired with frame and misc. hardware with two (2) pairs from each set appearing on MDF.

This alarming is achieved fully via Avaya Maintenance monitoring, where alarms can be sent via email, text, phone, etc.. It can also be achieved locally from the Integrated Management software which provides local monitoring for the phone administrator for the Avaya PBX.

Head Count Conference with Printer: Provides real time data for the watch call/head count conference and rip-out and off-hook alarms. The data will include at least the following information: extension number, location, date and time of the event, and the text that identifies whether it is a conference or alarm.

*** Financing factor for calculating monthly payment is _.02246_____.

AEC GROUP

Attachment 12 Cable Management Definitions

Agency – Name of Agency that “owns” the service.

Building Number – The number assigned the building in the ISS or CTAR system.

Building Address – Physical address of building.

State Service Order – ISS or SR Number assigned by the State when requesting service.

Maintenance Vendor/Technician – Name of Vendor and technician performing any work that resulted in a record change.

Maintenance Date – Date any work was performed.

Technician Comments – Enter information on anything about this circuit that may be warranted due to non-standard requirement or installation of this circuit.

Service Provider – The Telecommunication Company that bills the Agency for service which would include: TelCove, Sprint, AT&T and Verizon.

Circuit Carrier – The Telecommunication Company that owns physical infrastructure delivering actual circuit. Such as TelCove, AT&T, State Telephone, Buffalo Valley, Sprint and Verizon.

Billing Telephone Number – The main telephone number either the working telephone number or circuit is billed under.

WTN/Circuit Number – Indicates either the 10 digit telephone number (including area code) or data circuit number being installed, moved or disconnected.

Type of Service – Reflects the type of service such as: Centrex, POTS, analog, digital, fax, TTY, video, radio, ISDN (including SPIDS), Modem, ATM, DSL, BDT, frame relay, ring down and security alarm circuits.

Cable System Type – Indicate if patch panel or block wiring system.

2 or 4 Wire Circuit – Indicate if “2” or “4” wire.

LEC Office Equipment – LEC switch assignment to the circuit.

LEC Primary Cable – The cable identification as it appears entering the MDF room for the primary pair (transmit) of a 4 wire circuit or only pair for a 2 wire circuit.

LEC Primary PP/Block – The primary patch panel or block system located in the MDF.

LEC Primary Port/Pair – The primary port or pair number on the patch panel or block.

LEC Secondary Cable – The cable identification as it appears entering the MDF room for the secondary pair (receive) of a 4 wire circuit.

LEC Secondary PP/Block – The secondary patch panel or block system located in the MDF.

LEC Secondary Port/Pair – Secondary port or pair number on the patch panel or block.

AEC GROUP

Continued Attachment 12 Cable Management Definitions

Extended Demark Primary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Primary PP/Block – The primary patch panel or block system located at the Extended Demarcation.

Extended Demark Primary Port/Pair – The Extended Demark primary port or pair number on the patch panel or block.

Extended Demark Secondary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Secondary PP/Block – The secondary patch panel or block system located at the Extended Demarcation.

Extended Demark Secondary Port/Pair – The Extended Demark secondary port or pair number on the patch panel or block.

MDF Cable – House cable identification (if any).

MDF PP/Block – The designation of the house patch panel or house block as it appears in the MDF room.

MDF Port/Pair – The designation of the port on the house patch panel or pair on the house block as it appears in the MDF room.

IDF Floor – The floor number the IDF exists on.

IDF ID – The IDF label (if any).

IDF Cable – The cable designation as it enters the IDF closet.

IDF PP/Block – The designation of the IDF patch panel or block as it appears in the IDF.

IDF Port/Pair – The designation of the port on the IDF patch panel or pair on the block as it appears in the IDF.

Station Cable – The cable designation as it leaves the IDF.

Station PP/Block – The designation of the station patch panel or block as it appears in the IDF.

Station Port/Pair – The designation of the port on the station patch panel or pair on the block as it appears in the IDF.

Station Jack Number – The designation of the jack. The designation should appear on the jack and in the case of a new jack, label the jack according to the convention used in the building.

Station Cable Category – Type of cable used, valid types include: Cat3, Cat4, Cat5, Cat5E and Cat6.

** Based upon:

Up to 226 to 450 universal ports that are equipped and wired for:

- 1 attendant console
- 117 multi-button phones, minimum 8 line appearances (no speakerphone)
- 34 multi-button phones, minimum 8 line appearances with speakerphone

EASTERN TELEPHONE & TELECOMMUNICATIONS (ET&T)

Continued Attachment 6-2 (Non-redundant)

34	multi-button phones, minimum 8 line appearances with speakerphone and display
10	multi-button phones, minimum 8 line appearances with display only
195	single line 2500 sets with message waiting lamp and TAP button
1	administration terminal for moves adds and changes (MAC) and printer.
22	direct inward dialing (DID) trunks
21	two-way trunks
1	T-1 going long distance traffic to a Qwest point of presence (POP)
1	paging access card
1	3 zone all-call paging adapter
20	power failure circuits
1	minimum 4 hour uninterruptible power supply (UPS)

Add optional items: 1 voice process system (12 universal ports and 10 hours of message storage), 1 automatic call distribution (ACD) with standard reports (15 trunks, 9 digital agency phones with headsets & 1 supervisory phone/terminal), 1 station message detailed recording (SMDR) system with 30,000 call records and 1 printer

Watch Call/Head Count Conference: The PBX must have the capability of automatically conferencing a minimum of twenty-one (21) participants by dialing a pre-defined access code.

Rip-Out and Off-Hook Alarms: The PBX must have the capability when any type of phone (analog and digital) that is ripped-out or goes off-hook. Security personnel must receive audio and visual rip-out and off-hook alarms at the Control Center within a maximum of 10 seconds after the phone is off-hook or when the cable is severed or ripped out of the jack. Some PBX manufactures don't have the capability providing the required capabilities with analog phones. The solution found to provide enhanced Line Lock Out alarm reporting capability for analog single line phones was a Ramex unit 25 ports wired with frame and misc. hardware with two (2) pairs from each set appearing on MDF.

Head Count Conference with Printer: Provides real time data for the watch call/head count conference and rip-out and off-hook alarms. The data will include at least the following information: extension number, location, date and time of the event, and the text that identifies whether it is a conference or alarm.

*** Financing factor for calculating monthly payment is 0.0229256.

Bid evaluation is on 48 month cumulative installment purchase (IP), plus 10% down payment. The grand total for each zone/manufacture is to be entered on separate Official Bid Sheets(s) attachment 8. Complete a separate sheet for each manufacturer.

EASTERN TELEPHONE & TELECOMMUNICATIONS (ET&T)

Attachment 12 Cable Management Definitions

Agency – Name of Agency that “owns” the service.

Building Number – The number assigned the building in the ISS or CTAR system.

Building Address – Physical address of building.

State Service Order – ISS or SR Number assigned by the State when requesting service.

Maintenance Vendor/Technician – Name of Vendor and technician performing any work that resulted in a record change.

Maintenance Date – Date any work was performed.

Technician Comments – Enter information on anything about this circuit that may be warranted due to non-standard requirement or installation of this circuit.

Service Provider – The Telecommunication Company that bills the Agency for service which would include: TelCove, Sprint, AT&T and Verizon.

Circuit Carrier – The Telecommunication Company that owns physical infrastructure delivering actual circuit. Such as TelCove, AT&T, State Telephone, Buffalo Valley, Sprint and Verizon.

Billing Telephone Number – The main telephone number either the working telephone number or circuit is billed under.

WTN/Circuit Number – Indicates either the 10 digit telephone number (including area code) or data circuit number being installed, moved or disconnected.

Type of Service – Reflects the type of service such as: Centrex, POTS, analog, digital, fax, TTY, video, radio, ISDN (including SPIDS), Modem, ATM, DSL, BDT, frame relay, ring down and security alarm circuits.

Cable System Type – Indicate if patch panel or block wiring system.

2 or 4 Wire Circuit – Indicate if “2” or “4” wire.

LEC Office Equipment – LEC switch assignment to the circuit.

LEC Primary Cable – The cable identification as it appears entering the MDF room for the primary pair (transmit) of a 4 wire circuit or only pair for a 2 wire circuit.

LEC Primary PP/Block – The primary patch panel or block system located in the MDF.

LEC Primary Port/Pair – The primary port or pair number on the patch panel or block.

LEC Secondary Cable – The cable identification as it appears entering the MDF room for the secondary pair (receive) of a 4 wire circuit.

LEC Secondary PP/Block – The secondary patch panel or block system located in the MDF.

LEC Secondary Port/Pair – Secondary port or pair number on the patch panel or block.

EASTERN TELEPHONE & TELECOMMUNICATIONS (ET&T)

Continued Attachment 12 Cable Management Definitions

Extended Demark Primary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Primary PP/Block – The primary patch panel or block system located at the Extended Demarcation.

Extended Demark Primary Port/Pair – The Extended Demark primary port or pair number on the patch panel or block.

Extended Demark Secondary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Secondary PP/Block – The secondary patch panel or block system located at the Extended Demarcation.

Extended Demark Secondary Port/Pair – The Extended Demark secondary port or pair number on the patch panel or block.

MDF Cable – House cable identification (if any).

MDF PP/Block – The designation of the house patch panel or house block as it appears in the MDF room.

MDF Port/Pair – The designation of the port on the house patch panel or pair on the house block as it appears in the MDF room.

IDF Floor – The floor number the IDF exists on.

IDF ID – The IDF label (if any).

IDF Cable – The cable designation as it enters the IDF closet.

IDF PP/Block – The designation of the IDF patch panel or block as it appears in the IDF.

IDF Port/Pair – The designation of the port on the IDF patch panel or pair on the block as it appears in the IDF.

Station Cable – The cable designation as it leaves the IDF.

Station PP/Block – The designation of the station patch panel or block as it appears in the IDF.

Station Port/Pair – The designation of the port on the station patch panel or pair on the block as it appears in the IDF.

Station Jack Number – The designation of the jack. The designation should appear on the jack and in the case of a new jack, label the jack according to the convention used in the building.

Station Cable Category – Type of cable used, valid types include: Cat3, Cat4, Cat5, Cat5E and Cat6.

- 195 single line 2500 sets with message waiting lamp and TAP button

Continued Attachment 6-2 (Non-redundant)

- 1 administration terminal for moves adds and changes (MAC) and printer.
- 22 direct inward dialing (DID) trunks
- 21 two-way trunks
- 1 T-1 going long distance traffic to a Qwest point of presence (POP)
- 1 paging access card
- 1 3 zone all-call paging adapter
- 20 power failure circuits
- 1 minimum 4 hour uninterruptible power supply (UPS)

Add Optional items: 1 voice process system with 12 universal ports and 10 hours of message storage 1 automatic call distribution (ACD) with standard reports 15 trunks, 9 digital agency 1 phones with headsets & 1 supervisory phone/terminal station message detailed recording (SMDR) system with 30,000 call records and 1 printer and

Watch Call/Head Count Conference: The PBX must have the capability of automatically conferencing a minimum of twenty-one (21) participants by dialing a pre-defined access code.

Rip-Out and Off-Hook Alarms: The PBX must have the capability when any type of phone (analog and digital) that is ripped-out or goes off-hook. Security personnel must receive audio and visual rip-out and off-hook alarms at the Control Center within a maximum of 10 seconds after the phone is off-hook or when the cable is severed or ripped out of the jack. Some PBX manufactures don't have the capability providing the required capabilities with analog phones. The solution found to provide enhanced Line Lock Out alarm reporting capability for analog single line phones was a Ramex unit 25 ports wired with frame and misc. hardware with two (2) pairs from each set appearing on MDF.

Head Count Conference with Printer: Provides real time data for the watch call/head count conference and rip-out and off-hook alarms. The data will include at least the following information: extension number, location, date and time of the event, and the text that identifies whether it is a conference or alarm.

***** Financing factor for calculating monthly payment is .02320.**

* With three (3) years of guaranteed maintenance using the below configuration ** after the first year @ \$0.00 use the data from attachment 4-2 for computing the total three (3) years of maintenance cost is \$47,194.80.

** Based upon:

Up to 226 to 450 universal ports that are equipped and wired for:

- 1 attendant console
- 117 multi-button phones, minimum 8 line appearances (no speakerphone)
- 34 multi-button phones, minimum 8 line appearances with speakerphone
- 34 multi-button phones, minimum 8 line appearances with speakerphone and display
- 10 multi-button phones, minimum 8 line appearances with display only
- 195 single line 2500 sets with message waiting lamp and TAP button
- 1 administration terminal for moves adds and changes (MAC) and printer.
- 22 direct inward dialing (DID) trunks
- 21 two-way trunks
- 1 T-1 going long distance traffic to a Qwest point of presence (POP)
- 1 paging access card
- 1 3 zone all-call paging adapter
- 20 power failure circuits
- 1 minimum 4 hour uninterruptible power supply (UPS)

Add optional items: 1 voice process system (12 universal ports and 10 hours of message storage) 1 automatic call distribution (ACD) with standard reports (15 trunks, 9 digital agency 1 phones with headsets & 1 supervisory phone/terminal station message detailed recording (SMDR) system with 30,000 call records and 1 printer and

Watch Call/Head Count Conference: The PBX must have the capability of automatically conferencing a minimum of twenty-one (21) participants by dialing a pre-defined access code.

Rip-Out and Off-Hook Alarms: The PBX must have the capability when any type of phone (analog and digital) that is ripped-out or goes off-hook. Security personnel must receive audio and visual rip-out and off-hook alarms at the Control Center within a maximum of 10 seconds after the phone is off-hook or when the cable is severed or ripped out of the jack. Some PBX manufactures don't have the capability providing the required capabilities with analog phones. The solution found to provide enhanced Line Lock Out alarm reporting capability for analog single line phones was a Ramex unit 25 ports wired with frame and misc. hardware with two (2) pairs from each set appearing on MDF.

Head Count Conference with Printer: Provides real time data for the watch call/head count conference and rip-out and off-hook alarms. The data will include at least the following information: extension number, location, date and time of the event, and the text that identifies whether it is a conference or alarm.

**** Financing factor for calculating monthly payment is .02320.*

Bid evaluation is on 48 month cumulative installment purchase (IP), plus 10% down payment. The grand total for each zone/manufacture is to be entered on separate Official Bid Sheets(s) attachment 8. Complete a separate sheet for each manufacturer.

Note: State reserves the right to negotiate payment schedule for other than 48 months.

Appendix I Cable Management Definitions

Agency – Name of Agency that “owns” the service.

Building Number – The number assigned the building in the ISS or CTAR system.

Building Address – Physical address of building.

State Service Order – ISS or SR Number assigned by the State when requesting service.

Maintenance Vendor/Technician – Name of Vendor and technician performing any work that resulted in a record change.

Maintenance Date – Date any work was performed.

Technician Comments – Enter information on anything about this circuit that may be warranted due to non-standard requirement or installation of this circuit.

Service Provider – The Telecommunication Company that bills the Agency for service which would include: TelCove, Sprint, AT&T and Verizon.

Circuit Carrier – The Telecommunication Company that owns physical infrastructure delivering actual circuit. Such as TelCove, AT&T, State Telephone, Buffalo Valley, Sprint and Verizon.

Billing Telephone Number – The main telephone number either the working telephone number or circuit is billed under.

WTN/Circuit Number – Indicates either the 10 digit telephone number (including area code) or data circuit number being installed, moved or disconnected.

Type of Service – Reflects the type of service such as: Centrex, POTS, analog, digital, fax, TTY, video, radio, ISDN (including SPIDS), Modem, ATM, DSL, BDT, frame relay, ring down and security alarm circuits.

Cable System Type – Indicate if patch panel or block wiring system.

2 or 4 Wire Circuit – Indicate if “2” or “4” wire.

LEC Office Equipment – LEC switch assignment to the circuit.

LEC Primary Cable – The cable identification as it appears entering the MDF room for the primary pair (transmit) of a 4 wire circuit or only pair for a 2 wire circuit.

LEC Primary PP/Block – The primary patch panel or block system located in the MDF.

LEC Primary Port/Pair – The primary port or pair number on the patch panel or block.

LEC Secondary Cable – The cable identification as it appears entering the MDF room for the secondary pair (receive) of a 4 wire circuit.

LEC Secondary PP/Block – The secondary patch panel or block system located in the MDF.

LEC Secondary Port/Pair – Secondary port or pair number on the patch panel or block.

Continued Attachment 12 Cable Management Definitions

Extended Demark Primary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Primary PP/Block – The primary patch panel or block system located at the Extended Demarcation.

Extended Demark Primary Port/Pair – The Extended Demark primary port or pair number on the patch panel or block.

Extended Demark Secondary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Secondary PP/Block – The secondary patch panel or block system located at the Extended Demarcation.

Extended Demark Secondary Port/Pair – The Extended Demark secondary port or pair number on the patch panel or block.

MDF Cable – House cable identification (if any).

MDF PP/Block – The designation of the house patch panel or house block as it appears in the MDF room.

MDF Port/Pair – The designation of the port on the house patch panel or pair on the house block as it appears in the MDF room.

IDF Floor – The floor number the IDF exists on.

IDF ID – The IDF label (if any).

IDF Cable – The cable designation as it enters the IDF closet.

IDF PP/Block – The designation of the IDF patch panel or block as it appears in the IDF.

IDF Port/Pair – The designation of the port on the IDF patch panel or pair on the block as it appears in the IDF.

Station Cable – The cable designation as it leaves the IDF.

Station PP/Block – The designation of the station patch panel or block as it appears in the IDF.

Station Port/Pair – The designation of the port on the station patch panel or pair on the block as it appears in the IDF.

Station Jack Number – The designation of the jack. The designation should appear on the jack and in the case of a new jack, label the jack according to the convention used in the building.

Station Cable Category – Type of cable used, valid types include: Cat3, Cat4, Cat5, Cat5E and Cat6.

Maintenance Charges

Manufacturer _____ **NEC** _____

Configuration I (up to 225 universal ports)

Monthly Cost

A. Year 2 unit maintenance charges per port after the one (1) year minimal warranty:

- | | | |
|-------------------------------------------------|----|--------------------|
| 1. PBX per port | \$ | <u>1.00</u> |
| 2. PBX voice mail per port | \$ | <u>15.00</u> |
| 3. PBX PC console | \$ | <u>15.00</u> |
| 4. Paging amplifier | \$ | <u>10.00</u> |
| 5. Paging speaker | \$ | <u>3.00</u> |
| 6. Paging horn | \$ | <u>5.00</u> |
| 7. 2 hour major maintenance response per system | \$ | <u>150.00 / HR</u> |
| 8. * | | |

* Offeror must add all additional monthly unit maintenance charges if applicable.

B. Other equipment to be maintained:

- | | | |
|--------------------------------------------|----|---------------|
| 1. Security Features | | |
| a. watch call/head count conference | \$ | <u>50.00</u> |
| b. rip-out and off-hook alarms | \$ | <u>25.00</u> |
| c. security display terminal and printer) | \$ | <u>25.00</u> |
| 2. Automatic call distributor system | \$ | <u>25.00</u> |
| 3. Voice processing system | \$ | <u>163.25</u> |
| 4. Station message detail recording system | \$ | <u>25.00</u> |
| 5. * | | |

*Offeror must add all additional monthly unit maintenance charges if applicable.

C. Guaranteed maximum escalation of maintenance costs on a yearly basis after the warranty period and 2 year:

Year 3 _____ 5 _____ % over previous year

Year 4 _____ 5 _____ % over previous year

Year 5 _____ 5 _____ % over previous year

D. Warranty period: _____ 1 _____ year(s)

Attachment 4-2

Maintenance Charges

Manufacturer **NEC**

Configuration 2 (226 to 450 universel ports)

Monthly Cost

A. Year 2 unit maintenance charges per port after the one (1) year minimal warranty:

- | | |
|-------------------------------------------------|--------------------------|
| 1. PBX per port | \$ <u> 1.00</u> |
| 2. PBX voice mail per port | \$ <u> 15.00</u> |
| 3. PBX PC console | \$ <u> 15.00</u> |
| 4. Paging amplifier | \$ <u> 10.00</u> |
| 5. Paging speaker | \$ <u> 3.00</u> |
| 6. Paging horn | \$ <u> 5.00</u> |
| 7. 2 hour major maintenance response per system | \$ <u>150.00 / HR</u> |
| 8. * | |

* Offeror must add all additional monthly unit maintenance charges if applicable.

B. Other equipment to be maintained:

*** When completing the "services monthly payment" and "service total yearly payment" columns, include the % over previous year when calculating the costs for years 3, 4 and 5 that the offeror listed on attachments 4-1 through 4-4. With three (3) years of guaranteed maintenance using the below configuration ** after the first year @ \$0.00, use the data from attachment 4-1 for computing the total three (3) years of maintenance cost \$ 33,176.88 (offeror to fill in amount). Complete Attachment 6-5 Equipment Escalation Charges.**

**** Based upon:**

Up to 226 to 450 universal ports that are equipped and wired for:

- 1 attendant console
- 117 multi-button phones, minimum 8 line appearances (no speakerphone)
- 34 multi-button phones, minimum 8 line appearances with speakerphone
- 34 multi-button phones, minimum 8 line appearances with speakerphone and display
- 10 multi-button phones, minimum 8 line appearances with display only
- 195 single line 2500 sets with message waiting lamp and TAP button
- 1 administration terminal for moves adds and changes (MAC) and printer.
- 22 direct inward dialing (DID) trunks
- 21 two-way trunks
- 1 T-1 going long distance traffic to a Qwest point of presence (POP)
- 1 paging access card

Continued Attachment 6-2 (Non-redundant)

- 1 3 zone all-call paging adapter
- 20 power failure circuits
- 1 minimum 4 hour uninterruptible power supply (UPS)

Add optional items: 1 voice process system (12 universal ports and 10 hours of message storage), 1 automatic call distribution (ACD) with standard reports (15 trunks, 9 digital agency phones with headsets & 1 supervisory phone/terminal), 1 station message detailed recording (SMDR) system with 30,000 call records and 1 printer

Watch Call/Head Count Conference: The PBX must have the capability of automatically conferencing a minimum of twenty-one (21) participants by dialing a pre-defined access code.

Rip-Out and Off-Hook Alarms: The PBX must have the capability when any type of phone (analog and digital) that is ripped-out or goes off-hook. Security personnel must receive audio and visual rip-out and off-hook alarms at the Control Center within a maximum of 10 seconds after the phone is off-hook or when the cable is severed or ripped out of the jack. Some PBX manufactures don't have the capability providing the required capabilities with analog phones. The solution found to provide enhanced Line Lock Out alarm reporting capability for analog single line phones was a Ramex unit 25 ports wired with frame and misc. hardware with two (2) pairs from each set appearing on MDF.

Head Count Conference with Printer: Provides real time data for the watch call/head count conference and rip-out and off-hook alarms. The data will include at least the following information: extension number, location, date and time of the event, and the text that identifies whether it is a conference or alarm.

*** Financing factor for calculating monthly payment is .02435.

Bid evaluation is on 48 month cumulative installment purchase (IP), plus 10% down payment. The grand total for each zone/manufacture is to be entered on separate Official Bid Sheets(s) attachment 8. Complete a separate sheet for each manufacturer.

- F. Employee's titles and experience: (list all personnel who will service the proposed equipment):

Name	Telecommunication s Experience	Certifications
Gary Delaney, Sr. Technician	25 years	NEC, Fujitsu, Comdial
Alan Swidler, Technician	15 years	NEC, Active Voice
Andrew Keen, Technician	10 Years	NEC Active Voice
Bob Gerhart	10 years	NEC
Michael McDonald	15 years	NEC, Siemens Rohm

Maintenance Center Information

- A. Maintenance office locations:
450 East Germantown Pike, Lafayette Hill, PA 19444

Telephone number:
610-828-5919

- B. Hours of Operation:
Monday through Friday, 8AM to 5PM

- C. Person in charge:
Ron Iski

- D. Number of maintenance personnel at this location:
7

- E. Systems served from this office:
800+

Total number of stations:
22,000+

- F. Employee's titles and experience: (list all personnel who will service the proposed equipment):

Name	Telecommunication s Experience	Certifications
Ron Iski, Operations Mgr.	29 years	NEC, Active Voice
Frank Dura, Sr. Technician	28 years	NEC, Active Voice
Mark O'Malley, Sr. Technician	24 Years	NEC Active Voice
Ronald Shawver, Sr. Technician	20 years	NEC Active Voice
Craig Crawford, Technician	11 years	NEC, Active Voice
Evelyn Zahnow, Technician	15 years	NEC, Active Voice,
Bruce Logeman, Technician	9 years	NEC, Active Voice

Revised 3/11/05

Attachment 12 Cable Management Definitions

Agency – Name of Agency that “owns” the service.

Building Number – The number assigned the building in the ISS or CTAR system.

Building Address – Physical address of building.

State Service Order – ISS or SR Number assigned by the State when requesting service.

Maintenance Vendor/Technician – Name of Vendor and technician performing any work that resulted in a record change.

Maintenance Date – Date any work was performed.

Technician Comments – Enter information on anything about this circuit that may be warranted due to non-standard requirement or installation of this circuit.

Service Provider – The Telecommunication Company that bills the Agency for service which would include: TelCove, Sprint, AT&T and Verizon.

Circuit Carrier – The Telecommunication Company that owns physical infrastructure delivering actual circuit. Such as TelCove, AT&T, State Telephone, Buffalo Valley, Sprint and Verizon.

Billing Telephone Number – The main telephone number either the working telephone number or circuit is billed under.

WTN/Circuit Number – Indicates either the 10 digit telephone number (including area code) or data circuit number being installed, moved or disconnected.

Type of Service – Reflects the type of service such as: Centrex, POTS, analog, digital, fax, TTY, video, radio, ISDN (including SPIDS), Modem, ATM, DSL, BDT, frame relay, ring down and security alarm circuits.

Cable System Type – Indicate if patch panel or block wiring system.

2 or 4 Wire Circuit – Indicate if “2” or “4” wire.

LEC Office Equipment – LEC switch assignment to the circuit.

LEC Primary Cable – The cable identification as it appears entering the MDF room for the primary pair (transmit) of a 4 wire circuit or only pair for a 2 wire circuit.

LEC Primary PP/Block – The primary patch panel or block system located in the MDF.

LEC Primary Port/Pair – The primary port or pair number on the patch panel or block.

LEC Secondary Cable – The cable identification as it appears entering the MDF room for the secondary pair (receive) of a 4 wire circuit.

LEC Secondary PP/Block – The secondary patch panel or block system located in the MDF.

LEC Secondary Port/Pair – Secondary port or pair number on the patch panel or block.

Continued Attachment 12 Cable Management Definitions

Extended Demark Primary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Primary PP/Block – The primary patch panel or block system located at the Extended Demarcation.

Extended Demark Primary Port/Pair – The Extended Demark primary port or pair number on the patch panel or block.

Extended Demark Secondary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Secondary PP/Block – The secondary patch panel or block system located at the Extended Demarcation.

Extended Demark Secondary Port/Pair – The Extended Demark secondary port or pair number on the patch panel or block.

MDF Cable – House cable identification (if any).

MDF PP/Block – The designation of the house patch panel or house block as it appears in the MDF room.

MDF Port/Pair – The designation of the port on the house patch panel or pair on the house block as it appears in the MDF room.

IDF Floor – The floor number the IDF exists on.

IDF ID – The IDF label (if any).

IDF Cable – The cable designation as it enters the IDF closet.

IDF PP/Block – The designation of the IDF patch panel or block as it appears in the IDF.

IDF Port/Pair – The designation of the port on the IDF patch panel or pair on the block as it appears in the IDF.

Station Cable – The cable designation as it leaves the IDF.

Station PP/Block – The designation of the station patch panel or block as it appears in the IDF.

Station Port/Pair – The designation of the port on the station patch panel or pair on the block as it appears in the IDF.

Station Jack Number – The designation of the jack. The designation should appear on the jack and in the case of a new jack, label the jack according to the convention used in the building.

Station Cable Category – Type of cable used, valid types include: Cat3, Cat4, Cat5, Cat5E and Cat6.

Revised 3/11/05

Attachment 2-1

CONFIGURATION #1 (up to 225 ports) FCC REGISTRATION # AB6CAN-61116-PF-E

UNIT INSTALLED PRICES FOR ADDS AND DELETES Manufacturer NORTEL

Unit installed prices for adds and deletes (includes all wiring, hardware, travel, and labor for installation up to 150 feet homerun). If cable is reused, item number 45 cable credit for reused cable, will be used.

1496 BCM Expansion Platform - Cooling Fan Replacement Spare	\$197.79	\$219.45
1497 T7406 Handset Paper Insert Pac	\$9.94	\$11.03
1498 T7406 Rechargeable Nickel Metal Hydride Battery	\$67.90	\$75.37
1499 T7406 Belt Clip	\$9.94	\$11.03
1500 T7406 Wrist Strap	\$9.94	\$11.03
1501 BST Key Cap Kit - ENG	\$8.28	\$9.19
1502 T7406 Cordless Doc Kit Triling	\$29.81	\$33.09
1503 BCM 2.5_FP-1 Mirrored Hard Disk Drive Upgrade Kit (BCM100 for both 2LAN and LAN/WAN Platforms).	\$1,773.21	\$1,967.42
1504 Data Interface Cable V35 DB-26 Male (For BCM Internal Router)	\$129.18	\$143.38
1505 BST Feature Decal English/French//Spanish 12each	\$13.25	\$14.71
1506 BCM400 Basic Function Tray FRU	\$2,847.01	\$3,159.87
1507 BCM400 Base Function Tray FRU	\$2,847.01	\$3,159.87
1508 BCM200 Basic Function Tray FRU	\$2,847.01	\$3,159.87
1509 BCM200 RAID (Redundant Hard Drive) Upgrade Kit.	\$1,773.21	\$1,967.42
1510 BCM IVR PeriView GUI Interface Software Right-to-Use Licence (for Desktop client)	\$475.33	\$527.56
1511 T7100 Telephone Set End User Guide (Eng) Kit	\$23.19	\$25.73
1512 T7208 Telephone Set End User Guide (Eng) Kit	\$23.19	\$25.73
1513 T7100/T7208/T7316E Blank Label 20 each	\$23.19	\$25.73
1514 N* DOORPHONE WITH BRASS FACEPLATE	\$412.82	\$440.52
1515 BCM 3.5 Hard Drive FRU Programmed (20 GB)	\$493.61	\$547.67
1516 BCM400 Redundant Power Supply Upgrade Kit w/Replacement MSC	\$1,950.37	\$2,163.98
1517 BCM400 MSC-1A FRU Kit	\$3,035.62	\$3,368.09
1518 BCM400 Media Services Card FRU	\$3,035.62	\$3,368.09
1519 BCM200 MSC-1A FRU KIT	\$2,562.65	\$2,843.32
1520 BCM400/1000 Rack Mount Kit, Spare - Standard and Redundant Base Systems	\$142.75	\$158.39
1521 BCM400/1000 Rack Mount Kit, Spare	\$137.46	\$152.57
1522 BCM200 Rack Mount Kit, Spare - Standard Base Systems	\$124.22	\$137.87
1523 BCM Expansion Rack Mount Kit, Spare - Standard and Redundant Cabinets	\$197.79	\$219.45
1524 BCM 3.6 Hard Drive FRU, Programmed (20 GB)	\$493.61	\$547.67
1525 BCM 3.6 GA S/W for Imaging Tool	\$57.97	\$64.34
1526 BCM Imaging Tool Application S/W CD	\$660.82	\$733.44
1527 BCM v.92 Embedded Modem FRU	\$134.15	\$148.89
1528 BCM v.92 Embedded Modem FRU	\$134.15	\$148.89

DESCRIPTION	INSTALLED COST	
	PRE-INSTALL	POST-INSTALL
1529 BCM400 Base Function Tray FRU, with v.92 Modem	\$3,469.04	\$3,848.98
1530 BCM400 Base Function Tray FRU, w/ V.92 Modem	\$3,152.57	\$3,497.86
1531 BCM200 Base Function Tray FRU, with v.92 Modem	\$3,152.57	\$3,497.86
1532 Card 4-channel Extended Multi-Frequency Receiver ANI/911 XMFR	\$3,319.41	\$3,682.96
1533 MIRAN III S/W Upgrade Package	\$238.49	\$264.70
1534 PC Console Interface Unit Assembly	\$1,565.11	\$1,737.10
1535 Audio Cable	\$43.06	\$47.79
1536 Cable 9 Pin D-Sub Male to 9 Pin D-Sub Female	\$96.06	\$106.62
1537 Media Card Maintenance Cable (3m)	\$84.47	\$93.75
1538 Cable VLAN Maint Splitter	\$142.43	\$158.09
1539 Ethernet and DB 9 Adapter with 25pr connector	\$114.28	\$126.84
1540 Meridian Integrated Recorded Announcement (Release 3) Medium to Large Upgrade	\$985.50	\$1,093.44
1541 MIRAN III Option Medium	\$5,319.65	\$5,902.27
1542 MIRAN III Option Large	\$6,305.15	\$6,995.71
1543 Global Handset Cord Assembly	\$38.09	\$42.28
1544 Pack 4 Port SDI/DCH Option 11C	\$2,323.59	\$2,578.08
1545 Battery Backup Box Cable	\$57.97	\$64.34
1546 Digital Trunk Interface 2Mbit PCP Assembly	\$3,097.54	\$3,436.79
1547 Cable 10 FT Option 11C Aux/PFTU/Console Power PEDE9M-3W	\$57.97	\$64.34
1548 Opt. 11C 1-Port SDI Cable DB9 Female to DB25 Male	\$86.12	\$95.59
1549 Cabinet AC/DC Option 11C Main and Expansion	\$1,759.46	\$1,952.17
1550 EXPANSION BOX CABLE ASSEMBLY	\$152.37	\$169.11
1551 Ext. Tape Cable SCSI Assy.	\$120.90	\$134.19
1552 RS232C Breakout Assembly	\$574.70	\$637.86
1553 Shielded 4 Port SDI/DCH Cable for NTA02 SDI/Sport Card	\$231.87	\$257.35
1554 Shielded 4 Port SDI/DCH Cable for NTA02 SDI/Sport Card	\$231.87	\$257.35
1555 Stratum 3 Clock Contr.PCP Assy	\$705.16	\$782.39
1556 Pedestal Assembly Option 11C Cabinet	\$327.93	\$363.96
1557 Junction Box Option 11C Battery Back-up (includes NTA0420)	\$304.74	\$338.23
1558 Ext High Density Tape Drive Kit N/A Power Cord	\$3,035.62	\$3,368.09
1559 Peripheral Cable Assy 40FT LG DB25F	\$96.06	\$106.62
1560 Peripheral Cable Assy 40FT LG DB25M	\$96.06	\$106.62
1561 Meridian Mail Card Option Wall Mount Kit for 2.5 GBs Tape Drive	\$69.56	\$77.20
1562 Extended Battery Box	\$1,631.36	\$1,810.63
1563 2-4 Hour Battery Backup Cable Assembly (for NTA075 Unit)	\$24.84	\$27.57
1564 Battery Backup Unit Seismic Upgrade Kit	\$135.81	\$150.73
1565 2 - 4 Hour Battery Backup	\$4,210.32	\$4,671.44
1566 15 - 30 Minute Battery Backup	\$945.95	\$1,049.55
1567 DCHI/DPNSS DAUGHTERBOARD	\$854.79	\$948.42

DESCRIPTION	INSTALLED COST	
	PRE-INSTALL	POST-INSTALL
1568 DCHI/DPNSS DAUGHTERBOARD	\$854.79	\$948.42
1569 BCM50 RJ-45 Breakout Adapter Kit: Used with a BCM50 wallmount bracket to convert the RJ-21 connector on the base chassis to RJ-45 connectors for digital stations, analog stations and analog trunks.	\$81.15	\$90.07
1570 BCM50 Doc CD Kit - English	\$19.87	\$22.06
1571 BCM50 rack Mount Patch Panel	\$162.31	\$180.14
1572 BCM50 2.0 Software Upgrade Kit with Upgrade CD and Upgrade Authorization Code	\$611.14	\$678.30
1573 BCM50 2.0 Documentation CD Kit - English	\$19.87	\$22.06
1574 Media Services Processor Expansion Card (MS-PEC III).	\$899.32	\$998.14
1575 MSP PEC III	\$899.32	\$998.14
1576 1.5 Mbit DTI/PRI T-1 Cable	\$313.02	\$347.42
1577 PRI/DTI Twisted Pair Carrier Cable	\$188.81	\$209.55
1578 BRI Signalling Processor Option 11 (SISP)	\$2,870.19	\$3,185.60
1579 3-Port SDI Cable	\$172.24	\$191.17
1580 PRI 2MB Option 11 without DCH or CC (EUROISDN/QSIG/MCDN)	\$2,904.91	\$3,223.07
1581 D-Channel DaughterBoard (EUROISDN/QSIG/MCDN)	\$1,917.69	\$2,127.72
1582 Downloaded D-Channel Daughter Board PCB Assembly	\$980.34	\$1,087.71
1583 Ground Bar Option 11C for same room AC Cabinets (1 per system if 2 or more cabinets)	\$71.22	\$79.04
1584 DCE V.24 Operator Cable	\$64.59	\$71.69
1585 BCM Analog DID Bundle	\$2,033.81	\$2,257.31
1586 BCM Call Center Basic to Professional Upgrade With Reporting Software Authorization Code	\$6,374.71	\$7,075.23
1587 BST Central Answering Position Bundle (Charcoal)	\$455.46	\$505.51
1588 BST Central Answering Position Bundle (Platinum)	\$455.46	\$505.51
1589 BCM Call Center Basic to Professional Upgrade with Reporting 2.0 Software Authorization Code	\$6,374.71	\$7,075.23
1590 IP Phone 2002 Expansion Bundle	\$2,901.47	\$3,219.25
1591 IP Phone 2002 Expansion Bundle with Messaging	\$4,296.31	\$4,766.85
1592 IP Phone 2004 Expansion Bundle	\$3,527.52	\$3,913.87

1345 SCCS 1.5/3.0 to CC 6.0 Voice Agent Upgrade Increment 1-49	\$813.19	\$902.56
1346 SCCS 1.5/3.0 to CC 6.0 Voice Agent Upgrade Increment 50-99	\$753.57	\$836.38
1347 SCCS 1.5/3.0 to CC 6.0 Voice Agent Upgrade Increment 100-499	\$644.26	\$715.06
1348 SCCS 1.5/3.0 to CC 6.0 Voice Agent Upgrade Increment 500+	\$503.48	\$558.81
1349 SECC 4.2 Base Migration to CCM 6.0	\$16,359.94	\$18,157.74
1350 SECC to CC 6.0 Voice Agent Migration Increment 1-49	\$611.14	\$678.30
1351 SECC to CC 6.0 Voice Agent Migration Increment 50-99	\$566.42	\$628.66
1352 SECC to CC 6.0 Voice Agent Migration Increment 100-150	\$483.61	\$536.75
1353 SWCP 4.0 to CCMM 6.0 Base Upgrade	\$2,414.74	\$2,680.10
1354 SWCP 4.0 to CC 6.0 Email/Web Communication Agent Upgrade Increment 1-49	\$150.71	\$167.28
1355 SWCP 4.0 to CC 6.0 Email/Web Communication Agent Upgrade Increment 50-99	\$140.78	\$156.25

DESCRIPTION	INSTALLED COST	
	PRE-INSTALL	POST-INSTALL
1356 SWCP 4.0 to CC 6.0 Email/Web Communication Agent Upgrade Increment 100+	\$127.53	\$141.54
1357 CCM 6.0 Corporate Base System	\$21,235.60	\$23,561.41
1358 CCMM 6.0 Corporate Base System	\$15,663.13	\$17,378.62
1359 CC 6.0 Corporate Outbound Base System	\$5,170.02	\$5,736.26
1360 CCT 6.0 Corporate Base System	\$5,820.14	\$6,457.59
1361 CC Standard Corporate Voice Agent - 1 Agent	\$1,006.97	\$1,117.63
1362 CC Networked Corporate Voice Agent - 1 Agent	\$354.43	\$393.37
1363 CC Standard Corporate Email Agent - 1 Agent	\$786.70	\$873.15
1364 CC Standard Corporate Outbound Agent - 1 Agent	\$649.23	\$720.57
1365 CCT Corporate Contact Center Device - 1 Device	\$142.43	\$158.09
1366 CC 6.0 Corporate License Manager Standby Server	\$5,856.32	\$6,499.88
1367 CCM 6.0 Corporate NCC System	\$35,192.59	\$39,059.91
1368 CCM 6.0 Corporate Standby Server	\$14,639.15	\$16,247.85
1369 CCM 6.0 Corporate RCW Users (Bundle of 5)	\$5,177.28	\$5,746.21
1370 CCMM 6.0 Multimedia Corporate Redundancy	\$14,639.15	\$16,247.85
1371 CCM 6.0 Nodal to CCM 6.0 Corporate Transfer	\$4,090.81	\$4,540.35
1372 CCMM 6.0 Nodal to CCMM 6.0 Corporate Transfer	\$3,017.60	\$3,349.20
1373 CCT 6.0 Nodal to CCT 6.0 Corporate Transfer	\$1,121.25	\$1,244.46
1374 CCM Standard to Networked Node Fee	\$828.10	\$919.10
1375 CC Voice Agent Transfer to CC Corporate - 1 Agent	\$202.06	\$224.26
1376 CC Email Agent Transfer to CC Corporate - 1 Agent	\$159.00	\$176.47
1377 CC Outbound Agent Transfer to CC Corporate - 1 Agent	\$130.84	\$145.22
1378 CCT Contact Center Device Transfer to CCT Corporate - 1 Device	\$29.81	\$33.09
1379 CCM 6.0 NCC System Corporate Transfer	\$7,038.85	\$7,812.35
1380 CCM 6.0 Standby Server Corporate Transfer	\$2,929.82	\$3,251.78
1381 RCW Users Corporate Transfer	\$1,036.78	\$1,150.71
1382 CCMM 6.0 Multimedia Redundancy Corporate Transfer	\$2,929.82	\$3,251.78
1383 RCW Extension Nodal to Corporate Transfer - 5 Users	\$1,242.15	\$1,378.65
1384 Digital Recorder NGX1600	\$3,706.38	\$4,112.32
1385 Digital Recorder NGX2400	\$5,109.82	\$5,669.47
1386 24 Port Analog Recorder LD2409	\$3,947.17	\$4,379.48
1387 Single Span Dig Trunk DP3209	\$4,153.56	\$4,608.47
1388 Dual Span Dig Trunk DP6409	\$7,357.73	\$8,163.58
1389 Contact Center 6.0 Software DVD	\$165.62	\$183.82
1390 Analog Direct Inward Dial 4-Port (ADID4) Media Bay Module	\$1,028.50	\$1,141.14
1391 BCM50 Power Supply Wall Mount Bracket. Allows a single supply with existing cables to be mounted to a wall	\$25.80	\$28.63
1392 BCM50 Replacement Fan	\$32.68	\$36.26
1393 BCM50 Replacement Fan	\$32.68	\$36.26
1394 BCM50 Programmed Hard Drive	\$345.70	\$383.56
1395 BCM50 Programmed Hard Drive	\$345.70	\$383.56
1396 BCM 50 DEMONSTRATION CASE	\$514.25	\$570.58

DESCRIPTION	INSTALLED COST	
	PRE-INSTALL	POST-INSTALL
1397 BCM50 2.0 Hard Disk Drive FRU	\$345.70	\$383.56
1398 BCM50 Replacement ADSL Router Card	\$607.13	\$673.62
1399 BCM50 Replacement Ethernet Router Card	\$507.37	\$562.94
1400 BCM50 2.0 Replacement ADSL Router Card	\$607.13	\$673.62
1401 BCM50 2.0 Replacement Ethernet Router Card	\$507.37	\$562.94
1402 BCM50 Replacement Power Supply	\$118.68	\$131.68
1403 BCM50 Replacement Power Supply	\$118.68	\$131.68
1404 BCM50e Main Unit including integrated Ethernet Router with Release 1.0 Software. Includes power supply and power cable. North America	\$1,566.83	\$1,738.43
1405 BCM50e Main Unit including integrated Ethernet Router with Release 1.0 Software. Includes power supply and power cable. North America	\$1,566.83	\$1,738.43
1406 BCM50e including integrated Ethernet Router with Release 2.0 Software. Includes power supply and cable. North America	\$1,566.83	\$1,738.43
1407 BCM50a Main Unit including integrated ADSL Router with Release 1.0 Software. Includes power supply and power cable. North America	\$1,664.86	\$1,847.21
1408 BCM50a unit including integrated ADSL Router with Release 2.0 Software. Includes power supply and cable. North America	\$1,664.86	\$1,847.21
1409 Small System Rackmount Shelf:	\$147.40	\$163.60
1410 BCM50 Expansion Used with BCM50 main unit to add media bay modules. Complete with power supply and power cord. North America	\$295.83	\$328.23
1411 BCM50 Main Unit with Release 1.0 Software. Includes power supply and power cable. North America	\$1,271.00	\$1,410.21
1412 BCM50 unit with Release 2.0 Software. Includes power supply and cable. North America	\$1,271.00	\$1,410.21
1413 Small System Wallmount Bracket	\$67.90	\$75.37
1414 Data Interface Cable V35 M34 Female (Standard V.35 Interface)	\$129.18	\$143.38
1415 Data Interface Cable V35 DB-44 male(for Passport 2420 and ARN)	\$129.18	\$143.38
1416 BCM Call Center Basic Software Authorization Code (includes 10 active agents)	\$2,495.89	\$2,770.17
1417 BCM Call Center Reporting Software Authorization Code	\$1,470.71	\$1,632.32
1418 BCM VoIP Gateway 2-Trunk Software Authorization Code	\$732.04	\$812.48
1419 BCM Unified Messaging 1-Seat Software Authorization Code	\$81.15	\$90.07
1420 Business Communications Manager Companion Wireless (Portable) 1-Seat Software Authorization Code	\$124.22	\$137.87
1421 T7100 GLOBAL CHAR STAND ASSY	\$6.62	\$7.35
1422 T7208 GLOBAL CHAR STAND ASSY	\$6.62	\$7.35

DESCRIPTION	INSTALLED COST

1553 Shielded 4 Port SDI/DCH Cable for NTA02 SDI/Sport Card	\$231.87	\$257.35
1554 Shielded 4 Port SDI/DCH Cable for NTA02 SDI/Sport Card	\$231.87	\$257.35
1555 Stratum 3 Clock Contr.PCP Assy	\$705.16	\$782.39
1556 Pedestal Assembly Option 11C Cabinet	\$327.93	\$363.96
1557 Junction Box Option 11C Battery Back-up (includes NTA0420)	\$304.74	\$338.23
1558 Ext High Density Tape Drive Kit N/A Power Cord	\$3,035.62	\$3,368.09
1559 Peripheral Cable Assy 40FT LG DB25F	\$96.06	\$106.62
1560 Peripheral Cable Assy 40FT LG DB25M	\$96.06	\$106.62

DESCRIPTION	INSTALLED COST	
	PRE-INSTALL	POST-INSTALL
1561 Meridian Mail Card Option Wall Mount Kit for 2.5 GBs Tape Drive	\$69.56	\$77.20
1562 Extended Battery Box	\$1,631.36	\$1,810.63
1563 2-4 Hour Battery Backup Cable Assembly (for NTA75 Unit)	\$24.84	\$27.57
1564 Battery Backup Unit Seismic Upgrade Kit	\$135.81	\$150.73
1565 2 - 4 Hour Battery Backup	\$4,210.32	\$4,671.44
1566 15 - 30 Minute Battery Backup	\$945.95	\$1,049.55
1567 DCHI/DPNSS DAUGHTERBOARD	\$854.79	\$948.42
1568 DCHI/DPNSS DAUGHTERBOARD	\$854.79	\$948.42
1569 BCM50 RJ-45 Breakout Adapter Kit: Used with a BCM50 wallmount bracket to convert the RJ-21 connector on the base chassis to RJ-45 connectors for digital stations, analog stations and analog trunks.	\$81.15	\$90.07
1570 BCM50 Doc CD Kit - English	\$19.87	\$22.06
1571 BCM50 rack Mount Patch Panel	\$162.31	\$180.14
1572 BCM50 2.0 Software Upgrade Kit with Upgrade CD and Upgrade Authorization Code	\$611.14	\$678.30
1573 BCM50 2.0 Documentation CD Kit - English	\$19.87	\$22.06
1574 Media Services Processor Expansion Card (MS-PEC III).	\$899.32	\$998.14
1575 MSP PEC III	\$899.32	\$998.14
1576 1.5 Mbit DTI/PRI T-1 Cable	\$313.02	\$347.42
1577 PRI/DTI Twisted Pair Carrier Cable	\$188.81	\$209.55
1578 BRI Signalling Processor Option 11 (SISP)	\$2,870.19	\$3,185.60
1579 3-Port SDI Cable	\$172.24	\$191.17
1580 PRI 2MB Option 11 without DCH or CC (EUROISDN/QSIG/MCDN)	\$2,904.91	\$3,223.07
1581 D-Channel DaughterBoard (EUROISDN/QSIG/MCDN)	\$1,917.69	\$2,127.72
1582 Downloaded D-Channel Daughter Board PCB Assembly	\$980.34	\$1,087.71
1583 Ground Bar Option 11C for same room AC Cabinets (1 per system if 2 or more cabinets)	\$71.22	\$79.04
1584 DCE V.24 Operator Cable	\$64.59	\$71.69
1585 BCM Analog DID Bundle	\$2,033.81	\$2,257.31
1586 BCM Call Center Basic to Professional Upgrade With Reporting Software Authorization Code	\$6,374.71	\$7,075.23
1587 BST Central Answering Position Bundle (Charcoal)	\$455.46	\$505.51
1588 BST Central Answering Position Bundle (Platinum)	\$455.46	\$505.51
1589 BCM Call Center Basic to Professional Upgrade with Reporting 2.0 Software Authorization Code	\$6,374.71	\$7,075.23
1590 IP Phone 2002 Expansion Bundle	\$2,901.47	\$3,219.25
1591 IP Phone 2002 Expansion Bundle with Messaging	\$4,296.31	\$4,766.85
1592 IP Phone 2004 Expansion Bundle	\$3,527.52	\$3,913.87

Attachment 3

New Cabling Requirements
(Referenced in Section 6 Technical Requirements, paragraph o. ii)

Administrative markup percentage: 10 %

Attachment 4-1

Maintenance Charges

Manufacturer Nortel

Configuration I (up to 225 universal ports)

Monthly Cost

A. Year 2 unit maintenance charges per port after the one (1) year minimal warranty:

1. PBX per port	\$ <u> 1.00</u>
2. PBX voice mail per port	\$ <u> 15.00</u>
3. PBX PC console	\$ <u> 15.00</u>
4. Paging amplifier	\$ <u> 10.00</u>
5. Paging speaker	\$ <u> 3.00</u>
6. Paging horn	\$ <u> 5.00</u>
7. 2 hour major maintenance response per system	\$ <u>150.00 / HR</u>
8. *	

* Offeror must add all additional monthly unit maintenance charges if applicable.

B. Other equipment to be maintained:

1. Security Features	
a. watch call/head count conference	\$ <u> 50.00</u>
b. rip-out and off-hook alarms	\$ <u> 25.00</u>
c. security display terminal and printer)	\$ <u> 25.00</u>
2. Automatic call distributor system	\$ <u> 25.00</u>
3. Voice processing system	\$ <u> 163.25</u>
4. Station message detail recording system	\$ <u> 25.00</u>
5. *	

*Offeror must add all additional monthly unit maintenance charges if applicable.

C. Guaranteed maximum escalation of maintenance costs on a yearly basis after the warranty period and 2 year:

Year 3 5 % over previous year

Year 4 5 % over previous year

Year 5 5 % over previous year

D. Warranty period: 1 year(s)

Attachment 4-2

Maintenance Charges

Manufacturer Nortel

Configuration 2 (226 to 450 universal ports)

Monthly Cost

A. Year 2 unit maintenance charges per port after the one (1) year minimal warranty:

1. PBX per port	\$ <u> 1.00</u>
2. PBX voice mail per port	\$ <u> 15.00</u>
3. PBX PC console	\$ <u> 15.00</u>
4. Paging amplifier	\$ <u> 10.00</u>

Complete Attachment 6-5 Equipment Escalation Charges.**

** Based upon:

Up to 226 to 450 universal ports that are equipped and wired for:

- 1 attendant console
- 117 multi-button phones, minimum 8 line appearances (no speakerphone)
- 34 multi-button phones, minimum 8 line appearances with speakerphone
- 34 multi-button phones, minimum 8 line appearances with speakerphone and display
- 10 multi-button phones, minimum 8 line appearances with display only
- 195 single line 2500 sets with message waiting lamp and TAP button
- 1 administration terminal for moves adds and changes (MAC) and printer.
- 22 direct inward dialing (DID) trunks
- 21 two-way trunks
- 1 T-1 going long distance traffic to a Qwest point of presence (POP)
- 1 paging access card

Continued Attachment 6-2 (Non-redundant)

- 1 3 zone all-call paging adapter
- 20 power failure circuits
- 1 minimum 4 hour uninterruptible power supply (UPS)

Add optional items: 1 voice process system (12 universal ports and 10 hours of message storage), 1 automatic call distribution (ACD) with standard reports (15 trunks, 9 digital agency phones with headsets & 1 supervisory phone/terminal), 1 station message detailed recording (SMDR) system with 30,000 call records and 1 printer

Watch Call/Head Count Conference: The PBX must have the capability of automatically conferencing a minimum of twenty-one (21) participants by dialing a pre-defined access code.

Rip-Out and Off-Hook Alarms: The PBX must have the capability when any type of phone (analog and digital) that is ripped-out or goes off-hook. Security personnel must receive audio and visual rip-out and off-hook alarms at the Control Center within a maximum of 10 seconds after the phone is off-hook or when the cable is severed or ripped out of the jack. Some PBX manufactures don't have the capability providing the required capabilities with analog phones. The solution found to provide enhanced Line Lock Out alarm reporting capability for analog single line phones was a Ramex unit 25 ports wired with frame and misc. hardware with two (2) pairs from each set appearing on MDF.

Head Count Conference with Printer: Provides real time data for the watch call/head count conference and rip-out and off-hook alarms. The data will include at least the following information: extension number, location, date and time of the event, and the text that identifies whether it is a conference or alarm.

*** Financing factor for calculating monthly payment is .02435.

Susanne Yolton, Technician	10 years	NEC
Paul Achhammer, Technician	5 years	NEC, Active Voice, Avaya

Note: Fill out separate sheet(s) for each location that will be used to fulfill contract.

Maintenance Center Information

- A. Maintenance office locations:
6 State Road, Suite 110, Mechanicsburg, PA 17055
 Telephone number:
800-229-1314
- B. Hours of Operation:
Monday through Friday, 8AM to 5PM
- C. Person in charge:
Jerry Hnat
- D. Number of maintenance personnel at this location:
5
- E. Systems served from this office:
200+
 Total number of stations:
6,000+
- F. Employee's titles and experience: (list all personnel who will service the proposed equipment):

Name	Telecommunication s Experience	Certifications
Gary Delaney, Sr. Technician	25 years	NEC, Fujitsu, Comdial
Alan Swidler. Technician	15 years	NEC, Active Voice
Andrew Keen, Technician	10 Years	NEC Active Voice
Bob Gerhart	10 years	NEC
Michael McDonald	15 years	NEC, Siemens Rohm

Maintenance Center Information

- A. Maintenance office locations:
450 East Germantown Pike, Lafayette Hill, PA 19444

Telephone number:
610-828-5919

- B. Hours of Operation:
Monday through Friday, 8AM to 5PM

- C. Person in charge:
Ron Iski

- D. Number of maintenance personnel at this location:
7

- E. Systems served from this office:
800+

Total number of stations:
22,000+

- F. Employee's titles and experience: (list all personnel who will service the proposed equipment):

Name	Telecommunication s Experience	Certifications
Ron Iski, Operations Mgr.	29 years	NEC, Active Voice
Frank Dura, Sr. Technician	28 years	NEC, Active Voice
Mark O'Malley, Sr. Technician	24 Years	NEC Active Voice
Ronald Shawver, Sr. Technician	20 years	NEC Active Voice
Craig Crawford, Technician	11 years	NEC, Active Voice
Evelyn Zahnow, Technician	15 years	NEC, Active Voice,
Bruce Logeman, Technician	9 years	NEC, Active Voice

IDF ID		IDF Cable	
IDF Patch Panel/Block		IDF Port/Pair	
Station Cable		Station Patch Panel/Block	
Station Port/Pair		Station Jack Number	
Station Cable Category			

Revised 3/11/05

Attachment 12 Cable Management Definitions

Agency – Name of Agency that “owns” the service.

Building Number – The number assigned the building in the ISS or CTAR system.

Building Address – Physical address of building.

State Service Order – ISS or SR Number assigned by the State when requesting service.

Maintenance Vendor/Technician – Name of Vendor and technician performing any work that resulted in a record change.

Maintenance Date – Date any work was performed.

Technician Comments – Enter information on anything about this circuit that may be warranted due to non-standard requirement or installation of this circuit.

Service Provider – The Telecommunication Company that bills the Agency for service which would include: TelCove, Sprint, AT&T and Verizon.

Circuit Carrier – The Telecommunication Company that owns physical infrastructure delivering actual circuit. Such as TelCove, AT&T, State Telephone, Buffalo Valley, Sprint and Verizon.

Billing Telephone Number – The main telephone number either the working telephone number or circuit is billed under.

WTN/Circuit Number – Indicates either the 10 digit telephone number (including area code) or data circuit number being installed, moved or disconnected.

Type of Service – Reflects the type of service such as: Centrex, POTS, analog, digital, fax, TTY, video, radio, ISDN (including SPIDS), Modem, ATM, DSL, BDT, frame relay, ring down and security alarm circuits.

Cable System Type – Indicate if patch panel or block wiring system.

2 or 4 Wire Circuit – Indicate if “2” or “4” wire.

LEC Office Equipment – LEC switch assignment to the circuit.

LEC Primary Cable – The cable identification as it appears entering the MDF room for the primary pair (transmit) of a 4 wire circuit or only pair for a 2 wire circuit.

LEC Primary PP/Block – The primary patch panel or block system located in the MDF.

LEC Primary Port/Pair – The primary port or pair number on the patch panel or block.

LEC Secondary Cable – The cable identification as it appears entering the MDF room for the secondary pair (receive) of a 4 wire circuit.

LEC Secondary PP/Block – The secondary patch panel or block system located in the MDF.

LEC Secondary Port/Pair – Secondary port or pair number on the patch panel or block.

Continued Attachment 12 Cable Management Definitions

Extended Demark Primary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Primary PP/Block – The primary patch panel or block system located at the Extended Demarcation.

Extended Demark Primary Port/Pair – The Extended Demark primary port or pair number on the patch panel or block.

Extended Demark Secondary Cable – The cable identification for the primary pair (transmit) of a 4 wire circuit for an extended demarcation.

Extended Demark Secondary PP/Block – The secondary patch panel or block system located at the Extended Demarcation.

Extended Demark Secondary Port/Pair – The Extended Demark secondary port or pair number on the patch panel or block.

MDF Cable – House cable identification (if any).

MDF PP/Block – The designation of the house patch panel or house block as it appears in the MDF room.

MDF Port/Pair – The designation of the port on the house patch panel or pair on the house block as it appears in the MDF room.

IDF Floor – The floor number the IDF exists on.

IDF ID – The IDF label (if any).

IDF Cable – The cable designation as it enters the IDF closet.

IDF PP/Block – The designation of the IDF patch panel or block as it appears in the IDF.

IDF Port/Pair – The designation of the port on the IDF patch panel or pair on the block as it appears in the IDF.

Station Cable – The cable designation as it leaves the IDF.

Station PP/Block – The designation of the station patch panel or block as it appears in the IDF.

Station Port/Pair – The designation of the port on the station patch panel or pair on the block as it appears in the IDF.

Station Jack Number – The designation of the jack. The designation should appear on the jack and in the case of a new jack, label the jack according to the convention used in the building.

Station Cable Category – Type of cable used, valid types include: Cat3, Cat4, Cat5, Cat5E and Cat6.
